principal clerk. He was Secretary to the Royal Commission on Trade in 1885, and was Private Secretary to Mr. Gladstone during his last ministry in 1892-94, and to Lord Rosebery during his tenure of office. He was made a C.B. in 1894. In February 1897 he was appointed to succeed Sir Alfred Milner as chairman of the Board of Inland Revenue, and in January 1899 was appointed Secretary to the General Post Office in succession to the popular and successful Sir Spencer Walpole, K.C.B. He accepted this post in deference to the special request of the Government. He was created K.C.B. in June 1899. He is married to a daughter of the late Lord Dunleath.

MURRAY, George Robert Milne, F.R.SS. Lond. and Edin., F.L.S., Corresponding Member of the New York Academy of Sciences, &c., Keeper of Botany, British Museum, since 1895, was born at Arbroath, N.B., on Nov. 11, 1858. He was educated at Arbroath High School and Strassburg University. He was Lecturer in Botany at St. George's Hospital, 1882-86, and at the Royal Veterinary College, 1890-95. His publications are: An "Introduction to the Study of Seaweeds," 1895; "Hand-book of Cryptogamic Botany," in which he was joint-author, 1889; "Phycological Memoirs," 1892-95; and botanical papers from 1877 onwards. He married Helen, daughter of the late William Welsh, of Walker's Barns, Brechin, in 1884. Address: British Museum (Natural History), Cromwell Road, S.W.

MURRAY, Sir Herbert Harley, K.C.B., late Governor of Newfoundland, was born in 1829, and is the son of the late Dr. Murray, Bishop of Rochester, and Sarah, daughter of the 9th Earl of Kinnoul. He was educated at Christchurch, Oxford, and entered the Civil Service. He was Deputy-Chairman of the Board of Customs (1887-90), and Chairman (1890-94). In September 1895 he was appointed to his late post, and created a Knight Commander of the Bath. He was Governor of Newfoundland until 1898. Address: St. John's, Newfoundland.

MURRAY, James Augustus Henry, M.A., LL.D., D.C.L., Ph.D., editor of the "Oxford Dictionary," was born at Denholm, near Hawick, Roxburghshire, in 1837, and was educated at Cavers, Minto, Hawick, Edinburgh, taking the London B.A., and becoming M.A. of Oxford (Balliol) in 1885. He began life as a schoolmaster, and was engaged in teaching from 1855 to 1885, becoming successively Assistant Master of Hawick Grammar School, and Master of Hawick Academy,

and Master at Mill Hill School. From 1875 to 1879 he was Assistant Examiner in English at the University of London. He was President of the Philological Society of London for two periods, from 1878 to 1880 and from 1882 to 1884, and in 1879 undertook for this body and for the Clarendon Press, Oxford, the gigantic work of his life, the editorship of "The New English Dictionary on Historical Principles." This colossal work, which, at the present rate of progress, will not be finished till 1910, is based upon the collections of the Philological Society. These consisted of a store of some two million quotations accumulated by many hundreds of readers. The quotations illustrate the history of every word in the English language, including slang, the canting languages, technological phraseology, &c., and all existing combinations of words for seven hundred years past. Dr. Murray and his assistants, who labour in a special scriptorium at Oxford, have found it necessary to restrict themselves exclusively to the linguistic side of their work, avoiding the tendency to be encyclopædic which Dr. Johnson of old was compelled to repress. The Dictionary had been brought down to the word "Hod" in the year 1899. Dr. Murray has been editor of every volume up to the present, except E, which has been in the hands of Mr. Henry Bradley. To commemorate the progress of the Dictionary Dr. MacGrath, then Vice-Chancellor of the University of Oxford, entertained all concerned in its production at a public dinner in October 1897. Dr. Murray has also written voluminously on Archæology, Natural History, History, Dialect, &c., and has contributed especially to the *Transactions of the Philological Society*. Among volumes and editions published by him are: "A Week among the Antiquities of Orkney," 1861; "The Dialect of the Southern Counties of Scotland," 1873; "Synopsis of Paley's 'Horæ Paulinæ,'" 1872-79; "The Minor Poems of Sir D. Lyndesay," 1871; "The Complaynt of Scotland," 1874; "The Romance and Prophecies of Thomas of Erceuldoune," 1875; and the article on the English Language in the "Encyclopædia Britannica." Dr. Murray married Ada Agnes, eldest daughter of George Ruthven, of Kendal, in 1867. Address: Sunnyside, Banbury Road, Oxford.

MURRAY, John, J.P., M.A., F.S.A., F.R.G.S., was born in London in 1851, and was educated at Eton, and at Magdalen College, Oxford. He is the head of the publishing house of John Murray, which was founded in 1768, and he has in 1898 become President of the Publishers' Association. He is also a Fellow of the

Society of Antiquaries, and of the Royal Geographical Society. He has edited Gibbon's "Autobiography," and other works. Mr. Murray is married to the daughter of William Leslie of Wasthill, Aberdeenshire. Address: 50 Albemarle Street, W.; and Athenæum.

MURRAY, Sir John, K.C.B., F.R.SS. London and Edinburgh, D.Sc. Camb., LL.D. Edin., Ph.D. Jena, Knight of the Royal Prussian Order pour le Mérite, Scientific Member of the Fishery Board for Scotland, one of the Secretaries of the Royal Society of Edinburgh, Editor and Director of the "*Challenger Expedition*" publications, was born at Coburg, Ontario, Canada, on March 3, 1841, and is the second son of the late Robert Murray, accountant. He received his early education at the Public School and Professor McAuley's Educational Establishment, London, Ontario, and at Victoria College, Coburg, Ontario. He removed to Bridge of Allan, Scotland, in 1858, where his education was continued under private tuition, and at the High School, Stirling, and at the University of Edinburgh. He studied also in France, Germany, and Belgium. For several years he assisted his relative, the late John Macfarlane, Esq., of Coney Hill, in the formation of a large Natural History Museum at Bridge of Allan. In 1868 he visited Spitzbergen and the Arctic regions as naturalist on board a whaler. In 1872 he was appointed one of the naturalists of H.M.S. *Challenger*, during her circumnavigating voyage for the exploration of the physical and biological conditions of the great ocean basins, 1872-76. In 1876 he became first assistant on the staff appointed by the Government to undertake the publication of the scientific results of the *Challenger Expedition*, and on the death of Sir Wyville Thomson, in 1882, became editor and director of the *Challenger* publications. In 1880 and in 1882 he took part in the *Knight Errant* and *Triton* expedition for the exploration of the Faroe Channel. In 1883 he was mainly instrumental in procuring funds for the establishment of a permanent meteorological observatory on the top of Ben Nevis, and has ever since been one of the directors of that institution. Between 1882 and 1894 he conducted many observations in his steam yacht *Medusa* on the physical and biological conditions of the lochs and seas of Scotland, and founded and maintained marine stations for scientific research at Granton, near Edinburgh, and at Millport, on the west coast of Scotland. He has travelled in nearly all parts of the world. The Reports on the Scientific Results of the *Challenger Expedition*, published by

Her Majesty's Stationery Office in fifty royal quarto volumes, were completed in 1896, and form the most extensive work of the kind ever issued from the press. These reports consist of 3 volumes of a Narrative of the Cruise, 2 of Physics and Chemistry, 1 of Deep-Sea Deposits, 2 of Botany, 40 of Zoology, and 2 of a Summary of Results. Besides editing these Reports he wrote the "Summary of Results," and was joint-author of the "Narrative of the Cruise" and of the "Report on Deep-Sea Deposits." He has thus been engaged in the work of the *Challenger Expedition* for over a quarter of a century, and latterly he bore a considerable part of the expense connected with the completion of these Government publications. He has published papers on the "Structure and Origin of Coral Reefs and Islands"; on "Marine Deposits from many parts of the World"; on the "Height of the Land and Depth of the Ocean"; on the "Total Annual Rainfall on the Land of the Globe"; on the "Exploration of the Antarctic Regions"; on the "Marine Fauna of the Kerguelen Region of the Southern Ocean"; on the "Manganese Oxides and Manganese Nodules in Marine Deposits"; on the "Geology of Malta"; on the "Discovery of America"; on the "Effects of Winds on the Distribution of Temperature in the Sea and Fresh-Water Lochs of the West of Scotland"; on "Bipolarity in the Distribution of Marine Organisms"; and on many other subjects connected with geography, oceanography, and marine biology. In recognition of his scientific work he has been elected Corresponding Member and Honorary Member of a large number of British and Foreign Academies and Scientific Societies, and has been awarded the Cuvier Prize and Medal of the Institut de France; the Humboldt Medal of the Gesellschaft für Erdkunde zu Berlin; the Royal Medal of the Royal Society; the Founders' Medal of the Royal Geographical Society; the Neill and Macdougall-Brisbane Medals of the Royal Society of Edinburgh. He was created K.C.B. in 1898. He married, in 1889, Isabel, daughter of the late Thomas Henderson, Esq., shipowner, Glasgow. Addresses: Challenger Lodge, Wardie, Edinburgh; and Athenæum.

MURPHY, The Right Hon. James, B.A., LL.D. Dublin, is the fourth son of the late Jeremiah Murphy, of Limerick, and was born in 1826. He was educated at Trinity College, Dublin, and was called to the Irish Bar in 1849. He became a Q.C. in 1866, and was in 1883 appointed an Exchequer Judge in the High Court of Justice in Ireland. In the following year he was sworn a member of the Irish Privy Council. He was mar-

ried, in 1864, to Mary, daughter of the late Right Hon. W. M. Keogh. Addresses: Glencairn, Sandycroft, co. Dublin; and Athenæum.

MUTSU HITO, The Mikado, or Emperor of Japan, was born Nov. 3, 1852, or according to the Japanese calendar in 2512, and ascended the throne Feb. 3, 1867, succeeding his father Osa-hito. He began his reign by great reforms conceived in a liberal spirit, resulting in abolishing the feudal system which has impeded the general progress of the country. He has given the Japanese a Parliamentary Constitution based on the example of European nations. He has in fact inaugurated the new era in Japan, which, during his reign, has become unprecedentedly prosperous. During the recent Chino-Japanese war he has shown himself a true leader of his people, making many public appearances, and controlling and rewarding his generals after the fashion of an "enlightened despot" of the eighteenth century in Europe. Unlike most Oriental despots, he is not self-indulgent, but spares no trouble to improve his mind. He presides himself at the meetings of his Privy Council, and has surrounded himself by statesmen who have raised Japan to its present prosperous and advanced civilisation. The Prince Imperial is Yoshi Hito, born Aug. 31, 1879.

MUZAFFER-ED-DIN, Shah of Persia, is a son of Nasr-ed-Din, the late Shah, and was born March 20, 1853, his mother being the "Royal Wife." His father, using his prescriptive right to appoint a successor, nominated him as his heir, although he was only the second son, and one of at least five sons and fifteen daughters. He was Governor-General of the province of Azerbaijan, whilst his elder brother, a dangerous rival, was Governor of Ispahan. On May 1, 1896, the late Shah was assassinated, and Muzaffer-ed-Din came to the throne. He was invested with sovereign power at Teheran on June 8, 1896. Viscount Curzon has pronounced him a prince of good intelligence and amiable intentions.

MYERS, Frederic W. H., was born Feb. 6, 1843, at Keswick, Cumberland, being the eldest son of the Rev. Frederic Myers, Incumbent of St. John's, Keswick. He was educated at Cheltenham and at Trinity College, Cambridge; M.A., 1864; Fellow of Trinity, 1865, and was appointed one of H.M. Inspectors of Schools in 1872. He published in 1867: "St. Paul" (poem); in 1881 and later, "Essays, Classical and Modern"; "Science and a Future Life,

and other Essays," "Life of Wordsworth" in English Men of Letters Series, &c.; "The Renewal of Youth" (poems). He collaborated with Edmund Gurney and Frank Podmore in "Phantasms of the Living" (1886), and has written much in the *Proceedings of the Society for Psychological Research*, 1882-99, of which society he is Hon. Secretary. He married, in 1880, Eveleen, youngest daughter of Charles Tennant, Esq., of Cadoxton. Address: Leckhampton House, Cambridge.

MYLNE, The Right Rev. Louis George, D.D., Bishop of Bombay, son of Major Charles David Mylne, H.E.I.C.S., was born in Paris in 1843, and educated at Merchiston Castle School, Edinburgh, at the University of St. Andrews, and at Corpus Christi College, Oxford (B.A. first class in Lit. Hum., 1866; M.A. 1870; D.D. 1876). He was curate of North Moreton, Berkshire, from 1867 to 1870, and senior tutor of Keble College from 1870 to 1876; was appointed Bishop of Bombay in succession to the late Dr. Douglas, and was consecrated in St. Paul's Cathedral, London, by the Archbishop of Canterbury, May 1, 1876. He resigned the See of Bombay in 1897, and was appointed Vicar of St. Mary's, Marlborough, in the same year. He is author of several Charges to the Church in India, and of two volumes of sermons, one of which was published in India. The titles of his works are as follows: "English Church Life in India," 1884; "Corporate Life of the Church in India," 1888; "Counsels and Principles of the Lambeth Conference of 1888"; "Churchmen and the Higher Criticism," 1893. Dr. Mylne married, in 1879, Amy Frederica, daughter of D. W. Moultrie, Esq., and has six children. Address: c/o Messrs. Grindlay & Co., 55 Parliament Street, S.W.

N

NANSEN, Fridtjof, Sc.D., Ph.D., LL.D., D.C.L., was born near Christiania on Oct. 10, 1861. He went to the University of Christiania in 1880, and decided upon studying zoology; therefore, to study animal life in high latitudes he, in March 1882, went out in a Norwegian sealing ship to the Jan Mayen and Spitzbergen seas, and afterwards to the sea between Iceland and Greenland. He returned from this expedition in July 1882, and later in the same year was appointed curator in the Natural History Museum at Bergen (Norway). In 1888 he took his degree as Doctor of Philosophy, and in May of that year started on his

memorable journey to Greenland, which continent he crossed, returning in May 1889, after which he was appointed, by the Government, curator of the Museum of Comparative Anatomy at the Christiania University. He has written various papers upon anatomical subjects; and the account of one of his expeditions "Across Greenland" was published in 1890. The Norwegian Storting, or National Assembly, some years ago voted a grant of 200,000 kroner for a fresh expedition to the North Pole. The charge of the expedition was entrusted to M. Fridtjof Nansen, and there are several features of special interest in connection with the inception of this further effort to reach the North Pole that call for notice. Hitherto, with one possible exception, all attempts to reach the North Pole have been made in defiance of the obstacles of nature. Now an attempt was to be made to ascertain whether nature herself had not supplied a means of solving the difficulty, and whether there was not, after all, a possibility of reaching the North Pole by utilising certain natural facilities in these frozen seas of which all early explorers were ignorant. The circumstances upon which these new hopes were based may be thus summarised. The *Jeannette* expedition of 1879-81 and the loss of that vessel seemed to sound the knell of all expeditions to reach the Pole by Behring Strait, but in June 1884, exactly three years after the *Jeannette* sank, there were found near Julienshaab, in Greenland, several articles which had belonged to the *Jeannette*, and been abandoned by the crew at the time of its wreck, and which had been carried to the coast of Greenland, from the opposite side of the Polar Sea, on a piece of ice. This fact at once aroused curiosity as to how it accomplished that mysterious journey across the Arctic Ocean, and as to what unknown current had borne that significant and informing message from Behring Strait to Greenland; and it was thought highly probable that there was a comparatively short and direct route across the Arctic Ocean by way of the North Pole, and that nature herself had supplied a means of communication, however uncertain, across it. Dr. Nansen's expedition endeavoured to realise these hopes of a direct route across the apex of the Arctic Ocean. In 1892 Dr. Nansen completed a polar ship, the *Fram* (Onward), which was rigged as a three-masted schooner, and had an engine of 160 horse-power and a displacement of 800 tons. The sides were so constructed as to force all ice meeting the vessel underneath her, so that the hull escaped being nipped or "screwed." Dr. Nansen, with a crew of twelve men, set out from Norway on July

21, 1893, taking on board thirty-four dogs at Khabarova on Yugor Strait. The navigation of the north coast of Asia was accomplished with considerable difficulty on account of the inaccuracy of the existing maps. Cape Chelyuskin was rounded on September 10, and deciding not to carry out his original intention of calling at Olenek for more dogs, Dr. Nansen pushed on towards the New Siberian Islands. At this point the *Fram* was turned due north on September 18, and, four days later, a mooring was made to an ice-floe, north of Sannikof Island, in about $78\frac{1}{2}^{\circ}$ N. Here the good *Fram* stuck, and the ice held her fast for three years, when she broke a way out on the north of Spitzbergen. However, when it became evident that the *Fram* was fixed, the men relieved the monotony by games and other cheering pursuits. The great floe in which the *Fram* was frozen began to drift over a degree to the N.W., but came back to her starting-point in November. The course of the floe was uneven, passing the 80th degree in April 1894, moving to the 82nd by the middle of June, but on August 28 coming back to 81° again. Still, subsequent progress was slow but sure, and by March 1895 another three degrees had been traversed, and the *Fram* was 84° N., and about 103° E. On March 14, 1895, Nansen and his *alter ego*, Johansen, at 84° N. lat., started on their famous journey polewards. The route was at first due north, and, despite almost insuperable difficulties, in three weeks 140 statute miles were covered. Changing his route to N.W. Nansen reached (April 7, 1895) lat. $86^{\circ} 13' 6''$ N. in long. 95° E., and pushing on alone for a few miles, the explorer attained $86^{\circ} 14'$. This stupendous fact in Arctic explorations means that Nansen and Johansen, in the space of twenty-four days, travelled 150 miles in a region "far beyond the farthest point ever reached by man before." The *Fram* itself in December 1894 passed the highest record previously attained— $83^{\circ} 24'$ —"so that in something like four months close on three degrees of northing had been made—a feat unprecedented since the days of Baffin. Nansen recognising only too well the danger of pursuing a northern course—winter would have overtaken him had he done so—prudently resolved to veer and make for Spitzbergen or Franz Josef Land. The story of the journey south has been described as one of the most exciting in the literature of exploration. The dogs became weaker and weaker, and, as they died off, were given to the remainder for food, and, on one occasion, Nansen and Johansen had to be content with a meal of dog's blood. At last, in the beginning of August 1895, land was reached, but

before they could proceed farther the sea got blocked up, and another winter in the darkness became inevitable. Quarters were taken up on an island about the middle of the Franz Josef Land group, and there the winter was passed mainly in sleep. In May 1896 the dreary wintering came to an end, and the journey south and west to Spitzbergen was resumed. The historic meeting with Mr. Jackson, the explorer, was made on this southern course, and at last, "after fifteen months' solitary struggling with ice, and water, and darkness, and cold, begrimed with a year's dirt," the two weary but uncomplaining travellers plunged into civilisation and comfort. The scientific results of Dr. Nansen's expedition are of considerable value. Briefly put, his achievements are as follows: (1) he has succeeded in getting within 250 statute miles of the North Pole, some 200 miles nearer than the highest previous attainment; (2) he has established the essential truth of the theory as to polar currents; and (3) he has accumulated a mass of evidence bearing on polar navigation of the highest scientific importance. On Feb. 8, 1897, Dr. Nansen delivered a lecture on "Some Results of the Norwegian Arctic Expedition" before a meeting of the Royal Geographical Society at the Albert Hall, Kensington. The President of the Society (Sir Clements Markham) occupied the chair, and was supported by the Prince of Wales, the Duke and Duchess of York, the audience including many persons of distinction. At the conclusion of the lecture the Prince of Wales, on behalf of the Society, presented Dr. Nansen with a medal specially struck in his honour. During the same month (February 1897) Dr. Nansen's great work, "Farthest North," was published. The full title of this book, which, in importance, takes high rank in the scientific literature of the century, is: "Fridtjof Nansen's 'Farthest North,' being the Narrative of the Voyage and Exploration of the *Fram*, 1893-96, and the Fifteen Months' Sledge Expedition. By Dr. Nansen and Lieutenant Johansen, with an Appendix by Otto Sverdrup." After a short rest of a few months in his native land, Dr. Nansen started on a lecturing tour through Europe. He married, in September 1889, Mdlle. Eva Sars, an eminent singer, the youngest daughter of the late M. Sars, Professor of Zoology in Christiania University. Address: Lysaker, near Christiania.

NAOROJI, Dadabhai, late M.P. for Central Finsbury, is the first native of India who has represented a British constituency in Parliament. He is the son of a Parsee priest, and was born in Bombay on Sept. 4, 1825. When only four years

old he lost his father, his early education thus devolving on his mother, who brought him up with great diligence and care. In India the opportunities of receiving an English education could hardly be said to have existed in the thirties, and young Naoroji was put into the only Government school that Bombay could boast at the time, being a seminary which ultimately developed into the Elphinstone Institution. Here his career was one of uniform success. From the first he showed an unusual predilection for mathematics, and carried away almost all the prizes and exhibitions for proficiency in his favourite study, as well as for political economy and natural philosophy. His highest academical reward came when he was elected to the Chair of Mathematics and Natural Philosophy in his own college, the first Professorship ever held by an Indian in any prominent college in his country. Mr. Naoroji became famous as a reformer. Whatever could conduce to the regeneration of his countrymen, politically, socially, and morally, whether it was the abolition of child marriage and re-marriage of widows, whether the educating and cultivating of public opinion in the community, the institution of schools, libraries, and gymnasiums, Mr. Naoroji was in the centre of each movement. Such institutions as the Students' Literary and Scientific Society, the Dnyan Prasarak Society, the Rahnumaya Mazdyasna Sabha, the Iranee Fund, the Bombay Gymnasium, the Framjee Cowasjee Institute, the Native General Library, the Victoria Museum, the *Rast Goftai* newspaper, an independent organ of native opinion, all owe their existence to his initiative or co-operation. He first left Bombay for England in 1855 as a partner in the firm of Messrs. Cama and Co., the first Indian house established in London and Liverpool, and has resided here, off and on, since then. After his arrival he lost no time in rousing a deep sympathy for his country and a high regard for his integrity and ability in such noted friends of India as the late John Bright and Henry Fawcett, and succeeded in furnishing most of them with effective briefs for fighting the battles of India in England. The question of holding examinations simultaneously in India and England for admission to the Indian Civil Service was then present in his mind, and he succeeded, through the kindness of the late Sir Erskine Perry, an early friend and patron, in unearthing a minute of a Committee of the Council of the Secretary of State for India which, so long ago as 1860, had recommended a step which only the other day found a confirmation in a resolution of the present House of Commons, viz. to hold examina-

tions simultaneously in England and India for all the Civil Services. Returning to India in 1864, he offered to pay 50,000 rupees (a very large slice out of his hard-earned money) to found a scholarship in Bombay in honour of Lord Canning, if others should adequately supplement it; but on account of the financial crisis of that period, in which Mr. Naoroji and others suffered, the proposition fell through. Back again in London in 1867, he, with other friends, established the East India Association, and induced the princes and chiefs of India to endow it handsomely. From 1868 he carried on a correspondence with Lord Iddesleigh (then Sir Stafford Northcote) and Mr. Grant Duff, which, with the help of a memorial proposed by him in the East India Association, resulted in the addition of a clause in the Government of India Act of 1870 opening the Civil Service to a limited number of native Indians. In 1869 the residents of Bombay held a public meeting, and decided to present Mr. Naoroji with his portrait and a purse. Mr. Naoroji contributed largely to the appointment of the Select Committee to inquire into the finances of India (1873). His appointment, in 1874, as Prime Minister of the Prince of Baroda called forth his highest faculties as a statesman; and Sir Lewis Pelly, the British Resident at the Court, stated in recognition of his services, "that until purged by Mr. Dadabhai, the criminal and civil administration of justice was notoriously venal and corrupt." He was a member of the Corporation and Municipal Council of Bombay; as such he discovered the inaccuracy that had crept into the mode of calculating the instalment of principal and interest payable on account of the Vehar Waterworks, which had caused a loss to the Municipal Treasury to the extent of over £600,000 sterling. About this time came out his treatise, called the "Poverty of India," containing conclusions in which Major Baring (now Lord Cromer) subsequently concurred. Other works of Mr. Naoroji are: "England's Duties to India," and "Mysore," 1867; "The Expenses of the Abyssinian War," "Reply to Lord William Hay on the Mysore Succession," and the "Duties of the Local Indian Associations," 1868; "On the Indian Civil Service Clause in the Governor-General of India's Bill," "On the Admission of Educated Natives into the Indian Civil Service," and on "The Bombay Act of 1869," 1869; "The Wants and Means of India," 1870; "The Commerce of India," "Cotton Frauds," and "Financial Administration of India," 1871; "Correspondence with the Secretary of State on the Condition of India," 1880; a "Note on General Educa-

tion," a "Minute on Technical Education," and several other pamphlets. In 1885 Mr. Naoroji was appointed a member of the Legislative Council of Bombay. In 1886 he unsuccessfully contested the Holborn Parliamentary Division in London. In 1892 he was returned as a Liberal member by Central Finsbury, his majority being phenomenally small. When he visited India in December 1893, Indians of all classes and creeds joined in enthusiastic and vast demonstrations of welcome. Mr. Naoroji presided in 1886 over the Second Session at Calcutta of the Indian National Congress, and over the Ninth Session at Lahore, in the Punjab, in December 1893. He sat as a Gladstonian in Parliament, and on other than Indian topics is an advanced Liberal. He is President of the London Indian Society. As head of this Society he presided over a Conference in December 1897, and moved a very long resolution condemning the policy of the Government in India. In August 1894 Mr. Naoroji moved in the House of Commons for an inquiry into Indian affairs, and, on the occasion in question, achieved the distinction of making the longest speech—nearly two hours—of the session. Mr. Naoroji's perseverance was finally rewarded, by the appointment in 1895, after a second motion on his part, as an amendment to the Address, of a Royal Commission, and Mr. Naoroji was invited to join it. Mr. Naoroji submitted to his colleagues on that body several further statements, expanding his case as argued in the House of Commons, and voluntarily presented himself as a witness before the Inquiry. He is intending, on the completion of the great task to which the Commission is devoting itself, to again seek the suffrages of the electors, in order that he may have an opportunity from his seat in Parliament of carrying to a beneficent issue those suggested Indian reforms which he has largely been instrumental in initiating.

NAPIER, Thomas Bateman, LL.D., is the son of Richard Clay Napier, of Knutsford, Cheshire, and was born on July 11, 1854. He was educated at the University of London, where he took first-class honours in Common Law and Equity; and he was also First Prizeman and Scholar of the Incorporated Law Society in 1876, gaining as well the Gold Medal for Conveyancing. Subsequently he became a student of the Inner Temple, gained the First Senior Studentship in Roman Law and Jurisprudence in 1882, and was called to the Bar in the following year. Mr. Napier is the author of "Leading Decisions and Principal Statutes," 1881-84. Address: 3 New Square, W.C.

NAPOLÉON, Victor Jerome Frederick, son of Prince Napoleon and the Princess Clotilde, was born July 18, 1862. On the death of the Prince Imperial in 1879, when his father held the position of head of the House of Bonaparte, the claim was disputed by M. Paul de Cassagnac and several other Imperialists, who put forward the young Prince Victor as his father's rival. But this move was not encouraged by the son, though the latter, it is understood, was nominated in the Prince Imperial's will as his successor. During the last years of his father's lifetime he was put forward by ardent followers as head of the "Victorians," who at one time were fiercely opposed to the "Jerômistes," but Prince Victor is said to have denied that he was in any way opposed to his father's policy, and even accompanied him on a visit to the ex-Empress in England in 1883. In 1884, however, he put himself at the head of a new Bonapartist faction, and left his father's house, having been urged to this step by the Bonaparte paper *Le Pays*. At the same time a revenue of 40,000 francs a year was left him, which further accentuated his independence. When the Expulsion Bill of 1886 became law the Prince and his father were exiled from France, but while the latter took up his abode in Switzerland, the son went to Brussels. Nor did he again see his father till the latter lay dying in Rome, in March 1891. In 1889 he issued a manifesto previous to the general election of that year. He is now head of the French Bonapartist party, and has made several ineffectual attempts to stir up French opinion in his favour. In 1898 there was a rumour that the small remnant of French Bonapartists were dissatisfied at his lack of initiative, and that, in consequence, he had resigned his titular leadership to his younger brother, Prince Louis Napoleon, who is a Colonel in the Russian cavalry, and reported to be made of far sterner stuff than his elder brother.

NARES, Vice-Admiral Sir George Strong, K.C.B., F.R.S., is a son of the late Captain William Henry Nares, R.N., of Danestown, Aberdeen, by his marriage with a daughter of Mr. E. G. Dodd, and a great-grandson of Sir George Nares, formerly one of the Justices of the Court of Common Pleas. He was born in 1831, and was educated at the Royal Naval College, New Cross, where he gained the naval cadetship which is given annually to the most promising pupil by the Lords of the Admiralty. He saw some service in H.M.S. *Canopus* forming part of the Channel Squadron, and afterwards in H.M.S. *Havannah* on the Australian station. He was a mate on board the *Resolute* in the

Arctic Expedition of 1852-54, when he took an active share in the winter amusements, and did his part manfully as a sledge-traveller. He acted in the theatricals, and gave a series of lectures to the men on winds and on the laws of mechanics. In the spring of 1853 he was auxiliary to Lieut. Meham, and travelled over 665 miles in sixty-nine days. In 1854 he started in the intense cold of March, and went over 586 miles in fifty-six days. On the return of this Arctic Expedition he served in H.M.S. *Glutton* during the last year of the Crimean war; afterwards in H.M.S. *Conqueror* on the Mediterranean station. On the inauguration of the present system of training for naval cadets, he served as Lieutenant in charge of cadets under the late Captain Robert Harris, in H.M. ships *Illustrious* and *Britannia*. In 1854 he was promoted to the rank of Commander, being attached also to the training-ship *Boscawen*. In 1866-67 we find him employed at the Antipodes in command of the *Salamander*, engaged in supporting the original settlement of Royal Marines at Somerset, Torres Strait, North Australia, and in surveying the eastern and north-eastern coasts of Australia. In 1869 he was sent in H.M.S. *Shearwater* to survey and report upon the Gulf of Suez. From 1872 down to the end of 1874 Captain Nares was in command of H.M.S. *Challenger*, employed in deep-sea exploration round the world. He was then ordered home, and appointed to the command of the Arctic Expedition. The two ships composing the expedition, H.M.S. *Alert* and H.M.S. *Discovery*, commanded respectively by Captains Nares and Stephenson, left England in May 1875, with the hope of reaching the North Pole *via* Smith's Sound. The expedition reached the mouth of Lady Franklin Bay on August 27. Here Captain Nares left the *Discovery* to take up her quarters for the winter, while the *Alert* continued her course along the western shore of Robeson Channel. This course she held until, on September 1, the *Alert* herself attained the then highest latitude, and was made fast to some grounded bergs of ice, within 100 yards of a tolerably level beach in lat. 82° 27' and long. 61° 22'. Lieut. Rawson, of the *Discovery*, with his sledge-crew of eight men, had accompanied the advance ship with the object of returning to the *Discovery* during the autumn with news of the *Alert's* progress. This journey, however, he was never able to accomplish, the snow being too deep, and the ice too treacherous and too frequently in motion, to render sledge-travelling possible for a distance of seventy to eighty miles at so late a period of the year. The *Discovery* therefore knew nothing of her consort's position until the ensuing spring.

On Oct. 12 the sun finally disappeared, leaving the *Alert* in total or partial darkness for 142 days, and the *Discovery* for almost the same period. After the return of daylight, sledge expeditions were arranged. A party, numbering in the aggregate fifty-three persons, led by Commander Markham and Lieut. Parr, made a very gallant attempt to reach the Pole. They were absent seventy-two days from the ship, and on May 12 succeeded in planting the British flag in lat. 83° 10' 26" N. From this position there was no appearance of land to the northward, but curiously enough, the depth of water was found to be only 72 fathoms. The men suffered intensely from the extreme cold, many were attacked by scurvy, and it was with great difficulty that the sledging party made their way back to the ship. Captain Nares now resolved to return home, as with the whole resources of the expedition he could not hope to advance more than about 50 miles beyond the positions already attained. The expedition arrived at Valentia, Oct. 27, 1876. In reward for his services Captain Nares was appointed a K.C.B., December 1. He was afterwards again placed in command of the *Alert*, which sailed from Portsmouth, Sept. 24, 1878, to survey Magellan Strait, South America. From 1879 to 1897 he was engaged at the Board of Trade as Professional Officer of the Harbour Department, and is now Acting Conservator of the river Mersey. He retired from the navy in 1886, and was made a Vice-Admiral in March 1892. He is the author of "The Naval Cadet's Guide, or Seaman's Companion; containing complete Illustrations of all the Standing Riggings, the Knots in Use, &c.," 1860, afterwards published under the title of "Seamanship," 2nd edit., 1862; 3rd edit., 1865; 4th edit., 1868; "Reports on Ocean Soundings and Temperature" (in the *Challenger*), printed by direction of the Lords of the Admiralty, 6 parts, 1874-75; "The Official Report of the Arctic Expedition," 1876; and "Narrative of a Voyage to the Polar Sea during 1875-76 in H.M. ships *Alert* and *Discovery*," 2 vols., 1878. He married, in 1858, Mary, daughter of the late Mr. W. G. Grant, of Portsmouth. Address: Claremont Road, Surbiton.

NAST, Thomas, American illustrator, was born at Landau in Bavaria, on Sept. 27, 1840. He went to America with his parents in 1846, his father, a musician in the Bavarian army, being advised to leave Germany, as his opinions were too Radical for the times. Young Thomas soon exhibited a preference for an artistic career, and at an early age, with very little instruction, began to furnish sketches for

Frank Leslie's Illustrated Newspaper, and other periodicals. He was sent to England in 1860, to make illustrations of the prize-fight between Heenan and Sayers, for the *New York Illustrated News*. That finished, he joined General Medici in the campaign in which Garibaldi freed Sicily and Naples, and created the united kingdom of Italy. While in Italy he furnished sketches for various English, French, and American papers. Returning to America in February 1861, just before the breaking-out of the Civil War, he found the material which made his reputation as the patriotic artist of the war, and he produced from week to week those powerful pictures which roused the citizen and cheered the soldier. During the period of corruption which followed the war, he made his best-remembered hits against the Tammany Ring in New York City. He is regarded as the father of American caricature, and it is generally conceded that to him is largely due the development of this branch of art there. He has also found time to illustrate a number of books and make designs for panoramas, as well as to paint one completely. In 1873 he made his first appearance as a lecturer, illustrating in the presence of the audience. He began with crayon sketches and advanced by degrees to oil paintings, possessing wonderful dexterity of execution. He has since lectured in 1885 and 1888. He has also executed a number of oil paintings, the largest of which is now in the possession of the 7th Regiment of New York, and hangs in the Colonel's room, in their armoury. It represents the departure of the regiment for the war, April 19, 1861. He is a veteran member of the New York 7th Regiment, and served with his company during the riot of July 12, 1871. His home is at Morristown, N.J.

NATALIE, Queen of Serbia, is the daughter of Pierre Ivanovitch Kechko, and was born May 2, 1859, and married at Belgrade to Milan I., ex-King of Serbia, Oct. 17, 1875; and was divorced from him in October 1888. Her son, Alexander I., who was born at Belgrade, Aug. 14, 1876, is now king. The validity of the divorce of the Queen, as conducted by the aged Metropolitan Theodosius alone, at the request of the king, was disputed by her Majesty; and in reply to a letter addressed by her to the Metropolitan Michael, she received a letter signed, not only by him, but also by two members of the Synod, stating that the decree of the Metropolitan Theodosius is null and void, having been granted without consultation with the Synod, and without the Queen having been heard in her own defence. Therefore there can be no doubt that the

Queen's divorce was illegal. It was granted by an aged prelate who was almost in his dotage, as it has since transpired, and who has since retired into a monastery. It was contrary to the ecclesiastical law of the land, which alone has jurisdiction in Serbia over divorce cases, and it was declared invalid by the Holy Synod. In April 1891 King Milan engaged to absent himself from Serbia till his son's coming of age, on condition that the Queen should not be allowed to reside in the country. Accordingly, on May 18, 1891, Queen Natalie was expelled from the private house in Belgrade where she had resided since her divorce, but in January 1893 she was reconciled to the ex-king.

NAVARRO, Madame Antonio, née Mary Antoinette Anderson, an American actress, was born at Sacramento, California, July 28, 1859. Her parents moved to Kentucky when she was only six months old, and her home was at Louisville in that State until she went on the stage in her seventeenth year. Her first representation was as Juliet, Nov. 27, 1875, which met with a marked success. After travelling for a few years in the south and west, she made her appearance before eastern audiences in the large seaboard cities in 1880, where she was as warmly received as she had previously been in smaller places. Her career from the first was one of unchecked prosperity, and few actresses have met with more popular favour than has Miss Anderson. Her first visit to England (1879) was for pleasure only, but on her return (1884-85) she played at the Lyceum Theatre, during Mr. Irving's absence in America. It was during this second visit that the Memorial Theatre at Stratford-on-Avon was opened by Miss Anderson as Rosalind in "As You Like It," and her portrait in that character forms one of the panels in the theatre. Her principal parts have been Juliet, Bianca in "Fazio," Julia in "The Hunchback," Evadne, Meg Merrilies, Pauline in "The Lady of Lyons," Galatea, Clarice in "Comedy and Tragedy," Parthenia, and Rosamond. From 1885 to 1889 she had many engagements both in Great Britain and in America, but a prolonged illness during 1889 compelled a temporary retirement from the stage, and early in 1890 she announced her withdrawal from the dramatic profession; shortly afterwards she was married in London to M. Antonio Navarro de Viana, a citizen of New York.

Address: The Court Farm, Broadway, Worcestershire.

NEILSON, Julia (Mrs. Fred Terry), was born in London in 1868, and spent the first twelve years of her life there, when with her family she went to live in Wiesbaden. Here she developed a musical talent, and in 1883, on the return of her family to London, was entered as a student at the Royal Academy of Music, and from the age of sixteen onwards studied her art, chiefly under Mr. Randegger, winning such academic distinctions as the Llewellyn-Thomas Gold Medal for declamatory singing (1885), the Sainton-Dolby Prize, and the Westmoreland Scholarship. During her three years at the college she also took lessons in elocution from Mr. Walter Lacy, and sang several times in public at the Royal Albert Hall and at other concerts, winning the suffrages of critics and public alike. In the autumn of 1887 she acted in some amateur dramatic performances, ending by an appearance in W. S. Gilbert's "Pygmalion and Galatea" at St. George's Hall, Langham Place, which made so marked an impression on her audience that Mr. Randegger and Sir Joseph Barnby, who were present, urged her to take up the dramatic, as opposed to the purely musical, career. Mr. Barnby introduced her to Mr. Gilbert, who soon perceived her true dramatic gift. At a Lyceum matinée, in March 1888, Miss Julia Neilson made her début professionally as Cynisca in "Pygmalion and Galatea." Miss Mary Anderson acted Galatea, and the audience was considerable and cultivated. Soon after this, her first success, she appeared at a Savoy matinée as Galatea. Her next part was Lady Hilda in Gilbert's "Broken Heart," and in "The Wicked World," revived for her benefit, she played Selene with increasing acceptance. Mr. Rutland Barrington was thus led to offer her the post of leading lady at the St. James's, where she appeared with him in "Brantingham Hall," which was especially written for her by W. S. Gilbert. Afterwards she was engaged by Mr. Tree to play Stella Darbyshire, Mrs. Tree's part, in "Captain Swift." She toured for some months in this part, steadily improving her talent, and returning to the Haymarket, played "Julie de Noirville" in "A Man's Shadow," and the title-roles in "The Dancing Girl" and "Hypatia," two parts for which her statuesque presence eminently fitted her. Her last notable appearance was as Rosalind, at the St. James's, when "As You Like It" had the longest recorded run in London. In 1898 Miss Julia Neilson played the Gipsy heroine in the "Gipsy Earl" at the Adelphi. She

is married to Mr. Fred Terry. Address : 27 Elm Park Gardens, Kensington.

NELSON, The Right Hon. Sir Hugh Muir, K.C.M.G., Premier of Queensland, was born at Kilmarnock, Dec. 31, 1836, and is the son of the Rev. W. L. Nelson, LL.D. He was educated at the High School, Edinburgh, and the Edinburgh University, and before he was twenty emigrated to Queensland. It was not until 1883 that he entered public life, being elected member for Northern Downs in the Assembly. In 1888 he was returned for Murilla, and became Secretary for Railways in the M'Ilwraith ministry of June of the same year. In 1892 he was Colonial Treasurer, and in the next year he became Premier, which post he has held ever since. In 1896 he was created a Knight, and came to England for the Diamond Jubilee, with the other Colonial Premiers, in 1897, on which occasion he was made a Privy Councillor. Address : Gabbinbar, Too Woomba, Queensland.

NETTLESHIP, Edward, F.R.C.S., received his medical education at King's College, the London Hospital, and the Royal Veterinary College. He has been Ophthalmic Surgeon to the Hospital for Sick Children, and is now Consulting Ophthalmic Surgeon to St. Thomas's Hospital, and Surgeon to the Royal London Ophthalmic Hospital, where he is also Curator of the Museum. It will be remembered that, in May 1894, Mr. Nettleship, together with Dr. Habershon and Dr. J. B. Lawford, operated on Mr. Gladstone for cataract in the right eye. In 1875 he reported to Government on Ophthalmia in Pauper Schools, a subject that now commands the attention of persons interested in Board Schools, and has published several works on the eye, including a "Student's Guide to Diseases of the Eye," 6th edit., 1897, and contributions to various transactions and learned periodicals. Address : 5 Wimpole Street, W.

NEVARES, Celso, Consul-General of Ecuador in London, was born in Ecuador

on June 13, 1850, and belongs to a high family of that country. He has resided in this country for the past twenty-six years, is married to an English lady, and three years ago was promoted by his Government from the position of Consul to that of Consul-General. On the occasion of the Diamond Jubilee celebration in 1897, he represented his country, and was presented by the Queen with the Commemoration Jubilee medal. Señor Nevares has done very much to assist the commercial houses of this country in bringing their specialities before the notice of the people of Ecuador. Señor Nevares is deeply interested in every movement identified with the well-being of the Spanish-American states, and he has taken an active part in promoting the philanthropic objects of the Ibero-American Benevolent Society, of whose Executive Committee he is a member. He also belongs to the Association of Foreign Consuls. Address : Consulate of the Republic of Ecuador, 3 Copt-hall Buildings, Cophthall Avenue.

NEVILLE, Hon. and Rev. Latimer, M.A., the fourth son of Richard Neville, 3rd Baron Braybrooke, and Lady Jane, daughter of the 2nd Marquis Cornwallis, was born at Audley End, Essex, on April 22, 1827. He was educated at Eton, and at Magdalene College, Cambridge, where he took a second class in the Classical Tripos. After being a Fellow of his College, he became Master in 1853, and served the office of Vice-Chancellor in 1860 and 1861. He has been Rector of Heydon, Essex, since 1851; was made an Hon. Canon of Rochester, and subsequently of St. Albans in 1873; was appointed Rural Dean of Saffron Walden in 1875; and was Proctor in Convocation for the Diocese of St. Albans from 1877 to 1885. He has published a few hymns, one in particular entitled "Royalty," dedicated on the occasion of the Jubilees in 1887 and 1897 to the Prince and Princess of Wales. Address : Magdalene College, Cambridge.

NEWBOLT, Rev. William Charles Edmund, M.A., Canon of St. Paul's in succession to the late Dr. Liddon, youngest son of W. R. Newbolt and Ann Frances, daughter of T. Domen Magens, was born at Somerton, Somerset, on Aug. 14, 1844, and educated at Uppingham and Pembroke College, Oxford, of which college he was a scholar. He took his degree with honours in classics in the year 1867, and was ordained the next year. After holding for two years a curacy at Wantage, he was vicar of Dymock, Gloucestershire, from 1870 to 1887, when he was trans-

ferred to Malvern Link. In 1887 he was appointed Principal of Ely Theological College, and at the same time Honorary Canon of the diocese. He retired from Ely College in 1890, when he was appointed Canon of St. Paul's, and afterwards Chancellor. In 1892 he became Examining Chaplain to the Bishop of Ely. He is the author of "Counsels of Faith and Practice," 1883; "The Man of God," 1887; "Penitence and Peace," 1892; "Speculum Sacerdotum," 1894; "Priestly Ideals," 1898. He was Boyle Lecturer, 1895-96, and in the same year published "The Gospel of Experience." He married, in 1870, Fanny Charlotte, fourth daughter of W. Wren, Esq. Address: 3 Amen Court, St. Paul's, E.C.

NEWCASTLE, Duke of, Henry Pelham Archibald Douglas Pelham-Clinton, D.L., J.P., was born on Sept. 28, 1864, and is the son of the 6th Duke, whom he succeeded in 1879, and of Adela, daughter of the late Henry T. Hope, of Deepdene, Surrey. He was educated at Eton, and at Magdalen College, Oxford. He is Lord High Steward of Retford, Master Forester of Dartmoor, Keeper of St. Briavel's Castle, and was a member of the London School Board from 1894 to 1897. He married Kathleen, daughter of Major and the Hon. Mrs. Candy. Addresses: 11 Hill Street, W.; and Clumber Park, Worksop.

NEWCASTLE-ON-TYNE, Bishop of. See JACOBS, THE RIGHT REV. EDGAR.

NEWCOMB, Simon, LL.D., Ph.D., was born at Wallace, Nova Scotia, March 12, 1835. While a youth he went to the United States, and was for several years engaged as a teacher. In 1857 he was employed on the computations for the "American Nautical Almanac." In 1858 he began original investigations in astronomy, and in 1861 was appointed Professor of Mathematics in the United States Navy, and stationed at the Naval Observatory. He negotiated the contract for the great 26-inch telescope and supervised its construction. He was made Secretary of the Commission created by Congress in 1871 to observe the transit of Venus (Dec. 9, 1874). In 1872 he was elected an Associate of the Royal Astronomical Society, and in 1874 received its Gold Medal for his tables of Neptune and Uranus. In the same year he was chosen a Corresponding Member of the Institute of France; and in 1875 he received the honorary degree of Doctor of Mathematics and Physics from the University of Leyden. In 1874 Columbia University, Washington, con-

ferred on him the degree of LL.D.; a similar honour came from Yale in 1875, in 1884 from Harvard, and in 1887 from Columbia (New York). In 1886 he received from Heidelberg the degree of Ph.D. In 1878 the Haarlem Society of Sciences awarded the Huyghens medal to Dr. Newcomb, and in 1890 he received the Copley Medal of the Royal Society. He went to the Cape of Good Hope to observe the transit of Venus on Dec. 6, 1882. Since 1877 he has been Superintendent of the "Nautical Almanac," and in that capacity has instituted a series of researches on the motions of the planets which are published from time to time as "Astronomical Papers of the American Ephemeris." These researches are to form the basis of new tables of the eight major planets. Among his other published works are: "On the Secular Variations, &c., of the Asteroids," 1860; "Investigation of the Distance of the Sun," 1867; "On the Action of the Planets on the Moon," 1871; "Tables of the Planet Neptune," 1865; "Tables of Uranus," 1873; "Integrals of Planetary Motion," 1874; "Researches on the Motion of the Moon," 1878; "Popular Astronomy," 1878; "A Course of Mathematics for Schools and Colleges," 1881-87; and "Principles of Political Economy," 1886.

NEWDIGATE-NEWDEGATE, Lieut.-General Sir Edward, K.C.B., was born June 15, 1825, at Astley Castle, Warwickshire, and is the son of Francis Newdigate, Esq., and Lady Barbara, daughter of the 3rd Earl of Dartmouth, and was educated at the Royal Military College, Sandhurst. He held a commission as second Lieutenant in the Rifle Brigade, May 29, 1842; Lieutenant, April 14, 1846; Captain, April 30, 1852; Brevet-Major, Nov. 2, 1855; Major R. B., Sept. 1, 1857; Lieut.-Colonel, April 30, 1861; Colonel, Oct. 23, 1867; Major-General, Oct. 1, 1877; Lieut.-General, April 15, 1887. His principal appointments having been: Brigade-Major, Aldershot, Aug. 11, 1856, to July 31, 1857; Particular Service, Canada, Dec. 13, 1861, to June 29, 1862; A. A. G., Aldershot, Sept. 1, 1865, to Sept. 30, 1870; Brigadier-General, Chatham, Jan. 21, 1878, to Feb. 17, 1879; Major-General, South Africa, April 8, 1879, to Sept. 1879; Major-General, S. E. District, April 1, 1880, to March 31, 1885; Governor and Commander-in-Chief of the Bermudas, Oct. 29, 1888. He has the following war services: Crimean Campaign, 1854-55, including battles of Alma and Inkerman (wounded), and Siege of Sebastopol (Medal with three clasps, Brevet of Major, and Knight of the Legion of Honour, fifth class of the Medjidieh, and Turkish Medal); Zulu War, 1879; Battle

of Ulundi (Medal with clasp, and C.B.). He was placed on the Retired List in June 1892, was made a K.C.B. in May 1894, and appointed to the Colonelcy of the Devonshire Regiment, May 24, 1897. He married, in 1858, Anne Emily, second daughter of the Very Rev. Thomas Garnier, Dean of Lincoln, and Lady Caroline, daughter of 4th Earl of Albemarle, and succeeded to the Arbury and Astley estates in Warwickshire, and Harefield in Middlesex, on the death of his cousin, the Right Hon. Charles Newdigate-Newdegate in April 1837. In accordance with the will of the above he took the additional surname of Newdegate by royal license in 1888. Lieut.-General Newdigate-Newdegate is a J.P. for Warwickshire. Address: Stoke, Coventry.

NEWNES, Sir George, Bart., J.P., was born on March 13, 1851, is the son of the Rev. T. M. Newnes, late of Matlock, and was educated at Silwates, Yorkshire, and at the City of London School. From what are understood to have been small beginnings financially, an old Fleet Street rumour being to the effect that the now famous *Tit-Bits* was started on a tiny capital, he has risen to be one of the largest and most successful newspaper proprietors in the world. Sir George Newnes makes his especial appeal to that huge and increasing class which, educated since 1870 in primary schools, is gradually awakening to an intelligent interest in popular literature. He is founder of George Newnes & Co., Limited, a company owning *Tit-Bits*, the *Strand Magazine*, the *Wide World*, an illustrated monthly under the editorship of Mr. Fitzgerald, and other papers. He and his company are also proprietors of the *Westminster Gazette*. From 1885 to 1895 he represented the Newmarket Division of Cambridgeshire in Parliament. In politics he is a Liberal. He was created a Baronet in 1895. As a public man he is interested in many objects, and has been a benefactor of Lynton and Lynmouth, North Devon. He married, in 1875, Priscilla, daughter of the Rev. J. Hillyard, of Leicester. Address: Wildcroft, Putney Heath, S.W., &c.

NEWPORT, Bishop of (R.C.). See HEDLEY, RIGHT REV. J. C.

NEWTON, Professor Alfred, M.A., F.R.S., born at Geneva, June 11, 1829, is the fifth son of William Newton, of Elveden (formerly M.P. for Ipswich, and Lieut.-Colonel of West Suffolk Militia), by Elizabeth, a daughter of Richard Slater Milnes, of Fryton (formerly M.P. for York). He entered Magdalene College,

Cambridge, and graduated B.A. in 1852, being afterwards chosen Travelling Fellow of that College, in which capacity he visited Lapland, Iceland, the West Indies, North America, and other countries. In 1864 he accompanied Sir Edward Birkbeck to Spitzbergen, and was elected by the University of Cambridge to the Professorship of Zoology and Comparative Anatomy on its establishment in 1866. In 1877 he was re-elected Fellow of Magdalene College. Prof. Newton has published "The Zoology of Ancient Europe," 1862; "Ootheca Wolleyana," 1864; and edited "The Ibis," second series; "Zoological Record," 1871-73; and the 4th edit. of Yarrell's "British Birds." He is the author of "Zoology," published by the S.P.C.K., of "A Dictionary of Birds" (1896), of numerous papers in publications of the Zoological, Linnean, Royal, and other learned societies, as also of many contributions to scientific journals, and to the "Encyclopædia Britannica," 9th edit. He was President in 1888, and has been many times Vice-President of Section D. of the British Association, of the Royal and Zoological Societies, and of the Marine Biological Association, and is Honorary or Corresponding Member of various foreign and colonial societies. He has taken an active part in all questions relating to the legislative protection of birds. Address: Magdalene College, Cambridge.

NEWTON, Ernest, born in London on Sept. 12, 1856, was educated at Blackheath, and at Uppingham School, and was articled to Mr. R. Norman Shaw, the well-known architect, in 1873. Elected a Fellow of the Royal Institute of British Architects in 1890, he resigned this position in 1892. He published a "Book of Country Houses" in 1882; and another "Book of Houses" in 1890, and he contributed in 1892 one of a number of essays in the volume entitled "Architecture, a Profession or an Art," edited by R. Norman Shaw, R.A., and J. G. Jackson, R.A. He is a member of the Art Workers' Guild, is President of the Raymond Art Society, and has exhibited at the Royal Academy since 1881. Amongst his chief architectural works there may be mentioned: The Sisterhood and Chapel buildings, Lloyd Square, Clerkenwell; Redcourt, Bullerswood; Glebelands, Haslemere; Broome Hall, Wokingham; St. Swithin's Church, Lewisham; about 100 houses in different parts of England have moreover been designed by him. He is now bringing out a series of illustrated articles on "Modern English Domestic Architecture" in *Kunst und Kunsthandwerk*, an Austrian art magazine published in Vienna. Mr. Newton, in 1881, married Antoinette

Johanna Hoyack, of Rotterdam, granddaughter of Sir James Turing, Bart., H.B.M. Consul. Address: 4 Raymond Buildings, Gray's Inn, W.C.; and 13 Earl's Terrace, Kensington, W.

NEWTON, Robert Milnes, M.A., J.P., late Metropolitan Police Magistrate, was born in London, July 2, 1821, being the second son of William Newton, Esq., of Elveden, Suffolk, by Elizabeth, the daughter of Richard Slater Milnes, Esq., of Fryston, Yorkshire. He was educated at Eton and Trinity College, Cambridge, where he graduated M.A. in 1867. After studying law, he was called to the Bar at Lincoln's Inn, in May 1847. He was Recorder of Cambridge from 1858 to 1866, and was appointed a Commissioner to inquire into the Lancaster Election Petition of 1866. In November of that year he became a Metropolitan Police Magistrate at Great Marlborough Street, which office he resigned in December 1896. Address: 18 Seymour Street, W.

NICHOLAS I., the Hospodar of Montenegro, was born Oct. 7, 1841; was educated at Trieste and in Paris; and succeeded his uncle, who had been assassinated, Aug. 25, 1860. He is Colonel of a Russian infantry regiment. In 1890 the thirtieth anniversary of his accession to the throne was celebrated, and during 1896 the bi-centenary of his dynasty. In 1897 the Queen of England decorated him with the Grand Cross of the Royal Victorian Order. In 1860 he married Miléna or Milona, daughter of Voywode Peter Vucotitch, and has nine children. His heir, Prince Danilo-Alexander, was born at Cettingé on June 29, 1871. His daughter, Princess Helen, is married to the Prince of Naples, the Italian heir-apparent, and Princess Anne, another daughter, is the wife of Prince Francis Joseph of Battenberg.

NICHOLAS II., Czar of all the Russias, was born at St. Petersburg on May 18, 1868, his father being the late Czar Alexander III., and his mother, the Princess Dagmar, a daughter of the King of Denmark and a sister of the Princess of Wales. His education was conducted on modern lines, at the express wish of the late Czar, and he was instructed in modern languages and history, in constitutional history, economics, and the law and administration of Russia. He is a fluent linguist, and can speak French, German, Italian, and English, and is familiar with our literature and manners. He has travelled in the East and visited India. While in Japan a savage attack was made on his life by a

fanatical policeman, and on that occasion he displayed personal courage of a high order. During the Russian famine of 1891 he asked to be made President of the Committee of Succour, and as such displayed great energy. He succeeded his father Alexander III. on Nov. 1, 1894, and on the 26th of the same month was married, in accordance with the late Czar's dying wish, to Princess Alix of Hesse-Darmstadt, daughter of the late Princess Alice. Previously to the Czar's death this Princess had been summoned to the sick man's bedside at Livadia, and for some time it was supposed that the marriage would be solemnised during his lifetime. In a manifesto issued on the occasion of his marriage, Nicholas II. said, "Solicitous for the destinies of our new reign, we have deemed it well not to delay the fulfilment of our heart's wish, the legacy, so sacred to us, of our father, now resting in God: nor to defer the realisation of the joyful expectation of our whole people that our marriage, hallowed by the benediction of our parents, should be blessed by the Sacrament of our Holy Church." The Imperial Manifesto proper announced the granting of certain pecuniary alleviations to the classes connected with agriculture, and contained the following notable passage: "We, in this sad but solemn hour, when ascending the ancestral throne of the Russian Empire and of the Czardom of Poland and the Grand-Duchy of Finland, indissolubly connected with it, remember the legacy left to us by our departed father, and inspired by it, we, in the presence of the Most High, record the solemn vow always to make our sole aim the peaceful development of the power and glory of our beloved Russia and the happiness of all our faithful subjects." The new Emperor has also proved himself favourable to the principle of religious toleration, and of the freedom, to a limited extent, of the press, so far as it concerns the censorship of foreign newspapers imported into Russia. But though he was known to be an amiable and not unenlightened Prince, Europe was not prepared to find in him an idealism worthy of Tolstoi himself. In the summer of 1898 (August 24), when the German Emperor was on the eve of his pilgrimage to the Holy Land, the Czar startled Europe by issuing, through Count Muravieff, the now famous rescript or circular which proposed a conference of the Powers for the preservation of the general peace by disarmament. The rescript called forth universal expressions of admiration, and many sympathetic replies from official quarters have been sent to Russia. Before he came to the throne, Czar Nicholas II. held several military com-

mands, and was Colonel of the Préobrajensky Regiment. In 1893 the Order of the Garter was conferred upon him. In November 1895 the Czarina gave birth to a daughter, the Princess Olga, and in June 1897 a second daughter was born to the Imperial couple. His coronation was celebrated with all the grandeur and pomp of the Orthodox Church, at Moscow, in May 1896. In the following August he set out on a series of important visits to the Emperors of Germany and Austria, the King of Denmark, and Queen Victoria. He was entertained by the latter at Balmoral, and on the conclusion of his visit he crossed the Channel to Cherbourg, where he was received with great honours by the President of the French Republic. His stay in Paris was marked by many brilliant displays and ceremonies, and was regarded by the French people as accentuating the *entente cordiale*, or alliance, as we may now call it, between France and Russia. In the summer of 1897 President Faure paid a visit to St. Petersburg, and it was on this occasion that the alliance was definitely announced.

NICHOLLS, Harry, comedian, was born in London in 1852, and educated at the City of London School. Primarily intended, like Horace of old, for the vocation of an auctioneer, he chose the dramatic calling, and made his first appearance at the Theatre Royal, Windsor, played largely in every kind of part in the provinces, and in 1874 was engaged by Mr. William Holland at the Surrey, and then played at the Grecian. For fourteen years, from July 1880, he was the popular and vivacious low comedian, both in drama and pantomime, at Drury Lane Theatre, and during the last five years has acted comic parts at the Adelphi. He has written a number of pantomimes, some of which have been acted at Drury Lane, and is part author of "Jane," "A Runaway Girl," &c. Address: Rupert Cottage, Bedford Park, W.

NICHOLLS, Henry Alfred Alford, C.M.G., M.D., F.L.S., was born in London on Sept. 27, 1851, and studied medicine at St. Bartholomew's Hospital and at the University of Aberdeen, where he graduated with honours as Master in Surgery, and Bachelor of Medicine in 1873. In the same year he gained the membership of the Royal College of Surgeons of England, since which time he has resided in Dominica, W.I., as Government Medical Officer. Here Dr. Nicholls has for a number of years carried on investigations into the nature of the disease known as Yaws. His articles on this malady in the *Medical Times and Gazette*, and his Official Reports as the Medical Superintendent of

the Dominica Yaws Hospitals, have made him the chief authority on the subject. He has established a reputation as a naturalist, and has published some treatises on tropical agriculture. In 1888 he gained the premium of £100 offered by the Government of Jamaica for the best textbook on tropical agriculture, for the use of the schools and colleges of that colony. In 1891 he was appointed Special Commissioner, by the Home Government, to inquire into the various matters relating to the spread of Yaws in the colonies of Tobago, Grenada, St. Vincent, St. Lucia, and the Leeward Islands. His report on the mission, addressed to the Secretary of State for the Colonies, has been published as a blue-book under the title of "Report on Yaws in Tobago, Grenada, &c.," 1892. He has contributed numerous papers on Yaws and other tropical diseases to the leading medical journals, and papers on natural history to the *Kew Bulletin*, *Nature*, &c. He edited vols. i. and ii. of *The Leeward Islands Medical Journal*. He is a Fellow of the Linnean Society, a Corresponding Member of the Zoological Society of London, of the New York Academy of Sciences, of the Jamaica Institute, and of the Chamber of Agriculture of the French colony of Guadeloupe, and he is also an Honorary Member of the Royal Agricultural Society of British Guiana. He has been decorated for his services in Dominica, W.I. Address: Roseau, Dominica, West Indies.

NICHOLSON, Sir Charles, Bart., J.P., D.C.L., LL.D., born Nov. 23, 1808, was educated in Edinburgh, where he graduated M.D. 1833. He became a resident in New South Wales in 1834, and was one of the original representative members for Port Phillip (now the Colony of Victoria) in the first Legislative Council established in New South Wales in 1843, of which body he became Chairman of Committees, and subsequently Speaker from 1846 to 1856. He filled the post of Vice-Provost and subsequently that of Chancellor of the University of Sydney, and received the honour of Knighthood in 1852, and that of Baronet in 1859. He received also the honorary degree of D.C.L. from the University of Oxford, and that of LL.D. from the University of Cambridge. He is the author of various official papers and reports connected with Colonial, Economic, and Educational affairs, and has also written articles in the *Transactions of the Royal Society of Literature* (of which he is Vice-President), containing an account of exploration in Upper Egypt, and at Memphis, with descriptions of remains of "Disk Worshippers," now deposited in the Museum of the University of Sydney. He

married, in 1865, Sarah, daughter of Archibald Keightley. Addresses: The Grange, Totteridge, Herts; and Athenæum.

NICHOLSON, Edward Williams Byron, Bodley's Librarian, Oxford, was born March 16, 1849, at St. Helier, Jersey. He is the only son of the late Edward Nicholson, R.N., and Emily Hamilton Wall. He was educated at Llanrwst Grammar School, Liverpool College, Tonbridge School, and Trinity College, Oxford (Scholar, first class Classical Moderations, Gaisford Greek Verse Prize, Hall-Houghton Junior New Testament Prize; M.A.). His career in librarianship began when he was still an undergraduate. He was Librarian (Hon.) of Oxford Union Society in 1872, and held office for a year. On leaving Oxford he was for nearly ten years Principal Librarian of the London Institution (1873-82). In 1882 he was appointed Librarian of the Bodleian Library, Oxford. He was Joint-Secretary of the International Conference of Librarians, 1877, and of the Library Association, 1877-78; and is a Fellow of the Library Association. His publications are: "The Christ Child and other Poems," 1876; "The Rights of an Animal," 1877; "The Gospel according to the Hebrews," 1879; "A New Commentary on the Gospel according to Matthew," 1881; "Our new New Testament," 1881; "New Homeric Researches," 1882; "Jim Lord, a Poem," 1882; "The Bodleian Library in 1882-87," 1888; "The Pedigree of 'Jack,'" 1892; "The Vernacular Inscriptions of the Ancient Kingdom of Alban," 1896; "Golspie," 1897. He has also published original melodies with words: "Four Melodies," 1896; "Waiting for You," 1897; "The Red Dragon," 1898, &c. He played chess for Oxford against Cambridge in 1871-73. Addresses: Bodleian Library, Oxford; and 2 Canterbury Road, Oxford.

NICOL, Erskine, A.R.A., R.S.A., eldest son of James Main Nicol, was born at Leith, Scotland, on July 3, 1825, and received his art education in the Trustees' Academy, Edinburgh, under Sir William Allan and Mr. Thomas Duncan. In 1846 he went to reside in Ireland, where he remained three or four years. It was this residence in the sister isle which decided the painter's choice of his peculiar field of representation, for most of his subsequent pictures have been Irish in subject. From Ireland he returned to Edinburgh, and after exhibiting for some time, he was ultimately elected a Member of the Royal Scottish Academy. In 1862 he settled in London, and after that date contributed regularly to the exhibitions of the Royal Academy, of which body he was elected

an Associate in June 1866. His principal pictures are: "Notice to Quit," 1862; "Renewal of the Lease Refused," 1863; "Among the Old Masters," and "Waiting for the Train," 1864; "A Deputation," 1865; "Both Puzzled," "Paying the Rent," and "Missed It," 1866; "A Country Booking-Office," and "Kiss an' make it up," 1867; "A China Merchant," and "Waiting at the Cross-roads," 1868; "A Disputed Boundary," 1869; "How it was she was delayed," "On the Look-Out," "The Fisher's Knot," and "The Children's Fairing," 1871; "His Bú-bees," "The Play Hour," and "Bothered," 1872; "Pro Bono Publico," "Steady, Johnnie," and "Past Work," 1873; "A Dander after the Rain," and "When there's nothing else to do," 1874; "The New Vintage," "Always Tell the Truth," and "The Sabbath Day," 1875; "A Storm at Sea," and "Looking Out for a Safe Investment," 1876; "His Legal Adviser," and "Unwillingly to School," 1877; "A Colorado Beetle," "The Lonely Tenant of the Glen," "Under a Cloud," and "The Missing Boat," 1878; and "Interviewing their Member," 1879. Mr. Nicol entered on the Retired List of the Royal Academy in 1885, on account of ill-health. Address: The Well, Feltham, Middlesex.

NICOLL, William Robertson, LL.D., was born at the Free Church Manse, Auchindoir, Aberdeenshire, on Oct. 10, 1851. He was educated at the University of Aberdeen, where he graduated as M.A. in 1870, and at the Free Church College, Aberdeen, where he stayed till 1874. In the latter year he was ordained minister of the Free Church at Dufftown, and in 1877 was transferred to the Free Church at Kelso. In 1884 he succeeded Dr. Samuel Cox as editor of the *Expositor*, and in 1886 he came to London and started the *British Weekly*. In October 1891 he started the *Bookman*, a monthly literary journal, and in 1893 the *Woman at Home* was largely founded by him. Dr. Nicoll is the author of many theological works, as well as of a "Life of James Macdonald of the *Times*," 1889, and a "Memoir of Professor Elmslie." In 1897 he published several theological works. He is joint-editor of "Literary Anecdotes of the Nineteenth Century," of which two volumes were published in 1895-96. He has been for long engaged on "The Victorian Era of English Literature: a Biographical and Critical History," and has originated and edited the "Expositor's Bible," "The Clerical Library," "The Theological Educator," and "The Household Library of Exposition." In 1890 Aberdeen University conferred upon him the degree of LL.D. In 1897 he married (2) Miss

Katherine Pollard. Address: Bay Tree Lodge, Hampstead, N.W., &c.

NICOLSON, Sir Arthur, K.C.I.E., C.M.G., Envoy Extraordinary and Minister Plenipotentiary to Morocco, was born Sept. 19, 1849, and is the only surviving son of Admiral Sir Frederick W. E. Nicolson, 10th Baronet. He was educated at Rugby and Brazenose College, Oxford, and was appointed to a clerkship in the Foreign Office, Aug. 23, 1870. He was Assistant Private Secretary to the late Earl Granville from 1872 to 1874; and having held posts at Berlin, Peking, and Constantinople, he was appointed Superintendent of Student Interpreters in Turkey in 1879. In 1882 he accompanied the Marquis of Dufferin to Egypt, and then became Charge-d'Affaires at Athens in 1884. In 1888 he was Consul-General for Hungary, and in 1894 British Agent in Bulgaria, whence he exchanged for his present post in the next year. He married, in 1882, Mary, daughter of A. Rowan Hamilton, Esq., of Killyheagh Castle, co. Down. Address: British Legation, Tangiers.

NIETZSCHE, Friedrich Wilhelm, philosopher, is by descent a Pole, and was born Oct. 15, 1844, at Roken, near Lentzen, in Saxony. As a child he was obstinate and passionate, but at an early age he acquired strong self-control, and even, it is said, on one occasion, deliberately burnt his hand to show that Mucius Scævola's act was but a trifling matter. At school he had little to do with his fellows, although he is represented to have been a well-developed, vigorous boy, who loved games of various kinds, especially those of his own invention. He was afterwards sent to a school where the discipline was of military strictness, and while there, first became acquainted with the music of Wagner, which not only stimulated his artistic instincts, but influenced his moral and intellectual life. He left Bonn and Leipzig Universities a man of extraordinary width of knowledge, and at the early age of twenty-six was appointed a Professor of Philology at Basle. While at Basle he became intimately acquainted with Wagner, on whose music Nietzsche founded his scheme of philosophy. The Wagnerian, however, was but a passing phase. In 1876, while attending the Bayreuth Festival, an entire change came over his views with regard to Wagner, and it has been thought that at this point Nietzsche's tragic mental malady first revealed itself. His favourite sister, however, thought that the disease began in the terrible year of 1870. "He had six wounded young soldiers to look after, and the strain produced in him some depress-

ing physical symptoms—dyspepsia, insomnia, and then came the facile but perilous remedy of drugs." In 1880 so bad did his physical condition become that the professorship had to be abandoned. For nine troubled years the stricken philosopher wandered through Europe, visiting various health resorts, and fighting desperately against the onset of mental disease. Meanwhile his literary output was abundant, and his egoism increased in each succeeding work. On the publication of "Thus spake Zarathustra" he exclaimed: "I have given to men the deepest book they possess." In 1889 the end came, and he fell into the "outer darkness" of hopeless insanity; to this day he has given no sign of dawning reason. His works expound a revolutionary philosophy, denouncing all religion, and treating all moral laws as a remnant of Christian superstition. His ideal is to be developed by giving unbridled freedom to the struggle for existence; seeking pleasure only and despising pity. A translation of his works into English by Tille began in 1896, but met with few followers. Nordau (*q.v.*) has a special distaste for him, and the literary skirmishes of the two philosophers have entertained Europe.

NIGHTINGALE, Florence, a lady whose name has been rendered illustrious by her philanthropic efforts to alleviate the sufferings of our wounded soldiers in the Crimean War, is younger daughter of Mr. William E. Nightingale, of Embley Park, Hampshire, and Lea Hurst, Derbyshire, and was born at Florence on May 15, 1820. She enjoyed all the advantages which fall to the lot of the children of the affluent and refined, and her command of different languages and other branches of a truly "liberal education" stood her in good stead in her after career. It was not long before her philanthropic instincts, exercised among the poorer neighbours of her English home, led her to the systematic study of the ameliorative treatment of physical and moral distress. Not satisfied with studying the working of English schools, hospitals, and reformatory institutions, she examined similar institutions abroad in the same spirit, and in 1851 spent some months in an institution of Protestant Sisters of Mercy at Kaiserswerth on the Rhine. Before long an opportunity presented itself for applying the practical lessons she there learned, for having heard that the Governesses' Sanitarium in Harley Street languished for the want of supervision and support, she generously devoted both her personal energies and private means to its restoration and thorough organisation. This work had scarcely been

accomplished when, before Miss Nightingale had time to recover her overtaxed strength, new demands were made upon her spirit of self-sacrifice. The inefficiency and mismanagement of our military hospitals in the Crimea led to an outburst of public feeling. Various plans of help were suggested, the most popular of which was the sending forth a select band of ladies. At the request of the late Lord Herbert, then Secretary of War (whose letter crossed one from Miss Nightingale offering to go), she undertook the organisation and conduct of this body. No eulogy can do justice to the talent, energy, and devotion she constantly displayed in her self-imposed task. By instituting order where confusion had before reigned, and by affording care and consolation, she alleviated the sufferings of all, saved the lives of many, and earned the blessings of the sick and wounded, as well as the gratitude of her country. A testimonial fund amounting to £50,000, subscribed by the public in recognition of her noble services, was at her special request devoted to the formation of an institution for the training of nurses, now carried out at St. Thomas's Hospital, in the "Nightingale Home." Her writings are intended to disseminate practical knowledge on the subject in which she is so well versed. "Notes on Hospitals," a valuable work which had a very large circulation, appeared in 1859; "Notes on Nursing," of which nearly a hundred thousand copies have been sold, was published in 1860; and "Observations on the Sanitary State of the Army in India," in 1863. It is understood that, at the request of the War Office, she drew up a very voluminous confidential report on the working of the Army Medical Department in the Crimea, and she has a further claim on the gratitude of her countrymen for the active interest she has displayed in the Volunteer movement. Although confined to her house by constant ill-health, she has been ceaselessly at work for the welfare of our fellow-subjects in India in all matters affecting the improvement of their health, education, and social benefit. The regulations of hospitals and supply of nurses in different parts of the world, sanitary measures, and nursing arrangements for the army at home and abroad, occupy her thoughts and time. During the Civil War in America she was frequently consulted in questions affecting the health of the army and assistance for the wounded in the field. During the Franco-German War she was similarly appealed to by the German authorities. Her name is as well known in America as in England, indeed, it is a household word all the world over. Address: 10 South Street, Park Lane, W.

NIGRA, Count Constantino, an Italian diplomatist, born at Castellemonte, June 12, 1827, studied law at the University of Turin, and took part as a volunteer in the war against Austria in 1848. Being severely wounded at the battle of Rivoli he abandoned the military career, entered the Diplomatic Service, and acted as Secretary to Count Cavour at the Congress of Paris in 1856. He took part in the negotiations between Piedmont and France which preceded the war of 1859, at which he was present with the general staff of Napoleon III. He was Secretary to the Italian Plenipotentiaries at the Zurich Congress, after which he was nominated, on Cavour's recommendation, Minister Plenipotentiary, first of Sardinia, and afterwards of the kingdom of Italy in Paris. On the war of 1870 breaking out he was among those who made real efforts to prevent it, and then showed himself to the end, at least personally, devoted to the Emperor and Empress. He was one of the few persons who, on Sept. 4, were by the side of the menaced and fugitive sovereigns. After having represented Italy in Paris for fifteen years as Minister Plenipotentiary, he was in May 1876 appointed to fill the same post at St. Petersburg. He was nominated Italian Ambassador in London in November 1882, on which occasion King Humbert conferred upon him the title of Count, in attestation of his Majesty's recognition of the eminent services he had rendered to his country. Count Nigra has published several works on the dialects and popular poetry of Italy. In 1885 he resigned the embassy in London, and was succeeded by Count Corti. He was afterwards sent as Italian Ambassador to Vienna. He is a Grand Officer of the Legion of Honour.

NILSSON, Christina. See MIRANDA, COUNTESS OF.

NOBLE, Captain Sir Andrew, K.C.B., F.R.S., D.L., was born in Scotland on Sept. 13, 1832, and is the son of G. Noble, of the Royal Navy. He was educated at Edinburgh Academy and at the Royal Military Academy, Woolwich, after which he entered the Royal Artillery and rose to be Captain. He was appointed Secretary to the Committee on Rifled Cannon in 1858, and to that on Plates and Guns in 1859. He was Assistant-Inspector of Artillery in the same year, in 1860 was a Member of the Ordnance Select Committee, and was a Member of the Committee of Explosives throughout its sittings. He is now Vice-Chairman of Sir W. G. Armstrong & Co., Ltd., which he joined as long ago as 1860. He was elected F.R.S. in 1870, and was

Katherine Pollard. Address: Bay Tree Lodge, Hampstead, N.W., &c.

NICOLSON, Sir Arthur, K.C.I.E., C.M.G., Envoy Extraordinary and Minister Plenipotentiary to Morocco, was born Sept. 19, 1849, and is the only surviving son of Admiral Sir Frederick W. E. Nicolson, 10th Baronet. He was educated at Rugby and Brazenose College, Oxford, and was appointed to a clerkship in the Foreign Office, Aug. 23, 1870. He was Assistant Private Secretary to the late Earl Granville from 1872 to 1874; and having held posts at Berlin, Pekin, and Constantinople, he was appointed Superintendent of Student Interpreters in Turkey in 1879. In 1882 he accompanied the Marquis of Dufferin to Egypt, and then became Charge-d'Affaires at Athens in 1884. In 1888 he was Consul-General for Hungary, and in 1894 British Agent in Bulgaria, whence he exchanged for his present post in the next year. He married, in 1882, Mary, daughter of A. Rowan Hamilton, Esq., of Killyheagh Castle, co. Down. Address: British Legation, Tangiers.

On the war of 1870 breaking out he was among those who made real efforts to prevent it, and then showed himself to the end, at least personally, devoted to the Emperor and Empress. He was one of the few persons who, on Sept. 4, were by the side of the menaced and fugitive sovereigns. After having represented Italy in Paris for fifteen years as Minister Plenipotentiary, he was in May 1876 appointed to fill the same post at St. Petersburg. He was nominated Italian Ambassador in London in November 1882, on which occasion King Humbert conferred upon him the title of Count, in attestation of his Majesty's recognition of the eminent services he had rendered to his country. Count Nigra has published several works on the dialects and popular poetry of Italy. In 1885 he resigned the embassy in London, and was succeeded by Count Corti. He was afterwards sent as Italian Ambassador to Vienna. He is a Grand Officer of the Legion of Honour.

NILSSON, Christina. See MIRANDA, COUNTESS OF.

NOBLE, Captain Sir Andrew, K.C.B., F.R.S., D.L., was born in Scotland on Sept. 13, 1832, and is the son of G. Noble, of the Royal Navy. He was educated at Edinburgh Academy and at the Royal Military Academy, Woolwich, after which he entered the Royal Artillery and rose to be Captain. He was appointed Secretary to the Committee on Rifled Cannon in 1858, and to that on Plates and Guns in 1859. He was Assistant-Inspector of Artillery in the same year, in 1860 was a Member of the Ordnance Select Committee, and was a Member of the Committee of Explosives throughout its sittings. He is now Vice-Chairman of Sir W. G. Armstrong & Co., Ltd., which he joined as long ago as 1860. He was elected F.R.S. in 1870, and was

awarded its Royal Medal in 1880. He was created C.B. in 1881, K.C.B. in 1893, and was High-Sheriff of Northumberland in 1896. His publications include various papers in the *Transactions of the Royal Society* on explosives and gunnery. Lady Noble was a daughter of Mr. A. Campbell, of Quebec. Addresses: 14 Pall Mall, S.W.; Jesmond Dene House, Newcastle-on-Tyne, &c.; and Athenæum.

NOBLE, Captain William, F.R.A.S., F.R.M.S., was born in 1828, and is the eldest son of the late William Noble, Esq., of Berwick. He was Captain in the Rifle Brigade, and has long devoted great attention to astronomy, and much good work has emanated from the private observatory which he erected in the grounds of his residence. Captain Noble has sat for many years on the Council of the Royal Astronomical Society; was the first President, and is now Vice-President, of the British Astronomical Association, and is a County Magistrate. He is the author of many contributions to scientific periodicals. Captain Noble married, in 1851, Emily Charlotte, only child of Edward Irving, Esq., of H.M. 61st Regiment, and of the Baroness Hadriana Cornelia van Lijnden. Address: Forest Lodge, Maresfield, Sussex.

NOEL, The Right Hon. Gerard, J.P., D.L., second son of the 1st Earl of Gainsborough, was born in 1823. He entered the army as a Cornet in the 11th Hussars in 1842, and retired in 1851. He was elected M.P. for Rutland in 1847 as a Conservative, and sat for that constituency until 1884. He was a Lord of the Treasury from July 1866 to October 1868; Parliamentary Secretary to the Treasury from the latter date to the December following, and First Commissioner of Works from 1876 to 1880. He married, in 1863, Lady Augusta Lowther, sister of Henry, Earl of Lonsdale. Address: Catmose, Oakham, Rutland.

NOEL, Rear-Admiral Sir Gerard Henry Uctred, K.C.M.G., second in command in the Mediterranean Fleet, son of the late Rev. Augustus W. Noel, Rector of Stanhoe, Norfolk, was born March 5th, 1845. He entered the navy in December 1858, and was promoted Lieutenant in April 1866, Commander in 1874, and Captain from the Royal Yacht in January 1881. He was in command of the naval guard to Lord Wolseley at Cape Coast Castle in the Ashanti War of 1873, and was awarded the medal with Kumasi clasp. In 1875 he gained the gold medal of the Royal United Service Institution.

In 1893 he was appointed Director of Naval Intelligence, and in the same year became a Lord Commissioner of the Admiralty. For three years Captain Noel was a naval A.D.C. to the Queen, and in May 1896 he attained Flag rank. In February 1898 he hoisted his flag in H.M.S. *Revenge* in the Mediterranean, and took charge of the English squadron in Cretan waters. The discontent amongst the Mahomedans in Candia broke out in open violence in September 1898, the collection of a tithe being the cause of the actual outbreak, in which nearly a hundred British soldiers were killed, and about a thousand Christians massacred. The Turkish troops did nothing to aid the British, but assisted the Mahomedans against them, and joined in pillaging the town. Admiral Noel then ordered a bombardment of the place, and afterwards presented an ultimatum to Edhem Pasha, commanding the Turkish troops, and demanded the delivery of the ringleaders in the outbreak, within forty-eight hours, the transmission of the tithes collected since September 3rd, and the surrender of the forts and ramparts commanding the town. The ringleaders were given up, and the other terms were ultimately complied with, owing to the uncompromising attitude of Admiral Noel, whose firmness on that occasion went far towards a pacification of the islanders, and a settlement of the Cretan question. He received a K.C.M.G. for his services. Sir Gerard Noel is the author of "Gun, Ram, and Torpedo," and an "Essay on Naval Tactics." He is a J.P. for Norfolk, and married, in 1875, Charlotte, eldest daughter of the late F. Cresswell, Esq.

NORBURY, Sir Henry Frederick, K.C.B., M.D., Director-General of the Medical Department of the Navy, was born in 1839 and educated at Oundle School and at St. Bartholomew's Hospital. He became a Member of the Royal College of Surgeons of England in 1860, and joined the Navy as Surgeon in the same year. He was promoted Staff Surgeon in December 1872, Fleet Surgeon in July 1879, and Inspector-General of Hospitals and Fleets in November 1894. His experience of active service has lain chiefly in South Africa, where he had medical charge of the naval brigade landed from H.M.S. *Active* during the Kaffir War of 1877-78, when he was mentioned in despatches and strongly recommended for promotion. He also served in the Transkei as Senior Medical Officer of six different columns of troops, was present in numerous skirmishes, in the action at the Quorra River, and at the battle of Quintana. Subsequently he was principal Medical Officer of Colonel

Pearson's column, and present at the battle of Inezane and the relief of the garrison of Ekowe. Sir Henry was afterwards attached to General Crealock's column, and had medical charge of the entire Naval Brigade, and took part in the advance on Port Durnford. He was several times mentioned in despatches and promoted, receiving also a C.B. and the Zulu medal with three clasps. At the close of the war he was thanked by the Cape Government. In 1879 he was awarded the Gilbert Blane Gold Medal. He was appointed in charge of Plymouth Hospital in April 1895, and promoted to a K.C.B. in June 1897. Sir Henry Norbury is also a Knight of Grace of the Order of St. John of Jerusalem and M.D. of Malta and the University at the Cape. He married, in 1868, Nina Legge, daughter of the late E. G. Wade-Brown, Esq. He is the author of "The Naval Brigade in South Africa" Address: Royal Naval Hospital, Plymouth.

NORDAU, Maximilian Simon, M.D., was born of a Jewish family at Budapest on July 29, 1849. He was a boy of great promise, and while attending the Gymnasium and University of his native town, he contributed to several newspapers. He studied medicine, and in 1878 established himself as a physician in Budapest. His nationality and creed, however, drove him from Hungary, and in 1886 he settled in Paris. His name, however, has been made by works with a deeply partisan feeling on current ethical, political, and literary subjects. His first work was "Studien und Bilder aus dem Wahren Milliardenlande," which attracted immediate attention in Germany, and was translated into five foreign languages. After several other volumes of romances and travels, came his "Conventional Lies of Society," 1883, which was translated into English in 1895, after the success of "Degeneration." In 1886 he published "Paradoxes," and in 1893 the work by which he is best known, "Degeneration." Therein he maintains, on strictly psycho-physiological grounds, that all modern tendencies in art, literature, and life are undeniable proofs of physical, mental, and moral degeneration. As a novelist and playwright he has been less successful. His chief novel is "Gefühlskomödie," 1892. He is the Paris correspondent of the *Vossische Zeitung*. Address: 34 Avenue de Villiers.

NORDENSKIÖLD, Baron Adolf Erik, a Swedish naturalist and explorer, was born in Helsingfors, the capital of Finland, Nov. 18, 1832. Descended from a Swedish family long eminent in scientific

pursuits, he had his inherent tastes developed alike by his surroundings at his home at Frugård, which contained an extensive mineral and natural history collection, and by his journeys with his father, Nils Gustaf, who was chief of the Finland Mining Department. Thus the lad cared more for practical than for theoretical learning when he first went to the Gymnasium at Borgo, and on entering the University of Helsingfors in 1849 devoted himself almost entirely to scientific studies, spending his vacations in excursions to the rich mineral localities of Finland. He soon became eminent in this particular branch of science, and was nominated to several appointments, but he unluckily incurred the suspicion of the Russian authorities by participation in various students' meetings, and time after time lost his appointments, and was obliged to leave the country. Indeed, at last, for some years he was unable to obtain a passport to return to Finland. He therefore settled in Sweden, and in 1858 first entered on his Arctic travels by accompanying Torell to Spitzbergen. On his return to Stockholm, Nordenskiöld was nominated Director of the Mineralogical Department of the various geographical and scientific researches, and for making a preliminary reconnoitring for the measurement of an arc of the meridian. The work was not then finished, and accordingly, three years later, Nordenskiöld headed an expedition which successfully completed the reconnoitring, and marked the southern part of Spitzbergen. The explorers, however, met with some shipwrecked walrus-hunters, and were obliged to return, their provisions being inadequate to maintain so large an addition to the party. Thus disappointed, Nordenskiöld now endeavoured to organise a fresh expedition, and he eventually started in 1868 in the Government steamer *Sofia*, which managed to attain the high latitude of 81° 42'—a latitude exceeded only by Hall's American and Parry's and Nares's British Arctic Expeditions, and never exceeded by a sailing-vessel in the old hemisphere. This success convinced Nordenskiöld that he could reach a much higher latitude by wintering in Spitzbergen and utilising sledges. Accordingly, after an interval—during which he sat in the Swedish Diet, and travelled in Greenland to ascertain the respective value of dogs and reindeer as beasts of burden for sledge journeys—Nordenskiöld sailed in 1872 to Spitzbergen in the *Polhem*, accompanied by two tenders. He made during this voyage the first serious attempt to penetrate on the inland ice in the interior, and discovered at Orifak the largest known blocks of

native iron, and brought home collections of fossil plants of great importance to the history of climatology during former geological epochs. The winter was unusually early, and the ice shut in the tenders, which were to have returned home, thereby straitening the provisions through extra mouths; the reindeer were lost, and the men suffered greatly from scurvy. Nevertheless Nordenskiöld and Lieutenant Palander successfully surveyed part of North-East Land, and in the following July the vessels were extricated from their winter quarters, Mussel Bay, on the north coast of Spitzbergen, and returned home richly laden with important scientific collections. Nordenskiöld now turned his attention to Siberian exploration, and in 1875 sailed through the Kara Sea to the Yenissei, and ascended the river in a small boat, returning home overland. It was the first time that any ship had succeeded in penetrating from the Atlantic to the great Siberian rivers. He introduced in the following year, after a flying visit to the Philadelphia Exhibition, the first merchandises by sea to Siberia, returning in the autumn with his steamer *vid* Kara Sea and Matotschkin Sound. These experiences gave Nordenskiöld a reasonable hope of accomplishing the North-East Passage. The King of Sweden, Mr. Oscar Dickson, and Mr. Sibiriakoff at once lent their aid to the project, and in July 1878 Professor Nordenskiöld started in the *Vega*. She was the first vessel to double the most northern point of the Old World, Cape Tchelyuskin; she wintered near Behring's Strait; and once more free in July 1879, reached Japan on Sept. 2. On his arrival in Europe Nordenskiöld was enthusiastically welcomed and laden with honours. He was created a Baron (April 1880), and appointed a Commander of the "Nordstjerne Order" (Order of North Star). In 1883 Nordenskiöld made his second voyage to the interior of Greenland, and succeeded in penetrating with a ship through the dangerous ice-barrier along the east coast of that country south of the polar circle, a feat in vain attempted during 300 years by different Arctic expeditions. He has also busied himself with a project for an expedition to the South Pole. He has written minerological memoirs: "The Voyage of the *Vega* round Asia," 1881; "The Second Swedish Expedition to Greenland," 1885; "Facsimile Atlas to the Early History of Cartography," 1889; and "Periplus," 1897. His letters, written during some of his earlier explorations, have been translated into French (1880).

NORDICA, Madame. See DOEHME, MADAME.

NORFOLK, Duke of, His Grace the Most Noble Henry Fitzalan Howard, P.C., K.G., J.P., Earl of Arundel, Surrey, and Norfolk, and Baron Fitzalan, Clun, Oswaldestre, and Maltravers, Premier Duke and Earl, Knight of the Garter, Hereditary Earl-Marshal, and Chief Butler of England, is the eldest son of the 14th Duke, by his wife Augusta Mary Minna Catharine, second daughter of Edmund, 1st Lord Lyons. He was born in Carlton Terrace, London, Dec. 27, 1847, and succeeded to the peerage on the death of his father, Nov. 25, 1860. His Grace, who is a Roman Catholic, takes great interest in all matters relating to his Church. He is President of the Catholic Union of Great Britain. It was to the Duke of Norfolk that Dr. Newman addressed in 1875 his reply to Mr. Gladstone's "Political Expostulation." The Duke of Norfolk took a prominent part, about the time of the general election of 1886, in the Unionist opposition to Mr. Gladstone's Home Rule measure, thus bringing himself into collision with the Irish hierarchy. In 1887 the Duke was Her Majesty's Special Envoy with presents and congratulations to the Pope on his jubilee, and in 1893 he headed a special band of English pilgrims, who were present at the state celebration at St. Peter's. From 1892 to 1895 he represented the City of London on the London County Council. In 1895 he was appointed Postmaster-General, and has organised the Imperial Penny Postage in the face of many difficulties. From 1895 to 1897 he was Mayor of Sheffield, and from the Jubilee (1897) onwards has been first Lord Mayor of Sheffield. He takes great interest in the Volunteer movement, and since 1864 has been Hon. Colonel of the 4th West Riding (Yorks.) Volunteers, and since 1891 Major, with the rank of Lieutenant, in the 2nd Volunteer Batt. of the Royal Sussex Regiment. He married, at the Oratory, Brompton, on Nov. 21, 1877, Lady Flora Hastings, eldest daughter of Charles Frederick Abney Hastings, 1st Lord Donnington, of Donnington Park, Leicestershire, and the late Countess of London. Her Grace died on April 11, 1887. Their son, Philip, the Earl of Arundel and Surrey, was born in 1879. Addresses: Norfolk House, St. James's Square, S.W.; and Arundel Castle, Sussex, &c.

NORMAN, Canon Alfred Merle, M.A. Oxon., D.C.L. Hon., Durham, Hon. LL.D. St. Andrews, F.R.S., F.L.S., is the youngest son of John Norman, D.L. of the county of Somerset, of Iwood, Congresbury, and Claverham House, Yatton, in that county. He was born at Exeter, where his father was at that time residing,

Aug. 29, 1831. As soon as he could walk he was interested in botany by his eldest brother, the Hon. John Paxton Norman, who was afterwards Officiating Chief-Justice of Bengal, and was assassinated by a fanatic when entering, in his robes, the High Court of Justice at Calcutta, in September 1871. When about ten years old he was sent to the Grammar School at Ilminster, and during the four years he was there made a collection of the fossils of the lias of that neighbourhood. In 1844 he entered Winchester College, and while a scholar there took up the study of entomology. In 1848 he matriculated at Christ Church, Oxford, taking the B.A. degree in 1852, and that of M.A. in 1859. While at the University he studied and published on the inland mollusca of Oxfordshire, and also collected the fossils of the Stonesfield strata. In 1854-55 he was private tutor in the family of the Dowager Countess of Glasgow, at Cumbrae, on the Firth of Clyde. Here, with every facility as regards coast and boats, he commenced the investigation of the marine fauna of the Firth of Clyde, and to this branch of science he has from that period chiefly devoted his spare time. In 1855-56 he was at Wells Theological College reading for Holy Orders. In the latter year he was ordained Deacon by the Bishop of Peterborough, and Priest in 1857, being at this time Curate of Kibworth, Leicestershire. In 1858 he accepted the curacy of Sedgfield, in the county of Durham, and in 1864 that of Houghton-le-Spring. In 1866 he was presented by the Crown to the living of the newly formed parish of Burnmoor, near Fence Houses, co. Durham; and in 1895, on the presentation of the Bishop of Durham, became Rector of Houghton-le-Spring, which living he resigned in 1898. From 1867 to 1879 he was Honorary Chaplain to the late Earl of Durham. In 1885 he was made Honorary Canon of Durham Cathedral. For twenty years he was Honorary Secretary of the Durham Training College for Schoolmasters, and for twelve years Honorary Secretary of the Durham Diocesan Conference. He was elected F.L.S. in 1880, and F.R.S. in 1890. Dr. Norman has received the medal of the Institute of France, conferred upon him in recognition of the part he took in 1880, when, by special invitation of the French Government, he was associated with the Commission of French Savants in the exploration of the great depths of the Bay of Biscay, in the surveying steamer *Le Travailleur*. In 1883 he was Chairman of the Jury on Natural History at the International Fisheries Exhibition, London. He is Vice-President of the Marine Biological Society of Great Britain, of the Tyneside Naturalists' Field Club (Presi-

dent in 1865 and 1880), and of the Conchological Society of Great Britain (President, 1892); President of the Museums Association in 1895; Honorary Member of the Cambridge Philosophical Society, and of many of the leading Natural History Societies of the kingdom. His collection of the invertebrate fauna of the North Atlantic and Arctic Oceans is probably the most extensive in the world, embracing not only the products of his own dredgings, carried on during his summer holidays of almost every year since 1854, on all parts of the British coast, as well as during five summers in Norway and Finmark and others in the Mediterranean and Madeira, but also all such specimens as could be purchased, and the contributions both of private friends and from the spolia of almost all the Government deep-sea dredging expeditions which have been sent out from the countries of Europe, as well as by the United States. A catalogue of the collection is in course of publication, under the title "*Museum Normanianum*." An arrangement has been made with the Trustees of the British Museum, by which a portion of Dr. Norman's collections has already found a place in that institution, and the remainder will become the property of the nation at his death. As a boy and young man Dr. Norman used to contribute to the *Zoologist*. He is the author of numerous memoirs and papers, chiefly on Marine Zoology, in *Proc. Roy. Soc.*; *Proc. Roy. Soc. Edin.*; *Trans. Roy. Soc. Dublin*; *Trans. Linn. Soc.*; and other learned periodicals. He was editor and part author of Bowerbank's "*Monograph on British Spongiadae*," vol. iv. (Roy. Soc.).

NORMAN, Henry, author, journalist, and traveller, was born at Leicester on Sept. 19, 1858, and is the son of Henry and Sarah Norman. He received his education privately in France, and afterwards at Harvard University, of which he is B.A., and at Leipzig University. After graduating, he inaugurated the public agitation for the national preservation of the Niagara Falls, which resulted in their subsequent purchase by the State of New York. He contributed to the *Fortnightly Review* and the *Spectator*, and in 1886 joined the editorial staff of the *Pall Mall Gazette*, for which journal he made a tour of the world, 1889-92. He has visited the whole of the United States and Canada, and travelled and explored in Japan, Siberia, Korea, China, Siam, the Malay Peninsula (in which he went through a tract of country hitherto unexplored), and Egypt. In 1892 he joined the *Daily Chronicle*, and became literary editor, the famous "literary page" of that journal

being under his management. For the *Chronicle*, of which he was appointed assistant-editor in 1895, Mr. Norman travelled in the Balkans in 1895, interviewing the Prince of Montenegro, Prince Ferdinand of Bulgaria, and other high personages. At the beginning of 1896 he was sent to Washington during the Anglo-American dispute concerning the Venezuela Boundary. His labours in the cause of arbitration were recognised by President Cleveland's personal thanks. His despatches from Athens in 1897, where he represented his journal during the negotiations preceding the Turco-Greek War, again attracted much attention in England, and the King of Greece conferred on him the Order of the Saviour. In Feb. 1899 it was announced that Mr. Henry Norman had severed his connection with the *Daily Chronicle* in order to devote himself to literary work. He contributes frequently to the *Contemporary* and regularly to *Cosmopolis*, is a member of the Council and Management Committee of the Society of Authors, and President of the Omar Khayyam Club, 1898. His publications are: "The Preservation of Niagara Falls," 1881; "Bodyke: a Chapter in the History of Irish Landlordism," 1887; "The Real Japan," 1892; "Peoples and Politics of the Far East," 1895; and "The Near East," 1898. He married M^{rs}. Muriel Dowie (see NORMAN, Mrs. HENRY), author of "A Girl in the Karpathians," &c., in 1891. Address: The Savile Club, London.

NORMAN, Mrs. Henry, née M^{rs}. Muriel Dowie, was born in Liverpool on July 15, 1867, and is the second daughter of Muir Dowie, and of a daughter of the well-known Robert Chambers of Edinburgh. She was educated in Liverpool, and in Stuttgart and France, and acquired her love of open-air life in the Highlands of Scotland, where her father hired shootings at different times. She first made her mark as a reciter, and in 1890 travelled and sojourned in the Karpathian Mountains, where she lived, a solitary English girl, protected in her walks only by a peasant attendant. Her twenty-third birthday, she tells us, found her engaged in revolver practice, for she was in a land where wild cats, bears, and wolves might be encountered at any moment. She conformed to the simple habits of the people, eating no meat and drinking neither wine nor beer. Her costume consisted of knickerbockers and leggings worn beneath a lady's ordinary skirt. The latter was so contrived as to be easily detached to permit of Miss Dowie riding *en cavalier* when it was necessary to go long distances. A full account of the journey, with all its picturesque and enter-

taining adventures, appeared afterwards in the *Fortnightly Review* under the title of "In Ruthenia," and was subsequently embodied in her now famous book, "A Girl in the Karpathians," 1891, which created a considerable stir at the time of its publication. Other works from Mrs. Norman's pen are a novel, "Gallia," 1895; "Some Whims of Fate," 1896; and "The Crook of the Bough," 1898, besides which she has written much in her husband's newspaper and elsewhere on social and domestic matters, particularly as they affect women.

NORMAN, General Sir Henry Wylie, G.C.B. (Military Division), G.C.M.G., C.S.I., is the son of James Norman, Esq., and was born in London on Dec. 2, 1826. He entered the Bengal Army in March 1844; has been Adjutant, Brigade-Major, Assistant Adjutant-General, Deputy Adjutant-General, Acting Adjutant-General in India, Assistant Military Secretary at the Horse Guards, Aide-de-camp to the Queen, Military Secretary to the Government of India, and for seven years a member of the Council of the Viceroy of India, twice acting for several weeks as President of the Council during the absence of the Viceroy. He has been a Member of the Council of India in London; was for five years Captain-General and Governor-in-Chief of Jamaica, and was for six and a half years Governor of Queensland. He served throughout the Punjab Campaign, including the action of Sodoolapore, battles of Chilianwallah and Goojerat, and pursuit of the Sikhs and Afghans. He was present in numerous affairs during six years' service on the Peshawur frontier; served throughout the Mutiny campaigns, including the siege of Delhi, the relief and capture of Lucknow, and many minor actions and services; also in Southall campaign. He has received three war medals and six clasps. In 1893 he was offered and accepted the appointment of Viceroy of India, but withdrew his acceptance before the office became vacant. In 1897 he was appointed Chairman of a Royal Commission to report on the condition and prospects of the British West Indian Colonies. Addresses: 85 Onslow Gardens, S.W.; and Athenæum.

NORMAN-NERUDA. See HALLÉ, LADY.

NORRIS, William Edward, the novelist, son of the late Sir W. Norris, late Chief-Justice of Ceylon, was born on Nov. 18, 1847. He was educated at Eton. As a novelist he is noted for the delicacy of his dialogue and for his well-bred descriptions of aristocratic society. His first novel,

"Heaps of Money," appeared in 1877, and has been followed by "Mademoiselle Mersac," "Matrimony," "No New Thing," "His Grace," "A Deplorable Affair," "The Countess Radna," 1893, &c.; "The Dancer in Yellow," 1896; "Clarissa Furiosa," and "Marietta's Marriage," 1897; "The Widower," 1898; &c. Mr. Norris married Frances Isobel, daughter of the late J. Ballenden, Esq., in 1871. She died in 1881. Address: Underbank, Torquay.

NORTH, The Hon. Sir Ford, Judge of the High Court of Justice, is the eldest son of Mr. John North, of Liverpool, and Ellen, third daughter of Jonathan Haworth, and was born there, Jan. 10, 1830. He was educated at Winchester School, and at University College, Oxford, where he graduated as B.A. in 1852, taking a second class in Lit. Hum. He was called to the Bar at the Inner Temple in 1856, and obtained a large practice in the Equity Courts, and at the Lancaster Chancery Palatine Court. He was appointed a Queen's Counsel in 1877, and a Judge of the Queen's Bench Division of the High Court of Justice in 1881, on the removal of Mr. Justice Lindley to the Court of Appeal; and was transferred to the Chancery Division of the same Court in 1883. He married, in 1857, Elizabeth, eldest daughter of William Mann. Addresses: 76 Queensborough Terrace, Hyde Park, W.; and Athenæum.

NORTH, John W., A.R.A., landscape painter, was elected Associate of the Royal Academy in 1893, where of late years he has exhibited "Fruition: England," 1895; "Late Summer in England: Afternoon," 1896; "An English Western Valley," 1896; "The Old Abbey Fishponds: Morning in March," "The Promise of May," 1897; "The Morning Moon," 1898; "Among the Galtees," 1899. Address: Washford, Somerset.

NORTHBROOK, Earl of, The Right Hon. Thomas George Baring, Bart., D.C.L., LL.D., eldest son of the first baron, who was long known as Sir Francis Baring, was born in 1826, and received his education at Christ Church, Oxford, where he graduated second class in Classics in 1846. He was successively Private Secretary to Mr. Labouchere at the Board of Trade, to Sir George Grey at the Home Office, to Sir Charles Wood at the India Board, and at the Admiralty till 1857, when he was returned to the House of Commons for Penryn and Falmouth, which constituency he continued to represent in the Liberal interest till he became a peer on the death of his father in 1866. He was a Lord of

the Admiralty from May 1857 to February 1858; Under-Secretary of State for India from June 1859 to January 1864; and Under Home Secretary from 1864 to 1866. On the accession of Mr. Gladstone to power in December 1868, Lord Northbrook was appointed Under-Secretary for War; and after the assassination of the Earl of Mayo he was appointed to succeed that nobleman as Viceroy and Governor-General of India, in February 1872. He resigned in February 1876, and was succeeded by Lord Lytton. In recognition of his distinguished services he was created Viscount Baring, of Lee, in the county of Kent, and Earl of Northbrook, in the county of Southampton. From 1880 to 1885 he was First Lord of the Admiralty. In 1884 he was sent to Egypt as Lord High Commissioner to inquire into its finances and condition, the result being a loan of nine millions. In 1886 he was one of those who opposed the Home Rule policy of the Premier. In 1890 he was appointed Lord-Lieutenant in the county of Southampton. He married, in 1848, the third daughter of Henry Charles Sturt, of Crichel, Dorset. She died in 1867. Addresses: 4 Hamilton Place, Piccadilly; Stratton, Micheldever, Hants.

NORTHUMBERLAND, Duke of, The Most Noble Henry George Percy, K.G., P.C., V.D., D.L., J.P., A.D.C. to the Queen, born May 29, 1846, is the eldest son of the sixth Duke of Northumberland and Louisa, daughter of Henry Drummond, of Albury Park, Surrey. He was educated at Oxford, and from 1867 to 1895 was Colonel of the 2nd Northumberland Artillery Volunteers, and from 1866 to 1895 Colonel commanding the 3rd Battalion of the Northumberland Fusiliers. From 1868 to 1885 he represented N. Northumberland as a Conservative in the House of Commons, was sworn of the Privy Council in 1874, was Treasurer of the Household from 1874 to 1875, and President of the Archæological Institute from 1884 to 1892. In the latter year he was appointed A.D.C. to the Queen. He is chairman of the Northumberland County Council. In 1887 he entered the House of Peers as Lord Lovaine, in a Barony of his father's, and in 1899 succeeded to the Dukedom on the death of the sixth Duke on January 2nd of that year. He was created K.G. in succession to the Duke of Beaufort in 1899. In 1868 he married Lady Edith Campbell, daughter of the 8th Duke of Argyll, K.G. Seat: Alnwick Castle, Northumberland; and London address, 28 Grosvenor Square, W.

NORTON, Arthur Trehern, C.B., F.R.C.S., received his medical education at St. Mary's, London, and in Paris and

Berlin. He is Lecturer on Clinical Surgery and Consulting Surgeon to St. Mary's, and Examiner in Surgery to the Society of Apothecaries, London. He was formerly Examiner in Surgery at the University of Durham. He is Surgeon Lieut.-Colonel of the Volunteer Medical Staff Corps, has the Volunteer Decoration, is an Associate of the Order of St. John, and was decorated with the gold war medal by the French for services rendered by him in the Franco-Prussian war. In 1897 he received the honour of the C.B. He is author of "Osteology for Students," two editions; "Affections of the Throat and Larynx," two editions; and has translated and edited Bernard and Huet's "Operative Surgery and Surgical Anatomy," two editions, besides contributing papers on the eye to the *Proceedings of the Royal Society*, and to "Walton on the Eye." He married, in 1898, a daughter of E. Meredith Crosse, D.L. Address: Leyfields Wood, Ashampstead, Berks.

NORTON, Lord, The Right Hon. Charles Bowyer Adderley, K.C.M.G., D.L., J.P., eldest son of the late Charles Clement Adderley, Esq., of Hams Hall, Warwickshire, and Norton, Staffordshire, by Anna Maria, daughter of the late Sir Edmund Cradock-Hartopp, was born on Aug. 2, 1814, and educated at Christ Church, Oxford, of which he was a gentleman commoner, and where he graduated B.A. in 1835. He was elected in the Conservative interest in 1841, to represent the northern division of Staffordshire, which seat he retained for 37 years. Mr. Adderley was President of the Board of Health, and Vice-President of the Committee of the Privy Council on Education under Lord Derby's second administration of 1858-59, and Under-Secretary for the Colonies under Lord Derby's third administration (July 1866 to December 1868). He is a Trustee and Governor of Rugby School, and was the Chairman of the Royal Sanitary Commission. In 1869 he was made a Knight Commander of the Order of St. Michael and St. George. On the return of the Conservatives to power in February 1874, he was appointed President of the Board of Trade. Sir Charles Adderley took an active part in the establishment of Colonial self-government and in the introduction of reformatory institutions, and is the author of pamphlets on education and penal discipline, and of works on other subjects connected with Colonial policy. He resigned the office of President of the Board of Trade in April 1878, when he was raised to the peerage of the United Kingdom by the title of Baron Norton, of Norton-on-the-Moors, in the county of Stafford. He was then sent to

represent her Majesty at the funeral of Queen Mercedes at Madrid. His lordship presided at the meeting of the Social Science Association held at Cheltenham in October 1878. He was one of the Royal Commission on Reformatory Schools, and of another on Education, 1883-84. He has published works on "Revival of Constitutional Colonial Policy" and on "Prison Discipline," and in 1896 on "Socialism." He married, in 1842, Julia Anne Eliza Leigh, eldest daughter of Chandos, Lord Leigh. She died in 1887. Addresses: 35 Eaton Place, S.W.; and Hams, Warwickshire.

NORTON, Charles Eliot, veteran American author, was born at Cambridge, Mass., Nov. 16, 1827, and graduated from Harvard in 1846. Soon after graduating he entered a Boston counting-house, and in 1849 he went as supercargo of a ship bound for India, in which country he travelled extensively. In 1855 he assisted Prof. Ezra Abbot in editing the writings of his father, and soon thereafter he spent a year or two in European travel. During the war between the States he was editor of the Loyal Publication Society's papers, and in 1864 to 1868 was joint-editor, with James Russell Lowell, of the *North American Review*. After five years' sojourn in Europe he returned to America, and in 1875 was appointed Professor of the History of Art in Harvard University, which position he held until 1897, when he resigned. Harvard awarded him the degree of A.M. in course, and the honorary degree of LL.D. in 1887. He also received the degree of Litt.D. from Cambridge University, England, in 1884, and L.H.D. from Columbia, New York, in 1888. Among his published works are: "Considerations on some Recent Social Theories," 1853; "The New Life of Dante," 1859; "Notes of Travel and Study in Italy," 1860; "A Review of a Translation into Italian of the Commentary by Benvenuto da Imola on the 'Divina Comedia,'" 1861; "The Soldier of the Good Cause," 1861; "William Blake's Illustrations of the Book of Job," 1875; "List of Principal Books relating to the Life and Works of Michael Angelo," 1879; and "Historical Studies of Church-Building in the Middle Ages," 1880; besides which he has edited the "Correspondence of Carlyle and Emerson," 1883; Carlyle's "Letters and Reminiscences," and "Letters of James Russell Lowell," &c. He is generally regarded by competent judges in England as the eldest surviving representative of the grand age of Emerson, Hawthorne, Longfellow, &c. Address: Shady Hill, Cambridge, Mass.

NORWICH, Bishop of. See SHEEP-SHANKS, THE RIGHT REV. JOHN.

NOSZKOWSKI, Sigismund, a Russian composer and pianist of high merit, was born at Warsaw in 1846. He studied music at the Warsaw Musical Institute, and in 1873 was sent by the Musical Society to Berlin, where he became a pupil of Kiel and of Oscar Raif. At the present time he is Director of the Philharmonic Society, and Professor at the Conservatoire of his native city. His compositions are able and rather numerous, including symphonies, songs, and various works for chamber use. In May 1898 his *Humoresque*, Op. 41, was first performed in England at the St. James's Hall by his friend Georg Liebling, to whom the composer dedicated the work.

NOVELLO, Clara. See GICLIUCCI, COUNTESS OF.

NOVIKOFF, Madame Olga ("O.K.") née Kiréeff, journalist and foreign correspondent, was born in Russia in 1841, and is a god-daughter of the late Emperor Nicholas. The only daughter of a Russian family of high rank, her girlhood was spent uneventfully, being lived chiefly in the daily round of Moscow society. She was devoted to her two brothers, Alexander and Nicholas Kiréeff, and on their entering upon active service in the Russo-Turkish war, Olga first gave her attention to the course of public events. In the early days of the war, the marvellous exploits of a young unknown volunteer, called Hadgi Girey, created widespread interest, and Olga Kiréeff pressed her brothers for news of this mysterious chieftain. A few days later, the 18th July 1876, the death of Hadgi Girey was announced, and the young admirer learned that the brave volunteer was none other than her beloved brother Nicholas. This sad end to a brilliant career supplied to "O.K.," as she afterwards came to be known, her life-motive, and, convinced that had Russia and England been on friendly terms no volunteers such as her late brothers would have been needed in the Balkans, she determined to devote her life to the bringing about of an *entente cordiale* between this country and her native land. She had previously married a distinguished Russian soldier and scholar, Lieut.-General Novikoff, whose brother was the then Russian Ambassador at Vienna. She first appealed to her countrymen through the columns of the *Moscow Gazette*, and the Slavophile organ, *Russia*. Having already made the acquaintance of Mr. Gladstone on a previous visit to England, she wrote to him and to Sir William Harcourt, and other men of affairs, telling them of her brother's death, and reiterating that the sacrifice

of his life would never have been made had Mr. Gladstone held the reins of power. The days which followed immediately upon the despatch of her letter to Hawarden—Mr. Gladstone had temporarily retired from public life—brought many hours of poignant sorrow, relieved by expectancy, and, on receiving no reply from the statesman, letter after letter, "entreaties, adjurations, and remonstrances," as they have been termed, "rained on Hawarden." The last of these, the bitter cry of a sister for a martyred brother's cause, brought a few words of sympathy from Mrs. Gladstone, ending mysteriously, "Mr. Gladstone will send an answer next week." A few days after she received in Italy, whither she had gone with her mother, a missive from England—her answer. It was Gladstone's famous pamphlet, "The Bulgarian Horrors." The encouragement of Gladstone's personal appeal to Europe made Madame Novikoff redouble her efforts. She commenced to contribute to the *Northern Star*, then edited by Mr. W. T. Stead, a series of articles on the Bulgarian Question. These communications were signed "O.K.," the initials of her maiden name, so as not to throw suspicion on her husband's brother, who, it has been said, was Russian Ambassador at Vienna. Carlyle thought much of these early labours, and suggested their republication in volume form. Indeed, he offered to write the preface himself, "and then, with a kind of despair, holding out his trembling hands, he said, 'No, I cannot do so, my writing days are over; but here,' he added, pointing to Froude, 'here is a young man who will be glad to do it for you.'" In this scene was born that famous volume, "Is Russia Wrong?" which was followed by "Russia and England," reviewed by Mr. Gladstone himself in the *Nineteenth Century*. "O.K.," notwithstanding her isolation in London, made many friends, and those, too, of distinction, numbering Carlyle, Froude, Gladstone, Kinglake, Lord Houghton, and others. She introduced, in the seventies, Ivan Aksakoff, the Russian orator and reformer, to the English people, and played a great part in the subsequent agitations which clamoured for the liberation of Bulgaria. She followed up her lead in England by writings in the Russian press, and became of considerable influence in political and diplomatic circles. "Friends or Foes?" and "Skobéeff and the Slavonic Cause," were published in quick succession, and a career of literary activity commenced which has kept its course since for twenty years. She has made frequent contributions of political articles to the *Times*, *Nouvelle Revue*, *Nineteenth Century*, *Contemporary Review*, *Pall*

Mall Gazette, Daily News, Westminster Gazette, and other prints. She has now long been regarded by some people as the Russian Government's agent in London. This last suspicion has caused her considerable amusement, which would appear to be justified somewhat by the presence in London of a Russian Embassy. Undoubtedly, Madame Novikoff is one of the few remarkable women of our time, although her energies have been exerted mainly in the previous generation. Her rooms in Claridge's Hotel became historic many years ago, and crowds of statesmen and notabilities have been visitors there. She gave the rooms up in 1896, and now resides, when in London, at No. 4 Portman Mansions, W. Since the death of her husband, General Novikoff, "O. K." has spent much of her time in Russia, on her son's estates near Tamboff.

NUNEZ DE ARCE, Don Gaspar, was born at Valladolid, August 4, 1834. He studied at Toledo, where he took the degree of Doctor of Philosophy. He has written, among other works, "*Como se empeñe un Marido*," a comedy in one act, and in verse, 1860; "*Ni tanto ni tan poco*," a comedy in three acts, 1865; "*Discursos leídos ante la Real Academia Española*," 1876; "*El Laz de Leña*," a drama in five acts, 1882; "*Las Mujeres del Evangelio*," 1884. His lyric poems have gained him the name of "The Tennyson of Spain." He has been a member of the Cortes since 1865, and was Colonial Minister in the Sagasta Cabinet, 1883-84, and in 1888 became President of the Section of Commerce, Agriculture, and the Interior in the Council of State.

NUTTALL, The Most Reverend Enos, D.D., Archbishop of the West Indies, was born about 1840, became Bishop of Jamaica in 1880, and attained his present post in 1897. He has written "*The Churchman's Manual*." Address: Kingstown, Jamaica.

O

OAKELEY, Emeritus Professor Sir Herbert Stanley, Mus.D., D.C.L., LL.D., second son of the late Sir Herbert Oakeley, Bart., was born at Ealing, Middlesex, on July 22, 1830. His mother, Atholl Murray, the third Lady Oakeley, was daughter of the Right Hon. Lord Charles Murray, youngest son of John, third Duke of Atholl. He was educated at Rugby School, and at Christ Church, Oxford (B.A. 1853, M.A. 1855), and, after having

graduated, went abroad to complete his studies in music, for which art, from earliest childhood, he had shown a marked predilection, and an accuracy of ear in naming any note struck without seeing the keyboard. At Leipzig he studied pianoforte-playing under Professors Moscheles and Plaidy, and at Bonn, organ-playing under Dr. Breidenstein, Professor of Music in that University, and later under the great organist Dr. Johann Schneider of Dresden. He acted for ten years as musical critic to a well-known London periodical, and still contributes occasional notices of musical festivals at home and abroad. In 1864 he was enrolled, in Rome, as member of a Society of "Quirites." In 1865, on the death of Professor Donaldson, he was elected Professor of Music in the University of Edinburgh; and in 1871 he received from the Primate his earliest degree of Doctor of Music. In recognition of musical services for Scotland, the honour of knighthood was conferred on him by the Queen at Holyrood in August 1876. In 1879 his own University, Oxford, gave him the degree of Mus. Doc., *honoris causa*; and in 1881 that of LL.D. was presented to him by the University of Aberdeen. In the same year he was appointed Composer to her Majesty in Scotland. In 1886 he received from Trinity College, Toronto, the degree of D.C.L.; and in the following year Mus. Doc. from the University of Dublin, and Mus. Doc. from the University of St. Andrews. On his retirement from the Edinburgh Chair of Music in 1892, the degree of LL.D. was conferred on him by that University, as "Emeritus" Professor, and in 1896 that of Mus. Doc., Adelaide University. He has composed some 20 anthems, a full "service," and, for orchestra, organ, or pianoforte, a "Jubilee Lyric" (1887), and an Album of 26 Songs, dedicated to H.M. the Queen, and for 1897 "A Golden Reign," "Dawn and Eventide (1837-1897)," and various other vocal and instrumental works. To Sir Herbert Oakeley's influence may be in great measure attributed the increase in appreciation of the organ and of the orchestra which has taken place in Scotland since his appointment at Edinburgh; and also the foundation of a Students' Choral Association at each of the four Scottish Universities. He is or was Hon. President of the University Musical Society of St. Andrews, and Vice-President of that of Edinburgh and Aberdeen, and of Dover Choral Union; Hon. Visitor Lichfield Diocesan Choral Association, Hon. President of Cheltenham Festival Society, Member of London Philharmonic Society, V.P. and Hon. Licentiate and Examiner in Music at Trinity College, London; Member

of the Accademia Filarmonica, Bologna, "Socio distinto" of the St^a. Cecilia Accademia, Rome, and (1834) Hon. Member of the Reale Filarmonica Società Romana, and of two societies at Naples. Address: Dover.

OAKLEY, Sir Henry, V.D., A.M. Inst. C.E., General Manager of the Central London Railway since 1898, and late General Manager of the Great Northern Railway, was born in 1823. He is Colonel of Railway Volunteers. In 1891 he received the honour of knighthood. He married, in 1850, Fanny, *née* Thompson. Address: 37 Chester Terrace, Regent's Park, N.W.

O'BRIEN, Sir George Thomas Michael, K.C.M.G., was born in 1844, and is the son of the late Bishop O'Brien. He was educated at Westminster and Trinity College, Cambridge, and became a writer in the Ceylon Civil Service. In 1867 he was appointed Additional Police Magistrate at Kurunegalla and afterwards at Harris-pattu and Colombo. After holding several other appointments, he became Treasurer in 1886 and Auditor-General in 1890. He was transferred as Colonial Secretary to Cyprus in 1891, and from 1892 to 1895 held the same post at Hong Kong. In 1897 he was Governor of the Fiji Islands, which post he still holds.

O'BRIEN, Sir John Terence Nicolls, K.C.M.G., is the eldest son of the late Major-General Terence O'Brien, Commander of the Forces, and for some time Acting Governor of Ceylon. He was born April 23, 1830, at Manchester; educated at the Royal Military College, Sandhurst, from which he obtained his commission without purchase in the 67th Regiment in September 1847; was transferred to the 70th Regiment, 1848; Lieutenant 70th Regiment, 1850; Captain 5th Fusiliers, 1858; transferred to 20th Regiment, 1858; Brevet-Major, 1859; Major, unattached, 1868; and Brevet-Lieut.-Colonel, 1870. He served uninterruptedly in India and Ceylon from 1849 to 1867; passed in the native languages, and as Surveyor and Civil Engineer; was Staff Officer of the Darjeeling Depot, Regimental Interpreter, Assistant in the Revenue Survey, Assistant and subsequently Executive Engineer in the Public Works Department; Deputy-Assistant Quarter-Master-General to a column in the field during the whole of the Mutiny; Military Secretary in Ceylon, and Brigade-Major, Gwalior District, Bengal Army; served on the North-west Frontier (medal and clasp), and throughout the Mutiny (mentioned in despatches, Brevet-Major, and medal); was in 1867

appointed Inspector-General of Police, Mauritius; Poor-Law Commissioner and Governor of Orphan Asylum, 1870; and was Equerry to H.R.H. the Duke of Edinburgh during his visit to the Colony in 1870. He was nominated Governor of Heligoland, 1881; and of Newfoundland, 1888. He was created K.C.M.G. in 1887. He married, in 1853, the youngest daughter of the late Captain Eastgate, H.E.I.C.S.; she died in 1867; and he married, secondly, in 1880, the widow of Colonel J. W. Fane, late M.P., Oxon. He is a Past Officer of the Grand Lodge and of the Supreme Grand Chapter of England. Address: 88 Eccleston Square, S.W.

O'BRIEN, Lucius Richard, first President of the Royal Canadian Academy of Arts, was born at the family residence on Lake Simcoe, Ontario, Canada, in 1832, and educated at Upper Canada College, Toronto. At an early age he developed a taste for art. In 1872 he took an active part in founding the Art School of the Ontario Society of Artists, and for six years he held the Vice-Presidency of that Institution. In 1880 the Royal Canadian Academy of Arts was founded, and Mr. O'Brien was elected its President, a position which he held for ten years, retiring in 1890; he has been a constant contributor to its exhibitions. He superintended the illustration of "Picturesque Canada," 2 vols., Toronto, 1884, for which he supplied a large number of the drawings. He is represented in the Royal Collections at Windsor and Osborne, and has frequently contributed to the English Water-Colour Exhibitions. Seven of his pictures were exhibited in the Art Gallery of the World's Fair in Chicago, 1893. In 1895 he was elected President of the newly formed Provincial Guild of Sculpture at Toronto. In 1897 he disposed by auction of his whole collection of water-colour drawings and pictures. His diploma picture, "Sunrise on the Saguenay," is in the art gallery at Ottawa. He painted two pictures of Quebec by command of her Majesty the Queen, and he has likewise executed several commissions for the Marquis of Lorne and Princess Louise.

O'BRIEN, The Right Hon. Sir Peter, Bart., Lord Chief-Justice of Ireland, LL.D. Hon. Dublin, son of the late John O'Brien, Esq., of Elm Vale and Ballinalackin, co. Clare, was born June 29, 1841. He was educated at Trinity College, Dublin, and was called to the Bar at the King's Inn, Dublin, in 1865, took silk in 1880, and became a Bencher in 1884. He was appointed Senior Crown Prosecutor for Dublin in 1883, and third Sergeant-at-Law in 1884. He was Solicitor-General

for Ireland from 1887 to 1888, and Attorney-General from 1888 to 1889, when he was appointed Lord Chief-Justice of Ireland. He was created a Baronet in 1891. In 1867 he married Annie, daughter of Robert Clarke, Esq., J.P., of Bansha, co. Tipperary. Addresses: 41 Merrion Square East, Dublin; and Athenæum.

O'BRIEN, Richard Barry, barrister-at-law, youngest son of the late Patrick Barry O'Brien, was born in Kilrush, in the co. Clare, Ireland, in 1847. He was educated by private tutors, and at the Catholic University, Dublin. In Michaelmas Term 1874 he was called to the Irish Bar, and in January 1875 to the English Bar. After practising for some years at the English Bar, he gradually glided into literature and politics, devoting himself mainly to Irish historical and political subjects. Among the books he has published are the following: "The Parliamentary History of the Irish Land Question," 1880; "The Irish Land Question and English Public Opinion," 1881; "Fifty Years of Concessions to Ireland, 1831-1881," 2 vols. 1883-1885; "Irish Wrongs and English Remedies," 1887; "Thomas Drummond, Life and Letters," 1889; and "The Home Ruler's Manual," 1890. He has also edited a new edition of the "Autobiography of Theobald Wolfe Tone," 1893; and has written a short "History of Ireland," 1897. He is Assistant-Editor of the New Irish Library, of which Sir C. Gavan Duffy is editor. Address: 100 Sinclair Road, West Kensington Park, W.

O'BRIEN, William, ex-M.P., son of the late Mr. James O'Brien, of Mallow, and of Kate, daughter of James Nagh, was born Oct. 2, 1852, and was educated at the Cloyne Diocesan College and the Queen's College, Cork. He represented Mallow from January 1883 until its extinction as a borough under the Redistribution Act, 1885, and in the Parliament of 1885 was Member for South Tyrone, defeating Captain the Hon. Somerset Maxwell, Conservative, by a majority of 55. At the general election of 1886 he was defeated by Mr. T. W. Russell, Unionist Liberal, who gained the seat by a majority of 99, but he was returned for North-East Cork unopposed. In 1892 he was returned for Cork City, and was also elected for North-East Cork. Mr. O'Brien is one of the foremost members of the Nationalist party, and was the founder and editor of *United Ireland* until the Parnellite disruption of 1890. He was a "suspect" under Mr. Forster's Coercion Act, and has been a leader in the councils of the National League. He was a delegate of this body

to the Chicago Convention, in August 1886. In Parliament he was a bitter and incisive speaker, and has once been "suspended" for a breach of the rules of the House. He has been four times imprisoned under the Coercion Act, for what he regards as protests against the curtailment of public liberty, and claims to have effected the abandonment of the prison rules in so far as they sought to confound political offenders with criminal prisoners. He is the author of "When we were Boys," written in prison, and of the historical romance, "A Queen of Men," 1898. Mr. O'Brien, in company with Mr. Dillon, M.P., having been liberated on bail, pending a political trial, in November 1890, forfeited the bail, and escaped to the United States, to raise funds for the Irish evicted tenants. On his return, he was arrested in Ireland and again sent to prison. He and Mr. Dillon met Mr. Parnell, M.P., in Paris in January 1891, for a friendly consultation about his retirement from the leadership of the Irish Parliamentary Party. Mr. O'Brien subsequently stood for Parliament on the platform of the majority of the Irish Party, and was elected for Cork City and for the North-East Division of Cork. In 1895 he retired from Parliament in consequence of internal dissensions in the Irish Party, and has since lived at Mallow Cottage, Westport, co. Mayo, but still takes an active part in the Nationalist movement. He married, in 1890, Sophie, daughter of Hermann Raffalovich, of Paris. Address: Mallow Cottage, Westport, co. Mayo.

O'BRIEN, The Right Hon. William, is the son of John O'Brien, of Bloomfield, co. Cork, and was born in 1832. He was educated at Middleton School, and was called to the Irish Bar in 1855. He was appointed a Q.C. in 1872, and in 1883 he became a Judge of the Queen's Bench Division of the High Court of Justice in Ireland. Address: 79 Merrion Square, Dublin.

O'CONNOR, Arthur, M.P., was born on Oct. 1, 1844, and is the eldest son of William O'Connor, M.D., of Kerry and London. He was educated at Ushaw. Elected Nationalist member for Queen's County in 1880, he represented that constituency until 1885. He was returned for East Donegal in 1885, and continues to represent it. He was at one time a clerk in the War Office, was called to the Bar at the Middle Temple in 1883, and went on the South-Eastern Circuit. Unlike most Irish Nationalist members, he has frequently held responsible positions in the House of Commons. He is a Public Works Loan Commissioner (since 1890),

one of the Deputy Chairmen of Committees of the House, and one of the panel of Chairmen of Standing Committees. In 1895, 1896, 1897, and 1898 he was Chairman of the Public Accounts Committee. He has also served on the Royal Commissions on Trade Depression, that on Civil Service Establishments, and that on the Incidence of Local Taxation, and others. Addresses: Rowan Road, Hammersmith; and 5 Essex Court, Temple, E.C.

O'CONNOR, Thomas Power, M.P., born at Athlone, co. Roscommon, on Oct. 5, 1848, is the eldest son of Thomas O'Connor and Theresa Power. He was educated first at the College of the Immaculate Conception, Athlone, and afterwards at the Queen's College, where he graduated in the degrees of B.A. and M.A. He adopted journalism as a profession, and after three years' connection with the Dublin press, came to London in 1870. He first obtained an engagement on the *Daily Telegraph*, and was afterwards employed on several other London journals. He published in 1876 the first volume of a biography of the late Lord Beaconsfield, under the title of "Benjamin Disraeli, Earl of Beaconsfield," but afterwards, changing the method, brought out a complete Life of the then Premier, in a single volume, entitled "Lord Beaconsfield, a Biography." The work received general praise for its literary merits and research, but, as it took a very unfavourable view of the Conservative leader, its conclusions met with a widely different reception from Liberal and Conservative critics. Mr. O'Connor was elected member for the town of Galway at the general election of 1880, and soon became one of the most active and prominent members of the party led by Mr. Parnell. He was one of the Executive of the Land League, both in England and Ireland. In October 1881 he set out for the United States, and lectured on the Irish cause to large gatherings in nearly all the great cities, during a tour which extended over seven months, and raised a large sum of money. In 1883 he was elected President of the "Irish National League of Great Britain," and has been re-elected to the position every year for several years in succession. In 1885 he stood for the Scotland division of Liverpool and defeated Mr. Woodward, the Liberal candidate, by a majority of 1350. He was returned at the same time for Galway, but elected to take the seat at Liverpool. In 1886 he defeated Mr. Earle, a Unionist Liberal, by 1480, and has since represented the division in Parliament. He has edited a "Cabinet of Irish Literature," and has written a large number of tales, essays, and magazine

articles. In 1885 he published what is, till now, his principal work, "The Parnell Movement." Other works from his pen are: "Gladstone's House of Commons," "Some Old Love Stories," and "Napoleon." In 1887 he started the *Star* newspaper, but resigned his interest in it in July 1890. He has since founded the *Sun* and the *Weekly Sun*, of both of which journals he is editor. His full-page article on a "Book of the Week" in the *Weekly Sun* is one of the features of modern English journalism. His latest journalistic venture, a gossiping biographical record of the sayings and doings of contemporaries, is called *M.A.P.* ("Mainly about People," the title of the personal column originally edited by him in the *Star*). Address: Oakley Lodge, Chelsea, S.W.

O'CONOR, The Right Hon. Sir Nicholas Roderick, G.C.B., G.C.M.G., Ambassador to Constantinople, was born in Ireland, July 3, 1843, and is the son of P. H. O'Conor, of Dundermott, and Jane, daughter of C. French, of Frenchlawn. He was educated at Stonyhurst, and entered the Diplomatic Service in 1866. After serving in the junior branches at Berlin, Washington, Madrid, and Paris, he was appointed Secretary of Legation at Peking in 1883. On the death of Sir Harry Parkes, he was for nearly eighteen months *Chargé-d'Affaires*, during which period he settled the frontier questions of Upper Burma and Thibet. In 1886 he became Diplomatic Agent at Sofia, until 1892, when he returned to Peking as Minister. For three years he exercised great control at the Chinese Court, but could not induce it to institute those reforms which would have rendered the Japanese war less humiliating. As a reward for his unremitting perseverance in furthering the legitimate development of British trade and enterprise, he was transferred to St. Petersburg in 1895, and created K.C.B. He was present at the marriage of the Czar in 1896, in which year he became a G.C.M.G. In 1898 he was transferred to his present post.

O'CONOR DON, The Right Hon. Charles Owen O'Conor, LL.D., known as "The O'Conor Don," in virtue of his being an "Ancient Knight," was born on May 7, 1838, and is the eldest son of Denis O'Conor Don and Mary, daughter of Major Blake, of Towerhill. He was educated at St. Gregory's College, Downside, and has a London University degree. In 1860 he was elected to represent co. Roscommon in the House of Commons in the Liberal interest, and represented that constituency for twenty years, during which he was mainly instrumental in

passing the Irish Industrial Schools Act in 1868, and the Irish Sunday Closing Act in 1879. He has been a member of many important commissions, including the Factories and Workshops Commission in 1875, and the Land Law (Bessborough) Commission in 1880. In 1896 he was appointed Chairman of the Financial Relations Commission. He is Lord-Lieutenant of co. Roscommon, of which he was High Sheriff in 1884. He was sworn of the Irish Privy Council in 1881. He has published works on the O'Conors of Connaught, and on Irish questions. In 1879 he married (2) Ellen, daughter of John More O'Ferrall, of Lisard. Addresses: Clonalis, Castlereagh, co. Roscommon, &c.; and Athenæum.

ODGERS, William Blake, M.A., LL.D., Q.C., was born at Plymouth on May 15, 1849, and is the third son of the late Rev. William James Odgers. He received his education at King Edward's School, Bath, at University College, London, and at Trinity Hall, Cambridge, of which latter College he was successively Exhibitioner, Scholar, and Law Student. He graduated at Cambridge in 1871, having obtained a place among the Wranglers, and also in Classical Honours. In the same year he won the Member's Prize. He became a B.A. of London in 1871. In 1873 he was called to the Bar at the Middle Temple, and joined the Western Circuit. He became LL.D. of Cambridge in 1879, and between the years 1881 and 1883 was Examiner for the Law Tripos of that University. From 1892 to 1897 he was Examiner in Common Law at the University of London. He now examines for the Inns of Court in the Bar examination. He was made a Queen's Counsel, July 14, 1893. He was appointed Recorder of Winchester, July 6, 1897. He is author of two standard works, "A Digest of the Law of Libel and Slander," and "The Principles of Pleading," both of which are in their third editions. In 1885 Dr. Blake Odgers unsuccessfully contested Brixton at the general election. He married, in 1877, Frances, youngest daughter of the late Mr. Charles Hudson, formerly Coroner of Stockport, and has five children. Addresses: 4 Elm Court, Temple, E.C.; and the Garth, Woodside Park, North Finchley, N.W.

ODLING, Professor William, M.B., F.R.S., born Sept. 5, 1829, in Southwark, was educated at private schools, and for the medical profession at Guy's Hospital. He graduated M.B. of the University of London in 1851; was elected a Fellow of the Royal Society, and a Fellow of the Royal College of Physicians, in 1859; and

President of the Chemical Society in 1873. He was appointed Demonstrator of Chemistry at Guy's Hospital in 1850; Lecturer on Chemistry at St. Bartholomew's Hospital in 1863; Fullerian Professor of Chemistry at the Royal Institution in 1868; Waynflete Professor of Chemistry in the University of Oxford, June 17, 1872; and elected a Fellow of Worcester College on the following day. Dr. Odling, who is highly distinguished as a scientific chemist, is the author of a "Manual of Chemistry," 1861; "Lectures on Animal Chemistry," 1866; "Course of Practical Chemistry," 1876; "Chemistry," a Science Primer, 1882; "Laurent's Chemical Method," and of various scientific memoirs, especially on chemical theory. The University of Leyden conferred on him the honorary degree of Doctor of Mathematics and Physics in February 1875. He was British Judge of Awards for Chemical Manufactures of the Philadelphia International Exhibition of 1876, and is one of the analysts employed to test the water supplied to London. Addresses: The New Museum; and 15 Norham Gardens, Oxford.

O'DONOVAN, Denis, C.M.G., F.R.S.L., &c., was born at Kinsale, Ireland, Aug. 23, 1846, and was educated in Ireland and France. He arrived in Queensland in 1874, and was appointed Parliamentary Librarian. Mr. O'Donovan had previously filled the positions of Professor of Modern Languages in the Collège des Hautes Études, afterwards the Catholic University of Paris, and of Lecturer in one of the colleges of the University of France. At this time he acquired considerable distinction as a Hellenist. He was one of the editors of the *Ami de la Religion*, and is the author of "Memories of Rome," and some minor works. He is well known in Melbourne as a writer on literary and artistic subjects. Some of his lectures on art and architecture, delivered at the Public Library in that city, were published by the Technological Commission of Victoria. He was a warm advocate of the establishment of schools of design in that colony, giving them considerable support in the press and on the platform. His latest work is his Analytical Catalogue of the Queensland Parliamentary Library. It is the fruit of many years' labour in the colony, and of a deep study of bibliography, to which he devoted himself during his long residence in the principal countries of Europe, where he became intimately acquainted with the management of all the great libraries of the Old World. He has received from the Parliament of Queensland special and substantial grants in recognition of the thought

and labour bestowed on the compilation of the Catalogue of the Parliamentary Library. Mr. O'Donovan was elected a Fellow of the Royal Geographical Society, of the Royal Society of Literature, of the Incorporated Society of Authors, a member of the Society of Arts, and of the Library Association of the United Kingdom, Corresponding Member *honoris causâ* of the Société de Géographie Commerciale of Paris and Havre, and honorary member of the Société d'Anthropologie of Paris. He was one of the Vice-Presidents of the International Library Conference held in London in 1897. He has also been created a Companion of the Order of St. Michael and St. George (1893), an Officier de l'Instruction Publique (1896), and a Knight of the Legion of Honour (1897).

OGILVY, Gavin. See BARRIE, J. M.

OGLE, William, M.A. and M.D. Oxon., F.R.C.P. London, was born in 1827 at Oxford, his father being the Regius Professor of Medicine in that University. He was educated at Rugby and at Corpus Christi College, of which latter he afterwards became a Fellow. He graduated in classical honours, and took the degree of M.A. and M.D. at Oxford. His medical education was received at St. George's Hospital, where he became Lecturer on Physiology and Assistant-Physician. After practising for a few years in London, he accepted the office of Medical Officer of Health for East Hertfordshire; and held this post until, on the retirement of Dr. Farr, he was appointed Superintendent of Statistics in the General Register Office, from which post he has now retired. Among other offices which he has held are those of Examiner in Physical Science and in Public Health in the University of Oxford. He was one of the Royal Commissioners who inquired in 1892 into the London water supply. He is the author of numerous papers on physiological and medical subjects in the *Transactions of the Royal Medico-Chirurgical Society*, and on statistical subjects in the *Journal of the Statistical Society*, and in the official reports issued by the General Register Office. He is also the author of a translation, with notes and essays, of the treatises of Aristotle on the Parts of Animals, on Life and Death, and on Respiration, and of Kerner's "Flowers and their Unbidden Guests," and has published various articles on the "Fertilisation of Flowers." Addresses: 10 Gordon Street, Gordon Square, W.C.; and Athenæum.

OHNET, Georges, French novelist and dramatist, was born in Paris on April

3, 1848. His father, an architect, intended him to become a barrister, but after the war of 1870, Georges Ohnet took to political journalism, and was successively on the staff of the *Pays* and the *Constitutionnel*, where the vivacity of his style gained him a measure of celebrity. In 1875 his first play, written in conjunction with M. Denayrouze, was produced at the Théâtre Historique under the title of "Regina Sarpi." It had a brilliant success, and was followed in 1877 by "Marthe" at the Gymnase. At about this time M. Ohnet began publishing, under the general title of "Battles of Life," that highly idealistic series of romances with which his name is connected. In 1881 appeared "Serge Panine," a work crowned by the French Academy; in 1882 the famous "Le Maître de Forges," dramatised by the author, and acted at the Gymnase in December 1883, which was one of the most successful novels of the time, being translated into almost every European language; in 1883, "La Comtesse Sarah"; in 1884, "Lise Fleuron"; in 1885, "La Grande Manière," which suggests strongly the manner of Georges Sand, M. Ohnet's model; in 1886, "Les Dames de Croix-Mort"; in 1888, "Volonté," an attack on pessimism; in 1889, "Le Docteur Rameau" and "Dernier Amour"; in 1891, "Dettes de Haine"; in 1893, "Nimrod et Cie."; and in 1895, "La Femme en Gris." M. Ohnet has dramatised with great success some half-dozen of his principal novels. He was decorated with the Legion of Honour in July 1885. The enormous circulation of his works rivals those of Miss Corelli and Mr. Caine. His Paris address is: 14 Avenue Trudaine.

OHRWALDER, Father, late priest of the Austrian Mission Station at Delen, in Kordofan, was born about 1855, and in early life became a missionary. He left Cairo, Dec. 28, 1880, as he says, "as full of bright hopes for a happy future as any young man could wish to be." The missionary party whom he accompanied reached Khartoum early in February 1881, and ultimately founded a mission station at Delen in Kordofan, in the Nubar country. The course of the settlement was a smooth one until April of the following year (1882), when the first signs of a great uprising of the Soudanese became apparent. On Sept. 15, 1882, Mek Omar, a lieutenant of the Mahdi's, sacked their little church, and captured the members of the Mission. After a time, they received a command by special messenger to move on to the Mahdi's camp, "as it was his gracious intention to permit us to look upon his face." On the way, the party were attacked by robbers, and stripped of their clothes,

and Ohrwalder was compelled to appear before the Mahdi in a shirt and drawers. Ohrwalder has given us a dramatic account of his famous meeting with the Mahdi, who sought to persuade them to embrace the Moslem faith, but all to no avail. Accordingly, on Sept. 28, 1882, the prisoners were led out to execution, but owing to the appearance of a comet on the preceding night, the Dervish leaders, a superstitious race, postponed the event. All efforts to compel the acceptance of the new faith proving useless, the Mahdi, averse, as he said, to killing priests, promised to release them conditionally upon the surrender of El Obeid. This took place on Jan. 19, 1883, and most horrible tortures ensued. Then followed the reign of bloodshed and cruelty, which is without parallel in history. The Mahdi died on June 22, 1885, of fatty degeneration of the heart. The effect of his death stunned the Dervishes for a time, but they soon gathered under the flag of Abdullah, who, not long after, was beheaded suddenly by the enraged Dervishes in the presence of Ohrwalder. The Father was again captured and forced to march with the victorious Dervishes, who came to Omdurman on April 26, 1886. Ohrwalder passed through a terrible time on the accession of the Khalifa Abdullah, and daily witnessed scenes of the utmost cruelty, himself suffering all manner of indignities and privations. During these unhappy days, naturally that which lay nearest the heart of Ohrwalder was the hope of escape. One brother of the Mission succeeded in gaining freedom, and the news coming to the ears of the Khalifa, he ordered the rest to be brought before him, and after haranguing them for upwards of half-an-hour, he threatened either to throw them into the river or to cut off their hands. Abdullah accordingly exerted a still keener surveillance over the little band of Europeans, and Ohrwalder, giving up for the time being all idea of escape, settled down to earning a precarious living by soap-making. His partner in this plan dying a few months after, he decided to learn how to make ribbon, a form of finery much in vogue amongst the women, and acquired a small and simple loom. With wonderful industry, the good Father, on the ribbon-makers, fearful of competition, declining to teach him the trade except on impossible terms, unravelled a piece of ribbon and thus studied the mode of manufacture with the closest attention. The work at first was very trying and almost unremunerative, but at the end of a month he succeeded in turning out sixteen yards a day. On the night of Oct. 28, 1891, Ahmed Hassan, the last messenger of Archbishop Sogaro, who had for years been endeavouring to

bring about the deliverance of his imprisoned mission, suddenly appeared, and Omdurman was quitted on Nov. 29, 1891, in the dead of night. A terrible ride was undergone across the great Nubian desert, and in seven days' time, Murat, the most advanced Egyptian outpost, was sighted, this being at a distance of 500 miles from Omdurman. After resting at the station for two days the journey was resumed, and Cairo regained on Dec. 21, 1891. The thrilling story of the return of Father Ohrwalder and two nuns has been told by the Father himself in his book, "Ten Years' Captivity in the Mahdi's Camp." Ohrwalder's manuscript, written in German, was roughly translated into English by Yusef Effendi Cudzi, a Syrian. It was afterwards entirely re-written in narrative form by Sir Fred. Wingate, R.A., then Director of Military Intelligence, Egyptian Army, and Author of "Mahdism and the Egyptian Soudan." During 1898, a popular edition (price 6d.) was published of Father Ohrwalder's account of his terrible imprisonment.

"O. K." See NOVIKOFF, MME. OLGA.

O'KELLY, James, M.P., son of the late John O'Kelly, of Roscommon, was born in Dublin in 1845. He was educated at Dublin University and at the Sorbonne, Paris, and served for some time as an officer in the French army during the Franco-German war. He left France after the fall of Paris and went to New York, where he worked for some time as a journalist for the *New York Herald*. As a correspondent for the same paper he went to Cuba at the time of the insurrection, but joining the rebels, was taken prisoner, and confined for some time in a dungeon, whence at last he contrived to escape. After various adventures in America, Algiers, and elsewhere, he went to the Soudan for the purpose of joining the Mahdi's troops; he was lost for some months in the desert, and at last appeared on the Nile, not far from Khartoum. After writing a series of lively letters to the *Daily News* he returned to England, and once more represented the constituency of Roscommon in the House of Commons. At the general election of 1885 he and Mr. Mullany were returned by an immense Parnellite majority for the new division of North Roscommon, and in 1886 he was returned unopposed. In 1892 he stood as a Parnellite for the old constituency, but was beaten by a small majority by Mr. Bodkin, an Anti-Parnellite. Mr. O'Kelly was a "suspect," and was imprisoned at Kilmainham in 1881-82. In the House of Commons he was at one time frequently "suspended." In

1895 he was returned as Nationalist M.P. for Roscommon. He is London correspondent of the *Irish Daily Independent*.

OKUMA, Count, son of the commander of the garrison at Nagasaki, a poor Samurai, or knight, was about fifteen years old when Commodore Perry insisted on opening Japan to foreign trade. He studied foreign books, and was therefore chosen for office after the Imperial Restoration of 1868. He opposed the feudal system, and supported the Anglicising of education and the introduction of railways and telegraphs. In 1873 he was appointed Minister of Finance, a post which he held with conspicuous ability until 1881, when he resigned owing to a disagreement with the Premier, Marquis Ito. The chief power in the state was at that time wielded by men of the Satsuma and Choshin class, who had brought about the revolution. Okuma saw the need of a Diet to check the power of these classes, but meeting with opposition, resigned. Until the Diet was formed in 1890, he organised a party to oppose the privileged classes. This Progressive party is known as the Kaishinto. In 1888 Count Okuma became Minister for Foreign Affairs, but his tenure of office was shortlived. He was compelled to resign owing to the unpopularity entailed upon him by his efforts to promote the revision of treaties with foreign powers. A bomb was thrown at Count Okuma in 1890 by a fanatical adherent of the old régime. The steadily increasing power of the Kaishinto carried the Count into power in 1896, when he was appointed Foreign Minister, but he was compelled to resign in 1897. In 1898 Party Government was established in Japan. The two parties, the Liberals and Progressives, united to form what they call the Constitutional Party, and Marquis Ito, seeing that the time had come to try the experiment, resigned, and Count Okuma became Prime Minister. The general election gave him a large majority, but dissensions in the Cabinet caused his resignation later in the year.

OLCOTT, Colonel Henry Steel, theosophist, and President of the Theosophical Society, had made his mark as an American reformer and man of affairs before the outbreak of the War of North and South. By 1856 he had founded the first scientific agricultural school on the Swiss model in the United States, and had written three works on agriculture, one of which went into seven editions. He had by invitation addressed three State Legislatures on the subject of a new sugar-plant, which is now generally cultivated,

and had been offered by his own Government a botanical mission to Caffraria, and later the Chief Commissionership of Agriculture, and, by the Greek Government, the Professorship of Agriculture at the University of Athens. He was at one time agricultural editor of Horace Greeley's paper the *New York Tribune*, and also American correspondent for the *Mark Lane Express*, and his services to the cause of American agricultural reform were such that the National Agricultural Society voted him two medals of honour, while the American Institute presented him with a silver goblet. When the Civil War broke out he threw up the profession of the law, in which he had been chiefly engaged hitherto, and joined the North-erners. He saw service in four battles, and was present at the capture of Fort Macon, but was subsequently invalided on account of dysentery contracted in the field. On his recovery the authorities determined to keep so useful a man from returning to the front, and therefore appointed him to the highly responsible position of Special Commissioner of the War Department. As such his chief duty was to punish dishonest Government contractors. For two years he is said to have been in constant danger of assassination owing to his unsparing severity towards the rings of wealthy swindlers who made their fortunes at the expense of the Executive. A sum amounting to \$200,000 is reported to have been collected by the fraudulent contractors, who hoped thereby to bribe him into silence, but none of them ventured to approach him with the money. At the end of two years, at the request of the Secretary of the Navy, he was also ordered on special naval duty, instituted drastic reforms in the dock-yards, and introduced a new system of accounts at Boston and Philadelphia. The war being over, Colonel Olcott retired into private life, and during the last fifteen years has been prominent as a student and teacher of Theosophy and neo-Buddhism.

OLDCASTLE, John. See MEYNELL, WILFRID.

OLDENBURG, Grand - Duke of, Nicholas Frederick Peter, son of the Grand-Duke Paul Frederick Augustus and the Princess Ida of Anhalt-Bernberg, born July 8, 1827, succeeded his father, Feb. 27, 1853. The population of the Duchy over which he reigns is about 300,000. He promulgated a liberal constitution in February 1849, modified it in 1852, and during the war between Russia, Turkey, and the Allied Powers, he adhered to the policy of

Prussia. After the conquest of Schleswig-Holstein by Prussia and Austria, the Grand-Duke claimed a portion of these duchies, which claim he endeavoured to support by some "Memoirs" addressed to the diplomatists of Europe. He married, Feb. 10, 1852, Elizabeth, daughter of Prince Joseph of Saxe-Altenburg, by whom he has two sons.

OLLIVIER, Olivier Émile, a French statesman, born at Marseilles, July 2, 1825; became a member of the Paris Bar in 1847; and in 1848 was Commissary-General of the Republic at Marseilles; was Préfet at Chaumont, and returned to the Bar in 1849. Elected as Opposition candidate for the third circonscription of the Seine in 1857, he took part in several important discussions; amongst which may be mentioned those relating to the laws respecting public safety, the expedition to Italy, and the regulation of the Press. During the session of 1860 he was one of the most distinguished members of a small group of Opposition Deputies, known by the name of "The Five." In the meantime he undertook the defence of M. Vacherot, indicted for his work entitled "La Démocratie," and in consequence of the style he adopted in pleading, was suspended for three months, an appeal against this judgment failing. In 1863 he was re-elected for Paris. During the session of 1865 he was elected a member of the Council-General of the Var. In July of the same year he received the appointment of Judicial Counsel and Commissary-General of the Viceroy of Egypt in Paris, and retired from the Paris Bar. M. Émile Ollivier was chosen by the Emperor as arbitrator of the difficulties which arose relative to the Isthmus of Suez, and it was upon his report that the final decision was founded. The session of 1866-67 witnessed the complete separation of M. Ollivier from his former political associates of the Left. At the General Elections of 1869 he was returned by an enormous majority for the first circonscription of the Var. On December 27 M. Ollivier, who had been for some time the centre of the movements for uniting the fractions of the late majority with the new Liberal Tiers Parti, received from the Emperor a letter inviting him to form a Ministry which should enjoy the confidence of the Legislative body, and which could carry out the Senatus-Consultum in letter and spirit. This onerous task he undertook, and the names of the new ministers were published in the *Journal Officiel* on Jan. 3, 1870. M. Ollivier himself took the portfolio of Justice. Among the first-fruits of the new administration was the granting of an amnesty in favour

of M. Ledru-Rollin, the convocation of the High Court of Justice at Tours to try Prince Pierre Bonaparte, the maintenance of order without shedding of blood during the popular excitement caused by the assassination of Victor Noir, the prosecution of Henry Rochefort, and the dismissal of M. Haussmann. Several administrative reforms also were introduced, and it was thought by many that an era of constitutional liberty had begun for France. These hopes were soon rudely dispelled. The declaration of war against Germany, and its disastrous results, led to the overthrow of the Ollivier Government on Aug. 9, 1870. M. Ollivier, who, it should be mentioned, had been elected a member of the French Academy in April 1870, deemed it prudent after the fall of the Empire to retire to Biella, in Piedmont, where he resided for a considerable time with his wife and child, devoting his time to literary pursuits. He returned to his house at Passy at the close of the year 1872, and his reception at the French Academy took place Feb. 25, 1874. In 1876 he twice stood for the Chamber of Deputies, but was unsuccessful. In 1880 M. Ollivier again became a figure in politics on the occasion of Prince Napoleon's letter touching the decrees about religious congregations. In the columns of the *Estafette* he called upon enlightened priests to conform to the decrees, but his appeal led to a violent and prolonged press quarrel with M. Paul de Cassagnac. Since 1880 he has scarcely mixed in contemporary politics except as a correspondent to newspapers. He accepts the Republic, but in 1885, when again standing unsuccessfully for the Chamber, declared that it should be resolutely anti-Radical. M. Émile Ollivier has published numerous juridical works, which have appeared in the *Revue de Droit Pratique*, which he founded in 1856, in conjunction with MM. Mourlon, Demangeat, and Ballot. He is the author, with M. Mourlon, of "Commentaire sur les Saisies Immobilières et Ordres," 1859; and of "Commissaire de la Loi du 25 Mars 1864, sur les Coalitions," 1864; "Une Visite à la Chapelle des Médicis: Dialogue entre Michel Ange et Raphaël," 1872; "Principes et Conduite," 1875; "l'Eglise et l'Etat au Concile du Vatican," 2 vols., 1879; "M. Thiers à l'Académie et dans l'Histoire," 1880; "Le Concordat, est-il respecté?" 1883; "Droit Ecclésiastique Français," 1885; and "1789 et 1889," 1890. In 1894 he published a defence of his policy in seven volumes, entitled "L'Empire Libéral." M. Ollivier's first wife, who died at Saint Tropez, in 1862, was a daughter of Liszt, the famous pianist and composer; he married, secondly, in September 1869, Mdlle.

Gravier, the daughter of a merchant of Marseilles. His Paris address is 17 Rue Desburdes-Valmore.

OLMSTED, Frederick Law, landscape gardener, was born at Hartford, Connecticut, April 25, 1822. He studied at Yale College, devoting special attention to engineering and the sciences connected with agriculture. In 1848 he purchased a farm on Staten Island, and while managing it, studied landscape gardening. In 1850 he made a pedestrian tour through England and portions of the Continent, an account of which was given in his "Walks and Talks of an American Farmer in England," 1852. In 1852-53, as correspondent of the *New York Times*, he travelled through the South for the purpose of studying the economical effects of slavery. The results of this and of a subsequent journey were afterwards published in separate works: "A Journey in the Seaboard Slave States," 1856; "A Journey through Texas," 1857; "A Journey in the Black Country," 1860; and "The Cotton Kingdom," 1861. In the meanwhile, in 1855, he made a tour through France, Italy, and Germany, for the purpose of observing parks and rural grounds. In 1857, in connection with Calvert Vaux, he secured the prize for the best plan of laying out the New York Central Park, and was appointed architect-in-chief of the work. He continued in charge of the Park until the outbreak of the Civil War (1861), when he was appointed Secretary and Executive Officer of the Sanitary Commission. From 1863 to 1865 he spent in California, when he was made one of the Commissioners of the Yosemite Reservation. He returned to New York in 1865, and had charge of the laying-out of the Brooklyn Prospect Park. He has since designed parks and other public works at Washington, Chicago, Rochester, Louisville, Milwaukee, Buffalo, Montreal, and other cities. He resides at Brookline, Massachusetts.

OLNEY, Hon. Richard, Attorney-General of the United States, was born at Oxford, Mass., Sept. 15, 1835, and was graduated from Brown University, Providence, R.I., in 1856. He attended the Harvard Law School from 1856 to 1859, when he was admitted to the Bar and began the practice of his profession at Boston, where he has since resided. He served as a Member of the Massachusetts House of Representatives in 1874, but held no other public office until his appointment by President Cleveland in March 1893, as Attorney-General of the United States. In May 1895 he was appointed Secretary of State of the United States by

President Cleveland, and served until the close of that Administration in 1897.

O'MALLEY, Sir Edward Loughlin, J.P., son of the late Peter Frederick O'Malley, Q.C., was born in 1842, and educated at Trinity College, Cambridge; B.A. 1864, M.A. 1868. He was called to the Bar, Middle Temple, in 1866, and went on the Norfolk and South-Eastern Circuits. He was made Attorney-General for Jamaica in 1876; Attorney-General for Hong Kong in 1879; and Chief-Justice of the Straits Settlements in 1889. In 1892 he was appointed Attorney-General of Jamaica and Hong Kong, in 1895 Chief-Justice of British Guiana, and in 1898 Judge of H.B.M.'s Supreme Consular Court, Constantinople. He received the honour of knighthood in 1891. He married, in 1869, Winifred, daughter of J. A. Hardcastle, M.P. Addresses: Denton House, Cuddesdon, Oxford; and Athenæum.

OMMANNEY, Admiral Sir Erasmus, C.B., LL.D., F.R.S., F.R.A.S., Knight Grand Commander of the Royal Order of the Saviour (Greece), is the seventh son of the late Sir Francis Molyneux Ommanney, the well-known navy agent, and sometime M.P. for Barnstaple, and nephew of the late Admiral Sir John A. Ommanney, K.C.B. He was born in London in 1814, and entered the navy in 1826. As midshipman, he assisted at the landing of the British army at Lisbon in 1827, and was at the battle of Navarino on board the *Albion*, which was in the thick of the fight, and for three hours was hotly engaged, firing on both sides at once. He acted as A.D.C. to the captain throughout the action. He served in H.M. ships *Revenge* and *Undaunted*, and saw much service in the Mediterranean, at the Cape of Good Hope, on the West Coast of Africa, and the East Indian stations. He served as mate in the royal yacht *Royal George*, in the summer of 1834, and was employed in conveying her Majesty Queen Adelaide from Woolwich to Holland and back again, and was afterwards usefully employed in the Packet Service on board a ten-gun brig, the *Pantaloon*, carrying the mails between Falmouth and Lisbon. He was promoted to Lieutenant in 1835, and immediately volunteered to serve with Capt. James Ross in an expedition to relieve the whaling vessels beset in the ice of Baffin's Bay; this expedition was carried out in mid-winter under extreme hardships and difficulties, and for his services Lieut. Ommanney received the commendation of the Admiralty. After this he served in H.M.S. *Pique*, and was then appointed Flag-Lieutenant to Sir John Ommanney in the *Tagus*, which caused his promotion

to the rank of Commander in October 1840. At Glasgow he studied the principles and construction of marine engines, in order to fit himself to command steam-vessels, which were then being introduced into the navy. With the *Vesuvius* he was actively employed in all parts of the Mediterranean for three years, being present at the bombardment of Tangier by the French. He then returned to England, and, unable to get active employment, studied at the Portsmouth Naval College. After being promoted Captain in 1846, he was employed by the Government to help in carrying out the relief measures during the Irish Famine, and in February 1850 was selected to be second in command of the Arctic Expedition, under Captain Austin, to search after the Franklin Expedition, and was the first to discover traces of the missing ships. After travelling over 500 miles on the ice in sledges, Capt. Ommanney returned to the ship, and though no further traces of Franklin were found, a great deal of new land was discovered. On his return to England he was appointed Deputy Controller-General of the Coast-guard, which he left on the outbreak of the war against Russia in 1854, when he was appointed to command the White Sea Expedition, with his pennant in H.M.S. *Eurydice*. Every part of the White Sea was searched, government stores were destroyed, and various towns bombarded. Upon his return to England, Captain Ommanney was appointed to H.M.S. *Hawke* for service in the Baltic Fleet, where he was selected to be the Senior Officer in the Gulf of Riga, with four ships under his orders. In November 1857 he proceeded to the West Indies and took command of H.M.S. *Brunswick*, and was kept as Senior Officer on the Coast of Central America, where he co-operated with the United States Commodore in preventing a filibustering invasion of Nicaragua. He was afterwards recalled to England, and served in the Channel Fleet, and after wintering at Berehaven the *Brunswick* was despatched to the Mediterranean. Captain Ommanney was lastly employed as Senior Officer in charge of the Naval establishments at the Rock of Gibraltar for nearly three years, a post he was obliged to leave on being promoted to the rank of Rear-Admiral in November 1864. He was afterwards knighted in recognition of his Arctic services, and was elected a Fellow of the Royal Society for his scientific observations and for his geographical discoveries made in the Arctic regions. Since being retired by compulsion, he has served on the Thames Conservancy, nominated by the Admiralty, and devoted himself to the interests of

learned societies. He has been a frequent attendant at the meetings of the British Association, and served on the Council. He accompanied the Society to the meeting in Canada in 1884 in the capacity of its treasurer, on which occasion the honorary degree of LL.D. was conferred on him by the University of Montreal. He read a paper at the Aberdeen meeting in 1885 on the desirability of renewing the exploration and research into the unknown Antarctic regions. In company with a well-known Berlin Professor and a Russian Astronomer, he proceeded to Luxor, in Upper Egypt, and assisted in observing the transit of Venus. He also accompanied the Expedition which went to Oran, in Algeria, for observing the total eclipse of the sun, but the observers, unfortunately, were unsuccessful owing to the obscurity of the weather. He is one of the oldest Fellows of the Royal Geographical Society, and has taken a constant interest in their proceedings, having served on the Council and been their delegate to congresses on the Continent at Antwerp, Berne, and Nantes. He is a Vice-President of the Royal United Service Institution, and attended the Council for twenty-seven years. During a residence of ten years in the Isle of Wight he discharged all the duties of a Justice of the Peace, and undertook the work of an independent visitor under the Home Office of the Convict Prison, for which the thanks of the Home Secretary were accorded him. As a survivor of the eventful and sanguinary battle at Navarino, and for other services in Greek waters, King George of Greece has been pleased to confer upon him the Cross of a Grand Commander of the Royal Order of the Saviour. Admiral Sir Erasmus Ommanney married, in 1862, Mary, daughter of Thomas A. Stone, Esq., of Curzon Street, London. Address: 29 Connaught Square, W.

OMMANNEY, Sir Montagu Frederick, K.C.M.G., Crown Agent for the Colonies, was born in 1846, and was educated at Cheltenham, whence he passed into Woolwich. In 1864 he entered the Royal Engineers, and retired with the rank of Captain in 1878, when he was appointed to his present position. From 1874 to 1877 he was Private Secretary to the Secretary for the Colonies. He was created a K.C.M.G. in 1890. Address: Manaton, East Sheen.

ONSLow, Earl of, William Hillier, Bart., G.C.M.G., was born on March 7, 1853, and is the only son of the late George Augustus Cranley Onslow, and Mary, daughter of Lieut.-General William Fraser Bentinck Loftus. He

was educated at Eton, and Exeter College, Oxford; and succeeded his grand-uncle as 4th Earl in 1870. He was Under-Secretary of State for the Colonies, 1887-88; and Parliamentary Secretary to the Board of Trade from February to November 1888, when he became Governor of New Zealand in succession to Sir W. D. Jervois. He was appointed Under-Secretary for India in 1895. The Earl was Lord-in-Waiting to her Majesty in 1880 and in 1886-87, is High Steward of Guildford, and from 1895 to 1898 was Alderman of the London County Council. During these years (1895-98), he was also leader of the Moderate Party in the London County Council. At the election in March 1898 he retired from the leadership owing to the multiplicity of his engagements, and a hearty vote of thanks was passed to him at a meeting of the Moderate Party for his great services to the party during his three years' tenure of the position. In 1875 he married Florence, daughter of the 3rd Lord Gardner. Addresses: 7 Richmond Terrace, S.W.; and Clandor Park, Guildford.

OPPERT, Julius, a French Orientalist, was born in Hamburg, of Jewish parents, July 9, 1825. He studied law at Heidelberg, and Sanskrit and Arabic at Bonn. He next studied the Zend and the ancient Persian, and published a treatise at Berlin on the vocal system of the latter language. As his religion prevented him from holding a professorship in a German University, he went to France in 1847, obtained the professorship of German at the Lycées of Laval and Rheims, and was appointed on the scientific expedition sent by the Government to Mesopotamia. After his return in 1854, he submitted to the Institute a new system of interpreting inscriptions. For nearly thirty years he has devoted himself chiefly to the deciphering of cuneiform inscriptions. In 1857 he was appointed Professor of Sanskrit in the School of Languages attached to the Imperial Library. Among his works are "Les Inscriptions des Archémides," 1852; "Etudes Assyriennes; L'expédition scientifique de France en Mésopotamie," 1854-64; "Grammaire Sanscrite," 1859; "Grande Inscription du Palais de Khorsabad," 1864; "Histoire des Empires de Chaldée et d'Assyrie, d'après les monuments," 1866; "L'Immortalité de l'âme chez les Chaldéens, suivie d'une traduction de la descente aux enfers de la déesse Istar Astarté," 1875; "L'Ambre jaune chez les Assyriens," 1880; "Fragments Mythologiques relatifs à la Mythologie Assyrienne," 1882; "Deux Textes très anciens de la Chaldée," 1883; "Chronologie de la Génèse," 1877; "Documents

juridiques de la Chaldée et de l'Assyrie," 1878; "Le Peuple et la Langue des Mèdes," 1879. He has written many papers on the Laws of Assyria and Babylon, such as "État des Esclaves à Babylone," &c. His Paris address is: 2 Rue de Sfax.

ORCHARDSON, William Quiller, R.A., D.C.L. Oxford, born in Edinburgh in 1835, entered at the age of fifteen the Trustees' Academy of his native city. The first pictures he submitted to public inspection were shown in the exhibitions of the Royal Scottish Academy. Encouraged by their reception, Mr. Orchardson came to London in 1863, and the same year exhibited at the Royal Academy for the first time. His contributions were entitled "An Old English Song," and "Portraits," the latter a life-size full-length portrait composition of three young ladies. In the following year he exhibited at the British Institution a figure of "Peggy" from Allan Ramsay's "Gentle Shepherd," and at the Royal Academy another Scottish subject entitled "Flowers o' the Forest." The following year there appeared at the Royal Academy "Hamlet and Ophelia," and in the winter exhibition at the French Gallery, Pall Mall, "The Challenge," which won a prize of £100 given by Mr. Wallace. In 1866 came "The Story of a Life" at the Academy—an aged nun relating her life experience to a group of novices; and "Christopher Sly," in Mr. Wallis's winter exhibition at the Suffolk Street Galleries. In 1867 the Academy pictures were "Talbot and the Countess of Auvergne," and "Miss Pettie"; and another was shown at the French Gallery winter exhibition, entitled "Choosing a Weapon." In January 1868 he was elected an Associate of the Royal Academy, only four years after he had come to London. He exhibited that year at the Academy, besides a portrait of Mrs. Birket Foster, a subject from Shakespeare—"Prince Henry, Poins, and Falstaff." In 1870 three pictures by him were exhibited at the Royal Academy, viz., "Day Dreams," "The Market-Girl from the Lido," and "Toilers of the Sea." Mr. Orchardson achieved a great success at the Paris Universal Exhibition, where his "Challenge" and "Christopher Sly" were greatly admired by French critics, and won for the painter one of the very few medals awarded to English artists. His more recent pictures are: "A Hundred Years Ago," "On the Grand Canal, Venice," and "In St. Mark's, Venice," exhibited at the Academy, 1871; "Casus Belli," and "The Forest Pet," 1872; "The Protector," "Oscar and Brin," and "Cinderella," 1873; "Hamlet and the King," "Ophelia," "A Venetian Fruit-seller," and "Escaped,"

1874; "Too Good to be True," and "Moonlight on the Lagoons," 1875; "Flotsam and Jetsam," "The Bill of Sale," and "The Old Soldier," 1876; "The Queen of the Swords," and "Jessica" (Merchant of Venice), 1877; "Conditional Neutrality," "A Social Eddy left by the Tide," and "Autumn," 1878; "Hard Hit," a scene at the gaming table, 1879; "Napoleon I. on board H.M.S. *Bellerophon*," 1880, purchased by the Council of the Royal Academy under the terms of the Chantrey bequest; "Housekeeping in the Honeymoon," 1882. These were followed by "Voltaire," 1883; "Un Marriage de Convenance," 1884; "The Salon of Mme. Recamier," 1885; "Un Marriage de Convenance—After," 1886; "The Rift within the Lute," 1887; and "The Young Duke," 1889. Besides portraits of Lord Rookwood, Prof. Dewar, David Stewart, Lord Provost of Aberdeen, the Bishop of St. Asaph's, the Provost of Oriel, Viscount Peel, and several ladies, he has of late years exhibited at the Royal Academy "A Flower," 1895; "Reflections," 1896; "Rivalry," 1897; "Trouble," 1898; and portraits of Lord Kelvin, of Peter Russell, Esq., of the Earl of Crawford (presentation portrait), and of Edmund Davis, Esq., 1899. Mr. Orchardson was elected a Royal Academician, Dec. 13, 1877; and a D.C.L. of Oxford in 1890. Address: 13 Portland Place, W.

ORD, William Miller, M.D., F.R.C.P., received his medical education at St. Thomas's Hospital, where he was successively House Surgeon, Surgical Registrar, Demonstrator of Anatomy, Lecturer on Physiology and on Comparative Anatomy, and where he is now Physician and Lecturer on Medicine. He obtained his M.D. of London in 1877, having become a Fellow of the R.C.P., London, two years previously. He is Treasurer of the Clinical Society, Fellow of the Royal Medico-Chirurgical Society, and Fellow or Member of other leading Medical Societies. In 1879 he published "Influence of Colloids upon Crystalline Forms," and has contributed many papers on Uric Acid, &c., to the St. Thomas's Hospital Reports, the *Med. Chir. Trans.*, &c. In 1881 he edited the works of Francois Gibson, and in 1885 delivered the Presidential Address at the Medical Society of London on Hyperpyrexia. Address: 37 Upper Brook Street, Grosvenor Square, W.

O'RELL, Max. See BLOUËT, PAUL.

ORLÉANS, Prince Henri d', was born at Ham, near Richmond, Oct. 16, 1867, and is the eldest son of the Duc de

Chartres. When he was about to enter St. Cyr in 1887, the law was passed forbidding princes of Royal blood from serving their country in any capacity. He therefore started on a voyage round the world, which lasted twelve months, six of which he spent in India shooting with his cousin, the Duc d'Orléans. On his return he published "Six Mois aux Indes, chasses au tigre," 1889. In the same year he started with the explorer, Gabriel Bonvalot, on an exploration of Tibet. Starting from Russia, they crossed Siberia and traversed Tibet, coming out in Tonquin after a terribly arduous journey. On his return he was awarded, with his two companions Bonvalot and Dedecken, the gold medal of the Geographical Society of France, and was elected a member of those of London, Rome, Vienna, and Berne. In collaboration with M. Bonvalot he published "De Paris au Tonkin à travers le Tibet inconnu," 1891. He then started for Central Africa; disembarking in the Gulf of Aden he went inland as far as Harrar and Mill-Mill, and laid down the first map of the country, 1892. In 1894 he spent some months in Madagascar before the French occupation, and then returned to Tonkin and discovered the sources of the Irrawaddy on his way from China to India. Since then he has headed a mission to the Negus of Abyssinia.

ORLÉANS, Duc d', Prince Louis Philippe Robert, eldest son of the late Comte de Paris, was born Feb. 6, 1869. On attaining his majority, Feb. 6, 1890, he entered Paris, and proceeding to the Mairie, expressed his desire as a Frenchman to perform his military service; whereupon he was arrested in conformity with the Expulsion Bill of 1886, which forbids the soil of France to the direct heirs of the families which have reigned there. He was liberated by President Carnot after a few months' nominal imprisonment, and conducted to the Swiss frontier. This escapade won him the title of the "Premier Conscriit." During the last illness of his father in August and September 1894, he was constantly at the bedside of the illustrious patient, with whom he is reported to have had many private conversations on his duties as the future representative of the family tradition. After the Comte de Paris's funeral, he received his adherents, and is now chiefly in Brussels, which will in future be his headquarters, Stowe House being, in his opinion, too distant from Orleanist circles in France, especially from those older members of the party who cannot undertake a sea voyage. In 1896 he married Marie Dorothea, Archduchess of Austria. His periodical proclamations have little effect in France now.

He has recently (1898) fitted up York House, Twickenham, as a residence.

ORMEROD, Miss Eleanor A., F.R. Met. S., F.E.S., &c., was born at Redbury Park, near Chepstow, and is the youngest daughter of Geo. Ormerod, D.C.L., F.R.S., of Sedbury Park, Gloucestershire, and of Tyldesley, Lancashire, who was well known as the "Historian of Cheshire." From her earliest childhood Miss Ormerod was excessively fond of observing plant and animal life. To a judicious early training under her mother Miss Ormerod attributes the success which has attended her studies as a specialist. In early life successive illness occasioned periods of enforced leisure, which Miss Ormerod occupied in natural history studies out of doors, together with the correlated subjects of Botany, Horticulture, and Agricultural Chemistry. She has acquired a knowledge of Latin, French, Italian, and several other of the less commonly studied Continental languages, which greatly helped her in later work, and she began early to sketch from nature in pencil and water colours. About the year 1853 she took up the scientific study of entomology. The real work of her life began in 1868, when the formation of the collection of Economic Entomology was set on foot by the Royal Horticultural Society and the South Kensington Department. At this time, Mr. Andrew Murray, the curator of the Museum, was in constant communication with Miss Ormerod, suggesting special investigations and reports; and, in response, she contributed specimens, drawings, and models illustrative of insect depredations, in recognition of which many services the "Silver Floral Medal" of the Royal Horticultural Society was awarded to her. In the year 1872 Miss Ormerod was chosen to represent British natural history modelling from life at the International Polytechnic Exhibition held in Moscow, and sent over a large collection of plaster-of-Paris models, taken by her in exact facsimile by a process of her own invention and coloured by herself. These specimens represented a large number of garden plants and hot-house fruits. She also sent groups of electro-types from nature, representing leaves and reptiles. For these she received the Silver Medal, the Great Silver Medal, and also the Gold Medal of Honour from the University of Moscow. In 1878 Miss Ormerod was elected a Fellow of the Meteorological Society, being the first lady ever admitted to Fellowship. She arranged and edited for the Society a large mass of observations relating to coincident conditions of weather and plant life. This was published in a royal 8vo vol. under the

name of the "Cobham Journals." In 1881 she published her "Manual of Injurious Insects, with Methods of Prevention and Remedy for their Attacks on Food-Crops, &c.," and in 1884 her "Guide to Insect Life," being a series of ten lectures on the same class of subjects delivered by her in the Lecture Theatre at South Kensington Museum. Both works have been republished in much enlarged form, and were followed, in 1889, by a small vol. on some of the injurious insects of South Africa. But Miss Ormerod's chief publication has been her "Annual Reports of Observations on Injurious Farm Insects," which were begun in 1877, and continued yearly up to the present date, thus forming a continuous record of the presence and habits of insects injurious to field and orchard crops, and the means found really serviceable for checking their ravages, over a period of twenty-one years. In 1881 she accepted the post of Special Lecturer on Economic Entomology at the Royal Agricultural College, but after a few years she resigned this office. She was unanimously elected Consulting Entomologist to the Royal Agricultural Society of England by the Council, on May 2, 1882. To the duties of this post she devoted her best attention for about ten years. But in the course of 1892, she retired from the office. Miss Ormerod is a member of many scientific societies. She is Hon. Member of the Farmers' Club, a Fellow of the Royal Meteorological Society, and of the Entomological Society of London, and of Stockholm, also a Member of the Entomological Society of Washington, and a Corresponding Member of the International Association of Official Entomologists of Washington. Miss Ormerod is also an additional examiner in Agricultural Entomology in the University of Edinburgh. Her membership with societies in Canada, Australia, and South Africa affords the opportunities of giving and receiving communications aiding in her special work, which continues to increase in scope and importance. Besides the heavy home correspondence which she conducts, especially in reply to inquiries from British agriculturists, Miss Ormerod receives numerous applications from foreign countries and the colonies, and is likewise a frequent contributor to the agricultural journals, regarding prevention of farm and fruit insect attacks. Address: Torrington House, St. Albans.

ORMONDE, Marquis of, James Edward William Theobald Butler, K.P., Hereditary Chief Butler of Ireland and Vice-Admiral of Leinster, was born at Kilkenny Castle on Oct. 5, 1844, and succeeded his father, the

2nd Marquis, in 1854. He was educated at Harrow, and entered the 1st Life Guards, retiring with the rank of Captain in 1873. He is Hon. Colonel of 5th Batt. of the Royal Irish Regiment, and for some ten years commanded the Royal East Kent Yeomanry. In 1888 he was made a Knight of St. Patrick. He has been Lord Lieutenant of Kilkenny since 1878. He married, in 1876, Lady Elizabeth Harriet Grosvenor, daughter of the 1st Duke of Westminster. Addresses: 32 Upper Brook Street, W.; Kilkenny Castle, &c.

OSCAR II., King of Sweden and Norway, is the great-grandson of Napoleon's famous general Bernadotte, and was born Jan. 21, 1829. Before he ascended the throne he held the rank of Lieutenant-General in the army. On the death of the King's brother, Charles XV., Sept. 18, 1872, he succeeded to the throne. In 1878 the Frankfort Academy of Sciences elected the King of Sweden a corresponding member in recognition of his poetical translation of Goethe's "Faust" into Swedish. His Majesty is also the author of "A Memoir of Charles XII." (translated into English in 1879); and of "Poems and Leaflets from my Journal," 1880, under the *nom de plume* of "Oscar Frederik." He married, in June 1857, the Princess Sophia of Nassau, daughter of the late Duke Wilhelm of Nassau, who was born in July 1836. From this union there are four sons — namely, Gustaf, Duke of Wermland, born in June 1868, now heir-apparent to the throne; Oscar, Duke of Götland, born in November 1869, and who married Miss Ebba Munck, daughter of Col. Munck; Carl, Duke of Westergötland, born in February 1861; and Eugene, Duke of Nerike, born in August 1865. The coronation of King Oscar and Queen Sophia took place July 18, 1873, at the Cathedral of Drontheim in Norway. In 1892 and 1893 King Oscar opposed himself resolutely to the desire of the Norwegian Parliament for a foreign and consular service which should be independent of Sweden. On Sept. 18, 1897, he celebrated the 25th anniversary of his accession amidst the great rejoicings of his people. In the same year his son, Prince Carl, was married to the Princess Ingeborg of Denmark.

OSCAR FREDERICK. See OSCAR II.

OSLER, William, M.D., F.R.C.P., F.R.S. Lond., Professor of Medicine at the Johns Hopkins University, was born at Bend Head, Canada, on July 12, 1849, and is the sixth son of the late Rev. F. L. Osler. He was educated at Toronto University,

M'Gill University, University College, London, Berlin and Vienna, &c. He was Professor of the Institutes of Medicine at M'Gill University from 1874 to 1884, Professor of Clinical Medicine at the University of Pennsylvania from 1884 to 1889, when he was appointed to his present post, and Gulstonian Lecturer at the Royal College of Physicians, London, in 1885. In 1898 he was elected F.R.S. His most important standard work is "The Principles and Practice of Medicine," 3rd edit., 1898. Address: Baltimore.

OSMAN ALI (called Osman Digna, or "the bearded one," from *dikn*, the beard) was born at Suakim about 1836. He is not of pure Arab descent; his grandfather was a Turkish slave-dealer who married a woman of the Hadendowa tribe; and Osman, like his father and grandfather before him, was a dealer in slaves, and had connections in Khartoum and Berber; and during later years, before he appeared as the ambassador of the Mahdi, he stayed more frequently at Berber than at Suakim. There he entered into communication with the Mahdi, Mohammed Ahmed, and matured his plans for inducing the tribes round Suakim to rebel against the oppression of their Egyptian rulers. Osman Digna was not, however, the first and original leader of the rebellion. Sheik Tahher, of Suakim, who enjoyed the repute of especial holiness amongst the superstitious nomads of those parts, was the real messenger of the Mahdi, and the channel of communication in the negotiations with the rebellious tribes, while Osman Digna was more the military commander, and had to base his operations upon the spiritual authority of Sheik Tahher, a relation which existed till within recent years. It is well known with what skill Osman Digna filled his position, extended his influence over the rebellious tribes, and rose in the estimation of the authorities at Khartoum. The rebellion of the False Prophet on the White Nile broke out in December 1881; and in August 3, 1883, Osman Digna appeared before Suakim, on which day the first encounter took place at Sinkat with Tewfik Bey, Osman being beaten and wounded, and losing three members of his family. In September 1885 an Abyssinian expedition under Ras Alula, which had been sent to the relief of Kassala by King Johannes, encountered Osman Digna at Kafell, and utterly defeated him. He again threatened Suakim in 1888, whence he was repulsed by General Grenfell on December 21 of that year. He has been reported as slain more frequently than any other warrior. However, his natural astuteness did not desert him after the

fatal battle of Omdurman, for he was one of the few Emirs who escaped the terrible slaughter. Late in 1898 he was reported to be a fugitive in the less accessible portions of the Soudan.

OSMAN DIGNA. : OSMAN ALL.

OSSORY, Ferns, and Leighlin.

See CROZIER, THE RIGHT REV. JOHN BAPTIST.

OTTO, King of Bavaria, was born April 27, 1848; succeeded to the throne June 13, 1866; but owing to his being mentally afflicted the government passed into the hands of the Regent, Prince Luitpold, on June 10, 1886.

OTWAY, The Right Hon. Sir Arthur John, Bart., D.L., J.P., was born in Edinburgh on Aug. 8, 1822, and succeeded his brother, the 2nd Baronet, in 1881. He was educated at Sandhurst and in Germany, and entered the 51st Regiment in 1839, retiring in 1846. He went to the Bar at the Middle Temple in 1850, and subsequently entered upon a long Parliamentary career, being returned as Liberal member for Stafford in 1852, and representing that constituency until 1857, after which he sat for Chatham and then for Rochester. While representing Chatham he was Under-Secretary for Foreign Affairs from 1868-71. He was Chairman of Ways and Means, and Deputy Speaker of the House of Commons from 1883 to 1885. He was sworn of the Privy Council in 1885. He married, in 1851, Henrietta, daughter of Sir James Langham, 10th Baronet. Addresses: 34 Eaton Square, S.W.; and Athenæum.

QUIDA. See LA RAMÉE, LOUISE DE.

OULESS, Walter William, R.A., was born at St. Heliers, Jersey, Sept. 21, 1848, and educated at Victoria College in that island. He came to London in 1864, and was admitted a student of the Royal Academy in the following year. While there he took a silver medal in the Antique School, and was an unsuccessful competitor for the Historical Gold Medal. Mr. Oules has been a constant exhibitor at Burlington House since 1869, and his first works were subject pictures, the principal being "Home Again," and "An Incident in the French Revolution." In 1872, acting on the advice of Mr. Millais, he took to portrait-painting, and has since devoted himself almost exclusively to that branch of the profession. He was elected an Associate of the Royal Academy, Jan. 24, 1877, and a Royal Academician, May 5, 1881. He obtained the medal of the

second class at the Paris International Exhibition of 1878. Among the portraits painted and exhibited by Mr. Oules may be mentioned those of Lord Selborne; Mr. Charles Darwin, F.R.S.; the late Bishop of London; Admiral Sir Alexander Milne, G.C.B.; Miss Ruth Bouverie, 1877; the late Mr. Russell Gurney, M.P., Recorder of London, 1877; Lieut-Colonel Loyd Lindsay, 1878; Mr. John Bright, M.P.; Sir Thomas Gladstone; the Rev. Dr. Ridding, head-master of Winchester College; and Mr. Edmund Yates, 1879; His Eminence Cardinal Newman; Mr. Justice Manisty, 1880; Mrs. Butterworth, 1881; General Sir F. Roberts, 1882; the late Bishop of Llandaff, and the Bishop of Norwich, 1883; Mr. G. Scharf, 1886; His Eminence Cardinal Manning, 1888; Sir William Bowman, F.R.S.; Lady Manisty; T. Sidney Cooper, R.A., 1889; the Bishop of St. Albans and the Bishop of Chichester, 1890; Sir Charles Tennant, Bart., 1893; Major-General Sir F. Grenfell; Sir William Savory, Bart.; Sir John Gladstone, Bart., 1894; His Honour Judge Sir Horatio Lloyd; H.R.H. the Duke of Cambridge, 1895; Frederic J. Harrison; Dr. Dobie, of Chester; the Dean of Llandaff, 1896; the Hon. W. F. D. Smith, M.P.; Lord Lister (presentation portrait); Sir Charles Seely, Bart. (presentation portrait); Justice Lindley; Sir Spencer Ponsonby Fane, K.C.B., 1897; John Maundrell Richardson, D.L. (presentation portrait), and Edward Wood (presentation portrait), 1898; the Hon. Lucius O'Brien, Lord Leigh, and the Bishops of Truro and Lincoln, 1899. Mr. Oules was one of the two English recipients of the grand Gold Medal for Art at the Berlin International Exhibition, 1886; and was made a Chevalier de la Légion d'Honneur after the Paris Universal Exhibition of 1889. Mr. Oules is Hon. Secretary of the Artists' General Benevolent Institution. He married Lucy, daughter of the late E. K. Chambers, M.D., in 1868. Addresses: 12 Bryanston Square, W.; and Athenæum.

OWEN, Edmund, M.B., F.R.C.S., received his medical education at St. Mary's Hospital, London, and in Paris. He was at one time Lecturer on Anatomy, and is now Lecturer on Clinical Surgery at St. Mary's Hospital Medical School. He is Senior Surgeon at St. Mary's, and at the Hospital for Children in Great Ormond Street, besides being Consulting Surgeon to a number of other hospitals. He is a member of Council and of the Court of Examiners at the Royal College of Surgeons, is ex-President of the Harveian Society, Orator and Trustee of the Medical Society of London, Fellow of the Royal Medical Chirurgical Society, Hon. Asso-

ciate of the Order of St. John of Jerusalem, &c. He has been Examiner in Surgery at the University of Durham. His works include "Surgical Diseases of Children," 3rd edit., 1897; Harveian and Lettsomian Lectures, both on the Surgery of Childhood, articles in Heath's "Dictionary of Surgery," and contributions to the medical journals and to various learned Transactions. Address: 64 Great Cumberland Place, W.

OWEN, Sir Hugh, G.C.B., late Permanent Under-Secretary of the Local Government Board, was born in 1835, and is the eldest son of Sir Hugh Owen, Kt., the Welsh educationist. He was called to the Bar at the Middle Temple, was Assistant Secretary of the Local Government Board from 1876 to 1882, and became Permanent Under-Secretary in 1882. He received the honour of the Knighthood of the Bath in 1887, and was created G.C.B. at New Year 1899. In December 1898 his retirement was announced. The *Times* stated at that date that "during his tenure of this office many important measures affecting local government have been passed, and successive Presidents of the Board have acknowledged the valuable assistance they have received from Sir Hugh in the preparation and carrying of their several measures. In 1897 a departmental committee on Local Government Board organisation stated in their report that they could not 'pass by without comment the able and devoted manner in which Sir Hugh Owen has administered the trying and ever-increasing work of his department for a period of fifteen years,' and declared that 'few men could have borne the incessant strain as he has done.' By his retirement the State loses a valuable public servant. His ability and unfailing courtesy will cause the announcement that he has ceased to hold office to be received with much regret by all who are interested in local government." He has published various legal works on municipal and local authorities and matters, including "The Education Acts Manual," and "The Municipal Corporation Act," 1882. He married, in 1865, Charlotte Elizabeth, *née* Burt. Address: Belmont, Crouch End Hill, N.

OWEN, The Right Rev. John, D.D., Bishop of St. Davids, late Dean of St. Asaph, was born at Llanengan, Carnarvonshire, on Aug. 24, 1854, and is the son of Mr. Griffith Owen, Yguborwen, Den. He was educated at Bottwnog Grammar School and Jesus College, Oxford, where he gained a scholarship at entrance in 1872. He obtained a second class Honour in Classical Moderations, 1873; and a

second class in Mathematical Moderations, 1874; and graduated with second class Honour in Mathematical Finals, 1876; proceeding to the M.A. degree in 1879. He was ordained Deacon in 1879, and Priest in 1880, by the Bishop of St. Davids. He was elected Professor and Lecturer in Classics and Theology at St. David's College, Lampeter, 1879-85; Head-Master and Warden of Llandoverly College, 1885-89; and was appointed Dean of St. Asaph in 1889. He retired from the Deanery in 1892. In the same year he was appointed a Canon of St. Asaph, and Principal of St. David's College, Lampeter. He was consecrated Lord Bishop of St. Davids in St. Paul's Cathedral on May 1, 1897. He speaks Welsh fluently, and was active in the movement for the defence of the Established Church in Wales. He married Amelia, daughter of J. Longstaff, of Appleby. Addresses: Abergwili Palace, Carmarthen; and Athenæum.

OXFORD, Bishop of. See STUBBS, THE RIGHT REV. WILLIAM.

PACHMANN, Vladimir de, Russian pianist, was born at Odessa about 1848. He was educated at Vienna under Dachs, and gained the gold medal. In 1869 he returned to Russia, and not being favourably received at first, he studied for two more years. He then met with much success in Germany, at Vienna, and Paris. His first appearance in London was in 1882 at one of Wilhelm Ganz's concerts; and since then rarely has a musical season passed without his giving a series of concerts, generally at St. James's Hall. Liszt called him "the Poet of the Piano," and he is famous for his interpretations of Chopin. He married, in 1884, Miss Oakey, the pianist.

PADEREWSKI, Ignace Jan, was born in 1860, in Podolia, Poland. In spite of unsympathetic surroundings his natural genius for music showed itself when he was still quite young. Before he was twenty he had decided to devote himself to composition, and on reaching that age he proceeded to Berlin in order to study harmony, &c. A few years later he resolved to become a pianist, and accordingly studied during three years under the tuition of Leschetitsky, husband of the well-known performer, Madame Essipoff. He advanced rapidly in his art, and his début was a complete success. He is now one of the first of living pianists, as well as a brilliant composer.

He owes much of his success to intense and incessant practice, which has given him his marvellous ease of execution. Early in 1893 M. Paderewski made an American tour and gained thereby some £32,000. A new fantasia by him was produced at the Norwich Festival in 1893. In January 1895 an unusual incident occurred at Torquay, Paderewski, it was said, refusing to play before people who paid only five shillings to hear him. His manager afterwards corrected this statement, affirming that the reason of Paderewski's conduct was that he resented the lowering of prices—from ten shillings on his previous visit to five shillings—without his consent. However, in the following month, the artist displayed again his well-known kindness of heart in giving a recital at Hanley in behalf of the Audley Distress Fund. As a result of this performance, the substantial sum of £160 was handed over to the Mayor of Hanley as a contribution to the Fund. In April 1897, a "Paderewski Orchestral Concert" was given at the Queen's Hall, London, when M. Paderewski, accompanied by Mr. Henry Wood's orchestra, gave a special performance of two concertos, Schumann's in A minor and Liszt's in E flat. It was widely remarked at the time that the pianist, spite of his unrivalled eminence, showed a considerable increase in dignity, repose, and true virtuosity, and the whole exquisite rendering added largely to M. Paderewski's reputation. In the following June (1897) the artist repeated his orchestral combination, and was declared to have never been heard to greater advantage. Since that time, M. Paderewski has been touring abroad, making one or two fugitive appearances in England, notably at the Crystal Palace at the Saturday Afternoon Concerts.

PAGE, Herbert William, M.A., M.B., F.R.C.S., was educated at the Universities of Edinburgh and Cambridge, at the London Hospital, and in Vienna. He is Surgeon and Lecturer on Surgery at St. Mary's Hospital, has been Examiner in Surgery at the University of Cambridge, and is Member of the Court of Examiners of the Royal College of Surgeons, Eng. In 1870-71 he was Assistant-Surgeon to the Hessian Division of the German Army, and at present holds various appointments as Surgeon to the Railway Passengers Assurance Co., &c. He has published "Injuries to the Back in their Surgical and Medico-Legal Aspects," being the Boylston Prize Essay, Harvard, 1881; "Injuries of the Spine and Spinal Cord, and Nervous Shock," 2nd edit., 1885; "Railway Injuries," 1891, translated into German; "Clinical Papers on Surgical

Subjects," 1897, besides articles on the Spine, &c., in Heath's "Dictionary of Surgery," and Treves's "Manual and System of Surgery," and the *Royal Med. Chir. and Clin. Society Transactions*, &c. Address: 146 Harley Street, W.

PAGE, Thomas Nelson, D.L., American writer, was born at Oakland, Hanover Co., Virginia, April 23, 1853. He was educated at Washington and Lee University, and received the degree of LL.B. from the University of Virginia in 1874. He has since practised his profession at Richmond. The degree of D.L. was conferred upon him by Washington and Lee University in 1887. Mr. Page's first publication was a rhyme entitled "Uncle Gabe's White Folks," which appeared in *Scribner's Monthly* (now the *Century*) in 1877. In 1884 was issued, in the *Century*, "Marse Chan," a negro dialect story of the Civil War, and this made the writer's reputation. Others in the same vein followed, and in 1887 they were collected and published together in a book under the title of "In Ole Virginia." This was followed by "Befo' de War: Echoes in Negro Dialect," 1888; "Two Little Confederates," 1888; "Elsket and Other Stories," 1890; "On Newfound River," 1891; "Among the Camps," 1891; "The Old South Essays," 1892; "The Burial of the Guns," 1894; "Pastime Stories," 1894; "Polly," 1894; "The Old Gentleman of the Black Stock," 1897; and "Social Life in Old Virginia before the War," 1897. Address: Washington.

PAGET, The Right Hon. Lord Clarence Edward, K.C.B., son of the 1st Marquis of Anglesey, K.G., by his second marriage, born June 17, 1811, entered the navy at an early age, and saw some active service in the Baltic during the Crimean War. He was for some time secretary to his father when Master-General of the Ordnance, was appointed Secretary to the Admiralty in Lord Palmerston's second Administration in 1859, and retired in May 1866, in order to take the command of the Mediterranean squadron. He attained flag rank in 1858, and was made Vice-Admiral, April 24, 1865. He was returned as one of the members in the Liberal interest for Sandwich in August 1847, did not present himself for re-election in July 1852, was re-elected for that borough in March 1857, and resigned his seat on taking the command of the Mediterranean squadron in May 1866. He retired from the command of the Mediterranean fleet in May 1869.

PAGET, The Very Rev. Francis, D.D., Dean of Christ Church, Oxford, was

born in London on March 20, 1851, and is the second son of Sir James Paget, Bart., D.C.L. He was educated at Shrewsbury School, and at Christ Church, of which he was Junior Student from 1869 to 1873, and Senior Student 1873-83. In 1871 he gained the Chancellor's Prize for Latin verse, became Hertford Scholar, and took a first class in Classical Moderations. In 1873 he was in the first class in Lit. Hum. (B.A. 1873; M.A. 1876; D.D. by decree, 1885). From 1883 to 1885 he was Vicar of Bromsgrove, having previously been tutor of his college from 1875 to 1882. He was Oxford Preacher at Whitehall from 1881 to 1883. From 1885 to 1892 he was Regius Professor of Pastoral Theology and Canon of Christ Church, and in the latter year became Chaplain to the Bishop of Oxford, having previously been Examining Chaplain to the Bishop of Ely. In January 1892 he was appointed Dean of Christ Church in succession to the late Dean Liddell, who had then retired. His works include: "Concerning Spiritual Gifts," "The Redemption of Work," and "The Hallowing of Work," "Faculties and Difficulties for Belief and Disbelief," the essay on "Sacraments" in "Lux Mundi," "The Spirit of Discipline," and "Studies in the Christian Character." He married, in 1883, Helen Beatrice, eldest daughter of the late Dean Church. Address: Christ Church, Oxford.

PAGET, Sir George Ernest, Bart., D.L., only son of George Byng Paget, was born in Nov. 1841, and was educated at Harrow. Joining the 7th Hussars in 1860, he was transferred to the Royal Horse Guards in 1861, and retired as Lieutenant in 1867. He is Lieutenant-Colonel (retired) of the Leicestershire Yeomanry, and since 1890 has been Chairman of the Midland Railway. He was created a Baronet in 1897. He married, in 1864, Sophia, *née* Holden. Address: Sutton, Bonnington, Loughborough.

PAGET, Sir James, Bart., F.R.S., LL.D. Cantab., D.C.L. Oxon., F.R.C.S., &c., ex-President of the Royal College of Surgeons of England, M.D. Dublin, Bonn, and Würzburg, Hon. F.R.C.S. Dublin and Edinburgh, son of Samuel Paget, Esq., merchant, was born at Great Yarmouth, Jan. 11, 1814, became a Member of the Royal College of Surgeons in 1836, and an Honorary Fellow in 1843. He is Sergeant-Surgeon to the Queen, Surgeon to the Prince of Wales, and Consulting Surgeon to St. Bartholomew's Hospital. Sir James Paget, who was Vice-Chancellor of the University of London from 1884 to 1895, and a Corresponding Member of the Institute of France (Academy of Sciences),

is the author of the "Pathological Catalogue of the Museum of the College of Surgeons," "Report on the Results of the Use of the Microscope," published in 1842; and "Lectures on Surgical Pathology," in 1853, 1863, and 1868; and has been an extensive contributor to the *Transactions* of the Royal and other learned societies. He was created a baronet in August 1871. He was a Member of the Royal Commission appointed in 1881 to inquire into the condition of the London Hospitals for smallpox and fever cases, and into the means of preventing the spread of infection. Sir James Paget was one of the scientific celebrities who received an honorary degree at the Jubilee (1882) in commemoration of the 300th anniversary of the founding of the University of Würzburg. He married, in 1844, Lydia, daughter of the late Rev. Henry North, Domestic Chaplain to H.R.H. the late Duke of Kent. Address: 5 Park Square West, N.W.

PAGET, The Right Hon. Sir Richard Horner, Bart., was born in Somerset on March 14, 1832, and is the second son of the late John Moore Paget, of Cranmore Hall, Somerset. He was educated at the R.M.A., Sandhurst, and served abroad in the 66th Berkshire Regiment from 1848 to 1863. He sat as Conservative M.P. for East Somerset from 1865 to 1868, for Mid-Somerset from 1868 to 1885, and for the Wells Division of Somerset from 1885 to 1895. He is Chairman of Quarter Sessions and of the County Council, Somerset, Hon. Lieut.-Col. of the 3rd Batt. Somerset Light Infantry, and has been Captain of the North Somerset Yeomanry. He was created a baronet in 1886, and was sworn of the Privy Council in 1895. He married, in 1866, Caroline, second daughter of H. E. Surtees, M.P. Addresses: 58 Queen Anne Street, W.; and Cranmore Hall, Shepton Mallet.

PAGET, Stephen, F.R.C.S., fourth son of Sir James Paget, Bart., was born in 1855, and was educated at Shrewsbury, and Christ Church, Oxford, where he took the degree of M.A. He pursued his medical studies at Oxford, and at St. Bartholomew's Hospital, is a Fellow of the Royal College of Surgeons, and holds the appointments of Surgeon to the West London Hospital, and Surgeon to the throat and ear department at the Middlesex Hospital. He was formerly Surgeon to the Metropolitan Hospital. Mr. Paget belongs to various medical societies, and is the author of: "The Surgery of the Chest," 1896; "John Hunter" (1st vol. of the Masters of Medicine Series), 1897; "Ambroise Paré and his Times," 1897; and of numerous lectures and papers on surgical sub-

jects. In 1885 he married Eleanor Mary, second daughter of Edward Burd, M.D., of Shrewsbury. Address: 70 Harley Street, W.

PAGET, Violet, who, under the name of Vernon Lee, contributes philosophical and æsthetic criticism to the principal English reviews, was born in 1856, and has lived in Italy for many years. In 1880 she published "Studies of the Eighteenth Century in Italy." In 1882 appeared "Belcaro," being essays on sundry æsthetic questions; "The Prince of a Hundred Soups" (a fairy tale), 1883 "Ottillie, an Eighteenth-Century Idyl" "Euphorion," a collection of Essays; "The Countess of Albany," a biography; "Miss Brown," a novel, 1884; "Hauntings," 1890; "Vanitas," 1893, collections of stories; "Baldwin," 1886; "Althea," 1894; "Renaissance Fancies and Studies," 1895; "Limbo," 1897. She is interested in the preservation of parts of old Florence, now threatened by the Municipality, and by an exhaustive letter to the *Times* in 1898, in which she dealt with the proposed demolitions, she succeeded in arousing considerable public interest in the matter among artists and others in this country. Address: Il Palmerino, Maiano, Florence.

PAIN, Barry, author and editor, began to write when an undergraduate at Cambridge, contributing to the *Granta* the sketches and stories which were afterwards published under the title of "In a Canadian Canoe," a work which originated the "New Humour." He became an army tutor at Guildford, and it was during this period of his career that the late Mr. James Payn published his story of "The Hundred Gates" in *Cornhill*, in 1889. Early in the following year he was offered work on *Punch* and the *Speaker*, and he thereupon came to London. Since that date he has been on the staff of *Punch*, and has contributed "In the Smoking-Room" weekly to *Black and White*. Since 1897 he has been editor of *To-Day*, in succession to Mr. Jerome K. Jerome. He has published: "In a Canadian Canoe," 1891; "Playthings and Parodies," and "Stories and Interludes," 1892; "Graeme and Cyril," a boy's book, 1893; "Kindness of the Celestial," 1894; "The Octave of Claudius," 1897; "Wilmay, and other Stories of Women," 1898, &c. He married a daughter of Mr. Rudolf Lehmann, the famous portrait-painter. Address: Cuckoo Hill, Pinner, N.W.

PAKENHAM, The Hon. Sir Francis John, K.C.M.G., Minister Plenipotentiary to Sweden and Norway, was born in 1832, and is the seventh

son of the 2nd Earl of Longford. He entered the Diplomatic Service in 1852, and much of his life has been spent in the South American Republics. In 1871 he was at Washington; in 1874 at Copenhagen; and in 1878 he was promoted to be Minister to Chili, serving as Commissioner under the Convention for settling the claims arising out of the Chili-Peruvian War. In 1885 he became Minister to the Argentine Republic in Paraguay, which he left for his present post in 1896. In 1879 he married Caroline, daughter of Rev. the Hon. H. Ward. Address: British Legation, Stockholm.

PALGRAVE, Sir Reginald F. D., K.C.B., fourth son of the late Sir Francis Palgrave, by his wife, Elizabeth, daughter of Dawson Turner, of Great Yarmouth, banker, was born in London, June 28, 1829. He was placed, through the intervention of Sir R. H. Inglis, by Sir D. Le Marchant, Clerk of the House of Commons, in the Committee Office, 1853; upon the recommendation of Sir T. Erskine May, he was appointed by the Speaker, Mr. Evelyn Denison, Examiner of Petitions for Private Bills to both Houses of Parliament, 1866, and Second Clerk Assistant and Clerk Assistant to the House of Commons, 1868 and 1886. In 1886, on the death of Sir Thomas Erskine May, he was appointed Clerk to the House of Commons. He published (1869) "The House of Commons; Illustrations of its History and Practice," 1877; "The Chairman's Handbook," 1890; "Oliver Cromwell, the Protector, an Appreciation"; editing also Books I. and II. of Sir T. E. May's "Treatise on the Law, &c., of Parliament," 1893. He has contributed to the *Quarterly Review* articles on "Pym and Shaftesbury, Two Popish Plots" (vol. 147), "The Fall of the Monarchy of Charles I." (vol. 154), and "Cromwell," April 1886. He married, in 1857, Grace, daughter of Richard Battley, of Reigate, Esq., and was created C.B. 1887; K.C.B. 1892. Address: Speaker's Court, Westminster, S.W.

PALGRAVE, Robert Harry Inglis, F.R.S., F.S.S., third son of the late Sir Francis Palgrave, Knight of Hanover, Deputy Keeper of the Rolls, was born in Westminster on June 11, 1827; was educated at the Charterhouse, and entered early the banking-house of Gurneys & Co., of Yarmouth (now Barclay & Co., Ltd.), of which his grandfather, Mr. Dawson Turner, F.R.S., and Mr. John Brightwen, were partners. He married, in 1859, S. Maria Brightwen, the niece of the last-named; she died April 11, 1898. Mr. Palgrave has occupied himself largely and with much success in the study of economic, statisti-

cal, and banking questions. In 1870 he wrote a Prize Essay, printed in the *Journal of the Royal Statistical Society*, upon the "Local Taxation of Great Britain and Ireland." Since that date he has contributed many papers on banking and currency questions to the *Transactions* of the above society, to those of the Bankers' Institute, and also to the reports of the British Association, to the *Bankers' Magazine*, the *Bankers' Almanac*, &c., and for six years, dating from 1877, he edited, in part at first, afterwards solely, the *Economist* newspaper. He is the editor of the "Dictionary of Political Economy," the first vol. of which was published in 1893, the second in 1896. In 1882 he was elected a Fellow of the Royal Society; in 1885 he was appointed one of the Royal Commissioners on the depression of Trade and Industry. Mr. Palgrave has also taken a leading part, as president, or otherwise, in the meetings of the section of Economic Science and Statistics of the British Association, and in the very important inquiries into the gold and paper currency questions, which have been undertaken, based partly on his investigations, and with the advantage of his combined practical and scientific knowledge, by the Bankers' Institute, and the Committee of the Association of English Country Bankers. In common with his brothers, Mr. R. H. Inglis Palgrave owes much to the training he received from his parents, his mother, Elizabeth, the daughter of Mr. Dawson Turner, mentioned above, being a lady of great accomplishments and much ability. His only daughter, Elizabeth, is married to the Rev. Rowland V. Barker. Addresses: Belton, near Great Yarmouth; and Athenæum.

PALISA, Dr. J., was born on Dec. 6, 1848, at Troppau, in Silesia, and was educated first in his native town, and afterwards at Vienna University, where he devoted his attention to Mathematics and Physics, and was, in 1870, appointed Assistant-Observator at the Vienna Observatory; thence in 1871 he went to the Observatory at Geneva, and in 1872 he was appointed Director of the Observatory at Pola, where he had a six-inch meridian circle by Troughton & Simms, and a six-inch refractor with which he discovered no fewer than twenty-eight minor planets. In 1880 he left the Pola Observatory, and was appointed the First Assistant at the Imperial Observatory at Vienna, where he has discovered fifty-four more minor planets, making the very large total of eighty-two. Dr. Palisa, in 1873, married Fräulein Florentine Wlaka, of Troppau.

PALLES, The Right Hon. Christopher, LL.D., J.P., a member of an old Roman Catholic family, which has been settled in Ireland since the fifteenth century, is the second son of Mr. Andrew Christopher Palles, of Mount Palles, co. Cavan, by Eleanor, eldest daughter of Mr. Matthew James Plunkett, of St. Margaret's, co. Dublin, and was born in 1831. He was educated at Trinity College, Dublin, where he took his Bachelor's degree in 1852, and was called to the Irish Bar in the following year. He took the degree of LL.D. at Dublin in 1865, and was appointed Solicitor-General for Ireland under Mr. Gladstone's Administration on the promotion of Mr. Dowse to the Attorney-Generalship for Ireland. On Mr. Dowse being elevated to the judicial bench in Nov. 1872, Dr. Palles succeeded to the latter office, which he held until the defeat of the Liberal party at the general election of 1874. Just before Mr. Gladstone's resignation, Dr. Palles was appointed Lord Chief Baron of the Court of Exchequer in Ireland, Feb. 16, 1874. He was a Joint Commissioner of the Great Seal from September to December 1883, and was sworn of the English Privy Council in 1892, having been made an Irish Privy Councillor in 1872. He is a J.P. for County Meath, Senator of the Royal University of Ireland, Vice-Chairman of the Board of Intermediate Education, Ireland, and a Commissioner of National Education, Ireland. Addresses: 28 Fitzwilliam Place, Dublin, &c.; and Athenæum.

PALMA, Tomas Estrada, Cuban Ambassador to the United States, was born at Bayamo, Cuba, in 1835. He was educated at Havana and Seville. In 1868 he was nominated a member of the Congress of the inchoate Republic, and in 1875 President of the Provisional Government. He is the director of a school for the sons of wealthy Cubans at Centre Valley, N.Y.

PALMER, Major-General Sir Arthur Power, K.C.B., Commander of the Punjab Frontier Force, was born in 1840, and was educated at Cheltenham. He entered the Indian army in 1857, and served through the Indian Mutiny, raising a regiment of Sikhs for service in Oudh. He joined Hodson's Horse in June 1858, and served with it until the conclusion of the Oudh Campaign. In 1863 he was engaged on the N.W. Frontier, being present at the battle of Shubkudder. He served with the 10th Bengal Lancers in the Abyssinian war, and was especially mentioned by Lord Napier; he was Aide-de-Camp to General Stafford in the Duffa Expedition of 1874. He went through the

Afghan war, 1878-80, for which he became a brevet Lieut.-Colonel, and also through the Soudan campaign of 1885, in command of the 9th Bengal Cavalry, for which he received a C.B. He commanded the Chin Hills Expedition in 1892-93, and was created a K.C.B. He married, in 1867, Helen, daughter of Aylmer Harris, Esq.

PALMER, The Rev. Charles Ferrers (Raymund), second son of Shirley Palmer, M.D. (well known as a medical writer), was born at Tamworth, Staffordshire, in 1819, and educated at the Free Grammar School of that town, and at the Queen's College of Medicine, Birmingham. He practised as a surgeon in his native town for some years, and in 1853, joining the Dominican order, took orders in 1859 in the Roman Catholic Church, which he had entered in 1842. Father Raymund Palmer is employed in antiquarian researches, chiefly relating to the history of his order in England, now being published in antiquarian journals. He has published "The History of the Town and Castle of Tamworth, in the Counties of Stafford and Warwick," in 1845; "Life of Beato Angelico da Fiesole, of the Order of Friar Preachers," a translation from the French of E. Cartier, with notes, in 1865; "The Dominican Tertiary's Guide," to which Fr. R. Rodolph Suffield also attached his name, 1866 (2nd edit. 1868); "The Life of Philip Thomas Howard, O.P., Cardinal of Norfolk, Grand Almoner to Catherine of Braganza, Queen-Consort of King Charles II., &c., with a Sketch of the Rise, Mission, and Influence of the Dominican Order, and of its Early History in England," in 1867; "The History and Antiquities of the Collegiate Church of Tamworth, in the County of Stafford," in 1871; "The History of the Baronial Family of Marmion," in 1875; "Obituary Notices of Dominicans from 1650," 1884; "The Catholic Registers of Woburn Lodge and Weybridge, and of Upton Court," privately printed in 1888 and 1889; and contributions to various periodicals, chiefly on antiquarian and historical subjects, several of which have been separately reprinted. His manuscript collection of documents concerning Tamworth, in 4 vols., is now in the British Museum; where also are reported the results of his Roman researches in 1881-82 in the archives of the Master-General of the Dominican Order as far as England is concerned.

PALMER, Sir Charles Mark, Bart., M.P., D.L., J.P., coal-owner and ship-builder, born at South Shields, on Nov. 3, 1822, is the son of Mr. George Palmer, a shipowner and merchant of Newcastle,

and was educated in the school of Dr. Bruce, the historian of the "Roman Wall." After preparing for a commercial career in France, he became a partner, first with his father, and shortly afterwards, in 1845, with Mr. John Bowes, M.P., Mr. (afterwards Sir William) Hutt, M.P., and Mr. Nicholas Wood (all since deceased), in coal-mining and coke-making, and extended their colliery operations from a small beginning up to a production of 2½ million tons per annum. In the year 1851 Mr. Palmer conceived the idea of cheapening the transit of coal to London and other ports by the employment of steam collier vessels, which have since completely superseded the old sailing brigs of the north of England. He established the shipbuilding yard at Jarrow on the Tyne, where the first screw collier, the *John Bowes*, was launched in 1852. He has since developed the Jarrow works into the gigantic concern, now Palmer's Shipbuilding and Iron Company, Ltd., which constructs an ocean steamer from the iron ore of its own Yorkshire mines, through all its processes into a complete ship. From these works the populous modern town of Jarrow originated. It obtained a charter of incorporation in 1875, Mr. Palmer being its first mayor. The Jarrow works have produced armour-plated and other vessels for H.M. navy, and Mr. Palmer was the first to introduce rolled armour-plates for men-of-war. Sir C. Palmer is a Magistrate and Deputy-Lieutenant of the North Riding of Yorkshire, and of the county of Durham, is an Alderman and Magistrate of the borough of Jarrow, Hon. Colonel of the 1st Newcastle and Durham Engineer Volunteers, and was until lately President of the Newcastle Chamber of Commerce. At the general election of 1874 he was returned M.P. in the Liberal interest for the Northern division of the county of Durham, which he continued to represent till the Reform Act of 1885, when on the redistribution of seats he was elected for the Jarrow division of the same county. After the dissolution of 1886 he was re-elected without opposition, and was again returned in 1892 and 1895. He was created a baronet in 1886. He married (3), in 1877, Gertrude, daughter of James Montgomery, D.L., J.P., of Cranford. Address: 37 Curzon Street, W., &c.

PALMER, Sir Elwin Mitford, K.C.M.G., K.C.B., born March 3, 1852, is the second son of Edward Palmer, and was educated at Lancing College, Sussex, and appointed to the Indian Financial Department in 1871. He proceeded to Egypt from India to take up the appointment of Director-General of Ac-

counts in 1885; and was appointed Financial Adviser to H.H. the Khedive in 1889. Since 1898 he has been Governor of the National Bank of Egypt. He was created C.M.G. in 1887, K.C.M.G. in 1892, K.C.B. in 1897. He has also the Grand Cordons of the Osmanieh and Medjidieh. Address: Cairo.

PARIS, Gaston, French philologist, the son of Paulin Paris, was born at Avenay, Marne, Aug. 9, 1839. He was educated at Rollin College, and at the Universities of Bonn and Göttingen, and studied the Romance languages with Professor Diez. On his return to France he entered the École des Chartes, pursuing at the same time the study of law, and took the degree of Docteur-ès-lettres in 1865. On May 12, 1876, he was elected a member of the Academy of Inscriptions in the place of Guigniaut. Among other interesting and curious works he has published "Étude sur le rôle de l'Accent latin dans la Langue française," 1862; "De pseudo-Turpino," 1865; "Histoire poétique de Charlemagne," 1866; "Le Petit Poucet et la Grande Ourse," 1875; "La Poésie du moyen âge, leçons et lectures," 1888 (2nd edit., 1889); "La Littérature française du moyen âge," xi.-xiv., 1888 (2nd edit., 1890). He has given editions of several old French works: "La Vie de Saint Alexis," 1872 and 1889; "Les Miracles de notre Dame par personnages," 1877; "Deux rédactions du Roman des sept Sages de Rome," 1879; "La Vie de Saint Gilles," 1881; "Merlin," 1886; "Trois rédactions de l'Évangile de Nicodème," 1889. He has founded, together with Paul Meyer, the *Revue Critique*, 1866, the *Romania*, 1872, and the *Revue Historique*. He was elected a member of the academies of Munich, Rome, Vienna, Turin, Berlin, &c. He was promoted officer of the Legion of Honour in 1886. His chief work has been the study of the romances connected with the name of Charlemagne, in which he has combined accurate learning with the power of making dry bones live again. In 1896 he was elected to the French Academy, and was offered a medal, as a memorial of his election, by professors and students of Old French all over the world—a school that he has practically founded single-handed. He is the Administrator of the Collège de France and the Director of the École des Hautes Études. His Paris address is Collège de France.

PARK, Edwards Amasa, D.D., LL.D., was born at Providence, Rhode Island, Dec. 29, 1808. He graduated at Brown University in 1826, and at Andover Theological Seminary in 1831, and was

pastor of a Congregational church at Braintree, Massachusetts, 1831-34, when he became Professor of Mental and Moral Philosophy and of Hebrew Literature at Amherst College. In 1836 he became Professor of Sacred Rhetoric at the Andover Theological Seminary. In 1847 he exchanged this chair for that of Christian Theology, and in 1881 was retired as Emeritus Professor. The degree of D.D. was conferred upon him by Harvard in 1844, and by Brown University in 1846. Dr. Park has for many years been regarded as a representative of what is styled "New England Theology." He has been one of the editors of *Bibliotheca Sacra* from its establishment in 1844. Besides numerous review articles, pamphlets, memoirs, and contributions to biblical and theological lexicons and cyclopædias, he has published: "Selections from German Literature," 1839; "Writings of Rev. William B. Homer," 1842; "The Theology of the Intellect and of the Feelings," 1850; "The Rise of the Edwardean Theory of the Atonement," 1859; "Life of Leonard Woods," 1880; and "Discourses on some Theological Doctrines as related to the Religious Character," 1885; and in conjunction with others, "The Sabbath Hymn-Book," 1858; "Hymns and Choirs," 1861. His most elaborate contribution to the press has been his explanation of the Andover Theological Creed. The degree of LL.D. was conferred upon him by Harvard University in 1886.

PARKER, Gilbert, novelist and playwright, was born in Canada on Nov. 23, 1862, and is the second son of Captain Joseph Parker, R.A. He was educated at Trinity College, Toronto, of which he is M.A. For some time he was a Professor in the Deaf and Dumb Institute, Belleville, Canada. He was ordained a deacon in the Church of England, and became a lecturer in English Literature in Trinity College, Toronto. In 1886 he went to Australia in search of health, withdrew from the ministry, and became one of the editors of the *Sydney Morning Herald*. At Her Majesty's Theatre, Sydney, he produced an adaptation of Goethe's "Faust" in April 1888. Afterwards he produced "The Vendetta" and "No Defence," the plays proving successful. He has travelled extensively in Canada and in the South Sea Islands, and now resides in London, where he is one of the literary correspondents of the *Sydney Morning Herald*. In 1892 he published "Round the Compass in Australia," and in the same year sprang into fame with his volume of French-Canadian stories, "Pierre and his People." His other works include: "Mrs. Falchion" and "The Trespasser," 1893;

"The Translation of a Savage," 1894; "When Valmond came to Pontiac," 1895; "The Seats of the Mighty," 1896; "The Pomp of the Lavillettes," 1897; "The Battle of the Strong," 1898. He has dramatised "The Seats of the Mighty," which was produced in America, and chosen by Mr. Tree as the opening play at Her Majesty's Theatre. Address: 7 Park Place, St. James's, S.W.

PARKER, Joseph, D.D., a popular Congregational preacher and minister of the City Temple, born April 9, 1830, at Hexham-on-Tyne, was educated at private seminaries and University College, London. He was pastor at Banbury, 1853-58; at Manchester, 1858-69; and settled in London in 1869. He built the City Temple at a cost of £70,000. He has been Chairman of the Lancashire Congregational Union; Chairman of the Manchester Congregational Board; twice Chairman of the London Congregational Board; and Chairman of the Congregational Union of England and Wales. Dr. Parker is the author of "The People's Bible" (25 vols.); "The Paraclete"; "Ecce Deus"; "Ad Clerum"; "Weaver Stephen"; "Springdale Abbey"; "Studies in Texts"; and many other works. In November 1894 he wrote to the *Times* to point out that the custom of reporting and publishing sermons is a form of literary piracy against which preachers should protect themselves. The Honorary Degree of D.D. was conferred on him by the University of Chicago. In 1898 he celebrated his jubilee as a preacher. Mrs. Parker, a lady of many accomplishments, and for many years his devoted helper, died on Jan. 26, 1898. Address: 14 Lyndhurst Gardens, South Hampstead, N.W.

PARKER, Louis N., Fellow of the Royal Academy of Music, was born in Calvados, France, on Oct. 21, 1852, and is the only son of Charles Albert Parker. He was educated at Freiburg in Germany. He became a pupil of Sir Sterndale Bennett, &c., at the Royal Academy of Music, of which institution he was elected Associate in 1874, and Fellow in 1898. He was Director of the Music in Sherborne School from 1872 to 1892, during which period the following musical compositions were published: "Silvia," "The 23rd Psalm," "The Wreck of the Hesperus," "Young Tamlane," "Ball Margaret," all cantatas for solo, chorus, and orchestra, besides songs, part-songs, and instrumental music. In 1892 his increasing interest in the drama brought him to London, where he has produced the following plays, either alone or in collaboration: "A Buried Talent," "Taunton Vale," "Chris," "The

Sequel," "The Love-knot," "The Ordeal," "Love in a Mist," "The Bohemians," "David," "Gudgeons," "The Blue Boar," "Rosemary," "Change Alley," "There's no Jesting with Some" (the last six in collaboration with Mr. Murray Carson), "Once Upon a Time" (*Fulda*), "Rosmersholm" (*Ibsen*), "Love in Idleness" (*Goodwin*), "Magda" (*Sudermann*), "The May Flower," "The Man in the Street," "The Vagabond King," "The Happy Life," "Ragged Robin" (*Richepin*), "The Treasure-Hunters," "The Swashbuckler," and "Lancelot of the Lake." In 1878 he married Georgiana, eldest daughter of Charles Calder, of Sherborne. Permanent address: 75 Gunterstone Road, West Kensington, W.

PARKINSON, Joseph Charles, born in London in 1833, obtained an appointment in Somerset House (Inland Revenue Department) in 1855, after the Civil Service Commission had been established by Order in Council. He published in 1859 "Under Government," the first complete guide to the various departments of the Civil Service. This work, which ran through many editions, was followed in 1860 by a handbook of "Government Examinations." In 1864 Mr. Parkinson's abilities as a journalist were recognised by the *Daily News*, and for the next ten years he was one of the steadiest and most esteemed contributors to that journal, mainly on the abolition of public executions, poor-law reform, and the preservation of commons. In conjunction with the Duke of Westminster, the late Archbishop of York, the late Dr. Anstie, and others, Mr. Parkinson worked by pen and speech to promote that reform in work-house infirmaries which culminated in Mr. Gathorne Hardy's measure. In 1869 he visited Egypt as the guest of the Viceroy, and described for the *Daily News* the opening of the Suez Canal. He next visited India on a special mission for the telegraphic authorities, and published an account of his visit, "The Ocean Telegraph to India." Mr. Parkinson has of late years retired from journalism, and occupies himself in the direction of several well-known industrial and scientific enterprises.

PARR, Mrs. Louisa, only child of Matthew Taylor, R.M., was born in London, but spent the years of her early life in Devonshire. Her first venture into print was made in 1868, when a short story appeared under her name in *Good Words*, entitled, "How it all Happened." It was a slight story, but most gracefully told, and it at once attracted so much attention, that versions of it were published in several foreign languages, and it was re-

produced in the *Journal des Débats*, notwithstanding the editor's general rule against the acceptance of translations. Upon her marriage with a gentleman in the medical profession, which took place in 1869, Mrs. Parr came to live in London, and the scene of her principal literary labours has been the house in Kensington, where she has ever since resided. "Dorothy Fox," Mrs. Parr's first three-volume novel, was published in 1870. This book dealt with Quaker life, and at once delighted the public. In the United States it was as well received as in England, in proof of which it may be mentioned that an American publisher paid £300 for the advance sheets of her next story, "The Prescotts." A first collection of short stories was published in 1871, bearing the title of her first sketch, "How it all Happened"; this was followed in 1874 by another series in two volumes called "The Gosau Smithy." "Adam and Eve," which came out at first as a serial, and was published in book form in 1880, marked an important advance on all previous efforts. A comparison between this work and "Dorothy Fox," its predecessor by ten years, shows at once how greatly Mrs. Parr's skill had ripened and matured in the interval. In "Adam and Eve" all trace of amateurishness had disappeared, and Mrs. Parr had become thoroughly mistress of her art. "Robin" appeared in 1882, and "Loyalty George," her masterpiece, in 1888. In 1892 she published "The Squire," and in 1893, "Can this be Love?" "The Follies of Fashion," which since 1893 have been such an attractive feature of the *Pall Mall Magazine*, are by Mrs. Parr. The illustrations are taken from Dr. Parr's valuable collection of old prints. Address: 18 Upper Phillimore Place, Kensington, W.

PARRY, Sir Charles Hubert Hastings, Hon. D.C.L. Durham, M.A., Mus. Doc. Oxford, Honorary Mus. Doc. Cambridge and Dublin, Director of the Royal College of Music (1895), Chorus of Oxford University (1884), Hon. Fellow of Exeter College, Oxford, is the son of T. Gambier Parry, of Highnam Court, in Gloucestershire, and was born at Bournemouth, Feb. 27, 1848. He went to Eton in 1861, working at harmony, &c., with Sir George Elvey, organist at Windsor, and made sufficient progress to pass the examination for the musical bachelor's degree at Oxford before leaving the school. He proceeded to Oxford in 1866, and in 1870 took a second class in Law and History. At intervals he worked at music, with Sir William Sterndale Bennett first, then with Sir G. A. Macfarren, and Mr. E. Dannreuther, and began to contribute to

Sir George Grove's "Dictionary of Music." In 1873 he gave up business in the City and devoted himself entirely to music. Amongst Mr. Parry's compositions are: "Duo," in E minor, for two pianofortes; Fantasia-Sonata for pianoforte and violin; Sonata in A for pianoforte and violoncello; Trios for pianoforte and strings; Quartet for same; String Quartet in G, and String Quintet in E flat; Pianoforte Concerto; Variations on an original theme for pianoforte; Overtures, "Guillem de Cabestanh," and "An Unwritten Tragedy"; Four Symphonies, and a Symphonic Suite; "Scenes from Shelley's Prometheus Unbound," Gloucester Festival, 1880; "Music to the 'Birds' of Aristophanes," Cambridge, 1884; "Music to the 'Frogs' of Aristophanes," Oxford, 1893; Music to Hypatia; Ode for chorus and orchestra, "The Glories of our Blood and State"; an opera, "Lancelot and Guinevere"; Ode for eight-part chorus and orchestra, "Blest Pair of Sirens"; Oratorio, "Judith," Birmingham Festival, 1888; "Ode for St. Cecilia's Day," Leeds Festival, 1889; "L'Allegro ed Il Penseroso," a cantata, Norwich Festival, 1890; a fine setting of "De Profundis," Hereford Festival, 1891. Since then he has produced his greatest oratorio, "Job." At the Birmingham Festival in 1894 he produced "King Saul," another oratorio. To these may be added "The Invocation to Music," Leeds, 1895; "Magnificat," Hereford, 1897; "Symphonic Variations," Philharmonic, 1897; also "Studies of Great Composers"; a "Summary of the History of Music" (Novello); "The Evolution of the Art of Music" (Kegan Paul). The honour of knighthood was conferred upon him in June 1898. In 1872 he married Lady Maude Herbert, with whose family he had been intimate since boyhood. Addresses: Highnam Court, Gloucester; 17 Kensington Square, W., &c.

PARSONS, Alfred William, A.R.A., R.I., landscape painter, son of Joshua Parsons, M.R.C.S., was born at Beccington, in Somersetshire, Dec. 2, 1847, and educated at private schools. In 1865 he became a clerk in the Savings Bank Department of the General Post Office, drawing in the evening at Heatherley's and the South Kensington Art Schools. In 1867 he left the Civil Service, and returned to Somersetshire and studied painting, working from nature, without masters. He was elected a member of the committee of the General Exhibition of Water-Colour Drawings in 1879. On the dissolution of that Society, he, with the other members of the committee, joined the Royal Institute of Painters in Water-Colours. His first picture exhibited in

the Royal Academy was in 1871; his principal exhibited works since then have been "Fallen," Royal Academy, 1878; "The Ending of Summer," Royal Academy, 1879; "The Gathering Swallows," Grosvenor Gallery, 1880; "The Road to the Farm," Royal Academy, 1881; "The First Frost," Royal Academy, 1883, which afterwards obtained a *mention honorable* in the Paris Salon; "The Gladness of the May," Grosvenor Gallery, 1883; "After Work," Royal Academy, 1884; "Meadows by the Avon," Grosvenor Gallery, 1884; "In a Cider Country," Grosvenor Gallery, 1886 (engraved in mezzotint by F. Short), and a series of water-colour drawings illustrating the scenery of the Warwickshire Avon, which were exhibited by the Fine Art Society in the spring of 1885; "When Nature painted all Things Gay," exhibited in the Royal Academy, 1887, and purchased by the Council under the terms of the Chantrey bequest. In recent Royal Academies he has exhibited "The Thorn," 1895; "A Mid May Morning," and "The Rain is over and gone," 1896; "The Star that bids the Shepherd fold," a "Japanese Iris, and Daffodils," 1897; "Near the Keepers," "The Mooters, Bishopswood, Herefordshire," and "Megève, Savoy," 1898; "The Village by the Links," and two water-colours, 1899. Mr. Parsons received a Gold Medal for Water-Colour, and Silver Medal for Oil Painting, awarded to pictures exhibited at the Universal Exhibition, Paris, 1889, two medals for Oil and Water-Colour Painting at the International Exhibition at Chicago, 1893, and a Gold Medal (second class) at the International Exhibition of pictures at Munich in the same year. In 1892 he went to Japan, and the results of his stay of nine months in that country were exhibited at the galleries of the American Art Association in New York, at the St. Botolph Club in Boston, U.S.A., and at the Fine Art Society in London. Mr. Parsons has also worked in black and white. His principal illustrations have been done for "Old Songs" and "The Quiet Life" (in conjunction with Mr. E. A. Abbey), and for "The Warwickshire Avon," "Wordsworth's Sonnets," and "The Danube, from the Black Forest to the Black Sea," a journey made with Mr. F. D. Millet in 1891. Address: 54 Bedford Gardens, Kensington, W.

PARTRIDGE, Bernard, R.I., born in London, October 11, 1861, is the youngest son of the late Richard Partridge, President of the Royal College of Surgeons of England, F.R.S., M.R.C.S., &c., Professor of Anatomy to the Royal Academy. Educated at Stonyhurst College, Lancashire, he then worked at stained-glass

designing with Messrs. Lewes, Barrand, and Westlake, and afterwards at stained-glass and church decoration with the late Mr. Philip Westlake, from 1879 to 1883. He next took up drawing for the press, worked chiefly on *Judy, Lady's Pictorial*, and *Illustrated London News*, and joined the staff of *Punch* in 1891. He has illustrated several books, including "Stage-land," by J. K. Jerome, and "The Travelling Companions," "Voces Populi," "Pocket Ibsen," "Man from Blankley's," and "Under the Rose," by F. Anstey. His water-colours and black-and-white drawings have been exhibited at the Royal Academy, 1896, 1897, 1898; also at the Royal Institute of Painters in Water-Colours, and the New English Art Club, of the two latter of which he is a member. Mr. Partridge has adopted the stage name of Bernard Gould, and has played in various London productions since 1886, including "The Hobbyhorse," "The Pointsman," "Sweet Lavender," "Woodbarrow Farm," "New Lamps for Old," "Arms and the Man," "Under the Red Robe," "Hamlet," &c. He married Lydia F. Harvey in 1897. Address: Garrick Club, W.C.

PATERSON, William Romaine, "Benjamin Swift," was born in Glasgow, July 29, 1871, in the house which is now occupied by the Art Club. His father, the late Robert Paterson, M.D., who was a successful and widely known physician and a man of acute intellect, died while the author was only two years old. His upbringing, which was extremely religious, was thus left in the hands of his mother, who comes of a race of Scotch bankers. At the age of seven the author was put to school in Glasgow at the Albany Academy. At the age of sixteen he was sent to a boarding school in Lausanne (La Villa, Onchy) for the purpose of learning French. He remained a year, and on his return entered Glasgow University. Owing to ill health his course was irregular and retarded, but in the department of Philosophy and Literature he was awarded a high place. He won the prize of the Lord Rector (Mr. A. J. Balfour) for an Essay on Progress which was open to the University. In 1894-95 he graduated M.A. with first-class Honours in Philosophy, and was awarded a Fellowship. Thereafter he travelled extensively in Europe, especially in Austria, France, and Italy, for the purpose of studying German, French, and Italian. He learned Italian in the monastery of Monte Oliveto near Siena. On his return from Italy in the summer of 1896 he published his first work "Nancy Noon" (London: T. Fisher Unwin). A second edition was called for shortly

after. In October 1897 appeared "The Tormentor" (London: T. Fisher Unwin); in April 1898 "The Destroyer" (London: T. Fisher Unwin), 2nd edit., May 1898. *Cosmopolis* for December 1897 contains an article on the "Functions of Art," by "Benjamin Swift." In the *Glasgow Herald*, January 1898, he wrote an article on "Legal Infanticide in Italy." Address: 5 Cornwall Mansions, Cornwall Gardens, S.W.

PATON, Sir Joseph Noël, R.S.A., LL.D., D.L., the Queen's Limner for Scotland, born at Dunfermline, Fifeshire, in 1821, was admitted a student of the Royal Academy of London in 1843, and first became known to the public by his outline etchings illustrative of Shakespeare and Shelley. His cartoon of the "Spirit of Religion" gained one of the three premiums awarded at the Westminster Hall competition of 1845, and his oil pictures of "Christ Bearing the Cross" and "Reconciliation of Oberon and Titania"—the former of colossal size, the latter small—jointly gained a prize, in the second class, of £300, in 1847. The latter picture, prior to its exhibition in London, was bought by the Royal Scottish Academy for the Scottish National Gallery, and "The Quarrel of Oberon and Titania," painted in 1849, and purchased for £700, also for the Scottish National Gallery, by the Association for the Promotion of the Fine Arts in Scotland, was exhibited in the Paris Exhibition of 1855, where it received honourable mention. Amongst his numerous pictures and sketches from the works of the poets may be mentioned "Dante Meditating the Episode of Francesca," 1852; and "The Dead Lady," 1854 (engraved). Other pictures are: Large allegory, since engraved, "The Pursuit of Pleasure," 1855; "Home," which has been engraved, and of which a replica was executed by command of her Majesty, which was at the Royal Academy Exhibition in 1856; "Hesperus," 1857 (engraved); "In Memoriam," which has been engraved, and of which a photograph was executed for the Queen, 1858; and "Dawn: Luther at Erfurt," considered by many his finest work, 1861; "Fact and Fancy," 1864 (engraved); "Nicker the Soulless," 1869. Mr. Noël Paton executed, in the spring of 1860, a series of six pictures illustrative of the old Border ballad, "The Dowie Dens of Yarrow," painted for the Association for the Promotion of the Fine Arts in Scotland. It was engraved by that body for their subscribers. In 1863 he executed illustrations of "The Ancient Mariner" for the Art Union of London; and in 1866 painted "Mors Janua Vitæ" (engraved). He was appointed the Queen's Limner for Scot-

land in 1865, and received the honour of knighthood, April 12, 1867. In the latter year appeared "A Fairy Raid," and in 1868 "Caliban Listening to the Music." Of his subsequent pictures the more important are, "Faith and Reason," 1871 (engraved); "Christ and Mary at the Sepulchre," and "Oskold and the Elle-Maids," 1873; "Satan Watching the Sleep of Christ," 1874 (engraved); "The Man of Sorrows," 1875 (engraved); "The Spirit of Twilight" and "Christ the Great Shepherd," 1876 (engraved); and "The Man with the Muck Rake," 1877 (engraved). Subsequently to 1877 he painted "Thy Will be Done," 1878 (engraved); "A Dream of Latmos," "Sir Galahad and the Vision of the Sangreal," and "Lux in Tenebris," 1879 (engraved); "In Die Malo" (engraved), and designs for large stained-glass window in Dunfermline Abbey Church, 1882; "Vigilate et Orate," painted for the Queen, 1885 (engraved); "The Choice," 1886 (engraved); "St. Margaret Reading the Gospels to Malcolm Caenmore," 1887; "Vade, Satana!" 1888 (engraved); "Beati Mundo Corde," 1890 (engraved); "Ezekiel's Vision of Dry Bones," 1891; "De Profundis," 1892 (engraved); "The Prayer on Hermon," 1895. His sculptures include: Group of Lion and Typhon, designed for the Wallace Monument on the Abbey Craig, Stirling, 1859; and "The Parting of the Ways," alto-relievo in bronze for the Coats Free Library, Paisley, 1881. He is the author of two volumes of poems, and in 1876 received from the University of Edinburgh the honorary degree of LL.D. In 1858 he married Margaret, daughter of Alexander Ferrier of Bloomhill. His permanent address is: 33 George Square, Edinburgh.

PATTERSON, The Right Rev. James Laird, D.D., Bishop of Emmaus, born in London, Nov. 16, 1822, was educated in Germany and at Trinity College, Oxford (M.A. 1846). From 1845 to 1849 he was Curate of St. Thomas's, Oxford, but in 1850 he entered the Catholic Church, and for eleven years was attached to St. Mary's, Moorfields. In 1865 he was appointed Honorary Chamberlain to the Pope, and Domestic Prelate in 1872. In 1880 he was consecrated Titular Bishop of Emmaus, and was given the rectorship of St. Mary's, Chelsea, in 1881. Mgr. Patterson is the author of a "Tour in Palestine," published in 1852, &c. Address: St. Mary's, Cadogan Street, S.W.

PATTI, Adelina, née Adelina Maria Olorinda Patti, Baroness Cederström, prima donna, daughter of Salvatori Patti, is of Italian extraction,

and was born in Madrid, Feb. 19, 1843. After a course of professional training under her brother-in-law, Maurice Strakosch, she appeared at New York, Nov. 24, 1859, and reports of her fame reached these shores, where a much more brilliant success awaited her. She made her first appearance in London at the Italian Opera House, Covent Garden, in the part of Amina, in "La Somnambula," May 14, 1861, and so favourable was the impression created that she became at once the prime favourite of the day. To Amina succeeded her equally successful performance of Lucia, in Donizetti's opera, but she gave still greater reason for approbation by her representation of Violetta in "La Traviata," to which she imparted a purity with which the part had never before been invested. Her Zerlina was also much admired, while in Martha she displayed so original a vein of arch comedy as to give an unwonted interest to the performance. Mlle. Patti, with laudable ambition, attempted, in the summer of 1863, the difficult part of Ninetta, in "La Gazza Ladra," and her spirited rendering of the character fully sustained her high reputation, both as Norina, in "Don Pasquale," and as Adina, in "L'Elisire d'Amore." Undaunted by the success of rival celebrities who had preceded her, she in 1864 took the part of Margherita, in Gounod's "Faust," and her performance was pronounced by some critics to be superior to that of every other representative of the character. She achieved a fresh success in the part of Juliet, in Gounod's "Romeo and Juliet," which proved the great attraction of the operatic season of 1867. Mlle. Patti has been equally successful on the Continent of Europe. In the early part of 1870 she visited Russia, where she met with an enthusiastic welcome, receiving from the Emperor Alexander the Order of Merit, and the appointment of First Singer at the Imperial Court. Early in 1888 Madame Patti accepted an engagement to sing in the Argentine Republic. Her tour through that State was the most successful she had ever made. She was paid £1200 a night, and gave thirty-three performances. She returned there the following year, when she had even a greater success. In May 1868 she was married, at the Roman Catholic Church, Clapham, to M. Louis Sébastien Henri de Roger de Cahuzac, Marquis de Caux, from whom she was afterwards divorced. In 1886 she was married, in Wales, to Signor Nicolini, the tenor-singer, who died in January 1898, and her marriage to Baron Cederström took place in January 1899. The wedding was an exceptional social event, and on the wedding day the popular complimentary demonstrations along the line

of route from the great diva's Welsh home to London marked the extreme hold she has taken on the hearts of her innumerable admirers. Baron Olof Rudolph Cederström became a naturalised British subject in February 1899. She now resides chiefly at Craig-y-nos, her Welsh country seat, where in 1891 she opened a private theatre. In October 1893 she started for her farewell tour in the United States. Madame Patti still sings at Albert Hall concerts in London, which are known as "Patti Concerts." Address: Craig-y-nos Castle, Wales.

PATTON, Francis Landey, D.D., LL.D., was born at Warwick, Bermuda, Jan. 22, 1843. His family removed to Canada while he was a boy, and he was educated at University College, Toronto; studying theology later at Knox College, Toronto, and at the Princeton (New York) Theological Seminary, from the latter of which he graduated in 1865. From 1865 to 1867 he was pastor of the Eighty-fourth Street Church in New York; 1867-71, of the Presbyterian Church in Nyack, New York; 1871-72, of the South Presbyterian Church in Brooklyn, New York; and 1874-81, of the Jefferson Park Presbyterian Church in Chicago. He edited the *Interior*, a denominational Chicago paper, from 1873 to 1876, and was Professor of Didactic and Polemic Theology in the Presbyterian Theological Seminary of the North-west, Chicago, 1871-1881. While at Chicago his successful prosecution of Professor David Swing for heterodoxy brought him into general prominence as a theological writer and speaker, and procured him the appointment in 1881 to the Stuart Professorship of the Relation of Philosophy and Science to the Christian Religion, a chair especially founded for him at the Princeton Seminary. In addition to filling the duties of that department, he also lectured on ethics before the College of New Jersey (to which the Seminary is attached), and in 1885 was made a Professor of the College on that subject. On the resignation of the Presidency of the College by Dr. McCosh, Dr. Patton was chosen to succeed him, and he assumed the office in June 1888. The degree of D.D. was conferred upon him by Hanover College, Indiana, in 1872, and that of LL.D. by Wooster University, Ohio, in 1878, and by Harvard University in 1889. Besides his work on the *Interior*, he was for a number of years associate editor of both the *Presbyterian Review* and the *New Princeton Review*, and he has been a voluminous contributor to magazines and papers. His published works include "The Inspiration of the Scriptures," 1865; "A Summary of Christian Doctrine,"

1874; and "The Doctrine of a Future Retribution."

PAUNCEFOTE, The Right Hon. Sir Julian, G.C.B., G.C.M.G., third son of the late Robert Pauncefote, Esq., of Preston Court, Gloucestershire, was born at Munich, Sept. 13, 1828, and educated in Paris, Geneva, and at Marlborough College. He was called to the Bar at the Inner Temple in 1852, and joined the Oxford Circuit. He was appointed Attorney-General of Hong-Kong in May 1865, and acted as Chief-Justice of the Supreme Court in 1869, and again in 1872. He received the thanks of the Executive and Legislative Councils of Hong-Kong for his services to the colony, and in 1874 was knighted by patent. He was appointed Chief-Justice of the Leeward Islands in 1873, and in 1874 Legal Assistant Under-Secretary of State for the Colonies. In 1876 he was appointed Assistant (Legal) Under-Secretary of State for Foreign Affairs. He was created a C.B. and a K.C.M.G. in 1880, and in 1882 he succeeded the late Lord Tenterden as Permanent Under-Secretary of State for Foreign Affairs. In 1885 he received the Grand Cross of the Order of St. Michael and St. George. In 1888 Sir Julian succeeded Lord Sackville as British Minister at Washington. In 1892 he received the Grand Cross of the Bath for his diplomatic services, and in 1893 he was raised to the rank of Ambassador Extraordinary and Plenipotentiary to the United States. On Nov. 21, 1894, during a visit home, Sir Julian Pauncefote was sworn of the Privy Council. His action at Washington has done much to bring together the two branches of the Anglo-Saxon race, and he possesses the confidence of the leading men of both nations, especially of his old chief, the Marquis of Salisbury. He was one of the delegates from Great Britain at the Peace Conference held at the Hague in 1899.

PAVY, Frederick William, LL.D. Glasgow, M.D., F.R.C.P., F.R.S., was formerly Lecturer on the Principles and Practice of Medicine, on Physiology, and on Comparative Anatomy at Guy's Hospital. He is now Consulting Physician to Guy's. He became Fellow of the Royal College of Physicians in 1860, and was twice Censor, viz. in 1883-84 and 1891-92. He delivered the Harveian Oration in 1886, and has been Lettsomian, Gulstonian, and Croonian Lecturer. He is President of the Pathological Society, and Fellow or member of many learned societies. In 1863 he became F.R.S. Dr. Pavy has written several volumes on food, dietetics, &c., and has communicated many papers

on the physiology of sugar, &c., to the *Transactions and Proceedings of the Royal Society*. His Lettsomian lectures (1860) were upon the subject of Diabetes. Address: 35 Grosvenor Street, W.

PAYNE, Edward John, born July 22, 1844, is the son of Edward William Payne, of High Wycombe, Bucks, and was educated at High Wycombe Grammar School, and at University College, Oxford, where he graduated M.A., and was elected Fellow of his College in 1872. He was called to the Bar at Lincoln's Inn in 1874, and was appointed Recorder of Chipping Wycombe in 1883. He is the author of: "Select Works of Edmund Burke," with notes, 3 vols., 1874, &c.; "History of European Colonies," 1877; "Voyages of the Elizabethan Seamen to America," 1880; "History of the New World called America," 1892, in which work Mr. Payne has critically investigated the origins of history in the New World, its rudimentary civilisation, sociology, languages, and arts, and the causes and circumstances of its discovery by Europeans. He is a Fellow of the Royal Geographical Society, and a Member of Council of the Hakluyt Society. Address: 2 Stone Buildings, Lincoln's Inn, London.

PAYNE, George, F.L.S., F.S.A., was born at Sittingbourne, in Kent, in 1848, and was educated at Elm House Academy near that town. He formed between 1865 and 1883 an extensive local collection of geological and British, Roman, and Anglo-Saxon remains. These he offered to his native town as a gift in 1883, on condition that a suitable building be provided for their reception. The offer was declined, and the British Museum subsequently acquired the greater portion of the collection, while the remainder went to the Maidstone Museum. Since 1870 he has been accustomed to give lectures annually in various parts of Kent on archæological matters, with a view to encourage the study and preservation of antiquities. He is author of a "Catalogue of his Museum of Local Antiquities," 1883, printed for private circulation; a "Catalogue of the Museum of Local Antiquities collected by Mr. Henry Durden at Blandford, Dorset," 1892, printed for private circulation; a "Catalogue of the Kent Archæological Society's Collections," 1892, printed by the Society; "An Archæological Survey of the County of Kent," 1889, printed by the Society of Antiquaries, and adopted by that body as a model for the archæological survey of Great Britain; "Collectanea Cantiana," 1893, being an account of the author's archæological researches in the neighbourhood of Sittingbourne and other

parts of Kent; and numerous papers in "*Archæologia Cantiana*," *Proceedings of the Society of Antiquaries*, *Journal of the British Archæological Association*, the *Antiquary*, and various periodicals, &c. He was appointed Local Secretary for Kent of the Society of Antiquaries, London, 1877; elected a Fellow of that Society, 1880; and subsequently elected twice on the Council; elected a Fellow of the Linnean Society, 1878; became a member of the Kent Archæological Society in 1870, was for several years a member of the Council, and was elected Hon. Secretary and Chief Curator of the Society in 1889; appointed one of the delegates on behalf of the Society of Antiquaries on the Ethnographical Survey of the United Kingdom, 1892; is member of the Standing Committee of the Ethnographical Survey, the Archæological Survey of Great Britain, and the Congress of Archæological Societies. He is honorary correspondent of the British Archæological Association, and the Society for the Protection of Ancient Buildings. During the last ten years he has resided at Rochester, where he has been instrumental in bringing about the reparation of the famous castle there, and has assisted the Corporation by superintending the work. He has also taken active measures towards founding the museum in that city, in which undertaking he has been loyally supported by the Corporation and the citizens. The most important discoveries he has made outside his researches at Sittingbourne are the identification of the Roman walls of Rochester; laying bare the extensive remains of a Roman establishment at Darent, near Dartford; and discovering a large portion of the Norman Church at Boxley Abbey, near Maidstone. Throughout his life he has taken an active interest in the various literary and scientific societies in the county of Kent, having rendered them valuable assistance both in the field and at their winter meetings. Address: The Precincts, Rochester.

PAYNE, Joseph Frank, F.R.C.P., was born Jan. 10, 1840, at Camberwell, Surrey, and is the son of Joseph Payne, the first Professor of Education at the College of Preceptors. He was educated at University College, London, and proceeded as Demy to Magdalen College, Oxford, where he graduated B.A. First class, Natural Science, 1862; M.B. 1867; M.D. 1880. He obtained a Fellowship at Magdalen, the Burdett-Countts Scholarship in Geology, and the Radcliffe Travelling Fellowship in Medicine. He studied medicine at St. George's Hospital, London, and also, as Radcliffe Fellow, at Paris, Berlin, and Vienna. He became member

of the Royal College of Physicians in 1868, Fellow in 1873, was Censor from 1896 to 1898, and delivered the Harveian Oration in 1896. He is now Senior Physician to St. Thomas's Hospital, and President of the Pathological Society of London and of the Dermatological Society of Great Britain and Ireland, and was formerly President of the Epidemiological Society of London. He has been Examiner in the Universities of Oxford, Cambridge, London, Edinburgh, and in the Victoria University. In 1879 he was appointed, with the late Surgeon-Major Colville, British Medical Commissioner, to investigate the outbreak of Plague in the Russian province of Astrachan. In 1890 he was a member of the Royal Commission on Tuberculosis, presided over successively by Lord Basing and Sir George Buchanan. He is the author of a "*Manual of General Pathology*," 1888; "*Observations on Rare Diseases of the Skin*," 1889; Introduction to a reproduction (Cambridge, 1881) of Linacre's Translation of Galen's "*De Temperamentis*," first printed at Cambridge, 1521; the Harveian Oration for 1896 on "*Harvey and Galen*." He has written articles on "*History of Medicine*" and "*Plague*" in the "*Encyclopædia Britannica*," and biographies of physicians in the "*Dictionary of National Biography*," with numerous papers and lectures in "*St. Thomas's Hospital Reports*," *Transactions of Medical Societies*, &c. He is the editor of "*The Works of Joseph Payne*," 2 vols., 1880-1892; and of the "*Nomenclature of Diseases*," published by the College of Physicians in 1896. Besides the subjects of general medicine and pathology, he has paid special attention to the history of medicine and of epidemic diseases, and has published several ancient documents bearing on these subjects, the value of which has been widely recognised in Continental as well as in English publications. Address: 78 Wimpole Street, Cavendish Square, W.

PEACOCK, Edward, F.S.A., of Bottesford Manor, near Brigg, and of Dunstan House, Kirton-in-Lindsey, Lincolnshire, born at Hemsworth, in Yorkshire, Dec. 22, 1831, was educated by private tutors. He was elected a Fellow of the Society of Antiquaries in 1857, and appointed a Justice of Peace for the Parts of Lindsey, in the county of Lincoln, in 1869. Mr. Peacock is the author of "*Ralph Skirlaugh*," 3 vols., 1870; "*Mabel Heron*," 3 vols., 1872; "*John Markenfield*," 3 vols., 1874; "*Narcissa Brendon*," 2 vols., 1891; editor of "*Army List of Roundheads and Cavaliers*," 1863 (second edition, enlarged, 1874); "*English Church Furniture at the Period of the Reformation: a list of goods*

destroyed in Lincolnshire Churches," 1866; "Instructions for Parish Priests, by John Myrc" (Early English Text Soc.), 1868; "A List of the Roman Catholics in the County of York in 1604," 1872; "France, the Empire and Civilisation," 1873, published without the author's name; "A Glossary of Words used in the Wapentakes of Manley and Corringham, Lincolnshire" (English Dialect Soc.), 1877 (2nd edit., much enlarged, 2 vols., 1889); "Index to English-Speaking Students who have Graduated at Leyden University" (Index Soc.), 1883; "The Monkton Papers" (Philobiblion Soc.), 1885; and many papers in the *Archæologia*, the *Journal of the Royal Archaeological Institute*, and the *Dublin Review*.

PEACOCKE, The Most Rev. Joseph Ferguson, D.D., Archbishop of Dublin and Primate of Ireland, was born in Queen's County on Nov. 5, 1835, and is the youngest son of the late George Peacocke, M.D., of Longford. He was educated at Trinity College, Dublin, where his career was distinguished. He was first Senior Moderator in History and English Literature, and first Divinity Prizeman in 1858, &c. In 1858 he was ordained, and was successively Rector of St. George's, Dublin, and of Monkstone. In 1893 he was appointed Professor of Pastoral Theology in Dublin University. Appointed Bishop of Meath in 1894, he was consecrated Archbishop in 1897. Address: The Palace, St. Stephen's Green, Dublin.

PEARD, Frances Mary, daughter of Commander George Shuldham Peard, R.N., born at Exminster, Devon, writer of novels and stories, of which the following is a brief list: "One Year," 1868; "Un-awares," 1870; "The Rose Garden"; "Cartouche"; "Mother Molly"; "Contradictions"; "Near Neighbours"; "The Crooked Desk," illustrated, 1890; "Made-moiselle," 1890 (new edit., 1892); "Abbots' Bridge," 1891; "The Baroness: a Dutch Story," 1892; "Paul's Sister"; "The Swing of the Pendulum," 1893; "The Country Cousin"; "Madame's Granddaughter"; "Catherine," and "The Interloper," 1894; "Jacob and the Raven: stories," 1896; and "The Career of Claudia," 1897.

PEARS, Edwin, was born in 1835, at York. He graduated in the University of London, being first in honours, Roman Law, and Jurisprudence, and was called to the bar at the Middle Temple in 1870. He was General Secretary of the Social Science Association from 1868 to 1873, and Secretary to the International Prison Congress of 1872. In the *Transactions of*

the former Society he published "Prisons and Reformatories at Home and Abroad." Mr. Pears is now the most prominent practitioner at the English Bar in Constantinople, whence, as correspondent of the *Daily News*, he sent the letters which first called the attention of Europe to the Moslem atrocities committed in Bulgaria in May 1876. The first two of these letters, having attracted attention in Parliament, and their statements being disputed by Mr. Disraeli, were published in the first important Blue-book on the Eastern Question. Mr. Pears is the first newspaper correspondent who took up the ground that the interest of England in the Ottoman Empire will be best forwarded by helping the Christian races as representing the progressive element of the empire, rather than the Turks, whom he regards as doomed, from natural causes, to disappear as a ruling race, and as being able to contribute nothing of value towards European civilisation.

PEARSE, The Rev. Mark Guy, Wesleyan minister and author, was born at Camborne in 1842, and is the only son of Mark Guy Pearse, of Sandown, Isle of Wight. His early life was spent in Cornwall. In 1861 he became a student at St. Bartholomew's Hospital, but subsequently entered the Wesleyan ministry, and was stationed at Leeds, Brixton, Ipswich, Bedford, Highbury, Westminster, and is now, jointly with the Rev. Hugh Price Hughes, conducting the London Wesleyan Mission at St. James's Hall. As a preacher and lecturer he has few equals; and for quiet humour, deep insight into character, and a certain homely sympathy with the religious poor, his little book, "Dan'l Quorm and his Religious Notions," has never been surpassed. It was published in 1874, and has passed through many editions. Among his many other religious publications should be mentioned "The Gentleness of Jesus," 1898. Address: 11 Bedford Place, Russell Square, W.C.

PEARSON, The Right Hon. Sir Charles John. See PEARSON, LORD.

PEARSON, Lord, The Right Hon. Charles John Pearson, M.A., LL.D., D.L., a judge of the Supreme Court of Scotland, is the second son of Charles Pearson, C.A., of Edinburgh, by Margaret, daughter of John Dalziel, of Earliston, N.B., and was born in Midlothian on Nov. 6, 1843. He was educated at Edinburgh Academy, St. Andrews University, and Corpus College, Oxon., and took his B.A. (first-class) in 1865, and his M.A. degree in 1868. At the University he gained, in 1862, the Gaisford Prize for Greek Prose, and in 1863,

the Gaisford Prize for Greek Verse. He is a Member of the Faculty of Advocates in Edinburgh; was called to the Bar (Inner Temple) in 1870; was Sheriff of Chancery in Scotland in 1885-88; Procurator for the Church of Scotland, 1886-90; Sheriff of Renfrew and Bute, 1888; Sheriff of Perthshire in 1889; Solicitor-General for Scotland; M.P. for the Universities of Edinburgh and St. Andrews, 1890-96; sworn Privy Councillor, 1891; Lord Advocate of Scotland, 1891, and again in 1895-96; Dean of the Faculty of Advocates, 1892-95; and was appointed a Senator of the College of Justice in Scotland in 1896. He received the honour of knighthood in 1887; and married, in 1873, Elizabeth, daughter of M. G. Hewat, Esq., of Norwood. Permanent address: 7 Drumsheugh Gardens, Edinburgh.

PEARSON, Professor Karl, M.A., LL.B., F.R.S., Professor of Mathematics and Mechanics in University College, London, was elected F.R.S. in 1896, and has published "Socialism in Theory and Practice," 1885; "The Ethic of Freethought," 1888; "Grammar and Science," and "New University for London," 1892. He has long written as a philosopher and a relentless logician. One of his most interesting investigations is into the so-called "Doctrine of Chances." Address: 7 Well Road, Hampstead, N.

PEARY, Lieutenant Robert Edward, Arctic explorer, man of science, and civil engineer of the United States Navy, was born at Cresson, Pa., May 6, 1856, and was educated at Bowdoin College, Maine, graduating in 1877. He entered the U.S. Navy as civil engineer with the rank of Lieutenant in 1881, and in 1884 was appointed Assistant-Engineer of the Survey for the Nicaragua Ship Canal. Lieutenant Peary began his important work on the ice-cap of Northern Greenland in 1886. The only assistance in these investigations which he received from the American Government was a formal leave of absence from his duties as a civil engineer in the Navy. He had to depend entirely on the help of his friends, the proceeds of his own lectures, and his wife's publications, which have been of material value. All his expeditions have been small, but nevertheless his work has been invaluable to the cause of Arctic exploration. His first expedition, that of 1886, when his ship was the *Eagle*, brought him nearly 100 miles over the inland ice and much further north than the route of Nansen (*q.v.*). Peary, as a result, laid a great scheme for crossing the ice from one coast to the other, and completing, if possible, the exploration of the North

Greenland coast, and then making for the pole itself. In 1891 he resumed his work, and accompanied by his young wife and a carefully selected crew, ultimately landed on the shores of M'Cormick Inlet, to the north of Inglefield Gulf (77° 40' N.). Peary unfortunately broke both his ankles just after the start, but preparations were at once made for sledge-parties over the ice. Scientific observation and research occupied the staff through the winter, and in the following spring (1892) began the famous "White march" over the inland ice to the northern shores of Greenland. The whole party moved forward on the first stage of the journey, but the greater part of the course mapped out (500 miles) was accomplished by Peary and a companion, Eivind Astrup, since dead. After a series of exciting adventures, the two explorers made their way out to the Northern Arctic Coast in 81° 40' N. and 34° 5' W., reaching a point east further than any predecessor. The information concerning Greenland and the ice-locked north, which Peary was able to bring back, is scientifically of the utmost importance, and generally most fascinating. The return journey was even more trying than the outward, and was rendered considerably more difficult, owing to the necessity of making large detours in consequence of the inaccuracies of the existing maps. In the spring and summer of 1895 Peary again traversed his old routes and corrected his observations on the regions crossed. He subsequently paid two more visits to North-East Greenland with a view to removing the great meteorite of ninety tons, which has been known since Ross's time. Peary succeeded in bringing this vast mass to America, thus making another valuable contribution to scientific knowledge. He published, in 1898, the records of all his expeditions in a volume entitled "Northward over the 'Great Ice': A Narrative of Life and Work along the Shores and upon the Interior Ice-Cap of Northern Greenland in the years 1886 and 1897." His wife, as before mentioned, wrote some years ago a small volume containing a brief account of one of his earlier expeditions. The work so far accomplished by Lieutenant Peary and dealt with in these volumes comprises:—(1) A summer voyage and reconnaissance of the Greenland ice, 1886; (2) a thirteen months' sojourn in Northern Greenland, including a 1200 mile sledge journey across the ice-cap, and the determination of the insularity of Greenland, 1891-92; (3) a twenty-five months' stay in North Greenland, including a second 1200 mile sledge journey across the ice-cap, the completion of the study of the Whale Sound natives, a detailed survey of that region, and the discovery of

the Great Cape York meteorites, 1893-95; (4) summer voyages in 1896 and 1897, including the securing of the last and the largest of the great Cape York meteorites, a 90-ton mass. Although the foregoing is a considerable record of achievement, Peary is said to regard his accomplished work as only part of a great scheme which still remains uncompleted. He is hoping to receive large assistance from his country, and having in view the distinction which Peary has brought to her rolls, the expectation deserves a worthy fulfilment. Lieutenant Peary is a man of untiring energy, and shows in his work, and no less in his two volumes of travels, an intensity which he has often visibly to restrain. In January 1897 Lieutenant Peary received the Cullum Gold Medal from the American Geographical Society. After a preliminary voyage in the summer of 1897 he started in 1898 on another expedition to the Arctic, with the hope of being able to reach the Pole.

PEASE, Sir Joseph Whitwell, Bart., M.P., J.P., D.L., son of the late Joseph Pease, a well-known coal and ironstone mine-owner of Darlington, by Emma, daughter of the late Joseph Gurney of Norwich, was born in 1828, and privately educated. In 1865 he was elected in the Liberal interest for South Durham, which constituency he represented until 1885, when he was elected for the Barnard Castle Division of the county. In 1886 he was re-elected without a contest, and in 1892 and in 1895 he was again returned at the head of the poll. He is a D.L. and J.P. for the County of Durham, and D.L. and J.P. for the North Riding of Yorkshire; Chairman of the North-Eastern Railway, and the owner of coal and ironstone mines in Durham and Yorkshire. He was created a baronet in 1882. Sir Joseph is a member of the Society of Friends, and President of the Peace and Anti-Opium Societies. In Parliament he has rendered valuable services in all questions connected with trade and commerce, and especially with the coal and iron industries of the North of England. Though a follower of Mr. Gladstone, he spoke against the Berber-Suakin Railway scheme; and in a very short time facts gave a melancholy justification of his common-sense prophecies. In 1854 he married Mary, daughter of the late Alfred Fox, Esq., of Falmouth, who died in 1892. His eldest son, Mr. Alfred E. Pease, was Liberal member for the city of York from 1885 to 1892, and was elected for the Cleveland Division of Yorkshire in 1897. Addresses: 44 Grosvenor Gardens, S.W.; Hatton Hall, Guisborough, Yorks., &c.

PEDLER, Alexander, I.R.S., F.C.S., F.I.C., Principal of the Presidency College, Calcutta, was born about 1850, and was educated at the City of London School and the Royal College of Science. He made chemistry his special study, and wrote several monographs in the journals of the Chemical and other societies. Address: Presidency College, Calcutta.

PEEL, Viscount, The Right Hon. Arthur Wellesley Peel, D.C.L., D.L., J.P., late Speaker of the House of Commons, is the youngest son of the late Right Hon. Sir Robert Peel, and Julia, daughter of Lieut.-General Sir John Floyd, and was born on Aug. 3, 1829. He was educated at Eton and Balliol College, Oxford, and in 1865 first entered Parliament for Warwick, which he has continued to represent till 1885, when he was elected for Warwick and Leamington. He was Parliamentary Secretary to the Poor-Law Board from December 1868 to January 1871; Secretary to the Board of Trade from 1871 to 1873; Patronage Secretary to the Treasury, 1873-74; and Under-Secretary to the Home Department for nine months in 1880. On the retirement of Sir Henry Brand in 1884 Mr. Peel was elected Speaker, and continued to hold the post amid general expressions of good-will from all parties. After the dissolution of 1886 he was proposed as Speaker by Lord R. Churchill, and seconded by Mr. Gladstone, and in 1892 was again elected to that post. He was made D.C.L. of Oxford on June 22, 1887. The moment of his retirement from the Speakership in April 1895 was one of the memorable occasions of Parliamentary history. In compliance with an address from the House, the thanks of the Commons were unanimously voted him for his eminent services as their representative. He was raised to the Peerage as Viscount Peel, and was granted a pension of £4000 per annum. In July the Freedom of the City was presented to him. In 1896 he was appointed Chairman of the Liquor Licensing Laws Commission. He was appointed Trustee of the British Museum in the room of the Right Hon. Spencer Walpole in 1898. In 1862 he married Adelaide, daughter of William Stratford Dugdale, of Merevale and Blyth Halls, Warwickshire. Address: The Lodge, Sandy, Beds.; and Athenæum.

PEEL, The Right Hon. Sir Frederick, K.C.M.G., D.L., second son of the late Sir Robert Peel, born in London, Oct. 26, 1823, and educated at Harrow and Trinity College, Cambridge, where he was a first class in Classics, was called to the Bar at the Inner Temple in 1849, and returned as one of the members in the

Liberal interest for Leominster in February 1849; was elected for Bury in July 1852, and having been defeated at the General Election in March 1857, was again returned by this constituency at the General Election in April 1859, but was defeated at the General Election in July 1865. He was Under-Secretary of State for the Colonies from November 1851 till March 1852, in Lord Russell's first Administration; held the same post in the coalition Administration under Lord Aberdeen; was Under-Secretary for War in Lord Palmerston's first Administration in 1855, and resigned in 1857; and was Secretary to the Treasury from 1860 till 1865. He is a Deputy-Lieutenant for Warwickshire; was sworn a Privy Councillor in 1857; and nominated a Knight-Commander of the Order of SS. Michael and George in 1869. He was appointed President of the Railway Commission in 1873. Addresses: The Manor, Hampton-in-Arden, Warwickshire; and 32 Chesham Place, S.W.

PEILE, John, Litt.D., Hon. Litt.D. Dublin, was born April 24, 1838, at Whitehaven, in Cumberland, and is the son of Williamson Peile, F.G.S. He was educated at Repton and at St. Bees Grammar School. He entered Christ's College, Cambridge, in October 1856, and was elected a Scholar in 1857. He obtained the Craven University Scholarship in 1859; was bracketed Senior Classic in 1860, and also Chancellor's Medallist. In the same year he was elected to a Fellowship and to a College Lectureship; in the following year he became Assistant-Tutor. He was appointed Teacher in Sanskrit in the University in 1865; this office was abolished in 1867 on the establishment of a Professorship, for which Mr. Peile was not a candidate. In 1866 he vacated his Fellowship by marriage, but was re-elected in 1867 under a special statute for the election of *virii insignes*, although disqualified by marriage to hold an ordinary Fellowship. In 1870 he was appointed Tutor, which office he held till 1884, when he was appointed Reader in Comparative Philology. In 1887 he succeeded Dr. Swainson in the Mastership of Christ's College. He was B.A. in 1860; M.A. 1863, Litt.D. 1864; and received the honorary degree of Doctor of Letters from Trinity College, Dublin, in 1892. In 1869 he published an "Introduction to Greek and Latin Etymology," which went through three editions, and had a large sale in England and America; it has long been out of print. In 1875 he brought out a "Primer of Philology," which has also been much used; and in 1881, "Notes to the Story of Nala" (Sanskrit). He has also contributed to different periodicals.

He has taken a large share in University business. He was elected to the Council of the Senate in 1874, and, except during two years (1878-80), he has served on it ever since; in this capacity he took part in the alteration of the University statutes of 1882. He was appointed Vice-Chancellor in 1891, and was re-appointed in 1892. In this capacity he endeavoured to bring about a better relation between the University and the town of Cambridge, by seeking some modification of exceptional powers possessed by the University. He has been a member of numerous syndicates; among these may be mentioned that which remodelled the Classical Tripos in 1872; and also that which again reconstructed it in 1881; also two which dealt with the course for the ordinary B.A. degree. He has also served on the General Board of Studies, the Financial Board, the Board for Classics, the Board for Modern Medical Studies, the Local Examinations and Lectures Syndicate, and several others. He was for two years President of the Philological Society of London. He was one of the earliest promoters of Women's Education at Cambridge, and is President of the Council of Newnham College. He is a Governor of Repton School. He married in 1866 Annette, daughter of W. Cripps Kitchener. Address: The Lodge, Christ's College, Cambridge.

PELHAM, Henry Francis, M.A., President of Trinity College, Oxford, born at Berg Apton, Norfolk, on Sept. 19, 1846, is the eldest son of the Hon. and Right Rev. John Thomas Pelham, Bishop of Norwich. He was educated at Harrow, and at Trinity College, Oxford; and obtained a first class in Lit. Hum., and a Fellowship at Exeter College, in the year 1869, and the Chancellor's Prize for an English Essay in 1870. He was elected Proctor in 1879, Reader in Ancient History in 1877, Camden Professor of Ancient History in 1889, and President of Trinity College in 1897. He is a Fellow of the Society of Antiquaries, a Member of the Council of the Hellenic Society, and one of the Governors of Harrow School. He is the author of numerous articles in the "Encyclopædia Britannica," Smith's "Dictionary of Antiquities," the *Journal of Philology* and the *Classical Review*. In 1890 he published "The Imperial Domains and the Colonate"; in 1893, "Outlines of Roman History"; in 1895, "The Roman Frontier System." He married Laura, daughter of Sir E. U. Buxton, Bart., M.P., in 1873. Addresses: Trinity College, Oxford; and Athenæum.

PELLOUX, General Luigi, Prime Minister of Italy, is the descendant of an

old French family, and was born at Rochesur-Furon, now in the French Department of Haute-Savoie, in 1830. At the time of the annexation of this province to France, some of his family co-opted for France, while he and others remained Italian citizens. He entered the Italian army in 1848 as a sub-lieutenant of cavalry; in the campaigns of 1859 and 1860 he was promoted to be Major and was mentioned in despatches. In 1866, at Custozza, he was granted the Order of Savoy on the field of battle for a daring piece of work. He became a Major-General in 1877, with the command of a brigade, and a Lieutenant-General six years later. In 1888 he commanded the expeditionary force sent to Massowa, and on his return to Italy, he was placed at the head of an army corps. The Marquis di Rudini (*q.v.*) appointed him Minister of War in 1891, which post he filled in the second Rudini Cabinet of 1897. On the fall of this ministry, he undertook the formation of its successor, and his chief duty has been to calm the disquieting symptoms of discontent shown at Milan and elsewhere, and to deal vigorously with the latent spirit of anarchy.

PENLEY, William Sydney, theatrical manager and actor, was born at St. Peter's, Margate, and was educated at a private school kept by his father, in Charles Street, Westminster. His most famous impersonation has been as Charley's Aunt, in the play of that name, which enjoyed an unprecedentedly long run in London. Address: The Vines, St. John's, Woking.

PENNELL, Henry Cholmondeley, eldest son of Sir Charles Henry Pennell, and of a granddaughter of Sir Philip Francis, was born in London in 1837. He entered the public service about 1853, and after serving in various departments of the Admiralty, Whitehall, was appointed one of Her Majesty's Inspectors of Fisheries in 1866. In January 1875 he was selected by the English Government, at the request of the Khedive of Egypt, to initiate and assist in carrying out various important commercial reforms, and was afterwards nominated Director-General of Commerce for the Interior. Mr. Pennell made his first mark in literature in "Puck on Pegasus," 1861—a book which attracted considerable notice, and has since gone through many editions. His other poetical works are "Crescent," 1866; "Modern Babylon," 1873; "The Muses of Mayfair," 1874; "Pegasus Re-Saddled," 1877 (the two last named subsequently formed two of the volumes of "The Mayfair Library"); and "From Grave to Gay," 1885. During 1864–65 he edited the *Fisherman's Magazine*

and *Review*, and afterwards the angling department of the *Sporting Gazette*, whilst contributing to the literature of angling and ichthyology a number of very successful works, of which the most important are: "The Angler-Naturalist," 1864 (2 editions); "The Book of the Pike," 1866 (4 editions); the "Modern Practical Angler," 1873 (5 editions); "The Badminton Library of Sport," 1885; "Salmon and Trout," (6 editions); "Pike and other Coarse Fish" (5 editions); "The Sporting Fish of Great Britain," 1886; "Modern Improvements in Fishing Tackle and Fish-hooks," 1887. Of this author's less known contributions to angling and ichthyology, may be instanced: "How to Spin for Pike," 1862; "Fishing Gossip," 1867; "Oyster Legislation," 1868; "The Oyster and Mussel Fisheries of France," 1868; "Oyster Fisheries and Legislation, a reprint of Letters to the *Times*," 1875; also, in 1875, a series of angling manuals in a popular form, viz.: "Fly-fishing and Worm-fishing for Salmon, Trout, and Grayling," "Float Fishing," "Trolling for Pike, Salmon, and Trout." These have since passed through numerous editions. Mr. Pennell has contributed to *Punch*, the *Athenæum*, the *Field*, *Fishing Gazette*, &c., and more recently to *Temple Bar*, *Longman's Magazine*, and other periodicals. Address: Palace Mansions, Kensington, W.

PENNELL, Joseph, etcher, was born in Philadelphia, U.S.A., on July 4, 1860. He has published the following works: "A Canterbury Pilgrimage," 1886; "Two Pilgrims' Progress," 1887; "Our Sentimental Journey through France and Italy," 1888; "Pen Drawing and Pen Draughtsmen," and "Our Journey to the Hebrides," 1889; "The Stream of Pleasure," 1891; "The Jew at Home," and "Play in Provence," 1892; "To Gipsyland," 1893; "Modern Illustration," 1895; "The Illustration of Books," 1896; "The Alhambra," 1896; "The Work of Charles Keene," 1897. Recently he and Mrs. Pennell (*née* Elizabeth Robins) have toured through Switzerland on their bicycles, a feat afterwards described by them in illustrations and print ("Over the Alps on a Bicycle," 1898). He is well known for the beauty of his occasional illustrations in newspapers such as the *Daily Chronicle*. The latest joint production of Mr. and Mrs. Pennell is an important illustrated work on "Lithography and Lithographers," 1898. Address: c/o J. S. Morgan & Co., bankers, 22 Old Broad Street, London, E.C.

PENNYCUICK, Colonel John, R.E., C.S.I., son of the late Brigadier-General

Pennycuik, C.B., K.H., killed at Chilianwala, January 1849, was born on the 15th January 1841, and educated at Cheltenham College and the H.E.I.C. Military College, Addiscombe. He was appointed Lieutenant in the Royal Engineers in December 1858, Captain in November 1870, Major in December 1876, Lieut.-Colonel in December 1883, Colonel in December 1887. He retired in January 1896. He served in the Abyssinian Campaign, 1867-68, and was mentioned in despatches and awarded medal. He was in the Public Works Department in Madras, with short intervals from April 1862 to January 1896, and has designed and carried out various important engineering works in Southern India, including the great Pesig or dam, completed in 1896. This is the highest dam, and forms the largest artificial lake in the world. He was sometime Chief Engineer and Secretary to the Government of Madras in the Public Works and Marine Departments (1890-96); President of the Sanitary Board (1894-96); Member of the Legislative Council of Madras (1890-96); was appointed Fellow of the Madras University (1890); and was President of the Faculty of Engineering in the same (1893-96). He was appointed President of the Royal Indian Engineering College, Cooper's Hill, in September 1896; created C.S.I. in 1895; and received the Telford Medal of the Institution of Civil Engineers in 1897. He married, in December 1879, Grace, daughter of Lieut.-General S. Chamien, C.B., R.A. Address: Cooper's Hill, Englefield Green, Surrey.

PENROSE, Emily, born in London, Sept. 8, 1858, is the eldest daughter of F. C. Penrose, Esq., F.R.S., F.R.I.B.A., architect, and late Surveyor of St. Paul's Cathedral. She was educated at Wimbledon, Versailles, Dresden, and Somerville College, Oxford. After taking a first class in Lit. Hum. at Oxford in 1892, she gained a Travelling Fellowship, and pursued her studies, mainly in archaeology, at Paris, Berlin, Dresden, and also in Italy and Greece. She was appointed Principal of Bedford College, London, and Professor of Ancient History in 1893, and about that time she lectured at the British Museum, and at the South Kensington Museum. In 1898 Miss Penrose became Principal of the Royal Holloway College at Egham. Address: Royal Holloway College, Egham, Surrey.

PENROSE, Francis Cranmer, M.A., Litt.D. Cantab., D.C.L. Oxon., F.R.S., F.R.I.B.A., F.R.A.S., was born at Bracebridge Vicarage, near Lincoln, in October 1817. His father was the Rev. John Penrose, formerly of Corpus Christi

College, Oxford, and his mother was a daughter of the Rev. Edmund Cartwright, D.D., F.R.S. After four years at Bedford Grammar School, he entered the foundation at Winchester College. On leaving Winchester, he became a pupil of Edward Blore, architect; and afterwards entered Magdalene College, Cambridge. During his residence there he rowed three times in the University crew against Oxford. He graduated in 1842. For three years he held the appointment of Travelling Bachelor to the University of Cambridge. In 1851 he brought out, for the Society of Dilettanti, a work entitled "The Principles of Athenian Architecture," of which a second edition has been published. In the following year he was appointed Surveyor of the Fabric to St. Paul's Cathedral, a post which he held till midsummer, 1897. Mr. Penrose published in 1869 a work named "A Method of Predicting Occultations of Stars and Solar Eclipses by Graphical Construction." The Royal Gold Medal of the Institute of British Architects was presented to him in 1883. In 1885 he was elected an Honorary Fellow of Magdalene College, Cambridge, and in 1886 was appointed Director of the British Archaeological School at Athens. During 1893 he contributed to the *Transactions of the Royal Society* a paper on certain astronomical facts connected with the orientation of Greek temples, which was followed by a supplement on the same subject in 1897. He was elected Honorary Antiquary to the Royal Academy, as successor to Sir A. W. Franks, in the year 1898. In 1856 he married Harriette, daughter of the late Francis Gibbes, surgeon, of Harewood, in Yorkshire. Addresses: Coleby Field, Wimbledon; and Athenæum.

PENZANCE, Lord, The Right Hon. James Plaisted Wilde, Dean of Arches and Chancellor of York, born in London, July 12, 1816, is the fourth son of the late Edward Archer Wilde, Esq., and nephew of the late Lord Truro. He received his education at Winchester College, and at Trinity College, Cambridge, where he graduated B.A. in 1838, and M.A. in 1842. He was called to the Bar at the Inner Temple in 1839, and devoted his attention to mercantile and marine law, and went the Northern Circuit. He was appointed Junior Counsel to the Excise and Customs in 1840, Queen's Counsel in 1855, Counsel to the Duchy of Lancaster in 1859, and a Baron of the Exchequer in April 1860, when he received the honour of knighthood. In 1863 he succeeded Sir Cresswell Cresswell as Judge of the Court of Probate, and Judge Ordinary of the Divorce Court, appointments which he

retained until 1872, when he resigned owing to ill-health. He was sworn a Privy Councillor in July 1864, and created a peer of the United Kingdom, April 6, 1869, since which time he has sat as a member of the Final Court of Appeal in the House of Lords. In June 1875 he was appointed Judge under the Public Worship Regulation Act (Dean of Arches), and Judge of the Provincial Courts of Canterbury and York. He unsuccessfully contested Leicester in the Liberal interest in 1852, and Peterborough in 1857. He was a member of the Commission appointed to consider the feasibility of forming a digest of the Common Law, which he had shortly before advocated in an address delivered at the meeting of the Social Science Congress at York. He was a member of the Commission of the Marriage Laws; a Member of the Judicature Commission; and took a leading part in opposing the changes which aimed at a fusion of law and equity, and which were afterwards carried out in the destruction of the old Common Law Courts. He was also a Member of the Ecclesiastical Courts Commission. Upon the abolition of Purchase in the Army, he was a Member of the Commission appointed to consider the claims of certain of the Purchase Officers, and shortly afterwards he was appointed Chairman of the Commission on Retirement and Promotion in the Army, and prepared the report which was afterwards in part carried out by Royal Warrant. He was Chairman of the Commission appointed to report on the condition of Wellington College. He was also Chairman and drew up the Report of the Commission which sat to inquire into the practices of the Stock Exchange. When Mr. Peel was elected Speaker of the House of Commons he took his place as Chairman of a Departmental Committee appointed by the War Office to consider the position of Engineer Officers in India. He took a leading part, in conjunction with the late Lord Redesdale, in opposing the abolition of the judicial functions of the House of Lords, an opposition which resulted in Lord Cairns withdrawing the Bill brought into the House of Lords for that purpose. He married Mary, daughter of the Earl of Radnor, in 1860. Address: Eashing Park, Godalming.

PEPPERCORN, A. D., landscapist, was born in London, and received his artistic training in Gérôme's Studio and at the Beaux Arts, Paris. His art is singularly suggestive of that of the Barbizon school, and he has been likened to Corot. He lives on the edge of those exquisite beech woods which extend from Horsley to Shere in Surrey, and are perhaps the only extensive and romantic wood-

lands east of the New Forest. He has held two oil and one water-colour exhibition at Goupils' Gallery, is prominent in all the principal annual exhibitions in London, having latterly exhibited at the small and choice exhibitions at the Dudley Gallery, and was an honoured member of the late Grosvenor Gallery Pastel Society. In the esteem of those who really understand art he holds a very high place. Addresses: 32 Shaftesbury Avenue, W.; and West Horsley, Leatherhead.

PERCIVAL, The Right Rev. John, D.D., Hon. LL.D., Bishop of Hereford, born Sept. 27, 1834, was educated at Oxford, where he was Scholar of Queen's College from 1854 to 1858, and Fellow of the same College from 1858 to 1862. From 1860 to 1862 he was a Master at Rugby School, and was then appointed first Head-master of Clifton College, a post which he most successfully filled until 1878, when he was elected President of Trinity College, Oxford. A few years later he was made a Canon of Bristol. He has published "Some Helps for School Life," sermons preached in Clifton College Chapel, and "The Connection of the Universities with the Great Towns." He was one of the originators of the University College, Bristol; and is known throughout the country, and especially in the west, for his exertions for the spread of university education among the middle classes. In 1887 Dr. Percival was appointed Head-master of Rugby School, in succession to Dr. Jex-Blake, and resigned the Presidency of Trinity College, Oxford, and also the Canonry at Bristol. He was nominated Bishop of Hereford in February 1895. Dr. Percival married, in 1862, Louisa, daughter of James Holland. She died in June 1896. In January 1899 he married (2) Miss Mary Georgina Symonds, second daughter of the late Frederick Symonds, of Oxford. Addresses: The Palace, Hereford; and Athenæum.

PERKIN, William Henry, LL.D., Ph.D., F.R.S., was born in London on March 12, 1838. As a chemist and inventor he has long been noted in scientific circles; but to the world at large his title to enduring fame is based on his greatest and earliest achievement, the discovery of the first aniline colour. He was educated at the City of London School, the only school in England at that date where scientific subjects were taught. He studied chemistry systematically under Dr. A. W. Hofmann, at the Royal College of Chemistry. This was in 1853, when he was only fifteen years of age. Two years afterwards he acted as Assistant to Dr. Hofmann in his research laboratory, and

in the following March he read an account of his first research before the Chemical Society. During the Easter vacation of that year, 1856, whilst conducting an investigation at home, which had for its object the artificial formation of quinine, he obtained results which led him to the discovery of the "aniline purple," or "mauve," a discovery which laid the foundation of the industry of the coal-tar colours, which has now assumed such remarkable dimensions. After experimenting with this colouring matter in Messrs. Pullar's dyeworks at Perth, and being encouraged by them to follow up its manufacture, Perkin left the College of Chemistry in order to devote himself to the development of his new discovery, which was patented in 1856, he being then not more than eighteen years of age. The manufacture of mauve being an entirely new industry, naturally presented many difficulties, as most of the substances required for its production were at that date known in only a few scientific laboratories, and none of the plant in ordinary use in chemical works was suitable for their production. But owing to Perkin's scientific knowledge and practical turn of mind these difficulties were overcome. In this undertaking he was associated with his father and brother, and the firm was known as Perkin & Sons. The works were erected on the Grand Junction Canal at Greenford Green, Middlesex. The new dye was successfully made in the course of the year 1857, and supplied first to the silk dyers in London, and then at Macclesfield, and some time afterwards to calico printers in Scotland and elsewhere. In 1859 the Société Industrielle of Mulhouse awarded Perkin a silver medal, and some time afterwards a gold medal for his discovery of the mauve. Besides the mauve, he discovered also several other coal-tar colouring matters; and after Graebe and Liebermann had made their celebrated discovery of the formation of alizarine from anthracene in 1868, he found two new processes by which this was rendered of practical value; and alizarine was first manufactured commercially at Greenford Green in 1869. Perkin also discovered that with artificial alizarine another colouring matter was associated, viz., anthrapurpurine, which has proved to be of great value, as it produces colours of a more scarlet shade than pure alizarine, and when mixed with the latter renders its shades more brilliant. At the end of the year 1873, Perkin retired from technical work. During the entire period in which he was occupied in carrying on the manufacture of coal-tar colours he was actively engaged in scientific research, not only in reference to this industry, but also in pure chemistry.

Out of his very numerous papers the following, relating to pure chemistry, may be referred to, viz., those on the halogen derivatives of acetic and succinic acids, which resulted, among other things, in the artificial formation of glycocine, a derivative of gelatine (1859), and tartaric acid (1861). These were carried out in conjunction with the late Mr. B. F. Duppa, and were of special interest at that date, when but few bodies of animal or vegetable origin had been produced artificially. In 1867 he published his first papers on salicylic aldehyde, showing that this substance is not only an aldehyde but also a phenol. This was the commencement of a series of researches, which resulted in the artificial formation of coumarin (the odorous principle of the Tonka bean, sweet-scented vernal grass, &c.), and the discovery of several new bodies of this class, showing the existence of a whole series of these odoriferous substances. The further prosecution of this line of research led to the discovery of a new reaction, by which cinnamic acid could be easily obtained from benzaldehyde, by heating it with acetic anhydride and a salt of a fatty acid, and moreover, by substituting other aromatic aldehydes, and also varying the anhydride, a large number of new acids of this class were obtained. By modifying this reaction, which is now known as "Perkin's Reaction," Dr. Caro succeeded in producing cinnamic acid technically (at the Badische Anilin und Soda Fabrik), for the artificial production of indigo by the method discovered by Bayer. Perkin's later work has been on the remarkable property of substances to rotate the plane of polarisation when placed in the field of a magnet (discovered by Faraday), and he has shown that this rotation varies with bodies of the homologous series in a definite manner for each addition of CH_2 , and moreover it exhibits distinct differences between normal and isomeric compounds, and is therefore likely to be of value in determining the constitution of bodies. By this property it appears also to be possible to distinguish between bodies which, when hydrated, form definite chemical products and those which only form molecular compounds. Dr. Perkin was elected a Fellow of the Chemical Society in 1856, and a Fellow of the Royal Society in 1866, at the age of twenty-eight. In 1869 he became one of the honorary secretaries of the Chemical Society, a post which he held until elected President of that Society in 1883; he was also President of the Society of Chemical Industry in 1884-85. In 1882 he received the honorary degree of Ph.D. of the University of Würzburg, and in 1884 he was made an Honorary Member of the German

Chemical Society. In 1879 the Royal medal, and in 1889 the Davy medal, were awarded to him by the Royal Society; and in 1888 he received the Longstaff medal of the Chemical Society, the latter two being given in recognition of his researches on the magnetic rotation of bodies; and in 1890 the Albert medal from the Society of Arts was awarded him for his discoveries in colouring matters. In 1891 he received the honorary degree of LL.D. from the University of St. Andrews, and in 1892 was awarded the Birmingham medal of the Gas Institute, on account of the influence of his discoveries on the Coal-Gas Industry. Address: The Chesnuts, Sudbury, Harrow.

PERKIN, William Henry, junior, Ph.D., F.R.S., Professor of Organic Chemistry at Owens College, Manchester, was born at Sudbury on June 17, 1860, and is the eldest son of W. H. Perkin, LL.D., F.R.S., &c. He was educated at the City of London School, at the Royal College of Science, South Kensington, and at the Universities of Würzburg and Munich. He was a Privat Dozent at Munich for three years, in 1887 was appointed Professor of Chemistry at the Heriot-Watt College, Edinburgh, and in 1892 proceeded to his present post. He has published well-known text-books of Chemistry in conjunction with Drs. Kipping and Lean, and has contributed many papers on Chemistry to the scientific journals. Address: Fairview, Fallowfield, Manchester.

PEROSI, Father Lorenzo, Italian composer, was born at Tortona in 1872. His love for music showed itself from his earliest years, and having sprung from a musical family he received his first lessons from his father, himself an organist of some renown. Young Perosi's talent was so pronounced that he was sent to the St. Cecilia Institute of Rome, and afterwards to Ratisbon. His first appointment was at the Conservatoire of Parma, but his ideas always having been of an ecclesiastical nature, he took up the clerical profession at Venice. In this he composed a great number of masses and other church compositions; these were followed by oratorios, which quickly gained for him a larger circle of admirers. In 1897 he conceived the idea of a series of twelve oratorios to illustrate the life of Christ. The first of these was "La Passione di Cristo"; then "La Transfigurazione di Cristo"; and "La Risurrezione di Lazzaro." The last of the series is "La Risurrezione di Cristo," which was given in 1899 at the ancient church of St. Augustine, in Milan.

PEROWNE, The Rev. Edward Henry, D.D., Master of Corpus Christi College, Cambridge, was born *circa* 1827, and was educated at Corpus Christi College, Cambridge, of which he was Fellow and Tutor from 1858 to 1879. His academic career was brilliant; he won the Porson Prize in 1848, and was Senior Classic in 1850. Ordained in 1850, he was appointed Hon. Canon of Worcester in 1894. He was Lady Margaret Preacher at the University in 1877, Vice-Chancellor from 1879 to 1881, and was appointed Master of Corpus in 1879. He has written a commentary on Galatians, several works of a devotional order, and in 1866 delivered the Hulsean Lectures on "The Godhead of Jesus." Address: Master's Lodge, Corpus Christi College, Cambridge.

PEROWNE, The Right Rev. John James Stewart, D.D., Bishop of Worcester, was born March 13, 1824, at Burdwan, Bengal, of a family of French (Huguenot) extraction, that came over to this country at the revocation of the Edict of Nantes. He was educated at Norwich Grammar School, and at Corpus Christi College, Cambridge; was appointed Bell's University Scholar in 1842, Crosse (Theological) Scholar in 1845, Tyrwhitt's (Hebrew) Scholar in 1848, and Member's Prizeman (Latin Essay) in 1844, 1846, and 1847. Dr. Perowne took his B.A. degree in 1845, and that of M.A. in 1848, and was elected a Fellow of his College in 1849. He was Examiner for the Classical Tripos in 1850 and 1851. He was Select Preacher at the University Church in 1853, 1861, and 1872, and frequently since; Hulsean Lecturer in 1868, and Lady Margaret's Preacher in 1874. For several years he held a Lectureship and Professorship in King's College, London, and was Assistant-Preacher at Lincoln's Inn, and Examining Chaplain to the Bishop of Norwich. From 1862 to 1872 he was Vice-Principal of St. David's College, Lampeter, and whilst there succeeded in obtaining for the College a Charter empowering it to confer the degree of B.A. He was in 1872 appointed Praelector in Theology, and in 1873 elected a Fellow of Trinity College; from 1874 to 1876 he was Cambridge Preacher at the Chapel Royal, Whitehall. He was Canon Residentiary of Llandaff from 1869 to 1878, and Hulsean Professor of Divinity at Cambridge, having been elected to this office, June 17, 1875; he was also Examiner in the Text of Scripture, &c., in the University of London. He was appointed an honorary chaplain to the Queen, May 13, 1875. In August 1878 he was nominated by the Crown, on the recommendation of Lord Beaconsfield, to the Deanery

of Peterborough, vacated by the death of Dr. Saunders; and in 1890 was nominated Bishop of Worcester, in succession to Dr. Philpott, who resigned. Dr. Perowne was succeeded in the Deanery of Peterborough by Canon Marsham Argles. Dr. Perowne was made an hon. D.D. of the University of Edinburgh at the Tercentenary of the University in 1884, and was Select Preacher at Oxford in 1888-89. In 1888 he was made a Justice of the Peace for the Borough and Liberty of Peterborough, and in the same year was elected the First Hon. Fellow of his old College, Corpus Christi, Cambridge. Dr. Perowne is the author of "The Book of Psalms, a new Translation, with Notes, Critical and Exegetical," 2 vols., 7th edit.; Hulsean Lectures on "Immortality"; a volume of sermons; occasional sermons; "The Athanasian Creed"; "Confession in the Church of England"; "The Church, the Ministry, the Sacraments"; "Disestablishment and Disendowment"; "The Interest of the People of England in the Maintenance of the National Church"; articles in Dr. Smith's "Dictionary of the Bible," *Contemporary Review*, *Expositor*, *Sunday Magazine*, *Good Words*, and an essay on Welsh Cathedrals. He is also the editor of *Al Adrumieh*, an Arabic Grammar, and of "Rogers on the Thirty-Nine Articles," of Bishop Thirlwall's Charges and Literary Remains, and of "The Cambridge Bible for Schools," and "The Cambridge Greek Testament for Schools." Dr. Perowne was a member of the company engaged on the revision of the Old Testament, and also of the Royal Commission on Ecclesiastical Courts. He married, in 1862, Anna Maria, third daughter of the late Humphry William Woolrych, Esq., Serjeant-at-Law, of Croxley, Hertfordshire. Addresses: Hartlebury Castle, Kidderminster; and Athenæum.

PERRIN, The Rt. Rev. William Willcox, D.D., second son of the late Thomas Perrin, Esq., of Westbury-on-Trym, Gloucestershire, was born Aug. 11, 1848. He was educated at King's College, London, of which he is an Associate, and Trinity College, Oxford. Graduated B.A. 1870; M.A. 1873; D.D. 1893. Ordained 1871 (Deacon); 1872 (Priest); Curate of St. Mary's, Southampton, 1871-81; Vicar of St. Luke's, Southampton, 1881-93; Surrogate for Diocese of Winchester. Consecrated Bishop of British Columbia, in Westminster Abbey, March 25, 1893. Address: Bishop's Close, Victoria, British Columbia.

PERRY, Professor John, M.E., D.Sc., F.R.S., Assoc. M.I.C.E., Vice-President of the Physical Society and Vice-

President of the Institution of Electrical Engineers, was born at Garvagh, in Ulster, on Feb. 14, 1850. His father was Samuel Perry, of that town. Dr. Perry attended the Model School, Belfast, and won a silver medal in Natural Science. He graduated in 1870 as Bachelor of Engineering, in the Queen's University of Ireland, with first honours, Gold Medal and Peel Prize; and gained a Whitworth Scholarship in that year. The honorary degree of Master in Engineering was conferred on him by the University Senate in 1882. He was Lecturer in Physics at Clifton College, 1870-74; and there started the earliest School Physical Laboratory and Workshop, still thriving institutions. He published "A Treatise on Steam" (Macmillan), in 1873; was a secretary of the A Section, British Association, 1874; and in that year became Thomson Scholar, and hon. assistant to Sir William Thomson in Glasgow. He wrote the mathematical and physical articles in Blackie's "Cyclopaedia." His first scientific paper was read before the Royal Society of London, early in 1875, on "The Electric Conductivity of Glass as Dependent on Temperature." In partnership with Sir William Thomson, he read a paper on "Capillary Surfaces of Revolution," before the Royal Society of Edinburgh. Of the papers published by him with Prof. Ayrton, since 1876, the following are some of the most important: "The Specific Inductive Capacity of Gases," "On Electrolytic Polarisation," "Resistance of Galvanometer Coils," "Ice as an Electrolyte," "Heat Conduction in Stone," "Contact Theory of Voltaic Action," "Ratio of Electric Units," "On Electromotors, and their Government," "On Electrical Measuring Instruments," "On the Gas Engine," and "Magnifying Spring." In 1875 he went to Japan as Joint-Professor (with the Principal) of Engineering in the Imperial College of Engineering, and returned to England in 1879. He gained the Silver Medal of the Society of Arts in 1881 for his lecture on "The Future Development of Electrical Appliances," since translated into German by Prof. Weinhold. He delivered a course of Cantor lectures on hydraulic machinery in 1882; and became Professor of Mechanical Engineering and applied Mathematics at the Finsbury Technical College. He is secretary of the Physical Society. Professors Ayrton and Perry were appointed joint-engineers to the Faure Accumulator Company, and remained in that capacity until the English patents were disposed of. Their more important inventions are: A dynamo machine, in the description of which in 1882 the well-known system of multipolar winding is first described; permanent magnet and spring ammeters and

voltmeters, with and without commutators; solenoid and shielded ammeters and voltmeters; spring balances; resistances for use with strong currents varied by foot and hand; ergmeters; power-meter; ohmmeter; non-sparking key; electro-motors; switches for use with accumulators, and arrangements for lighting railway trains; photometers; secohmmeters; dynamometer couplings and transmission and absorption dynamometers; an electric arc lamp; the governing of motors and dynamos; an electric tricycle; an electric railway system with friction gearing, contact boxes and locomotives, forming part of the general system belonging to the Telfherage Company (Limited). Of their inventions which are not commercially valuable may be mentioned their arrangement for "Seeing by Electricity"; their multireflex arrangement exhibited in Paris; their ballistic galvanometer, and their many forms of apparatus employed in the teaching of electricity, &c. On the death of Prof. Fleeming Jenkin, Prof. Perry became engineer to the Telfherage Company, and from July to October 1885, superintended the erection and settling to work of the Telfher line at Glynde in Sussex. In June 1885 Prof. Perry was elected to a Fellowship of the Royal Society. The Royal University of Ireland has bestowed on him its highest scientific degree, that of Doctor of Science. He delivered the "operatives" lecture of the British Association meeting of 1890 on "Spinning Tops." He is now utilising part of the immense water-power of Galway (in partnership with his brother, who is County Surveyor there) in Electric Lighting and Transmission of Power. The Ayrton and Perry partnership was dissolved in 1889. Since that time Prof. Perry has published many scientific papers and developed several instruments, of which his Electric Supply Meter for the use of consumers of electric energy is the one most valuable commercially. In 1896 he was appointed to the Chair of Mathematics and Mechanics at the Royal College of Science, London. He is a member of the Kew Committee of the Royal Society. He advocates many reforms in the teaching of Mathematics and Mechanics, which are explained in his recent publications, "The Calculus for Engineers" and "Applied Mechanics." He is married to Miss Alice Jowitt, of Sheffield. Address: Royal College of Science, S. Kensington.

PERSIA, Shah of. See MUZAFFER-ED-DIN, SHAH OF PERSIA.

PERUGINI, Charles Edward, was born in Naples of Italian parentage, on Sept. 1, 1839. He was educated in Eng-

land, and first began his art studies in Paris, at the Pension Colart. Acting upon the advice of Horace Vernet, who was much interested in the boy's talent, his parents sent him to Naples, where he studied painting under Signor Bonplis. He then went to Rome, and worked in the studio of Signor Mancinelli, eventually finishing his art education in Paris under the personal supervision of Ary Scheffer. C. E. Perugini first exhibited at the French Gallery, and at the Royal British Artists in Pall Mall; and since 1860 has been represented each successive year at the Royal Academy. He is also a constant exhibitor at the New Gallery. Among his principal works are: "The Cup of Tea," 1874; "A Labour of Love," by which he was represented at the Paris Universal Exhibition of 1878; "The Rivals," 1876; "Finishing Touches," 1877; "Fresh Lavender," 1879; "A Siesta," 1880; "Dolce Far Niente," 1882; "Idle Moments," 1884; "Cup and Ball," 1885; "A Summer Shower," 1888; "Leda," 1893; "The High-Born Lady," 1895; "Weary Waiting," 1898; "A Fair Italian," 1899; and many others, most of which have been reproduced, either in line engraving, wood, mezzotint, or photogravure. He has also painted many portraits, but has exhibited only a few of them; two of the best known being "Countess Granville and her daughters," and the portrait of his wife, exhibited at the Royal Academy in 1875. Mr. C. E. Perugini was naturalised in 1859, and joined the Artists' Corps, then the 38th Middlesex Royal Volunteers (now the 20th), and was elected to a commission, which he held until 1872. Mr. Perugini was awarded the Gold Medal at the Melbourne International Exhibition of 1880, and received other medals and diplomas from Philadelphia, Sydney, and Adelaide. In 1874 he married Kate, daughter of Charles Dickens. Address: 38A Victoria Road, Kensington.

PERUGINI, Kate, wife of C. E. Perugini, is the eldest daughter of Charles Dickens, the novelist. She was born in London, and first began drawing at Bedford College, Bedford Square. She afterwards studied art in London and Paris, among her teachers being the late C. A. Collins and the late Frederick Walker, A.R.A. Mrs. Kate Perugini is a painter of children's portraits, and of children's subject pictures. The best known of these are: "An Impartial Audience," "A Little Woman," "Tomboy," "A Little Coquette," "Brother and Sister," "Happy and Careless," "The Rabbit Hutch," "A Doll's Dressmaker," "Little Nell," "A Story Book," "Sympathy," "A Flower Merchant," "The

Flowers that Bloom in the Spring," and "Butterflies," a photogravure of which was made by the Berlin Photographic Company. These pictures, and a great number of her portraits of children, have been exhibited at the Royal Academy and the New Gallery. Her Academy picture in 1899 was "The Sister of the Bride." Mrs. Kate Perugini is a member of the Society of Women Artists.

PETERBOROUGH, Bishop of. See GLYN, THE HON. AND RIGHT REV. EDWARD CARR.

PETHERICK, Edward Augustus, eldest son of Peter John Petherick, and grandson of Edward Jarman Petherick, R.N., of Bridgwater, was born March 6, 1847, at Burnham, Somerset, where his father was bookseller and librarian. His parents emigrating to Australia in 1852, he received early official training in the municipal offices, Collingwood, Victoria. From 1862 to 1888 he was connected with the bookselling and publishing house of Robertson, of Melbourne, representing that firm in London from 1870 to 1888. In connection with a Colonial Booksellers' Agency (1887 to 1892) he edited the *Torch and Colonial Book Circular*, a guide to new books, English and American, including all publications relating to or issued in the British Colonies. Among much other bibliographical work which Mr. Petherick has done may be mentioned a "Bibliography of Australasia and Polynesia," now in course of publication, and a "Catalogue of the York Gate Library" (S. W. Silver), 1882, extended and re-issued in 1886 as "An Index to the Literature of Geography and Travel in all Ages and Countries." He contributed to the *Melbourne Review* (1883 to 1885) a series of papers treating of Discovery in the Southern Hemisphere, and is preparing a work in elucidation of Spanish and Portuguese voyages in the 16th century. He has also written upon Australian politics and finances, his latest publication being "Australia in 1897." Mr. Petherick has travelled round the world three times, and has visited the United States and most of the British Colonies. He is a Fellow of the Royal Geographical Society, of the Royal Colonial Institute, and of the Linnean Society; hon. member of the Royal Geographical Society of Australasia (Victorian Branch), Member of the Library Association of the United Kingdom, and of kindred societies. He married, in 1892, Mary Agatha, daughter of Rev. Samuel Annear, Wesleyan missionary, and widow of Charles Skeats, Esq., of Melbourne and Bournemouth. Address: 85 Hopton Road, Streatham, London, S.W.

PETIT, Hon. Sir Dinshaw Manockjee, Bart., a philanthropic Parsee, was born June 30, 1823, and is the chief representative of one of the oldest Parsee families, which obtained its surname from the French *sobriquet* of Petit, owing to their short stature. Sir Dinshaw acquired his English education at a school kept by a pensioned sergeant named Sykes. At seventeen he entered an English firm as clerk, at the same time trading on his own account with the rest of India and with China. Some time after he had inherited about twelve lakhs on the death of his father in 1859, he took full advantage of the American Civil War to invest all his capital in the extension of the cotton industry, and such were his energy and prudence that he not only increased his fortune, but succeeded in preserving it intact during the worst crisis of the share mania. He deserves all the credit for having acted as the pioneer of that milling industry which has turned Bombay into an Asiatic Lancashire. He is now the chief owner of seven of the largest mills in his Presidency, and is considered to be one of the wealthiest men in India. In 1887 he received the honour of knighthood on the occasion of the Queen's Jubilee, and in the following year he was appointed member of the Viceroy's Judicial Council—a post which he afterwards resigned owing to the pressure of his other engagements. During the last thirty years Sir Dinshaw has dispensed large sums in public and private charity, principally the latter, and the amount of these benefactions is stated on trustworthy authority to exceed £200,000. One of the most notable of his latest gifts was to present the freehold of the land on which the Victoria Jubilee Technical Institute has been erected. He has given a lakh (100,000) of rupees towards the founding of a leper hospital in Bombay. These and other benefactions have made the Parsee community of Western India famous throughout the world. He was Sheriff of Bombay in 1887, and is a member of the Chief Parsee Council. In 1890 he was created a baronet, and his heir is his grandson, who was born in 1873. Address: Petit Hill, Bombay.

PETIT BOB. See MARTEL DE JANVILLE, COMTESSE DE.

PETRE, Sir George Glynn, C.B., K.C.M.G., was born on Sept. 4, 1822, and is the second son of Henry Petre, of Dunkenhagh, Clayton-le-Moors, Lancs.; he entered the diplomatic service in 1846, and was attached to the Legation at Frankfurt. He was transferred to the Embassy in Paris, March 1853, and in

1856 he went to Naples, and acted as Chargé d'Affaires from July to October, when, in conjunction with the French Minister, he broke off diplomatic relations with the King of the Two Sicilies, and was subsequently re-appointed to the Embassy of Paris. He was appointed Secretary of Legation at Hanover, June 6, 1859; Chargé d'Affaires at Copenhagen, December 1864; and assisted at the investiture of his Majesty Christian IX. with the Order of the Garter, as a bearer of a portion of the insignia. He was transferred to Brussels in 1866, and promoted to be Secretary of Embassy in Berlin, June 26, 1868. Mr. Petre was accredited Envoy Extraordinary and Minister Plenipotentiary to the Argentine Republic, April 1, 1881; Minister Plenipotentiary to the Republic of Paraguay, March 2, 1882; and Envoy Extraordinary and Minister Plenipotentiary to the King of Portugal, Jan. 16, 1884. In 1886 he was made a Companion of the Bath, and in 1890 a Knight Commander of the Order of St. Michael and St. George. In January 1893 he retired on a pension. He married, in 1858, Emma Katherine, daughter of the late Major Sned. Address: Hatchwoods, Winchfield, Hants.

PETRIE, Professor William Matthew Flinders, D.C.L., LL.D., Ph.D., Egyptologist, was born at Charlton, on June 3, 1853, and is the grandson through his mother of Captain Flinders, discoverer and explorer in Australia. He was privately educated. From 1875 to 1880 he was occupied in surveying British earthworks, &c.; his plans are in the British Museum. In 1877 he wrote "Inductive Metrology, or the Recovery of Ancient Measures from the Monuments"; 1880, "Stonehenge: Plans, Description, and Theories." In 1881-82 he surveyed at the pyramids, and the results appeared in "Pyramids and Temples of Gizeh," assisted by a grant from the Royal Society. In 1884-86 he excavated for the Egypt Exploration Fund at Tanis (Zoan), Naukratis, Am, and Daphnæ, the last three being new discoveries. The results appeared in "Tanis I.," "Naukratis," "Tanis II.," and "Two Hieroglyphic Papyri." He also wrote the articles "Pyramid" and "Weights and Measures," in the "Encyclopædia Britannica," 9th edit. In 1887 his work was on rock inscriptions and casts of sculpture, appearing in "A Season in Egypt" and "Racial Portraits." In 1888 and onwards he has excavated with the assistance of private friends, working from 1888 to 1890 in the Fayum, and discovering the colossi of Biahmu, Roman portraits at Hawara, early towns at Kahun and Gurob, and the

interior of the pyramids of Hawara and Illahun. The results appeared in "Hawara," "Kahun," and "Illahun." A work on "Historical Scarabs" was published in 1888. In 1890 he discovered and excavated on the site of Lachish for the Palestine Exploration Fund, the account appearing as "Tell el Hes." In 1891 he excavated at Medum, finding the earliest known temple, and published it in "Medum." A popular summary of his Egyptian work was then issued, in "Ten Years' Diggings in Egypt." In 1892 he excavated the palace of Akhenaten, published in "Tell el Amarna." He received the honorary degree of D.C.L. at Oxford in 1893, and was appointed to the newly founded Edwards Professorship of Egyptology at University College, London, where he organised a library and collection. In 1894 he discovered prehistoric sculptures in the Temple of Koptos, published in "Koptos." In 1895 he discovered the "New Race" at Nagada, since proved to be prehistoric Egyptians, published in "Nagada and Ballas." In the same year he received the honorary degree of LL.D. at Edinburgh. In 1896 he explored the Temples of Thebes, finding the Israel inscription, published in "Six Temples at Thebes." In 1897 he excavated an early cemetery, published in "Deshasheh." In 1898 he explored the early cemetery of Denderah. In May 1899 Prof. Flinders Petrie lectured at University College on the discoveries of the winter of 1898-99. The entirely new discovery of the year was the traces of a foreign people who entered Egypt about the twelfth Dynasty. This people was probably Libyan. The most valuable discovery was the magnificent bronze dagger of King Suazenna, of the fourteenth Dynasty. He has also published a "History of Egypt," "Egyptian Tales," "Egyptian Decorative Art," "Religion and Conscience," "Syria and Egypt," &c. The purpose of these researches has been the scientific study of Egyptian civilisation, recorded by full publication of drawings and descriptions. Permanent address: University College, London.

PETTIGREW, James Bell, M.D., LL.D., F.R.S., F.R.C.P., Laureate of the Institute of France, Professor of Medicine and Anatomy, and Dean of the Medical Faculty in the University of St. Andrews, was born in 1834, and is a native of Monkland, Lanarkshire, Scotland. He is related on his father's side to the late well-known Dr. Thomas J. Pettigrew, F.R.C.S., author of "Bibliotheca Sussejana," "Encyclopædia Egyptiaca," "Medical Portrait Gallery," &c.; and on his mother's side (Mary Bell) to the famous Henry Bell, the

designer and builder of the original *Comet* steamship, and the founder of steam navigation in Europe. He was educated at the Free West Academy of Airdrie, and at the Universities of Edinburgh and Glasgow. He studied Arts at Glasgow University from 1850 to 1855, and Medicine at Edinburgh University from 1856 to 1861. He graduated in Medicine at Edinburgh University with first-class honours in 1861. In 1858-59 he was awarded Professor John Goodsir's Senior Anatomy Gold Medal for the best treatise "On the Arrangement of the Muscular Fibres in the Ventricles of the Vertebrate Heart," *Phil. Trans.* 1864. This treatise procured for him the appointment of Croonian Lecturer to the Royal Society of London for 1860. He carried off in this same year (1860) the annual Gold Medal in the class of Medical Jurisprudence for an essay "On the Presumption of Survivorship," *Brit. and For. Med. Chir. Review*, January 1865. In 1860 also he was elected President of the Royal Medical Society, an honour greatly prized by all Edinburgh alumni. On graduating in medicine in 1861, he selected as the subject of his inaugural dissertation, "The Ganglia and Nerves of the Heart, and their connection with the Cerebro-spinal and Sympathetic Systems in Mammalia," a very involved and intricate investigation. For this he received a graduation Gold Medal—the highest honour the University of Edinburgh confers, *Proc. Roy. Soc. Edin.* 1865. In 1861 he became house surgeon to the famous Professor Syme at the Royal Infirmary of Edinburgh. In 1862 he obtained the post of Assistant in the Hunterian Museum of the Royal College of Surgeons of England. Here he remained for five years (1862-67). During the period in question he added about 600 finished dissections, injections, and casts to this celebrated collection. In addition to museum work he wrote several important memoirs, each memoir being profusely illustrated by dissections and drawings. The following may be mentioned: "The Valves of the Vascular Systems in Vertebrata," *Trans. Roy. Soc. Edin.* 1864; "The Muscular Arrangements of the Bladder and Prostate," *Phil. Trans.* 1867; "The Mechanical Appliances by which Flight is Attained in the Animal Kingdom," *Trans. Linn. Soc.* 1867. In 1867 he retired from the Hunterian Museum, and spent two years in the south of Ireland, where he occupied himself in extending his knowledge of the flight of insects, birds, and bats. He also experimented largely at this period on the subject of artificial flight. In 1869 he was made a Fellow of the Royal Society of London, and in the autumn of that year he returned to Edin-

burgh, having been appointed Curator of the Museum of the Royal College of Surgeons of Edinburgh, and Pathologist to the Royal Infirmary of Edinburgh. There he continued his anatomical, physical, and physiological researches, particularly those of flight, and in 1870 he produced a memoir, "On the Physiology of Wings, being an analysis of the movements by which Flight is produced in the Insect, Bird, and Bat," *Trans. Roy. Soc. Edin.*, vol. xxvi. pp. 321-446. At that period he added numerous specimens to the Museum of the Royal College of Surgeons in Edinburgh; these, with the other specimens deposited in the Hunterian Museum of the Royal College of Surgeons of England, and the Anatomical Museum of the University of Edinburgh, amounted to considerably over 1000. He also gave daily demonstrations in morbid anatomy at the Royal Infirmary of Edinburgh to large classes of students. In 1872 he delivered a course of lectures to the President and Fellows of the Royal College of Surgeons of Edinburgh, "On the Physiology of the Circulation in Plants, in the Lower Animals, and in Man." These appeared in the *Edinburgh Medical Journal, Lancet, &c.*, as delivered, and were republished by Macmillan in 1874. In 1872 he was made a Fellow of the Royal Society of Edinburgh, and a member of the Harveian, Botanical, Medico-Chirurgical, and other learned societies. In 1873 he was elected a Fellow of the Royal College of Physicians of Edinburgh, and appointed Examiner in Physiology to the College. He also (1873) became Lecturer in Physiology to the Royal College of Surgeons of Edinburgh. On assuming the duties of teacher of Physiology, he chose as the subject of his opening address, "The Relation of Plants and Animals to Inorganic Matter, and the Interaction of the Vital and Physical Forces," *Lancet*, November 1873; reprinted shortly afterwards by MacLachlan and Stewart, of Edinburgh. In that year (1873) he published his work on "Animal Locomotion; or Walking, Swimming, and Flying," the most popular and best known of all his writings, Anglo-American Science Series, vol. vii. This volume was translated, shortly after its appearance, into French, German, and other languages, and has passed through several large editions. In 1874 he was awarded the Godard prize of the French Academy of Sciences for his Anatomico-physiological Researches, and made a Laureate of the Institute of France. In 1875 he was appointed Chandos Professor of Medicine and Anatomy and Dean of the Medical Faculty in the University of St. Andrews, positions which he still holds. On being inducted to his Chair, he gave as his introductory lecture "Man in

his Anatomical, Physical, and Physiological Aspects," *Lancet*, November 1875. In 1875-76-77 he delivered special courses of physiological lectures in Dundee, and did much to foster the higher learning in that important commercial centre. To his efforts, and those of his colleagues, University College, Dundee, largely owes its origin. In 1877 he was elected by the Universities of Glasgow and St. Andrews as their representative at the General Council of Medical Education and Registration of the United Kingdom (the so-called Medical Parliament), and these Universities he represented for nine years, viz., till 1886, when a new Medical Bill was passed which enabled each of the Scottish Universities to return its own member. Since that date (1886) he has represented his own University—St. Andrews. In 1883 he was appointed Examiner in Anatomy to the University of Glasgow, and in 1886 he had the honorary degree of LL.D. of that University conferred upon him. In 1889 he was made President of the Harveian Society of Edinburgh, and gave as his Harveian Oration, "The Pioneers in Medicine prior to and including Harvey," *Edin. Med. Jour.* 1889. He has been the leading spirit in extending the medical and science teaching at St. Andrews, and mainly through his efforts, backed up by the unstinted liberality of the Lord Rector—the scholarly Marquis of Bute—a new medical school, on the most approved modern lines, has been erected at this ancient seat of learning. It was chiefly through Professor Pettigrew's action that St. Andrews University obtained the princely gift of £100,000 from the late Mr. David Berry of Coolangatta, New South Wales. He was also the means of securing from his friend, Dr. John Hay, a charming official residence for the Principal of the University. Professor Pettigrew is an advanced thinker and takes a keen interest in University extension and reform. He is strongly of opinion that the scope of the Master of Arts degree of the Scottish Universities should be widened to embrace more of Science, Modern Languages, &c. He is an original investigator in Anatomy, Physiology, and Physics, and is justly celebrated in these departments of study at home, on the Continent, and in America. He was the first to untie the Gordian knot of Anatomy by unravelling the marvelously complicated, interlacing fibres of the vertebrate heart. He is also the discoverer of the figure of eight movements made by the wings of insects, birds, and bats in flying—by the fins, flippers, tails, bodies, &c., of animals in swimming, and by the extremities of bipeds and quadrupeds in walking. In addition to the

works already referred to, he is the author of articles "On Flight, Natural and Artificial" ("Encyclopædia Britannica," 9th edit., vol. ix., 1879, and *Fraser's Magazine* for February 1881); "The Phonograph or Speech Recorder in its Relation to the Human Voice and Ear" (*Modern Thought* for February 1882); "Creation—Man's place in Creation—his Development and Education from a science point of view" (*British Medical Journal* for November 1882, and *Educational Times* for December 1882); "Civilisation a Result of Intellectual Progress"; "The Brain and the Nervous System in their relation to Mind, or the Correlation of the Physical and Psychical Forces," &c. In 1890 he married Elsie, the second daughter of Sir William Gray, of Greatham, Durham. Address: The Swallowgate, St. Andrews.

PEYTRAL, Paul Louis, French statesman, was born at Marseilles, Jan. 20, 1842, and first entered political life in 1881, when he was elected to the Chamber of Deputies as a Radical. In 1885 he was the only member of his district to vote the credits for Tonkin and Madagascar, and in the next year he became Under-Secretary to the Minister of Finance, M. Carnot, afterwards President. This post he retained for some time in the succeeding Goblet Cabinet. From 1888 to 1889 he was Minister of Finance in the Radical Cabinet of M. Floquet, and introduced a whole series of Radical reforms, chief among which was a proposal for the income-tax. In the Brisson Cabinet of 1898, he filled the same post. He is Senator for the Bouches du Rhône, and is a free-trader in principles. In October 1898 he retained his portfolio of Finance in the Dupuy Cabinet, and has again roused French ire by endeavouring to pass his Income-Tax Bill.

PHEAR, The Rev. Samuel George, M.A., D.D., late Master of Emmanuel College, Cambridge, third son of the late Rev. John and Catherine Phear, was born March 30, 1829, at Earl Stonham Rectory, Suffolk; entered Emmanuel College, Cambridge, in 1848, and graduated B.A. as Fourth Wrangler, January 1852. He became Fellow and afterwards Tutor of his College, and was elected Master, Oct. 2, 1871, retaining office until 1895. He filled the office of Vice-Chancellor of the University for the successive years 1875-76. Dr. Phear for many years took an active part in every endeavour to extend the teaching and influence of the University; but for the last two or three years he has been invalided, and living apart from University affairs. Address: Cambridge.

PHELPS, Elizabeth Stuart. See WARD, MRS. HERBERT D.

PHILBRICK, His Honour Judge Frederick Adolphus, Q.C., is the eldest son of Frederick B. Philbrick, of Colchester, and was born in 1836. He was educated at the London University, and was called to the Bar at the Middle Temple in 1860. He became a Q.C. in 1874, and has been Recorder of Colchester since 1870. He was appointed in 1895 a County Court Judge. Addresses: Barwick House, Yeovil; and Lamb Building, Temple, E.C.

PHILIP, John W., American naval officer, was born at Kinderhook, New York, in 1840, of sturdy Dutch ancestry. He entered the Naval Academy in 1856, and graduated in 1860; he served in the navy throughout the war between the States, and afterwards was attached to the Asiatic and to the European squadrons. Later, on leave of absence, he commanded the *Woodruff* Scientific Expedition round the world. In 1898, on the outbreak of the war with Spain, he was in command of the battleship *Texas*, and with her he acted a prominent part in the destruction of the Spanish squadron off Santiago, Cuba, July 3, 1898. After that battle he was promoted to be Commodore.

PHILIPS, Francis Charles, novelist and dramatist, comes of a military family, and is the fourth son of the Rev. G. W. Philips, of Ruxley Park, Surrey, and Wendy Vicarage, Cambridgeshire, who lived to a great age and was godson of George Washington. He was born at Brighton in 1849; was educated at Brighton College, where he gained a prize for poetry, and the Royal Military College, Sandhurst, whence he entered the 2nd Queen's Royal Regiment. Leaving the army, he was called to the Bar in January 1884, took to literature, and leased the Globe Theatre from 1874 to 1880. His principal novels have been "As in a Looking-Glass," 1885; "A Lucky Young Woman," 1886; "Social Vicissitudes," a collection of short stories, 1880; "Jack and Three Jills," 1887; "The Dean and His Daughter," 1887; "The Strange Adventures of Lucy Smith," 1888; "Little Mrs. Murray," 1889; "Young Mr. Annesley's Courtship," 1890; "One Never Knows," 1892; "Mrs. Bouverie," 1894, fourth edition 1898; "A Devil in Nun's Veiling," "A Question of Colour," and "Worst Woman in London," 1895; "An Undeserving Woman," "The Luckiest of Three," "My Face is My Fortune" (with P. Fendall), "A Full Confession," "Poor Little Bella," "The Dean and His Daughter" (fifth edition), "The Knight's Tale," and "Men, and Women, and

Things," 1898. Besides these there are "The Fatal Phryne," "The Scudamores," "A Maiden Fair to See," and "Sybil Ross's Marriage," written in collaboration with Mr. C. J. Wills; and "A Daughter's Sacrifice" and "Margaret Byng," written in collaboration with Mr. Percy Fendall. Among the plays that he has produced in London are "The Dean's Daughter," founded on his novel, "The Dean and his Daughter," written in collaboration with Mr. Sydney Grundy, and produced at the St. James's Theatre; "Husband and Wife," a farcical comedy, written with Mr. Percy Fendall, and produced at the Comedy Theatre; "Godpapa," a farcical comedy, written in collaboration with Mr. Charles Brookfield, and produced with great success at the Comedy Theatre; and "The Burglar and the Judge," written with Charles Brookfield, and produced at the Haymarket, Prince of Wales's, and Court Theatres. The novel "As in a Looking-Glass" has been published in every capital in Europe, ran as a serial in Madame Adam's *Nouvelle Revue*, and was afterwards published by her under the title of "Comme dans un Miroir." After Mrs. Bernard Beere's success at the Opéra Comique in the play it was produced at the Variétés Theatre under the name of "Lena." Mme. Sarah Bernhardt created the part, playing it in Paris and London. Mr. Philips served for a considerable time in the army, and as a member of the South Wales Circuit and a practising London barrister has been engaged in some important cases, having appeared in *Mrs. Weldon v. Gounod*, and *Publisher of Life v. Bird*.

PHILISTINE, The. See SPENDER, J. ALFRED.

PHILLIMORE, Sir Walter George Frank, Bart., D.C.L., LL.D., J.P., Judge of the Queen's Bench Division, is the only son of the late Sir Robert Phillimore, 1st Bart., a Judge of the old Court of Admiralty. Born on Nov. 21, 1845, he succeeded to the baronetcy in 1885. He was educated at Westminster and Christ Church, Oxford, where his career was full of distinction. He obtained first classes in Classical Moderations in 1865, in Lit. Hum. in 1866, and in Law and History in 1867. In 1868 he was elected a Fellow of All Souls', and became Vinerian Law Scholar, being called to the Bar at the Middle Temple in November. He is a Bencher of his Inn, had a patent of precedence conferred upon him in 1883, and holds the offices of Chancellor of the Diocese of Lincoln and Official of the Archdeanery of Colchester. He has also been Commissioner of Assize on the North-Eastern Circuit, on his return from

which he was raised to the Bench in November 1897. He is a learned lawyer, and a well-known authority on Admiralty and Ecclesiastical Law. He has published the "Book of Church Law"; "Phillimore's Ecclesiastical Law," 2nd edit.; "Phillimore's International Law," vol. iv., 3rd edit. As a Liberal he unsuccessfully contested St. George's, Hanover Square, in 1885, and as a Home Ruler failed to secure a seat in South Oxfordshire in 1886 and 1892. He has strong ecclesiastical sympathies, and is Vice-President of the English Church Union. In June 1898 he was presented with a silver model of a three-masted antique galleon by past and present members of the Admiralty Bar in recognition of his long service in the Admiralty Court. He married, in 1870, Agnes, eldest daughter of the late Mr. C. M. Lushington, M.P. Addresses: 86 Eaton Place, S.W.; The Coppice, Henley-on-Thames, &c.; and Athenæum.

PHILLIPS, Lawrence Barnett, F.S.A., F.R.A.S., A.R.E., eldest son of the late Barnett Phillips, Esq., of Bloomsbury Square, was born Jan. 29, 1842, and educated at Dr. Pinches' school, which he left at the age of fourteen, to study mechanics and watchmaking, his general education being continued by private tutors at his father's residence. In 1861 he commenced business as a wholesale chronometer and watch manufacturer, having already invented the rocking-bar mechanism for winding watches, which did much towards their general introduction, and which form of keyless work has now been universally adopted by the English manufacturers. He has designed and constructed some of the most complicated and highly-finished specimens of horological art, and by the invention of various forms of mechanism succeeded in the simplification of chronographs and the improvement of calculating machines. In 1866 he published the "Autographic Album," which was followed in 1871 by "Horological Rating Tables," and in 1873 by "The Dictionary of Biographical Reference," an original work, giving the names of 100,000 celebrities of all countries, and references in each instance to sources of further information. In November 1865 he was elected a Fellow of the Royal Astronomical Society, and in March 1885 a Fellow of the Society of Antiquaries. Since 1882, when he retired from business, he has occupied himself as a painter and etcher, and has been a constant exhibitor at the Royal Academy and most of the leading London and provincial exhibitions, and is an Associate of the Royal Society of Painter-Etchers. In 1890 he constructed and patented an improved sketching-box and palette, which

is now much used by artists for out-door work. Address: Chesham House, 134 Sutherland Avenue, W.

PHILLIPS, Stephen, poet, was born at Somertown, near Oxford, his father being the Rev. Stephen Phillips, at one time Reader of Gray's Inn, and now Canon of Peterborough Cathedral. His mother was a Miss Dockray, related to the Lloyd and Wordsworth families, so that he has strong affinities by blood with the "Lake" group of poets. He went to school for a time at Stony Stratford, and afterwards to the College School at Stratford-on-Avon, under Dr. Collis; afterwards to the Peterborough Grammar School. He went up to Cambridge, but almost immediately joined the dramatic company of his cousin Mr. Frank Benson. With this company he travelled for six years in all parts of the country, and also played at the Globe Theatre in London under the same management. Among parts played by him at different times were Iago, the Ghost in "Hamlet," Prospero in "The Tempest," Brutus in "Julius Cæsar," Sir Andrew Aguecheek in "Twelfth-Night," and Flute in the "Midsummer Night's Dream." In the part of the Ghost he made a considerable success in London, being called before the curtain, a fact he believes unprecedented. Some little while before this he contributed his first poems to the little volume "Primavera." The other contributors were Laurence Binyon (q.v.), Manmohan Ghose, and Arthur Cripps. Leaving the stage, he became a Lecturer on English History in Messrs. Wolffham and Needham's classes for army candidates, and remained with them for six years. During this time he published a long poem, "Eremus," which, owing greatly to the manner of publication, fell somewhat flat, though securing high praise from John Addington Symonds, Professor Jowett, and Mr. Stopford Brooke. When Mr. Elkin Mathews' Shilling Garland series appeared, he contributed the poem "Christ in Hades," with some lyrics, which immediately attracted attention, and is now in a seventh edition. Turning his attention now to modern life as a vehicle for poetry, he contributed "The Woman with the Dead Soul" to the *Spectator*, though part of it had appeared in the *Sun*. In the closing days of the year 1897 he published, through Mr. John Lane, the volume of "Poems," which was crowned by the *Academy* as the best book of the year, with the first prize of 100 guineas, Mr. Henley's "Burns" securing the second. This book immediately ran through four editions, and has had a very large sale in America. Shortly afterwards he was commissioned by Mr. George Alexander to

write a verse tragedy for the St. James' Theatre, and he chose the subject of Paolo and Francesca. In this play it is his object to try and bring English tragedy back rather to the severer and simpler model of the Greeks, than to the luxuriance of the Elizabethan drama. His next book will contain a somewhat long poem dealing with the question of the after-life, a subject now agitating so many minds. Mr. Phillips, in the earlier part of 1898, gave a series of public readings from the older and modern poets and from his own works. Address: Woodthorpe Road, Ashford, Middlesex.

PHILLPOTTS, James Surtees, Headmaster of Bedford Grammar School, is the third son of the Rev. William John Phillpotts, of Hallow, Worcester, and was born in 1840. He was educated at Winchester and at New College, Oxford, where he obtained a first class in Classical Moderations and Lit. Hum., and won the Stanhope Prize Essay in 1859 (B.C.L., M.A.). He was Fellow of his College from 1858 to 1869. He was an Assistant-Master at Rugby from 1862 to 1874, and was appointed to his present post in 1875. He has published "King and Commonwealth," has edited selections from Xenophon, and, with Mr. Edward E. Morris and Mr. C. Colbeck, has edited the well-known Epochs of Modern History series for the Longmans. Address: School House, Bedford, &c.

PHIPPS, Edmund Constantine Henry, C.B., Minister Plenipotentiary in Brazil, was born March 15, 1840, and entered the Diplomatic Service in 1858, having been educated at Harrow. After having filled several minor appointments, he became Consul-General at Budapest in 1881; Secretary at Vienna, 1895, and Paris, 1892; and in 1893 was a British Delegate on the West African Commission. In the next year he was appointed to his present post. He married Maria, daughter of H. M. Mundy, of Shipley, Derbyshire. Address: British Legation, Rio de Janeiro.

PIATTI, Alfredo, violoncellist, was born at Bergamo in 1822, and studied at the Milan Conservatoire under his uncle Zanetti, and Merighi. He made his first appearance in London in 1844, when he played before the Philharmonic Society. Since 1846 he has settled in London, and has chiefly played at the Saturday and Monday Popular Concerts. He is likewise a composer, and has written a violoncello obbligato to several songs, besides a concertino and two or three concertos.

PICK, Thomas Pickering, F.R.C.S., received his medical education at St. George's Hospital, where he is now Senior Surgeon. He has been Vice-President and member of the Court of Examiners of the Royal College of Surgeons of England, and in July 1898 was again re-elected Vice-President. He has been Hunterian Professor of the Royal College of Surgeons, and delivered the Bradshaw Lecture in December 1898, his subject being "The Healing of Wounds." He is a Fellow of the Roy. Med. Chir. Soc. and Inspector of Anatomy for England and Wales. He is editor of "Gray's Anatomy" and of Holmes's "Surgery," and has contributed to the St. George's Hospital Reports, and to the leading medical journals. Address: 18 Portman Street, Portman Square, W.

PICKARD, Benjamin, M.P., is the eldest son of a miner, and was born at Kippox, near Leeds, on Feb. 28, 1842. He received a short schooling at the local Grammar School, and began to work in the pit at the tender age of twelve. At an early period of his career he became known as a labour agitator, has been successively Assistant-Secretary and Secretary of the West Yorkshire Miners' Association, a post which he still holds, and is now President of the Miners' Federation of Great Britain. Since 1885 he has been Liberal member for the Normanton Division of Yorkshire, and in Parliament has been an active promoter of the Eight Hours Movement as applied to Mines, and the Employers' Liability, Truck, and Mines Acts. He was a member of the Trades Congress Parliamentary Committee during a year, has attended nearly twenty congresses of trades-unions, and has organised six international congresses of miners. He is also a worker in the cause of the Peace Society and the Lord's Rest-Day Association. Among other works he has written the "Miners' Annual Report" during sixteen years. Address: 2 Huddersfield Road, Barnsley.

PICKARD-CAMBRIDGE, The Rev. Octavius, M.A., F.R.S., was born at Bloxworth Rectory, Dorsetshire, on Nov. 3, 1828, and is the fifth son of the late Rev. George Pickard, Rector of Warmwell, and of Bloxworth (who, with his children, assumed, in 1847, the additional surname of Cambridge under the will of his first-cousin, Charles Owen Cambridge, Esq., of Whitminster, co. Gloucester), and Frances Amelia, his wife, daughter of the late Martin Whish, Esq., Commissioner of Excise. He was educated as private pupil of the late Rev. William Barnes, B.D. (the Dorset Poet), Dorchester, 1844-45; was Student in the Middle Temple, London,

1849-52; was at University College, Durham, 1855-58; Licentiate in Theology, 1857; B.A. 1858, M.A. 1859; ordained Deacon, 1858, and Priest, 1859. He was Curate of Scarisbrick, Lancashire, 1858-60; Curate of Bloxworth and Winterbourne Tomson, Dorsetshire, 1860-68; Rector of Bloxworth and Winterbourne Tomson, 1868; Diocesan Inspector of Schools, in Religious Knowledge, for the second portion of the Rural Deanery of Whitchurch, 1879-82; elected Clerical Member of the Diocesan Synod of Salisbury, 1870-89; Chaplain to the High Sheriff of Dorset, 1889; elected Fellow of the Royal Society, 1887; is Corresponding Member of the Zoological Society of London; formerly Member of the Entomological Society of London; is Honorary Member of the New Zealand Institute; Honorary Member of the Trinity Historical Society, Dallas, Texas; Vice-President and Treasurer of the Dorset Natural History and Antiquarian Field Club; Honorary Member of the Hampshire Field Club; and Honorary Member of the Arts Society. He is the author of numerous papers on Natural History in the proceedings of various learned societies, and of the following works: "Spiders of Dorset," 2 vols., 1879-81; "Araneidea," in "Scientific Results of the Second Yarkand Mission," published by order of the Government of India, 1885; "Arachnida of Kerguelen Island," published in Report of the Transit of Venus Expedition—Zoology, 1877; article "Arachnida" in "Encyclopædia Britannica," ninth ed., 1875, p. 271; and "Arachnida, Araneidea" in "Biologia Centrali-Americana," edited by F. D. Godman and Osbert Salvin (still in course of publication). He married, in 1866, Rose, daughter of the Rev. James Lloyd Wallace, of Sevenoaks, Kent. Address: Bloxworth, Wareham, Dorset.

PICKERING, Professor Edward Charles, American astronomer, was born at Boston, Massachusetts, July 19, 1846. He graduated in Civil Engineering at the Lawrence Scientific School, Harvard, in 1865, and in 1866 was appointed Assistant-Instructor of Physics at the Massachusetts Institute of Technology, of which he held the full Professorship from 1868 to 1877. During that period he made many researches in physics, particularly investigating the polarisation of light and the laws of its reflection and dispersion. He also described a new form of spectrum telescope, and invented (1870) a telephone receiver. In 1870 he had charge of the polariscope in the United States Coast Survey Expedition sent to Spain to observe the total eclipse of the sun, he having previously been a member of the

party sent to Iowa by the United States Nautical Almanac Office to witness that of 1869. Since 1876 he has been Professor of Astronomy and Geodesy, and Director of the Observatory at Harvard University, which, under his management, has become one of the foremost observatories in America. He has been principally engaged there in determining the relative brightness of stars by means of a Meridian Photometer, and he has prepared catalogues giving the relative brightness of 4000, 20,000, 8000, and 6000 stars respectively. He has also made photometric measurements of Jupiter's Satellites while they were undergoing eclipse, and of the Satellites of Mars, and of other very faint objects. Later his work has related largely to the photography of the stars and of their spectra, the northern stars being photographed at Cambridge, and the southern stars at an auxiliary station in Peru. Professor Pickering is an Associate of the Royal Astronomical Society of London, and was awarded its Gold Medal in 1886 for photometric researches. In 1873 he became a Member of the National Academy of Sciences, and in 1887 received its Henry Draper Medal for his work on Astronomical Physics. He was elected, in 1876, a Vice-President of the American Association for the Advancement of Science, and in addition belongs to a number of other scientific societies in Europe and the United States. More than twenty volumes of the *Annals of the Observatory* have been issued under his direction. Besides his many papers, which number above a hundred, and his annual reports, he has edited, with notes, "The Theory of Colour in its relation to Art and Art Industry," by Dr. Wm. von Bezold, 1876; and is the author of "Elements of Physical Manipulation," 2 parts, 1873-76.

PICKERING, Percival Spencer Umfreville, M.A., F.R.S., born March 6, 1858, at 6 Upper Grosvenor Street, London, W., is the son of Percival Andree Pickering, Q.C. (Bencher of the Inner Temple, Judge of the Passage Court at Liverpool, and at one time Attorney-General for the County Palatine), and of (formerly) Miss Spencer Stanhope, grand-daughter of Coke of Norfolk, first Earl of Leicester. He was educated at Eton, from which he obtained, in 1875, an Exhibition in Science at Balliol College, Oxford, converted, in 1876, into a Brackenbury Scholarship, the first Science Scholarship ever obtained from Eton. In 1880 he took first-class Honours in Natural Science at Oxford. From January 1881 to July 1883 he was Modern Master at Highgate School, and from October 1881 to April 1889 Lecturer in

Chemistry at Bedford College. His principal works have been published in the *Journal of the Chemical Society*, the *Philosophical Magazine*, the *Chemical News*, and the *Zeit. für Physikal. Chemie*. The following are the titles of some of his works: "Action of Sulphuric Acid on Copper," 1888; "Action of Hydrochloric Acid on Manganese Dioxide," 1879; "The Constitution of Molecular Compounds," 1883; "The Molecular Weights of Solids and Liquids," 1885; "Modifications of Double Sulphates," "On Delicate Calorimetric Thermometers," "Water of Crystallisation," "The Nature of Solution," 1886; "The Influence of Temperature on the Heat of Dissolution of Salts," "Delicate Thermometers," "The Thermal Phenomena of Neutralisation, and their Bearing on the Nature of Solution, and on the Theory of Residual Affinity," 1887; "Thermochemical Constants," "The Heat of Dissolution of Substances in Different Liquids, and its Bearing on the Explanation of the Heat of Neutralisation and on the Theory of Residual Affinity," "The Principles of Thermochemistry," 1888; "The Neutralisation of Sulphuric Acid," 1889; "A New Form of Mixing Calorimeter," "The Nature of Solutions as Elucidated by a Study of the Densities, Electric Conductivities, Heat of Dissolution and Expansion by Heat of Sulphuric Acid Solutions," "The Nature of Solutions as Elucidated by the Freezing-Points of Sulphuric Acid Solutions," "Law of the Freezing-Points of Solutions," "The Supposed Hydrates of Ethyl Alcohol," "The Expansion of Water and other Liquids," "Determinations of the Heat Capacity and Heat of Fusion of some Substances," 1890; "The Cryoscopic Behaviour of Cane-Sugar Solutions," "The Theory of Residual Chemical Affinity as an Explanation of the Physical Nature of Solutions," 1891; "The Recognition of Changes of Curvature by means of a Flexible Lath," "The Cryoscopic Behaviour of Weak Solutions," "The Heat of Dissolution of Gases in Liquids," 1892; "Some Experiments of the Diffusion of Substances in Solution," "Some Compounds of the Alkylamines and Ammonia with Water," "The Hydrates of Hydrochloric Acid," "Isolation of two predicted Hydrates of Nitric Acid," "The Hydrates of Sodium, Potassium, and Lithium Hydroxides," "The Hydrates of Hydrobromic Acid," "Study of some Properties of Strong Solutions," "Note on the Stereochemistry of Nitrogen Compounds," "The Hydrates of Hydriodic Acid," 1893; "The Densities of Solutions of Soda and Potash," "Examination of the Properties of Calcium Chloride Solutions," 1894. Mr. Pickering was elected to the Chemical

Society in 1878, the Physical Society in 1886, the Institute of Chemistry in 1888, and the Royal Society in 1890. Investigations on the thermal changes accompanying the hydrolysis of starch, the invention of cane-sugar, and other allied reactions have subsequently been published by Mr. Pickering and Mr. Horace Brown, F.R.S. In 1894 Mr. Pickering initiated, in conjunction with the Duke of Bedford, an experimental horticultural station at Ridgmont, Beds., known as the Woburn Experimental Fruit Farm, and of this station Mr. Pickering acts as director. The first report on the results obtained there was published in 1897. Address: The Woburn Fruit Farm, Ridgmont, Beds.

PICKERSGILL, Edward Hare, M.P., Gladstonian Liberal, was born in 1850, is the son of the late Mr. Thomas Pickersgill, architect, of York, and was educated at York Grammar School, and graduated B.A. at London University in 1872. He was called to the Bar at the Inner Temple in 1884, and was from 1868 to 1885 a Civil Servant in the G.P.O. Savings Bank Department. Since 1885 he has sat in Parliament for Bethnal Green, South-West. Address: 238 Amherst Road, Hackney.

PICKERSGILL, Frederick Richard, Hon. R.A., nephew of the late Henry William Pickersgill, R.A., born in London in 1820, studied at the Royal Academy. His first production, "The Combat between Hercules and Achelous," an oil painting, exhibited in 1840, was followed by a prize cartoon of "The Death of King Lear," exhibited in Westminster Hall in 1843; and "The Burial of Harold," a picture for which he received a first-class prize in 1847, and which was immediately purchased for the new Houses of Parliament. Mr. Pickersgill was for many years a regular exhibitor. In 1847 he was elected A.R.A., and in 1857 was promoted to the rank of Academician. He was Keeper of the Royal Academy from 1873 to 1887, and retired a few years ago. Permanent address: The Towers, Yarmouth, Isle of Wight.

PICQUART, Colonel Georges, was born at Strasbourg in 1854, and is a descendant of an old Lorraine family long settled in Alsace. From 1872 to 1874 he studied at St. Cyr, and in the latter year entered the Staff College, leaving it in 1876 with a brilliant record. He served for a short time in Algeria with the Zouaves, and afterwards joined the infantry, being gazetted Captain in 1880. In 1883 he was appointed to the War Office Staff, and in 1885 served in Tong-

king, where he gained the *Médaille militaire*. He returned to France in 1888, and was promoted to be major. In 1890 he obtained the post of Professor at the Military School, filling the position with much distinction. He rejoined the War Office in 1893, and two years later (1895) succeeded the late Colonel Sandherr as head of the Intelligence Department. He was promoted to the rank of Lieutenant-Colonel in 1896, having previously, from 1890 to 1895, served on General de Gallifet's staff. At the beginning of May 1896 the fragments of a telegram-card ("petit bleu") fell into his hands, as head of the military police, which proved that Commandant Esterhazy was on suspicious terms of intimacy with the writer. This led Colonel Picquart to inquire into Esterhazy's life, and his suspicions deepened, and he was forced to the conclusion that the famous *bordereau* or memorandum had been in reality written by Esterhazy, and not by Dreyfus. At first these discoveries were favoured by his chiefs, Generals de Boisdeffre and Gonse, but when they saw that a revision of the Dreyfus court-martial would expose the illegal manner in which the condemnation of the prisoner had been secured, he was relieved of his duties as head of the Intelligence Department of the War Office, and sent on a mission all over France on Nov. 16, 1896; and in January 1897 he was sent to Tunis. He was sent without an escort to a dangerous part of the Tripolitan frontier, where the Marquis de Morès had been killed by the natives some time previously. In May 1897 the War Office officials decided to accuse him of having forged the "petit bleu." At that time he was attached to an Algerian cavalry regiment as colonel, and in June he came to Paris and consulted Maître Leblois, an old friend of his family, as to the accusations of the War Office. The lawyer told Picquart's tale to M. Scheurer-Kestner, Vice-President of the Senate, who commenced the agitation for a revision of the Dreyfus trial, which is still dividing France into two opposite camps. In November 1897 he was recalled suddenly from Algeria, and was examined by General de Pellieux, who endeavoured to prove that the Colonel had forged the "petit bleu" incriminating Esterhazy. He was questioned *in camera* at the Esterhazy bogus court-martial in January 1898, when the Count was acquitted of high treason, and on the day of his acquittal Colonel Picquart was arrested by the military authorities, on the frivolous charge of having communicated to Maître Leblois, his counsel, documents concerning the national defence. The Minister of War did not fix his

penalty until after the Zola trial of February 1898, at which Colonel Picquart was the chief witness against the War Office. In consequence of his outspokenness, he was expelled from the French army. After M. Cavaignac's speech of July 7, 1898, Picquart wrote an open letter to the Premier, M. Brisson, offering to prove that two of the incriminating letters in the so-called secret *dossier* could not refer to Dreyfus, and that the one that named him was a forgery. On July 13 he was re-arrested on the old charge of communicating documents, for which he had already been expelled from the army. However, on August 30, Colonel Henry confessed to the forgery of the third letter, and Picquart's words were justified. On September 20 he was brought up for trial by the civil authorities, but General Zurlinden, the Military Governor of Paris, claimed him as a military prisoner for having forged the "petit bleu," and the civil trial was postponed *sine die*. It was on this occasion that, after an impassioned appeal for justice from his counsel, Maître Labori (*q.v.*), who had replaced the disgraced Leblois, he made the famous remark that if he were found dead with the razor of Henry or the rope of Lemer cier-Picard by his side, the world might know it was a case of murder and not of suicide, as he had no intention of taking his life. He was transferred from the civil prison of La Santé to the military prison of Cherche-Midi, and for some months was kept *au secret*, and allowed to see no one. But when the Dreyfus revision was undertaken by the Court of Cassation he was allowed to consult Labori. He was brought to the Palais de Justice, and allowed to have some slight refreshment during his lengthy evidence, which led to the dramatic resignation of M. Quesnay de Beaupaire (*q.v.*). He was for long immured in Cherche-Midi, there being a deadlock between the military and civil authorities as to who should release him, until liberated in June 1899, when it had been decided to bring Dreyfus back for a second trial.

PIEROLA, General Nicholas de, President of Peru, was born at Cumana, Peru, Jan. 5, 1859. He was educated at the College of Santo Torobio, in Lima, was admitted to the Bar in 1860, and founded a review, *El Progreso Católico*. In 1864 he became editor of *El Tiempo*, and subsequently, at the success of Prado's revolution, he travelled in Europe, but in 1869 was appointed Minister of Finance by President Balta. At the end of his administration he was impeached for misappropriation of public funds, owing to the ruinous loans contracted to perform

great public works, and although acquitted went into exile in the United States. In 1874 and 1877 he organised expeditions against the Peruvian Government, but was unsuccessful. The second time he surrendered, and was banished to Chili. At the outbreak of the Chilian war he proffered his services to General Prado, then President of Peru, but they were not accepted. In 1879, however, he was allowed to return to Lima. After General Prado went away General Pierola assumed the charge of affairs, and continued the fighting. In January 1881 he abandoned Lima, and in the following November resigned the Provisional Presidency (to which he had been elected in July of that year), as Chili refused to treat with him. In 1882 he visited Europe and the United States, and has since resided in Peru. He was a candidate for President in 1890, but failed to secure the election. For attempting to excite a riot in Lima in connection with that election he was, in April 1890, imprisoned by the Peruvian Government. In 1895 he was re-elected President, which office he still holds. He married a granddaughter of the Emperor Iturbide.

PIGOU, The Very Rev. Francis, D.D., Dean of Bristol, was born at Baden-Baden, in Germany, in the year 1831. His father was an officer in the Queen's Bays, and his mother was the daughter of the Rev. G. Smith, for many years rector of Marston, in Yorkshire. His earliest education was received at Neuwied, on the Rhine; afterwards he was at the Grammar School at Ripon, and at Cheltenham College. On leaving Cheltenham he was placed at the Edinburgh Academy, where he was under the late Archdeacon Williams, and the Rev. Dr. Hannab. From Edinburgh his next step was to Trinity College, Dublin, where he passed through the Divinity course, and took his degree in 1853. In the year 1855 he was ordained Deacon by the late Bishop Wilberforce, at Cuddesdon, and became Curate of Stoke Talmage, in Oxfordshire. Shortly after he had taken Priest's orders in 1856, he was offered and accepted the Chaplaincy of the Marbœuf Chapel in Paris, and he ministered there for three years. He subsequently accepted the Curacy of Vere Street Chapel, London. Very shortly afterwards he accepted a Curacy at Kensington Parish Church, under Archdeacon Sinclair. Two years later, on the death of Canon Repton in 1860, he was presented by Mr. Kempe, Rector of St. James's, Piccadilly, to the Incumbency of St. Philip's, Regent Street. There he continued for the period of eleven years; and then, upon Dr.

Vaughan accepting the Mastership of the Temple in 1869, he was presented to the important Vicarage of Doncaster, by the late Archbishop of York, who, when in town, had been one of his congregation. The character of his labours, as Vicar and Rural Dean of Doncaster, was so apparent, that, when the still more important Vicarage of Halifax became vacant by the death of Archdeacon Musgrave in 1875, he was selected by the Crown to fill the post. The income of the Vicarage of Halifax is £2000 a year, and there are no fewer than thirty-two livings in the gift of the Vicar, whose position is thus semi-episcopal. He is also the Rural Dean of Halifax. During the last four years of his ministry there, the Vicar's rate question was settled, £13,000 having been raised by the churchmen of the parish to redeem it, thus securing to the Church what was at one time seriously threatened. When this was accomplished Dr. Pigou next set to work to get the parish church restored. He found it in a dilapidated condition, and, seconded by Sir Henry Edwards, Bart., he raised £20,000; so that now the Halifax parish church is one of the finest in the kingdom. In 1888 Dr. Pigou was appointed to the Deanery of Chichester, where he remained till 1891, when he became Dean of Bristol. At Bristol he has recently been intent on the restoration of the Cathedral, after plans by the late Mr. Pearse, and at a cost of about £15,000. In the year 1871 Dr. Pigou was appointed Honorary Chaplain to the Queen; and in 1874 Chaplain-in-Ordinary. In 1878 his University conferred on him the two degrees of B.D. and D.D., a rare distinction. He has published a small volume of "Addresses at Holy Communion," "A Manual of Confirmation," "Faith and Practice" (a volume of sermons), "Two Sermons Preached before the Queen, on Unostentatious Piety and Private Prayer," and various addresses. Address: The Deanery, Bristol.

PILLSBURY, H. N., American chess-player, was born at Somerville, near Boston, Mass., in December 1872. His first knowledge of the game with which his name has become associated was obtained in 1891 in Boston, and such was the rapidity with which he mastered its intricacies that within two years from his first move he was rated a first-class player at the Boston Chess Club, where he constantly attended. In the winter of 1892-93 he met Mr. Nalbrodt, and won from him in brilliant style. His first attempt at tournament play was at the Columbian Chess Congress held in New York in 1893, and although he was not among the prize-winners he established a reputation for

rare originality. In the meantime he had removed to Brooklyn, N.Y., which has since been his home. In 1895 he won first place in the tournament at Hastings (England), where he met all the great chess-masters of the world. In the tourney at Vienna, in 1898, he tied the score with Tarrasch, but in the deciding game he lost, and so took second place.

PINERO, Arthur Wing, born in London on May 24, 1855, is the son of John Daniel Pinero, a solicitor, and was educated with the view of following his father's profession. Having no particular liking for the law, however, he ultimately prepared for the stage, and made his début at Edinburgh in June 1874. The following year he joined the Lyceum company, and played Claudius to Mr. Irving during his first "Hamlet" tour at all the principal theatres in the United Kingdom. Subsequently Mr. Pinero played Lord Stanley in the Lyceum revival of "Richard III.," the Marquis of Huntly in "Charles I.," and Alderman Jorgens in "Vanderdecken." He is the author of several very successful plays, among which are "£200 a Year," 1877; "The Money-Spinner," 1880; and "The Squire," 1881; "Lords and Commons" and "The Rocket," 1883; "Low Water," 1884; "The Magistrate," 1885; "The Schoolmistress," "The Hobby-Horse," 1886; "Sweet Lavender," 1888; "The Profligate," 1889; "In Chancery," "Lady Bountiful," "The Times," and "The Second Mrs. Tanqueray." The last play, which in the opinion of many is his best, was produced at the St. James's in May 1893. "The Notorious Mrs. Ebbsmith" came next, being produced at the Garrick on March 13, 1895. This was followed by "The Benefit of the Doubt," at the Comedy, in October 1895, and "The Princess and the Butterfly," at the St. James's, in March 1897. His latest play, "Trelawny of the 'Wells,'" was acted for the first time at the Court on Jan. 20, 1898. Address: 63 Hamilton Terrace, N.W.

PINTO, Alexandre Alberto da Rocha Serpa, was born April 30, 1846, at the Tendaes in the province of Douro, Portugal, and educated at the Royal Military College, Lisbon. He entered the 7th Infantry Regiment, Aug. 13, 1863; became Ensign, July 14, 1864; Lieutenant in the 12th Rifles, Nov. 20, 1868; Captain, Oct. 10, 1874; Major, April 17, 1877; and Aide-de-Camp of the King of Portugal, March 10, 1880. In 1869 he was in the Zambesi war, and in the battle of Nov. 23 at Massangano he succeeded in saving the regiment of India. He was then in command of the African native troops.

During 1877-79 he crossed Africa from Benguela to Durban, and he has admirably described the journey in a work entitled "How I Crossed Africa" (Lond. 1881). These geographical tasks obtained for him the Gold Medals (first class) of the Geographical Societies of London, Paris, Antwerp, Rome, and Marseilles. He was also elected a Fellow of all the most important geographical societies in the world, and of many scientific associations. Major Serpa Pinto is a Knight Commander of the Order of St. James of Portugal, a Knight of the Legion of Honour, and of Leopold of Belgium, and has received many other foreign Orders.

PIRBRIGHT, Lord, The Right Hon. Baron Henry de Worms, late M.P. for East Toxteth Division of Liverpool, F.R.S., J.P. for Surrey, and J.P. and D.L. for Middlesex County of London and Westminster, Commissioner for the Patriotic Fund, third son of the late Baron de Worms, Hereditary Baron of the Austrian Empire, of Park Crescent, W., and Henrietta, daughter of Samuel Moses Samuel, was born in London, Oct. 20, 1840, and educated in Paris and at King's College, London, of which he is a Fellow. He was called to the Bar at the Inner Temple in June 1863, and practised as a barrister for about three years. In 1880 he became Member for Greenwich, and from that time he took an active part in the debates in the House, especially those relating to foreign affairs. He directed attention to the then imperfect administration of the Royal Patriotic Fund, and made certain recommendations which were afterwards embodied in an Act of Parliament. Mr. Gladstone, in acknowledgment of the services thus rendered, made the Baron a Royal Commissioner of the Patriotic Fund. At the general election of 1885, consequent upon alterations caused by the Redistribution Bill, he withdrew from Greenwich, and successfully contested East Toxteth, for which constituency he was returned unopposed in 1886, and was again elected in 1892. In two of Lord Salisbury's Governments he has held the office of Parliamentary Secretary to the Board of Trade. He was appointed Under-Secretary of State for the Colonies in January 1888 (to 1892); President of the International Conference on Sugar Bounties in 1887-88; and British Plenipotentiary, in which capacity he signed the Treaty on behalf of Great Britain for the abolition of the Bounties. In January 1889 he became a Member of the Privy Council, and in the same year was elected a Fellow of the Royal Society. He is the author of "The Earth and its Mechanism,"

"England's Policy in the East," and "The Austro-Hungarian Empire," the latter being an exposition of Count Beust's policy, and edited the "Memoirs of Count Beust," to which he wrote the preface. He married (2), in 1887, Sarah, daughter of Sir Benjamin Samuel Phillips. He was created a Peer under the title of Lord Pirbright in 1895. Addresses: 42 Grosvenor Place, S.W.; and Henley Park, Guildford.

PITMAN, Mrs. E. R., writer of works of fiction, biography, and missionary information, was born, in 1841, at Milborne Port, Somersetshire. While in her teens she gained several prizes for essays on various subjects, and became a contributor to the *Sunday at Home*, *Old Jonathan*, and other periodicals. When about seventeen years of age she planned and wrote her first book, entitled "The Power of Little Things." For several years after this she was known as a contributor to religious, temperance, and Sunday-school journals; but during recent years her works have been mainly issued in volumes. Of these, her principal productions are "Vestina's Martyrdom; a Story of the Catacombs," 1869; "Earnest Christianity," 1872; "Margaret Mervyn's Cross," 1878; "Profit and Loss," 1879; "Heroines of the Mission Field," 1880; "Mission Life in Greece and Palestine," 1881; "Garnered Sheaves," "Florence Godfrey's Faith," "Life's Daily Ministry," and "My Governess Life," 1882; "Central Africa, Japan, and Fiji," 1883; "Elizabeth Fry" (Eminent Women Series), 1884; "George Müller and Andrew Reed" (World's Workers Series), 1885; "Lady Missionaries in Foreign Lands," 1889; "Lady Hymn Writers," 1891; "Oliver Chauncey's Trust," 1892; and "Missionary Heroines in Foreign Lands," 1895. In 1866 she was married to Mr. Edwin Pitman, and of the four children born of the marriage three are in H.M.'s Civil Service.

PITT-LEWIS, George, Q.C., Recorder of Poole, is the son of the late Rev. George T. Lewis, formerly Head-Master of Honiton Grammar School, and was born on Dec. 13, 1845. He was educated privately, and entered as a student at the Middle Temple in 1868, where he obtained a certificate of honour, first class, in 1869, an "Inns of Court" studentship in the same year, and was called to the Bar in the following year. He is on the Western Circuit, and was appointed Recorder of Poole, and a Q.C., in 1885. He sat in the House of Commons as Liberal Member for N.W. Devonshire from 1885 to 1886, and as Member for the same constituency in the Liberal-Unionist interest from 1886 to 1892.

Mr. Pitt-Lewis is the author of "A Complete County Court Practice"; is the editor of "Taylor on Evidence" (9th edit.), 1895; and has published also "The Insane and the Law," 1897; "The Yearly County Court Practice," 1896; "The Coal Mines Regulation Acts," 1877-96. Address: 4 Paper Buildings, Temple, E.C.

PITT-RIVERS, Lieut.-Gen. Augustus Henry Lane-Fox, F.R.S., J.P., D.C.L., F.S.A., was born in 1820, and is the sole surviving son of W. A. Lane-Fox, of Hope Hall, and a daughter of the 18th Earl of Morton. He was educated at the R.M.A., Sandhurst, and became an officer in the Grenadier Guards, and was afterwards on the staff. He served in the Crimea, and was at Alma and Sebastopol, being mentioned in despatches, *London Gazette* of Oct. 10, 1854, and obtaining a medal with two clasps, the Turkish medal, and brevet of major. Since 1893 he has been Colonel of the South Lancashire Regiment. He is Vice-President of the Society of Antiquaries, and President of the Anthropological Institute, and it is as an anthropologist that he will be remembered by posterity. The magnificent Pitt-Rivers collection, illustrative of savage life and embryo civilisation, has been presented to the New Museum at Oxford, and is to it very much what the original Hunterian collections are to the Museum of the Roy. Coll. of Surgeons, Eng. The manner of its formation was described by Lieut.-General Pitt-Rivers, then Col. Lane-Fox, as long ago as 1874-75, at a time when it was being exhibited in the Bethnal Green Museum. Since the year 1852 he had been in the habit of selecting from among the commoner class of objects relating to savage life which reached England, those which appeared to show connection of form. Connection of form is therefore the guiding principle of the collection, which serves to illustrate the development of specific ideas and their transmission from one people to another. In 1880 the subject of our memoir inherited the Rivers estates, in accordance with the will of his great-uncle, the second Lord Rivers. The will was excessively binding, and provided *inter alia* that he should assume the name and arms of Pitt-Rivers within a year of his inheriting the property. The Rivers estates are, indeed, unique, having been forest-land, swarmed over by an immense herd of fallow-deer, until the present century. They lie in that part of Wiltshire, near Dorsetshire, where the Romano-British bordered for some time on the territories of the conquering West Saxons, and having been protected by the deer from the inroads of cultivation for many centuries, afford a field of operations for

the excavator hardly to be equalled in any other part of Western Europe. Lieut.-General Pitt-Rivers has conducted extensive excavations in the burrows, &c., on his estates round Rushmore, and has published the results in four sumptuously printed and illustrated volumes, of which the last appeared in December 1898. They are cited by the general title of "Rushmore Excavations." He has published much in the *British Association Reports*, and in the *Journal of the Anthropological Institute*, on the affinities of weapons, on excavations, &c. He married, in 1853, Alice, daughter of the 2nd Lord Stanley of Alderley, and in 1880 assumed the name of Pitt-Rivers, under the will of his great-uncle, the 2nd Baron Rivers. Addresses: 4 Grosvenor Gardens, S.W.; Rushmore, Salisbury; and Athenæum.

PLANÇON, Pol, basso singer of grand opera, was born in the Ardennes in 1855. His parents were fond of music, but only as a recreation, and it was decided that he should follow a commercial career, and he was sent to Paris in 1871. He chanced to meet Theodore Ritter, who induced him to devote his time to music, and introduced him to the famous tenor Dupré, under whose guidance he worked for two years. He started his musical career at Lyons, in the rôle of Count St. Bris in "The Huguenots." There he remained for two years, when he returned to Paris, and sang for Samoureaux. In 1883 he was engaged at a grand opera to sing Mephistopheles, in which he scored an immediate success, and he has been constantly heard in that part since. In 1893 he went to America, and on returning was engaged by Sir Augustus Harris to sing at Covent Garden, where he has been a regular performer ever since. His chief parts are: Francis I. in Saint-Saëns' "Ascanio," Don Gormaz in Massenet's "Cid," Pittacus in Gounod's "Sappho," the Landgrave in "Tannhäuser," Pogner in "Die Meistersinger," Brother Lawrence in "Romeo and Juliet," Jupiter in "Philemon and Baucis," and the General in "La Navarraise." Paris address: 16 Rue de Marignan.

PLANQUETTE, Robert, a musician, was born in Paris, July 21, 1850, and educated at the Conservatoire there, where he was a pupil of Duprato. He is the composer of the popular operetta "Les Cloches de Corneville," which was played at the Folies Dramatiques in 1877, and had immense success in France and in England. In 1882 he produced "Rip Van Winkle"; in 1887, "The Old Guard"; and in 1889, "Paul Jones." One of his last productions in France was "Le Talisman," which was produced at the Gaité in January

1893. He has also published a volume of military songs under the title of "Refrains du Régiment." In 1897 his "Mamzelle-Quat-Sous" was produced at the Gaité. Paris address: 11 Rue de Calais.

PLAYFAIR, William Smoult, M.D., LL.D., F.R.C.P., F.R.C.S.E., is a younger son of the late George Playfair, Esq., Inspector-General of Hospitals, Bengal, and a brother of Lord Playfair, G.C.B., and of Sir Lambert Playfair, K.C.M.G. Dr. Playfair was born in 1836, and was educated at St. Andrews and Edinburgh, and took the degree of M.D. at the latter University in 1856. He then entered the Bengal Medical Service, and served in Oude during the Mutiny, and also officiated as Professor of Surgery in the Medical College at Calcutta. Having to leave India on account of ill-health, he commenced practice in London as an obstetric physician in 1863, and was attached to King's College Hospital. For twenty-five years he was Professor of Obstetric Medicine in King's College, from which office he retired early in 1898, and is now Emeritus Professor and Consulting Physician to King's College Hospital. He is also Consulting Physician to the General Lying-in Hospital, and to the Evelina Hospital for Children. Dr. Playfair is the author of many works and papers on subjects connected with gynaecology and obstetrics, chiefly a "Treatise on the Science and Practice of Midwifery," which has passed through nine editions, and has been translated into many foreign languages; a book on "Nerve Prostration and Hysteria"; and a "System of Gynaecology, by many Authors," edited conjointly with Professor Clifford Allbutt. He is a Fellow of the Royal College of Physicians of London, and of the Royal College of Surgeons of Edinburgh, and an honorary LL.D. of St. Andrews. He has also been President of the Obstetrical Society of London, and Examiner in Midwifery to the Universities of Cambridge and London. Dr. Playfair is Physician-Accoucheur to the Duchess of Saxe-Coburg and Gotha (Duchess of Edinburgh), the Duchess of Connaught, and the Crown-Princess of Roumania. From the King of Roumania he has received the insignia of a Grand Officer of the Crown of Roumania. He married, in 1864, Emily, daughter of James Kitson, Esq., Elmet Hall, Leeds, by whom he has one son and three daughters. Addresses: 38 Grosvenor Street; Hook House, Winchfield, Hants; and Athenæum.

PLOWDEN, Alfred Chichele, eldest son of Trevor Chichele Plowden, B.C.S., was born at Meerut, India, on Oct. 21, 1844. He was educated at Westminster,

and Brasenose College, Oxford, where he graduated B.A. in 1865. After serving as Private Secretary to Sir John Peter Grant, K.C.B., Governor of Jamaica from 1866 to 1868, he was called to the Bar at the Middle Temple in January 1870, and went the Oxford Circuit. He was appointed Recorder of Wenlock in 1878; Revising Barrister for Oxfordshire in 1883; and a Metropolitan Police Magistrate in June 1888. In 1883 he married Evelyn, youngest daughter of General Sir Charles Foster, K.C.B. Addresses: Marylebone Police Court; and 31 Brunswick Square, Brighton.

PLOWDEN, Trevor John Chichele, C.S.I., Resident at Haiderabad, was born in 1849, and entered the Bengal Civil Service in 1868. He has held offices as Under-Secretary of Bengal, Inspector-General of Police, and in 1877 was Secretary to the Prisons Conference. In 1879 he was Political Agent in Turkish Arabia, and Consul-General at Baghdad in 1880. He became Commissioner of Ajmir in 1885, and was promoted to his present post in 1893. Address: The Residency, Haiderabad.

PLUMMER, William E., Hon. M.A. Oxford, youngest son of John Plummer, was born at Deptford, in Kent, March 26, 1849, and was privately educated there. Having early developed a taste for astronomy, he entered the Royal Observatory, Greenwich, and there acquired a certain aptitude for the practical details of that science. In 1870 he became attached to Mr. Bishop's observatory at Twickenham, then under the direction of Mr. Hind, the late superintendent of the "Nautical Almanac" office. That observatory was then engaged in the formation of charts of the stars situated near the Ecliptic, to facilitate the discovery of minor planets. In preparation of the charts for hours eight and twenty-three Mr. Plummer took a part, as well as in the observation of comets, and the subsequent determination of their orbits. The establishment of the Oxford University Observatory in 1874 led to Mr. Plummer's appointment as senior assistant to that institution, in which capacity he has taken a considerable share in the photometric and extra-meridional observations carried on in that observatory. Later, when the Oxford Observatory took part in the formation of the astro-photographic chart of the heavens, Mr. Plummer gave much attention to the preliminary arrangements, but took little part in the actual observations, owing to his withdrawal from Oxford. In 1892 he was appointed Astronomer to the Mersey Docks and Harbour Board, and

Director of the Liverpool Observatory. Here he has introduced a method for the systematic observation of earth tremors, carried out under the auspices of the British Association. He has also been appointed Examiner in Astronomy to the University of Edinburgh. Mr. Plummer in 1879 entered the Royal Astronomical Society; in 1888 was elected to a seat on the Council, and in the following year received the honorary degree of M.A. from the University of Oxford. He is a frequent contributor to periodical scientific literature, and has written on "The Motion of the Solar System in Space," "The Sidereal System," and on cometary astronomy generally, besides issuing Annual Reports from his Observatory. Address: Liverpool Observatory, Bidston, Birkenhead.

PLUNKET, Right Hon. D. R. See RATHMORE, LORD.

PLUNKETT, Hon. Sir Francis Richard, G.C.M.G., H.M. Minister at Brussels, was born at Corbalton Hall, co. Meath, in 1835, and is the youngest son of the 9th Earl of Fingal. He accompanied his parents abroad at a very early age. They first lived at Brussels in 1841, and then at Rome, where they met Pope Gregory XVI. and Cardinal Mezzofanti, who spoke to them in ancient Irish. In 1850 he went to Oscott College, and five years later entered the Foreign Office. He commenced his diplomatic career at Naples, and in 1859 became Second Secretary at St. Petersburg. In 1863 he was transferred to Copenhagen, and later to Vienna. In 1870 he married May, daughter of C. W. Morgan, of Philadelphia, at Florence, and in 1873 he became First Secretary at Yeddo, and three years later at Washington. In 1883 he was promoted to be Minister to Japan; in 1888 to Sweden; and in 1893 to his present post. Address: British Legation, Brussels.

PLUNKETT, The Right Hon. Horace Curzon, M.P., D.L., third son of Edward, 16th Baron Dunsany and Anne, daughter of the 2nd Baron Sherborne, born at Sherborne House, Gloucestershire, on Oct. 24, 1854, was educated at Eton and Oxford, and took a B.A. Degree in 1877, obtaining Second Class Honours in the School of Modern History. In 1879 he became a ranchman in Wyoming and Montana, U.S.A., and still retains a business connection with the Western States of America, where he spends a few weeks of every year looking after his affairs. Since 1889 he has spent most of his time in Ireland, where he has been constantly engaged promoting various schemes for

the agricultural and industrial development of the country. In 1891 he was appointed a Commissioner of the newly constituted Congested Districts Board, of which he has since been an active member. Mr. Plunkett was the originator of agricultural co-operation in Ireland. In conjunction with a few friends he first organised several farmers' societies, mostly for the erection of co-operative creameries, in the years 1889 to 1894. In the latter year he founded the Irish Agricultural Organisation Society, of which he has since been president, to take over the work of promoting a movement then becoming too widespread to be controlled by himself and his friends. The programme of this Society, which embraces every branch of farming, and which is the adaptation of analogous movements in other European countries, is rapidly being adopted by the farming classes throughout Ireland. At the General Election of 1892 Mr. Plunkett successfully contested South County Dublin, then represented by Sir Thomas Esmonde. He stood as a Conservative, declaring that his main object in seeking Parliamentary honours was to advocate any measures calculated to advance the economic and social condition of the people, believing as he did that the political question would then be easily solved. He was returned again in 1895 with a greatly increased majority. When the General Election of 1895 had temporarily, at any rate, placed the Home Rule question in a subordinate position, Mr. Plunkett invited representative Irishmen of all parties, more especially those who were most prominent in industrial and commercial undertakings, to form a committee to discuss and report upon the material condition of the country, and measures needed for its improvement. The Recess Committee, thus formed was thoroughly representative of all the industrial and commercial interests of the country, and of all political parties, the main objection to the project and refusal to support it coming from the Nationalist Members of Parliament. The Report of the Recess Committee, which appeared in the summer of 1896, met with general approval, and its main recommendation, the establishment of a Department of Agriculture and Industries for Ireland, was substantially adopted by the Government in 1897, and only postponed to make way for the Local Government policy of 1898. Mr. Plunkett is a Member of the Royal Commission for the Paris Exhibition, 1900. He is a Justice of the Peace for County Meath, Ireland, and a Deputy-Lieutenant for Radnorshire. Mr. Plunkett was sworn a Privy Councillor (Ireland) in 1897. Address: 104 B. Mount Street, W.

POBYEDONOSTSEFF, Constantine, Procurator of the Holy Synod of Russia, was born at Moscow in 1827, and in 1841 entered the Higher Law School of Russia, and in 1846 became an official of the Senate. From 1859 to 1865 he was Professor of Civil Law at Moscow, and was tutor to the Czar Alexander III. In 1868 he was created a Senator, and in 1872 a member of the Imperial Council; while in 1881 he was appointed to his present post. After the accession of Alexander III., his influence naturally increased, and with the late M. Katkoff he became the most intimate adviser of his Imperial master. Opposed to all Liberal reforms, he endeavoured to strengthen the influence of Greek Orthodoxy in the Russian policy. In 1868 he published "*Cours de Droit Civil*," and "*Manuel de la Procédure Civile*." He has also translated "*The Imitation of Christ*," from the Latin of Thomas à Kempis. In the autumn of 1898 a volume of essays from his pen was translated into German, French, and English, and published in England under the title of "*Reflections of a Russian Statesman*." This literary excursion at once showed its author to have lost none of his old intolerance and fanaticism. The general thesis of the work was that since men want to be governed, autocracy is the only real political form. In the writer's opinion, the great mistake of the age has been the practical supersession of the old mediæval ideas. Faith in the unseen being the one thing which preserves morality and keeps men's minds sound and healthy, therefore the Church should be omnipotent, interfering and advising in every concern of life. He declared that "among the falsest of political principles is the principle of the sovereignty of the people, the principle that all power issues from the people. . . . Thence proceeds the theory of parliamentarism, which has up to the present day deluded much of the so-called intelligence, and unhappily infatuated certain foolish Russians. . . . Parliamentarism is the triumph of egoism, its highest expression."

POEL, William. See **POLE, WILLIAM (JUNIOR)**.

POINCARÉ, Jules Henri, Foreign F.R.S. (elected 1894), the son of M. Léon Poincaré, a Professor of the Faculty of Medicine at Nancy, was born at that place on April 29, 1854. He was educated at the Lycée in his native town, entered the Polytechnic School in 1873, and the School of Mines in 1875, becoming a Mining Engineer at Vesoul in 1879. Taking the degree of Doctor of Science in

1879, he held the position of Assistant-Professor in the Faculty of Science at Caen from 1880 to 1881, becoming a lecturer in the Faculty of Science at Paris in 1881, Assistant-Professor of Mechanical Physics in the same faculty in 1885, and Professor of Mathematical Physics in 1886. He has acted as an Examiner at the Polytechnic School from 1883 to 1897. M. Poincaré was elected a member of the Academy of Science on Jan. 31, 1887, and a Foreign Member of the Royal Society of England on May 11, 1894. He is the author of the following papers and works: "Les Fonctions Fuchsienues," *Acta Mathematica*, tome 1, Stockholm; "Les Equations de la Dynamique et le Problème des 3 Corps," *Acta Mathematica*, 13; "Electricité et Optique," Paris, 1889-91; "Les Méthodes Nouvelles de la Mécanique Céleste," Paris, 1890, 1893, 1898. Address: Ecole Polytechnique, Paris.

POIRÉ, Emanuel, whose *nom de plume*, or rather, *nom de crayon*, of "Caran d'Ache" (Russian for lead-pencil) is known wherever art and humour are appreciated, was born at Moscow, and educated at his native town. His grandfather was one of Napoleon's officers, who, during the campaign of Russia, was wounded and taken prisoner. He married and settled in Russia, but his grandson determined to return to France. He became connected with the Cabaret du Chat Noir in the Rue Victor Massé, for which he did a splendid series of Napoleonic "Ombres Chinoises." His "Carnet de Chèques" issued during the Panama Scandal, has become a classic of caricature. Most of his best work has been done for the *Figaro*, and his cartoons are as eagerly looked for as those of Sir John Tenniel in England. His Paris address is 41 Rue de la Faisanderie.

POLAND, Sir Harry Bodkin, Q.C., J.P., D.L., is the fifth son of the late Peter Poland, of London, and was born on July 9, 1829, in London. He was educated at St. Paul's School, and was called to the Bar at the Inner Temple in 1851, becoming a Bencher of his Inn in 1879. He has practised on the South-Eastern Circuit, was for many years Counsel to the Treasury and Home Office, and was in 1874 appointed Recorder of Dover. He is the author of "Law of Trade-marks," and has written various articles on the reform of the law. He became a Q.C. in 1888, and received the honour of knighthood in 1895. Sir Harry Poland is an Alderman of the London County Council, and a Deputy-Lieutenant, and a Justice of the Peace. Address: 5 Paper Buildings, Temple, E.C.

POLE, William, Senior, F.R.S., civil engineer, was born in Birmingham in 1814. After serving an apprenticeship to an engineer in the Midland Counties, he followed the profession in London for some years, and in 1844 he was appointed by the East India Company Professor of Civil Engineering in Elphinstone College, Bombay. In 1847 he returned to London, devoting his chief attention to the mechanical branch of engineering. From 1871 to 1883 he was Consulting Engineer for the Imperial Railways of Japan, and on his retirement the Mikado honoured him with the decoration of the Third Degree (Knight Commander) of the Imperial Order of the Rising Sun. Between 1859 and 1867 he was Professor of Civil Engineering at the University College, London, and Lecturer at the Royal Engineer Establishment, Chatham. He has done much work for Government at various times and in various ways. From 1861 to 1864 he served as a member of the Committee on Iron Armour, and from 1863 to 1865 as a member of the Committee on the comparative merits of the Whitworth and Armstrong systems of artillery. In 1870 he was employed by the Home Office to investigate the question of the introduction into the Metropolis of the Constant Service System of Water Supply, and he took an important part in the subsequent proceedings for carrying it into effect. In 1871 he was commissioned by the War Office to report on the Martini-Henry breech-loading rifles. In 1870 he was appointed by the Board of Trade as one of the Metropolitan Gas Referees, which office he still holds. He has acted as Secretary (in two instances under a special appointment by the Queen) to four Government Commissions of Inquiry, namely, from 1865 to 1867 to the Royal Commission on Railways; from 1867 to 1869 to the Royal Commission on Water Supply; from 1882 to 1884 to the Royal Commission for inquiring into the Pollution of the Thames; and in 1885 to a Committee on the Science Museums at South Kensington. He has also done much private work, chiefly connected with mechanical matters, the steam-engine, railway bridges, plant, stock, and iron-work, as well as in subjects connected with water supply. He is one of the oldest Members of the Institution of Civil Engineers, having been elected in 1840. He served on the Council from 1871 to 1885, and was Honorary Secretary from 1885 to 1896, in which year he was made an Honorary Member. He has also some distinction in science. In June 1861 he was elected a Fellow of the Royal Society of London; he has served six years on the council, and was Vice-President in 1876 and 1889. He was elected into the

Royal Society of Edinburgh in 1877, and into the Athenæum Club without ballot (as a scientific distinction) in 1864. He has done much literary work; he published in 1844 a quarto Treatise on the Steam-Engine; in 1848 a translation of a German work on the same subject; in 1851 elaborate calculations on the construction of Iron Bridges; in 1864 and 1870 Scientific Chapters in the Lives of Robert Stephenson and I. K. Brunel; in 1872 a Treatise on Iron; in 1877 "The Life of Sir William Fairbairn, Bart.," and in 1888 "The Life of Sir William Siemens." He is also the author of a well-known scientific work on the game of Whist; has written a great number of papers for scientific journals and periodicals; and is a contributor to the *Quarterly Review*. He has likewise studied music: he took in 1860 the Oxford degree of Bachelor, and in 1867 that of Doctor of Music, and remains a member of St. John's College in that University. He was the Chief Adviser of the University of London in their establishment of musical degrees in 1877, and afterwards held for twelve years the office there of Musical Examiner. He has been an organ-player, and was elected in 1889 an Honorary Fellow of the Royal College of Organists. He is the author of a "Treatise on the Musical Instruments in the Exhibition of 1851"; of "The Story of Mozart's Requiem," 1879; and "The Philosophy of Music," 1879. He is the composer of a well-known eight-part motet on "The Hundredth Psalm." Permanent address: 9 Stanhope Place, Hyde Park, W.; and Athenæum.

POLE, William (known under his stage name of William Poel), son of the above, was born in July 1852, and in 1876 adopted the profession of an actor, and made his first appearance on the stage in the stock company at the Royal, Bristol. During a seven years' apprenticeship on the stage, Mr. William Poel devoted much study to the subject of Shakespearian texts and representations, and came to the conclusion that Shakespeare deserves the same classic and historic reverence on our own stage as Molière enjoys in France. In 1880 the first quarto of "Hamlet" was reproduced in photolithography, and the great value of this earliest version, as showing Shakespeare's original drift and intention, caused Mr. Poel, with the assistance of Dr. Furnivall, to reproduce it at St. George's Hall, where, in the spring of 1881, the play was acted in Elizabethan costume and without scenery. In 1887 the London Shakespeare Reading Society requested Mr. Poel to become their instructor, and under his assiduous and careful training they have given

recitals of many of Shakespeare's plays. In the autumn of 1893 Mr. Poel, with the assistance of Mr. Arthur Dillon, who had previously assisted him in the reproduction of Webster's "Duchess of Malfy," carried out his long-cherished scheme of building a stage after the Elizabethan model, and accordingly converted the stage of the Royalty into a close imitation of the old "Fortune" play-house. The play, produced by the Shakespeare Reading Society, was "Measure for Measure," and during the performance the audience on the stage and in balconies behind it appeared clad as Elizabethan gallants or ladies. In the success of this performance originated the Elizabethan Stage Society, formed in 1895 for reviving plays after the manner of the 16th century, with Mr. Poel as director. The Society's revivals have been "The Comedy of Errors," given in the dining-hall of Gray's Inn, where the play was last acted in 1594; Marlowe's "Doctor Faustus," for which Mr. Swinburne wrote a prologue; "The Two Gentlemen of Verona," given at the Merchant Taylors' Hall, and repeated afterwards at the Charterhouse in February 1897; "Twelfth Night" in the Middle Temple Hall, where it was last revived in 1602; "Arden of Feversham"; part of "Edward III.," "The Tempest," given at the Mansion House; Beaumont and Fletcher's comedy, "The Coxcomb," in the Hall of the Inner Temple, of which Inn Beaumont had been a member; "The Spanish Gipsy," for which Mr. Swinburne wrote a prologue; "The Broken Heart," acted before the members of the London University Extension Society; and Ben Jonson's fragment, "The Sad Shepherd," July 1898. In 1899 his society acted, amongst other pieces, Fitzgerald's version of Calderon's "Life's a Dream," Swinburne's tragedy of "Locrine," and a version of Kalidasa's "Sakontalá," or "The Magic Ring," an ancient Sanscrit play. Besides this Shakespearian work, Mr. Poel has dramatised Mr. Baring-Gould's "Mehalah" and Mr. Howells's "Foregone Conclusion," which forms part, under the title of "Priest and Painter," of Mr. F. R. Benson's repertory. Address: Heatherwood, Putney Heath, S.W.

POLLARD, Arthur Tempest, M.A., Head-Master City of London School, is the son of Tempest Pollard, M.R.C.S., and was born at Rastrick, Yorkshire, in 1854. He was educated at the Rastrick Grammar School, at Victoria College, Jersey, and for six years at St. Peter's School, York. He obtained the First Classical Scholarship at Wadham College, Oxford, in 1872. He is an M.A. of the University of Oxford,

and was placed in the first class in the School of Literæ Humaniores in 1876. He was a temporary Master at the Manchester Grammar School in 1877; an Assistant-Master at Brighton College in 1878; Composition and Assistant-Master at Dulwich College from 1878 to 1881, and during the year 1888-89. He was Head-Master of the Oxford High School, of which he was the first Head-Master, from 1881 to 1888, and Second Master of the Manchester Grammar School in 1889. In 1889 he was elected to the Head-Mastership of the City of London School in succession to Dr. Edwin A. Abbott. For a time he took work at his College at Oxford as an Assistant-Lecturer. He was President for the year 1898 of the Modern Language Association, and is a member of several Boards and Committees dealing with education. He contributed an article to "Thirteen Essays on Education," edited by the Hon. and Rev. Canon E. Lytton, and an article to "Teaching and Organisation," edited by Mr. P. A. Barnett. Address: 24 Harley Street, W.

POLLEN, John Hungerford, M.A., son of Richard Pollen of Rodbourne, Wilts, born 1820, was educated at Eton and Christ Church, Oxford, and elected to a Fellowship at Merton, where he painted the College Chapel. He studied painting in Rome, was appointed Professor of Fine Arts by Cardinal Newman, in the Catholic University of Dublin; built and painted the Church in St. Stephen's Green, was appointed Official Editor of the Museum at South Kensington, and was *inter alia* Editor of the Universal Catalogue of Books on Art. He acts as Examiner for the Department, and is a member of the Committee of Selection in reference to purchases. He is the author of "Ancient and Modern Furniture and Woodwork," "Ancient and Modern Gold and Silver Smith's Work," "The Trajan Column," and other publications; and has contributed to the "Encyclopædia Britannica," *Art Journal*, *Magazine of Art*, and several periodicals on subjects connected with the fine arts, and was Cantor Lecturer of the Society of Arts in 1885. He was appointed Private Secretary to the Marquis of Ripon in 1876. He has executed several paintings—designs for glass, mosaic, carving, &c.—in the Oratory, London; at Lyndhurst, Hants; Alton Towers (wars of the famous John Talbot), Blickling Hall, Kilkenny Castle, Wilton House, Heythrop House, Ingestre Hall, the new portions of Reigate Priory, golf clubhouse, and other houses in Reigate, and many other places, both in this country and in India. Mr. Pollen is Corresponding Member of the Royal Academy of Madrid, the Archaeological Society

of Belgium, and other learned bodies. Address: 11 Pembroke Crescent, W.

POLLOCK, The Rev. Bertram, was born on Dec. 6, 1863. He is the youngest son of G. F. Pollock, Esq., Senior Master of the Supreme Court of Judicature and Queen's Remembrancer, and is the grandson of the late Right Hon. Sir Frederick Pollock, Bart., Lord Chief Baron. He was educated at Charterhouse (Scholar and Gold Medallist), and at Trinity College, Cambridge, of which he was a Scholar. He was in the first class in the Classical Tripos (B.A. 1886, M.A. 1890). From 1886 to 1893 he was Assistant-Master at Marlborough College, was ordained in 1890, and appointed Master of Wellington College in 1893. Address: The Lodge, Wellington College, Berks.

POLLOCK, Professor Sir Frederick, Bart., eldest son of Sir William Frederick Pollock, Bart., and grandson of the late Sir F. Pollock, Chief Baron of the Exchequer, was born Dec. 10, 1845, and educated at Eton and Trinity College, Cambridge, of which he became a Fellow in 1868. He was called to the Bar at Lincoln's Inn in 1871, and was examiner in law at Cambridge, 1879-81. In 1882-83 he was Professor of Jurisprudence at University College, London; in 1883 was appointed Corpus Professor of Jurisprudence at Oxford (which office he still holds by re-election), and was Professor of Common Law in the Inns of Court, 1884-90. He is also editor of the *Law Quarterly Review*, and was for some time Hon. Librarian of the Alpine Club. He has published "Principles of Contract," 1876; "Digest of the Law of Partnership," 1877; "The Law of Torts," 1887; "The Land Laws" (in English Citizen Series), 1883 (all the foregoing have been revised in later editions); "Spinoza, his Life and Philosophy," 1880, 2nd edit., 1899; "Essays in Jurisprudence and Ethics," 1882; "History of English Law before Edward I." (with Prof. Maitland), 1895; "A First Book of Jurisprudence," 1896; and other works, besides articles in various periodicals. In the summer of 1892 he went to Trinidad as a member of the Judicial Inquiry Commission held in that colony, and in the winter of 1893-94 he delivered the Tagore Law Lectures in Calcutta. He became editor of the "Law Reports" in January 1895. In 1873 he married Georgina, daughter of John Defell, of Calcutta. Addresses: 48 Great Cumberland Place, W.; 13 Old Square, Lincoln's Inn; and Athenæum.

POLLOCK, James Edward, F.R.C.P., Physician Extraordinary to the Queen,

received his medical education at King's College, Aberdeen, where he graduated M.D. in 1850. He was elected F.R.C.P. in 1864, and was Pro-President and Senior Censor of the College in 1893. He is Consulting Physician to the Brompton Hospital for Consumption, Vice-President of the Roy. Med. Chir. Soc. and of the Pathological Society, in 1880-81 was President and Lecturer of the Harveian Society, is Socio dell' Accademia dei Quiriti, Rome, and Member of Council and Examiner in Medicine at the Royal College of Physicians, London. In 1883 he was Croonian Lecturer, and in 1893 Harveian Orator. He was appointed Physician Extraordinary to the Queen, in room of the late Sir Richard Quain, in January 1899. His works include: "Medical Handbook of Life Assurance," 1889; "Elements of Prognosis in Consumption," 1865; besides contributions on Phthisis, the Climate of Italy, &c., to the medical journals. Address: 52 Upper Brook Street, Grosvenor Square, W.

POLLOCK, Walter Herries, younger son of Sir W. F. Pollock, was born in London in 1850, and educated at Eton and Trinity College, Cambridge, where he graduated (Classical Tripos) in 1871, and was called to the Bar at the Inner Temple in 1874. Mr. Pollock has delivered lectures at the Royal Institution on historical and literary subjects, such as Richelieu, Colbert, Victor Hugo, Sir Francis Drake, Théophile Gautier, the Drama, &c., and is the author of "Lectures on French Poets"; "The Paradox of Acting," a commented translation of Diderot's "Paradoxe sur le Comédien"; "The Picture's Secret," a novel; "Songs and Rhymes, English and French"; "Verse of Two Tongues"; "The Poet and the Muse," translated with introduction in original verse, from Alfred de Musset's "Nuits"; "Old and New," a collection of verse; "A Nine Men's Morrice"; "King Zub," two volumes of fantastic stories; and "Mémoires Inédits du Marquis de —" (in French). In collaboration with Sir Walter Besant he wrote "The Ballad-Monger," an adaptation of Banville's "Gringoire," produced at the Haymarket Theatre by Mr. Tree; and also in collaboration with Sir Walter Besant he wrote "The Charm, and other Drawing-Room Plays." He revised for Sir Henry Irving "The Dead Heart," by the late Watts Phillips. In 1884 Mr. Pollock became editor of the *Saturday Review*, of which he had long acted as assistant-editor. His editorial connection with this journal was severed in 1894. Mr. Pollock is also author, in collaboration with the late A. J. Duffield, of "Marston," a novel in two

volumes; in collaboration with Miss Lillian Moubrey, of "King and Artist," a romantic play in five acts; and of the "Were-Wolf," a romantic play in one act. He edited and was part author of "Fencing" in the Badminton Series. He married, in 1876, Emma Jane, daughter of Colonel Pipon, of Jersey. Addresses: Chawton Lodge, Alton, Hants; and Athenæum.

POLTIMORE, Lord, The Right Hon. Augustus Frederick George Warwick Bamfylde, D.L., J.P., Bart., was born in London on April 12, 1837, and is the son of the first Baron and his second wife, a daughter of Gen. F. W. Buller. He succeeded his father in 1858, and was educated at Harrow and Christ Church, Oxford. He was Treasurer to the Household from 1872 to 1874, and in 1895 became Chancellor of the Primrose League. He was sworn of the Privy Council in 1872, and has been co. Alderman for Devon, and a Major of the Devon Yeomanry. He married, in 1858, Florence S. W., daughter of Richard Brinsley Sheridan, M.P. Address: Poltimore Park, Exeter, &c.

PONSONBY-FANE, The Hon. Sir Spencer Cecil Brabazon, G.C.B., was born in Cavendish Square, London, on March 14, 1824, and is the sixth son of the fourth Earl of Bessborough, and Maria Fane, daughter of the 10th Earl of Westmoreland. He was educated at home, and entered the Foreign Office in 1840. He was Attaché to the British Embassy at Washington for a short time, and then became Private Secretary successively to three Foreign Secretaries, viz., Lords Palmerston, Clarendon, and Granville. He is Gentleman Usher Daily Waiter to the Queen, and was appointed to his present position of Comptroller of Accounts to the Lord Chamberlain's Department in 1857. He assumed his mother's name in addition to his own in 1875 for himself and his wife only. He was created G.C.B. in 1897. He married a daughter of the 13th Viscount Dillon in 1847. Official address: Lord Chamberlain's Office, Stable Yard, St. James's Palace.

POORE, George Vivian, F.R.C.P., M.D., received his medical education at University College, London, of which he was Atkinson-Morley Surgical Scholar, and is now Fellow. During his M.D., London, course, he won the University Scholarship in Medicine in 1868. He is Professor of Medical Jurisprudence and Clinical Medicine at University College, and Physician at University College Hospital, as well as

Consulting Physician to the Royal Hospital for Children and Women, &c. He was medical attendant to the late Prince Leopold, and is Knight Commander of the Dannebrog, Fell. of the Roy. Med. Chir. Soc., &c. He is also member or hon. member of a number of foreign health societies. He reports the Vivisection Returns annually for Government. Among his works may be mentioned "The Physical Diagnosis of Diseases of the Throat, Mouth, and Nose," 1881; "The Dwelling-House," 1897; a translation and edition of Duchenne's Works for the New Sydenham Society; "Nervous Affections of the Hand," 1897; &c. He has delivered the Bradshawe and the Cantor Lectures, and has contributed various papers to the leading medical journals, &c. Address: 32 Wimpole Street, W.

POPE, His Holiness the. See LEO THE THIRTEENTH.

POPE, Samuel, Q.C., D.L., J.P., was born on Dec. 11, 1826, at Manchester, and is the son of Samuel Pope, merchant, of London, and Phebe, daughter of William Rushton, merchant, of Liverpool. He was educated privately, and at the University of London. Occupied at first in business at Manchester, he subsequently studied law, and was called to the Bar in 1858. He practised for some years in Manchester, and came to London in 1865. He was appointed a Q.C. in 1869, Recorder of Bolton in 1869, a J.P. for Merionethshire in 1877, a D.L. in 1879, and a Bencher of the Middle Temple in 1870. Mr. Pope now holds the position of senior practising member of the Bar. He married, in 1848, Hannah, daughter of Thomas Bury, Timperley, Cheshire (she died in 1880). Address: 74 Ashley Gardens, Victoria Street, S.W., &c.

POREL, Madame. See RÉJANE, MADAME.

PORTAL, Wyndham Spencer, D.L., J.P., late chairman of the London and South-Western Railway Company, was born on July 22, 1822. He is the third son of the late John Portal, Esq., of Freefolk Priors and Laverstoke Park, Hants. The Portal family has for several generations made Hampshire its home, and ranks among the best known of its worthies. The founder was Henri Portal, a descendant of some French Huguenots who were naturalised in 1711 at Winchester. Forced by circumstances to adopt a means of livelihood, he built a mill for the manufacture of paper on the river Test at Laverstoke. So excellent was the produc-

tion of the mill that the Bank of England granted him the privilege of making their bank-note paper, which has ever since been continued in the family. Mr W. S. Portal was educated at Harrow and at the Royal Military College, Sandhurst. He joined the North Hampshire Yeomanry Cavalry as Cornet in 1842, and was promoted Captain in 1853, retiring from the service in 1865. He succeeded his father in the business of the manufacture of the bank-note paper in 1848. Mr. Portal has always taken a great interest in the poorer classes, especially with a view to their improvement socially and intellectually. His first efforts in that direction were begun in 1843, when he rented land and let it out in allotments to labourers and others. He took up poor law, and was elected Chairman of Whitchurch Union, Hants, in 1847, and some years later was chosen Chairman of the Basingstoke Union. While thus engaged he became much impressed by the evils of public-house benefit clubs. This led him to devote his energies to the development of the Hampshire Friendly Society, of which he is President. Mr. Portal is one of the original founders of the Hampshire Reformatory School, and of the Southern Counties' Adult Education Society. He contested the city of Winchester for a seat in Parliament in the Liberal interest in 1857; also the borough of Portsmouth in 1874. For several years he was one of the Visiting Justices of the Winchester Prison, and became convinced that drink is the principal source of crime. This led him to espouse the temperance cause, and he never loses an opportunity of spreading temperance principles among railway men and labourers. Mr. Portal takes an active interest in international exhibitions, and received a medal "for services rendered" from the Commissioners of the Exhibition of 1851. He was also much engaged in the subsequent International Exhibitions of Paris of 1855 and 1867, and was appointed a member of the Royal Commission in connection with the Chicago Exhibition of 1893. He has been deputed to act in a similar capacity at the Paris Exhibition of 1900. Mr. Portal was presented with the honorary freedom of Southampton in 1895, and is the owner of Malshanger, a fine country seat at Basingstoke. From 1892 until his retirement recently he was chairman of the London and South-Western Railway Company, and in March 1899 he was presented by the Queen with a framed likeness of herself, accompanied by a letter referring to the many occasions on which he had travelled with the Royal train. He married in 1849 the elder daughter of Colonel W. Hicks-Beach,

M.P., of Oakley Hall, Hants. Address: Malshanger, Basingstoke.

PORTER, The Right Hon. Andrew Marshall, Master of the Rolls, Ireland, was born in 1837, and is the son of the Rev. John Scott Porter, of Belfast. He was educated at Queen's College, Belfast, and called to the Bar at the King's Inns in 1860, becoming Q.C. in 1872. He represented co. Londonderry in the House of Commons in 1881-83, was Solicitor-General for Ireland in 1881-82, and Attorney-General in 1882-83, in the Gladstone Administration of that time. He was appointed Master of the Rolls in 1883. He married a daughter of the late Colonel Horsburgh, of Peeblesshire. Address: 8 Merrion Square East, Dublin.

PORTER, General Horace, American soldier, speaker, and writer, was born at Huntington, Pennsylvania, in 1837, his father soon afterwards becoming Governor of the State of Pennsylvania. He received his education at Harrisburg and at the Military Academy at West Point, where he graduated in 1860. After a brief time as Instructor in Artillery at West Point he was assigned to duty in the army, and soon became a First Lieutenant. In 1863 he was breveted Captain for gallant services; in 1864 he was breveted Major, and in 1865 was breveted Lieut.-Colonel and Brigadier-General. While on the staff of General Thomas at Chattanooga, Tenn., he became acquainted with General Grant, and was afterwards an Aide on his staff, and was with him in the field during most of the remainder of the war between the States. After the close of the war he entered on a business career, and has been connected with many important railroad, banking, and other enterprises. He is widely known as an after-dinner speaker and as a writer, having contributed to the magazines, and in 1897 having published "Campaigning with Grant." He has for several years been President of the Union League Club, and a member of the Authors' Club, Grand Army of the Republic, American Geographical Society, and many other organizations. He was appointed Ambassador to France in March 1897.

PORTER, The Rev. James, D.D., Master of Peterhouse, Cambridge, the oldest collegiate foundation at Cambridge, was ordained Deacon in 1853, and priest in 1856. He was Vicar of Cherry-Hinton from 1880 to 1882, has been Fellow and Tutor of his College, was appointed Master in 1876, and was Vice-Chancellor from 1881 to 1884. Address: St. Peter's College, Cambridge.

PORTLAND, Duke of, The Most Hon. William John Arthur Charles James Cavendish-Bentinck, D.L., J.P., P.C., Master of the Horse, was born on Dec. 28, 1857, and is the son of the late Lieut.-General Arthur Cavendish-Bentinck, a great-grandson of the 3rd Duke, the Prime Minister, and of Elizabeth, daughter of Sir St. Vincent Whitshed, Bart. He succeeded his cousin in 1879. He was formerly in the Coldstream Guards, and was at one time Lieut.-Colonel in the Hon. Artillery Company. He was Master of the Horse from 1886 to 1892, and was reappointed in 1895. Since 1889 he has been Lord-Lieutenant of Caithness, and in 1898 was appointed Lord-Lieutenant of Notts in succession to the late Duke of St. Albans. He is a very extensive landowner. In 1889 he married Miss Dallas-Yorke. Addresses: 3 Grosvenor Square, S.W.; Welbeck Abbey, &c.

PORTUGAL, King of. See CARLOS I., DOM, KING OF PORTUGAL.

POTT, The Ven. Alfred, B.D., son of Charles Pott, of Freeland, Kent, and Anna, daughter of S. C. Cox, Master in Chancery, born at Norwood, Surrey, Sept. 30, 1822, was educated at Eton, and at Balliol and Magdalen Colleges, Oxford. He was appointed Vicar of Cuddesdon in 1852; first Principal of the Theological College there in 1853; Rector of East Hendred, Berks, in 1858; Vicar of Abingdon and Honorary Canon of Christ Church in 1868; Archdeacon of Berkshire, and Chaplain to the Bishop of Oxford in 1873; Vicar of Clifton Hampden, Oxfordshire, in 1874; and Vicar of Sonning, Berks, in 1882. Archdeacon Pott is the author of "Confirmation Lectures," 1850; "Village Sermons," 1867; and several "Charges," sermons, and tracts. He married Emily Harriet, daughter of the Rev. Joseph Gibbs, Vicar of Clifton, Hampden, Oxon. Address: Sonning Vicarage, Berks.

POTTER, The Right Rev. Henry Codman, D.D., LL.D., son of the late Bishop of Pennsylvania, and nephew of the late Bishop of New York, was born at Schenectady, New York, May 25, 1835. He graduated from Union College, Schenectady, and from the Theological Seminary of Alexandria, Virginia, 1857. His first Rectorship was in Greensburgh in Pennsylvania, from which he went to St. John's Church, Troy, New York, and afterwards to Trinity Church, Boston. In 1868 he became Rector of Grace Church, New York, where he remained until 1883, when he was consecrated Assistant-Bishop of New York, with the right of succession. He became Bishop of New York on

the death of his uncle, in January 1887. He has published "Sisterhoods and Deaconesses," 1872; "The Gates of the East," 1876; "Sermons of the City," 1880; "Waymarks," 1891, besides a number of sermons and discourses, and "The Scholar and the State," and other orations and addresses, 1897. In 1888 the degree of LL.D. was conferred upon him by the University of Cambridge, Eng.; in 1892 the degree of D.D. by the University of Oxford, Eng.; and in 1890 the same degree by Harvard University.

POUBELLE, Eugène René, French Ambassador to the Vatican, was born at Caen, April 15, 1831, of an ancient Norman family. He was educated at the College of his native town, and having passed through the Law School, became an Assistant-Professor there. He afterwards held posts at Grenoble and Toulouse. At the outbreak of the Franco-Prussian war, he enlisted as an artilleryman, and gained the military medal for his gallantry at the sorties from Paris. He was appointed Préfet of the Charente by M. Thiers, in April 1871, and afterwards went in the same capacity to Corsica. On the fall of M. Thiers in 1873 he resigned, and again became Professor of Law at Toulouse. However, in 1878 M. Grévy appointed him Préfet of the Doubs, and in 1879 he was promoted to the Bouches du Rhône. Four years later he was called to the most important post of Préfet of the Seine, which he held with conspicuous success for thirteen years. In the midst of a municipal council, more and more eager to become a political body, he struggled against pretensions which would have placed them in opposition to the executive. Amidst tumultuous scenes and personal attacks he preserved an impassible coolness and patience, that tired out the unruly members and prevented civil disturbances. Thanks to him these struggles have not prevented the carrying out of great municipal works. His ædileship was celebrated by the construction of sewers, of new broad arteries for traffic, the creation of new districts, the building of the General Post Office, the Bourse du Commerce, and the new Sorbonne, and the improvement of public education and out-door relief. In 1889 he was sent by the President of the Republic to Magdeburg, to be present at the exhumation of the remains of Lazare Carnot, and to bring them back to France. In 1896 he was appointed to his present post, and was succeeded by M. de Selves (q.v.). He is a Grand Officer of the Legion of Honour, and of several other foreign Orders.

POULTON, Edward Bagnall, F.R.S., F.L.S., F.G.S., F.Z.S., Hon. LL.D. Prince-

ton, of Wykeham House, Oxford, Hope Professor of Zoology in the University of Oxford, was born at Reading, Jan. 27, 1856, and is the only son of William Ford Poulton, architect. He was educated at the private school of the late W. Watson, B.A., London, at Reading, and in 1873 he worked in the Biological Laboratory at the University Museum, Oxford, and obtained an open scholarship in Natural Science at Jesus College. In 1876 he obtained a first class in the Final Honour School of Natural Science. From 1877 to 1879 he was Demonstrator of Biology under the late Prof. G. Rolleston. In 1878 he obtained the Burdett-Coutts University Scholarship in Geology; and from 1877 to 1878 he was Librarian of the Oxford Union Society, and in 1879 (Lent Term) its President. From 1880 to 1889 he was Lecturer in Natural Science, and then Tutor of Keble College, Oxford; 1881 to 1889, Lecturer in Natural Science, Jesus College, Oxford; 1886 to 1887, Lecturer in Zoology and Comparative Anatomy at St. Mary's Hospital, Paddington. In 1889 he was elected a Fellow of the Royal Society; and in June 1893 was elected Hope Professor of Zoology at Oxford in succession to the late Prof. Westwood. He has published the following works: "On Mammalian Remains and Tree Trunks in Quatern Sands at Reading," *Quart. Journ. Geol. Soc.*, May 1880; "Account of Working of Dowerbottom Cave, Yorkshire," *Geol. and Polytechnic Soc., W. Riding of Yorks.*, 1881, p. 351; "On the Minute Structure of the Tongues of Marsupialia and Monotremata," *Quart. Journ. Micro. Soc.*, January and July 1883; *Proc. Zool. Soc.*, December 1883; "Ovary of Marsupialia and Monotremata," *Quart. Journ. Micro. Soc.*, January 1884; "The True Teeth of Ornithorhynchus," *Proc. Roy. Soc.*, 1888, and *Quart. Journ. Micro. Soc.*, July 1888; "On the Colours and Markings of Lepidopterous Larvæ and Pupæ, &c.," published in the *Trans. Ent. Soc.*, 1884-88, and in 1893, and in *Proc. Zool. Soc.*, 1878 and 1891; "On the Relation between the Colours of Lepidopterous Larvæ and Pupæ and those of their surroundings," *Proc. Roy. Soc.*, 1885-87, and 1893, and *Phil. Trans.*, 1887, and *Trans. Ent. Soc.*, 1892; "On the External Morphology of the Lepidopterous Pupæ, &c.," *Trans. Linn. Soc.*, 1890 and 1891. He is also one of the editors of the translation of Prof. Weismann's "Essays on Heredity and Kindred Biological Problems," Clarendon Press, 1889, vol. ii. 1892; and is the author of "The Colours of Animals, their Meaning and Use, especially considered in the case of Insects," 1890, International Scientific Series. In 1896 he published "Charles Darwin and the Theory of Natural Selection," and in 1899 presented to the

University of Oxford a statue of Charles Darwin, which was unveiled by Sir Joseph Hooker in June of that year. At the 1890 meeting of the British Association held at Leeds, Prof. Poulton delivered one of the evening addresses, choosing for his subject "Mimicry in the Animal Kingdom." In January and February 1894 he delivered one of the courses of Lowell Lectures in Boston, Mass., upon "The Meaning and Use of the Colours of Animals." In 1881 he married Emily, eldest daughter of George Palmer, ex-M.P., of Reading.

POWELL, Professor F. York, M.A., Regius Professor of Modern History, University of Oxford, is the only son of the late F. Powell and Mary York. He was educated at Rugby, and entered Oxford as a non-Collegiate Student, as many other distinguished men have done before and since. He joined Christ Church, of which he became a student, and graduated with a first class in Law and Modern History. In 1870 he was called to the Bar at the Middle Temple. He has been Tutor and Law Lecturer at Christ Church, and History Lecturer at Trinity College, and was appointed Regius Professor of Modern History, in succession to the late Prof. Freeman, in 1894. He is editor of "English History from Contemporary Writers," author of "Early England up to the Norman Conquest," in *Epochs of English History*, "Old Stories from British History," "History of England to 1509," &c. With the late Georg Vigfusson he has edited the "Corpus Poeticum Boreale," and with him is co-author of the "Grimm Centenary Papers," &c. He has besides contributed many important papers on historical and literary subjects to the *English Historical Review*, the *National Observer*, &c. Addresses: Christ Church, Oxford; and Bedford Park, W.

POWELL, Major John Wesley, Ph.D., LL.D., American geologist, was born at Mount Morris, New York, March 24, 1834. His early life was passed at various places in Ohio, Illinois, and Wisconsin, and he studied at Illinois College and at Wheaton College, finally taking a special course at Oberlin, Ohio, teaching in the public schools at intervals in the meanwhile. At the outbreak of the Civil War he entered the Union army as a private, and by its close had gained the rank of Lieut.-Colonel, having lost his right arm during its progress. He had, prior to the war, attained prominence as a scientist, and in 1865 was made Professor of Geology and Curator of the Museum in the Illinois Wesleyan University, but he soon resigned this position to accept a

similar one in the Illinois Normal University. In 1868 he organised and conducted an expedition to explore the cañon of the Colorado, which was so successful that Congress established, in 1870, a Topographical and Geological Survey of the Colorado River of the West, and placed it in his charge. The results of the thorough exploration made by him of the physical features of this region (covering about 100,000 square miles), and of other surveys instituted by the United States Government in the Rocky Mountain country proved so important, that Congress, in 1879, consolidated them under the permanent and independent organisation of the United States Geological Survey, of which Major Powell, in 1881, succeeded Clarence King as the Director. In the meantime Major Powell had devoted considerable attention to ethnology, and had issued through the Smithsonian Institution three vols. of "Contributions to North American Ethnology." To ensure the continuance of this work a special Bureau of Ethnology was established by Congress and he was placed at its head, a position he continued to hold, in addition to the direction of the Survey, until 1894, when he was compelled to resign them both on account of ill-health. Major Powell received the degree of Ph.D. from the University of Heidelberg in 1886, and in the same year that of LL.D. from Harvard. In 1880 he became a Member of the National Academy of Sciences, and from 1879 to 1888 was President of the Anthropological Society of Washington. He became a Fellow of the American Association for the Advancement of Science in 1875, its Vice-President in 1879, and President in 1887. In addition to these he is a member of a number of other learned and scientific societies. His publications embrace many scientific papers and addresses and numerous Government volumes, including reports of various surveys of the Bureau of Ethnology and of the U.S. Geological Survey. The special volumes which bear his own name are: "Explorations of the Colorado River of the West and its Tributaries," 1875; "Report on the Geology of the Eastern Portion of the Uinta Mountains," 1876; "Report on the Lands of the Arid Region of the United States," 1879; and "Introduction to the Study of Indian Languages," 1880. In 1890 he published a series of papers on irrigation in *The Century Magazine*.

POWELL, Sir Richard Douglas, Bart., M.D., F.R.C.P., Physician in Ordinary to the Queen, is the second and sole surviving son of the late Captain Scott Powell. He was educated at University College, London, and graduated M.D. with honours

at the University of London in 1866. He became F.R.C.P. in 1873, having been admitted in 1867. He is Physician to the Middlesex Hospital and Consulting Physician to the Ventnor and Brompton Hospitals for Consumption, Fellow of the Royal Medico-Chirurgical Society, &c., and was at one time President of the Medical Society. In May 1898 he was created a Knight of Grace of the Order of St. John of Jerusalem. In January 1899, having previously been Physician Extraordinary to the Queen, he was appointed Physician in Ordinary in succession to the late Sir William Jenner. He was created a baron in 1897. His works include: "Diseases of the Lungs and Pleura," 3rd edit., 1893; "On the Principles of Treatment of Diseases and Disorders of the Heart," being the Lumleian Lectures for 1898; and contributions, mostly on the lungs, to Quain's "Dictionary of Medicine," 1882 and 1894; Reynolds's "System"; and to various medical transactions and journals. He married, in 1873, Juliet, second daughter of Sir John Bennett. Address: 62 Wimpole Street, W.

POWER, D'Arcy, born Nov. 11, 1855, at 3 Grosvenor Terrace (now 56 Belgrave Road), London, S.W., eldest son of Henry Power, F.R.C.S., surgeon (*q.v.*), and Ann his wife, was educated at Merchant Taylors' School, which he entered in 1870, after a preliminary training at the St. Marylebone and All Souls' Grammar School. At Oxford he matriculated in October 1874 as a Commoner of New College, but he migrated to Exeter College, when he obtained an open Exhibition in October 1876. He graduated B.A. in June 1878 after he had been placed in the first class of the Honour School of Natural Science. He took the degree of M.A. in 1881, and was admitted M.B. in June 1882. During the session 1878-79 he acted as Demonstrator of Comparative Anatomy at University College, London, and in October 1878 he began his professional education as a medical student at St. Bartholomew's Hospital. Here he was appointed a Demonstrator of Physiology in 1878, and he has held in succession the posts of House Surgeon, Curator of the Museum, Teacher of Surgery and Assistant-Surgeon. At the Royal College of Surgeons of England he was admitted a Fellow in 1883, and has acted as Examiner, and has filled the office of Hunterian Professor of Surgery and Pathology. For five years he was a Member of the Conjoint Examining Board of the Royal Colleges of Physicians of London and of Surgeons of England, and he has been an Examiner at the University of Durham. He is Surgeon to the Victoria Hospital for Children, Chelsea;

Visiting Surgeon to the Metropolitan Dispensary, and an Assistant Professor at the Royal Veterinary College. He has served many offices in the British Medical Association, is Senior Secretary of the Pathological Society of London, and a Vice-President of the Harveian Society. In 1897 he was admitted a Fellow of the Society of Antiquaries. His published work divides itself into General, Scientific, and Professional. His general work consists of "Memorials of the Craft of Surgery," 1886; a "Life of William Harvey," 1897; various works upon antiquarian medical subjects, and the lives of eminent surgeons in the "Dictionary of National Biography." The scientific writings are chiefly connected with an attempt to discover the cause of cancer, 1893-95, and of certain forms of intestinal obstruction, 1897-1898. The purely professional work comprises a book on the "Surgical Diseases of Children" (1895), and numerous papers upon points of surgical interest published in the various medical periodicals, 1878-98. In the spring of 1898 he was appointed Assistant-Surgeon at St. Bartholomew's. Address: 10A Chandos Street, Cavendish Square, London, W.

POWER, Henry, M.B., F.R.C.S., received his medical education at St. Bartholomew's Hospital, and, in studying for his London degree, obtained the Exhibition in Anatomy and Physiology of the University of London in 1852. He is Consulting Ophthalmic Surgeon of St. Bartholomew's Hospital and of the Westminster Ophthalmic Hospital, as well as to the Artists' Benevolent Society. He is Professor of Physiology at the Royal Veterinary College, and has been Professor of Surgery and Arris and Gale Lecturer at the Royal College of Surgeons, England. He is author of "Elements of Human Physiology," "Illustrations of the Principal Diseases of the Eye," 1869; has translated Stricker's "Manual of Human and Comparative Histology" for the New Sydenham Society in 1870, and Erb "On the Diseases of the Nervous System" for Ziemssen's "Cyclopædia," and, with Dr. Sedgwick, is editor of Mayne's "Expository Lexicon." Addresses: 37A Great Cumberland Place, W.; and Bagdale Hall, Whitby.

POWERSCOURT, Viscount, The Right Hon. Mervyn Edward Wingfield, K.P., M.R.I.A., J.P., D.L., was born at Powerscourt on Oct. 13, 1836, and is the eldest son of the 6th Viscount, and succeeded his father in 1844. He was educated at Eton, and joined the 1st Life Guards, of which he was a Lieutenant. He is an Irish representative

peer, sitting as Baron Powerscourt, Past President of the Royal Dublin Society, was made K.P. in 1871, and sworn of the Irish Privy Council in 1897. He married, in 1864, Lady Julia Coke, daughter of the 2nd Earl of Leicester, K.G. Addresses: 51 Portland Place, W.; and Powerscourt, co. Wicklow.

POYNTER, Sir Edward John, P.R.A., was born in Paris, March 20, 1836, being the son of Mr. Ambrose Poynter, architect. He was educated at Westminster School and at Ipswich Grammar School; afterwards he studied art in English schools from 1854 to 1856, and under Gleyre in Paris from 1856 to 1859. He was made an Associate of the Royal Academy in January 1869, a member of the Belgian Water-Colour Society in 1871, and was appointed Slade Professor of Art at University College, Gower Street, London, in May 1871, the appointment being renewed in 1873 for four years. He was elected a Royal Academician, June 29, 1876, and in November 1896 was raised to the Presidency of the Royal Academy. He received the honour of knighthood at the same time. He has exhibited at the Royal Academy, "Israel in Egypt," 1867; "The Catapult," 1868; "Perseus and Andromeda," 1872; "More of More Hall and the Dragon," 1873; "Rhodope," 1874; "The Festival" and "The Golden Age," 1875; "Atalanta's Race," 1876; "The Fortune-Teller," his diploma picture, 1877; "Zenobia Captive," 1878; and "Diadumene," 1885. This picture was one of those offering a text to the memorable discussion upon the morality of the nude in art which enlivened the season of 1885. Mr. Poynter also painted cartoons for the mosaic of St. George in the Westminster Palace, 1869; designed the architectural and tile decorations for the grill-room at South Kensington, 1868-70; painted a fresco at St. Stephen's Church, Dulwich, 1872-73; and has exhibited many other smaller works in the Academy and Dudley Water-Colour Exhibitions, and at the Royal Water-Colour Society, of which he is a member. At the Royal Academy in 1889 he exhibited "On the Terrace" and "A Corner in the Villa"; in 1890 "Pea Blossom," "On the Temple Steps"; in 1891, "The Meeting of Solomon and the Queen of Sheba"; a small finished study for the large picture of the same subject, containing more than sixty figures, exhibited at Mr. M'Lean's Gallery in 1890, and since sold to the National Gallery at Sydney in New South Wales; in 1892, "When the World was Young," and two portraits; in 1893, "Chloe," and the design for the border of the Queen's letter to the Nation after the death of the Duke of Clar-

ence; in 1894, "Horæ Serenæ," "Idle Fears," and two sets of designs for the new coinage. In 1895 he exhibited at the Royal Academy's Exhibition "The Ionian Dance"; in 1896, "Neobulè" and "An Oread"; in 1897, "Phyllis," "The Message," and a portrait of Mr. Sidney Colvin, painted for the Society of Dilettanti; and in 1898, a portrait of the Duchess of Somerset in a dress as Lady Jane Seymour, "The Skirt Dance" (a large painting), "Duart Castle," and the frontispiece of the Royal Academy's Address to the Queen on the occasion of the completion of the sixtieth year of her reign. In 1899 he exhibited a portrait of the Hon. Violet Monckton. Other pictures and water-colour drawings have been exhibited from time to time at the Grosvenor and New Galleries. In April 1894 he was appointed Director of the National Gallery in succession to Sir F. Burton. For several years he was Director for Art and Principal of the National Art Training School at South Kensington, but he resigned that office in July 1881, though he consented to continue his connection with the Department as Visitor of the Training School. He is the author of "Ten Lectures on Art," 1879. He married, in 1866, Agnes, daughter of the Rev. J. B. Macdonald. Addresses: 28 Albert Gate, S.W.; and Athenæum.

POYNTING, Professor John Henry, D.Sc., F.R.S., was born on Sept. 9, 1852, at Monton, near Manchester, and is the son of the late Rev. T. Elford Poynting, Unitarian Minister of Monton. He was educated first at a private school conducted by the Rev. T. E. Poynting, afterwards at Owens College, Manchester, and at Trinity College, Cambridge, graduating in Mathematical Tripos in 1876; late Fellow of Trinity College, Cambridge; D.Sc., Cambridge; B.Sc., London and Victoria; F.R.S.; Demonstrator in the Physical Laboratory, Owens College, Manchester, under the late Professor Balfour Stewart, 1876-79; and Professor of Physics at Mason College, Birmingham, 1880. He has written the following papers: "On a Method of Employing the Balance with great delicacy, and on its Employment to determine the Mean Density of the Earth," *Proc. Roy. Soc.*, 1878; "On the Transfer of Energy in the Electromagnetic Field," *Phil. Trans.*, 1884; "On the Connection between the Electric Current and the Electric and Magnetic Induction in the Surrounding Field," *Phil. Trans.*, 1885; "On the Fluctuations in the Price of Wheat," *Proc. of the Stat. Soc.*, 1884; "On a Determination of the Mean Density of the Earth and the Gravitation Constant by means of the Common Balance," *Phil.*

Trans., 1891; and other physical papers. The Adams Prize in the University of Cambridge was awarded to him in 1893 for an essay on the Mean Density of the Earth, since published. In 1880 he married Maria Adney, daughter of the Rev. J. Cropper, late of Stand, near Manchester. Address: Mason University College, Birmingham.

PRAED, Mrs. Campbell Mackworth, *née* Rosa Caroline Murray-Prior, was born March 27, 1852, in Queensland, Australia. On her father's side she is of Irish descent. Her grandfather, Colonel Murray-Prior, fought in the 18th Hussars at Waterloo. Her father, a squatter in Australia, took an active part in Australian political life, and held office as Postmaster-General in several Queensland Ministries. Mrs. Praed grew up between bush life and the life of the rising capital of the colony, Brisbane. In 1872 she married Mr. Campbell Mackworth Praed, nephew of the poet Praed. The first years of her married life were passed on an island off the Queensland coast, bought by her husband as a cattle station. In 1876 she came, for the first time, with him to England. "An Australian Heroine," her first novel, was published in 1880; "Policy and Passion," 1881; "Nadine," 1882; "Moloch," 1883; "Zero," 1884; "Affinities," "Sketches of Australian Life," and "The Head Station," 1885; "The Brother of the Shadow," and "Miss Jacobsen's Chance," 1886; "The Bond of Wedlock," 1887, also dramatised by Mrs. Praed, and produced by Mrs. Bernard-Beere, under the title of "Ariane," in the same year; "The Romance of a Station," published in 1890. She has also written, in collaboration with Mr. Justin McCarthy, "The Right Honourable," published in 1886; "The Rival Princesses," first published anonymously as "The Rebel Rose," 1888; "The Ladies' Gallery" and "The Grey River," in collaboration with Mr. Justin McCarthy and Mr. Mortimer Menpes, by whom the work was illustrated, 1889; "Soul of Countess Adrian," 1891; "Romance of a Chalet," 1892; "Outlaw and Lawmaker," 1893; and "Christina Chard," 1894. Since 1894 Mrs. Praed has travelled to a large extent, and has revisited Australia. Her most recent publications are three books: "Mrs. Tregaskiss" and "Nulina," both novels of Australian life; and in 1898, "The Scourgestick." Permanent address: 75 Elm Park Gardens, S.W.

PRAGA, Alfred, was born at Liverpool in 1861. He studied art firstly at a local art school in connection with the Science and Art Department of South Kensington, where he obtained a National

award for drawing from the antique, and other prizes, and afterwards principally at Heatherley's Art School in Newman Street, and at different periods also at Antwerp and Paris. He exhibited first, about 1885, at the Royal Institute of Painters in Water-Colours, subsequently at the Royal Academy, Royal Society of British Artists, the Dudley and New Galleries, and at Liverpool, Manchester, Leeds, &c. He is occupied chiefly with portraiture, but has also exhibited several subject pictures both in oil and water-colours, notably: "Father, I have Sinned," 1893, and "The Heiress," exhibited in 1895 at the Walker Art Gallery, Liverpool; "A Favourite of the Sultan," Royal Academy, 1894; "Sorrow and Sin," Royal Institute of Painters in Oil, 1894; a portrait of "Mdme. Sarah Grand" shown at the Society of Portrait-Painters' Exhibition at the Grafton Gallery in 1896, and another of J. Lumsden Propert, Esq., the well-known authority and writer on miniature art, at the same Society's exhibition in 1897. He painted during 1898 a life-size presentation portrait of Li Hung Chang, a commission from a merchant in China as a gift to the venerable statesman. Turning his attention latterly to the somewhat neglected art of miniature painting, he founded in 1895 the Society of Miniaturists, of which he has been the Vice-President, Lord Ronald Gower being the first President, and in 1899 became President. The Society grew rapidly, and held an important and highly successful inaugural exhibition at the Grafton Gallery in the autumn of 1896, which was composed not only of the works of members, but included what was perhaps the most important and representative collection of the works of the old masters in miniature art ever before brought together. This exhibition has since been followed by others of equal interest at the same Gallery. Amongst miniatures by Mr. Praga that have been shown both at the Society's exhibitions and at the Royal Academy were portraits of the late Lady Glenesk, Princess Henry of Pless, the Earl and Countess of Egmont, Sir Henry Irving, the late General Alec Fraser, C.B., and the infant son of the Hon. E. Johnstone. A miniature also of Dr. Lumsden Propert, in Georgian court dress, was shown at a recent exhibition at the New Gallery, and this was referred to in the course of a review in *Literature* as being "fine enough to have belonged to an earlier age."* Mr. Praga contributed an article entitled "The Renaissance of Miniature Painting" to the *Magazine of Art* for December 1896, which was illustrated by a miniature of the author's, entitled "Isabel." This was subsequently exhibited at the Royal Academy.

The article dealt chiefly with the revival and the technique of miniature art, and illustrated three different stages of a miniature painted from life. Mr. Praga is married to a lady well known in journalistic circles as a member of the *Daily Telegraph* staff. Address: The Grey House, Kensington.

PREECE, Sir William Henry, K.C.B., F.R.S., V.P.I.C.E., &c., Consulting Engineer to the General Post Office, was born in Carnarvon on Feb. 15, 1834, and is the eldest son of R. M. Preece, Bryn Helen, Carnarvon. He was educated at King's College, London, passing through the School and College. He first entered the engineering office of Mr. Edwin Clark in 1852, passing the next year into the Electric and International Telegraph Company, and became, three years later, superintendent of their southern district. In 1858 he was appointed engineer to the Channel Islands Telegraph Company, and in 1860 superintendent of telegraphs to the London and South-Western Company. On the transfer of the telegraphs to the State, he became a Divisional Engineer, in 1877 was promoted to the post of Chief Electrician, and in 1892 to that of Engineer in Chief, which he held until his retirement, on his sixty-fifth birthday, in Feb. 1899. His researches for the advancement of electricity, his practical inventions, and his reputation as a speaker and lecturer have made his name familiar to many outside the scientific world. He is a prominent member of many of the learned societies, including the Royal Society, the Institution of Civil Engineers, the Electrical Engineers (of which he is a past President), the Physical Society, the Royal Institution, the British Association, and the Society of Arts. He is Consulting Engineer to the Colonies. He was made Officier de la Légion d'Honneur in 1889, and in 1894 was created a Companion of the Order of the Bath, and a K.C.B. at the Birthday, 1899. Sir William Preece has patented many inventions, though of late years his work is lost in that of his department at the General Post Office. These include a new method of duplex telegraphy, 1855; a new mode of "terminating" wires, 1858; working miniature signals by electricity to assimilate electric signals with outdoor signals on railways, 1862; the application of electricity to domestic telegraph purposes, 1864; the application of electricity for signalling between different parts of a train in motion, 1861; locking signals on railways by means of electricity, 1865; a new telephone, 1878, &c. He introduced both the telephone and the phonograph into England. Sir William has written, in conjunc-

tion with Mr. Sivewright, a "Text-book of Telegraphy," which is in general use; with Dr. Julius Maier, "The Telephone"; and with Mr. Stubbs, a "Manual of Telephony." He has edited several works, and read, at various scientific meetings, numerous papers on telegraphy, lightning conductors, the telephone, the phonograph, electric lighting, and various aspects of electricity, too numerous to mention. Address: Gothic Lodge, Wimbledon, &c.

PRENDERGAST, General Sir Harry North Dalrymple, R.E., V.C., K.C.B., born Oct. 15, 1834, in India, is the son of Thomas Prendergast, Madras Civil Service, late of Meldon Lodge, Cheltenham, and was educated at Cheam School, Brighton College, and Addiscombe. He served with the sappers and miners in Persia in 1857, and was present at the bombardment of Mohumrah, and served with the Malwa Field Force. He gained the Victoria Cross for conspicuous bravery on Sept. 23, 1857, at Mundisore, where he was severely wounded; he served throughout the Central India Campaign under Sir Hugh Rose, and was severely wounded at Jhansi. In the Abyssinian war he commanded the detachment of three companies of Madras Sappers and Miners. He was Field Engineer during the advance, and was present at the action before Magdala. During Lord Ripon's Viceroyalty he was appointed an honorary Aide-de-Camp, and has since held many military commands in Madras. When the ultimatum was despatched to King Theebaw, and it was seen that war with Upper Burma was inevitable, he was appointed to the command of the expeditionary force, and lost no time in despatching his troops to the frontier. On the king's refusal of the terms proposed, General Prendergast issued a proclamation declaring that as no improvement could be hoped for in the "condition of affairs in Upper Burma, the Government of India had decided that his Majesty should cease to reign." The expedition proceeded up the river Irrawady, and the troops were engaged at Nyaungben Maw, Guegyaun Kamyo, Minhla, Nyaunggoo, Pakoko, and Myingyan. He reached Mandalay on Nov. 28, 1885, and with his troops surrounded the city and palace. The next day the king surrendered, and thus in less than a fortnight the General conquered the kingdom of Burma, and overthrew the dynasty of Alompra. Burma, of which the area was nearly equal to that of Spain, was annexed to the British Empire, and 1860 pieces of ordnance were taken. General Prendergast was created a C.B. in May 1875, and K.C.B. in December 1885. Sir Harry Prendergast

afterwards commanded all the forces in Burma, and was employed as President at Travancore and at Mysore, and as Governor-General's Agent in Baluchistan and at Baroda, between 1887 and 1892. Permanent address: 2 Heron Court, Richmond, Surrey.

PRESSENSÉ, François Dehault de, is the son of Edmond Dehault de Pressensé, a famous French Protestant preacher and writer, and was born in Paris in 1853. Having obtained the degree of Licentiate of Letters, he entered the Ministry of Foreign Affairs in 1879, and in 1880 became Secretary of the Embassy at Constantinople. Subsequently he deserted diplomacy for journalism, and became one of the staff of the *Temps*, of which he is now the foreign editor. His utterances in this post are studied throughout Europe, being distinguished for a breadth of view and moderation rarely found among his countrymen. In England he is chiefly known as the author of an exhaustive review of the relations between England and Ireland from the Act of Union in 1800 until 1888. In 1897, during the troublous times of the Dreyfus and Zola trials, he honourably distinguished himself by resigning his decoration of the Legion of Honour, as a protest against the intrigues of the ultra-Catholic party. He has also published, in 1896, a sketch of Cardinal Manning. His Paris address is: 85 Boulevard de Port-Royal.

PRÉVOST, Marcel, French novelist, was born at Paris, May 1, 1862, and after a brilliant college career with the Jesuits at Bordeaux and Paris, he entered the Ecole Polytechnique in 1882, and on the completion of his term became a civil engineer, serving in the tobacco manufactories of Gros Caillou, at Paris, and of those of several provincial towns; but he renounced a brilliant career for literature, to which he had been attracted from his earliest years. His first short story, "Conscrad Chanbergeot," was published in the *Clairon* in 1881 under the *nom de plume* of Schlem, and was followed by several others. His first novel, "Le Scorpion," was published serially by *Le Matin*, and appeared in volume form in 1887. His work is especially noteworthy for the delicacy and subtlety of its psychological analysis, and by the sober elegance of its style. His knowledge of the inner workings of the female mind is extensive and remarkable, no doubt a result of his priestly upbringing. His masterpiece is undoubtedly "Les Demi-Vierges," 1894, a scathing picture of the demoralising effect of modern Parisian life on young girls and unmarried women. Other works of his

are: "Chonchette," 1888; "La Confession d'un Amant," 1891; "Lettres de Femmes," 1892; "L'Automne d'une Femme," 1893. He has written a play for the Théâtre Libre, "L'Abbé Pierre," and in 1895 he dramatised "Les Demi-Vierges" for the Gymnase. He is a Chevalier of the Legion of Honour, and his Paris address is 49 Rue Vineuse.

PRIESTLEY, Sir William Overend, M.P., M.D., F.R.C.P., LL.D., born near Leeds, Yorkshire, June 24, 1829, is the son of Joseph Priestley, Esq., of Morley Hall, near Leeds, grand-nephew of the celebrated chemist, Joseph Priestley, LL.D. He was educated in London, Paris, and at the University of Edinburgh, and took the degree of M.D. in 1853. The hon. degree of LL.D. was conferred upon him in 1884. Besides other academic distinctions, he was Senate Gold Medalist at his graduation, this being the highest honour of the University, and awarded only for original researches. Settling in London as a physician in 1856, he became one of the lecturers at the Grosvenor Place School of Medicine. Somewhat later he was appointed Lecturer on Midwifery at the Middlesex Hospital, and in 1862 Professor of Obstetric Medicine in King's College, London, and Physician to King's College Hospital. He is now Consulting Physician to King's College Hospital. Sir William Priestley is a member of the Royal College of Surgeons of England; a Fellow of the Royal College of Physicians both in London and in Edinburgh, a Fellow of the Linnean Society, a Fellow of King's College, a member of the Council of King's College, and member of various learned societies. He has held the office of Examiner for the prescribed term of years in the University of London, the Royal College of Physicians and the Royal College of Surgeons, the University of Cambridge and the Victoria University. In 1875 and 1876 he was President of the Obstetrical Society of London. Sir William Priestley is the author of works "On the Development of the Gravid Uterus," "On the Pathology of Intra-Uterine Death," and joint-editor of Sir J. Y. Simpson's "Obstetric Works"; and has written various papers on natural history and medicine. He was one of the Physicians-Accoucheurs of H.R.H. the late Princess Louis of Hesse (Alice of Great Britain), having been commissioned by the Queen to attend her daughter at Darmstadt. He is also one of the Physicians-Accoucheurs of H.R.H. the Princess Christian of Schleswig-Holstein. He was knighted by the Queen in 1893 in recognition of his professional eminence. He was elected M.P. without contest

for the Universities of Edinburgh and St. Andrews, May 12, 1896, in succession to Sir Charles Pearson, promoted to the Judicial Bench in Scotland. In 1856 he married Eliza, daughter of Robert Chambers, LL.D., of Edinburgh. Addresses: 17 Hertford Street, Mayfair; and Athenæum.

PRINSEP, Valentine Cameron, R.A. (1894), known generally as Val Prinsep, is the son of the late Thoby Prinsep, member of the Council of India, and was born on Valentine's Day, Feb. 14, 1838, in Calcutta. He was educated at home in England, having left India at an early age, and only returning thither to paint his celebrated "Declaration of the Queen as Empress" in 1876, at Lord Lytton's great Durbar at Delhi. This picture was exhibited at the Royal Academy in 1880. He was at first intended for the Civil Service, and studied at Haileybury, but early showed an inclination for the artistic career. His masters were Mr. Watts and Gleyre, at whose studio he had for fellow-pupils Mr. Whistler and Mr. Poynter. His first Royal Academy picture, "Bianca Capella," was exhibited in 1862. He has since been a constant exhibitor. His more recent pictures are: "The Fisherman and the Jin," and "A Family Portrait," 1895; "La Révolution," diploma work, 1896; "At the First Touch of Winter, Summer Fades away," 1897; "Waiting for the Sands," "A Dutch Girl," and "A Student of Necromancy," 1898; and a portrait of Signor Carlo Albanesi and "Cinderella," 1899. Mr. Val Prinsep is also an author, and has published: "Imperial India: an Artist's Journal," 1879; "Virginia," a novel, &c., and two plays, one of which, "Cousin Dick," was produced by Mr. Hare at the Court. Mrs. Val Prinsep is a daughter of the famous picture collector, Mr. Leyland. Addresses: 1 Holland Park Road, Kensington; and Athenæum.

PRIOR, Melton, war correspondent and special war artist to the *Illustrated London News*, was born in London, and is the son of William Henry Prior, an artist in black and white and landscapist. He was educated in Boulogne and London, and since the first Ashantee War, when he marched with Wolseley's men to Coomassie, has represented his famous weekly in more than twenty campaigns. After the Ashantee war, he was in Spain during the Carlist insurrection of 1874, then in the Herzegovina rising, when he accompanied the patriot chief Peco Paolovitch, and was present at the battle of Morartovitz. He was in the Serbian and Russo-Turkish wars, and from 1876 to 1881 was with the British in the Zulu and Boer campaigns.

After a short leave of absence in England, he was present when the English army entered Cairo. The year 1883 was the only period for many years that he saw no active service, but at the beginning of 1884 he was an eye-witness of the destruction of Baker Pasha's army at El Teb, and was soon after with Sir Gerald Graham's army at El Teb and Tamai. He accompanied Wolseley's relief expedition up the Nile and over the Bayada desert, and since then has been through the Burmese war, for which he started immediately after the Soudan operations; the disturbance in South Africa in 1896; the Greek and Turkish war; and the Tuchia rising, 1897. Mr. Melton Prior has been twice round the world, and in nearly every part of America; accompanied the Prince of Wales's suite to Athens in 1875; formed one of the King of Denmark's expedition through Iceland; accompanied the Marquis and Marchioness of Lorne on their first visit to Canada; and was at the Berlin Conference, and, when possible, at every other important State ceremony. In 1873 he married Miss Greeves, the daughter of a surgeon. Address: Millington, Newstead Road, Lee.

PROBYN, Sir Dighton Macnaghten, G.C.V.O., K.C.B., K.C.S.I., &c., Private Secretary to the Prince of Wales, was born in 1833, and is the son of the late Captain G. Probyn and Alicia, daughter of the late Sir F. Workman-Macnaghten, 1st Bart. He entered the army in 1849, and has seen very distinguished military service. Serving on the Trans-Indus frontier from 1852 to 1857, he was present at the operations in the Buzdar Hills in March 1857, and received medal with clasp. In the Indian Mutiny campaign he was present at the whole of the siege of Delhi, with its concomitant engagements, and commanded the 2nd Punjab Cavalry at the assault and capture of the town. For this service he was mentioned in despatches. In the same command he served with the Flying Column under Colonel Greathead, was present at the actions of Bolundshur, Allyghur, and Agra, was four times mentioned in despatches, and was decorated with the V.C. for his bravery in hand-to-hand fights with sepoys and for capturing a standard in the last battle. "These are only a few of the gallant deeds of this brave young officer," said Major-General Sir James Hope Grant, K.C.B., referring to the above-mentioned exploits in the despatches of Jan. 10, 1858. He also took part in the action of Kanouje, the relief of Lucknow by Lord Clyde (when he was twice mentioned in despatches, and thanked by the Governor-General), the

battle of Cawnpore, and the defeat of the Gwalior contingent, the action of the Kale Nuddee, and the storm and capture of Lucknow. For his unexampled prowess he was rewarded with the C.B., the brevet of Major, medal with three clasps, and a year's service. During his leave he was permitted to retain command of the 1st Sikh Irregular Cavalry, this being regarded as a special reward for his services. He commanded this regiment during the China campaign of 1860, was mentioned in despatches, and obtained brevet of Lieutenant-Colonel, together with medal with two clasps. In 1863 he commanded the cavalry in the Umbeyla campaign on the North-West Frontier. In 1877 he became Comptroller and Treasurer of the Prince of Wales's household. He rose to be General in 1888, and was created K.C.B. in 1887. He married, in 1872, Letitia Maria, *née* Thellusson. Addresses: Park House, Sandringham; and 1 Buckingham Gate, S.W.

PROCTOR, Redfield, American soldier and statesman, was born at Proctorsville, Vermont, June 1, 1831, was educated at Dartmouth College, and later studied law. He entered the army during the war between the States as Lieutenant, and was promoted, until he became Colonel of the 15th Vermont Regiment. He was a member of the Lower House of the Vermont Legislature in 1867, 1868, and 1888; was in the State Senate in 1874-75; was Lieut.-Governor of the State from 1876 to 1878, and Governor from 1878 to 1880; was appointed Secretary of War by President Harrison in March 1889, but resigned from the Cabinet in 1891 to enter the United States Senate, where he is at present (1899). Previous to the outbreak of the war with Spain he visited Cuba, and, on his return, a speech by him in Congress gave in cool, dispassionate words such a report of what had fallen under his observation there, that both his colleagues and the people of the country gave their unhesitating support to the policy of intervention by the United States.

PROTHERO, George Walter, Litt.D., editor of the *Quarterly Review*, was born in Wiltshire on Oct. 14, 1848, and is the eldest son of the late Canon Prothero, of Whippingham, Isle of Wight, and Emma, daughter of the Rev. William Money-Kyrle. He was educated at Eton, and at King's College, Cambridge, of which he was a Scholar, and at the University of Bonn. He obtained the Bell Scholarship at Cambridge in 1869, and was in the first class in the Classical Tripos in 1872. He was elected Fellow of King's College, Cambridge, and became Lecturer in History

and Tutor of his College, Cambridge University Extension Lecturer, and Assistant-Master at Eton. He was appointed Professor of History at the University of Edinburgh in 1894, and succeeded his brother, Rowland Edmund Prothero, as editor of the *Quarterly Review* in 1898. His publications are chiefly historical. In 1889 he published a "Memoir of Henry Bradley," the famous Cambridge University librarian. He is editor of the Camb. Historical Series. He was elected to the Athenæum under Rule 2 in April 1899. He married Mary Frances Butler, daughter of the late Bishop of Meath, in 1882. Address: 2 Eton Terrace, Edinburgh; and Athenæum.

PROTHERO, Rowland Edmund, was born at Clifton-on-Teme on Sept. 6, 1852, and is the third son of the late Canon Prothero, well known as Rector of Whippingham in the days when the Queen frequently visited that parish. He was educated at Marlborough and at Balliol College, Oxford, where he was placed in the second class in Classical Moderations (1873), and in the first class in Modern History in 1875. He was Fellow of All Souls from 1875 to 1891, was Proctor in 1883-84, and in 1897 was awarded the Jubilee Medal. For many years (to 1898) he was editor of the *Quarterly Review*. His works, which, like his brother's, are numerous, include "Life and Correspondence of Dean Stanley," 1893; "Letters and Verses of Dean Stanley," 1895; "Letters of Edward Gibbon," 1896; a privately circulated memoir of the late Prince Henry of Battenberg; and "Letters and Journals of Lord Byron," vols. I. and II., 1898. He married, in 1891, Mary Beatrice, daughter of John Bailward, of Horsington Manor, Somerset. Addresses: 3 Cheyne Walk, Chelsea, S.W.; and Athenæum.

PUCCHINI, Giacomo, Italian composer, was born at Lucca in 1858, and comes of a family of musicians, his grandfather being celebrated for his church music. He was educated under Ponchielli at Milan, where Mascagni was a fellow-student. In 1884 he composed a short opera, "Le Villi," and in 1889 his "Edgar" was produced at La Scala. He acquired fame by his "Manon Lescaut," which was produced at the Regio at Turin in February 1893, and was heard at Covent Garden in the next year. This he followed up in 1896 with "La Bohème," which was founded on Henri Murger's novel.

PULLEINE, The Right Rev. John James, D.D., Bishop Suffragan of Richmond, son of the Rev. Robert Pullaine,

Rector of Kirkby Wiske, Yorks., was born Sept. 10, 1841, at Spennithorne in Wensleydale. He was educated at Marlborough, and afterwards became Scholar of Trinity College, Cambridge, and B.A. (2nd class Classical Tripos) 1865. He was Assistant-Master to Dr. Bradley at Marlborough, 1865 to 1867; served as Curate of St. Giles in the Fields, 1868; and during his tenure of the Rectory of Kirkby Wiske, 1868 to 1888, was chaplain successively to Bishops Bickersteth and Carpenter. In 1888 he was appointed Suffragan to the Bishop of Ripon, and Rector of Stanhope in Weardale. The title of Bishop of Penrith, which he received at his consecration, was afterwards changed by Royal Warrant to Bishop of Richmond under the Bishops-Suffragan Nomination Act, 1889. He married (1), in 1869, Elizabeth, eldest daughter of T. C. Hinks, of Breakenbrough, Yorks.; and (2) Louisa, daughter of Canon Worsley of Ripon. Address: Stanhope Rectory, R.S.O., Durham.

PURDIE, Thomas, B.Sc. Lond., Ph.D. Würzburg, LL.D. Aberdeen, F.R.S., Professor of Chemistry at the United College, University of St. Andrews, was born at Biggar, Lanarkshire, on Jan. 27, 1843, and received his education at the Grammar School, Lanark, at Edinburgh Academy, and at the Royal School of Mines, London, afterwards studying at the Universities of St. Andrews and Würzburg. He is an Associate of the Royal School of Mines, and in 1875 was appointed its Demonstrator in Chemistry. In 1881 he was appointed Science Master at the High School, Newcastle, Staffs., and in 1884 to his present post. He is author of a series of papers on researches in Organic Chemistry, published in the *Journal of the Chemical Society* between 1881 and 1898. Address: 14 South Street, St. Andrews.

PUREY-CUST, The Very Rev. Arthur Percival, D.D., F.S.A., J.P., Dean of York, is the only surviving son of the late Hon. William Cust, by Sophia, daughter of the late Mr. Thomas Newnham, of Southborough, Kent, and grandson of the first Lord Brownlow. He was born in February 1828, and was educated at Brasenose College, Oxford, where he took his bachelor's degree in Easter Term, 1850, and was afterwards Fellow of All Souls, where he graduated M.A. in 1854. He was ordained Deacon by the Bishop of Oxford (Dr. Wilberforce) in 1851, and was admitted into Priest's orders by the Bishop of Rochester (Dr. Murray) in the following year. He was successively Curate of Northchurch, Hertfordshire, and Rector of Cheddington, Buckinghamshire, from 1853 to 1862, when he was appointed Vicar of

St. Mary's, Reading. He was subsequently appointed Rural Dean of Reading, and succeeded the Ven. Edward Bickersteth in the vicarage of Aylesbury in 1875, but resigned that living in the following year, on being made Archdeacon of Buckingham. He was also appointed an Honorary Canon of Christ Church, Oxford, in 1874. In February 1880 he was nominated by the Crown, on the recommendation of Lord Beaconsfield, to the Deanery of York, vacant by the death of the Hon. Augustus Duncombe. He has published, besides numerous magazine articles, &c., "The Heraldry of York Minster," 1st series, 1890, 2nd series, 1896; "Picturesque Old York," and "York Minster," 1897. He married, in 1854, Lady Emma Bess Bligh, younger daughter of the late, and sister of the present, Earl of Darnley. Address: The Deanery, York.

PYE-SMITH, Philip Henry, M.D., F.R.C.P., F.R.S., son of Ebenezer Pye-Smith, and grandson of John Pye-Smith, D.D., F.R.S., was educated at Mill Hill School, Guy's Hospital, and Continental schools, and graduated B.A. (Honours) and M.D. (Gold Medal) of London University. He was formerly Lecturer on Physiology at Guy's, and is now Physician and Lecturer on Medicine at that Hospital. He became F.R.S. in 1886, served on the Council of the Royal Society in 1891-92, is member of the Senate of the University of London, Fellow of the Royal Med. Chir. Soc., Ex-President of the Dermatological Society, &c. He has published the "Descriptive Catalogue of the Museum of Comparative Anatomy at Guy's Hospital," 1874; "Medical Education and University Degrees," 1880; a reprint of his Address to the Department of Anatomy and Physiology of the British Association, 1879; a reprint of his Address to the Section of Medicine of the British Medical Association, 1891; "Harvey" in 9th edit. of the "Encyclopædia Britannica"; reprints of the Lumslean Lectures on Ætiology and the Harveian Oration, 1895, and numerous contributions to the medical transactions and journals. He was joint-author of the well-known text-book, Pagge's "Medicine," 4th edit., 1898. Addresses: 48 Brook Street, Grosvenor Square; and Athenæum.

PYNE, James Kendrick, authority on organs and organ music, is the eldest son of Mr. Pyne, who was for 53 years organist of Bath Abbey, and the grandson of a celebrated tenor singer. He showed signs of musical talent at an early age, and when only eleven years old was organist at All Saints' Church, Bath. At the age of twelve he was articled as pupil to Dr. S. S. Wesley, whom he followed to

Winchester and Gloucester Cathedrals, where he acted as assistant organist and master of the boys. At Gloucester he was also successively organist of Christ Church, St. Mark's, St. Mary-le-Crypt, and St. James's, Cheltenham. In addition to this he was Chorus Master of the Festival Society, and conductor to the Oratorio Society. After serving his apprenticeship, he was made organist of Aylesbury Parish Church, at the suggestion of Sir F. Gore Ouseley, and organising conductor to the Buckingham Diocesan Choral Association. He was then for a short time at Christ Church, Clifton. In 1874 he was appointed organist of Chichester Cathedral, and in 1875 became organist of St. Mark's, Philadelphia, U.S.A., where he arranged a service on English cathedral lines. In 1876 he returned to England and succeeded Dr. Bridge as organist of Manchester Cathedral. Here he has won celebrity as a trainer of choristers and as an authority on church music and antique instruments. He has strong sympathies with French music, and as organist to the Corporation of Manchester, to which post he was appointed in 1877, performs on a magnificent French instrument by Cavallé-Coll, which he values for its "absolute refinement" and "character of tone." During the winter he gives organ recitals in Manchester Town Hall. He was appointed Professor of the Organ, and member of the Board of Professors in the Royal Manchester College of Music, when it was founded in 1893. He is the author of some cathedral, organ, piano, and vocal music. Mr. Pyne is an Hon. Fellow of the College of Organists, Hon. Licentiate of Trinity College, and a Vice-President of the Guild of Organists. Address: Crayford, Victoria Park, Manchester.

PYNE, Mrs. Louisa. See BODDA-PYNE, LOUISA.

Q

Q.E.D. See CAMPBELL, LADY COLIN.

QUESNAY DE BEAUREPAIRE, Jules, French magistrate, was born at Saumur, July 2, 1838, and entered the legal profession under the Empire. In 1862 he was a substitute at La Flèche, and in 1867 Procureur at Mamers. On the fall of the Empire he became a volunteer in the war, took part in the defence of Paris, and, on the declaration of peace, became editor of *L'Avenir de la Sarthe*. In 1877 he attempted to enter Parliament, but was defeated by the Duc de la Rochefoucauld, and subsequently re-entered the law. In

1879 he became substitute at the Tribunal of the Seine, Procureur-Général at Rennes in 1881, and Avocat-Général at Paris in 1883. In this last-named post he had to prosecute Louise Michel for urging the people to loot the bakehouses. M. de Beaurepaire first came prominently into public notice during the Boulangist agitation of 1889. In that year M. Bouchez, the Procureur-Général, refused to prosecute the General, and resigned his post. M. de Beaurepaire was nominated to it on the 1st of April in that year, and undertook the prosecution of the General and of M. Rochefort before the Senate in August, when they were condemned to imprisonment for life. He became the object of the most outrageous attacks from the Boulangist press, such as *La Cocarde* and *L'Intransigant*, against which he brought suits for damages, which were dismissed on appeal. In 1890 he prosecuted Eyraud and Gabrielle Bompard for the murder of Gouffé, and in 1892 the anarchist Ravachol. In December of that year he was promoted to the Presidency of the Cour de Cassation, which he resigned in January 1899 somewhat melodramatically, giving as his reasons the partiality of the judges of the Court in their investigation of the Dreyfus imbroglio. His "Revelations" in the *Echo de Paris* fell somewhat flat. M. de Beaurepaire is also known as an author of moral novels, which he has written under the pseudonym of Jules de Glouvet. Of these the chief are: "Le Forestier," 1880; "Le Berger," 1882; "L'Idéal," 1883; "La Famille Bourgeoise," 1883; "Le Père," 1886; "Marie Fougère," 1889; and extracts from his uncle's papers, which he called "Histoire du Vieux Temps," 1865; 3rd edit., 1888. He was created a Commander of the Legion of Honour in 1890, and his Paris address is 4 Place Possoz.

QUILTER, Sir W. Cuthbert, Bart., M.P., is the eldest son of the late W. Quilter, of Norfolk Street, Park Lane, W., and was born in 1841. He was educated privately. He is head of the firm of Quilter, Balfour & Co., and Director and one of the founders of the National Telephone Company, Alderman of the West Suffolk County Council, a leading East Anglian agriculturist, D.L. and J.P. for his county, &c. He was created a Baronet in 1897, and has sat in the House of Commons for the Sudbury Division since 1885. He married Mary, daughter of the late John Wheeley Revington, in 1867. Addresses: 74 South Audley Street, W., and Bawdssey Manor, Suffolk.

QUINCKE, Professor Georg, Ph.D., F.R.S., F.R.S.E., was born at Frankfurt-

an-der-Oder, Prussia, on Nov. 19, 1834, and studied in Berlin, Königsberg, and Heidelberg; obtained the degree of Doctor of Philosophy in Berlin in 1858, and has since been Professor of Physics in Berlin, Würzburg, and Heidelberg. He has published numerous papers on electricity, capillarity and molecular forces, acoustics, and optics, in *Poggendorff's Annalen*, *Pflüger's Archiv*, &c. Professor Quincke is a Fellow of the Royal Societies of London and of Edinburgh.

R

RADNOR, Earl of, The Right Hon. William Pleydell-Bouverie, Bart., D.L., J.P., was born on June 19, 1841, and is the son of the 4th Earl, whom he succeeded in 1889, and Mary, daughter of the 1st Earl of Verulam. He was educated at Harrow and at Trinity College, Cambridge. He represented South Wilts in the House of Commons from 1874 to 1885, and the Enfield Division from 1885 to 1889. He was Treasurer of the Household in 1885-86 and 1886-89, and is Prov. Grand Master of Mark Masons for Wiltshire. He married, in 1866, Helen, daughter of the late Rev. Henry Chaplin, son of the Right Hon. Henry Chaplin. Addresses: 12 Upper Brook Street, W.; and Longford Castle, Salisbury, &c.

RAGONA, Professor Domenico, Director of the Royal Observatory in Modena, was born in Palermo on Jan. 20, 1820, and studied in that Royal University. He derived very great advantage from the private instruction of his maternal uncle Domenico Scina, a celebrated Sicilian scientist. Whilst still very young, after the death of Scina, he competed for and obtained the post of demonstrator and Assistant-Professor of Physics at the University of Palermo. Afterwards he was appointed assistant at the Royal Observatory of Palermo. In 1851, after having carried out long and arduous astronomical and geodesical observations with regard to the triangulation of the province of Palermo, he was sent, at the expense of the government, to Germany for some years, in order to perfect himself in the science of astronomy. He had excellent theoretical and practical instruction in Berlin from Professor Encke, and in Bonn from Argelander. In Berlin he had the honour of enjoying the friendship of Baron A. von Humboldt, through whose powerful influence Ragona obtained a Merz's refractor of great dimensions, and one of Pistor and Martin's meridian-circles, instruments which now adorn the Obser-

vatory of Palermo. On his return after his long travels, and after having visited the principal observatories of Europe, he was appointed director of the Observatory of Palermo and Professor of Astronomy. He held that post up to 1860, and then was transferred to the Observatory of Modena, where he is still. As regards the astronomical works of Professor Ragona, it is sufficient to mention the observations carried on in Berlin, and published in the *Transactions* of that observatory; the numerous determinations of fixed stars, and principally of 30 fundamental or principal stars; the observations of a great number of planets and comets, published in the *Bulletin International* of Le Verrier and in the *Astro-Meteorological Journal* of Palermo; the invention of two new micrometers; the measurements of the diameters of various planets, published in the *Memoirs of the Society of Natural Sciences of Cherbourg*, &c.; the Ephemerides of Vesta for 1855, published in the Berlin Annals; the calculations of the orbits of planets and comets, printed separately, and in the above-mentioned *Astro-Meteorological Journal*; the treatise on the theory of the equatorial; and the new formulæ for the calculations of the parallax. Among his works with regard to Physics may be mentioned the notes on the phenomena of deflection causing the longitudinal lines or bands of the spectrum, published in *Poggendorff's Annalen*, and reproduced in the *Philosophical Magazine*; and the observations on some new subjective coloration discovered by Ragona, which observations were printed in many scientific journals of Europe, and mentioned by Helmholtz in his classical work, "Physiological Optics." Professor Ragona has published numerous papers on meteorology. They contain many new and fundamental laws in meteorology, especially his annual and diurnal periods of meteorological elements; on the daily oscillations in the declination of the magnetic needle; on the velocity of the wind; on nebulosity, &c., as also on the relation of meteorology to terrestrial magnetism. Professor Ragona has not only published many dissertations on various subjects relating to meteorology and magnetism, but what is much more, has also enriched these branches with many new instruments. Ragona founded the Italian Meteorological Society, and presided over it for the first three years, when he was succeeded by Father Denza. Professor Ragona also translated from German into Italian the classical treatise on meteorology by Professor Mohn. Professor Ragona founded, in 1870, a network of meteorological field-stations in the province of Modena, the first in Italy provided with that useful

arrangement. Professor Günther, in his account of the present state of practical meteorology, and Professor Kuhn, in his report to the Royal Academy of Sciences of Bavaria on some works of Ragona, count him among the most illustrious meteorologists of our time.

RAILTON, Herbert, etcher, was born at Pleasington, Lancs., on Nov. 21, 1857, and educated at Mechlin, and at Ampleforth College, Yorkshire. He is well known as a black-and-white artist, and has, besides contributing numberless drawings of architectural and other subjects to the illustrated press, been the illustrator of a work on Westminster Abbey, of a jubilee edition of *Pickwick* (1887), and of "Coaching Days and Coaching Ways," in 1888, a work in which he collaborated with Mr. Hugh Thomson. Address: 27 Chancery Lane, E.C.

RAIMOND, Mrs. C. E. See **ROBINS, ELIZABETH**.

RAMBAUD, Alfred, ex-Minister of Public Instruction, was born at Besançon, July 2, 1842. He was educated at the École Normale, and became Doctor of Letters in 1870. He was Professor of History at Caen in 1871, and at Nancy, 1875. In 1879, Jules Ferry made him his secretary at the Ministry of Public Instruction, when he delivered a most brilliant address on the life and writings of Victor Hugo, at the commemoration of his birth at Besançon in 1880. After the fall of the Ferry Cabinet, he became Professor of History in Paris, and in 1895 he was elected Senator for the Doubs. He is an Officer of the Legion of Honour, and a member of the Academy of Moral Sciences. In 1896 he became Minister of Public Instruction in the Méline Cabinet, until its fall in 1898. His chief works are "La Russie Épique," 1876; "Histoire de la Russie," 1878; "La France Coloniale," 1886; "Histoire de la Civilisation Française," 1887; and with M. Lavissee he edits a general history of France from the fourth century up to the present day. His Paris address is 76 Rue d'Assas.]

RAMPOLLA, Cardinal Mariano, Marquis del Tindaro, Papal Foreign Secretary of State, was born at Polizzi, in Sicily, Aug. 17, 1843, and was educated at Rome, firstly at the College Campranica, then at the Jesuit Roman College, and lastly at the Ecclesiastical Academy. In 1869 he entered the Papal service, and until 1875 he served his apprenticeship at Rome. In that year he was appointed Counsellor of the Papal Embassy at Madrid. When he returned to Rome he

became Secretary of the Congregation of the Propaganda, being especially charged with the affairs of the Greek Church. From 1880 to 1882 he was Secretary of Ecclesiastical Affairs, and in the latter year became Papal Nuncio at Madrid. When the dispute as to the Caroline Islands, between Spain and Germany, broke out in 1885, Monsignor Rampolla suggested the choice of the Pope as arbitrator. He was created a Cardinal Priest in 1887, and in May of the same year became Under-Secretary of State. In this post it has been his duty to conduct the delicate negotiations between the Quirinal and the Vatican, especially with regard to the Penal Laws directed against the clergy by the Crispi Cabinet. He is now the chief adviser of the venerable Pontiff, and as the introducer of foreigners, has earned a very favourable fame. Among the *Papabili*, or probable successors to the present Pope, he is regarded as the most eligible candidate, his supporters being the prelates of the Latin races as opposed to the Austrian and German dignitaries, who do not favour him owing to his opposition to the Triple Alliance.

RAMSAY, Professor William, LL.D., D.Sc., Ph.D., F.R.S., was born at Glasgow, Oct. 2, 1852; his father, of the same name, was a civil engineer, and subsequently Secretary to the Scottish Union and National Insurance Office; he was brother to Sir Andrew Ramsay, the geologist; his mother, Catherine Robertson, was the daughter of Archibald Robertson, M.D., who practised in Edinburgh. William Ramsay was educated at the Glasgow Academy up till his fifteenth year, and subsequently at Glasgow University. At the age of nineteen he went to Tübingen to study chemistry under Professor Fittig, now at Strasburg, and graduated Ph.D. in 1872. From 1872 to 1874 he acted as Chief Assistant to the "Young" Chair of Technical Chemistry in Anderson's College, Glasgow; and from 1874 to 1880 as "Tutorial" Assistant to the Chemical Professor in Glasgow University. He was appointed Professor of Chemistry in University College, Bristol, in 1880; Principal of that College in 1881; was President of the Bristol Naturalists' Society from 1884 to 1887; was appointed to the Chemical Chair at University College, London, in 1887, which appointment he now holds. He was elected a Fellow of the German Chemical Society in 1872; of the Chemical Society of London in 1874; and is one of the original members of the Institute of Chemistry, and of the Society of Chemical Industry. He was elected a Fellow of the Physical Society in 1886, and of the Royal Society

of London in 1888; and has served on the Councils of all these societies. He is an Hon. LL.D. of Glasgow, and Hon. D.Sc. of Dublin (1897); Officer of the Legion of Honour, and Corresponding Member of the Institute of France (1895), and Honorary Member of the Academies of Berlin, Holland, Bohemia, Turin, Stockholm, and Geneva; and of the Royal Irish Academy. He is the author of many papers in the *Transactions of the Chemical Society*, the *Philosophical Magazine*, the *Proceedings and Transactions of the Royal Society*, and in many foreign journals; these papers treat of organic chemistry (orthotonic acids, picoline and its derivatives); physical chemistry (molecular volumes, thermal behaviour of gases and liquids, surface energy of liquids). In 1894, in conjunction with Lord Rayleigh, Professor Ramsay announced the discovery of a new element in the atmosphere, which they named "Argon." This discovery was followed up, in 1895, by the discovery of Helium, an elementary gas emitting a brilliant spectrum, under the influence of the electric discharges. One of the characteristic lines of this spectrum was first observed during the eclipse of 1868, in the solar chromosphere by Janssen, and attributed to the presence of an unknown element in the sun. Professor Ramsay found that certain rare minerals contain this gas in a state of combination, and was successful in isolating it. For their researches on Argon Lord Rayleigh and Prof. Ramsay were awarded the Hodgkins Prize, the Leconte Prize, and the Barnard Medal; and for his work on Helium Prof. Ramsay was awarded the Davy Medal, the Longstaff Medal, and the Le Blanc Medal. In June 1898 Prof. Ramsay announced, through Prof. Berthelot, at the Academy of Sciences of Paris, that he had discovered a new gas which he proposed to call "Crypton." The presence of Crypton was first detected by the existence in the spectrum of a green line. It belongs, not to the Crypton, but to the Helium family, and its density is somewhat more than that of oxygen. To all appearances it is a simple monatomic body. Prof. Ramsay is also the author of several text-books of chemistry, the most important of which are his "System of Inorganic Chemistry," and his "Gases of the Atmosphere." Address: University College, Gower Street, W.C.

RAMSAY, William Mitchell, D.C.L. Oxon., LL.D. St. Andrews, born at Glasgow on March 15, 1851, was the son of Thomas Ramsay, of Alloa, and Jane Mitchell, and was educated at the Gymnasium, Old Aberdeen, and at the Universities of Aberdeen, Göttingen, and Oxford. He

received the Hon. D.C.L. of Oxford in 1894; the Hon. LL.D. of St. Andrews in 1895; became Fellow of Exeter in 1882, and of Lincoln College, Oxford, in 1885. He was appointed Professor of Classical Archaeology at Oxford in 1885; and Professor of Humanity at Aberdeen in 1886. Dr. Ramsay has travelled widely in Asiatic Turkey, and in 1895 was made an Hon. Member of the Athenian Archaeological Society. His principal works are: "Historical Geography of Asia Minor," 1890; "The Church in the Roman Empire before A.D. 170," 1893; "St. Paul the Traveller and the Roman Citizen," 1895; "The Cities and Bishoprics of Phrygia," vol. i., 1895; vol. ii., 1897; "Impressions of Turkey during Twelve Years' Wanderings," 1897, and numerous articles in German, French, American, and English literary and archaeological magazines. He married, in 1878, Agnes, granddaughter of Rev. Dr. Andrew Marshall, of Kirkintilloch, authoress of "Every-day Life in Turkey," 1897. Addresses: 11 College Bounds, Old Aberdeen; and Athenæum.

RANAVALO MANJAKA III., late Queen of Madagascar, was born in 1861, and succeeded Ranavalona II. in 1883. The power was, however, really in the hands of the Prime Minister, Rainilaiarivony, who, in accordance with Madagascar custom, had married her. In 1895 he was deposed, and he died in 1896. The Queen was a woman of mean and secluded habits, although during the latter years of her reign she made more than one effort to assert her power as against her Ministerial consort. The country had hitherto been a French Protectorate, but in 1895-96, owing to differences between the Government and the French authorities, France sent an expedition to the island, seized the kingdom and capital, and converted the country into a French colony. In January 1897, as a consequence of sundry insurrections, it was deemed necessary to exile the Queen to Réunion, her name being used, so the French Governor asserted, to foment popular risings.

RANDALL, Right Rev. James Leslie, Suffragan Bishop of Reading, received his education at New College, Oxford, where he graduated as B.A. in 1852 (M.A. 1855, Hon. D.D. 1889). He was for some time a Fellow of his College, and from 1852 to 1857 was curate of Warfield, Berks. From 1857 to 1878 he was Rector of Newbury, and Rural Dean of the same from 1867 to 1878. From 1878 to 1880, when he became Hon. Canon of Christ Church, he was Rector of Sandhurst, and from 1882 to 1885 Rector of

Mixbury, Oxon. He was appointed Archdeacon of Buckingham in 1880, and continued in that position until 1895. On Nov. 1, 1889, he was consecrated Bishop Suffragan of Reading in Westminster Abbey. Since 1895 he has been Archdeacon of Oxford and Canon of Christ Church. Mrs. Randall, *née* Bruxner, died in April 1899. Address: Christ Church, Oxford.

RANDALL, The Very Rev. Richard William, D.D., Dean of Chichester, was born in London on April 13, 1824, and is the eldest son of the late Archdeacon Randall. He was educated at Winchester and Christ Church, Oxford. He was ordained in 1847, and was Rector of Lavington, Sussex, and as such succeeded Archdeacon, afterwards Cardinal, Manning from 1851 to 1868, when he was appointed Vicar of All Saints, Clifton. In 1892 he became Dean of Chichester. He was Select Preacher to the University of Oxford in 1891-92. He has published several volumes of sermons, "Life in the Catholic Church," "Retreat Meditations and Addresses," &c. Address: The Deanery, Chichester.

RANDEGGER, Cavaliere Alberto, composer, conductor, and singing-master, was born at Trieste, April 13, 1832. He began the study of music at the age of thirteen, under Lafont for the pianoforte and L. Ricci for composition; and soon began to write, and, by the year 1852, was known as the composer of several masses and smaller pieces of church music, and two ballets, "La Fidanziata di Castellamare," and "La Sposa d'Appenzello," both produced at the Teatro Grande of his native town. In the latter year he joined three other of Ricci's pupils in the composition of a buffo opera to a libretto by Gaetano Rossi, entitled "Il Lazzarone," which had much success, first at the Teatro Mauroner at Trieste, and then elsewhere. The next two years were occupied as musical director of theatres at Fiume, Zara, Sinigaglia, Brescia, and Venice. In the winter of 1854 he brought out a tragic opera in four acts, called "Bianca Capello," at the chief theatre at Brescia. At that time Signor Randegger was induced to come to London. He gradually took a high position there, and has become widely known as a teacher of singing, conductor, and composer, and an enthusiastic lover of good music, of whatever school or country. In 1864 he produced at the Theatre Royal, Leeds, "The Rival Beauties," a comic opera in two acts. In 1868 he became Professor of Singing at the Royal Academy of Music, and has since been a Director of that Institution,

and a Member of the Committee of Management. In the autumn of 1857 he conducted a series of Italian operas at St. James's Theatre; and in 1879-80 the Carl Rosa Company at Her Majesty's Theatre. He has since been appointed Conductor of the Norwich Festival, *vice* Sir Julius Benedict, resigned. For the last ten years he has conducted Italian opera at Covent Garden, and he is Conductor of the Queen's Hall Sunday Orchestral Concerts and the Queen's Hall Choral Society. In 1892 Signor Randegger was made a Knight of the Crown of Italy. Signor Randegger's published works are numerous and important. Address: Royal Academy of Music, Hanover Square, W.

RANDOLPH, The Rev. Francis Charles Hingston. See HINGSTON-RANDOLPH, THE REV. F. C.

RANFURLY, Earl of, Uchter John Mark Knox, K.C.M.G., D.L., J.P., Governor of New Zealand, was born Aug. 14, 1856, and is the younger son of the 3rd Earl, and Mary, daughter of James Rimington, Esq. He was educated at Harrow, and Trinity College, Cambridge, serving for some time in the Royal Navy. On the death of his elder brother in 1875 he succeeded to the title. In 1880 he married the Hon. Constance Elizabeth Caulfield, daughter of the 7th Viscount Charlemont, and has one son, Viscount Northland, born in 1882. On Lord Salisbury taking office in 1895, he was appointed a Lord-in-Waiting to the Queen, a position which he held until he accepted his present post, Mar. 27, 1897. He is a Knight of the Order of St. John of Jerusalem. Address: Government House, Wellington, N.Z.

RANJITSINGHI, Prince Kumar Shri, Indian cricketer, was born at Sardar on Sept. 10, 1872. He first played his favourite pastime at the Rajkumar College, Rajkoti, and directly on his arrival at Trinity College, Cambridge, in 1889, began a scientific study of the game. In 1893 he played for the University, and in 1895 he qualified for Sussex, when he finished the season as third in the list of averages. In 1896 he became champion batsman of all England, with an average of nearly sixty. During the winter of 1897 he was with Stoddart's eleven in Australia, and stopped in India on his way back to regain some of his paternal estates. He has published the "Jubilee Book of Cricket," 1897, and is a great favourite with the London cricket world, who style him "Ranji."

RANSOME, Arthur, M.A. Cantab., M.D., M.R.C.P., F.R.S., the son of the late

Joseph A. Ransome, twenty years' surgeon to the Manchester Royal Infirmary, and of Eliza, third daughter of Joseph Brookhouse, of Derby, was born at Manchester on Feb. 11, 1834, and was educated at Manchester, Dublin, Cambridge, London, and Paris. He took diploma as licentiate in midwifery, Dublin, 1853; M.R.C.S. 1855; L.S.A. 1856; M.B. Cambridge, 1858; M.D. Cambridge, 1869; and was elected F.R.S. in 1885; and Hon. Fellow of Caius College in 1892. When at Cambridge, at Gonville and Caius College, he was Caius Scholar in Anatomy and Physiology, and Mecklenburg Scholar in Chemistry. He obtained honours in Mathematics in the second class (Senior Optimes) in 1856; and first class in the Natural Science Tripos. He was Honorary Secretary and Lecturer in Physiology to the Working-Men's College, Manchester, from 1857 to 1860. He joined the Committee of the Manchester and Salford Sanitary Association in 1857; was Honorary Secretary in 1861 and 1862; Deputy-Chairman from 1874-80; and was Chairman from 1880 to 1894. During that period he has taken an active part in assisting the Association in the formation of the following institutions: The Nurse Training, the North-Western Association for Medical Officers of Health, Noxious Vapours Prevention Association, the Day Nursery Association, and the Children's Country Holiday Fund. He was instrumental in promoting weekly returns of sickness, which were for twenty years published by the Association. The success of the undertaking and Dr. Ransome's efforts, first as Honorary Secretary, and afterwards as Chairman of the Registration of Disease Committee, have materially forwarded the notification of infectious sickness throughout the country. In connection with this subject he wrote pamphlets on "Numerical Tests of the Health of Towns," "Epidemics Studied by Means of Statistics of Disease," "Disease in St. Marylebone and Manchester," "Ten Years of Disease, between 1861 and 1870, in Manchester and Salford." To the Manchester Literary and Philosophical Society he has contributed papers on the "Influence of Atmospheric Changes on Disease," "Atmospheric Pressure and its Relations to Disease, especially Hæmorrhages," "The Germination and Early Growth of Seeds," "On the Organic Matter of the Breath," "On Epidemic Cycles," and "On the Graphical Representation of Chest Movements." In the *Proceedings of the Royal Society* he has published papers on the "Movements of the Chest," and on the "Discovery of the Tubercle Bacillus in the Aqueous Vapour of the Breath." To the Epidemiological Society he has commu-

nicated papers published in their *Transactions*, "On the Form of the Epidemic Wave," and "On Tubercular Infective Areas"; to the Medico-Chirurgical Society "On Respiratory Movements of Man," and "Observations on the Value of Stethometry in the Prognosis of Chest Diseases"; to the British Medical Association, and published in their journal, "On the Need of Combined Medical Observation," "On the Physiological Relations of Colloid Substances," and numerous other papers, also papers in the *Lancet* and *Medical Chronicle*. To the *Health Journal* he has contributed papers "On the Distribution of Death and Disease," and the "Causes of Consumption." He has published five larger works on "Stethometry," on "Prognosis in Lung Disease," "On the Cause and Prevention of Phthisis," "On the Treatment of Phthisis," and the Weber-Parkes Prize Essay for 1897, "Researches on Tuberculosis" (Smith, Elder & Co.). As President of the Health Section of the British Medical Association and in other capacities, he has delivered several addresses relating to "State Medicine," and before the Sanitary Institute he has lectured on the "Success of Sanitary Effort," and "On the Prevention of Phthisis." He was instrumental in organising the Collective Investigation of Disease by the British Medical Association; and in 1875 his suggestions for an examination in Sanitary Science were adopted by the University of Cambridge; the result of which has ultimately been the issue of Diplomas in Public Health by all the universities of the kingdom. He holds an appointment as Honorary Consulting Physician to the Manchester Hospital for Consumption and Diseases of the Throat; and in connection with this work has published papers "On the Influence of Iodoform upon the Body-weight in Phthisis," "On the Value of the Bacillus Search," "On the Use of Ozone in Phthisis," "On Intrapulmonary Injections." He was for two years Examiner for the second M.B. to the University of Cambridge, and for seven years for the Diploma in Public Health of the same University. He was until 1895 Examiner in Hygiene and Public Health to the Victoria University, and Professor on these subjects to the Owens College. He was again appointed Examiner in Public Health at Cambridge in 1893, and was appointed Milroy Lecturer to the College of Physicians for the year 1890, his subject for four lectures being "The Etiology and Prevention of Phthisis," afterwards published in book form by Smith, Elder and Co. He has contributed an article on Vital Statistics to a "Treatise on Hygiene and Public Health," published by Messrs. Churchill & Co. He is also the

author of an article "On the General Pathology of Respiratory Diseases," in Dr. Clifford Allbutt's "System of Medicine." In 1862 he married Lucy Elizabeth Fullarton. Address: Sunnyhurst, Bournemouth.

RASCH, Major Frederic Carne, M.P., J.P., D.L., was born in 1847, and is the son of A. F. C. Rasch, of Woodhill, Danbury, Essex. He was educated at Eton, and at Cambridge (B.A.), served from 1867 to 1877 in the 6th Dragoon Guards, and subsequently entered the Essex Regiment. He is Major of the 4th Battalion of the same. He has sat as Conservative Member for S.E. Essex from 1886 onwards. He is J.P. and D.L. for Essex. Address: Woodhill, Danbury, Essex.

RASSAM, Hormuzd, was born in 1826, at Mossul, in Northern Mesopotamia, on the bank of the Tigris, opposite the site of ancient Nineveh. In 1845 he joined Mr. Layard to assist him in his Assyrian researches, and lived with him as his friend and guest for more than two years. When Mr. Layard returned to England in 1847 Mr. Rassam came with him to complete his studies at Oxford, but at the end of 1849 he was sent out by the Trustees of the British Museum to assist Mr. Layard in his second undertaking. The history of this mission was published by Mr. Layard in his "Nineveh and Babylon." The Trustees having determined to carry on further researches, they commissioned Mr. Rassam to succeed him. During this expedition Mr. Rassam discovered in Nineveh the palace of Assur-Bani-Pal, who is commonly known by the name of Sardanapalus, in which there were found the beautiful sculptures representing the lion hunt, now in the British Museum, and the legends of the Creation and Deluge, with many other remarkable antiquities relating to the history of the Assyrian monarchy. The funds available for the researches having come to an end, Mr. Rassam returned to England in 1854. After this he held a political appointment at Aden. When the quarrel took place in 1861 between the Imam of Muscat and his brother, the Sultan of Zanzibar, Mr. Rassam was chosen by Lord Elphinstone, the Governor of Bombay, to represent the British Government at Muscat while the Governor-General of India was trying to act as a mediator between the brothers. He also received the special thanks of the Supreme Government of India, with a substantial present, for the services he rendered to the State during the Indian Mutiny. When the news reached the Foreign Office in 1864 that Consul Cameron and other European gentlemen had been imprisoned and ill-treated by Theodore, King of

Abyssinia, Mr. Rassam was chosen by the Home Government to proceed to the court of that monarch with a letter from the Queen asking for the release of the captives. He accordingly went to Massowah, the port of Abyssinia, whence he wrote to Theodore for a safe-conduct; and after having waited there more than a year, he was invited by the king to proceed to his court. Mr. Rassam was accompanied by Lieutenant Prideaux and Dr. Blanc, of the Bombay Army, and they were received with every mark of distinction and honour. It seemed at one time that Mr. Rassam's mission would be crowned with success, but through Theodore's eccentricity, coupled with intrigue from other quarters, it was doomed to disappointment. Hopeful as Mr. Rassam was at first of procuring the liberation of Consul Cameron and the other captives, he was himself arrested with his suite, and the three were sent as prisoners with the old captives to Magdala, where they were kept in chains for nearly two years. After the old captives, Consul Cameron and his fellow-prisoners, had undergone about four years' rigorous confinement, and Mr. Rassam and his companions had shared their fate for nearly two years and a half, they were ultimately set free by Theodore on the Easter Eve of 1868, after his defeat the day before by the British force under the command of Sir Robert Napier, at Arogray, below Magdala. Mr. Rassam published a narrative of the "British Mission to Theodore, King of Abyssinia, with Notices of the Country traversed from Massowah through the Soudan, the Amhara, and back to Annesly Bay from Magdala," 2 vols., London, 1869. In 1876 he was selected by the Trustees of the British Museum to conduct the Assyrian Explorations under a favourable firman granted to him by the Ottoman Government, through the influence of Sir Henry Layard, who was then acting as her Majesty's Ambassador at Constantinople. From that time until July 1882, he conducted the British National Archaeological researches in Assyria, Armenia, and Babylonia; during which time he succeeded in securing for the British Museum important relics connected with the history of those three great ancient kingdoms, amongst which he discovered, in a small mound called "Balawat," in the vicinity of Nineveh, a magnificent bronze gate, twenty feet high, forming a memorial of the wars of Shalmenesar III., B.C. 850. The rich embossed bronzes are now in the British Museum. He also discovered, amongst other sites, the great Biblical cities of Sippara, or Sepharvaim, and Cuthah, situated in Southern Mesopotamia. During his different expeditions to Assyria and Babylonia he acquired for the National

Institution about ten thousand whole, and more than one hundred thousand pieces of terra-cotta and clay inscribed tablets, with a large number of different-shaped terra-cotta cylinders and marble tablets recording the religious and general history of those two kingdoms. During the Turko-Russian war of 1877 he was sent by the British Foreign Office on a special mission to Asia Minor, Armenia, and Kurdistan, to inquire into the condition of the different Christian communities, who were said to be maltreated by their Moslem fellow-countrymen. Among other works by Mr. Rassam mention should be made of "Asshur and the Land of Nimrod," "The Garden of Eden and Biblical Sages," and "Biblical Lands." Address: 7 Powis Square, Brighton.

RATHMORE, Lord, The Right Hon. David Robert Plunket, Q.C., LL.D., is the fourth son of the third Lord Plunket, and of Charlotte, daughter of the Right Hon. Lord Chief-Justice Bushe, and grandson of the first Lord Plunket, the famous orator and lawyer, who held the Great Seal in Ireland from 1830 to 1834, and for the second time from 1835 to 1841. Lord Rathmore, who was born Dec. 3, 1838, was educated at Trinity College, Dublin, where he graduated in Honours in 1859. He was called to the Irish Bar in 1862. Having held for some time the Professorship of Constitutional Law at the King's Inns, Dublin, he obtained the rank of Q.C. in 1868, and in the same year was appointed Law Adviser to the Government in Ireland. Mr. Plunket unsuccessfully contested Dublin City at the General Election in 1868, but was elected M.P. for the University of Dublin in 1870, a seat which he held continuously until November 1895, when he was raised to the Peerage, as Baron Rathmore of Shanganagh, Co. Dublin. Whilst in the House of Commons he filled, under successive Conservative Administrations, the offices of Solicitor-General for Ireland, 1875-77, Paymaster-General, 1880 (when he was made a Privy Councillor), and Her Majesty's First Commissioner of Works, 1885-86, and 1886-92. Throughout the twenty-six years during which, as Mr. David Plunket, he sat in the House of Commons, Lord Rathmore was the foremost champion of the Irish Conservative party. When in office, he was not—apart from his official utterances—a frequent Parliamentary speaker; but when in opposition, both in the House and on the platform, he was by far the most eloquent champion of the Irish minority in their resistance to Radical policy, on the questions of Irish University Reform, Irish Franchise, Land Legislation for Ireland, and Home Rule.

The series of brilliant speeches which he delivered on these questions, not only placed him in the foremost rank of the orators of the day, but also had no little effect on the electorate as well as upon public opinion. Addresses: The Oaks, Wimbledon; and Athenæum.

RAVENSTEIN, Ernest George, geographer and statistician, was born at Frankfort-on-Main, Dec. 30, 1834; and held an appointment in the Topographical and Statistical Department of the War Office, 1855-74. He has published "The Russians on the Amur," London, 1861; "Geographie und Statistik des britischen Reiches," Leipzig, 1862; "London," one of Meyer's Handbooks for Travellers, first edition, 1870; "London and the British Isles, an Itinerary Guide," London, 1877; "The Laws of Migration," London, 1878; "Englischer Sprachführer," Leipzig, 1884; "A Journal of the First Voyage of Vasco da Gama" (Hakluyt Society); and various papers in the Journals of the Royal Geographical and Statistical Societies, &c. He is likewise the compiler of numerous maps, including one of Eastern Equatorial Africa, in twenty-five sheets, published by the Royal Geographical Society; another of British East Africa, issued by authority of the Imperial British East Africa Company; a "Systematic Atlas," London, 1894; a handy Volume Atlas, 1895, &c. Mr. Ravenstein was one of the founders of the German Gymnastic Society, 1861, was its President during the first ten years of its existence, and published a "Handbook of Gymnastics and Athletics," London, 1864. He is Honorary Fellow of the Geographical Societies of Amsterdam, Berlin, Lisbon, &c. Address: 2 York Mansions, Battersea Park, S.W.

RAVOGLI, Giulia, was born in Rome in 1866, and studied with her distinguished elder sister Sophia, under Signor Albadia, in Rome. Both sisters made their début in Malta, in "Norma," afterwards touring in the principal Italian cities, and in Barcelona and Seville. In 1889 they appeared on the Roman operatic stage in Gluck's "Orfeo." As Orfeo, Giulia Ravogli has made her great mark, singing to her sister's Eurydice. Her beautifully picturesque appearance in the part has added not a little to her success. In England the two sisters have been admired for their impersonations in "Il Trovatore," "Aida," and "Orfeo."

RAWLINSON, Canon George, M.A., F.R.G.S., third son of A. T. Rawlinson, Esq., of Chadlington, Oxon., brother of Sir H. Rawlinson, Bart., M.P., born Nov. 23, 1812, was educated at Swansea

Grammar School, and at Ealing School; entered Trinity College, Oxford, in 1834; took a first class in Classics in 1838; and was elected a Fellow of Exeter College in 1840. He obtained the Denyer prize for a Theological Essay in 1842, and again in 1843; and having held for some years a Tutorship in his College, was appointed Moderator in 1852; became Public Examiner in 1854, and again in 1856, 1868, and 1874; and preached the Bampton Lecture in 1859. He was elected without a contest to the Camden Professorship of Ancient History in the University in 1861, and took an active part in the agitation which preceded the passing of the Oxford University Act, in favour of the changes then effected. In September 1872 he was appointed a Canon of Canterbury by the Crown; and in 1888 was presented by the Dean and Chapter of Canterbury to the Rectory of All Hallows, Lombard Street, London. He has written (in conjunction with his brother, Sir Henry Rawlinson, and Sir G. Wilkinson) "The History of Herodotus," a new English version, with copious notes, 1858-60; and also, independently, "The Historical Evidences of the Truth of the Scripture Records, in Eight Lectures delivered in the Oxford University Pulpit, at the Bampton Lecture for 1859," published in 1860; "The Contrasts of Christianity with Heathen and Jewish Systems, in Nine Sermons preached before the University of Oxford on various occasions," 1861; "The Five Great Monarchies of the Ancient Eastern World," 4 vols., 1862-67; "A Manual of Ancient History," 1869; "The Sixth Great Oriental Monarchy; or, the Geography, History, and Antiquities of Parthia," 1873; "The Seventh Great Oriental Monarchy; or, the Geography, History, and Antiquities of the Sassanian or New Persian Empire, collected and illustrated from Ancient and Modern Sources," in 1876; a "History of Ancient Egypt," 2 vols., in 1881; a "History of Phœnicia," in 1889; and other smaller works. Professor Rawlinson contributed an essay, the subject being "The Genuineness and Authenticity of the Pentateuch," to "Aids to Faith," edited by Dr. Thomson, in reply to "Essays and Reviews"; and was a large contributor to Dr. Smith's "Dictionary of the Bible." He wrote the article on "Herodotus" in the ninth edition of the "Encyclopædia Britannica." He supplied the comments on Kings, Chronicles, Ezra, Nehemiah, Esther, and the two Books of Maccabees, to "The Speaker's Commentary"; that on Exodus to the Bishop of Gloucester's "Commentary on the Old Testament"; and those on Exodus, II. Kings, Ezra, Nehemiah, Esther, and Isaiah to the "Homiletic Commentary" of Dean

Spence and Mr. Exell. During recent years he has written in "Men of the Bible" on the lives and times of Isaac, Jacob, Moses, Ezra, and Nehemiah. In 1893 he published "Parthia" in "The Story of the Nations," and in 1898 he published a memoir of his brother, Sir Henry Rawlinson, Bart. He held the office of Classical Examiner under the Council of Military Education from 1859 to 1870. He has been Proctor in Convocation for the Dean and Chapter of Canterbury since 1873. He was elected a member of the Athenæum Club, as the representative of literature, in 1870, and is a Corresponding Member of the Royal Academy at Turin. In 1846 he married Louisa W., second daughter of Sir R. A. Chermiside, M.D., Physician to the British Embassy, Paris. Addresses: All Hallows Church, Lombard Street, E.C.; The Precincts, Canterbury; and Athenæum.

RAWSON, Vice-Admiral Sir Harry Holdsworth, K.C.B., Commander-in-Chief of the Channel Squadron, son of Christopher Rawson, Esq., of Petersfield, Surrey, was born on Nov. 5, 1843. He was educated at Marlborough College, and entered the Navy in 1857. He went almost immediately to China in H.M.S. *Calcutta*, and was present at the capture of the Peiho Forts and of Peking. He acted as aide-de-camp to Captain Dew of H.M.S. *Encounter* during the whole of the operations with the army in 1860, taking part in all the engagements, and on one occasion was severely wounded. He was twice mentioned in despatches for meritorious services, and for three months had command of 1300 Chinese troops which were mobilised for the defence of Ningpo against the rebels. He received the Chinese medal with two clasps. During 1861, while employed in the Shanghae River, he jumped overboard at night to save the life of a marine, and received the thanks of his captain on the quarter-deck. He was promoted Lieutenant in 1863, and in that rank served in H.M.S. *Bellerophon* and in the royal yacht. As Commander he had charge of H.M.S. *Hercules* in the Channel Squadron from 1871 to 1874. In the following year Admiral Rawson was appointed to the flagship of the Mediterranean fleet, and in 1878 issued a report on the capabilities of defence, &c., of the Suez Canal, for which he received the thanks of the Admiralty. It fell to him to hoist the English flag at Nicosia, capital of Cyprus, where he was for one month the military commandant. As Captain he was employed as principal transit officer during the Egyptian war, and received a C.B. and the Osmanieh of the third class. He has also served as a member of the

International Code of Signals Committee. He had the honour of being an aide-de-camp to the Queen from August 1890 to January 1892, when he was promoted to the rank of Rear-Admiral. As Commander-in-Chief he went to the Cape and West Coast of Africa station in 1895, and in August of the same year he landed a naval brigade, assisted by sixty Soudanese and fifty Zanzibar Askaris troops, and attacked and captured M'weli, the stronghold of a rebellious Arab chief. In 1896 he bombarded the palace of the Sultan of Zanzibar, which had been seized by a pretender. The Sultan conferred upon him the Brilliant Star of Zanzibar of the first class. In February 1897 Admiral Rawson organised and commanded a punitive naval expedition, and with seamen and marines landed from his squadron, men sent from England, together with a force of Housas, he proceeded to the capture of Benin City, to avenge the massacre of a political expedition which had been sent thither. The operations were perfectly successful, and he received the well-merited personal recognition of the Queen and the approval of the Admiralty. He was promoted to a K.C.B. in May 1897. In May 1899 he entertained the King and Queen of Italy on board his flagship H.M.S. *Majestic*, when the Channel Squadron was visiting Sardinia in the Mediterranean. Admiral Sir Harry Rawson married, in 1871, Florence Alice, daughter of John Shaw, Esq., of Arrowe Park, Cheshire. Address: United Service Club, Pall Mall, S.W.

RAWSON, Sir Rawson William, K.C.M.G., C.B., eldest son of the celebrated oculist, Sir William Adams, who assumed the name of Rawson (that of his wife) in 1825, was born in London, Sept. 8, 1812; was educated at Sunbury, Rottingdean, and Eton, 1825-28; and was appointed to the Board of Trade in January 1829, at the age of sixteen. In 1830 he became Private Secretary to the Vice-President, Mr. Poulett Thomson; and in 1834 to the President, Mr. Alex. Baring. Upon the creation of the Statistical Department in the Board of Trade, he was appointed first assistant to its chief, Mr. G. R. Porter, which office he continued to hold until 1842. In 1835 he became a Fellow of the Royal Statistical Society of London, one of its Honorary Secretaries, and first editor of its journal; in 1838 he became a Fellow of the Royal Geographical Society, and in 1841 was elected a member of its Council; in 1838 he became a member of the British Association for the Advancement of Science, and in the three following years acted as one of the Secretaries of Section F (Statistical Science). In 1841, upon the Rt. Hon. W. E.

Gladstone's appointment as Vice-President of the Board of Trade, he selected Mr. Rawson to be his Private Secretary; but in July 1842 Mr. Rawson was called away to Canada, having been selected by the late Lord Derby, then Secretary of State for the Colonies, for the office of Chief, or Civil, Secretary in that colony. The Colonial Legislature took umbrage at this appointment, which they considered inconsistent with the principle of Responsible Government lately accorded to the colony, and they presented addresses to the Queen, praying that the office might be abolished. The Secretary of State for the Colonies having recommended a compliance with this request, transferred Mr. Rawson to the Treasurership of Mauritius, to which island he proceeded in January 1844. There he took a prominent part in the business of the Council, as President of the Finance Committee. He conducted inquiries concerning, and submitted two important reports upon, the expediency of continuing the Immigration of Indian Coolies into the island, and upon the value of the Silver Rupee. He also conducted the Census of the island in 1851. In 1854 he was promoted to the Colonial Secretaryship of the Cape of Good Hope. For his services in the first session of the newly constituted representative Parliament, in the double capacity of Colonial Secretary and Financial Minister, having a seat in both Houses, he was created a C.B. in 1858. Here, too, he directed the Census of the Colony in 1861, and he also published, with Dr. Pappe, a "Synopsis of the Ferns of South Africa." In 1864, during the Civil War in the United States, the Duke of Newcastle, having induced the Legislature of the Bahamas to increase the salary of their Governor for six years, offered the post to Mr. Rawson, which he accepted, together with the dormant commission of Acting Governor of Jamaica. While in the Bahamas, Mr. Rawson, in his first annual Blue-Book report, made the first correct and complete description of the physical and economical condition of the islands. This the Secretary of State for the Colonies considered of sufficient value and usefulness to have reprinted in a convenient form for distribution in the schools throughout the islands. Mr. Rawson also gave a minute description of the Hurricane which caused so great a destruction of shipping and property throughout the Archipelago in 1866, which was printed separately with a chart of the track of the storm. In 1869 Mr. Rawson was promoted to the post of Governor-in-Chief of the Windward Islands, of which Barbados was the seat of Government, and served there till May 1875, when he

returned to England, and retired from the public service after nearly 47 years of continuous employment. In Barbados he reported on the Census in 1871, and upon the rainfall in that island for a long series of years. He paid a visit to the Governor of the neighbouring French Colony of Martinique, and received his return visit—the first interchange of such courtesy that had ever occurred between the two islands, although they are so closely situated. On his retirement Mr. Rawson was created a K.C.M.G., and resumed his connection with the several scientific societies of which he is a Fellow. He was elected a Member of the Councils of the Royal Geographical and Statistical Societies, and in 1884–85 he was chosen President of the latter. He joined the Colonial Institute and Imperial Federation League, and was a member of the Council and Executive Committee of the latter until its dissolution. In 1885, on the creation of the International Statistical Institute, he was elected its first President, and has been continuously re-elected to that office, which he now holds. He presided at the first three Congresses of the Institute in Rome, Paris, and Vienna in 1887, 1889, and 1891; also at Bern in 1895. In connection with the Royal Geographical Society, Mr. Rawson had the rare experience of having audited the accounts of the Society in 1842, with Charles Darwin, then in his early reputation, and with his son, Major Leonard Darwin, in 1894—an interval of more than half a century. His principal publications, since his retirement, have been his two addresses to the Royal Statistical Society on "British and Foreign Colonies," and "International Vital Statistics," 1884–85; a "Synopsis of the Tariffs and Trade of the British Empire," in 2 vols., 1888–89; two contributions to the *Proceedings of the Royal Geographical Society* on the "Territorial Partition of the Coast of Africa," 1884; and "European Territorial Claims on the Coasts of the Red Sea," in 1885; and a letter to the Chancellor of the Exchequer on the relative value of Gold, Silver, and Commodities, 1854–88. He is also the author of "Our Commercial Barometer," in the journal of the Imperial Federation League; and of "Ocean Highways, or Approaches to the United Kingdom," 1894. Sir Rawson is a member of the American Philosophical Society, of the Statistical Society of Paris, of the Central Statistical Commission of Belgium, of the Geographical and Geological Societies of Vienna, and of the Imperial Society, "Lihe economieque," of Russia. He married, in 1849, Marianne Sophia, third daughter of the Hon. the Rev. Henry Ward. Address: 68 Cornwall Gardens, S. W.

RAYLEIGH, Lord, John William Strutt, D.C.L. Hon. Oxon., LL.D., F.R.S., Sc.D. Cambridge and Dublin, Hon. C.E., Corresponding Member of the French Institute, Lord Lieutenant of Essex, J.P., 3rd Baron, was born Nov. 12, 1842, and succeeded to the title on the death of his father, of whom he was the only son, in 1873. His mother, created Baroness Rayleigh, was a daughter of the 1st Duke of Leinster. He was educated at Trinity College, Cambridge (B.A., Senior Wrangler, and first Smith's Prizeman, 1865; Fellow of his College, 1866; M.A., 1868; Honorary D.C.L. Oxford, 1883; Honorary LL.D. McGill University, Montreal, 1884, and Dublin University, 1885); has been since 1892 Lord Lieutenant of Essex, and is J.P. of the same county; and a Cambridge Commissioner under the Oxford and Cambridge Universities Act, 1877. He was Professor of Experimental Physics in the University of Cambridge from 1879 to 1884; and was appointed Professor of Natural Philosophy in the Royal Institution, 1887. Since 1896 he has been Scientific Adviser to the Trinity House, and from 1887 to 1896 was Secretary of the Royal Society. In December 1898, on the occasion of the Jubilee of the St. Petersburg Academy of Medicine, he was appointed an honorary member of the Academy. He is the author of two volumes on "The Theory of Sound," 1877–78 (2nd edit. 1894); and of many memoirs in the *Philosophical Transactions of the Royal Society*, and other scientific publications. He has also edited Clerk Maxwell's "Heat" (1891 and 1894). Professor Ramsay divides with Lord Rayleigh the distinction of discovering a new element—"Argon"—in the atmosphere, the existence of which was announced at the meeting of the British Association at Oxford in August 1894. Lord Rayleigh married, in 1871, Evelyn Georgina Mary, daughter of the late James Maitland Balfour, Esq., of Whittinghame, Prestonkirk, and has three sons. Addresses: Terling Place, Witham, Essex; and Athenæum.

READ, Clare Sewell, J.P., a distinguished agriculturist, born at Ketteringham in 1826, is the eldest son of George Read, Esq., of Barton Bendish Hall, Norfolk. He entered Parliament in 1865 in the Conservative interest as a member for East Norfolk, and was one of the most prominent advocates of the reduction of the Malt Tax. After the dissolution in 1868 he was returned for the southern section of the county, and continued to represent that constituency until 1880, and West Norfolk until 1885. In 1874 he was appointed Parliamentary Secretary of the Local Government Board, a position he re-

tained until January 1876, when he resigned on account of a difference of opinion upon the question of Inspection and Restrictions in Ireland, for the prevention of the spread of pleuro-pneumonia and foot-and-mouth disease among cattle. He advocated uniformity of treatment in both countries, and as an acknowledgment of his services the farmers of England presented him with a service of plate and a cheque for £5500. He is a member of the Council of the Central Chambers of Agriculture, of the Smithfield Club, and of the Farmers' Club, and also of all the local agricultural societies in the county of Norfolk. He married Sarah Maria, only daughter of J. Watson, in 1859. Addresses: 91 Kensington Gardens Square, W.; Barton Bendish, Stoke Ferry.

READING, Bishop Suffragan of.
See RANDALL, THE RIGHT REV. JAMES LESLIE.

REANEY, Mrs. Isabel, philanthropist, is a daughter of the late Mr. Robert Edis, of Huntingdon, and a sister of Colonel Edis. She is well known for her labours in the cause of temperance, and is constantly requested to address meetings on that subject. She has also opened "homes" for various forms of distress, notably a Convalescent and Holiday Home at Blackpool. She is well known as a writer of religious stories and other works, of which we may mention "Our Brothers and Sons," "Our Daughters," and "Just in Time." Her husband, the Rev. G. Sale Reaney, is a well-known Broad Church clergyman at East Greenwich, who earlier in life made his mark as a preacher among the Congregationalists. Address: Christ Church Vicarage, Greenwich, S.E.

REAY, Lord, Donald James Mackay, Bart., G.C.S.I., G.C.I.E., LL.D. Edinburgh, D.L., J.P., was born in Holland in December 1839, and is the son of the late Baron Mackay, of Ophemert, Minister of State, by the daughter of Baron Fagel, Privy Councillor of the Netherlands. His ancestors were distinguished Scottish Jacobites. Lord Reay was educated at the University of Leyden, where he graduated as D.C.L. in 1861. He joined the Diplomatic Service, and in 1871 was elected Member of the Second Chamber of the States General, and vacated his seat in 1877 on becoming a British subject. He succeeded to his father's title in 1876. In 1881 he was created a Peer of the United Kingdom; in 1884 elected Rector of St. Andrews University; in 1885 appointed Governor of Bombay; in 1894 Under-Secretary of State for India. He is Chairman of the London School Board

(since 1897), President of the Royal Asiatic Society, and of the Council of University College (London), member of the Institute of International Law, Lord Lieutenant of Roxburghshire, and LL.D. of the Universities of Edinburgh and St. Andrews. He married, in 1877, Fanny, daughter of the late Richard Hasler, of Aldingbourne, Sussex. Addresses: 6 Great Stanhope Street, W.; Carolside, Earlstoun, Berwickshire; Ophemert, Netherlands; and Athenæum.

RÉCLUS, Jean Jacques Elisée, a French geographical writer, the son of a Protestant minister, was born at Sainte-Foy-la-Grande, Gironde, March 15, 1830, and from 1841 to 1844 educated in Rhenish Prussia. He studied at the Protestant College at Montauban, and then at the University of Berlin, where he was a pupil of K. Ritter's. Holding extreme democratic opinions, he left France after the *coup d'état* of Dec. 2, 1851, and travelled from 1852 to 1857 in England, Ireland, the United States, Central America, and New Grenada, where he stayed several years. On his return to Paris he communicated to the *Revue des Deux Mondes*, the *Tour du Monde*, and other periodicals, the results of his voyages and geographical researches. M. Réclus is the author of "Guide à Londres," 1860; "Voyage à la Sierra Nevada de Saint-Marthe," 1861; "Les Villes d'Hiver de la Méditerranée et les Alpes-Maritimes," 1864; and in conjunction with his eldest brother, Michel Elie Réclus, is the author of a very valuable introduction to the "Dictionnaire des Communes de la France," 1864 (2nd edit., 1869); and above all, "La Terre," a magnificent work on physical geography, the English edition of which, entitled "The Earth," has passed through two editions, 1871 and 1887. M. Réclus, however, did not confine himself to scientific studies, but wrote also in various Socialist organs. When the insurrection of March 18, 1871, broke out, M. Réclus, after publishing an eloquent appeal to his countrymen in favour of conciliation, flung in his lot with the Commune, and was taken prisoner by the Versailles troops as early as April 5, while making a reconnaissance near Chatillon. At his trial evidence was given in his favour by M. E. Charton, a deputy in the National Assembly, and the editor of several works on geography. M. Nadar, the well-known aeronaut, under whom the prisoner had served during the siege of Paris, also spoke as to his high character and great scientific attainments. But M. Réclus was nevertheless sentenced to transportation for life, November 1871. His sentence was, however, commuted into one of

banishment in February 1872. He subsequently resided at Lugano, in Switzerland. He was admitted to the benefit of the amnesty in March 1879. In 1882 he gained fresh notoriety as the practical initiator of the Anti-Marriage Movement; and his two daughters were actually "married" in his own fashion without any religious or civil ceremony. Together with Prince Kropotkin he was condemned at Lyons as a leader and organiser of the Anarchist movement, but he escaped from the clutches of the French law in Switzerland. In September 1892 he was appointed Professor of Comparative Geography at the University of Brussels. The first volume of his "Géographie Universelle" was published in 1875, the seventeenth in 1891. He is said to have been the original of Jean Froment, the philosophic Anarchist, in Zola's "Paris."

REDINGTON, The Right Hon. Christopher Talbot, J.P., D.L., was born in Dublin on Sept. 30, 1847, being the son of Sir Thomas N. Redington, K.C.B., the Under-Secretary for Ireland, 1846-52, and previously M.P. for Dundalk, and of Anna-Eliza Mary, daughter of John H. Talbot, Esq. of Ballytrent and Talbot Hall, County Wexford. He was educated at Oscott College, and Christ Church, Oxford, where he took the B.A. degree with first-class Honours in Lit. Hum. in 1869. He is a J.P. and D.L. for County Galway, served as High Sheriff in 1873, and was sworn a member of the Privy Council in Ireland in 1893. He served on the Piers and Roads Commission in connection with the distress in Ireland in 1885, on the Poor Relief (Ireland) Inquiry Commission in 1886, and was a member of the Royal Commission on Mining Royalties in 1889-93, and of the Evicted Tenants Commission in 1892-93. On the establishment of the Royal University of Ireland in 1880 he was made a member of the Senate, and in 1894 was elected Vice-Chancellor. In 1886 he was appointed a Commissioner of National Education, and in 1894 became Resident Commissioner in succession to the late Sir P. Keenan, K.C.M.G. He was one of the members of the Manual and Practical Instruction Commission. Addresses: Kilcormac, Oranmore, co. Galway; Talbot Hall, New Ross, co. Wexford; and Athenium.

REDMOND, John Edward, M.P., was born in 1851, and is the son of the late W. A. Redmond, M.P., of Ballytrent, who was M.P. for Wexford from 1872 to 1880. He was educated at Clongowee Wood College, Kildare, at Trinity College, Dublin, and was called to the Bar at Gray's

inn in 1886, and at the King's Inns in 1887. He was for some time Clerk in the Vote Office, House of Commons. He was elected for New Ross in 1881, for Wexford, North, in 1885, for Waterford in 1891, and for Waterford City in 1892, a constituency which he still represents. He has sat in Parliament continuously since 1881, and since the Parnell split has been a leading Parnellite. Address: 392 Clapham Road, S.W.

RED SPINNER, See SENIOR, WILLIAM.

REED, Sir Edward James, K.C.B., F.R.S., J.P., born at Sheerness, Sept. 20, 1830, was educated at the School of Mathematics and Naval Construction, Portsmouth, served in a subordinate capacity in Sheerness dockyard, and was afterwards editor of the *Mechanics' Magazine*. He paid great attention to naval architecture, on which he became an authority, and was induced to accept the Secretaryship of the Institution of Naval Architects. He submitted to the Admiralty proposals to reduce the dimensions, cost, and time required for building our iron-clads, and was soon after appointed Chief Constructor of the Navy. In about three years he designed iron-clad ships for the British Navy, amounting to an aggregate of 35,000 tons; a large iron-clad frigate for the Turkish Government; a fleet of steam-transports for the service of our Indian Government, consisting of five ships of 4000 tons each, a paddle despatch-steamer of war, and numerous tugs, life-boats, and other smaller vessels. After four years of further service as Chief Constructor, Mr. Reed, whose objections to rigged sea-going turret ships were well known, found these vessels so much in favour that he resigned his office in July 1870. His resignation was made remarkable by the capsizing of the turret ship *Captain* a few weeks afterwards. Mr. Reed was afterwards engaged in private pursuits, visiting occasionally the foreign dockyards of Europe. He was returned to Parliament in the Liberal interest as member for the Pembroke boroughs at the general election of February 1874. He represented that constituency till April 1880, when he was returned for Cardiff. He was re-elected for Cardiff at the general election in November 1885, and again in February 1886, on his appointment as Lord of the Treasury in Mr. Gladstone's administration. He received the Companionship of the Bath from the Queen of England; the Star of the Imperial Order of St. Stanislas (first class) from the Emperor of Russia; the Star and Ribbon of the Medjidieh (second class) from the Sultan of

Turkey, and the Knight Commandership of the Imperial Order of Joseph from the Emperor of Austria. He is the author of works on Practical Shipbuilding, Iron-cased Ships, and Coast Defence. In October 1878 he started on a visit to Japan, at the invitation of the Imperial Government. He returned to this country in May 1879, and published a work on "Japan: its Histories, Traditions, and Religions," 2 vols., 1880. Other works from his pen are: "The Stability of Ships," 1884, and "Modern Ships of War" (with Admiral Simpson), 1888. In August 1880 he was created a K.C.B. In 1883 Sir Edward Reed was appointed by the Government to inquire into the cause of the capsizing of the SS. *Daphne* during the operation of launching on the Clyde; and in 1884 was also appointed by the Government as President of the Load Line Committee, which was formed for the purpose of thoroughly investigating the question of a proper load-line for the ships of the Mercantile Marine. Re-elected for Cardiff in 1892, Sir Edward Reed did not take office under the new Government, and at one time was thought to be on the point of becoming a Unionist. He is Vice-President of the Institute of Naval Architects, and a member of the Council of the Inst. of Civil Engineers. He married, in 1851, Rosetta, daughter of Nathl. Barnaby. Address: 112 Cromwell Road, S.W.

REED, Edward Tennyson, of *Punch*, was born in London on March 27, 1860, and is the only son of Sir Edward James Reed, K.C.B., F.R.S., M.P. He was educated at Harrow, and in 1880 travelled in the Far East. He began to draw for *Punch* in 1889, and definitely joined the staff in 1890. He is justly famous for his "Prehistoric Peeps," which are, in some sort, a reminiscence of the sketches and paintings, by which Ernest Griset illustrated the savages of the Quaternary Period. He succeeded Mr. Harry Furniss as Parliamentary Artist to *Punch* in 1894. His most memorable sketch in this connection is "The House of Commons in Lager" in 1894. At a time when the members of the Corporation of the City of London were busily engaged in a search for armorial bearings he created much mirth with his series of "Ready-Made Coats of Arms." "Unrecorded History" is another of his series of clever sketches. "Prehistoric Peeps" was republished in 1896, and "Mr. Punch's Animal Land" in 1898. Address: 3 St. Paul's Studios, West Kensington, W.

REED, The Hon. Thomas Brackett, American statesman, was born at Port-

land, Maine, Oct. 18, 1839. He graduated at Bowdoin College in 1860, and began the study of law, but suspended it to enter the U.S. Navy, where he served as Assistant-Paymaster from April 1864 to November 1865. He was admitted to the Bar the same year he left the Navy, and began practising at Portland. In 1868-69 he was a member of the lower branch of Maine Legislature, and in 1870 of the State Senate. From 1870 to 1873 he was Attorney-General of Maine, and from 1874 to 1877 was City Solicitor of Portland. In 1876 he was elected a Member of Congress, and has been continuously re-elected since then. He is a Republican, and when his party regained control of the House of Representatives in 1889, he was elected its Speaker. This position he retained until the House again became Democratic in 1891; and when his friends returned to power he was again elected Speaker, Dec. 2, 1895, and re-elected March 15, 1898.

REEVES, Mrs Henry, née Helen Buckingham Mathers, novelist, third daughter of the late Thomas Mathers, and Maria Buckingham, was born on Aug. 26, 1852, at Crewkerne, Somerset, and educated at Chantry, near Frome. Her first novel was "Comin' thro' the Rye," 1875, which immediately became immensely popular, and was soon translated into several languages, and is now reckoned one of the standard novels of the English world. "The Token of the Silver Lily," a poem, was published in 1876; "Cherry Ripe," Miss Mathers' second novel, was published in 1877, and followed in 1878 by "The Land o' the Leal," and "As he Comes up the Stair," which are novellettes. Her third novel, "My Lady Green Sleeves," appeared in 1879, and was followed in 1881 by "The Story of a Sin." "Sam's Sweetheart," and "Eyre's Acquittal," were published in 1883 and 1884, and "Found Out," which appeared in shilling form in 1885, was rapidly followed by a series of cheap novels. These are as follows: "Murder or Manslaughter?" "The Fashion of this World," "My Jo, John," "What the Glass Told," "T'other dear Charmer," "Blind Justice," "A Study of a Woman," and were all published at one shilling. "A Man of To-Day," in three volumes, appeared in 1894, followed in 1895 by "The Lovely Malincourt"; by "The Sin of Hagar" in 1896; "The Juggler and the Soul," 1897; and "Bam Wildfire," 1898. In 1876 Miss Mathers was married to Mr. Henry Reeves, F.R.C.S.E., a well-known surgeon to several large metropolitan hospitals, and author of "Human Morphology," and of "Bodily Deformities," in which subject he is a specialist. Address: 7 Grosvenor Square, W.

REEVES, John Sims, tenor singer, born at Shooter's Hill, Kent, Oct. 21, 1822, was first instructed by his father. At an early age he held the appointment of organist and director of the choir at the church of North Cray, and after taking lessons on the pianoforte from J. B. Cramer, he was placed under the care of T. Cooke, Hobbs, and other distinguished Professors of singing. In December 1839, he made his first appearance on the stage at Newcastle, at which time he was singing baritone parts; he next visited the principal provincial towns, and went to Paris to study his profession. Not long afterwards he made his first appearance in Italian opera at La Scala, Milan, in the tenor part of Edgardo, in "Lucia di Lammermoor," and came out in the same character at Drury Lane Theatre, Dec. 6, 1847, then under the management of the late M. Jullien. His first original character was in Balfe's opera of the "Maid of Honour," and he appeared at Her Majesty's Theatre, as Carlo, in "Linda di Chamouni," in 1848, and was engaged at the Royal Italian Opera, at Covent Garden, in 1849. Since that time Mr. Reeves has appeared at all the great performances of oratorios, at Exeter Hall, the provincial festivals, and at the Crystal Palace. One of his best original parts was in Mr. Macfarren's opera of "Robin Hood," produced at the performances of English opera at Her Majesty's Theatre in 1860. Mr. Sims Reeves has made strenuous efforts to reduce the present high pitch to that of the Normal Diapason. He completed his Jubilee in 1889, and published a book setting forth some interesting events in his long and successful career. He took his farewell of the public at the Albert Hall on May 11, 1891, when Madame Christine Nilsson came over expressly to assist on this memorable occasion, but he did not finally cease appearing in public for some years. Mr. Sims Reeves married Miss Emma Lumcombe, a soprano singer, who died June 1895. His son Herbert is a tenor, who evidently has been well taught by his father. Address: 56 Ridgmount Gardens, W.C.

BEGNAULT, Jeanne Julia. See BARTET, MADAME.

BEHAN, Ada, American actress, was born at Limerick, Ireland, April 22, 1859. At an early age she went to America and was educated in Brooklyn, N.Y. She first appeared upon the stage when but fifteen years old, but did not adopt acting as her profession till a year or two later. For two seasons she was in Mrs. Drew's theatre at Philadelphia, shortly after

which she joined Mr. Augustin Daly's company, with which she has been since connected, both in London and New York. Her special rôle is light comedy, and perhaps her most successful impersonation has been Lady Teazle in "The School for Scandal," though her Katherine in "Taming of the Shrew" met with nearly equal favour. Among the other parts in which she has appeared are Valentine Osprey, in "The Railroad of Love"; Jo, in "The Lottery of Love"; Xantippe, in "The Wife of Socrates"; Tilburnia, in "Rehearsing a Tragedy"; Phronie, in "Dollars and Sense"; Oriana, in "The Inconstant"; Kate Verity, in "The Squire"; Doris, in "An International Match"; Audrey Ollyphant, in "Samson and Delilah"; Niobe, in "A Night Off"; Flos, in "Seven-Twenty-Eight"; Tryphena Magillcuddy, in "The Golden Widow"; Etna, in "The Great Unknown"; Rosalind, in "As You Like it"; Donna Hypolita, in "She Would and She Wouldn't"; Peggy, in "The Country Girl"; Dina Faudelle, in "A Priceless Paragon"; Mlle. Rose, in "The Prayer"; Helena, in "A Midsummer-Night's Dream"; Miss Hoyden, in "Miss Hoyden's Husband"; Nancy Brasher, in "Nancy & Co."; Elvira Honiton, in "New Lamps for Old"; Baroness Vera von Bouraneff, in "The Last Word"; Pierrot, in "The Prodigal Son"; the Princess of France, in "Love's Labour's Lost"; Aprilla Dymond, in "Love in Tandem"; Maid Marian, in "The Foresters"; Rena Primrose, in "Little Miss Million"; Juno Jessamine, in "A Test Case"; Julia, in "The Hunchback"; Mockwood, in "The Knave"; Letitia Hardy, in "The Belle's Stratagem," and Viola, in "Twelfth Night." As a recognition of her services to the dramatic art, and especially to the Memorial Theatre at Stratford-on-Avon, she was, in April 1898, elected a permanent governor of that institution. Address: 93rd Street West, New York.

REICHEL, Henry Rudolph, M.A., born October 11, 1856, in Belfast, son of the Rev. Charles Parsons Reichel, D.D., Professor of Latin in Queen's College, Belfast, and subsequently Bishop of Meath (died 1894), and of Mary Brown M'Cracken (died 1885), was educated at Christ's Hospital (1865-75), where he was Head Grecian, and at Balliol College, Oxford (1875-80), of which college he was a Scholar. He gained first-class Honours in Classical Moderations, 1876; Mathematical Moderations, 1877; Lit. Hum., 1879; Modern History, 1880; and was elected Fellow of All Souls' College, November 1880, and re-elected for a second term of seven years in 1889. From 1881 to 1884

he acted as History Tutor for University College and New College. In 1884 he was appointed first Principal and Professor of English Literature and History in the University College of North Wales, Bangor, then incorporated under Royal Charter, and since federated with the sister Colleges at Aberystwyth and Cardiff into the University of Wales. During the session 1896-7 he officiated as Vice-Chancellor of this University. He took an active part in the establishment of the Welsh intermediate school system, the most perfectly organised system of the kind in the United Kingdom, and also in the establishment of the University, and is a member of the Executive Committee of the University and of the Executive Committee of the Central Welsh Board, the body which controls the inspection and examination of the intermediate schools. He has published several short papers on educational subjects and has devoted special attention to the position of manual training in the ordinary school curriculum. He married, February 1, 1894, Charity Mary, eldest daughter of Henry M. Pilkington, Q.C., of Tore, Tyrrell's Pass, in the county of Westmeath. Address: University College of North Wales, Bangor.

REID, Sir George, President of the Royal Scottish Academy, LL.D., D.L., was born in Aberdeen on Oct. 31, 1841, and is the third son of the late George Reid and Esther Tait. He was educated at the Grammar School, Aberdeen, and early evinced a taste for art, working at lithography before becoming a painter. His earliest contribution to the Royal Scottish Academy was a small landscape, after which time he painted only landscape for some years. In 1867 began his career as a portrait-painter, his likeness of George Macdonald winning him fame in 1868. His success was now assured, and he exhibited from time to time his well-known portraits of Sir John Millais, the Marchioness of Huntly, Mr. James Anthony Froude, and others. In the R.S.A. Exhibition of February 1899 he exhibited a masterly portrait of the Marquis of Tweeddale, in the green and gold uniform of the Royal Archers, painted for Yester House as a pendant to the portrait of Lady Tweeddale by the late Sir John Millais. Other portraits from his brush in this exhibition were a full-length of Sir William Henderson, ex-Lord Provost of Aberdeen, in robes of office, and a greatly admired "Kit-kat" of Mr. W. W. Robertson, ex-Master of the Merchant Company of Edinburgh. Sir George studied the modern movement in Dutch art under Mollinger, but he is opposed to Impressionism, espe-

cially to that of the young Glasgow school of painters. He was elected Associate in 1870, Member in 1877, and President of the Royal Scottish Academy, on the refusal of Sir Noël Paton to accept that office, in 1891. He was knighted in the same year. He is a Commissioner of the Hon. Board of Manufactures for Scotland, and President of the Scottish Artists' Benevolent Association. Sir George Reid married, in 1882, Margaret, the second daughter of Thomas Best, of Aberdeen. Address: 22 Royal Terrace, Edinburgh, &c.

REID, The Right Hon. George Houston, Premier of New South Wales, was born at Johnstone, Renfrewshire, Feb. 25, 1845, and is the son of a Presbyterian minister. He emigrated to Australia in 1862, and was called to the Bar of New South Wales in 1879. In 1880 he was elected to the Legislative Assembly, and in 1883 was appointed Minister of Education. From 1891 he was the leader of the opposition, and at the overthrow of Sir George Dibbs's Ministry in 1894, he became Premier in place of Sir Henry Parkes. In 1895 the General Election gave him a big majority to carry out his Free-Trade policy. He came to this country for the Diamond Jubilee of 1897, and with his fellow Premiers, was appointed a Privy Counsellor. In the General Election of 1898, he fought a contest on a platform of Direct Taxation and Confederation of the whole of Australia.

REID, Sir James, Bart., K.C.B., M.D., LL.D., is the eldest son of the late James Reid, M.D., of Ellon, Aberdeenshire, and was born in Scotland on Oct. 23, 1849. He was educated at Aberdeen Grammar School and University, where he graduated M.A. with Honours in Natural Science, at the same time being awarded the Gold Medal. He completed his education in London and Vienna. He became M.B. and C.M. with highest honours in 1872, M.D. in 1875; F.R.C.P. in 1892. He is a Fellow of the Roy. Med. Chir. Soc., and has been Resident Physician since 1881 and Physician in Ordinary to the Queen since 1899. In January 1899 he was also appointed Physician in Ordinary to the Prince of Wales, in succession to Sir William Jenner, Bart., deceased. Previous to his Court appointment as Resident Physician he practised for some years in London and Scotland. He has various foreign orders, and has published papers in the medical journals. Non-official address: The Chestnuts, Ellon, Aberdeenshire.

REID, Sir John Watt, K.C.B., born May 10, 1823, in Edinburgh, is the younger son of the late Dr. John Watt Reid, R.N.,

and was educated at Edinburgh Academy, and Edinburgh University and Extra-Mural (Medical) School; M.D. Aberdeen, LL.D. Edinburgh. He entered the Royal Navy, Feb. 6, 1845, as Assistant-Surgeon; was promoted to Surgeon, September 1854; to Staff-Surgeon, 1866; to Deputy-Inspector-General, 1874; to Inspector-General, and Medical Director-General, 1880; served in the *Inflexible* and *London* in the Black Sea until the fall of Sebastopol (Medal and Clasp); in *Belleisle* hospital ship, in China War, 1857-59 (Medal and Clasp); in *Nebraska* hospital ship, off Cape Coast Castle, at the end of the Ashanti Campaign, 1874 (mentioned in despatches, and promoted to Deputy-Inspector-General). He received approval of the Board of Admiralty for services in the R.N. Hospital, Plymouth, during the cholera epidemic in 1849, and for conduct at Halifax Sick Quarters, during the epidemic of yellow fever in the West India Squadron in 1861, and thanks of the Commander-in-Chief in the Black Sea for services to the sick of the flagship *Britannia*, when stricken with cholera in 1854. He was made Hon. Physician to the Queen, 1881; and K.C.B., 1882. On leaving office, in 1888, the Board of Admiralty were pleased to record that "the able and zealous manner in which he had conducted the duties of the office had been most marked, and their Lordships and the Naval Medical Service viewed his retirement with equal regret." He received a Good Service Pension in 1888, and the Jubilee Medal, 1897. He married, in 1863, Georgina, youngest daughter of C. J. Hill, Esq., Halifax, N.S. Address: 10 St. James's Square, Bath.

REID, Sir Robert Threshie, Q.C., M.P., the second son of the late Sir J. J. Reid, of Mouswald Place, Dumfriesshire, was educated at Cheltenham College, and Balliol College, Oxford, first class moderations, first class Literæ Humaniores, Magdalen College Demy, Scholar of Balliol, Ireland University Scholar; was called to the Bar in 1871; appointed Q.C. in 1882, Bencher in 1890; M.P. for Hereford in 1880; M.P. for Dumfries since 1886. In October 1894 Sir Robert Reid became Attorney-General in succession to the present Lord Justice Sir John Rigby, going out of office in 1895. He married Emily Douglas, daughter of Captain Fleming. Address: 1 Chapel Place, Delahay Street, S.W., &c.

REID, Sir (Thomas) Wemyss, was born at Newcastle-on-Tyne in 1842, being the son of the Rev. Alexander Reid. He was educated by Dr. Collingwood Bruce at Newcastle; became a journalist in 1861;

in 1864 was appointed editor of the *Preston Guardian*, and in 1870 to 1887 editor of the *Leeds Mercury*. Sir Wemyss Reid has contributed largely to the leading reviews and magazines. He is the author of "Charlotte Brontë: a Monograph," a biographical work intended to supplement Mrs. Gaskell's well-known *Life* of the author of "Jane Eyre." This work, which was published in 1877, has gone through several editions both in England and in the United States. In 1883 Sir Wemyss Reid published "Gladys Fane, a Story of Two Lives." It passed through four editions within a few months of its publication. Two years later, at Christmas, 1885, appeared "Mauleverer's Millions," a sensational story, the scene of which was laid in Yorkshire; it has had a large sale. In 1888 Sir Wemyss Reid published the "Life of the Right Hon. W. E. Forster," a work tracing the personal history of the author of the Education Act, and throwing considerable light on recent political events. Six editions of the *Life* appeared within twelve months from its publication. The other works written by Sir Wemyss Reid are "Cabinet Portraits," sketches of leading statesmen of both parties, 1872; "Politicians of To-Day," 1879; "The Land of the Bey," 1882, a narrative of a visit to Tunis during the military operations of France; and the "Life of Lord Houghton," 1890. Sir Wemyss Reid has also contributed to the *Leeds Mercury* an extensive series of literary and social essays, under the title of "The Rambling Philosopher," as well as letters descriptive of travel in various parts of the world. In 1887 Sir Wemyss Reid resigned the editorship of the *Leeds Mercury*, and accepted the post of manager to Messrs. Cassell and Company. Since the beginning of 1890 he has been editor of the *Speaker*, a weekly political and literary review, his resignation from which was announced in 1899. In 1893 he received the hon. degree of LL.D. from the University of St. Andrews, and in 1894 he was knighted "in consideration of his services to letters and to politics." He married (2) Louisa, daughter of Benjamin Berry. Address: 26 Bramham Gardens, S. Kensington, S.W.

REID, The Hon. Whitelaw, was born near Xenia, Ohio, Oct. 27, 1837. He graduated from Miami University, Oxford, Ohio, in 1856, and immediately took up journalism, soon becoming editor of the *Xenia News*. At the outbreak of the Civil War he was sent into the field as correspondent of the *Cincinnati Gazette*, and served for a while as volunteer aide-de-camp to General Thos. A. Morris, and afterwards to General Rosecrans. From 1863 to 1866 he was librarian of the House

of Representatives. He was then engaged for a short time in cotton planting in Louisiana, the result of his observations while there on the condition of the South, "After the War," appearing in 1866. Returning to Ohio he devoted himself for two years to writing a complete history of "Ohio in the War," which was published in two volumes in 1868. In the same year he joined the staff of the *New York Tribune*, of which, on the death of Mr. Greeley in 1872, he became the editor-in-chief and principal owner. He was chosen a regent (for life) of the University of the State of New York in 1878. On the accession to the Presidency of Mr. Harrison in 1889 he accepted an appointment as American minister to France. He negotiated a new Extradition Treaty with France and a limited treaty of Reciprocity. He also began the negotiations which resulted in the withdrawal by half the nations of Europe of the prohibition, which they had maintained for from eight to twelve years, against the importation of American pork, and conducted these negotiations in France to a successful close. On the conclusion of these different tasks he tendered his resignation (1892). A few weeks later the Republican National Convention, after renominating President Harrison, unanimously nominated Mr. Reid as its candidate for the Vice-Presidency of the United States. During the canvass he made numerous speeches in Boston, New York, Buffalo, Indianapolis, and elsewhere. After the defeat of his party in November he visited the Pacific coast, and in a few months resumed his editorship of the *New York Tribune*. He was actively connected with the work of sending poor children from New York to homes in the West, and he originated and long conducted the *Tribune* Fresh Air Fund, which was the pioneer of a multitude of similar charities now existing in both America and England. In addition to the works already mentioned, he is the author of "Schools of Journalism," 1871; "The Scholar in Politics," 1873; "Some Newspaper Tendencies," 1879; "Town-Hall Suggestions," 1881, and a great number of speeches and addresses on political, literary, and social topics. In 1897 he was appointed specially to represent the United States at the Jubilee of Her Majesty in June of that year, and in 1898 he was one of the Commissioners to arrange terms of peace with Spain.

REINOLD, Arnold William, M.A., F.R.S. Professor of Physics in the Royal Naval College, Greenwich, was born in Hull, June 19, 1843. His father, a native of Elberfeld, settled in England in 1836, and carried on the business of a ship-broker.

Professor Reinold was educated at St. Peter's School, York; whence, having obtained an open Mathematical Scholarship at Brasenose College, he proceeded to Oxford in 1863. At Oxford he gained a first class in Mathematical Moderations, and in the final Schools of Mathematics and Natural Science, also the Junior and Senior University Mathematical Scholarships. He took his degree of B.A. in 1866, and M.A. in 1870; and was elected to a Fellowship at Merton College in December 1866, which he resigned, on marrying, in 1869. He was elected Senior Student and Lee's Reader in Physics, at Christ Church, in 1870. On the establishment of the Royal Naval College at Greenwich, in 1873, he was appointed Professor of Physics; and Examiner in Physics in the University of Oxford in 1871, and in the University of London in 1875 and 1882. He is Lecturer in Physics at Guy's Hospital. He is joint author (with Professor A. W. Rücker) of papers dealing with the phenomena of "Thin Films," published in the *Proceedings and Transactions of the Royal Society*, and the *Philosophical Magazine*, and was elected F.R.S. in 1883. He acted as Hon. Sec. of the Physical Society from its foundation in 1874 up to 1888, when he succeeded the late Dr. Balfour Stewart as President. Address: Royal Naval College, Greenwich.

RÉJANE, Madame, the *nom-de-théâtre* of Gabrielle Réju, French actress, who was born in Paris in 1857. She is the daughter of an actor and stage-manager, and the niece of Madame Arnault, a member of the Comédie Française. Although her relations were opposed to her following a theatrical career, she overcame their opposition, and entered the Conservatoire, where she obtained a second prize in 1874, under Regnier. In March of the next year she was engaged at the Vaudeville, her first appearance being in the "Revue des Deux Mondes," of Clairville and Dreyfus. The parts she undertook at this theatre were light ones of the Déjazet kind, and in these she became a mistress in the art of *sous-entendu*. She played in "Madame Lili," "Les Dominos Roses," "Le Mari d'Ida," "Les Tapageurs." In 1881 she left the Vaudeville and played for a short while at the Variétés, and in the next year played with Sarah Bernhardt in Richepin's "La Glu." In 1883 she played in "Ma Camarade" at the Palais Royal; in 1888 she was in "Décoré," one of the successes of the season, and in "Germinie Lacerteux" at the Odéon. In 1892 she married M. Porel, her present manager. However, her European reputation was made in 1893 by her impersonation of "Madame Sans-Gêne," by Sardou,

which she played in London in 1894. Those who have only seen the English version can have little idea of the devil-may-care recklessness and good nature that Madame Réjane gave to this part. Since then her chief success has been in "La Douloureuse," by Maurice Donnay, which she played at the Lyric in 1897. In 1898 she created the part of "Zaza." Her Paris address is 25 Avenue d'Antin.

RENALS, Sir Joseph, Bart., Lord Mayor of London for 1894-95, was born at Nottingham on Feb. 21, 1843, and is the son of William Renals, the Park, Nottingham. His business career has been chiefly in London. He became a member of the Civic Corporation in 1885, as the representative of the Aldersgate Ward in the Court of Common Council. He attained Alderman's rank in 1888, and in 1893 was appointed Senior Sheriff, and received the honour of knighthood at the same time on the occasion of the Duke of York's marriage. During the autumn of 1894 he was elected by the Livery for the office of Lord Mayor, and was finally chosen in opposition to Alderman Faudel Phillips, who was put forward by a determined body of supporters. A poll was demanded and taken, and resulted in a close contest, 1462 votes being given to the successful candidate, and 1360 to Ald. Phillips. Sir Joseph Renals is a member of the Spectacle-makers' and Fruiterers' Companies. In politics he is a Liberal, and was often asked to contest Nottingham in that interest, but preferred to take his chance of the Mayoralty. He is a partner in the firm of Renals & Co., is Officer of the Légion d'Honneur, Lieutenant for the City of London, and was created a Baronet in 1895. Address: 108-9 Fore Street, E.C.

RENDALL, Gerald Henry, M.A., Litt.D., Head-Master of Charterhouse School, was born in 1851, at Harrow, and is the second son of the Rev. F. Rendall, Assistant-Master at Harrow. He was educated at Cheam, Harrow, and Trinity College, Cambridge, where he won a Foundation Scholarship in 1872. He obtained the University Bell Scholarship in 1871, and stood fourth in the Classical Tripos, graduating B.A. in 1874. He became University Lightfoot Scholar in 1875, was Hulsean Prize Essayist in 1876, has been Fellow, Lecturer, and Assistant Tutor at Trinity College. He was Vice-Chancellor of Victoria University in 1890-92 and 1892-94, was member of the abortive Gresham University Commission in 1892-93, was first Principal of University College, Liverpool, was Gladstone Professor of Greek from 1880-87, and was elected to his present post in 1897. He has pub-

lished various works on classical subjects, notably his Hulsean Essay on the Emperor Julian, in 1879, and "The Cradle of the Aryans," 1889, and a translation of Marcus Aurelius in 1897. Addresses: 25 Falkner Square, Liverpool; and Athenæum.

RENDEL, Sir Alexander Meadows, K.C.I.E., civil engineer, born in 1829, is the eldest son of James Meadows Rendel, civil engineer, and was educated at King's School, Canterbury, and Trinity College, Cambridge (Scholar and Wrangler); studied as engineer under his father, on whose death in 1856 he became engineer to the then London Dock Company, the Leith Harbour and Dock Commissioners, the East Indian Railway, and other companies. He visited India in 1857-58, and at various other times; subsequently he built the Shadwell New Basin, the Royal Albert Dock, and other works on the Thames, the Albert and Edinburgh Docks at Leith, the Workington Dock and Harbour, and other kindred work; was a member of the Commission appointed in 1870 by the Secretary of State for India, to determine what should be the narrow gauge for India, and is at present engineer in England (commonly called consulting engineer) to the Secretary of State for India, the East Indian, the Bombay and Baroda, the South Mahratta, the Nizam's, and other Indian Railway Companies engaged in the construction and working of about 9000 miles of railway. He is a member of the Institution of Civil Engineers. He married in 1853 Eliza, eldest daughter of the late Captain Hobson, R.N., late Governor of New Zealand, and was created K.C.I.E. on the formation of the order in 1887. Address: 44 Lancaster Gate, W.

RENDEL, George Whightwick, second surviving son of the late J. M. Rendel, F.R.S., the eminent civil engineer, was educated at Harrow, and as a civil engineer in his father's office, where he subsequently took an important part in reference to some of the later engineering works carried out by Mr. Rendel—notably the superstructures of the great bridges on the East Indian Railway crossing the Ganges and the Jumna at Allahabad. He joined Sir William Armstrong's firm at Elswick in 1858 as managing partner of the new Elswick Ordnance Works, which he continued to direct during twenty-four years (in conjunction with Captain Noble from 1860). During that time he took a large part in the development of guns, ironclads, and ships of war. He devised and carried out the system of hydraulic machinery for mounting and working heavy guns, first tried in H.M.S.

Thunderer, and subsequently adopted in the *Dreadnought*, *Inflexible*, *Colossus*, and all the later ironclads of the British fleet, as well as in the *Duilio*, *Dandolo*, *Italia*, and *Lepanto* of the Italian fleet. He designed and directed the building of the *Esmeralda* for the Chilian Government, the swiftest and most powerful unarmoured cruiser of her time, which has become a type of unarmoured cruisers, as also the gunboat *Staunch* for the British Government, and the numerous gunboats, developments of the *Staunch*, known as the "alphabetical gunboats," and built on the Tyne for the Chinese Government. Mr. George Rendel was a member of the Committee on Designs of Ships of War, appointed by the English Government in 1871, to settle the types of English ironclads to be built; also of the Committee appointed by the Government in 1877 to decide upon the questions raised by Sir E. J. Reed in reference to the design of the *Inflexible*. In March 1882 he accepted the invitation previously made to him by Mr. Smith under the Conservative Administration, and repeated by Lord Northbrook, First Lord of the Admiralty in Mr. Gladstone's Administration, and became professional Civil Lord of the Admiralty, abandoning for the purpose all connection with the Elswick firm. In June 1885, on the fall of Mr. Gladstone's Government, he, for family reasons, resigned his position at the Admiralty and retired to Italy. Address: Posilippo, near Naples.

RENDEL, Lord, Stuart Rendel, J.P., third surviving son of James Meadows Rendel, F.R.S., the engineer of the Harbours of Refuge of Holyhead and Portland, and of many docks and railways in Great Britain and abroad, and brother of the two preceding, was born July 2, 1834; educated at Eton and at Oriel College, Oxford, where he graduated an Honorary Fourth in 1856. He was called to the Bar in 1861, but has never practised; was appointed (on behalf of Sir William Armstrong) member of the Armstrong and Whitworth Committee, which sat from 1861 to 1863, and carried out the most exhaustive known series of artillery experiments; became a member of Sir Wm. Armstrong's firm in February 1870, and its managing partner in London; has been closely associated with the growth of the great works at Elswick, Newcastle-on-Tyne, which now employ 24,000 men, and form a second arsenal for the empire. He is an Officer of the Order of the Crown of Italy, and a Knight of the Order of Charles XII. of Spain. In 1880 Mr. Stuart Rendel retired from the Armstrong firm, and contested and won the representation

in Parliament of the county of Montgomery as a Liberal. This seat had been held by the Wynns, of Wynnstay, ever since 1800. In recognition of this remarkable victory for the Liberal cause, Mr. Rendel was invited by Mr. Gladstone to move the Address to the Crown in the Session of 1881. The scheme for higher education in Wales having resulted in the creation of new colleges at Cardiff and Bangor, each endowed by Government with £4000 a year, Mr. Rendel in 1884 successfully moved a resolution in the House of Commons in favour of the old University College of Wales at Aberystwyth, and obtained a grant for it of £2500 a year; and later, in 1885, procured the increase of this grant to £4000. Mr. Rendel became more and more identified with the advocacy of Welsh National causes, as well in relation to religious freedom as to educational progress. In the General Election of July 1885, he again defeated Mr. Charles Wynn, by an increased majority, and in that of November 1885 he won the county seat in a third contest. In December 1886 Mr. Stuart Rendel was elected First President of the North Wales Liberal Federation. In 1887 he was elected First President in the Welsh National Council, and to these two offices he has been since annually re-elected. In 1888 he was elected by the Liberal M.P.s of Wales and Monmouthshire as chairman of their party in Parliament. In 1889 he introduced and carried the Intermediate Education Act for Wales, and in 1890 he recovered £20,000, part of the Meyricke Endowment (which had lapsed to Jesus College), for the support of such education in Wales. He was re-elected for Montgomeryshire in 1892. On Mr. Gladstone's retirement from office in the spring of 1894 he was created Baron Rendel of Hatchlands, in Surrey. He married, in 1857, Ellen, second daughter of William Egerton Hubbard, of Leonardslee, Horsham, brother of the 1st Lord Addington. Lord Rendel's second daughter is the wife of the late Right Hon. W. E. Gladstone's third son. The deceased statesman made several stays at Lord Rendel's seat, the Château de Thorenc, Cannes. Addresses: Hatchlands, Guildford; and Athenæum.

RENTOUL, James Alexander, LL.D., Q.C., M.P., eldest son of the Rev. Alexander Rentoul, D.D., M.D., and of Erminda, eldest daughter of James Clutick, Manor Cunningham, traces direct descent from Henry VII., through the noble families Suffolk, Cumberland, Derby, Glencairn, Colquhoun, and Audley, as set forth in the family book "Rentoul," in the Guildhall Library, and in Burke's Peerage.

He was born at his father's house of Manor Cunningham, co. Donegal, where his ancestors had owned a residence and the Manor Cunningham, and several other estates in East Donegal from the Plantation of Ulster, and are described in history as having taken a prominent part in the defence of the neighbouring city of Derry during the famous siege by James II. in the Revolution of 1688, members of the family owning at that time much property in Derry, in which city they several times held the offices of Mayor and Sheriff two centuries ago. He was educated at Magee College, Derry; Queen's Colleges, Galway and Belfast; Queen's University, Ireland; Brussels, and Berlin University. First Prizeman, First University Exhibitioner, Senior University Scholar in Modern Languages and Modern History, Law Scholar, Senior University Scholar in Jurisprudence, Constitutional and International Law, B.A. Honours, LL.B. First Exhibition, LL.D. first place, President of the Internationale Gesellschaft, Berlin University; Student of the Inns of Court, London, 1881; Inner Temple One Hundred Guinea Scholarship in Equity; First at Bar Final. He was called to the Bar in November 1884, created Q.C. in July 1895, sat as Member for Woolwich on the first London County Council, and has been Member of the Westminster Vestry and Board of Works. He has been three times returned unopposed for co. Down (East), in which division his ancestors, Thomas Lord Audley, Lord Chancellor of England, and the other Barons of Audley, owned Audley Castle, and large estates for several centuries back. He is a Member of the Belfast Chamber of Commerce, and of the Carlton Club, and is President and Vice-President of several constitutional clubs. He married, in 1882, Florence Isabel, youngest daughter of D. W. Young, Wallington Lodge, Surrey. Addresses: 4 Paper Buildings, Temple; 23 Old Queen Street, Westminster, S.W.; Manor Cunningham, Ireland.

RENZIS, Baron. See SAN BARTOLOMEO, BARON DE.

RESZKE, Edouard de, operatic singer, was born at Warsaw in 1854, and is of good family. He followed the operatic career with his brother Jean, and with him was engaged in 1876 at the Théâtre Italien, in Paris. He was gifted with a profoundly deep bass voice, but learnt, during his musical training, to govern it artistically. He has sung in France, England, Italy, and America in 1891, and has very frequently appeared with his brother. His first appearance in England was at Covent Garden in 1880, when as Judra, in Mas-

senet's "Roi de Lahore," he created a very favourable impression. In 1887 Sir A. Harris engaged him at Drury Lane, and in subsequent years he has appeared at Covent Garden. His best known rôles are Hans Sachs, Ruy Gomez, Don Basilio, Leporello, Mephistopheles, Friar Lawrence, Marcel, Wotan, and Merke. Address in the season: Royal Palace Hotel, Westminster.

RESZKE, Jean de, M.V.O., operatic singer, brother of the preceding, was born at Warsaw in 1850. He completed his studies in law at the University of his native city, but being drawn by an irresistible vocation, he entered upon a theatrical career. After studying with the celebrated teachers Ciffeli and Cotogni, in Italy, who persisted in making him sing baritone rôles, although he had by nature a tenor voice, he made his début in 1874 in Venice as Alfonso in "La Favorita." He was at once engaged in London at Drury Lane, where he sang during two seasons with Titjens, Nilsson, &c., the parts of Don Juan, Figaro, Valentin, Richard I. in Balfe's "Talismano," Nevers and Count Almaviva in the "Nozze." In 1876 he sang for the last time baritone rôles at the Opéra Italien in Paris. Feeling that it would be pernicious to his voice to continue singing parts which were too low for him, with the help of Maestro Striglio he effected the transformation of his voice from baritone to tenor, but it was not until 1880 that he was prevailed upon to appear as Robert le Diable at Madrid. After this promising début he was chosen by Massenet to create the part of Jean in "Hérodiade," at the Théâtre Italien, under the management of Maurel. The great success he obtained resulted in his being engaged at the Grand Opera, where he sang from 1885 until 1890. During these five years he interpreted "Le Cid," especially composed for him by Massenet, "Le Prophète," "L'Africaine," "Aïda," "Faust," "Roméo," "La Dame de Montsaurau," "Don Juan," &c. His Romeo, when Patti sang Juliet, was not eclipsed by the great cantatrice, and he became the greatest favourite of the Parisian public. In 1887 Sir Augustus Harris engaged him for Drury Lane, and he immediately scored a success as Radames in "Aïda." Since that time he has appeared in most of the popular operas in London, always insisting that each work should be sung in the original language in which it was composed. From 1891 till 1897 he took part every winter in a long American tour, singing all Wagner's works in German, and thereby gaining his greatest triumphs in both continents. Josephine de Reszke, sister of the foregoing brothers, was also a well-known singer. She died in 1891 as Baroness de Kronenberg. M.

Jean de Reszke was created M.V.O. in June 1899. Address in the season: Kensington Royal Palace Hotel, W.

RÉVILLE, Albert, pastor and French Protestant writer, was born at Dieppe, Nov. 4, 1826. He contributed to the most important French Protestant organs, and by his writings took a prominent position among his co-religionists. For some months he was suffragan at Nîmes, then pastor at Luneray, near Dieppe, and in 1851 he was called to Rotterdam as pastor of the Walloon Church. In 1862 the University of Leyden conferred upon him the degree of Doctor; in 1880 he was appointed Titular Professor of Religious History in the College of France, and in 1886 he accepted the Presidency of the Section des Sciences Religieuses at the Sorbonne. Among his works are: "Authenticité du Nouveau Testament," 1851; "De la Rédemption," 1859, translated into English in 1864; "Essais de la Critique Religieuse," 1860; "Manuel d'Histoire comparée de la Philosophie et de la Religion," 1861; "Études critiques sur l'Évangile selon St. Matthieu," 1862; "Théodore Parker, sa vie et ses œuvres," 1865; "L'Enseignement de Jésus Christ," 1870; "Histoire du Dogme de la Divinité de Jésus Christ," 1876; "Prolégomènes de l'Histoire des Religions," 1881, translated in 1885; "Histoire des Religions," tomes i.-iv., 1883-88. M. Réville is one of the chief leaders of the Liberal movement among the French Protestants. In 1884 he delivered the Hibbert lectures on the native religions of Mexico and Peru, and in 1889 published a work on "La Religion Chinoise." His Paris address is 16 Avenue La Bourdonnais.

REYER, Ernest, whose real name is Rey, was born at Marseilles, Dec. 1, 1823. He studied solfeggio at the Free School of Music in his native city, and became a good reader. At the age of sixteen he went to Algiers as a Government official, continuing his pianoforte practice, and began to compose without having properly learned harmony and counterpoint. His compositions became popular, and in 1848, when the Revolution deprived him of his situation, he returned to Paris and completed his musical education under his aunt, Madame Louise Farrene. He composed the music of "Le Selam," an Oriental symphony, which was produced with success, April 5, 1850; and "Maitre Wolfram," a one-act opera, which also was successful at the Théâtre Lyrique, May 20, 1854; "La Statue," produced at the same theatre, April 11, 1861, showed much facility and power. His other works include "Erostate," performed at Baden in

1862; and "Victoire," a cantata. His two latest operas, "Sigurd" and "Salammbô," are composed on purely Wagnerian principles, and gave rise to much discussion in France. "Sigurd" was produced in Brussels in 1884, and in Covent Garden in the season of 1885. "Salammbô" was played first in Brussels, and then (1892) in Paris. M. Reyser has written for the *Presse*, the *Revue de Paris* and *Courrier de Paris*, and, after the death of Berlioz, he became musical critic to the *Journal des Débats*. In all these papers he has defended his Wagnerian attitude. He is Librarian to the Opéra, and succeeded David at the Institute of France in 1876. He was made Commander of the Legion of Honour, December 1891.

REYNOLDS, Professor James Emerson, M.D., D.Sc., F.R.S., was born Jan. 8, 1844, at Booterstown, co. Dublin, where his father, Dr. James Reynolds, was for many years a medical practitioner. He is M.D. of the University of Dublin, and Doctor of Science; Member of the College of Physicians, Dublin and Edinburgh. In 1880 he was elected Fellow of the Royal Society, London; he is a Vice-President of the Chemical Society of London; has been Examiner in Chemistry at the University of London from 1883, University of Cambridge, and the Department of Science and Art. He was appointed in 1867 Keeper of the Mineral Department in the National Museum, Dublin; in 1870 Professor of Analytical Chemistry in the Royal Dublin Society; in 1873 Professor of Chemistry in the Royal College of Surgeons in Ireland; and in 1875 to the Professorship of Chemistry and Chemical Philosophy in the University of Dublin. He has published "Six Lectures on Experimental Chemistry," 1874; "General Experimental Chemistry," 4 vols., 1880, which has gone through many editions and been translated into German; and, with others, "The Manual of Public Health for Ireland," 1876. He is the discoverer of a large number of compounds of theoretical importance, including thiocarbamide and numerous derivatives, a new class of colloid bodies, and several groups of silicon compounds of new types; these and others are described in the course of about ninety papers published by various learned societies. He married, in 1875, Janet Elizabeth, the only child of Canon Finlayson, of Christ Church Cathedral, Dublin, and has issue, a son and a daughter. Address: Burleigh House, Burlington Road, Dublin.

RHODES, The Right Hon. Cecil John, D.C.L., M.A., fourth son of the Rev. F. Rhodes, Vicar of Bishop Stortford, Hert-

RHODES

fordshire, was born on July 5, 1853. The delicate state of his health as a boy induced his friends to send him to South Africa for its improvement, and in 1871 he joined his elder brother, Herbert, at Natal. He returned to England in the following year, and matriculated at Oriel College, Oxford; but his course of study was interrupted by his continual ill health, his lungs having become affected as the result of a chill, and he again returned to South Africa, settling with his brother at Kimberley. The diamond mines had been recently opened there, and they both secured claims, and soon amassed a large fortune. Herbert Rhodes, however, left the mines to enjoy travelling and hunting, appointing Cecil in charge of his property. Mr. Rhodes persevered in his work, and became very rich. At Kimberley he met Dr. Jameson and Mr. C. Rudd, and a close friendship was formed between the three men. There is very little doubt that while at work in the mines Mr. Rhodes was gradually maturing his plans for the absorption of the whole of the continent south of the Zambesi. He had frequently been heard to say, pointing to the map of Africa, and sweeping his hand from the Cape to the Zambesi—"That's my dream—all English." He did not neglect his studies, however, and during 1876 he entered the Inner Temple, for a short period becoming a law student; he also found time between his journeys to Africa to complete his residential terms at Oxford, where he took the degrees of B.A. and M.A. in 1881. He did not confine his attention at Kimberley entirely to diamonds, but financed and managed many undertakings for the improvement of the condition of life and the means of transit in those pioneer days. He never cared for money for itself, the one dominant idea of all his financial schemes being the expansion and consolidation of Great Britain in South Africa. Speaking of himself, he has said, "I saw that expansion was everything, and that the world's surface being limited, the great object of present humanity should be to take as much of the world as it possibly could." Mr. Rhodes, in the early eighties, entered the Cape Parliament for Barkly West, and about that time met General Gordon. They were thrown much together, and many interesting anecdotes have been recorded of the relations of these two men. Gordon had formed a very high opinion of Rhodes, and when he decided to go to Khartoum he telegraphed to him asking him to join his expedition; but Rhodes decided to remain at the Cape. He was appointed Treasurer-General of the Cape in the Scanlan Administration, but in the Assembly he chiefly devoted himself to his schemes of expansion to the

north, receiving very little encouragement. During 1883 Mr. Rhodes was sent by the Cape Government to deal with the question of the delimitation of Griqualand West, and at the same time he obtained from Mankoroane, the ruling chief, a cession of a large portion of Bechuanaland, which the Cape Colony refused to take over. He thereupon applied to the Home Government, asking them to administer the country, and in 1884 an Imperial Protectorate was established over the territory in question. About that time the London Convention with Mr. Krüger was drawn up, and the Boer President began a rival competition with Mr. Rhodes for native territories, ultimately securing a large part of Zululand, Stellaland, and Goshen. Mr. Rhodes was then appointed Deputy Commissioner for Bechuanaland, and by a firm policy was enabled to keep the Boers out of, and to checkmate the designs of Mr. Krüger upon, that portion of South Africa. The extraordinary fertility of the diamond mines at Kimberley led to a great influx of settlers there, the result being the formation of a large number of small companies. Mr. Rhodes seeing the desirability of limiting the supply of diamonds, set himself the task of banding together a number of the companies into one, and thus the De Beers Consolidated Mines sprang into existence. In that company all the important properties were amalgamated. During 1886 gold mines were discovered in the Transvaal, and, with the aid of Mr. Rudd, he formed the company known as the Gold-Fields of South Africa, which has had a most prosperous career. As time went on it became more and more evident to Mr. Rhodes that neither the Home nor the Cape Governments had grasped the situation in South Africa, and to prevent the absorption by the Boer Republic of a vast region, which he hoped to see under British rule, he determined to form a company large enough to be able to administer any amount of territory. Both Mr. Beit and Mr. Rothschild favoured the scheme, and the British South Africa Company was formed. Mr. Krüger now became alarmed, and sent emissaries into Matabeleland. When this was known to Mr. Rhodes, he urged upon Sir Hercules Robinson the necessity of obtaining concessions from Lobengula, to whom a mission was at once despatched, with the result that the Moffat Treaty, which amounted in fact to a right of pre-emption over Matabeleland, was signed in 1888. In that year Mr. Rhodes came to London and secured large interests in the African Lake Company, which enabled him to obtain a free hand in the matter of expansion north of the Zambesi River. He also brought the De Beers Company into the British South Africa Company,

and secured a Royal Charter. This charter conferred large administrative powers upon the company, and authorised it to promote trade and commerce, and to work mineral and other concessions in the region north of Cape Colony. The total area administered by the company embraces nearly a million square miles, and includes Rhodesia (Mashonaland and Matabeleland), Bechuanaland, and British Central Africa. Effective occupation was first begun in Mashonaland after a good deal of trouble, as Lobengula at first strongly objected to the pioneer force passing through his country. However, Dr. Jameson undertook a mission to the Matabele king, and stayed three months in his kraal at Bulawayo. All difficulties having been removed, Mr. Selous was directed to make a road into Mashonaland in advance of the expedition. Dr. Jameson now gave up his medical practice at Kimberley, and settled at Fort Salisbury, as the representative of Mr. Rhodes, at whose instance, in 1891, he was appointed administrator of the company. Upon the defeat of the Sprigg Ministry in 1890 Mr. Rhodes became Premier of the Cape, and formed an alliance with Mr. Hofmeyr and the Afrikaner Bond, thus securing a solid Dutch vote. During 1891 he gave £10,000 in support of the cause of Home Rule for Ireland. For two or three years the development of the Chartered Company's territories proceeded very satisfactorily, but during 1893 the Matabele became troublesome, and constantly raided and massacred the Mashonas, a more peaceable tribe. Mr. Rhodes, though directed to avoid aggression, prepared for war, and when, in September, Lobengula placed himself at the head of his army, Mr. Rhodes went to Fort Salisbury to direct operations against him. After considerable fighting, in which the Matabele suffered severely, peace was restored, and, upon the death by fever of Lobengula in January 1894, a general submission by the natives was made. Upon his return to Cape Town Mr. Rhodes was entertained at a public banquet, and great satisfaction was expressed with his conduct. In a speech at the time he outlined his policy with regard to the natives, and also his plans for railway communication, tariffs, law, and coinage. About this time he sent three of Lobengula's sons to Cape Town to be educated at his own expense. In company with Dr. Jameson he came to England in November 1894, and made several speeches dealing with Cape politics and a "United South Africa" on federal principles. He was sworn a Member of the Privy Council in February 1895. Early in the following year Mr. Rhodes resigned the Premiership of the Cape, and also his

position as a Director of the British South Africa Company, owing to his alleged complicity with the raid into the Transvaal. He was chiefly accused of directing Jameson to move to Johannesburg, but this was emphatically denied by Dr. Jameson in a letter to the *Times* in the following May. His connection with the Reform movement and agitation amongst the English residents at Johannesburg was freely admitted before the Select Committee appointed by the House of Commons to inquire into the cause of the incursion into the Transvaal. One of the consequences of the Jameson raid, mainly owing to a loss of prestige, was a second revolt of the Matabele. Many of the native police joined the rebels, taking their rifles with them, and a general massacre of white settlers was contemplated. Mr. Rhodes at once formed a fighting column at Salisbury, and afterwards inflicted a severe defeat upon the Matabele at Gwelo, thus breaking the back of the insurrection. In August 1896, accompanied by Dr. Sauer and Mr. J. Colenbrander, he went to the Matoppos Hills to meet the native chiefs, and entered the stronghold of the Matabele alone and unarmed. This greatly impressed them, and they eventually surrendered unconditionally. In January 1897 Mr. Rhodes came to England, receiving a popular ovation. He was summoned to appear before the Select Committee appointed to inquire into the Jameson raid, and during his examination he admitted that he had assisted the movement in Johannesburg with his purse and influence, as he believed that the persistently unfriendly attitude of the Government of the South African Republic towards Cape Colony was the great obstacle to common action for practical purposes among the various States of South Africa. With reference to the raid, he said Dr. Jameson went in without his authority. He also stated that in all his actions he was greatly influenced by the belief that the policy of the Transvaal Government was to introduce the influence of another foreign power into the already complicated system of South Africa, and thereby render more difficult the closer union of the different States. The committee in their report to the House of Commons expressed their strong disapproval of Mr. Rhodes' conduct throughout the Transvaal crisis, and the part he had taken in furnishing aid to the Reform Committee at Johannesburg, and they also stated that his policy had involved him in grave breaches of duty to those to whom he owed allegiance. In the discussion which followed the presentation of the report, Mr. Chamberlain said, "Although Mr. Rhodes had committed as great a fault as a statesman or

a politician could commit, nothing had been proven, and there existed nothing against his personal character as a man of honour." In June 1897 Mr. Rhodes returned to South Africa, and in company with Earl Grey went to Buluwayo to negotiate with some native chiefs, in order to stop the fighting which was still going on in various parts of Mashonaland. In November Sir Alfred Milner opened the railway running between Kimberley and Buluwayo, and at the banquet which followed he paid a warm tribute to the energy and foresight of Mr. Rhodes, who had acted as managing director of the line, and as the prime mover in its construction. The election for the Legislative Council of the Cape took place in March 1898, and was won by the Progressive party, led and inspired by Mr. Rhodes, on a policy of free food products, compulsory education, railway development, and restricted sale of liquor to natives, as to internal affairs; coupled with the larger policy of the federation of the Cape, Natal, and Charterland under the British flag. The elections for the Assembly, later in the year, were very closely fought, and Mr. Rhodes was returned for both Barkly West and Namaqualand, but he elected to sit for the former, his old constituency. When all the papers were collected, it was found that there were 40 Bond candidates and 39 Progressives. Sir Gordon Sprigg, who had succeeded Mr. Rhodes in the Premiership, thereupon resigned. Mr. Rhodes's connection with the Jameson raid and the Outlander agitation had shaken the faith of a large number of Dutch voters, hence the secession of many of his former supporters. In April 1898 he came to London to confer with the Directors of the Chartered Company respecting the reconstitution of the Board of the future administration of Rhodesia. His scheme for an increase of capital by one and a half millions was approved, and at the same time he was unanimously re-elected by the shareholders as a director of the company. Since that date he has devoted himself almost entirely to the development of the Chartered territories, but early in 1899 he again visited England in order to secure a Government guarantee for the section of the railway which he intends to lay between Buluwayo and Lake Tanganyika. Perhaps the greatest of his projects is the scheme for the connection of Cape Town and Cairo by a railway and by telegraph. He went to Egypt in March to confer with Lord Kitchener as to the section of the railway to run through Egypt and the Soudan. The only obstacle now remaining in the way of a trans-African railway is the permission to take the line either through German East

Africa or the Congo Free State. But as Mr. Rhodes has been honoured by two interviews with the German Emperor, who has a great admiration for Cecil Rhodes and his projects, it is almost certain that the line will go through German territory. The German Government has also decided to guarantee the interest on the capital invested in it. Mr. Rhodes firmly believes there are gold-fields in Rhodesia, and hopes soon to erect batteries for the crushing of ore. His chief delight is in farming, which he greatly encourages among the settlers; he also keeps a large menagerie at Table Mountain, and he allows the zebras, ostriches, and buck of all kinds to run wild in huge enclosed tracts on the mountain side. He is famous as a collector of books, curios, &c., and has caused many of the Greek and Roman classics to be specially translated for his perusal. He received the D.C.L. degree at the *Enccenia* at Oxford in June 1899, and was most enthusiastically welcomed on that occasion.

RHYS, Ernest, was born in London in 1859, and carried the same year to Carmarthen, his father's native place. He was educated there, and at Newcastle-on-Tyne, and Durham; studied mining engineering at Langley Park, co. Durham, and then threw up, in 1885, his post, after passing the usual Government examinations, in favour of literature. He edited the *Camelot Series*, leading off, in 1886, characteristically, with Malory's "*Morte d'Arthur*," which won an extraordinary success. The series ran to some eighty volumes. Mr. Rhys has also written on Lord Leighton, and edited, in other series, the plays of Thomas Dekker, and the poems of Herrick, Geo. Herbert, Clough, and Walt Whitman. More recently he has added to this list yet another series, "*The Lyric Poets*," whose twelve volumes include Campion and Sidney. Marrying in 1891 (*vide* the succeeding notice), he retreated to a mountain cottage at Geinen Hir, in the Vale of Llangollen, and took up more deliberately the study of Welsh poetry. The result may be seen in his book, "*A London Rose, and other Rhymes*," whose poems, devoted to Welsh subjects, won the praise of Robert Louis Stevenson; and in his more recent volume of "*Welsh Ballads*," published in 1897. Mr. Rhys has interested himself, as this book shows, in the revival of Welsh printing; and in a recent lecture on "*Welsh Heroes*," he is said to have predicted more than a merely fanciful resurrection of the sword of Owain Glyndwr. Mr. Rhys has been duly initiated in the sacred circle of the Welsh bards as "*Rhys Goch o Ddyfed*," and is a well-known contributor on Celtic subjects to our contemporaries, *Literature*

and the *Speaker*. He has written a novel, with a Welsh heroine, "The Fiddler of Carne." He is an active member of the Cymmrodorion Club. Address: (Leigh) Hunt Cottage, 72 Hampstead Vale, N.W.

RHYS, Grace, was born at Knockadow, Boyle, co. Roscommon, Ireland, July 12, 1865. She is the youngest daughter of the late J. Bennet Little, Esq., of Knockadow, Boyle, J.P., B.A., T.C.D., and of Emily his wife, daughter of William White, Esq., of Shrubs, co. Dublin. She was educated at Alexandra College, Dublin, and at the Ladies' College, Cheltenham, and was married, in January 1891, to Ernest Rhys. She edited, in 1894, "Cradle Songs," in the Canterbury Poets Series, and in 1895-96, the Banbury Cross Series (J. M. Dent & Co.). She published, in 1898, a first novel, "Mary Dominic" (J. M. Dent & Co.), which is a sombre and powerful story of rural life in Ireland.

RHYS, John, M.A., LL.D. Edin.; Principal of Jesus College, Oxford; born June 21, 1840, at Abercaera, near Ponterwyd, Cardiganshire, served a pupil-teacher's apprenticeship at Penllwyn British School, near Aberystwyth, from August 1855 to the end of 1859; was trained at Bangor Normal College to be a public elementary schoolmaster in 1860; and had charge of a school in Anglesey till the end of 1865. He matriculated as a commoner of Jesus College, Oxford, at Michaelmas, 1865; and at the end of 1869 was elected a Fellow of Merton College, Oxford. He also attended lectures at intervals from 1868 to 1870 at the Sorbonne, the Collège de France, and the University of Heidelberg. In 1870 he matriculated at Leipzig, and in 1871 at Göttingen, but soon afterwards returned, having been appointed her Majesty's Inspector of Schools for the counties of Flint and Denbigh, in May 1871. He was appointed Professor of Celtic in the University of Oxford in February 1877. In that year he published his "Lectures on Welsh Philology." He had previously been known as a Celtic scholar by his articles in Kuhn's *Beiträge zur vergleichenden Sprachforschung*, the *Revue Celtique*, and the *Archæologia Cambrensis*. Mr. Rhys was elected a perpetual Member of the Société Linguistique de Paris in 1873; made a corresponding member of the Dorpat Gelehrte Ethnische Gesellschaft in 1877; and elected an Honorary Fellow of Jesus College, Oxford, Oct. 30, 1877. He served on Lord Aberdare's Commission, appointed in August 1880, to inquire into the condition of Intermediate and Higher Education in Wales. In October 1881 he was elected to a Fellowship at Jesus Col-

lege, and in 1882 a work of his on Celtic Britain was published by the Society for Promoting Christian Knowledge. He was the Hibbert Lecturer for the year 1886, and chose for his subject "Celtic Heathendom," as illustrating the origin and growth of religion. In December 1889 he delivered, in Edinburgh, Rhind Lectures on Archæology, in connection with the Society of Antiquaries of Scotland. They were subsequently published in the *Scottish Review*. He issued an edition of "Penant" in 1883, and in 1887 began to edit, in conjunction with J. G. Evans, a "Series of Welsh Texts." In 1891 he published "Studies in the Arthurian Legend," and in 1892 a paper, entitled "Inscriptions and Languages of the Northern Picts," which was published in the *Proceedings of the Society of Antiquaries of Scotland*. The following year saw the publication of the Book of Llan Dâv, by Mr. J. G. Evans, with Professor Rhys's co-operation, who early in the year received the degree of LL.D. from the University of Edinburgh. In 1894 his treatise on the "Phonology of Manx Gaelic," was published by the Manx Society. Early in the year 1895 he was elected Principal of Jesus College, and his energies were at once directed to the thwarting of a scheme before Parliament to alienate from the College a sum of £20,000 belonging to the Meyrick Endowment, administered by it, and to the promoting of legislation to establish a closer connection between Jesus College and the three University Colleges of Wales, together with St. David's College, Lampeter. In 1896 the Welsh Land Commission, of which Professor Rhys was a member, published its exhaustive report, containing two chapters contributed by him, entitled "Racial Conditions," and "Linguistic Conditions—Welsh and English"; also the one on the general condition, characteristics, and habits of the farming population of Wales. In the course of the year 1897 Professor Rhys was, in company with Flinders Petrie and Montelius, elected by the Antiquaries of Scotland to be an honorary member of their Society; and he had the pleasure of seeing the legislation as to Jesus College brought to a satisfactory close, both as to the Meyrick Endowment, and to the closer connection of the College with the four Welsh Colleges. Address: Jesus College, Oxford.

RIBBLESDALE, Lord, The Right Hon. Thomas Lister, P.C., J.P., was born in London on Oct. 29, 1854, and is the son of the 3rd Baron, whom he succeeded in 1876, and of Emma, daughter of Colonel William Mure of Caldwell, Ayrshire. He entered the Army as a Lieutenant in the

Rifle Brigade in 1874, and retired with the rank of Major in 1886. He was a Lord-in-Waiting from 1880 to 1885, and Master of the Buckhounds from 1892 to 1895. He married Charlotte Monckton, daughter of Sir Charles Tennant, 1st Baronet, in 1877. In 1897 Lord Ribblesdale published an interesting book, entitled "The Queen's Hounds and Stag-Hunting Recollections." Address: Gisburn Park, Clitheroe, &c.

RIBOT, Alexandre Felix Joseph, French ex-Premier, was born at St. Omer on Feb. 7, 1842. In 1863 he took his degree in law in Paris, and in 1864 was given the diplomas of a Doctor of Laws and of a Licentiate of Letters. He joined the Bar in Paris, became First Secretary of the Bar Society, and in 1870 was appointed Secretary of the Society of Comparative Legislation. In March 1875 he was summoned by M. Dufaure to the Ministry of Justice, and was appointed Director of Criminal Affairs and Pardons, but afterwards became General Secretary at the Ministry. In 1876 he re-joined the Paris Bar on M. Dufaure's retirement. In April 1878, after having been a member of the Committee of Legal Resistance, he was elected to represent the Second Circumscription of Boulogne-sur-Mer in the Chamber of Deputies. He became one of the most prominent members of the Moderate Left, and was re-elected for his old constituency in 1881. He now became one of the principal orators of the Conservative Republican party. He spoke as a jurist on the framing of various laws, notably that of divorce, and in 1883 opposed the proposals put forward for reorganising the magistracy. In 1885 he was violently opposed to the Tonkin policy of the Ferry Cabinet. In 1886 he failed, owing to his moderate opinions, to obtain re-election in two constituencies, and retired from political life till March 20, 1887, when he was returned in the Pas-de-Calais. He was a staunch opponent of Boulangism, and was one of the promoters of the uninominal system of voting which dealt the death-blow to the General's cause. In September 1889 he was returned for the First Circumscription of St. Omer. In the New Chamber he pronounced in favour of a conciliatory policy, urged the Republican majority to close up its ranks, and proposed that important and progressive measures should take precedence of others. In the Cabinet formed by M. de Freycinet in March 1890, M. Ribot received the portfolio of Foreign Affairs, and retained it when the Cabinet underwent change in February 1892. To him is greatly owing the distinction of having brought about the Franco-Russian understanding. On the retirement of M. Loubet

owing to the Panama scandals, M. Ribot became President of the Cabinet in January 1893, and exchanged the portfolio of Foreign Affairs for that of the Interior. He still pursued the policy of Republican concentration, but on February 8 his government was violently attacked by M. Cavaignac, who declared that like its predecessors it was the slave of the Radicals. On February 16, the Chamber passed a vote of confidence in the Government, which was thus able to last a few weeks longer, and to pass a law making the correctional tribunals cognisant of libels in the press against foreign governments or their representatives. On March 30 the Ribot government fell, owing to a disagreement about the budget between the Chamber and the Senate. In January 1895, on the election of M. Faure to the Presidency of the Republic, several attempts were made to form ministries, but without success, until M. Ribot was appealed to and at once chose a Cabinet. On March 17, 1895, the Chamber decided unanimously that M. Ribot's speech on the watchmakers' strike, which was then causing serious trouble, should be placarded all over France. This unusual honour was certainly deserved, for the speech in question brought about the termination of the strike. M. Ribot's statement was referred to by M. Rivet, who made the proposal as to publication, as the speech not merely of an honest man, but of a statesman, and as a model for the whole country in the pacification of social conflicts. The accuracy of this estimate may be gauged by the following extract from M. Ribot's speech: "The State ought to respect the dignity of workmen just as it requires them to respect the principles of authority. . . . In view of the dispute as to whether wages had decreased or not, there is but one course to take—namely, a joint verification of the facts. The dictates of authority must now be superseded by the idea of contract and the fulfilment of engagements, and when we have implanted this idea in the heart of all, we shall have done much to dispel misunderstandings. We are about to verify the disputed point with the workmen. Hear them patiently, and see whether they are in the right. Both sides have appointed delegates, and if they cannot agree I shall decide the question impartially. If the workmen are in the right, wages will be increased. This is the way in which I understand the relations between the State and its workmen, and we shall thus set a grand example of social pacification." This eloquent appeal was naturally interpreted by the Socialists as a capitulation to their own theories, but the claim passed unnoticed.

However, Mr. Ribot's administration met with much adverse criticism. In the following month, Madame Lambert, sister of M. Ribot, met with a fatal accident at Calais, being run over in the street by a train. In October 1895 M. Ribot resigned on the question of the participation of members of his Cabinet in the Financial Syndicate connected with the Southern Railways, and he was succeeded by the Cabinet of M. Bourgeois (*q.v.*). Since this time M. Ribot has held no office, although he has been often approached when Cabinets have been in the making. His Paris address is 6 Rue de Tournon.

RICHARDS, Sir Frederick William, Admiral of the Fleet, G.C.B., F.R.G.S., First Sea Lord of the Admiralty, was born in November 1833, and entered the navy in January 1848. He was promoted Lieutenant in 1855, Commander in 1860, and Captain in 1866. During the Zulu and Boer Wars, he was Commodore of the British fleet on the West Coast of Africa. He accompanied the Ekowe Relief Column, and was present at the battle of Ginghulov in April 1879, and was awarded the Zulu medal with clasp. He received the C.B. in November of the same year. He took part in the action of Laing's Nek in January 1881, and was shortly afterwards created a K.C.B. Sir Frederick was an Aide-de-Camp to the Queen from June 1879 until he was promoted to the rank of Rear-Admiral in June 1882; the following month he became a Lord Commissioner of the Admiralty. He hoisted his flag as Commander-in-Chief on the East Indian Station in May 1885, and also commanded the naval forces which were landed during the Burma Annexation war of 1885-86. He rendered valuable service throughout that campaign, and received the thanks of the Indian Government "for the very complete and prompt manner in which his Excellency placed the whole force under his command at the disposal of the Government of India, and for the admirable manner in which the Naval Brigade was organised and equipped." In 1889 he was appointed a member of a Royal Commission under the chairmanship of the present Duke of Devonshire, upon Army and Navy Administration. In the following year he went to China as Commander-in-Chief on that station. In 1892 Sir Frederick was selected as First Sea Lord of the Admiralty, which position he now holds, and by virtue of this appointment he is practically Commander-in-Chief of the Navy. He was created a G.C.B. in June 1895. In November 1898 he was promoted to the rank of Admiral of the Fleet, in recognition of his distinguished

services, the promotion to be additional to the existing numbers. He has consented, at the request of the First Lord, to continue at the Admiralty as First Naval Lord until the middle of 1899. Address: 121 Victoria Street, S.W.

RICHMOND, Bishop of. See PULLEINE, THE RIGHT REV. JOHN JAMES.

RICHMOND, Sir William Blake, K.C.B., R.A., son of George Richmond, A.R.A., D.C.L., was born in London, Nov. 29, 1843. As a student at the Royal Academy he obtained two silver medals in 1857; in 1860 he exhibited a portrait of his two brothers. In 1859 and 1860 he travelled in Italy, working at several pictures that were not exhibited. In 1865 he went again to Italy, and studied in Rome, working at sculpture, architecture, fresco, and tempera painting. Between 1865 and 1868 he painted the "Procession of Bacchus." In 1870 he settled in England, and painted numerous portraits and other pictures. In 1873 he executed for J. S. Hodgson, Esq., of Lythe Hill, Haslemere, a series of frescoes illustrating "The Life of Woman." At the same time he painted a colossal "Prometheus Bound," exhibited at the Academy the following spring, with several portraits. Since that time Mr. Richmond has exhibited at the Grosvenor and the Academy: "Ariadne abandoned by Theseus," "Sarpedon carried by Night and Death," "Electra at the Tomb of Agamemnon," "Hercules releasing Prometheus," "The Ten Virgins," "An Audience at Athens," and "Hermes," besides portraits of Holman Hunt, Darwin, the Bishop of Salisbury, Lord Cranborne, Princess Louise, and in 1899 Miss Muriel Wilson and the Dean of St. Paul's. Mr. Richmond was elected Slade Professor at Oxford, in the place of Mr. Ruskin, in 1878, but resigned the post in 1883, when Mr. Ruskin again filled it. He received an honorary M.A. degree, and was elected Fellow of the Society of Antiquaries. He has made many studies all over Italy, Greece, and Egypt during several successive autumns. He has developed great interest in local affairs, from a desire to combat the fog and smoke nuisance which makes London so hard a place to paint in. In 1891, being consulted on the question of the decoration of St. Paul's Cathedral, he submitted designs for some portions of the choir, which were accepted. Mr. Richmond here saw his opportunity, and determined to employ mosaic, but mosaic made in England and applied by English workmen. Messrs. Powell, the old and respected firm, answered to his expectations, and supplied him with glass mosaic, and with one or two men who had

worked in it. Mr. Richmond trained a staff of workers under his own personal supervision. The great work has grown slowly but surely; the choir is finished, the quarters, domes, and quarter galleries are being completed, and it is hoped money will be forthcoming to finish the entire decoration of the Cathedral. Upon the occasion of Her Majesty's Jubilee he received the honour of K.C.B.; the year before the University of Oxford honoured him with the degree of D.C.L. Sir William is a Royal Academician, and Associate of the Royal Society of Architects, and of other societies. He is Professor of Painting to the Royal Academy, from which chair he has lectured on Michael Angelo, Giotto, the Evolution of Sculpture, the Survival of Greek Influence, and other subjects. Sir William Richmond has painted several mural works at Cheltenham and elsewhere, and has recently been engaged on the restoration of the paintings in several of the mosques in Cairo in conjunction with the highly esteemed architect, Herz Bey, and Mr. Ernest Richmond. Addresses: Beavor Lodge, Hammersmith, W.; Royal Academy; and Athenæum.

RICHMOND AND GORDON, Duke of, The Most Noble Charles Henry Gordon-Lennox, K.G., P.C., D.L., J.P., D.C.L., LL.D. (Hon. Camb.), eldest son of the 5th Duke of Richmond, was born at Richmond House, Whitehall, Feb. 27, 1818, and educated at Westminster School and Christ Church, Oxford; became a captain in the army in 1844; was aide-de-camp to the Duke of Wellington from 1842 till 1852, and to Viscount Hardinge from 1852 till 1854. In 1860 he succeeded his father as Duke of Richmond, to which dukedom was added in 1876 that of Gordon. His Grace was appointed President of the Poor-Law Board, and sworn a Privy Councillor in March 1859, and resigned in June, on the retirement of Lord Derby and his party; was made a Knight of the Garter, Feb. 6, and was President of the Board of Trade from March 8, 1867, till December 1868. He represented West Sussex in the Conservative interest from July 1841 till he succeeded his father as 6th Duke of Richmond, Oct. 21, 1860. His Grace was the acknowledged leader of the Conservative party in the House of Peers from Feb. 26, 1870, till Mr. Disraeli's elevation to the peerage as Viscount Beaconsfield. When that party returned to office in February 1874, he was made Lord President of the Council, and he retained that office until the defeat of the Conservatives in April 1880. He introduced the Bill by which Church Patronage was abolished in Scotland (1874), and also the Agricultural

Holdings Bill of 1875. In Lord Salisbury's first Ministry the Duke of Richmond held the post of President of the Board of Trade from January to August 1885, and was then appointed to fill the new post of Secretary for Scotland; but he held no office in Lord Salisbury's second Ministry. He is Hereditary Constable of Inverness Castle, Lord Lieutenant of Banffshire, Elder Brother of the Trinity House, and, since 1885, has been an Ecclesiastical Commissioner. He married, in 1843, Frances, daughter of Algernon Frederick Greville. This lady died in 1887. Addresses: 40 Belgrave Square, S.W.; Gordon Castle, Banffshire, &c.

RICHTER, Hans, Mus. Doc. Oxon., a celebrated conductor of orchestral concerts, was born April 4, 1843, at Raab, in Hungary, where his father was Capell-Meister of the Cathedral. In 1853 he entered the Löwenburg School in Vienna. For three or four years he was a member of the Court Chapel Choir, and in 1859 entered the Conservatorium, studied the horn under Kleinecke, and theory under Sechter. For some time he was horn-player in the orchestra of the Kärnthnerthor Opera. Esser brought him under the notice of Wagner, who took him to Lucerne, and there he made the first fair copy of the score of the "Meistersinger." In 1868 he became conductor at the Hof and National Theatre, Munich. Early in 1871 he went to Pesth as chief conductor of the National Theatre. He first attracted general attention in January 1875, when he conducted a grand orchestral concert in Vienna, and was invited to assume direction of the Court Opera Theatre on the retirement of Herbeck in April of the same year. Previous to this he had been conducting the rehearsal of the "Niebelungen Ring" at Bayreuth, and in 1876 he directed the whole of the rehearsals and performances of the Festival there, and received, at the close of the third set of performances, the Order of Maximilian from the King of Bavaria, and that of the Falcon from the Grand-Duke of Weimar. In 1877 he produced the "Walkyrie" in Vienna, and followed it in 1878 by other portions of the tetralogy. The same year he was made Capell-Meister, and received the Order of Franz Joseph. In 1879 he began the series of Orchestral Concerts in London, which, under his direction, have been annually continued, and have excited much attention. He has also conducted many performances of German operas in London, notably those of Wagner. Dr. Richter has a perfect knowledge of the scores of Beethoven's symphonies and other large works, and conducts them from memory. In 1885 he was chosen

Director of the Birmingham Festival, and in 1893 he received a handsome offer from Chicago, but was prevented from going to the Exposition by the Viennese authorities. In September 1898 he resigned his post as Conductor of the Vienna Philharmonic Society, having suffered from rheumatism in his right arm, and being only able to wield the baton with his left. His successor is Herr Gustave Mahler, Director of the Opera House.

RIDDELL, The Right Rev. Arthur, Roman Catholic Bishop of Northampton, the third son of the late Edward Riddell, of Bootham House, York, by his wife, the Hon. Catharine, sister of the 8th Baron Beaumont, was born in Paris on Sept. 15, 1836, and was educated at St. Gregory's College, Downside, near Bath, and at St. Cuthbert's College, Ushaw, near Durham. He was ordained priest in 1859, and his first mission was that of St. Charles's, Hull, where he worked for fourteen years. Upon the death of Canon Walker of Scarborough, in 1873, he was appointed to that mission, where he remained until his elevation to episcopal dignity. In June 1880 he was consecrated Bishop of Northampton, and has laboured so assiduously in his diocese, that the number of his clergy has increased from 34 to 71, and that of the laity from 6000 to about 10,000. Address: Bishop's House, Marriott Street, Northampton.

RIDDELL, Mrs. Charlotte Eliza Lawson, is the youngest child of James Cowan, of Carrickfergus, formerly High Sheriff for the county of that town. She married J. H. Riddell, Esq., a civil engineer, by whose initials she is generally known. Mrs. Riddell is the author of many popular novels, including: "Too Much Alone," "City and Suburb," "World in the Church," "George Geith," "Maxwell Drewitt," "Phemie Keller," "Race for Wealth," "Far above Rubies," "First and Last Love," "Life Assize," "Austin Friars," "Home, Sweet Home," "The Earl's Promise," "Mortomley's Estate," "Above Suspicion," "Her Mother's Darling," "The Mystery in Palace Gardens," "The Senior Partner," "Daisies and Buttercups," "A Struggle for Fame," "Alaric Spenceley," "Susan Drummond," "Bernie Boyle," "Mitre Court," "Miss Gascoigne," "The Nun's Curse," "Princess Sunshine," "A Mad Tour," "A Silent Tragedy," "The Head of the Firm," "The Rusty Sword," "Did He Deserve It?" "A Rich Man's Daughter." The last two appeared in 1897. Address: 3 Bulstrode Road, Hounslow, W.

RIDDELL, Mrs. J. H. See RIDDELL, MRS. CHARLOTTE E. L.

RIDDING, The Right Rev. George, D.D., Bishop of Southwell, son of the late Rev. Charles Ridding, Vicar of Andover, by Charlotte, daughter of the late Ven. Timothy Stonhouse-Vigor, third son of Sir James Stonhouse, 7th Bart., was born March 16, 1828; educated at St. Mary's College, Winchester, and at Balliol College, Oxford (Craven Scholar, B.A., first class in Lit. Hum., second class in Mathematics, and Fellow of Exeter College, 1851, Latin Essay and M.A. 1853, D.D. 1869); ordained Deacon 1854, and Priest 1856; was a Tutor of Exeter College 1852-63, Junior Proctor of Oxford University 1861-62, Select Preacher 1862-64 and 1890-91, Second Master of Winchester College 1863-66, and Head-Master of Winchester College 1867-84; consecrated first Bishop of Southwell, May 1, 1884; married, (1) 1858, Mary Louisa, who died 1859, daughter of the Right Rev. George Moberly, D.C.L., 92nd Bishop of Salisbury; (2) 1876, Lady Laura Elizabeth Palmer, daughter of the 1st Earl of Selborne. Address: Thurgoldton Priory, Southwell, Notts.

RIDGEWAY, The Right Hon. Sir Joseph West, K.C.B., K.C.S.I., Governor of Ceylon, was born in 1844, and is the son of the late Rev. Joseph Ridgeway, of Tunbridge Wells. He entered the Indian army as ensign in 1861, attaining the rank of Colonel in 1885. He served in the Afghan War in 1879, his services being several times acknowledged in despatches. He was Under Secretary to the Government of India, 1880-84, in which latter year he was appointed Assistant-Commissioner for the Demarcation of the NW. Boundary of Afghanistan, for which he received the thanks of her Majesty's Government. In 1885 he was appointed Commissioner for the Delimitation of the Afghan Frontier between the Heri Rud and the Oxus. In 1887 Sir West Ridgeway filled the post of Under Secretary at Dublin Castle, and in 1892 was sent as Envoy-Extraordinary on a special mission to the Sultan of Morocco. From 1893 to 1895 he was Governor of the Isle of Man, and in the latter year was appointed to his present post. He married Lina, daughter of R. C. Bewick, in 1881. Address: Colombo, Ceylon.

RIDLEY, Sir Edward, Justice of the High Court, is a brother of Sir Matthew White Ridley, and was born at Blagdon, the family seat in Northumberland. He was educated at Harrow, and Corpus Christi College, Oxford, where he took a first class in Classical Moderations in 1864, and in Lit. Hum. in 1866. He was afterwards elected a Fellow of All Souls. He was

called to the Bar at the Inner Temple in 1868, and went the Northern and NE. Circuits. From 1878 to 1880 he sat for a short time in the House of Commons as Conservative member for South Northumberland. In 1886 he was appointed to the important position of Official Referee of the High Court of Judicature, and took silk in 1892. In April 1897 he was appointed Justice of the High Court, in the place of Mr. Justice Charles, resigned, and was knighted in May. He is favourably known to scholars as the translator of the "Pharsalia." He married, in 1882, Alice, second daughter of the late Colonel William Bromley-Davenport, M.P. Addresses: 48 Lennox Gardens, S.W.; and Athenæum.

RIDLEY, The Right Hon. Sir Matthew White, Bart., D.L., J.P., M.P., Home Secretary, was born at Carlton House Terrace on July 25, 1842, and is the eldest son of the late Sir Matthew White Ridley, 5th Baronet, of Blagdon, whom he succeeded in 1877. He was educated at Harrow, and at Balliol College, Oxford, of which he was a scholar. He graduated B.A., after being placed in the first class in Lit. Hum. in 1865, and was a Fellow of All Souls from 1865 to 1873 (M.A. 1867). His parliamentary career began in 1868, when he was elected Conservative member for Northumberland (North). He represented this constituency until 1885. In 1886 he was returned for the Blackpool Division of Lancashire, which he now represents. He was Under-Secretary for the Home Department from 1878 to 1880, Financial Secretary to the Treasury in 1885-86, and was appointed Secretary for the Home Department in 1895. In the same year he was appointed an Ecclesiastical Commissioner. He was mentioned as a possible successor to Speaker Peel. For many years (1873-95) he was Chairman of Quarter Sessions in Northumberland, is Chairman of the County Council of that county, and was at one time Hon. Colonel of the Northumberland Yeomanry. He was sworn of the Privy Council in 1892. He is a Governor of Harrow. He married, in 1873, Mary, daughter of the 1st Lord Tweedmouth. She died on Mar. 14, 1899. The death of this popular lady is a loss to the Conservative party, she having been one of the few hostesses accustomed to entertain its members. Addresses: 10 Carlton House Terrace, S.W.; and Athenæum.

RIGBY, The Right Hon. Sir John, Lord Justice of Appeal, is the son of the late Thomas Rigby, Esq., of Halton, Cheshire, by Elizabeth, daughter of Joseph Kendal, Esq., and was born in

1834. He received his education at Liverpool College, and at Trinity College, Cambridge, where he was the second Wrangler, and Smith's Prizeman of his year; M.A., 1859. He was a Fellow of Trinity from 1856 to 1866, and in 1860 was called to the Bar at Lincoln's Inn. In 1881 he became a Q.C., and a Benchet in 1884. He was Junior Counsel to the Treasury from 1875 to 1881, and in December 1885 entered Parliament as Liberal Member for the North, or Wisbeach Division of Cambridgeshire. He sat for this constituency till June 1886. On July 11, 1892, he re-entered Parliament as Gladstonian Liberal member for Forfarshire, and was appointed Solicitor-General in August, at the same time receiving the honour of knighthood. In 1894 he was appointed Attorney-General, and in 1894 was raised to the Bench as Lord Justice of Appeal. Addresses: 11 New Square, Lincoln's Inn; and Athenæum, &c.

RIGG, The Rev. James Harrison, D.D., was born on Jan. 16, 1821, at Newcastle-on-Tyne, being the second son of the Rev. John Rigg, a Wesleyan minister who was eminent in his day. He received his education at Old Kingswood School, where he was afterwards a teacher, and in 1845 he entered the Wesleyan ministry. He was one of the leading writers for the *Biblical Review* (1846-49). For many years the Wesleyan Conference was more indebted for the defence and exposition of its proceedings and principles to this young minister than to any other person. In 1865 he was elected by the Conference to be Chairman of the Kent District, and in 1866 a member of the "Hundred," or the "Legal Conference." In 1868 he was elected Principal of the Wesleyan Training College, a position which he still holds. In 1878 Dr. Rigg was chosen President of the Wesleyan Conference. His name is associated with the admission of laymen in the Conference that year, and with the Thanksgiving Fund, which has realised over £300,000 for Methodist work. In 1892 he received the rare honour of a second election to the Presidency of the Conference. For many years (till 1896) Dr. Rigg was Chairman of the "Second London District Synod" of the Wesleyan Methodist Church. He was one of the original members of the London School Board, on which he represented Westminster for six years. In 1886, 1887, and 1888, he was a member of the Royal Commission on Elementary Education. He has written "The Principles of Wesleyan Methodism," 1850; "Connexionalism and Congregational Independence," 1851; and "The Connexional Economy of Wesleyan Methodism," 1879; "Modern Anglican

Theology," 1857 (3rd edit., enlarged 1879); "Essays for the Times on Ecclesiastical and Social Subjects," 1866; "The Churchmanship of John Wesley," now in its 3rd edit.; "The Living Wesley as he was in his Youth and in his Prime," now published in an enlarged form as "The Centenary Life of Wesley," 1891; "National Education in its Social Conditions and Aspects, and Public Elementary Schools, British and Foreign," 1873; "Discourses and Addresses on Leading Truths of Religion and Philosophy," 1880; "The Sabbath and the Sabbath Law before and after Christ," 1881; "Was Wesley a High Churchman?" and "Is Modern Methodism Wesleyan Methodism? or Wesleyan Methodism and the Church of England," and "Church Organisation: Primitive and Protestant," 1887 (2nd edit., much enlarged, 1891; 3rd edit., revised and again greatly enlarged, 1897); "Oxford High Anglicanism and its Chief Leaders," 1895. Dr. Rigg was formerly English correspondent of the *New Orleans Christian Advocate* (1851), and of the *New York Christian Advocate* (1858-76). He has written for the *Wesleyan Magazine*, the *Quarterly*, *Contemporary*, and *International Reviews*, and has contributed articles on Methodism to the new edition of the "Encyclopædia Britannica." He has for many years been the editor of the *London Quarterly Review*, which is the quarterly literary organ of the Wesleyan Methodists. Throughout his whole course he has held, as an educationist, a position opposed to secularism and equally opposed to sectarian exclusiveness. Addresses: Westminster College, 139 Horseferry Road, S.; and 79 Brixton Hill, S.W.

RILEY, John Athelstan Lawrie, is the only son of John Riley, barrister, of an ancient Yorkshire stock, the De Rileys, and was born in London on Aug. 10, 1858. He was educated at Eton and at Pembroke College, Oxford, where he took his M.A. in 1884. Not being called upon to put his hand to the plough, on leaving the University he travelled extensively in the East, visiting Turkey and Persia, and especially familiarising himself with the wild and little-known district called Kurdistan. Having been an eye-witness of the sufferings of the Christians of Eastern Turkey at the hands of the Kurds, he has more than once assisted in exposing the horrors of Turkish misrule. One result of his travels has been the introduction amongst the Christian population of North-Western Persia of a system of education which has been very successful, whilst he practically laid the foundation of what is now known as the Archbishop of Canterbury's Mission to the Assyrian

Christians. He is a Fellow of the Royal Geographical Society; a member of the London Diocesan Conference, and of the House of Laymen of the province of Canterbury; and Honorary Treasurer of the Church Education and Voluntary Schools Defence Union for the Metropolis, in the founding of which he took a leading part. He was a member of the London School Board from 1891 to 1897, when he retired. As member of the Board he was the prominent champion of Anglicanism. He published in 1897 "Athos, or the Mount of the Monks," and has written various pamphlets and many articles on educational subjects and on the Eastern Christians and travel. Some of these articles have appeared in the *Nineteenth Century*. In 1887 he married the eldest daughter of the Right Hon. and Rev. Viscount Molesworth. Address: 2 Kensington Court, W.

RINGER, Sidney, M.D., F.R.C.P., F.R.S., was born in 1836, his father being in business in Norwich. He was educated at Dr. Brewer's School, and at University College, London, where he has been Professor of Materia Medica and Therapeutics, and Professor of Medicine, and at present holds the Chair of Clinical Medicine. He has been Assistant-Physician at University College Hospital, and is now Physician there and at the Children's Hospital, Great Ormond Street. He has been Examiner at the University of London and at the Royal College of Physicians of London, and is Hon. Member of the Pharmaceutical Society and New York Medical Society, and Corresponding Member of the Academy of Medicine, Paris. He has published "Handbook of Therapeutics," 13th edit.; "Temperature in Phthisis," 2nd edit.; besides contributing numerous papers to the *Physiological Journal* and medical journals. Addresses: 15 Cavendish Place, W.; and Leestingham, Sinnington, Yorks.

RIPON, Marquis of, The Most Hon. George Frederick Samuel Robinson, P.C., K.G., G.C.S.I., C.I.E., D.L., J.P., D.C.L. (Hon. Oxford), Litt.D. (Hon. Victoria), F.R.S., Bart., long known as Earl de Grey and Ripon, is the only son of Frederick John, 1st Earl of Ripon (better known by his original title of Viscount Goderich, which he bore when he held the post of Premier for a few months in 1827), by Lady Sarah Albina Louisa Hobart, only child of Robert, 4th Earl of Buckinghamshire. He was born in London, Oct. 24, 1827, and succeeded to his father's titles, Jan. 28, 1859, and to those of his uncle, as 3rd Earl de Grey, November 14, in the same year. He began his political life as *attaché* to a special mission to Brussels in 1849. At the General Election in 1852 he

was returned to the House of Commons by his courtesy title of Viscount Goderich as member for Hull, and continued to sit for that borough until 1853. In that year he was elected for Huddersfield, where he succeeded in winning the seat for the Liberals by a majority of eighty. At the General Election in 1857 he was returned for the West Riding of Yorkshire without opposition. In June 1859, the year in which he succeeded to the Upper House, Lord Herbert selected him for the post of Under-Secretary for War, and in February 1861, upon the accession of Sir George C. Lewis, he was made Under-Secretary for India. Upon the death of Sir G. C. Lewis, in April 1863, his lordship, who had shown great efficiency in his subordinate office, took the place of his chief as Secretary for War, together with a seat in the Cabinet. He remained at the War Office nearly three years, and in February 1866, when Sir Charles Wood, afterwards Viscount Halifax, withdrew from the Ministry, was appointed Secretary of State for India. On Mr. Gladstone's accession to office in December 1868, he was appointed Lord President of the Council, but he resigned that office in August 1873. He was created a Knight of the Garter in 1869. In 1871 he acted as Chairman of the High Joint Commission which arranged the Treaty of Washington; and in recognition of the services he rendered in that capacity he was, soon after his return from the United States, created Marquis of Ripon. His lordship, who is a Magistrate and Deputy-Lieutenant for the North and West Ridings of Yorkshire, and for the county of Lincoln, was created an honorary D.C.L. of Oxford in 1870, and on April 23 in that year was installed as Grand Master of the Freemasons of England, in succession to Lord Zetland. In the autumn of 1874 the Grand Lodge received a communication to the effect that the Marquis of Ripon had resigned the post of Grand Master, and their surprise was heightened to dismay by the circumstance that he did so without assigning any reason for the step. A few days afterwards, however, it transpired that his lordship had joined the Roman Catholic Church, which, as is well known, has condemned Freemasonry and all other oath-bound societies. The reception of the Marquis into the Roman Catholic Church took place at the Oratory, Brompton, Sept. 7, 1874, and his conversion gave rise to much comment in the public journals, both here and on the Continent. On the return of Mr. Gladstone to power, the Marquis of Ripon was appointed Viceroy of India. He arrived at Bombay, May 29, 1880, and was installed in Simla, June 8. On June 18 a large meeting

was held in Exeter Hall to protest against the appointment of a Roman Catholic to the Viceroyalty of India. As Viceroy Lord Ripon excited much diversity of opinion by his policy, which was directed towards extending the rights of natives of India, and, in certain directions, towards limiting the privileges of Europeans. The excitement caused by the famous "Ilbert Bill" was the chief instance of this; and in a word it may be said that there never was a Viceroy so unpopular among Anglo-Indians, or so popular among natives. Lord Ripon's departure was the occasion of the most extraordinary manifestations in his favour on the part of the Hindoo population of Bengal and Bombay. In Mr. Gladstone's short "Home Rule" administration Lord Ripon was First Lord of the Admiralty. On the return of his party to power in 1892 he was appointed Colonial Secretary. In 1895 he was Mayor of Ripon. The Marquis was elected in 1882 President of the Yorkshire College, Leeds. He married, in April 1851, Henrietta Anne Theodosia, eldest daughter of the late Mr. Henry Vyner; she has been a Lady of the Bedchamber to the Princess of Wales. He has surviving issue, Frederick Oliver, born Jan. 29, 1852, now Earl de Grey, heir to the marquise. Addresses: 9 Chelsea Embankment, S.W.; Studley Royal, Ripon; and Athenaeum.

RIPON, Assistant-Bishop of. *See* HELLMUTH, THE RIGHT REV. ISAAC.

RIPON, Bishop of. *See* CARPENTER, THE RIGHT REV. WILLIAM BOYD.

RIPPMANN, Walter, born in London on January 22, 1869, was educated in Germany, 1881-3, and at Dulwich College, 1883-7. Entrance Scholarship in Modern Languages at Gonville and Caius College, Cambridge, 1887; London B.A., Honours in French and German, 1887; second class in Classical Tripos, part i., 1889; first class in Medieval and Modern Languages Tripos, 1890; London M.A., Modern Languages, 1890; Classics, 1894; second class in Classical Tripos, part ii., 1891, and in Indian Languages Tripos, 1892. He was Assistant-Lecturer in Modern Languages at Gonville and Caius, 1890-97; was appointed Professor of German Language and Literature at Queen's College, Harley Street, 1896, and at Bedford College, 1896-98; Lecturer at Mr. Wren's, Powis Square, 1897. He is editor of "Twenty Stories from Grimm," Pitt Press, 1896; of "Eight Stories from Andersen," Pitt Press, 1898; of Grillparser's "Sappho," Macmillans, 1898; and of Dent's Modern Language Series. Address: 41 Westmoreland Road, Bayswater, W.

RISTICH, John, a Servian statesman, born at Kragujevatz in 1831, began his studies in Germany and continued them in Paris. Under the government of Prince Karageorgevitch he was appointed Secretary and afterwards head of a department in the office of the Minister of the Interior. Milosch Obrenovitch III., on his return in 1858, appointed M. Ristich secretary to a deputation which he sent to Constantinople; and at a later period the same Prince accredited him as the representative of Servia at the Sublime Porte. Scarcely had he been installed in his post, however, when the crisis commenced which culminated in the bombardment of Belgrade, 1862. M. Ristich extricated himself with such ability from the difficulties which ensued, that five years later (1867) he succeeded in obtaining the evacuation of all the Servian fortresses occupied up to that time by the Turkish troops. This service gained for him the portfolio of Foreign Affairs, but he soon resigned it in consequence of his inability to agree with Prince Michael on certain questions of detail. He was present as the representative of Prince Michael at the baptism of Prince Nicholas of Montenegro. While on his way back from Cetinje he learned the news that Prince Michael had been assassinated (July 10, 1868), and had been succeeded by his grand-nephew, Prince Milan. The young Prince was then pursuing his studies in Paris, and the provisional government which had been established sent M. Ristich to that capital to escort him to Servia. On the Prince's arrival at Belgrade the Grand National Skuptschina was convoked, and nominated a Council of Regency, composed of three members, to govern the country during the Prince's minority. M. Blasnavatz, M. Ristich, and M. Gavrilovitch formed this Council, which discharged its functions till 1872, when the Prince attained his majority. This Council then became a Ministry, in which M. Ristich held the portfolio for Foreign Affairs, and on the decease of his colleague, Col. Blasnavatz, he became President of the Council. He afterwards withdrew from public life for two years, until the insurrection occurred in Herzegovina, when he became Minister for Foreign Affairs. In May 1876 he and his friends returned to office, which they had been obliged to resign eight months previously, in consequence of the diplomatic pressure of the Cabinets of Vienna, Berlin, and St. Petersburg. He held the office of Foreign Minister during the disastrous war with Turkey (1877), in which the Servians were thoroughly defeated. In 1878 he was sent to the Congress of Berlin, where he successfully pleaded the

cause of Servia's independence. Since that date he has often been prominent in Servian affairs, but his strong pro-Russian leanings long prevented his holding office since Servia began to incline definitely towards Austria for support. However, in 1889, on the abdication of King Milan, he became head of the Regency during the minority of King Alexander. When in 1893, however, the young king suddenly took the reins of power into his own hands, he was dismissed, and ordered to leave Servia.

RISTORI, Adelaide. See GRILLO, MARQUISE DEL.

RITCHIE, Anne Isabella, wife of Mr. Richmond Ritchie, eldest daughter of William Makepeace Thackeray, was born in Albion Street, London. Some years of her childhood were spent in Paris, but she has passed the greater part of her life in Kensington. Her first published work was "The Story of Elizabeth," 1863, which was at once successful; this was followed in 1865 by "The Village on the Cliff"; "To Esther, and other Sketches"; "Old Kensington," the work by which she is best known; "Blue Beard's Keys," "Toilers and Spinsters," "Miss Angel," 1875; "Anne Evans," 1880; "Madame de Sévigné," 1881; "A Book of Sybils," 1883; and "Mrs. Dymond," 1885. In recent years she has written introductions to editions of "Cranford," "Our Village," and "The Fairy Tales of Madame d'Aulnoy." Various articles by her, on Tennyson, Ruskin, &c., have appeared from time to time in the American magazines, and in 1892 she published "Records" of Tennyson, Ruskin, and the Brownings. She has just finished editing a complete edition of her father's works, and has until recently been living in his old house, close to Kensington Square, where "Vanity Fair" was written.

RITCHIE, The Right Hon. Charles Thomson, M.P., President of the Board of Trade, son of the late Mr. William Ritchie, of Rock Hill, Forfarshire, was born at Dundee, on Nov. 19, 1838. In 1874 he was elected as Conservative member for the Tower Hamlets, and continued to hold the seat until 1885, when after the Redistribution Bill he was returned for the St. George's Division of the old borough. In Lord Salisbury's first administration, having gained a considerable reputation for practical ability and conversance with affairs, he was made Secretary to the Admiralty. He has taken a prominent part in the agitation against foreign bounties on sugar. In Lord Salisbury's second administration Mr. Ritchie was appointed President of the Local

Government Board. During the session of 1888 he gained considerable reputation by his Local Government Bill, which he successfully carried through Parliament. The Local Government Act of 1888 inaugurated the scheme of local administration, which was completed by the passing of the Act of 1894 in the March of that year. In October 1888 he paid a visit to his native town, Dundee, and was presented with the freedom of the borough. Mr. Ritchie failed to secure re-election in 1892, but was elected for Croydon, 1895. He was appointed President of the Board of Trade on the formation of Lord Salisbury's Government in that year. He married, in 1858, Margaret, daughter of Thomas Ower, of Perth. Addresses: 19A Wetherby Gardens, S.W.; Welders, Gerard's Cross, Bucks; and Athenæum.

RITCHIE, David George, M.A. Edin. and Oxon.; LL.D. Edin., 1898; Professor of Logic and Metaphysics in the University of St. Andrews, was born in 1853 at Jedburgh, and is the only son of the Rev. George Ritchie, D.D., minister of the parish of Jedburgh. He was educated at Jedburgh Academy, Edinburgh University, 1869-74, and Balliol College, Oxford, 1874-78. He took M.A. degree with first-class Honours in Classics at Edinburgh, 1875; first-class in Classical Mods. and Greats at Oxford, B.A. 1878; after which he was elected Fellow of Jesus College, Oxford, November 1878; and was Lecturer and afterwards Tutor there from 1879 to 1894, also Lecturer in Philosophy for some time at Balliol College, 1882-86. His publications are: An essay on "The Rationality of History" in "Essays in Philosophical Criticism," edited by Seth and Haldane, Longmans, 1883; a translation, in collaboration with Richard Lodge (now Professor of History in Glasgow University) and P. E. Matheson, of Bluntschli's "Theory of the State," 1885; and the following works published by Sonnenschein: "Darwinism and Politics," 1st edit., 1889 (now in 3rd edit., being translated into German and Italian); "Principles of State Interference," 1891; "Darwin and Hegel, with other Philosophical Studies," 1893; "Natural Rights," 1895. He edited in 1889 "Early Letters of Jane Welsh Carlyle." He has also written the articles "Aristotle," "Plato," "Socrates," "Sophists" in "Chambers's Encyclopædia," new edition; and the articles "Aristotle," "Grotius," "Locke," "Jus Naturale," "Plato," in Dr. Inglis Palgrave's "Dict. of Pol. Econ."; also many articles in *Mind*, *Philosophical Review*, *International Journal of Ethics*, *Economic Review*, &c. Address: The University, St. Andrews.

RIVES, Amélie. See CHANLER, MRS. AMÉLIE.

RIVETT-CARNAC, Colonel John Henry, C.I.E., V.D., F.S.A., A.D.C. to the Queen, was born in London in 1839, and is the second son of the late Admiral Rivett-Carnac, and Maria, daughter of J. S. Davis, R.E., F.R.S. He was educated abroad, and at the East India College, Haileybury. His career in the Bengal Civil Service was long and distinguished, and extended from 1859 to 1894. During this period he was Advising Secretary to Sir Richard Temple in the Central Provinces, Commissioner of Cotton and Commerce with the Government of India, Special Commissioner in the Bengal Famine of 1874, Opium Agent, and raised and commanded the Ghazipur Light Horse and Volunteer Rifles. He was made C.I.E. in 1878. He has written various important reports on the Indian Cotton Trade, Indian Railways, Antiquities, &c., especially on archaic rock-markings. He is a Fellow of the University of Bombay, F.S.A., and Fellow or Hon. Fellow of various antiquarian societies, and is a Knight Grand Commander of the Austrian Order of Francis Joseph, and North Star of Sweden. He married a daughter of General Sir H. M. Durand, R.E. Address: 40 Green Street, Park Lane, W., &c.

RIVIÈRE, Briton, R.A., D.C.L., animal painter, was born in London, Aug. 14, 1840, being the youngest son of Mr. W. Rivière, who was head of the drawing-school at Cheltenham College, and afterwards a teacher of drawing at Oxford, and Ann, daughter of Joseph Jarvis, Warwickshire. He found in his father an experienced and able master, under whom he studied during the nine years he was at Cheltenham, and subsequently at Oxford. While studying art at the latter place, the influences, other than artistic, by which he was always surrounded, prevailed to turn his attention to classical and other scholarly matters; he entered the University, took his B.A. degree in 1867, and that of M.A. in 1873. The first pictures he exhibited were home rural scenes, as "Rest from Labour," and "Sheep on the Cotswold," in the Academy Gallery in 1858; and, in the next year, "On the Road to Gloucester Fair." From that date till 1864 he was absent from the Academy as an exhibitor, but in the last-mentioned year he sent "Iron Bars" and "Romeo and Juliet." Among his subsequent works are: "The Poacher's Nurse," "Strayed from the Flock," a dead lamb lying in the snow, and "The Long Sleep," 1866; "Fox and Geese" (exhibited in the Exhibition of Water-colour Painters at the

Dudley Gallery in 1868, and now in the collection at South Kensington); "Prisoners," 1869; "A Midsummer-Night's Dream" and "Charity," 1870; "Come Back!" and "Circe and the Companions of Ulysses," 1871; "Daniel," 1872; "Argus" and "All that was left of the Homeward Bound," 1873; "Apollo" and "Genius Loci," 1874; "War Time" and "The Last of the Garrison," 1875; "A Stern Chase is always a Long Chase," and "Pallas Athene" and "The Swineherd's Dogs," 1876; "A Legend of St. Patrick," and "Lazarus," 1877; "An Anxious Moment," a flock of geese frightened at the sight of a hat on the ground; "Sympathy," "Victims," and "The Ruins of Persepolis," 1878; "In manus tuas, Domine," "The Poacher's Widow," now in the Public Library, Birmingham, and "A Winter's Tale," 1879; "The Night Watch," "The Last Spoonful," and "Endymion," 1880; "A Roman Holiday," "Envy, Hatred, and Malice," "Hope Deferred," and "Let Sleeping Dogs Lie," 1881; "The Magician's Doorway," "Una," and "Portrait of Miss Potter," 1882; "The Unclean Spirits Entering into the Swine," "Old Playfellows," "The Last of the Crew," and "Giants at Play," 1883; "Actæon," "St. Bartholomew's Eve," "The King and his Satellites," "The Enchanted Castle," 1884; "The Sheepstealer," "Væ Victis," "After Naseby," "Stolen Kisses," 1885. Exhibited in the Academy in 1886: "Rizpah," "Union is Strength," "The Exile, 1746," and "The Welcome." In 1887: "An Old Wanderer" and "Jilted." In 1888: "Requiescat" and "A Cavatina." In 1889, at the Academy: "Pale Cynthia" and "Of a Fool and his Folly there is no End." At the Grosvenor: "Prometheus." In 1890, at Academy: "Rus in Urbe," and exhibited by Messrs. Thomas Agnew & Sons: "Daniel's Answer to the King." In 1891, at the Academy, a triptych called "A Mighty Hunter before the Lord"; in 1892, "Dead Hector," "A Master of Kings," "The Haunted Temple," and "A Day of Mortification"; and in 1893, "The King's Libation." In 1894, "Beyond Man's Footstep" (purchased by the Chantrey Fund), and "Ganymede"; in 1895, "Phœbus Apollo" (now in Birmingham permanent Art Gallery); in 1896, "Portrait of J. F. H. Read, Esq., and Dogs," "Aggravation," and bronze statuette "The Last Arrow"; in 1897, "Portrait of Lady Wantage and her Egyptian Donkey," "Portrait of Mrs. Methold and Deerhounds," and bronze "Anatomical Lion"; in 1898, "The Temptation in the Wilderness," a return to the religious subjects of his early period; and, in 1899, "Lady Tenyson and the Poet's Old Wolf-Hound,

Karénina." Many of the above have been engraved on steel by F. Stapoole, A.R.A., S. Cousins, R.A., and C. J. Lewis; and other works have been etched by various hands. Mr. Rivière was elected A.R.A. Jan. 16, 1878, and R.A. May 5, 1881, and made Hon. D.C.L. of Oxford in 1891. He married, in 1867, Mary Alice, daughter of John Dobell, of Datmore, Gloucestershire, and granddaughter of Sidney Dobell, the poet. Addresses: Flaxley, Finchley Road, N.W.; and Athe-

ROBERT I., Robert-Charles-Louis-Marie de Bourbon, ex-Duke of Parma, Infant of Spain, born July 9, 1848, succeeded his father, Duke Ferdinand Charles III., March 27, 1854, as Robert I., under the regency of his mother, the Dowager-Duchess Louise-Marie-Thérèse de Bourbon, daughter of the Duke de Berry. Her rule came to an end in 1859, in consequence of the revolution, and she, with her son, sought refuge in the Helvetic States. The ex-Duke Robert married, in Rome, April 5, 1869, the Duchess Marie Pia des Grâces, daughter of the late Ferdinand II., King of Naples. She died Sept. 29, 1882. He married, secondly, on Oct. 15, 1884, Marie Antonia, Princess of Bragança. He has nine children by his first wife, and six by his second.

ROBERTS, The Right Rev. F. A. R. Cramer. See CRAMER-ROBERTS, THE RIGHT REV. F. A. R.

ROBERTS, Lord, Field-Marshal Frederick Sleigh, J.C., K.P., G.C.B., G.C.S.I., &c., son of the late General Sir Abraham Roberts, G.C.B., and Nora Henrietta, daughter of Major A. Bunbury of Kilfeacle, co. Tipperary, was born at Cawnpore on Sept. 30, 1832, and educated at Eton, Sandhurst, and Addiscombe. He received his first commission as second lieutenant in the Bengal Artillery in 1851, and after passing through the various other grades, was promoted to Lieutenant-General in 1883. He served with distinction throughout the Indian Mutiny campaign, and received the Victoria Cross for personal bravery in the field in 1858. "Lieutenant Roberts's gallantry has on every occasion been most marked. On following up the retreating enemy on Jan. 2, 1858, at Khodagunge, he saw in the distance two sepoys going away with a standard. Lieutenant Roberts put spurs to his horse, and overtook them just as they were about to enter a village. They immediately turned round and presented their muskets at him, and one of the men pulled the trigger, but fortunately the cap snapped, and the standard-bearer

was cut down by the gallant young officer, and the standard taken possession of by him. He also, on the same day, cut down another Sepoy who was standing at bay, with musket and bayonet, keeping off a sowar. Lieutenant Roberts rode to the assistance of the horseman, and rushing at the sepoy, with one blow of his sword cut him across the face, killing him on the spot." Throughout the Abyssinian campaign of 1868 he held the office of Assistant - Quartermaster - General; he superintended the re-embarkation of the whole army, and was selected by Sir Robert Napier as the bearer of his final despatches. He also acted as Assistant-Quartermaster-General with the Cachar column in the Looshai Expeditionary Force (1871-72). At the beginning of the Afghan campaign he was appointed Commander of the Kuram Field Force, and subsequently he had the chief command of the army in Afghanistan, where he achieved the most brilliant triumphs. After the massacre of our embassy, Sir Frederick Roberts re-occupied Cabul at the close of 1879. Towards the end of July 1880 a terrible defeat was inflicted by the troops of Ayoub Khan, at Maiwand, on General Burrows, the remnant of whose force with difficulty joined General Primrose's garrison at Candahar. An attack on that city seemed imminent, but Ayoub hesitated, and lost his opportunity. Meanwhile, a bold resolution was taken at Cabul. Sir Frederick Roberts, gathering a force of over 9000 picked men, marched to the relief of Candahar, allowing Abdurrahman Khan to occupy Cabul, and leaving to General Stewart the duty of leading back the rest of the British troops by the Khyber to the Punjab. Sir Frederick Roberts, cut off from direct communication with his countrymen, disappeared, as it were, from human ken for three weeks, during which time the national anxiety was extreme. At last he emerged victorious from the trackless region between Cabul and Candahar. Immediately he grappled with Ayoub Khan, and inflicted on that pretender a crushing defeat. On the return of Sir Frederick Roberts to England he was loaded with honours; he was presented with the freedom of the City of London, received the thanks of Parliament, and was created a baronet. In February 1881 he was appointed to succeed Sir George Colley in the command of the troops in Natal and the Transvaal, but peace was concluded with the Boers before his arrival in the colony. He was afterwards appointed a member of the Council of Madras, and commanded the troops in that Presidency from 1881 to 1885, and since then has been Commander-in-Chief in India, in succession to Sir

Donald Stewart. On the death of Sir H. Macpherson (October 1886), Sir F. Roberts assumed the command of the Burmese expedition. He had been twenty-three times mentioned in despatches before the Afghan war, during which campaign he was eight times thanked by the Viceroy and Commander-in-Chief in India. To the *Nineteenth Century* for November 1882 he contributed an article on the "Present State of the Army," thus supplying the sequel to an interesting speech which he had delivered at the Mansion House about two years before. He was created a peer in January 1892, under the title of Lord Roberts of Kandahar and Waterford. In April 1893, on resigning his command, he left India for England, and was given a brilliant farewell, and received an equally brilliant reception at home. Upon his arrival, a G.C.S.I. was conferred upon him. During 1895 his Lordship was promoted to the rank of Field-Marshal, and succeeded Viscount Wolseley as Commander-in-Chief of the Forces in Ireland. He was shortly afterwards admitted to the Privy Council in Ireland, and also received the Order of St. Patrick. Lord Roberts is an ardent advocate of what is known as the "Forward Policy" in Indian affairs, and in March of 1898 he delivered before the House of Lords a very able speech in support of his views with regard to the pacification of the various frontier tribes, and also the prevention of encroachments by Russia in Afghanistan and adjacent territories. His lordship pointed out that the "Forward Policy" was an endeavour to extend British influence over, and establish law and order on, that part of the Indian border where anarchy, murder, and robbery reigned supreme. Moreover, it was necessary to secure the allegiance of the turbulent tribes, owing to the proximity of Russia, who would inevitably invade India, if Afghanistan ever passed into her possession. It was of paramount importance to obtain complete control of the Khyber and other passes, so as to be in a position to check any advance over the great Hindu Kush barrier. "That barrier," said his lordship, "Russia must never be allowed to cross." The speech was greatly appreciated, as it was felt that nobody could speak with higher authority upon the matter than Lord Roberts. He published in 1895 "The Rise of Wellington," which was followed in 1897 by "Forty-one Years in India." The latter work obtained a phenomenal success, and passed through many editions in a few months. He is an honorary D.C.L. of Oxford, and LL.D. of Cambridge and Dublin. Lord Roberts married, in 1859, Nora Henrietta, a daughter of Captain Bews, and his son

and heir, the Hon. Frederick H. S. Roberts, is a Lieutenant of the King's Royal Rifle Corps. Addresses: Royal Hospital, Dublin; and Athenæum.

ROBERTS, Frederick Thomas, M.D., F.R.C.P., obtained his medical education at University College, London, where he is now Professor of Medicine, as well as being Professor of Clinical Medicine and Physician at University College Hospital. He obtained the Gold Medal for Anatomy and Physiology at the first M.B. Examination, London, in 1860. He was formerly Physician at Liverpool Northern Hospital, and Lecturer at Liverpool School of Medicine, and now, in addition to the posts above mentioned, is Consulting Physician to the Brompton Hospital, &c., Fellow of the Royal Medical Chirurgical Society and Medical Society of London, and Member of other Medical Societies. He was Assistant-Editor of Quain's "Dictionary of Medicine," and has contributed largely to that work, to Reynolds's "System," and to the medical journals. His best-known work is "A Handbook of the Theory and Practice of Medicine," 9th edit. Address: 102 Harley Street, W.

ROBERTS, Isaac, D.Sc., F.R.S., F.R.A.S., F.G.S., was born in Denbighshire, North Wales, in the year 1829. A large part of his life has been devoted to practical investigations in Geology, Microscopy, Spectrum Analysis, Astronomy, and other kindred branches of science. He is the author of several papers on geological and astronomical subjects, amongst which are investigations of the physical conditions affecting the circulation of the underground water and the filtering and hygroscopic properties of triassic sandstone. He has for several years (by the aid of self-recording mechanical contrivances designed by himself for tracing continuous diagrammatic curves) studied the movements in the underground water which are caused by capillarity, by rainfall, by variations in atmospheric pressure, and by solar and lunar attraction. He has made exhaustive experiments by means of specially designed weighing machines, to determine the vertical and lateral pressures of wheat, barley, oats, Indian corn, linseed, sand, gravel, and gun shot, when stored in cells up to eighty feet in height. Some of the results of these investigations are published in the *Proceedings of the Royal Society*. For several years he has been pursuing stellar photography with powerful instruments specially constructed for the purpose, and has succeeded in adding considerably to the knowledge of the stars, clusters, and nebulae. In 1885 he com-

menced to chart by photography the stars in the northern hemisphere of the sky, but ere he had been a year engaged upon this work, the French astronomers arranged that the charting of the stars should be done internationally on a uniform scale by instruments of a similar construction. Mr. Roberts thereupon turned his attention to special researches on star clusters and nebulae, with long exposures of the photographic plates. These photographs have been regarded with the highest interest and admiration wherever they have been exhibited. He has devised a method and a machine by which the stars that have been photographed can with accuracy be engraved directly with the negatives on copper plates for the purpose of printing; the machine is also adapted for measuring the positions and magnitudes of the stars. In 1870 he was elected a Fellow of the Geological Society, and of the Royal Astronomical Society in 1882. In 1890 he was elected a Fellow of the Royal Society, and in 1892 the degree of Doctor of Sciences was conferred upon him by the University of Dublin. In 1893 he published a volume of his "Selection of Photographs of Stars, Star Clusters, and Nebulae," which is a reliable record, for all time, of the objects as they actually appeared in the sky on the day and hour when the respective photographs were taken. In 1895 he was awarded the Gold Medal of the Royal Astronomical Society, and has served on the Council of the Society for several years. Address: Starfield, Crowborough, Sussex.

ROBERTS, Morley, novelist, was born in London on Dec. 29, 1857, and is the son of W. H. Roberts, late superintending inspector of income-tax. He was educated at Bedford Grammar School and Owens College, Manchester. He has seen much of the savage side of Anglo-Saxon existence before the mast in various merchant ships, in the Australian bush, the Western States of America, the South Sea Islands, &c. The results of these varying experiences, which always involved more or less manual labour and often extreme hardship, he has embodied in his vigorous and virile novels, which include his well-known "Western Avernus," 1887; "In Low Relief," 1890; "Land-travel and Sea-faring," 1891; "King Billy of Ballarat," 1891; "The Mate of the Vancouver," 1892; "The Reputation of George Saxon," 1892; "The Purification of Dolores Silva," 1894; "Red Earth," 1894; "A Question of Instinct," and "The Adventures of a Ship's Doctor," 1895; that very interesting book on Eastern life, "The Circassian," in collaboration with Max Monteleone, 1896; "Maurice Quain," 1897; "King Billy of

Ballarat, and other Stories," 1898; "A Son of Empire," 1899, &c. His poems are entitled "Songs of Energy," 1891. Address: Authors' Club.

ROBERTS, Samuel, F.R.S., mathematician, the son of the Rev. Griffith Roberts, for many years minister of the English Presbyterian Chapel at Kirkstead, near Horncastle, Lincolnshire, was born at Hackney in 1827. He received his school education at Queen Elizabeth's Grammar School, Horncastle, and subsequently went to Manchester New College, then located in Manchester. In 1849 he took the Master of Arts degree of London University in Mathematics and Natural Philosophy, and received the Gold Medal. He entered the legal profession, and was admitted as Solicitor in 1853. After an interval of some years, Mr. Roberts resumed his mathematical studies; and, having removed to London, became in 1865 a member of the London Mathematical Society, established in the same year. He was for several years Treasurer, and has also filled the offices of Vice-President and President, 1880-82, of that Society. In 1878 he was elected Fellow of the Royal Society. Except a few early articles of an ephemeral kind, his writings have related to mathematical subjects. They are contained in the *Proceedings of the London Mathematical Society*, the *Quarterly Journal of Mathematics*, and various other English and foreign mathematical journals. In recognition of services to mathematical science, the Council of the London Mathematical Society awarded to Mr. Roberts the De Morgan Medal in 1896. Address: 55 Parliament Hill, Hampstead, N.W.

ROBERTS-AUSTEN, Professor Sir William Chandler, K.C.B., D.C.L., F.R.S., the Queen's Assay-Master, was born in 1843, and is the son of George and Maria Louisa Roberts. His father's ancestry were Welsh, and his mother belonged to the old Kentish family of Chandler, which intermarried with the Hulises and Austens, and included among their more distinguished members the learned scholar, Isaac Casaubon, Canon of Canterbury. In 1885, at the request of his uncle, the late Major Austen, J.P., of Haffenden and Camborne in Kent, Mr. Roberts obtained royal license to take the name of Austen. Mr. Roberts-Austen (then Mr. Roberts), entered the Royal School of Mines in 1861, with a view to becoming a Mining Engineer; but on obtaining the Associateship of the School, the late Prof. Graham, then Master of the Mint, secured his services. With him he conducted a remarkable series of researches, and on Prof. Graham's death in 1869, he succeeded

to one of the appointments which Prof. Graham had held—that of Assayer to the Mint—being subsequently, in 1882, entrusted with all the duties of the Queen's Assay-Master. In 1880, on the retirement of the late Dr. Percy, F.R.S., at the request of the then Lord President of the Council, Mr. Roberts-Austen was appointed to the Chair of Metallurgy at the Royal School of Mines, a post which he still holds in addition to his office at the Mint. He was elected a Fellow of the Royal Society in 1875, and is the author of several papers, mostly relating to metals, published in the *Philosophical Transactions* and elsewhere. He was one of the founders of the Physical Society of London, of which he was for some time Secretary, and afterwards a Vice-President. He is one of the two Honorary General Secretaries of the British Association for the Advancement of Science, and a Vice-President of the Iron and Steel Institute. His Royal Highness the Prince of Wales appointed him a Member of the Executive Council of the Inventions Exhibition, 1885; and he served on the British Executive Council of the 1889 Paris Exhibition. He was chosen Vice-President of the International Mining and Metallurgical Congress in Paris; and received from the President of the French Republic the Cross of Chevalier of the Legion of Honour. He was made a C.B. in 1888, and the University of Durham conferred upon him its honorary degree of D.C.L. in 1897. He received from her Majesty the Queen, in the same year, the Jubilee medal. He was created K.C.B. at the New Year, 1899. Addresses: Royal Mint, Tower Hill, E.; Blatchfeld, Chilworth, Guildford; and Athenæum.

ROBERTSON, Rev. Archibald, D.D., Principal of King's College, London, was born at Sywell Rectory, Northampton, on June 29, 1853, and is the eldest son of the late George S. Robertson, M.A., grandson of Dr. Archibald Robertson, F.R.S., of Northampton. He was educated at Bradfield College, Berks, and Trinity College, Oxford (first class Lit. Hum. and B.A. 1876; M.A. 1879; D.D. 1898); Fellow of Trinity College, 1876-86 (Dean, 1879-83); Principal of Bishop Hatfield's Hall, Durham, 1883-97; Hon. D.D., Durham, 1893. In 1897, on the retirement of Dr. Wace, he was appointed Principal of King's College, London. He has published an edition of Athanasius's "De Incarnatione" (2nd edit., 1893); a translation of the same (2nd edit., 1891); "Prolegomena," &c., to Athanasius with revised translation of principal works, 1892; and is a contributor to the *Classical Review*, &c., to Smith's "Dictionary of the Bible," 2nd edit., 1893;

Clark's "Dictionary of the Bible," 1898; and editor of Methuen's series of Handbooks of Theology. He is Examining Chaplain to the Lord Bishop of Bristol, and Vice-Chairman of King's College Hospital. In 1885 he married Eleanor, daughter of the Rev. Charles Noel Mann, late Rector of Mawgan-in-Meneage, &c., Cornwall.

ROBERTSON, Lieutenant-Colonel Donald, C.S.I., President of Mysore and Chief Commissioner of Coorg, was born in Ireland on June 24, 1847, and arrived in India as Ensign in the Scots Fusiliers in 1865. In 1869 he was appointed an Assistant-Commissioner in the Central Provinces, being transferred to Rajputana in 1872. He was Cantonment Magistrate at Nasirabad in May 1877, and after holding similar appointments at Ajmir, Jhalawar, and Indore, he became Political Agent at Bhopawar in 1885, and later in the same year he was transferred to Bundelkhand. In the following year he was Secretary to the Commissioner of Coorg, and Political Agent in Baghelkhand in 1888. He was appointed Resident in Gwalior in 1894, and transferred to his present post in 1896. He was created C.S.I. at the New Year, 1899.

ROBERTSON, Edmund, M.P., LL.D., Q.C., D.L., was born on Oct. 28, 1845, and is the eldest son of Edmund Robertson, of Kinnaird, Perthshire. He was educated at St. Andrews, and at Lincoln College, Oxford, where he graduated with a first class in Classical Moderations (1868), and a first class in Lit. Hum. (1870). He was elected a Fellow of Corpus after becoming in 1871 Vinerian Scholar. He was Examiner in Jurisprudence in 1877, 1878, and 1879. He was called to the Bar at Lincoln's Inn in 1871, and went the Northern Circuit. Since 1885 he has represented Dundee as a Liberal, in the House of Commons. From August 1892 to 1895 he was a Civil Lord of the Admiralty. He was at one time Professor of Roman Law at University College, London, and is LL.D. of St. Andrews. He has contributed many articles on legal and constitutional subjects to the "Encyclopædia Britannica," 9th edit., and has published a work on "American Home Rule." Address: 4 Essex Court, Temple, E.C.

ROBERTSON, Sir George Scott, K.C.S.I., M.R.C.S.E., British Agent at Gilgit, Kashmir, was born in London on Oct. 22, 1852, and is the second son of T. J. Robertson, and comes of an Orkney family. He was educated at the Westminster Hospital Medical School, and has the Edinburgh qualification. He entered the Indian Medical Service in 1878, and

served through the Afghan Campaign of 1879-80. He was promoted to Surgeon-Major in 1890. His connection with the Gilgit frontier of Kashmir dates from June 1880. He has been continually employed there, and is now British Agent at Gilgit. He has been employed on various important political missions among the barbarous tribesmen of the Northern Frontier, was Chief Political Officer during the later part of the Hunza-Nagar Expedition; was at the head of a political mission to Chitral in 1893, and was besieged in Chitral, and seriously wounded in the spring of 1895, in the September of which year he installed Shuja-al-Mulk as Mehtar of Chitral. His work, "The Kafirs of the Hindu-Kush," published in 1896, describes his visit to Kafiristan in 1890-91. The Hindu-Kush is a little known and most difficult hill-country between Afghanistan proper and Chitral. Previous to Sir George Scott Robertson's visit in 1890, the country had never to his knowledge been entered by any European except for a very short time. He made the acquaintance of the Kam and various other tribes, not then converted to Mohammedanism, and therefore "Kafirs," and he travelled with no escort. His guide was for some time a young Kafir, whom he had first of all to adopt as his son. He ran many risks, had several hair-breadth escapes, and was at one time in danger of being held to ransom for three years by his hosts, who intended to force the Government of India to pay for his release. During the last part of his journey he was accompanied by Mr. E. F. Knight, author of "Where Three Empires Meet." In 1898 Sir G. Scott Robertson published "Chitral, the Story of a Minor Siege." He has been granted three war medals for his important services, and rose to be K.C.S.I. in 1895. He married (2) Mary, daughter of Samuel Lawrence, the painter. Addresses: British Agency, Gilgit; and Athenæum.

ROBERTSON, Lord, The Right Hon. James Patrick-Bannerman Robertson, M.A., ex-M.P., Q.C., LL.D., D.L., late Lord Advocate for Scotland, Lord Justice-General of Scotland, was born at Forteviot, Perthshire, in 1845, and is the son of the late Rev. R. Robertson, of Forteviot, by Helen, daughter of the Rev. J. Bannerman, of Cargill, Perthshire. He was educated at the Royal High School, Edinburgh, of which he was Dux, and at the University of Edinburgh. He took the degree of M.A. in 1864; and had the honorary degree of LL.D. Edin. conferred on him April 10, 1890. He was called to the Scottish Bar in 1867; made Q.C. in 1885, and Solicitor-General for Scotland in the

same year; re-appointed to the latter post in August 1886, and appointed Lord Advocate for Scotland, October 1888, on the elevation of Lord Advocate Macdonald to the post of Lord Justice-Clerk, and sworn in as a Privy Councillor the same year. He was elected M.P. for Buteshire in 1885. He is a distinguished counsel and statesman, and was successful, as the responsible Minister of the Crown, in passing the Local Government Act for Scotland, and the Universities (Scotland) Act, in the session of 1889. On the death of Lord Glenconner he was appointed Lord Justice-General of Scotland, and President of the Court of Session (September 1891). He has been Lord Rector of Edinburgh University, and is Deputy-Lieutenant of the County of the City of Edinburgh and for Kincardineshire. He married, in 1872, Philadelphia, daughter of W. N. Fraser, of Tornaveen, Aberdeenshire. Addresses: 19 Drumsheugh Gardens, Edinburgh; Muchalls Castle, Kincardineshire; and Athenæum.

ROBINS, Edward Cookworthy, F.S.A., was born in London in September 1830, and was educated at Esher, Derby, and London schools. He early applied himself to geometrical drawing, to which his taste led him, and was eventually placed with the late Émile de Buck, a Belgian civil engineer, who was also an artist. In 1853 he was elected an Associate, and in 1860 a Fellow, of the Royal Institute of British Architects. He now occupies a seat on the Council of that body. In 1878 Mr. Robins was elected a Fellow of the Society of Antiquaries. In 1880 he was elected on the Council of the London and Middlesex Archaeological Society. He is one of the original members of the Institution of Surveyors, and in 1882 was elected to the Council of the Sanitary Institute, whose transactions he has edited for several years past. In 1887 he was chosen on the Council of the Society of Arts. Mr. Robins has been the architect of many churches, as St. John's, Wandsworth; St. Jude's, Brixton; St. Saviour's, Brixton; Emmanuel Church, Dulwich; St. Saviour's, Battersea Park; Wesley Church, Essex; besides many Congregational churches, as at Wandsworth, Clapham, Streatham Hill, Holloway, East London, &c. He gained the first premium for Mr. Spurgeon's tabernacle in 1859, and only lost the competition for the London Orphan Asylum, at Watford, by the casting vote of the chairman. He has long been architect to the London Missionary Society, and enlarged their premises in Bloomfield Street. He designed the four memorial churches for Madagascar, the Theological College at

Antananarivo, and at Kuruman in South Africa.

ROBINS, Elizabeth (Mrs. C. E. Raimond), actress, is an American by birth, and has made her name as an interpreter of Ibsen's characters. After making her early appearances on the stage in the United States, she reached London in the spring of 1889. Here she played the part of Mrs. Errol in "Little Lord Fauntleroy" (Opera Comique, March), and in July appeared at the same theatre as Martha Bernick in "The Pillars of Society," by Ibsen. Subsequently she played Louisa Brown in "Dr. Bill" (Avenue, 1890), and in January 1891 returned to the Ibsen drama, and appeared at Terry's as Mrs. Linden in "A Doll's House." She now courageously adventured upon a series of Ibsen performances in conjunction with Miss Lea at the Vaudeville. Here she won great applause as Mrs. Hedda Tesman in "Hedda Gabler." After playing Constance in "The Trumpet Call" at the Adelphi, she again charmed the literary, as well as the merely Ibsenite public as Hilda in "The Master Builder," produced at the Trafalgar Square Theatre, and several times repeated (1893). Subsequently she appeared as Rebecca West in "Rosmersholm" at the Opera Comique (May), and played as Agnes in "Brand" at the same theatre in June. These were her great Ibsen years, and she has since only appeared in Norse drama in London to impersonate Astra in "Little Eyolf" in 1896. Other parts taken by her during recent years have been in "A Woman's Revenge" (Adelphi, 1893), the Countess Zicka in the revival of "Diplomacy" (Garrick, 1893), and Mrs. Lessingham in the play of that name (Garrick, 1894). In the autumn of 1894 she took her Ibsen plays on tour. In 1898 appeared her novel, "The Open Question," which was published anonymously, and created a stir.

ROBINSON, Miss A. Mary F. See DARMESTETER, MME.

ROBINSON, Sir John Charles, born at Nottingham on Dec. 16, 1824, eldest son of Alfred Robinson, of Nottingham, formerly Art Superintendent of the South Kensington Museum, at present holds office in her Majesty's household as Crown Surveyor of Pictures, is an F.S.A., honorary member of the Academy of St. Luke in Rome, Florence, Bologna, Madrid, Lisbon, &c., and a Knight Commander of the Order of Isabella la Catolica and of Santiago of Spain and Portugal. After several years' study as an architect, Mr. Robinson proceeded to Paris and became a pupil of

the eminent historical painter, Drolling. On his return he received an appointment in the Government School of Design as Master of the School of Art at Hanley, Staffordshire Potteries (1847). In 1852 he was called to London to assist in the development of the newly-created Science and Art Department, founded under the auspices of the Prince Consort, and in 1853 the organisation of the Art Museum at Marlborough House, afterwards transferred to South Kensington, was entrusted to him. In this post he remained till 1869, and the country owes to him the acquisition of an immense mass of varied art treasures gleaned from every part of Europe, where, especially in Italy and in the Spanish peninsula, a great portion of every successive year was spent in long expeditions, during which the remotest corners of these countries were minutely explored. The system of circulating objects of art from the central museum to provincial institutions was, moreover, first suggested and carried into effect by Mr. Robinson in the early years of his tenure of office. In 1862 he suggested and carried out the special loan exhibition of art treasures in connection with the General Industrial Exhibition of that year; an example which has since been repeatedly followed, but perhaps never surpassed in interest or importance, in France, Germany, and other Continental countries. In association with the Marquis d'Azeglio, Italian Minister in London, and the late Baron Marochetti, he founded, and for many years directed as honorary secretary, the well-known Fine Arts Club, now the Burlington Fine Arts Club. In 1869 he resigned his appointment at South Kensington on a retiring pension, but he has not ceased to render from year to year disinterested services to that institution, in the promotion of notable acquisitions and the formation of special loan collections, &c. In 1881, on the resignation of Mr. Redgrave, R.A., the Queen confided the post of Crown Surveyor of Pictures to Mr. Robinson, the office being that of art adviser in the Lord Chamberlain's Department, and comprising the supervision and control not only of the pictures, but of nearly all the art treasures of the Crown, in the various royal palaces, including the Hampton Court Gallery. Among the great number of his published works in divers branches of art may be specified the catalogue of the Soulaiges Collection, that of the Art Treasures Exhibition in 1862, and of the Italian Sculpture collections of the South Kensington Museum, all preceded by original introductory essays. In 1870, at the request of the Oxford University authorities, he wrote "A Critical Account of the Drawings of Michel Angelo

and Raffaele in the University Galleries," an elaborate work, which has obtained general recognition, more especially on the Continent. An essay on the Early Portuguese School of Painting, undertaken on the head of extensive original researches in the country by desire of his Majesty the King Regent Don Fernando, was translated into Portuguese, and re-issued by the Lisbon Academy, and it remains one of the most important contributions made to the history of art in Portugal. Very numerous contributions in the shape of letters and essays on various branches of art have also for a long series of years been contributed by Sir Charles Robinson to the columns of the *Times*, the *Nineteenth Century*, the publications of the Society of Antiquaries, and other journals. He was knighted on the occasion of her Majesty's Jubilee in 1887. He married, in 1852, Marian Elizabeth, eldest daughter of Edmund Newton, of Norwich. Addresses: 107 Harley Street, W.; Newton Manor, Swanage, &c.

ROBINSON, Sir John Richard, manager of the *Daily News*, born at Witham, Essex, Nov. 2, 1828, is the son of the Rev. R. Robinson, and became connected at an early age with provincial journalism. On coming to London in 1848 he joined the paper which has been known as *Douglas Jerrold's Newspaper*, and soon afterwards undertook the editorship of the *Evening Express*. This was the property of the *Daily News*, and Mr. Robinson soon took an active part in the conduct of the morning paper. On the change of proprietorship in 1868, when the *Daily News* joined the ranks of the penny papers, he was appointed sole manager. On the outbreak of the Franco-German war in 1870 he developed an effective system of special correspondence, and in his selection of writers, as well as in his method of organisation, was very successful. His management during the campaign of Ashanti, the Zulu war, and the Russo-Turkish war, was distinguished by equal initiative faculty and fertility of resource. During the Franco-German war Mr. Robinson suggested that a fund should be raised for the relief of the French peasants in the occupied districts of the north-west, and upwards of £20,000 was subscribed under his auspices, the whole of which was distributed without one shilling being taken from the fund for expenses. For many years Mr. Robinson was a copious contributor to the columns of the American press, including the *Boston Advertiser* and the *Chicago Tribune*. He has also edited a work on shorthand. In June 1887 Mr. Robinson became editor of the *Daily News*, continu-

ing to fill at the same time the post of manager of the paper. In 1893 Mr. Robinson received the honour of knighthood from the Queen. In 1896 he relinquished the editorial part of the duties to devote himself entirely to the management. He married, in 1859, Jane, daughter of W. Granger, of Wickham Bishops. She died in 1876. Address: 4 Addison Crescent, Kensington, W.

ROBINSON, Philip Stewart (known as **Phil Robinson**), son of Rev. Julian Robinson, was born at Chunar in India, Oct. 13, 1849; educated at Marlborough College, joined the *Pioneer* as sub-editor to his father in 1869; contributing to that journal (1870-71) the papers afterwards republished as "In my Indian Garden." He was appointed (1872) editor of the Revenue archives of the Benares Province by the Government of the N.W.P., which published his compilations (1876) in two vols., "Records of the Benares Collectorate." Meanwhile he was gazetted Professor of Literature (1873), and exchanged (1875) to the Chair of Logic and Metaphysics, and held simultaneously the appointment to the Supreme Government of Censor of the Vernacular Press. He retired from the service, 1877; joined the *Daily Telegraph* in the same year, and served as one of the war-correspondents of that journal in Afghanistan, 1878-79; Zululand, 1879; Egypt, 1882; Soudan, 1885. He travelled over the United States as Special Commissioner of the *New York World*, 1881-82, and published his experiences, "Sinners and Saints," 1883. His other works are, "Under the Punkah," 1881; "Noah's Ark, or Mornings in the Zoo, an Essay in Un-Natural History," 1882, and "The Poets and Nature," 3 vols., 1884-86; "Chasing a Fortune," "Tigers at Large," and "The Poets' Beasts," 1885; "The Valley of Testation Trees," 1886; "Some Country Sights and Sounds," 1893; and "Birds of the Wave and Woodland," 1894. The first "authorised" edition of his works in America appeared in 1882, as "Under the Sun." He is a regular contributor to the *Contemporary Review*, *Gentleman's Magazine*, and *Harper's Monthly*.

ROBINSON, W., landscape-gardener and editor of the *Garden* and of other journals devoted to rural life, was by his own wish trained to horticulture at an early age. When in the gardens of the Royal Botanic Society in the Regent's Park he visited, on behalf of the Society, all the botanical gardens in the United Kingdom, and commenced as a writer by giving a description of this tour in the *Gardeners' Chronicle*. He went to Paris at

the time of the Exhibition of 1867, and studied the horticulture of the neighbourhood of Paris, in public, private, and commercial gardens, writing in the *Times* an account of the more important things observed. He travelled in Europe and America, always in the interest of the same subject, and collected plants in California and the Rocky Mountains. He has founded the *Garden*, vol. lii., 1897; *Gardening Illustrated*, vol. xix., 1898; *Farm and Home*, vol. xvi., 1898; *Woods and Forests*, vol. ii., 1885; *Cottage Gardening*, vol. xi., 1898. He is author of the "English Flower Garden," 6th edit., 1898; the "Wild Garden," 4th edit., 1894; "Parks and Gardens of Paris," 2nd edit., 1883; "Hardy Flowers," 5th edit., 1892; the "Sub-Tropical Garden," 2nd edit.; "Garden Design and Architects' Gardens," 1892; and "God's Acre Beautiful." In most of the above the aim has been to develop more artistic work, both in the design and planting of gardens, and to advocate the greatly increased culture of many plants from countries like our own in climate. Mr. Robinson is garden and woodland editor of the *Field*. Address: 63 Lincoln's Inn Fields, W.C.

ROBINSON, Sir William, G.C.M.G., Governor of Hong-Kong, was born in 1836, and is the son of the late Rev. J. B. Robinson. In 1854 he became a clerk in the Colonial Office, and having been private secretary to Lord Blackford and Mr. Cardwell, he was appointed to represent the Colonial Office on the East African Slave-Trade Commission, 1869, and the Vienna Exhibition, 1873. He was Governor of the Bahama Isles, 1874-80; of the Windward Isles, 1881-84; of Barbados, 1884; of Trinidad, 1885; and of Hong-Kong, 1891-97. In 1887 he received the thanks of the Government for the satisfactory settlement of the Venezuelan difficulty arising out of the *Henrietta* and *Josephina* cases.

ROBSON, Professor A. W. Mayo, F.R.C.S., Professor of Surgery at the Yorkshire College, Victoria University, was born at Filey, on April 17, 1853, and is the eldest son of the late T. Binnington Robson of Filey. He was educated at a private school, and at the Wesley College, and Yorkshire College. He studied medicine at Leeds, where he is now Senior Surgeon at the General Infirmary, and Lecturer on Practical Surgery and Pathology at the Leeds School of Medicine. He holds a number of important posts in his own district, and in London is Member of Council, and has been Hunterian Professor of Surgery and Pathology at the Royal Coll. Surgeons, Eng. He is also

a Fellow of the Royal Med. Chir. Society, and other leading societies, and is President of the British Gynaecological Society, and of various Yorkshire societies. He has been Hon. President of the International Congress of Gynaecology. His publications include "On Gall-Stones and their Treatment," a subject on which, amongst others, he has written largely in Clifford Allbutt's "System of Medicine," and in the leading reviews and transactions, &c. Address: 7 Park Square, Leeds.

ROBSON, William Snowdon, Q.C., M.P., is the third surviving son of the late Robert Robson, J.P. of Newcastle, and was born in 1852. He was educated at Dr. Bruce's School, Newcastle, and at Gonville and Caius College, Cambridge (B.A.), graduating in the Moral Science Tripos, and was called to the Bar at the Inner Temple in 1880. He joined the North-Eastern Circuit, and took silk in 1892. In 1895 he was appointed Recorder of Newcastle-upon-Tyne. From 1885 to 1886 he sat for the Bow and Bromley Division of the Tower Hamlets, and was elected for South Shields in 1895, a constituency which he represents in the Liberal interest. Addresses: 60 Chester Square, S.W.; Newcastle-upon-Tyne, &c.

ROBY, Henry John, M.P., J.P., LL.D. Edin. and Camb., is a native of Tamworth where his father was a solicitor, and where he was born, Aug. 12, 1830. When he was twelve years of age his family removed to Bridgnorth, and for seven years he was a day-scholar at the grammar school there. In 1849 he went up to St. John's College, Cambridge, and was elected scholar and exhibitor of the College, graduating B.A. in 1853, being first in the first class of the Classical Tripos. As senior classic he was elected the following year to a Fellowship at St. John's, and subsequently was appointed a classical lecturer. He remained at Cambridge until 1861, filling, among other offices, that of Secretary to the Committee of the Cambridge Local University examinations, and that of one of the examiners for the Law Tripos, the Classical Tripos, and the Moral Science Tripos. Mr. Roby took an active part in promoting reform in his college, and in the university, under the Cambridge University Act, and published a pamphlet on the subject, "Remarks on College Reform," 1858. Upon leaving Cambridge, he became an under-master at Dulwich College, and while there (1861-65) he published his *Elementary Latin Grammar*. From 1864 to 1868, under the appointment of the Crown, he was successively Secretary to the Schools Inquiry Commis-

sion, and in 1869 Secretary to the Endowed Schools Commission, and subsequently, 1872, Commissioner. This Commission expired Dec. 31, 1874. During this period he was for two years Professor of Jurisprudence at University College, London, where he lectured on Roman Law. Mr. Roby assisted the Schools Inquiry Commissioners in preparing their Report (issued March 1868) and in compiling and editing the twenty volumes appended thereto. In 1877 he was appointed a life governor and a member of the Council of Owens College, and the same year a governor of Manchester Grammar School, and subsequently one of the governors of Hulme's Charity. Between 1871 and 1874 he had published the two volumes of his larger Latin Grammar, "Grammar of the Latin Language, from Plautus to Suetonius;" in 1880 a school edition of the work; and in 1884 his "Introduction to Justinian's Digest and Commentary," in recognition of the importance of which work the University of Edinburgh conferred upon him in 1887 the honorary degree of LL.D. He has been Chairman of the Manchester Liberal Executive, and filled other similar offices. He was M.P. for Eccles, a seat which he wrested from the Conservatives at the bye-election in Oct. 1890, and was re-elected for the same constituency in 1892, but failed in 1895; and then, ceasing to reside in Manchester, retired from political work. He was, in 1892, appointed by the Speaker one of the Deputy-Chairmen of Committees of the House of Commons. In 1892 he received from Cambridge University their hon. LL.D. degree. In 1861 Mr. Roby married Matilda, elder daughter of Peter A. Ermen, Esq., of Dawlish, who died 1889. Address: Members' Mansions, Victoria Street, S.W.

ROCHEFORT-LUÇAY, Victor Henri, Marquis de, commonly known as **Henri Rochefort**, a French journalist and politician, was born in Paris on Jan. 30, 1830, and is the son of the Marquis Claude, who, under the name of Edmond Rochefort, was a well-known playwright. The early years of his life, as he says, were spent in the most middle-class fashion. Although a descendant of the old French aristocracy, his family were very poor; indeed, it has been wittily said that he inherited from his sires nothing but a stock of anecdotes. His school-days numbered many episodes prophetic of his future career, and at the age of eighteen he started to earn a living. He tried tutorship, but that soon disgusted him. Then he essayed play-writing, but with more enthusiasm than success. Finally, he obtained a post as auxiliary clerk in the Hôtel de Ville, and thus really com-

menced life as so many other French *littérateurs* have done. His office duties being light, he employed a good deal of his spare time in doing odd jobs for the newspapers. Slowly he crept into notice, with the considerable assistance of an occasional duel, and became somewhat notorious as a bold writer, even daring to attack the Emperor himself. He was afterwards one of the writers of the *Charivari*, and his articles in this journal led to his appointment as sub-inspector of Fine Arts in Paris, a post he resigned in 1861 to devote himself wholly to journalism. After contributing to various papers, he joined the staff of the *Figaro* at an annual salary of 30,000 francs; but in 1865 he retired to save the journal from prosecution, and established the *Lanterne*, whose first nine weekly issues reached a circulation of over 1,150,000. The paper was, however, soon suppressed on account of its violent attacks upon the Imperial family, and its author was condemned to a year's imprisonment, and to pay a fine of 10,000 francs. M. Rochefort fled to Brussels and continued to publish the *Lanterne* till August 1869, when on his election to the Legislative body he was permitted to return to Paris. In the same year he founded the *Marseillaise*, in which Victor Noir was a collaborator. The attacks in this journal on Prince Pierre Bonaparte led to the assassination of Victor Noir by the Prince; the paper was seized, and M. Rochefort committed to the prison of Sainte Pélagie. On the proclamation of the Republic in September 1870 he was released by the mob, and was for a short time connected with the Government of National Defence. He was President of the Commission of Barricades during the siege of Paris, and in Feb. 8, 1871, he was elected one of the representatives of Paris in the National Assembly. During that time he was the editor of the *Mot d'Ordre*, in the columns of which he justified the Commune, and vehemently assailed the Government of Versailles, and M. Thiers personally. On May 19, 1871, while endeavouring to escape from Paris, he was taken, tried by court-martial, and sentenced to imprisonment for life. In September 1872 he was temporarily released to enable him to legitimise his children by marrying their mother, who was dying. Subsequently M. Rochefort was transported to New Caledonia, but effected his escape in 1874. He returned to Europe and attempted to revive the *Lanterne* in London and Geneva, but without success. The general amnesty of July 11, 1880, permitted M. Rochefort to return to Paris, where he at once assumed the direction of a new Radical paper, *L'Intransigeant*, and renewed his

attacks upon all the Governments in turn. He has since been elected for Paris, but Parliament was irksome to him, and he resigned. In 1886 he proposed to take part in the workmen's riots in Belgium, but the Belgian authorities would not permit him to cross the frontier. He was a staunch partisan of General Boulanger, and came to England with him in 1889, having escaped through Belgium from France. Until the beginning of 1895 he resided in London, when he returned to Paris under an amnesty. His reception in his native city was one of royal character. He was welcomed by thousands, and received most flattering ovations. During the course of litigation between Rochefort, as editor, and M. Vaughan, manager of the *L'Intransigeant*, in which the latter gained the day, it became known in December 1896 that for the last seven years Rochefort had received no less than 700,000 francs as editor and 1,700,000 francs in dividends on his shares, or altogether 342,000 francs a year. Commenting on this, the *Débats* observed: "The war against capital is a good business, but it does not enrich all who take part in it. It is not stated that M. Rochefort has ever had the idea of admitting his compositors and messengers to a share in his ample profits." Always eager for notoriety, he violently assailed Dreyfus and those who supported him in his desire for justice; by the praises he lavished on the army, one would never think he had written against it just as heartily. He joined the anti-Jewish party, of which he is a prominent supporter. M. Rochefort is a great connoisseur of all the arts, and was one of the first to appreciate Goya.

ROCHESTER, Bishop of. See TALBOT, THE RIGHT REV. EDWARD STUART.

ROCHESTER, Dean of. See HOLE, THE VERY REV. SAMUEL REYNOLDS.

ROCHESTER, Mark. See KENT, WILLIAM CHARLES MARK.

ROD, Edouard, Swiss novelist and critic, was born at Nyon in 1857, and was educated at Berne and Berlin. Early in life he came to Paris, and first took up literary criticism, becoming chief editor of *La Revue Contemporaine* in 1884. In 1887 he was named Professor of Comparative Literature at the University of Geneva. His miscellaneous works include "Apropos de l'Assommoir," 1879; "Les Allemands à Paris," 1880; and "Giacomo Leopardi," 1888. But he is chiefly known as a novelist, and he has written quite a series of psychological analyses imbued with the pessimism of Schopenhauer, the

realism of Zola, and the musical theories of Wagner. Among these may be named: "Palmyre Veulard," 1881; "La Chute de Miss Topsy," 1882; "Tatiana Leiloff," 1886; "Névrosee," 1888; "Nouvelles Romandes," 1891; and studies on Dante and Stendhal, 1891. In "Le Sens de la Vie," which is a sort of psychological autobiography, he depicts the worries and griefs of domestic life, and argues that the reason of these is the sacrifice of the individual to the family. In March 1898 M. Rod came to London, and delivered a lecture on contemporary French fiction, stating that the novel was the most complete and strongest literary expression of French genius. He is a Chevalier of the Legion of Honour, and his Paris address is 27 Rue Erlanger.

RODAYS, Pierre Fernand de, editor of the Paris *Figaro*, was born at Mur-en-Sologne, Oct. 19, 1845, and coming to Paris to study law, took to journalism instead. He started by some articles in the *Vie Parisienne*, and edited a short-lived paper called *Paris-Caprice*, under the pseudonym of Pierre Jaff. Subsequently he edited the *Courier de Saône et Loire*, and during the last days of the Empire he aided in the direction of *Le Peuple Français*. Under the Ollivier Ministry he was sent to Brest, where he founded *Le Peuple Breton*, and during the Franco-Prussian war a second paper called *La Guerre*. After the war he returned to Paris and became one of the staff of the *Figaro*, where he reviewed books and edited the law reports. In the next year, under the pseudonym of Louis de Coulanges, he wrote a series of biographical articles satirising the officials of the new Republic, which were united in a volume, under the title of "Les Préfets de la République." M. de Villemessant, the founder of the paper, had great confidence in him, and at his death he became one of the three administrators of the paper, with MM. Magnard and Périvier. On the death of the former he became editor-in-chief, Nov. 22, 1894. During 1898 he left the paper for a while, owing to its *volte-face* on the Dreyfus affair. Paris address: 103 Rue St. Lazare.

RODD, Sir James Rennell, K.C.M.G., C.B., principal secretary to the British Agency in Egypt, was born in London, Nov. 9, 1868. He is the son of the late Major J. R. Rodd, and was educated at Haileybury College, and at Balliol College, Oxford, where he gained the Newdigate Prize for English Verse in 1880, the subject being "Raleigh." He obtained his B.A. degree in the following year. In 1883 he joined the Diplomatic Service, and soon after be-

came attaché at Berlin. In 1888 he was transferred to Athens, and in 1891 was appointed second Secretary to the Hon. Sir Edmund Monson at Rome. In the following year he went to Paris, and in 1893 was chosen to succeed Sir Gerald Portal as British Agent and Consul-General at Zanzibar, where he performed his duties in a most successful manner under very difficult conditions. During his year of office the Sultan, Seyyid Ali, died, and Mr. Rodd at once proclaimed Hamed ben Thwain, a great-nephew of Seyyid Ali, Sultan of Zanzibar. An attempt was made by Kalid Barghash to obtain possession of the throne, and skirmishes took place at Pumwain and Jongein, at both of which Mr. Rodd was present. In 1894 he was transferred to Egypt as second Secretary at the British Legation, and during the temporary absence of Lord Cromer he discharged the functions of Acting Agent and Consul-General. During 1897 it was decided to despatch a British Mission to Abyssinia, and Mr. Rodd was selected as special Envoy. He was accompanied by a number of English officers, the average height of whom was over six feet. Count Gleichen, who formed one of the party, afterwards published a very interesting account of the Mission. Mr. Rodd was received with much ceremony, and after the signing of a treaty he invested King Menelik with the insignia of a G.C.M.G. The main object of Mr. Rodd's mission was the establishment of friendly and commercial relations, and among the more important items of the treaty may be mentioned the recognition of the Somaliland frontiers; the keeping open of certain caravan routes; and the prevention of the transit through Abyssinia of arms to the Mahdists, whom Menelik declared to be the enemies of his country. The successful issue of the mission gave great satisfaction, and Mr. Rodd received a C.B. In October 1898 he was appointed Secretary to Her Majesty's Agency at Cairo, and received the K.C.M.G. for his diplomatic services at the Birthday, 1899. Sir Rennell Rodd is the author of the following works in prose and verse: "Frederick, Crown Prince and Emperor," 1889; "Customs and Lore of Modern Greece," 1891; "Songs in the South," "Poems in Many Lands" (which is a second edition of the former work); "The Unknown Madonna," "Feda and other Poems," "The Violet Crown and Songs of England," and "Ballads of the Fleet," 1897. Permanent address: 17 Stratford Place, W.; and Athenæum.

RODIN, August, French sculptor, was born in Paris in 1840, and when quite young became a pupil of Barye, and then,

from 1864 to 1870, of Carrier-Belleuse. For the next seven years he aided Van Rasbourn in decorating the interior of the Bourse at Brussels. He made his first appearance at the Salon in 1875 with a terracotta bust of Garnier. In 1877 his "Age d'Airain" created a deal of discussion, and he was awarded a medal of the third class. His "St. John the Baptist" was exhibited in 1880, and was acquired by the Luxembourg, where his "Danaïde" stands also. His other works include: "La Création de l'Homme," 1880; busts of J. P. Laurens, Victor Hugo, Antonin Proust, 1885; and Puvis de Chavannes, 1891. M. Rodin was commissioned by the State to execute in marble a group at the door of the Palais des Arts Décoratifs, representing Francesca da Rimini and Paolo Malatesta. In 1889 he produced "Les Bourgeois de Calais," which was erected in that town; a statue of Bastien Lepage, for the town of Danvilliers; another of Claude Lorraine, for the town of Nancy; and the huge monument of Victor Hugo, for the Panthéon. In 1898 this artist created quite a revolution by his statue of Balzac, which he had been commissioned to execute for the Société des Gens de Lettres. It was exhibited in the Salon, and the Société refused to accept it, declaring it to be without form, and void. This roused the ire of true art lovers, who saw in it the expression of Balzac's thought, and one of them purchased it for the price of the commission. Several characteristic examples of this master's art were to be seen in London in 1898 at the International Art Exhibition. He was decorated with the Legion of Honour in 1888.

ROGERS, The Rev. James Guiness, D.D., Congregational minister and writer, was born at Enniskillen on Dec. 29, 1822, and is the son of the Rev. Thomas Rogers. He was educated at Silcoates School, Wakefield, at Trinity College, Dublin, where he graduated in 1843, and afterwards prepared for his ministerial duties by study at Lancashire Independent College. He has been successively Congregational minister at Newcastle-on-Tyne, Ashton-under-Lyne, and Clapham, where he has officiated since 1865. He was elected Chairman of the Congregational Union of England and Wales in 1875; and has contributed to the *Congregationalist*, *Contemporary*, *British Quarterly*, and the *Congregational Review*, of which he is editor. Among many other religious works he has published "Present-Day Religion and Theology," 1887; "Christ for the World," 1895; "The Gospel in the Epistles," and "The Christian Ideal," 1898. Address: 81 Clapham Common, S.W.

ROHLFS, Mrs. Charles, née Anna Katharine Green, novelist, daughter of James Wilson Green, a lawyer, who has held public positions in New York and elsewhere, was born at Brooklyn, New York, and educated at Ripley College, Poughkeepsie, Vermont. She has published "The Leavenworth Case," 1878; "A Strange Disappearance," 1879; "The Swords of Damocles," 1881; "The Defence of the Bride, and other Poems," 1882; "X Y Z," and "Hand and Ring," 1883; "The Mill Mystery," and "7 to 12," 1886; "Risifi's Daughter," a drama, 1887; "Behind Closed Doors," 1888; "The Forsaken Inn," 1890; "A Matter of Millions," 1890; "The Old Stone House," 1891; "Cynthia Wakeham's Money," 1892; "Marked Personal," 1893; "That Affair next Door," 1897; and "Lost Man's Lane," 1898. The author has dramatised her first novel, "The Leavenworth Case," and it was presented to the public during the seasons of 1891, 1892, 1893. Her novels are published in the native languages of Germany, Italy, and France, and have been widely circulated in England and the British possessions. On Nov. 24, 1884, Miss A. K. Green was married to Mr. Charles Rohlf, and now resides at Buffalo, New York.

ROLLINAT, Maurice, French poet, was born at Châteauroux in 1853, and is the son of François Rollinat, one of the representatives in the National Assembly of 1848. His family were intimate friends of George Sand, and under her auspices he took to a literary career. His first published work was a collection of poems entitled "Dans les Brandes," which aroused but little stir. But his second work, published in 1883, "Les Névroses," was a most realistic collection of luxurious and eccentric poems, and made him one of the chiefs of that school of young poets who unite plain speaking with sonorous words. It was declared to be a work surpassing those of Poe and Baudelaire, and was followed by two other volumes, "L'Abyme," 1886, and "La Nature," 1892, which, owing to their saner thoughts, made less noise. He also published, in 1893, a book of poetry for children, entitled "Le Livre de la Nature."

ROLLIT, Sir Albert Kaye, M.P., LL.D., D.C.L., D.L., was born in 1842, and is the son of the late John Rollit, of Hull. He was educated at King's College, London, of which he is a Fellow and Governor, and was Gold Medallist of the University of London, of which he is B.A., LL.D., Fellow, and Member of Senate. He became a solicitor in 1863, and was Prizeman of the Incorporated Law Society. He is

senior partner in Rollit & Sons, of London and Hull, and in Bailey & Leetham, steamship owners, of Hull, London, Newcastle, and Manchester; Director of the National Telephone Co.; Alderman for Hull, of which he was Mayor, 1883-85; J.P. for London; D.L. for the West Riding, the city of York, and the Tower of London; Commissioner of Lieutenancy for the City; President of the Association of Municipal Corporations; President of the Associated Chambers of Commerce, and, till lately, of the London Chamber of Commerce; President of the British Commission of the Brussels International Exhibition in 1897; Hon. Lieutenant-Colonel in the Engineer Militia; Elder Brother of the Trinity House since 1891; Hon. Freeman of Hull since 1890, of Huddersfield since 1894, of the Carpenters' Company, London; and Board of Trade Representative on the Humber Conservancy. On the occasion of his retirement from the presidency of the London Chamber of Commerce, after five years' tenure of office, he was presented in December 1898 with a silver casket containing a letter of thanks. Among other foreign orders he has the Knight Commandership of the Iron Crown of Italy, of Leopold of Belgium, and of the Double Dragon of China. He has sat for Islington South since 1886. He married (2), in November 1896, Mary, Duchess of Sutherland. Addresses: 30 Lowndes Square, S.W.; and Crogan House, Hull, &c.

ROME, Pope of. See LEO XIII.

ROMER, The Hon. Sir Robert, Lord Justice of the Court of Appeal, born in London, Dec. 23, 1840, is the second son of the late Francis Romer, the composer, and was educated at Trinity Hall, Cambridge; Senior Wrangler and Smith's Prize-man, 1863; Fellow of Trinity Hall, 1867. From 1865 to 1866 he was Professor of Mathematics at Queen's College, Cork. He was called to the Bar at Lincoln's Inn in 1867; was Examiner in Civil Law at Cambridge, 1869-70; was made Queen's Counsel in 1881; Bench of Lincoln's Inn in 1884, and was appointed one of the Justices of the High Court (Chancery Division) Nov. 17, 1890, in the place of Sir Edward Ebenezer Kay, created a Lord Justice of Appeal. In the Chancery Court he was noted for rapid work and a profound knowledge of the Patent Laws. In February 1899 he was created a Lord Justice of the Court of Appeal in the room of the Right Hon. Sir Joseph William Chitty deceased. He married Betty, the daughter of the late Mark Lemon, editor of *Punch*. Addresses: 27 Harrington Gardens, S.W.; and Athenæum.

ROMERO, Matias, Mexican statesman, was born in Oaxaca, Mexico, Feb. 24, 1837, and educated at the Institute of Arts and Sciences in his native town, where he studied philosophy and then law, and was admitted to the bar in the city of Mexico in 1857. In the revolution of that year he sided with the Government, and in December 1859 he was appointed Secretary of the Mexican Legation in Washington, and was subsequently Chargé d'Affaires until April 1863. He returned to Mexico in 1863, and resigning his diplomatic post was appointed Colonel in the army, and became Chief-of-Staff to his college friend, General Porfirio Diaz. He was employed on several military missions of a diplomatic nature, and in September returned to Washington as Minister to the United States, and negotiated several important treaties with that country after the downfall of the Emperor in Mexico. In 1868 he accepted the Treasury portfolio in Juarez's Cabinet, and for five years administered the finances of the country with skill. In 1876 he was a member of the Mexican Senate, and on the election of General Diaz as President he returned to the Treasury, which he retained till April 1, 1879. He was appointed Postmaster-General in February 1880, but soon retired. In 1881 the boundary question between Mexico and the United States, and also that between Mexico and Guatemala, were adjusted by him, and he has since retained the post of Minister to the United States. He has published "Coffee Culture on the Southern Coast of Chiapas," 1875; "Historical Sketch of the Annexation of Chiapas and Soconusco to Mexico," 1877; "The State of Oaxaca," 1886; besides many other volumes, chiefly official reports.

RONNER, Mdme. Henriette, whose charming pictures of cats were, in 1890, on view at the Fine Art Gallery in New Bond Street, was born in Amsterdam in 1821, and was educated with great strictness for the profession of an artist. Her first tutor was her father, Herr Knip, who kept her at work for many hours daily, adopting the unusual plan of shutting her up in darkness for two hours in the mid-day, in order to rest her eyes, a proceeding much more likely to be injurious than beneficial. Forty years ago she married Fieco Ronner, since which time she has lived in Brussels, and devoted her attention almost solely to animal portraiture. On the Continent she is regarded as an animal-painter of the highest merit, and receives from the Brussels National Gallery, the Luxembourg, and very many town and corporation museums, commissions to paint portraits of favourite dogs and cats.

The great characteristic of her work is her absolute truthfulness. Brussels address: 57 Chaussée de Vieuugat.

RÖNTGEN, Conrad Wilhelm, Professor of Physics at the University of Würzburg, Bavaria, was born at Lennep, in Rhenish Prussia, in 1844. He was educated at Zurich, where he became a Doctor of Science in 1869. For long he had been a distinguished investigator of physical problems, and his great discovery of the X or Röntgen Rays was made on Nov. 8, 1895, but not communicated to the public till the beginning of January 1896. The essential part of this experiment is a small glass tube, into each end of which is fitted a wire from some electric generating apparatus; then, the tube being exhausted by an air-pump, the electric circuit is broken by the vacuum space in the tube between the two ends of the wires. If, when an electric current is made to pass along the wires, a living human hand be interposed between the tube and a photographic plate, a photograph can be obtained showing all the outlines of the bones. During 1897 a Röntgen Society was formed in England, of which the first President was Professor Sylvanus Thompson.

ROOKWOOD, Lord, The Right Hon. Henry John Selwin-Ibbetson, Bart., D.L., only son of the late Sir John Thomas Ibbetson-Selwin, the 6th baronet, by Isabella, daughter of the late General John Leveson-Gower, was born Sept. 26, 1826, and received his academical education at St. John's College, Cambridge (M.A.). He twice contested Ipswich, in the Conservative interest, before being returned for South Essex in July 1865; and after the county was further divided by the second Reform Act, he was elected in 1868 for the western division of it, which, under the new name Epping Division, he represented in the House of Commons till 1892, when he was made a peer under the title of Lord Rookwood. He brought in, and passed, the Bills dealing with the Licenses for the Sale of Beer and Wine in 1869 and 1870. Sir H. Selwin-Ibbetson was appointed Under-Secretary of State for the Home Department on Mr. Disraeli taking office in the spring of 1874. He was chairman of the departmental commission appointed in 1877 to inquire into the detective branch of the Metropolitan Police. In April 1878 he was appointed Secretary to the Treasury, and he held that office until the resignation of the Conservative Government in April 1880. He was appointed Church Estate Commissioner in 1885. He assumed the name of Ibbetson (which his father

had formerly borne) in addition to that of Selwin in 1867. He married (1) Sarah, daughter of the 1st Lord Lyndhurst, and (2) in 1867, the widow of Sir Charles Henry Ibbetson, 5th Baronet. Addresses: 62 Prince's Gate, S.W.; and Down Hall, Essex.

ROOSEVELT, Hon. Theodore, American statesman and writer, was born in New York City, Oct. 27, 1858, and graduated from Harvard University in 1880. He was a Member of the New York State Legislature, 1882-84, and an unsuccessful candidate for Mayor of New York City in 1886. In 1889 he was appointed on the Civil Service Commission by President Harrison. In 1895 he was appointed a Police Commissioner by the Mayor of New York, and in 1897 he became Assistant-Secretary of the United States Navy. He resigned this position soon after the outbreak of the war with Spain in 1898 to become lieutenant-colonel of a regiment of picked men known as the "Rough Riders," recruited largely from the cattle-men of the western plains. With this regiment he distinguished himself greatly by his bravery in the actions preceding the capture of Santiago in Cuba, and was soon made colonel, returning with his men to the United States in August 1898. He has published "The Naval War of 1812," 1882; "Hunting Trips of a Ranchman," 1885; "Life of Thomas H. Benton," 1887; "Life of Gouverneur Morris," 1888; "Essays on Practical Politics," 1888; "Ranch Life and the Hunting Trail," 1888; "The Winning of the West," 1889; "History of New York City," 1891; "The Wilderness Hunter," 1892; "The Winning of the West," vol. iii., 1894; vol. iv., 1896; "American Ideals and other Essays," 1897. On Nov. 8, 1898, he was elected Governor of New York State.

ROPES, Arthur Reed, "Adrian Ross," was born at Lewisham on Dec. 23, 1859, and is the youngest son of the late William Hooper Ropes, a Russia merchant. He was educated at Priory House School, Clapham, at Mill Hill, and City of London Schools, and at King's College, Cambridge, of which he was a scholar. He gained the Chancellor's Medal for English verse, and the Member's Prize for English Essay in 1881, was eleventh Wrangler, Senior in Historical Tripos, Lightfoot and Whewell Scholar, Fellow of King's College, 1884-90, Lecturer in History. Mr. Ropes is an interesting example of an academic poet turning into a successful modern librettist. He was known in his college days as a poet of literary subjects and singular literary charm, since which time he has either written or collaborated in the libretti

of such musical comic operas and burlesques as "Joan of Arc," "In Town," "Morocco Bound," "Don Juan," "Go Bang," "My Girl," "Ballet Girl," &c., all of which have been popular in London, as well as "The Greek Slave," 1898 (Daly's). He has published "Poems," 1884, and has edited various French books for the Pitt Press, &c. He has been a member of the *Sketch* staff from the beginning, and was under Mr. Zangwill on *Ariel*. Address: 32 Woolstone Road, Forest Hill, S.E.

RORKE, Miss Kate (Mrs James Gardner), made her first appearance on the stage in 1878, when she was one of the school-girls in "Olivia" at the Court Theatre. In 1880 she appeared at the Haymarket with the Bancrofts in "School." She then joined the Criterion company, with whom she played for several years, appearing in "Fogerty's Fairy," "Fourteen Days," "Little Miss Muffit," and "The Candidate." In 1885 she appeared in the "Silver Shield" at the Strand, and then went to the Comedy. At the Vaudeville in 1886 she appeared in a succession of pieces, and will be remembered for her charming acting in "Joseph's Sweetheart," Mr. Buchanan's spirited adaptation of Fielding's "Joseph Andrews." In 1889 she appeared at the Garrick in Mr. Hare's important plays, "The Profligate," "A Pair of Spectacles," "Lady Bountiful," "School," "A Fool's Paradise," "Diplomacy," "Caste," "Money," &c., &c. After this she toured in the provinces, and in 1896 played with Mr. Beerbohm Tree in "The Seats of the Mighty." Miss Kate Rorke is now one of the leading romantic actresses of the day. Address: Parkhurst, St. John's Wood Park, N.W.

ROSCOE, Professor Sir Henry Enfield, V.P.R.S., Ph.D., D.C.L., LL.D., Vice-Chancellor of the University of London, born Jan. 7, 1833, in London, is a grandson of William Roscoe, Esq., of Liverpool, and son of Henry Roscoe, Esq., barrister-at-law, and of Maria, daughter of Thomas Fletcher, merchant, of Liverpool. He was educated at Liverpool High School, University College, London, and Heidelberg (B.A. London, 1852); was appointed Professor of Chemistry at Owens College, Victoria University, Manchester, from 1858 to 1885; elected a Fellow of the Royal Society in 1863; and received the Royal Medal of that Society in 1873, "for his chemical researches, more especially for his investigations of the chemical action of light, and of the combinations of Vanadium." Professor Roscoe has published several series of investigations on the Measurement of the Chemical Action of Light in conjunc-

tion with Professor Bunsen of Heidelberg, and is author of many papers in the *Philosophical Transactions* and scientific journals on other subjects; also of "Lessons in Elementary Chemistry," since translated into German, Russian, Hungarian, Italian, Urdu, and Japanese, and republished in America; "Lectures on Spectrum Analysis," 1869 (4th edit., 1885); and, conjointly with Professor Schorlemmer, F.R.S., of a "Treatise on Chemistry," 8 vols., 1877-98, in which the facts and principles of the science are exhaustively expounded. The University of Dublin conferred upon him the honorary degree of LL.D. in 1878, that of Cambridge in 1883, and that of Montreal in 1884, and he received the D.C.L. of Oxford in 1887. He is honorary member of the German Chemical Society, and of many foreign academies. He was joint editor with the late Professors Huxley and Balfour Stewart of Macmillan's Science Primer Series, and author of the "Chemistry Primer." Other works of his are "John Dalton" (editor of the Science Century Series), and, in conjunction with Dr. Harden, "A New View of the Genesis of the Atomic Theory of Chemistry." He acted for many years as Examiner in Chemistry to the University of London and to the Science and Art Department. In 1880 he was President of the Chemical Society of London; in 1881 President of the Society of Chemical Industry, of which he is one of the founders; and in 1882 President of the Literary and Philosophical Society of Manchester, and a member of the Royal Commission on Technical Instruction, 1882-84; in the latter year he received the honour of knighthood for his services on that commission. He has also acted on the Royal Commissions on Scottish Universities and Secondary Education. In 1887 he was elected President of the British Association for the Advancement of Science for the Manchester meeting; in 1888 he was appointed consulting chemist to the Metropolitan Board of Works; in 1889 he received the decoration of Officer of the Legion of Honour from the French Government in recognition of his services as a sectional Vice-President at the Paris Exposition of that year, and was elected a corresponding member of the French Institute, Academy of Sciences; in the same year he was appointed President of the Midland Institute, Birmingham, and delivered an address on Pasteur's discoveries. He has served on the commission appointed to inquire into the Pasteur method for the treatment of hydrophobia. He was appointed to the vacancy in the Senate of London University in January 1894. At the general election, November 1885, he won the seat for South Manchester for the

Liberal party, of which he is a staunch supporter. In 1886 and 1892 he was elected again, but was defeated in 1895 by the Marquis of Lorne. Since 1896 he has been Vice-Chancellor of the University of London. In 1863 he married Lucy, daughter of Edmund Potter, F.R.S. Addresses: 10 Bramham Gardens, S.W.; Woodcote Lodge, West Horsley, Surrey; and Athenæum.

ROSE, Edward, dramatist, was born at Swaffham, in Norfolk, on Aug. 7, 1849, is the son of Caleb Rose, M.R.C.P., and comes of a long line of clergymen and doctors. He was chiefly educated at Ipswich Grammar School, where Mr. Rider Haggard was his school-fellow. He was intended for the law, but, after passing the intermediate examination, came to London and devoted himself to literature. He had from a very early age been interested in the drama, and in 1873 published "Columbus," a five-act historical play. His first acted piece of any importance was "Our Farm," produced in 1871 at the Queen's Theatre, Long Acre. This ran 107 nights in London alone. Altogether he has had some three dozen pieces acted in London or the provinces, and these have ranged from romantic drama to pantomime. His most ambitious original work has been "Agatha Tylden, Merchant and Shipowner," which was brought out at the Haymarket by Mrs. Langtry in the autumn of 1893, and the most frequently acted of his plays has been an adaptation of Mr. Anstey's "Vice Versa," in which he himself has constantly appeared as a delightful Dick Bultitude. His comedietta, "The Marble Arch," has been acted more than a thousand times. It was as Dick Bultitude that Mr. Rose made his début as a professional actor in London, having previously belonged to an amateur company, nearly all the members of which, including Mr. Tree, are now well known on the stage. In 1881 he had gone on tour with Mr. George Rignold, and had acted many parts in "Henry V." In 1882 he acted on tour the comedy part, the Hon. Jim Gosling, in Herman Merivale's "Cynic." Since that time he has played in London, except for occasional weeks in the country, when he has toured with plays of his own. As a journalist he has done much good work, and has been associated for nearly twenty years with the *Illustrated London News*, in which his chief work has been the series of English Homes, illustrated by M. Montbard. "V. R.," a story in Arrowsmith's Bristol Library, is from his pen. He was dramatic critic to the *Sunday Times* in 1894-96. He is elaborating a new system of teaching children to read. His most

recent adaptations for the stage are "Under the Red Robe" and "The Prisoner of Zenda"; and "In Days of Old," partially adapted from the French, and played at the St. James's in 1899. Address: 36 Upper Addison Gardens, W.

ROSEBERY, Earl of, The Right Hon. Archibald Philip Primrose, K.G., K.T., LL.D., F.R.S., son of the late Archibald, Lord Dalmeny, by Lady Catherine Lucy Wilhelmina, only daughter of the 4th Earl Stanhope, was born in London in 1847, and received his education at Eton, and at Christ Church, Oxford. He succeeded to the title on the death of his grandfather, the 4th Earl of Rosebery, in 1868. The first time he ever spoke in public was in 1871, when, at the opening of Parliament, he was selected by the Prime Minister, Mr Gladstone, to second the address in reply to the speech from the throne. He soon took a decided position on the question of national education, and when the Government Education Bill for Scotland was before the House of Peers, he moved an amendment to it by which he aimed at the exclusion of catechisms from public schools. He also spoke in the same session on Lord Russell's motion regarding the Alabama Treaty; and he was appointed Commissioner to inquire into Endowments in Scotland. In the session of 1873 Lord Rosebery was much engaged in an endeavour to obtain a Committee of Inquiry on the supply of horses in this country. He moved for, and obtained the Committee, and was made the chairman of the same. It may be said that to the labours of that Committee the remission of the taxes on horses is fairly due. During the session of 1874 Lord Rosebery moved for, and was made the chairman of, a Committee on the Scotch and Irish representative peerages. He was President of the Social Science Congress which met at Glasgow Oct. 1, 1874. On Nov. 16, 1878, he was elected Lord Rector of the University of Aberdeen in succession to Mr. W. E. Forster. In November 1880 he was elected Lord Rector of the University of Edinburgh, but he did not deliver his inaugural address until Nov. 4, 1882. He was appointed Under-Secretary of State for the Home Department in August 1881, in succession to Mr. Leonard Courtney, who was transferred to the Colonial Office. His lordship resigned the Under-Secretaryship in June 1883, and in November 1884 became First Commissioner of Works in succession to Mr. Shaw-Lefevre, who succeeded Mr. Fawcett as Postmaster-General. In Mr. Gladstone's next Government (1886) Lord Rosebery was appointed Secretary of State for Foreign Affairs;

and won general approval, at home and abroad, for the firmness with which he conducted the difficult questions arising out of the Servo-Bulgarian War and the Greek desire for territorial indemnity. When Mr. Gladstone brought forward his first Home Rule for Ireland Bill, he entirely approved of it, and became one of its staunchest supporters in the Upper House. In 1888 Lord Rosebery received the degree of LL.D. from the University of Cambridge. On Jan. 17 he was elected, in company with Sir John Lubbock, member for the City Division of the London County Council; and on Feb. 12 was appointed chairman, but resigned in June 1890, owing to the pressure of his many public duties, and was succeeded by Sir John Lubbock. He married, March 20, 1878, Hannah, only child of Baron Meyer de Rothschild. She died Nov. 19, 1890. Owing to her death, Lord Rosebery abstained from most of his political and social labours during 1891; but in November of that year he published his well-known monograph on William Pitt the younger. In January 1892 he was again elected chairman of the London County Council, and held the position for some months. On Mr. Gladstone's accession to power, Lord Rosebery was appointed Secretary for Foreign Affairs, and in October was made a Knight of the Garter. As a Foreign Minister he has always inclined to maintaining firmly the interests of Great Britain abroad, and as such has carried on Conservative traditions. He is a strong advocate of Imperial Federation, and it is therefore not surprising that when Mr. Gladstone retired in March 1894 and the Premiership was offered to Lord Rosebery by the Queen, a group of "Little-Englanders" and others, headed by Mr. Labouchere, should for a time have violently resented his accession to power, especially whilst such a tried Liberal leader as Sir William Harcourt was apparently passed by. Lord Rosebery, on his acceptance of the Premiership, made some necessary changes in the Cabinet. His Premiership was marked by no startling political events, but he had to carry on the work of Government with a majority too small and heterogeneous to allow of a very dashing policy on the part of those in power. After March 1894 he made several great speeches containing some notable remarks on the relations of the House of Commons and House of Lords, and on the question of Welsh Disestablishment. In the summer of 1894 Lord Rosebery's horse "Ladas" won the Derby, and prolonged attacks on his owner's encouragement of so-called "gambling" were the result. During 1895 Lord Rosebery's Premiership came to an end, mainly owing to the

hostility shown to his leadership by a section of the Radicals. On January 14 the Government was beaten on the estimate for the Houses of Parliament building; on the 20th they were in a majority of 7 only on an amendment to the Welsh Church Bill; on the 21st they were defeated on the ammunition question in committee on the Army Estimates, and the following day Lord Rosebery placed his resignation in the hands of the Queen, by whom it was accepted. He then urged upon his supporters that the general election should be fought upon the question of the predominance of the House of Lords. In October 1896, in the midst of the agitation arising out of the Armenian atrocities, Lord Rosebery wrote to the chief Liberal Whip resigning his position as Leader of the Liberal party, as he found himself in apparent difference with a considerable mass of the party, and in almost direct opposition to Mr. Gladstone on the Eastern Question. Soon after, during a speech at Edinburgh, he declared his strong disapproval of any policy which would involve Great Britain's isolated intervention in regard to the Armenian Question, since he held that this would precipitate a European war. Upon the death of Mr. Gladstone, in May 1898, he paid a noble and eloquent tribute to the life and public services of the illustrious Liberal leader, in a speech delivered in the House of Lords. During the Fashoda crisis Lord Rosebery uniformly supported the policy of Lord Salisbury. This conduct was consistent with the attitude he took up in 1896 against the encroachments of the French in Siam, when by his firm policy he obtained a treaty limiting the French boundary to the Mekong River. His lordship has the character of being a man of many sympathies. Besides being one of the first of English Foreign Ministers, he has for many years taken a deep interest in the welfare of the masses. He has presented a fine swimming-bath to the People's Palace, and his chairmanship of the London County Council will be remembered for the keen sympathy he displayed during his tenure of it in all movements tending to the bettering of the condition of the London working classes. His interest in literature is very great, and, *mutatis mutandis*, he may be said to carry on the Whig tradition of culture in high places. He is an authority on Robert Burns, and has frequently delivered interesting addresses to his own countrymen and to Englishmen on the life and works of the Scottish national poet. His fame as a speaker stands high, and his public utterances are always eagerly awaited by his admirers in all political parties. Selections from his speeches

and addresses were published in June 1899. Lord Rosebery has issue, two sons and two daughters; the heir to the titles and estates, Lord Dalmeny, was born in 1882. His youngest daughter, Lady "Peggy" Primrose, was married in April 1899 to the Earl of Crewe, who was Lord-Lieutenant of Ireland, 1892-95. The service was held in Westminster Abbey in the presence of the Prince of Wales and a distinguished company. Lord Rosebery is Lord-Lieutenant of Linlithgow and Midlothian, a Trustee of the Imperial Institute, and hon. colonel of the 8th Batt. Royal Scots. Addresses: 38 Berkeley Square; the Durdans, Epsom, &c.; and Athenæum.

ROSE-INNES, Hon. J., Q.C., is the son of J. Rose-Innes, late Under-Secretary of State for Native Affairs, and is nephew of Sir Gordon Sprigg, Premier of Cape Colony. He was educated at Gill College, Somerset East, and at the Cape University. He was called to the Bar, and was in 1884 returned to the Cape Parliament as Member for Victoria East. He became Member for the Cape division in 1888. Mr. Rose-Innes was Attorney-General from 1890 to 1893, during the ministry of Mr. Cecil Rhodes, but he resigned the office in the last-mentioned year. On the occasion of the trial of the Reform prisoners in the Transvaal, he was selected by the High Commissioner to watch matters on behalf of the British Government. He has been, until recently, the leader of the Opposition in the Cape House of Assembly. Address: Cape Town.

ROSENTHAL, Moritz, pianist, was born at Lemberg, Dec. 18, 1862, and having studied under Mikuli, gave concerts at Vienna, and was appointed pianist to the Roumanian Court. He went to Weimar, and was introduced to Liszt; and in 1878 he visited Paris and St. Petersburg, where he was most favourably received. His re-appearance at Vienna in 1882 was greeted with enthusiasm, and henceforth his progress in popular favour was most marked. He came to London during 1895, and has paid it several subsequent visits.

ROSS, Adrian. See **ROPES, ARTHUR REED.**

ROSS, Hon. John, is the eldest son of the late Rev. Robert Ross, D.D., of Londonderry, and was born there on Dec. 11, 1854. He was educated at Foyle College, Derry, and Trinity College, Dublin, where he was First Classical Scholar in 1876, President of the University Philosophical Society in the same year, and Auditor of the College Historical Society in 1877. He

was called to the Irish Bar in 1879, became a Q.C., and a Bencher of the King's Inns in 1891, and was appointed in 1896 a Judge of the High Court of Justice (Chancery division), in Ireland. Mr. Ross sat in the House of Commons as Conservative member for Londonderry city from 1892 to 1895. He is married to Katharine, daughter of Col. Deane Mann, of Dunmoyle, co. Tyrone. Address: 66 Fitzwilliam Square, Dublin.

ROSSE, Earl of, Laurence Parsons, Bart., K.P., D.C.L., LL.D., F.R.S., a Representative Peer for Ireland, son of the 3rd Earl, who was President of the Royal Society, and built the famous telescope at Birr, and of Mary, daughter of John Wilmer Field of Heaton Hall, Yorks., was born at Birr Castle, Parsonstown, King's County, Nov. 17, 1840; succeeded to the title on the death of his father in 1867; was educated at Trinity College, Dublin; LL.D. 1879; and Hon. D.C.L. Oxford, 1870; is Chancellor of Dublin University; Lord-Lieutenant since 1892; Custos Rotulorum, and J.P. for King's County; High Sheriff, 1867; a J.P. for co. Tipperary, and one of the Senate of the Royal University of Ireland. He is the author of various scientific papers in the *Philosophical Transactions*, and in the *Proceedings of the Royal Society*, London; the Royal Dublin Society, of which he was elected President in March, 1887; the Reports of the British Association (Montreal meeting); and in the Monthly Notices of the Royal Astronomical Society. Since 1896 he has been President of the Royal Irish Academy. Lord Rosse married, in 1870, Frances Cassandra, only daughter of the fourth Baron Hawke, and has two sons and one daughter. Addresses: Birr Castle, Parsonstown, King's County; Womersley Park, Pontefract; and Athenæum.

ROSSETTI, William Michael, brother of the late Dante Gabriel and Christina Rossetti, was born in London, Sept. 25, 1829, and educated at King's College School, London, where his father, Gabriele, was Professor of Italian. He was appointed in February 1845 to an extra Clerkship in the Excise Office, London (now the Inland Revenue Office), and became in July 1869 Assistant-Secretary in the same office. Under the rule as to limit of age, he retired in September 1894, but continues to act for the office as expert in Paintings, for the purposes of Estate-duty. Mr. Rossetti has been a critic of fine art and literature since 1850. He has acted in that capacity (principally as regards Fine Art) for the *Critic*, *Spectator*, *Reader*, *Saturday Review*, *London Review*, *Chronicle* (weekly), *Fraser's Magazine*, *Academy*,

Athenæum, and "Encyclopædia Britannica." He was much concerned (along with his brother, Millais, Holman Hunt, Woolner, and two others) in the "Pre-Raphaelite" movement in fine art, from its commencement in 1848; and he edited and wrote in the *Germ*, the magazine got up by the Pre-Raphaelites in 1850. He has published "Dante's Comedy, the Hell," translated into blank verse, 1865; "Fine Art, chiefly Contemporary," 1867, a volume of republished criticisms; an edition of Shelley, 1870, with a memoir, and a large body of notes; this was in 2 vols., and was re-issued in 3 vols., revised, in 1878; "Lives of Famous Poets," 1878, being brief biographies of 23 British poets from Chaucer to Longfellow, some of them reproduced from the series named Moxon's Popular Poets, with others added; an edition, with preface and notes, 1887, of the "Collected Works of Dante Gabriel Rossetti"; a "Life of Keats," 1887, in the series named Great Writers; a volume, 1889, entitled "Dante Gabriel Rossetti as Designer and Writer," and an ample Memoir of D. G. Rossetti, 1895, accompanying the Family Letters of the latter. In 1896 he edited the "New Poems" of his lately deceased sister, Christina. The series above named, Moxon's Popular Poets, was edited by Mr. Rossetti from 1870 to 1875, including 2 vols. of American poems and humorous poems, selected. He also edited, with a full memoir, Wm. Blake's Poems, in the Aldine Series; and the annotated edition of Shelley's "Adonais" for the Clarendon Press; and issued a selection, in 1868, of the Poems of Walt Whitman; likewise works of different kinds, published by the Early English Text Society, and the Chaucer Society. He was Permanent Chairman of the Committee of the Shelley Society, 1886-95, and he read to this body papers on Shelley's "Prometheus Unbound," and on several other matters. Among his other works are a poem of modern life in blank verse, entitled, "Mrs. Holmes Grey," published in the *Broadway* about 1869; and a "Criticism of Swinburne's Poems and Ballads," 1866. Mr. Rossetti delivered in 1875, &c., at Birmingham, Oxford University, and elsewhere, lectures on Shelley's Life and Poems, on "The Wives of Poets," and on Leopardi. In March 1874 he married Lucy, the elder daughter of the late Ford Madox Brown, the painter. She was an artist and authoress, and exhibited at the Royal Academy and elsewhere. She died on April 12, 1894, leaving four children. Address: 3 St. Edmund's Terrace, Regent's Park, N.W.

ROSTAND, Edmond, French dramatist, is the son of Joseph Eugène Hubert

Rostand, known as a poet of Marseille. His first play, "Les Romanesques," was produced at the Comédie Française in 1894, and although it created no stir, yet many saw great promise in that comedy of playful humour. His next work, "La Princesse Lointaine," was written for M^{me}. Bernhardt, who played it at the Renaissance, as was also his third, "La Samaritaine," a poetical paraphrase of the story of Christ and the Woman of Samaria. But he first came into universal notice as the author of "Cyrano de Bergerac," a play that brought romantic drama into fashion again, after the problem plays of previous years. It was represented at the Porte Saint Martin Theatre in Paris for the first time on Dec. 28, 1897, when the title rôle was played by the elder Coquelin (*q.v.*). The happy combination of author and actor brought about an immediate and lasting success. It was played in Paris until the July following, when M. Coquelin brought it to London (Lyceum, July 4, 1898), and to other European towns. Returning to Paris in October 1898, he re-assumed the part. The book of the play ran into a hundred thousand within a year, and quite a flock of plays of the Dumas school were produced in Paris and London soon after. His definition of a "baiser" was quoted in almost every paper. He is also the author of two volumes of poetry, "Les Musardises" and "Pour la Grèce." His Paris address is: 29 Rue Alphonse de Neuville.

ROTHSCHILD, Alfred Charles de, second son of the late Baron Lionel de Rothschild, was born July 20, 1842, and educated at King's College School, London, and Trinity College, Cambridge. He is a member of the firm of N. M. Rothschild and Sons, and Consul-General for the Austro-Hungarian Empire. Like almost all the members of his family, he is a passionate collector of works of art; especially of Dutch, French, and old English pictures, Sèvres china, Louis XVI. furniture and bronzes, and Renaissance enamels and metal work. A sumptuous catalogue of this collection was privately printed in two folio volumes, 1885. Among Mr. De Rothschild's most famous pictures may be named Greuze's "Le Baiser envoyé"; Teniers' "The Marriage of Teniers"; Gainsborough's "Mr. and Mrs. Villebois"; and Romney's "Mrs. Tickell." Addresses: 1 Seamore Place, Mayfair; and Halton House, Tring, Herts.

ROTHSCHILD, Lord Nathan Mayer de, Bart., 1st Lord Rothschild, eldest son of Baron Lionel Nathan de Rothschild, was born in London, Nov. 8, 1840, and educated at King's College School,

London, and Trinity College, Cambridge. He was elected as Liberal member for Aylesbury, 1865, and retained the seat until 1885, when he was created a Peer. He is the head of the London banking firm of N. M. Rothschild & Sons. At Tring Park, and in his fine house in Piccadilly, Lord Rothschild has assembled a multitude of treasures of art; among which it is enough to mention two masterpieces of Gainsborough, "Mrs. Sheridan," "Squire Hilyard and his Wife," and two of Sir Joshua Reynolds, "Garriek between Tragedy and Comedy," and "Mrs. Lloyd." He married Emma, daughter of Baron Charles de Rothschild, of Frankfort. Addresses: 148 Piccadilly, W.; Tring Park, Herts, &c.

ROUMANIA, King of. See CHARLES, KING OF ROUMANIA.

ROUMANIA, Queen of. See ELIZABETH, QUEEN OF ROUMANIA.

ROUTH, Edward John, M.A., D.Sc., LL.D., F.R.S., was born at Quebec, Canada, on Jan. 20, 1831, being a son of Sir Randolph Routh, K.C.B., Commissary-General to the Forces. He is also a nephew of Cardinal Taschereau, late Archbishop of Quebec. At the age of 11 he was brought to England, and subsequently was sent to University College School, where he stayed only a year before entering University College. Here, under Professor De Morgan, he made rapid progress in mathematical studies. He passed through the higher classes, gaining the mathematical prizes at the yearly examinations. He matriculated in the University of London in 1847, and passed the B.A. examination in 1849, gaining the Mathematical Scholarship at each. He received also the Gold Medal at his M.A. examination in 1853. In October 1851 he entered Peterhouse, Cambridge. He studied for a year under Mr. Todhunter, of St. John's College, and for the remaining two years and a quarter under Mr. Hopkins, of Peterhouse. In 1854 he graduated as Senior Wrangler, and at the Smith's Prize examination he was bracketed equal with Mr. Clerk Maxwell, afterwards Professor of Experimental Philosophy at Cambridge. He was then elected a Fellow of Peterhouse, and adopted the profession of teaching as his career in life. From 1861 to 1885 (with the single exception of 1883), the Senior Wrangler has every year been his pupil, besides twice before that date, and once since; in all twenty-seven times. He has also had amongst his pupils forty-one Smith's Prizemen. This success is without precedent. In 1855 Mr. Routh wrote a book in conjunction with Lord Brougham. In

1859 he was appointed Examiner in Mathematics in the University of London, and after the necessary interval of a year, he held the office for a second quinquennial period (1865-70). Soon after his graduation he was elected a member of the Cambridge Philosophical Society, of the Geological Society, and of the Royal Geographical Society; subsequently he became a Fellow of the Royal Astronomical Society, and a Fellow of the Royal Society. He is also an original member of the London Mathematical Society, having been one of those who helped to establish it. In 1860 he was a Moderator, and in 1861 Examiner for the Mathematical Tripos at Cambridge. In 1877 he gained the Adams Prize for his essay on the Stability of Motion. The honorary degree of LL.D. was conferred upon him in 1879 by the University of Glasgow. In 1883 he was one of the first to take the degree of Doctor of Science, then established in the University of Cambridge for those who had "given proof of distinction by some original contribution to the advancement of science." He was elected Honorary Fellow of Peterhouse in the same year. In 1884 Dr. Routh was appointed by the Crown a Fellow of the University of London, and is therefore now a member of the governing body of that University. In 1886 Dr. Routh ceased taking any new pupils, and during the next two years he merely conducted through the remainder of their mathematical course those who had already begun to read with him. In the thirty-one years from 1857 to 1888 he thus "coached" nearly seven hundred pupils through the Mathematical Tripos, five hundred of them becoming wranglers. In 1888 his old pupils presented Mrs. Routh with a portrait of her husband painted by Herkomer as a memorial of their attachment to him. The presentation took place in Peterhouse, the ceremony being described at some length in the *Times* of Monday, Nov. 5, 1888. In this year he was elected a member of the Council of the University of Cambridge, and a member of the Council of the Royal Society. At the celebration of the Tercentenary of Trinity College, Dublin, in June 1892, he received the honorary degree of Doctor of Science in that University. In 1888 he was an examiner for the second part of the Cambridge Tripos, and in 1893 he was again Moderator. He is also on the governing bodies of Cavendish College, Dulwich College, and till lately of the schools at Ipswich. Dr. Routh has written a book on "Rigid Dynamics," in two volumes, six editions of which have been published. A translation into German was made under the auspices of Prof. Klein of Göttingen. He has written for the Syn-

dics of the University Press a treatise on "Statics," also in two volumes. He has also written for them a treatise on the "Dynamics of a Particle," which appeared in the summer of 1898. Besides these he has contributed numerous papers on mathematical subjects to the *Mathematical Messenger*, the *Quarterly Journal of Mathematics*, the *Transactions and Proceedings of the Royal Society*, and the volumes of the London Mathematical Society. In 1864 he married the eldest daughter of Sir G. B. Airy, K.C.B., the late Astronomer-Royal. Address: Peterhouse, Cambridge.

ROUVIER, Maurice, French politician, was born at Aix, April 17, 1842, and having entered the legal profession, was a well-known opponent of the Empire. He entered Parliament in July 1871 for Marseille, and sat with the Extreme Left. In 1877 he was one of the 363 members who refused a vote of confidence to the Broglie Cabinet, and it was then that he began to come to the front as an authority on financial matters. Especially did he defend the interest of the town of Marseille, and in Gambetta's great ministry of 1881 he received the Portfolio of Commerce. He resigned with his colleagues in January 1882, but received the same Portfolio in the Ferry Cabinet of 1884. In 1886 he was sent to Rome to treat with the Italian Government as to a new Commercial Treaty, and on the 30th of May of the next year he was asked to form a Government in succession to that of M. Goblet. In this he took the Ministry of Finances, a post he held for many years in successive Cabinets. On entering upon power, he had the courage to deprive General Boulanger of his post as Minister for War, by which act he brought much abuse upon his head. Having held power in the Tirard, Freycinet, and Loubet Cabinets, he had to resign in 1892 on account of his connection with the Baron de Reinach and the Panama scandals. He was accused of having received huge bribes from the Panama directors, but he declared that the money had been spent in preserving the country from Boulangism. However this may be, it has been up to now the drawback to M. Rouvier's official career, and although he is always prominent in financial debates, he has not again taken office. His Paris address is: 8 Rue de Windsor.

ROUX, Dr. Pierre Paul Émile, Director of the Pasteur Institute in Paris, was born in 1853 at Confolens, pursued his classical studies at the College of Confolens d'Aurillac, and afterwards at the Lycée of Puy, and from 1872 to 1874 was a student at the Medical School of Cler-

mont Ferrand. At Clermont Ferrand M. Roux became intimate with the newly-appointed Professor of Chemistry, Dr. Duclaux, and it was doubtless under his influence that he wrote his first work on the variations of "The Quantity of Urine Excreted with a Normal Alimentation in Drinking Coffee or Tea" (*Comptes Rendus, Acad. des Sciences*, August 1873). M. Roux subsequently entered Val-de-Grâce, but found the military life interfere with research work. He therefore left it, and from 1874 to 1878 was attached to the Hôtel-Dieu as Clinical Assistant to the Faculty of Medicine. M. Duclaux now came to Paris, and brought Roux under the notice of his great master, Pasteur, who at once associated M. Roux with himself and MM. Joullet and Chamberland in the studies he was about to undertake on wool-sorters' disease. M. Roux accordingly became *préparateur* in Pasteur's laboratory. In 1883 he took his doctoral degree with the thesis, "Nouvelles Acquisitions sur la Rage." The thesis deals with the anti-rabic inoculations performed in the Pasteur laboratory in 1881-83. In 1888 he became head of the famous Institut Pasteur, and in 1896 succeeded his illustrious master as its sole Director. The memorable researches on charbon, wool-sorters' disease, attenuation of virus, vaccination against hydrophobia, cholera, tuberculosis, &c., which have rendered the French Pasteur Institute famous, were largely shared in by Dr. Roux. His colleagues under Pasteur were MM. Chamberland and Thuillier. He has published notes on their joint researches, and in April 1898, with M. Barree, contributed a paper on cerebral tetanus and immunity from tetanus to the Congress at Madrid. M. Roux is a professor of great talent, and his eloquent expositions of Pasteurism, delivered in his courses of biological lectures to French and foreign medical men, are well known. His great activity in microbiological research has won him frequent rewards, such as the Breant prize (1884), and the Alberto Levi prize (1896), of the Institut Pasteur, and the Mombrue prize (1884), and St. Paul prize of the Academy of Medicine. In February 1899 he was elected a member of the Academy of Sciences.

ROWBOTHAM, John Frederick, is the only son of the late Rev. Frederick Rowbotham, Incumbent of St. James's, Edinburgh. He was born in 1854, and was educated at the Edinburgh Academy and at Rossall School, of which he was Captain. From Rossall he proceeded to Balliol College, Oxford, where he gained the Balliol Scholarship at the age of eighteen. He was the favourite pupil of Professor

Jowett. Among other distinctions at Oxford, he took a first class in Lit. Hum. and the Taylorian University Scholarship for Italian. After leaving college he travelled for some years on the Continent, in order to collect materials for his "History of Music." He studied at the libraries of Madrid, Paris, Rome, Florence, Venice, and Vienna; and even visited monasteries to peruse their manuscripts. The "History of Music" was published in 1885, and was at once acknowledged by the entire press, if not by musicians at large, to be the standard work on the subject. After completing the "History of Music," Mr. Rowbotham devoted himself to epic poetry. His first epic poem, "The Death of Roland," was published in 1886. "The Human Epic" appeared in 1890. In 1892 appeared "Private Life of the Great Composers"; in 1893, a new edition of the "History of Music"; and in 1894, "A History of Rossall School." Among those who have taken a deep interest in Mr. Rowbotham's writings is the Queen of Rumania.

ROWLAND, Rev. Alfred, LL.B., B.A., was born on Jan. 17, 1840, at the Manse, Henley-on-Thames. His father, the Rev. James Rowland, was a well-known preacher and pastor, exercising his ministry for thirty-seven years in the above town. His second son, Alfred, was educated at Cranford College, Maidenhead. After four years spent in the business house of J. & R. Morley, he entered New College, London, in September 1859. Here Mr. Rowland took his degrees at the London University in Arts and Laws. In 1865 he entered on his first pastorate at Zion Chapel, Frome, where his work was successful. In 1875 he received a call to Park Chapel, Crouch End. This church was at the time smaller than the one he was asked to leave, but under his pastorate it has grown considerably. The membership, which then numbered 262, now numbers 1037. The church has been enlarged three times, and now accommodates nearly 1500 persons, every seat being occupied at the Sunday services. During Mr. Rowland's pastorate fine mission premises have been erected, and the Carbin Memorial Hall, so called after the first pastor. Mr. Rowland has published: "Half-Hours with Teachers," "Paul's First Letter to Timothy," and "The Burdens of Life," in the new series of sermons issued by Horace Marshall & Co., besides numerous sermons and addresses in the "Homiletic Commentary," and elsewhere. He has held office as one of the "Antient Merchants Lecturers" since 1889; was Chairman of the London Congregational Union in 1892;

is President of the local Free Church Council, Chairman of the New College Council, and for the year 1898 was Chairman of the Congregational Union of England and Wales. Mr. Rowland married the daughter of the late William Trewent, Esq., J.P., of Pembroke, and has a large family, his second son, Maynard, being well known as the cyclist who carried despatches through the Boer army from Johannesburg to Dr. Jameson. Address: Selwood, Crescent Road, Crouch End, N.

ROWLANDS, William Bowen, Q.C., J.P., D.L., Leader of the South Wales and Chester Circuit, and Recorder of Swansea, was born in South Wales in 1838, and is the eldest son of the late Thomas Rowlands, J.P., of Glenover, Pembrokeshire, and Anne, daughter of John Bowen, of Dygoed, in the same county. He completed his education at Jesus College, Oxford, of which University he is M.A. In 1870 he gained a first-class certificate of honour at the General Examination for the Bar, and was called at Gray's Inn in 1871. In 1882 he was appointed a Queen's Counsel, and became a Bencher of Gray's Inn in the same year. In 1889 he was Treasurer of his Inn. He is a member of the Council of Legal Education and of the Board of Studies, of the Bar Library Committee, of the Committee of the Four Inns of Court on the Discipline of the Bar, leader of the South Wales and Chester Circuits, D.L. for Cardiganshire, and J.P. for Pembrokeshire, Cardiganshire, and Haverfordwest. In 1886, and again in 1892, Mr. Bowen Rowlands was elected Member of Parliament for Cardiganshire. In June 1893 he was appointed Recorder of Swansea, when he vacated his seat, and was re-elected without opposition. He did not seek re-election in his old constituency in 1895. He married, in 1864, Adeline Wogan, only daughter of J. D. Brown, of Kensington House, Haverfordwest. Address: 3 King's Bench Walk, Temple, E.C.

ROWTON, Lord, Montagu William Lowry-Corry, C.B., D.L., J.P., second son of the Right Hon. Henry Corry, son of the 2nd Earl of Belmore, and of Lady Harriet, daughter of the 6th Earl of Shaftesbury, was born in London, Oct. 8, 1838. He was educated at Harrow and at Trinity College, Cambridge, taking his degree in 1860. Called to the Bar at Lincoln's Inn in 1863, he practised for three years on the Oxford Circuit, and in 1866 was officially appointed Private Secretary to Mr. Disraeli, then Chancellor of the Exchequer. After Mr. Disraeli's defeat in 1868 he declined offers of public appointments which were made to him,

and rendered voluntary service to that statesman till his return to power in 1874, subsequently continuing to act as Lord Beaconsfield's private secretary till his death in 1881. He accompanied Lord Beaconsfield to the Congress of Berlin, being then appointed one of the joint-secretaries to the Special Embassy of Great Britain, and, at its close, received the Companionship of the Bath. At the termination of Lord Beaconsfield's Government in 1880, he was raised to the peerage, taking his title from his estate at Rowton Castle in Shropshire. Lord Beaconsfield bequeathed to Lord Rowton the whole of his letters, papers, documents, and manuscripts, leaving it to his absolute discretion to destroy, preserve, or publish any of them, at such time as, in his uncontrolled judgment, might seem fit. It was at first inferred from the terms of the bequest that Lord Beaconsfield had left behind him some sort of diary or memoirs for publication. This, unfortunately, proved not to be the case, and it became evident that the only manuscript, the publication of which was distinctly contemplated by the testator, was that of "Endymion." This work was almost completed at the date of the signing of the will, and was afterwards published during the lifetime of the writer. Lord Rowton is chairman of the Rowton Houses Company, formed for the purpose of providing large and cheap hotels for poor single men of all classes in London, and he is also chairman of the Guinness Trust. Addresses: 17 Berkeley Square, W.; and Rowton Castle, Shrewsbury.

ROYSTON, The Right Rev. Peter Sorenson, D.D., is the son of John P. Royston, of the Bank of England, was born in London on June 6, 1830, and was educated at St. Paul's School, and Trinity College, Cambridge. Ordained in 1853, he was Resident Tutor at the Church Missionary College, London, for the two following years. From 1855 to 1862, and from 1866 to 1871, he was incumbent of the Church Missionary Society's chapel at Madras, and also acted as Corresponding Secretary of the Society for South India. He was a Fellow of the Madras University from 1858 to 1872, and in the latter year was appointed to the Bishopric of Mauritius, which he was, however, compelled to resign, through ill-health, in 1890. On his return to England, he was, in the following year, appointed Assistant-Bishop to the Bishop of Liverpool, and he has held also the Vicarage of Childwall since 1896. He was editor of the *Madras Church Missionary Record* from 1856 to 1871. He was married, in 1861, to Mary, daughter of Thomas Clarke, Madras Civil Service.

Addresses: Childwall Vicarage, Liverpool; and Athenæum.

ROZE, Madame Marie, French soprano, was born in Paris in 1848, and entered the Conservatoire at the age of 16, studying under Auber and Molker. In 1865 she took a first prize for singing, and the gold medal in the next year. She made her début at the Opéra Comique, where her chief parts were in "Marie," "La Dame Blanche," "Fra Diavolo," and Auber's "L'Ambassadrice." She remained in Paris during the siege of 1870, and was presented with a gold medal by M. Thiers for her gallant conduct. Her first appearance in England was in 1872, when she made a great success in "Faust." She remained in this country until 1877, when she went to New York, and stayed two years in America. Since 1883 she has been a member of the Carl Rosa Opera Company.

RÜCKER, Professor Arthur William, M.A. Oxon., D.Sc. Vict., Sec.R.S., M.I.E.E., eldest son of the late D. H. Rücker, of Errington, Clapham Park, was born Oct. 23, 1848. He was educated at the Clapham Grammar School, and at Brasenose College, Oxford. After a distinguished University career, he was elected Fellow and Lecturer of his College, and Demonstrator in the Clarendon Laboratory of the University. In 1874 he was appointed Professor of Mathematics and Physics in the newly founded Yorkshire College, Leeds. In the General Election of 1885 Professor Rücker contested the Northern Division of Leeds in the Liberal interest; and in 1886 he stood as a Unionist Liberal for the Pudsey Division of the West Riding. In the latter year he was appointed Professor of Physics in the Royal College of Science, South Kensington. Professor Rücker is the author or joint-author of many papers on scientific subjects. Together with Prof. Reinold, F.R.S., he has published in the *Transactions of the Royal Society*, 1881, 1883, 1886, and 1893, a series of memoirs on the properties of liquid films; and, in conjunction with Prof. Thorpe, F.R.S., he has carried out the magnetic survey of the United Kingdom which formed the subject of the Bakerian Lecture delivered before the Royal Society in 1889. The final results of this investigation were published in the *Philosophical Transactions* in 1896. He was elected a Fellow of the Royal Society in 1884, was awarded a Royal Medal in 1891, and was appointed to the office of Secretary to the Society in 1896; he has served as Treasurer and President of the Physical Society of London, and as Treasurer of the British

Association; he is an Honorary Fellow of Brasenose College, Oxford, and a Fellow of the University of London. He married (1), in 1876, Marian, daughter of J. D. Heaton, F.R.C.P., of Leeds, and (2) Thereza, daughter of N. Story-Maskeleyne, F.R.S. Addresses: 19 Gledhow Gardens, S.W.; and Athenæum.

RUDINI, Marquis di, Italian statesman, was born in 1840, and when hardly twenty, became Syndic of Palermo. In 1869 he was for a short time Minister of the Interior, but did not attain prominence until 1891, when he succeeded Crispi as Premier, with a programme of retrenchment. He resigned in 1892, because he could not have a free hand; and was succeeded by Signor Giolitti (*q.v.*). After the fall of the second Crispi Cabinet in 1896, owing to the disasters in Erythrea, the Marquis di Rudini again became Premier. Replying to an interpolation by Signor Imbriani in May 1896, the Marquis di Rudini strongly supported the Triple Alliance, warmly eulogised the German Emperor, and referred in cordial terms to the friendship between Italy and Great Britain as completing the system of Italian alliances. In the following month the Government carried a vote closing the debate on the Budget by only three votes, but a semi-official note was published denying absolutely current reports to the effect that the Marquis di Rudini had tendered his resignation to the King. Early in March 1897 the Premier issued his election manifesto, which set forth the programme of the Cabinet. The elections held at the end of the same month resulted in a large majority for the Government, and, speaking soon after, di Rudini expressed confidence in his ability to retain office for a considerable time. However, it soon became apparent that it was a complete mistake to suppose that the elections signified public approval of the Government. Elections in Italy are only the result, it is said, of personal preferences at best, and of official pressure at the worst. Notwithstanding the re-election of di Rudini, the country evinced a deep discontent with the Government as a whole, particularly with the monarchy. The disasters in Africa were popularly supposed to have been directly caused by unconstitutional agencies beyond the reach of public opinion. Although the King in his speech from the Throne promised to introduce a Bill for promoting the welfare of workmen, the lower classes began to clamour for reform. The reception of the King by the populace of Rome on his way to

noted by the way that a press telegram to England referring to the general disfavour was stopped by the authorities as being untrue. Popular feeling was excited by the alleged injustice and inequality of the revised assessments, and the Chamber of Commerce of Rome organised a tremendous and widely-adopted protest, afterwards by deputation interviewing the Premier, who gave unsatisfactory replies to the spokesmen of the demonstrators. The crowd outside, becoming irritated by the delay of di Rudini's answer, began stoning the military guard, who subsequently fired on the people, and after a hand-to-hand fight succeeded in clearing the streets. The city soon assumed its usual aspect, but the authorities were blamed for the disturbances. However, the Government granted the desired revision of assessments, and matters were smoothed over for a time. In December 1897 the Government were defeated on a military bill, and the Minister of War, General Pelloux (*q.v.*), persisting in his resignation, the Premier also gave up office. The Marquis di Rudini, having overcome the redoubtable Zanardelli, remodelled his ministry, but its life was uncertain from its birth. The pressing need of the hour was social reform, which di Rudini was too conservative to undertake. Hence his failure to allay popular discontent.

RUDLER, Frederick William, was born in London, July 8, 1840, and appointed an assistant in the Museum of Practical Geology in Jernyn Street, in 1861. He was Assistant-Secretary of the Ethnological Society in 1870; and for some time edited its *Quarterly Journal*, and that of the Anthropological Institute. In 1876 he was appointed Professor of Natural Science in the University College of Wales, but resigned that position in 1879, to take the Curatorship of the Museum of Practical Geology. He also held the office of Registrar of the Royal School of Mines until its amalgamation with the Normal School of Science. For many years he was Honorary Secretary of the Anthropological Institute, and in 1880 presided over the Anthropological Department of the British Association. In 1887 and 1888 he was President of the Geologists' Association, and in 1898 President of the Anthropological Institute. In conjunction with the late Mr. Robert Hunt he edited the seventh edition of Ure's "Dictionary of Arts," and, jointly with others, was author of the volume on Europe in Stanford's "Compendium of Geography." Mr. Rudler was a contributor to the ninth edition of the "Encyclopædia Britannica," and to Longmans' two Dictionaries of Chemistry. He is a copious

writer of articles and reviews, mostly anonymous, in various scientific journals, and is a lecturer in connection with the London Society for the Extension of University Teaching. Address: Museum of Practical Geology, Jermyn Street, S.W.

RUMBOLD, The Right Hon. Sir Horace, Bart., G.C.M.G., G.C.B., Ambassador to the Emperor of Austria, is the fifth son of Sir William Rumbold, by Henrietta Elizabeth, second daughter of the 1st Lord Radcliffe. He was born on July 22, 1829, and succeeded his brother in 1877. He entered the diplomatic service, and was successively Attaché at Washington in 1849, and from 1852 onwards at Florence, Paris, and Frankfurt. On Sept. 19, 1854, he was appointed paid Attaché at Stuttgart, and, in November 1856, second paid Attaché at Vienna. In December 1858 he was selected to be Secretary of Legation in China, and proceeded thither with Mr., afterwards Sir Frederick Bruce, in March 1859. When Mr. Bruce's mission was prevented from proceeding to Peking, and the Taku forts were attacked, June 25, 1859, he was sent home with despatches, and to supply the Government with full particulars of events at the Peiho. In September 1862 he became Secretary of Legation at Athens, and in July 1863 was sent, in company with the French and Russian First Secretaries, his colleagues, to conclude an armistice between the two military factions at that time waging civil war in Athens. Transferred to Bern on May 18, 1864, he nevertheless remained in charge of the mission at Athens until June 30, during which time he accompanied the King on a visit to the Ionian Islands, then newly annexed. On March 7, 1868, he was promoted to be Secretary of Embassy at St. Petersburg, and was transferred in March 1871 to Constantinople. In October 1872 he became Minister-Resident and Consul-General in Chili, and at the beginning of 1878 was appointed Minister-Resident at Bern. On Aug. 15, 1879, he was made Envoy Extraordinary and Minister Plenipotentiary to the Argentine Republic, and was transferred in that capacity to the King of Norway and Sweden on April 1, 1881, to the King of the Hellenes on Dec. 17, 1884, and to the King of the Netherlands, and also to his Majesty in his capacity of Grand-Duke of Luxembourg, on Feb. 1, 1888. His present appointment dates from August 1896, when he succeeded Sir Edmund Monson. He was created a K.C.M.G. in August 1886, and a G.C.M.G. in May 1892, and was sworn of the Privy Council in November 1896. He married (1), in 1867, Caroline Barney, daughter of

Mr. George Harrington, of Washington; and (2), in 1881, Louisa Ann, only daughter of Mr. Thomas Russell Crampton, and widow of Captain St. George F. R. Caulfield, of the 1st Life Guards. London address: 127 Sloane Street, S.W.

RUNDLE, Major-General Sir Henry Macleod Leslie, K.C.B., C.M.G., D.S.O., was born in January 1856, and educated at the Royal Military Academy, Woolwich. He entered the army as Lieutenant of Royal Artillery in August 1876, and was promoted Captain in March 1885, Major in June of the same year, and Colonel in January 1894. He first saw active service in the Zulu War of 1879 with Sir Evelyn Wood's Flying Column, and was present with the Gatling battery in the engagement at Ulundi. During the Boer War of 1882 he served with the Field Artillery, and took part in the defence of Potchefstroom. During 1882 he went to Egypt, and was present at the battle of Tel-el-Kebir. General Rundle became attached to the Egyptian army in 1883, since which time he has been actively employed in practically all the various operations that have taken place in Egypt. During the Nile Expedition he was employed on special service with the Bedouin tribes, when he won the brevet of Major and the Medjidieh of the third class. In 1885 he was attached to the Frontier Field Force, and took part in the action at Sarras, being in command of the Mounted Corps. He obtained the D.S.O. and the Osmanieh of the third class. He was present at the capture of Fort Tokar, and at the action at Toski he commanded the artillery. In 1896 Col. Rundle served with the Dongola Expeditionary Force under Lord Kitchener as Chief of the Staff, and, beside the engagement at Firket, he took part in the operations at Hafir. He was afterwards specially promoted to Major-General for distinguished service in the field. He held high command in the Soudan Expedition of 1898, and was present at the battle of Atbara and the taking of Khartoum. Upon returning to England he was knighted, and appointed to the command of the South-Eastern District. Major-General Rundle is a Pacha and has been Adjutant-General of the Egyptian army. Address: Dover.

RUSDEN, George William, was in 1849 appointed agent for the establishment of national schools in the Port Phillip District, now Victoria, and afterwards agent and inspector of schools in New South Wales. When Victoria was separated from New South Wales in 1851 he was made Under-Secretary, or Chief Clerk in the

Colonial Secretary's Office; Clerk of the Executive Council in 1852; and in 1856 was attached to the establishment of a new constitution with the Houses of Legislature, as Clerk of the Legislative Council, and Clerk of the Parliaments. From 1853 till his retirement from the Civil Service in 1882 he served as a Magistrate, and was for some time a Member of the National Educational Board in Victoria. He was a Member of the Council of the University of Melbourne from its foundation, until absence in Europe caused him to resign, and through his advocacy a Shakespeare scholarship was founded in the University. He is the author of "Moyarra: an Australian Legend"; "National Education"; "Discovery, Survey, and Settlement of Port Phillip"; "Curiosities of Colonisation"; "History of New Zealand"; a "History of Australia," published in London in 1883; and of "Aureretanga: The Great Refusal," by Vindex, 1890. Mr. Rusden is a Fellow of the Royal Geographical Society, the Royal Historical Society, the Royal Asiatic Society, and a Member of the Corporation of the Royal Literary Fund in England.

RUSKIN, John, M.A., D.C.L., LL.D., son of a London merchant, was born in Hunter Street, Brunswick Square, London, on Feb. 8, 1819, and was educated privately, and at Christ Church, Oxford, where he gained the Newdigate Prize in 1839. He then devoted himself to painting, and worked under Copley Fielding and J. D. Harding. An unpublished paper in defence of Turner written in 1836 was his first effort in the cause of modern art, and it was enlarged into a standard work, entitled "Modern Painters," the first volume of which appeared in 1843. The author's success as a writer on art was decided by the warm reception accorded to this volume, of which many editions have since been published. Mr. Ruskin's views, however, were combated with bitter asperity by some of the art critics of the day, who resented with an affectation of contempt his free expression of dissent from the trammels of their school. In his second volume of "Modern Painters," written after a residence in Italy, and published in 1846, he took a much wider survey of the subject originally entered upon, including the works of the great Italian painters, and discussed at length the merits of their respective schools. This, his chief work, has been completed by the publication of three additional volumes containing illustrations by himself, the last of which was published in 1860. Mr. Ruskin as an undergraduate had written "The Poetry of Architecture" in a series of papers for a magazine; ten

years later he wrote "The Seven Lamps of Architecture," published in 1849, followed by the first volume of "The Stones of Venice" in 1851, the second and third volumes of which appeared in 1853. The illustrations in the last-named productions, which excited some of the same professional hostility that his first publication evoked, displayed to much advantage his artistic powers. Mr. Ruskin has expounded his views both in lectures and in newspapers and reviews, having contributed articles to the *Quarterly* on Lord Lindsay's "Christian Art," in 1847, and on Eastlake's "History of Oil Painting" in 1848. In 1851 he advocated Pre-Raphaelitism in letters to the *Times*; and in 1853 he lectured in Edinburgh on Gothic Architecture, published as "Lectures on Architecture and Painting," 1854. In addition to the above-mentioned works, Mr. Ruskin has written "Notes on the Construction of Sheepfolds," "The King of the Golden River," a story for children, illustrated by Doyle, in 1851; "Notes to Pictures in the Royal Academy, Nos. 1 to 5," in 1854-59; "Giotto and his works in Padua," written for the Arundel Society, of which he was a member; "Notes on the Turner Collection," in 1857; "The Elements of Drawing," and "Political Economy of Art," in 1857; "Elements of Perspective," and "The Two Paths," in 1859; "Unto this Last: Four Essays," republished from the *Cornhill Magazine*, in 1862; "Ethics of the Dust," in 1866; "Sesame and Lilies," in 1865; "Crown of Wild Olive," in 1866; "Time and Tide," in 1867; and "The Queen of the Air, being a Study of the Greek Myths of Cloud and Storm." To the *Art Journal* he contributed "The Cestus of Aglaia," and he has written for various periodicals. Mr. Ruskin was appointed Rede Lecturer at Cambridge in April 1867, and the Senate conferred the degree of LL.D. upon him, May 15. He was also elected Slade Professor of Fine Art at Oxford, and in 1870 published "Lectures on Art"; in 1872, "Aratra Pentelici: Six Lectures on the Elements of Sculpture, given before the University of Oxford in Michaelmas Term, 1870," followed by "The Eagle's Nest," and other courses of lectures. In 1871 he proposed to devote £5000 for the purpose of an endowment to pay a master of drawing in the Taylor Galleries, Oxford, and this handsome offer was, with some modifications, accepted by the University in January 1872. He was re-elected to the Slade Professorship of Fine Art, 1876. From 1871 to 1884 he published the 96 "Letters to the Workmen and Labourers of England" under the title of "Fors Clavigera." In 1883 he was again elected Slade Professor, and at his inaugural

lecture was received with unprecedented enthusiasm. So great was the crowd that thronged to hear his lectures that it was impossible to accommodate the audience, and Professor Ruskin undertook to deliver each lecture twice. He was obliged to resign the post in 1884 on account of failing health. Other works of his later period are "Love's Meinie: Lectures on Birds"; "Proserpina," on Botany; "Deucalion," on Geology; "St. Mark's Rest," on the Art and Architecture of Venice; "The Laws of Fésôle," on drawing; "The Bible of Amiens," a historical study; and "Præterita," an autobiography; beside many minor lectures and articles. He has also edited various works on Art and Social questions, and, amongst other books, has published for Miss Francesca Alexander, an American lady, "The Story of Ida," "Christ's Folk in the Apennine," and "The Roadside Songs of Tuscany," the illustrations to which he eulogised and exhibited during his last series of Slade lectures. For several years Mr. Ruskin has lived in tranquil retirement at Brantwood, Coniston. On Feb. 8, 1899, Mr. Ruskin celebrated his eightieth birthday, and was presented with a national address from the St. George's Guild and the Ruskin societies, which ran as follows: "Dear Master and Friend,—The eightieth anniversary of your birthday gives us the opportunity of offering our united loving greetings. As the representative members of the St. George's Guild and the Ruskin societies of the country, owing so much of the good and joy of life to your words and work, we feel that the world is richer and happier for that which you have been able to accomplish year by year in ever-widening extent. There is an increasing desire to realise the noble ideals you have set before mankind in words which we feel have brought nearer to our hearts the kingdom of God upon earth. It is our hope and prayer that the joy and peace you have brought to others may return in full measure to your own heart, filling it with the peace which comes from the love of God and the knowledge of the love of your fellow-men. We have the further happiness of appending to this address of congratulation the names of friends who are associated with our national and other institutions, all of whom have intimated their wishes to be included in this general expression of deepest respect and sincerest affection." The signatories included the Prince of Wales, the trustees of the British Museum, and representatives of the National Gallery, the Royal Society of Painters in Water-Colours, Oxford University, Whitelands College (with all the "May Queens"), Ancoats Museum, Manchester, the Art for Schools Association,

the Royal Academy, St. George's Guild, and the Glasgow, Liverpool, and Birmingham Ruskin societies. Among other signatures were those of the Archbishops of Canterbury and York, the Marquis of Lansdowne, Sir John Lubbock, and Sir H. W. Acland. Addresses: Brantwood, Coniston; and Athenæum.

RUSSELL, General Sir Baker Creed, K.C.B., K.C.M.G., was born in 1837, and when the Indian Mutiny broke out at Meerut, he was present with the Carabineers, and afterwards with Seaton's Movable Column, at the battle of Gungaree, where he was left in command of his regiment. In 1857 he commanded the cavalry in the action of the Puttialla, and was especially mentioned by Sir Thomas Seaton in his despatches. He was present at the relief of Bareilly, and through all the operations in Oude, serving as well under Brigadier Showers in Central India in pursuit of Tantia Topee. In 1873 he accompanied Sir Garnet Wolseley to the Gold Coast, and organised a native regiment, which he commanded throughout the Ashanti war, forming the advance guard of the army. For his successful management he was appointed Lieutenant-Colonel and C.B. He was again with Sir Garnet Wolseley in South Africa, where he commanded the forces in the operations against Sekukuni, for which he was made a K.C.M.G., and an Aide-de-Camp to the Queen. He commanded a brigade of cavalry in the Egyptian war of 1882, and was present at Kassassin, Tel-el-Kebir, and the capture of Cairo, for which he received a K.C.B. and the second class of the Medjidieh. In 1886 he was Inspecting Officer of Auxiliary Cavalry; from 1886 to 1889 Commander at Shorncliffe; and from 1890 to 1895 he commanded the cavalry brigade at Aldershot. From 1895 to 1898 he was in command of the North-West District, and in 1898 was appointed to the command of the Southern District. Address: Government House, Broughton, Chester.

RUSSELL, Lord, of Killowen, The Right Hon. Charles, Lord Chief-Justice of England, G.C.M.G., Q.C., LL.D. of the Universities of Dublin, Edinburgh, and Cambridge, and D.L. for Surrey, was born at Newry on Nov. 10, 1832, and is the son of Mr. Arthur Russell, of Newry, and Seafeld House, Rosstrevor. He was educated at Trinity College, Dublin, and began his professional career by practising as a solicitor in Belfast; but, coming to England, he was called to the Bar at Lincoln's Inn in 1859, and became Q.C., and was elected Benchet of Lincoln's Inn in 1872. He entered Parliament in the Liberal interest as member for Dundalk,

which he represented from 1880 till 1885; and South Hackney, 1885-86, when he became Attorney-General in the Gladstone Administration, and was knighted. His powerful and eloquent speech before the Parnell Commission was one of the most masterly orations of modern times. He was again appointed Attorney-General in 1892. On taking office he gave up the old and well-used privilege of retaining his private practice, which had been a very large one, and had latterly brought him in an income of upwards of twenty-five thousand a year. In 1893 he was given the G.C.M.G. for his distinguished services as English counsel in connection with the United States Fisheries Arbitration in Paris. Both during this arbitration and on the third reading of the Home Rule Bill in the House of Commons he delivered very eloquent and powerful speeches; but he was not, on the whole, so successful as a Parliamentary speaker as at the Bar, though he was in constant request as an electioneering orator. On the death of Lord Bowen in 1894 he was appointed a Lord of Appeal in Ordinary, and a life-peerage was conferred on him. In July 1894 he was appointed Lord Chief-Justice of England in succession to the late Lord Coleridge. As a barrister Lord Russell was long without a rival in the English Law Courts. He was a sound lawyer, a masterly and often terrible cross-examiner, and a persuasive and weighty pleader before juries, especially in uphill or apparently hopeless cases. The list of celebrated causes in which he has been engaged is a very long one. He represented Mr. Clement Scott in his action against the late Mr. Sampson of the *Referee*. In the Chamberlain v. Barnwell case he secured enormous damages for the plaintiff. He appeared for the plaintiff also in Wilberforce v. Philips, in the famous Belt case, and in the once famous Convent case, Saurin v. Starr. In the Chetwynd and Durham Arbitration case he was one of the leading counsel, and he defended Mrs. Maybrick in the Maybrick murder case of August 1889. In 1889 he made his greatest forensic triumph during the Parnell Commission. Lord Russell is well known on the turf, and is himself an accomplished horseman. He is a Member of the Jockey Club. He married, in 1858, Ellen, daughter of Mr. Joseph Mulholland, M.P., of Belfast. Addresses: 12 Cromwell Houses, S.W.; Tadworth Court, Tadworth, Surrey; and Athenæum.

RUSSELL, Clark. See RUSSELL, WILLIAM CLARK.

RUSSELL, George William Erskine, son of Lord Charles James Fox

Russell, and grandson of John, 6th Duke of Bedford, was born Feb. 3, 1853, at 16 Mansfield Street, W., and educated at Harrow and University College, Oxford, where he was Scholar and Prizeman. He graduated in honours, B.A. 1876, M.A. 1880. He entered the Inner Temple, 1875, and was elected Liberal Member of Parliament for Aylesbury, 1880, and for North Beds., 1892. He was Parliamentary Secretary to the Local Government Board, 1883-85. He was elected an Alderman of the county of London for six years in 1889; and was Under-Secretary of State for India 1892-94, and Under-Secretary of State for the Home Department 1894-95. He is the author of a "Life of the Right Hon. W. E. Gladstone," in the series of the Queen's Prime Ministers, editor of the "Letters of Matthew Arnold," and many essays and lectures. He has been known in recent years as a leader of a section in the House of Commons styling themselves Liberal Forwards. Address: 18 Wilton Street, S.W.

RUSSELL, Henry Chamberlaine, C.M.G., B.A., F.R.S., F.R.A.S., F.R. Met. Soc., Government Astronomer of New South Wales, Vice-President of the Board of Technical Education, New South Wales, Fellow of the Senate of the University of Sydney, was born in 1836. He has done much for the promotion and study of science in New South Wales. He has been in charge of the Government Observatory since 1862, and Government Astronomer since 1863. He organised and led the N.S.W. Expedition to Cape Sidmouth in 1871; organised and sent out four parties to observe the Transit of Venus in 1874, and six parties in 1882, also three parties for the Transit of Mercury in 1881; and he originated and presided over the first Australasian Meteorological Conference, 1879. In 1890 he was made a C.M.G. He is the author of seventy-five Reports and Original Papers upon Astronomical, Meteorological, and Physical matters, published by the New South Wales Government in the Memoirs and Notices of the Royal Astronomical Society, London, and in the Journal of the Royal Society of New South Wales. He is the designer of several improved forms of self-recording Barographs, Thermographs, Pluviometers, Anemometers, Tide-gauges, Actinometers, &c., for use in his observatory. Amongst the above seventy-five papers are "Measures of Double Stars, and a list of 351 New Double Stars"; "Nebula surrounding Eta Argus"; "Measures of Coloured Clusters about Kappa Crucis"; "Measures of Alpha Centauri"; "The Great Southern Cross," 1880; "Meteorology and Climate of New South Wales"; "Tropical Rains";

"Rain Maps"; "Atmospheric Lines between D lines at Sydney," &c. In 1891 he published "Notes on the Rate of Growth of some Australian Trees." He married a Sydney lady, a daughter of Ambrose Foss, in 1861. Address: The Observatory, Sydney.

RUSSELL, Earl, John Francis Stanley, J.P., L.C.C., was born on Aug. 12, 1865, and is the son of the late Viscount Amberley, and Katherine, daughter of the 2nd Baron Stanley of Alderley. He succeeded his grandfather, the illustrious Lord John Russell, in 1878. He was educated at Winchester and Balliol College, Oxford, under Dr. Jowett. He is especially interested in social questions, and is a Progressive Alderman of the London County Council. He married, in 1890, Mabel, daughter of Sir Claude Scott, Bart. Address: Amberley Cottage, Maidenhead.

RUSSELL, Thomas Wallace, M.P. for South Tyrone, was born at Cupar-Fife, N.B., Feb. 28, 1841, is the son of David Russell, and was educated at the Madras Academy, Cupar-Fife. He unsuccessfully contested Preston as a Liberal in 1885, but was elected for South Tyrone in 1886, 1892, and 1895 as a Liberal Unionist. His energies were strongly directed, both in the House and in the country, against the Home Rule movement. He was appointed Parliamentary Secretary to the Local Government Board in 1895, and he was largely instrumental in forming the Land Acts Committee of 1894, from which there followed the Land Act of 1896. Mr. Russell has contributed numerous articles to magazines on the Irish Question and other matters. He is a J.P. for the county of Dublin. He married (2) Martha, daughter of the late Lieut.-Colonel Keown, of the 15th Hussars. Address: 99 Asthey Gardens, S.W.; and 102 and 103 St. Stephen's Green, Dublin.

RUSSELL, William Clark, known under his author's name of Clark Russell, was born at the Carlton House Hotel, Broadway, in the city of New York, on Feb. 24, 1844. His father was Mr. Henry Russell, the composer of "Cheer, Boys, Cheer," "There's a Good Time Coming, Boys," and many other compositions of a like kind. Mr. Clark Russell's mother was, prior to her marriage, Miss Lloyd, a connection of the poet Wordsworth, and the associate in her youth of Coleridge, Southey, Lamb, and others of that group. She died in 1887. Mr. Clark Russell was educated at Winchester and in France, and went to sea as a midshipman in the

Merchant Service at the age of thirteen and a half. He made several voyages to India, Australia, and China, but abandoned the sea after seven or eight years. He wrote a few novels under a *nom-de-plume*, and contributed to a few London periodicals. His first nautical novel, "John Holdsworth, Chief Mate," was published in 1874. The success of this book was great and immediate. It was followed by "The Wreck of the Grosvenor," which appears to have proved the most popular of his stories. In the "Grosvenor" he anticipated the efforts which have been made by Mr. Samuel Plimsoll to improve the dietary of the British merchant-seaman. "The Little Loo" followed the "Grosvenor," and then came in rapid succession "A Sailor's Sweetheart," "An Ocean Fre lance," "A Sea Queen," and "The Lady Maud." At this time Mr. Clark Russell was associated with the Newcastle *Daily Chronicle*, the property of Mr. Joseph Cowen, then the senior member for that city; but being asked by the proprietors of the London *Daily Telegraph* to join the staff of that journal, he bade his friend Mr. Joseph Cowen farewell and settled in London. There he wrote "Jack's Courtship" and "A Strange Voyage," at the same time contributing stories and leading articles to the *Daily Telegraph*. His health failed him, and he was obliged to take up his residence by the seaside. While at Ramsgate, in Kent, he continued to write for the *Daily Telegraph*, but with growing dislike of the work, as the exactations upon his time and imagination grew heavier and heavier in proportion as his publishers asked for fresh novels. At Ramsgate he wrote "The Golden Hope," "The Death Ship," "A Frozen Pirate," and "Marooned." In 1887 his connection with the *Daily Telegraph* ceased, but the greater bulk of his contributions to that paper have been published in volumes such as "Round the Galley Fire," "My Watch Below," "In the Middle Watch," "On the Fok'sle Head," &c. These works cover a very extensive range of seafaring interests. Since 1890 he has lived at Bath, where he has written "An Ocean Tragedy," "My Shipmate Louise," "Betwixt the Forelands," "The Romance of Jenny Harlowe," and other works. Among later novels are: "The Emigrant Ship," 1894; "List, ye Landsmen," "The Convict Ship," and "What Cheer?" both in 1895; "A Noble Haul," "The Last Entry," "The Two Captains," and "Nelson," 1897; "The Romance of a Midshipman," 1898, &c. Address: 9 Sydney Place, Bath.

RUSSELL, Sir William Howard, LL.D., D.L., was born March 28, 1821, at Lilyvale, co. Dublin, and is the son of John

Russell, of Lilyvale, and Mary, daughter of Captain John Kelly, of Castle Kelly, co. Dublin. He was educated principally at the Rev. Dr. Geoghegan's school in Hume Street, Dublin, and entered Trinity College in 1838. During the Repeal agitation he was engaged to describe the monster meetings for the *Times*, and shortly afterwards accepted an engagement on the staff of that paper. In 1846 he entered the Middle Temple, and was called to the Bar as a member of the Inn in 1850. In 1850 he visited Schleswig-Holstein during the war, and was present at the battle of Idsted. In February 1854 he was despatched as Special Correspondent of the *Times* with the advance guard of the British expedition to the East, on the declaration of war with Russia, and from Malta he proceeded with the Light Division to Gallipoli, thence to Scutari, and so on to Bulgaria, drifting finally to the Crimea, where he remained from the landing at Old Fort on Nov. 14, 1854, till the final armistice and the evacuation of the Chersonese by the Allied Armies in 1856. He was present at the battles of the Alma, Balaclava, and Inkerman; witnessed the bombardment of Sebastopol and the two assaults on the Redan; accompanied the expeditions to Kertch and to Kinburn; and saw the final attack on Sept. 8, 1855, and the fall of Sebastopol. The privations and sufferings of the army during the terrible winter, to which the troops were exposed in open trenches, were made known by his letters to the *Times*, and excited such indignation against the Ministry that they were turned out of office, and were succeeded by a Government pledged to reform our military organisation. In 1856 he went to Moscow to attend the coronation of the Czar, and revisited the Crimea, and, in the year following, on the outbreak of the mutiny in India, he set out for Sir Colin Campbell's head-quarters at Cawnpore; was present at the taking of Lucknow, and in the campaigns in Oudh, Robilkund, &c., for which he received the Indian War Medal with the Lucknow Clasp. In 1858 he returned to England and established the *Army and Navy Gazette*, of which he is now editor and chief proprietor, having previously remained for a short time with the French army in Italy. When civil war appeared imminent in the United States in 1861 he proceeded to Washington, made a tour in the South, and joined M'Dowell's army on the day of the first battle of Bull Run, which ended in the rout of the Federals. In 1862 he returned to England, and, after an unsuccessful attempt to reach the lines at Döppel in 1864, he remained at home till the outbreak of the war between Prussia and Austria in 1866, when he repaired to the

headquarters of Von Benedek, and witnessed the disastrous battle of Königgratz. A few years of peaceful life and of travel on the Continent and in the East followed; but in 1870, when war was declared by Napoleon III. against the King of Prussia and his allies, Mr. Russell was attached to the head-quarters of the Crown Prince, which he joined at Wörth. He was present at the battle of Sedan, and he accompanied the German army on their march through France, remaining with the head-quarters during the siege till the capitulation of Paris, when he entered the city with the Crown Prince's staff. In 1875 he was named Honorary Private Secretary to the Prince of Wales on his expedition to India, and he previously accompanied his Royal Highness during his visits to Egypt, Turkey, the Crimea, &c. When the Zulu troubles were at their height, and Lord Wolseley was sent out to save the situation, Sir William (then Mr.) Russell accompanied him, and was at the taking of Sekukuni's stronghold; and he subsequently was in Egypt during the operations under the same general, which led to the overthrow of Arabi, to the re-establishment of the Khedive in Cairo, and to the British occupation of Egypt. He has published "Letters from the Crimea," 1855-56; "The British Expedition to the Crimea," "Diary in India," "The Sepoy Mutiny," "My Diary North and South, during the Civil War in America," "Canada: its Defences," "Rifle Clubs and Volunteer Corps," "The Adventures of Dr. Brady," "My Diary in the East with the Prince of Wales," "Hesperotheren: or Notes from the West," 1882, &c. He unsuccessfully contested Chelsea in the Conservative interest in 1869. He is a Knight of the Iron Cross, a Commander of the Legion of Honour, has the Turkish War Medal of 1854-56, the Indian War Medal, 1857-58, the South African War Medal, 1879; and the Medjidieh (third and fourth class), the Osmanieh (third and fourth class), the St. Sauveur of Greece, Chevalier of Franz Josef, the Redeemer of Greece, Portugal, &c. The honour of knighthood was conferred upon him in 1895. He married (1), in 1846, Mary, daughter of Peter Burrowes, Esq., of Warren House, co. Dublin; and (2), in 1884, the Countess A. Malvezzi. Address: 37 Queen's Mansions, Victoria Street, S.W.

RUSSIA, Emperor of. See NICHOLAS II., CZAR OF ALL THE RUSSIAS.

RUTHERFORD, The Rev. William Gunion, LL.D., Head-Master of Westminster School, born on July 17, 1853, is the second son of the Rev. Robert Rutherford, Newlands, Peeblesshire, and was

educated at St. Andrews University, and at Balliol College, Oxford, where he graduated M.A. in 1876. He also received the degree of LL.D. from St. Andrews in 1884. He was ordained Deacon by the Archbishop of Canterbury in 1883, and Priest by the Bishop of London in 1885. He held a Classical Mastership at St. Paul's School from 1876 to 1883, when he was appointed, without examination, Fellow and Prælector of University College, Oxford. In the same year he became Head-Master of Westminster School. In 1881 he published "The New Phrynichus, a revised Text of the Ecloga of the Grammarian Phrynichus, with Introductions, and a Commentary"; in 1883 an edition of "The Fables of Babrius, with Introductory Dissertations, Critical Notes, Commentary, and Lexicon"; and in 1889 "The Fourth Book of Thucydides, a revision of the Text illustrating the Principal Causes of Corruption in the manuscripts of this author"; "Scholia Aristophanica," in 3 vols., vols. i. and ii. published in 1896. The introductory chapters of "The New Phrynichus" have been translated into German by Dr. A. Funck, at the instance of the late Prof. Georg Curtius of Leipzig, under the title of "Zwei Abhandlungen zur Geschichte des Atticismus," Leipzig, 1883, and into French by Prof. Kehlhoff with the title "Contribution à l'étude du dialecte attique." Besides these larger works, Mr. Rutherford has published several smaller books, of which the most important are "A First Greek Grammar," which has gone through many editions; "Lex Rex, or Short Digest on the Principal Relations between Latin, Greek, and Anglo-Saxon Sounds"; "Herondas, a first Recension," published in 1892. In the same year he was elected a member of the Athenæum by the committee in virtue of Rule 2. He married Constance, youngest daughter of J. T. Renton, of Bradstone Brook, Shalford, in 1884. Address: 19 Dean's Yard, S.W.; Little Hallands, Bishopstone, Lewes; and Athenæum.

RUTLAND, Duke of, The Most Noble John James Robert Manners, K.G., G.C.B., P.C., LL.D., D.C.L., second son of the late John Henry, 5th Duke of Rutland, by the Lady Elizabeth Howard, fifth daughter of Frederick, 5th Earl of Carlisle, born at Belvoir Castle, Leicestershire, Dec. 13, 1818, was educated at Eton and Trinity College, Cambridge, where he graduated M.A. in 1839. In June 1841 he was, with Mr. Gladstone, returned member in the Conservative interest for the borough of Newark, but he did not present himself again to that constituency at the general election in August 1847. He was defeated in a contest for

Liverpool in the latter year, and in another contest for the City of London with Baron Rothschild in June 1849; but he was returned for Colchester in February 1850, and continued to represent that borough till March 1857, when he was elected for North Leicestershire. He made his maiden speech in February 1842, when he opposed the repeal of the Corn Laws, advocating, subsequently, the cultivation of diplomatic relations with the See of Rome, and of a better understanding with the Irish priesthood, a relaxation of the law of mortmain, and the passing of the Ten Hours Factories Act, and in many other matters showing that he held too broad opinions to act always with his party, though he opposed Sir R. Peel's free-import measures in 1845-46, and from that time identified himself completely with the Tory party. He was appointed First Commissioner of the Office of Works with a seat in the Cabinet, and sworn a Privy Councillor in Lord Derby's first administration in 1852, held the same post in Lord Derby's second administration in 1858-59, and was re-appointed in Lord Derby's third administration, 1866-67. On the return of the Conservatives to office in February 1874, he was appointed Postmaster-General, and he held that post until the Conservatives went out of office in April 1880, when he was created a G.C.B. In 1885 he was returned for the new Melton Division of Leicestershire, and was Postmaster-General in Lord Salisbury's Government. The honorary degree of D.C.L. was conferred upon him by the University of Oxford in 1876. Previously, in 1862, the degree of LL.D. of Cambridge University was conferred on him. His Grace is a staunch defender of the rights of the Church, a supporter of the agricultural interest, and acted for many years as Chairman of the Tithe Redemption Trust. His first literary performance was "England's Trust; and other Poems," 1841. Appended to this volume are some minor pieces, headed "Memorials of other Lands," commemorative of his Grace's excursion, in company with his elder brother, then Marquis of Granby (the late Duke of Rutland), through France, Spain, Switzerland, and Italy. His other works are: "A Plea for National Holy-Days," 1843; "Notes of an Irish Tour," 1849; "Notes of a Cruise in Scotch Waters on board the Duke of Rutland's Yacht, *Resolution*, in 1848," Lond., 1850, a handsome folio volume embellished with sketches by John Christian Schetky, Esq.; "English Ballads and other Poems," 1850; "The Factories Bill, a Speech," 1850; "The Church of England in the Colonies," a Lecture, 1851; "Speech on the Abolition of Church Rates," 1856. In 1886 he was appointed Chancellor of the Duchy of Lan-

caster in Lord Salisbury's second administration. He succeeded to the dukedom on the death of his brother, Mar. 2, 1888. His Grace married first, in 1851, Catharine Louisa Georgiana, daughter of the late Colonel Marlay, C.B. (she died April 7, 1854); and secondly, in 1862, Janetia, eldest daughter of Thomas Hughlan, Esq. of Airds, Galloway. Addresses: Belvoir Castle; 3 Cambridge Gate, Regent's Park, N.W., &c.

RYAN, W. P., was born in the co. Tipperary, Oct. 27, 1867; trained for the teaching profession, but left it for journalism as a step towards literature, and came to London in 1886. He was on the London staff of the *National Press*; was subsequently sub-editor of the *Catholic Times*; was one of the founders of the Irish Literary Society; and assisted Sir Charles Gavan Duffy in his Irish literary schemes. He joined the *Sun* staff under Mr. T. P. O'Connor in 1894, became its literary editor in 1896, and still holds the position. He was also on the literary staff of the *Weekly Sun* under Mr. O'Connor. He has published "The Heart of Tipperary: a Romance of the Land League," 1893; "The Irish Literary Revival," 1894; "Starlight through the Thatch," a novel over the pseudonym of "Kevin Kennedy," 1895; "Literary London: its Lights and Comedies," 1898. A passage in the last-mentioned work led to an action for libel being brought against him by Miss Marie Corelli, which was only averted on Mr. Ryan's apologising for his critical remarks. He has also written various poems. Addresses: *Sun* Buildings, Tudor Street, London; and Irish Literary Society, 8 Adelphi Terrace, Strand, London.

RYLE, Rev. Professor Herbert Edward, D.D., was born in Onslow Square, London, May 25, 1856, and is the second son of the Right Rev. John Charles Ryle, Lord Bishop of Liverpool. He was educated under the Rev. R. Wace (Wadhurst, Sussex), 1866-68, and at Eton (1868-75), being elected on to the Foundation of Eton College in 1869, and obtaining the Newcastle Scholarship in 1875, his tutor being E. C. Austen Leigh, Esq. In the same year he was elected to a Classical Scholarship at King's College, Cambridge; B.A. in 1879 (obliged to take an *agrotat* degree in consequence of an accident at football); First Class in the Theological Tripos, 1881. University distinctions: Carus Prizeman (Undergraduates), 1875; (Bachelor), 1879; Winchester Reading Prize, 1878; Crosse Scholar, 1880; Hebrew Evans and Scholefield Prizes, 1881. He was elected Fellow of King's College, Cambridge, in 1881; took his M.A. degree

in 1882, and the B.D. in 1892. He was ordained Deacon in 1882; Priest in 1883. He was Divinity Lecturer at Emmanuel College, Cambridge, 1881-84, and at King's College, 1882-86. In 1886 he was made Principal of St. David's College, Lampeter, South Wales, where he remained till 1888, having been elected to the Hulsean Professorship of Divinity in the University of Cambridge, in November 1887, which he holds at the present time. He was elected a Professorial Fellow of King's College, Cambridge, in 1888. He was Examining Chaplain to the late Bishop of St. Asaph, 1887-89, and is now to the Lord Bishop of Ripon. He was Examiner for the Cambridge Theological Tripos in 1884, 1886, 1887, 1889, 1892, and was Select Preacher before the University of Cambridge in 1889 and 1892. In 1896 he became President of Queen's College, Cambridge. He is an Hon. Chaplain to the Queen. He has published the following works: "The Psalms of Solomon," edited in conjunction with M. R. James, Cambridge University Press, 1891; "The Canon of the Old Testament," an essay on the gradual growth and formation of the Hebrew Canon of Scripture, 1892; "The Early Narratives of Genesis," 1892; and a "Commentary on Ezra and Nehemiah," Cambridge Bible for Schools Series, 1893. He is also a contributor to Smith's "Dictionary of the Bible," 2nd edit., and to the "Cambridge Companion to the Bible," 1893. Professor Ryle was married, in 1883, to Nea Hewish, only daughter of Major-Gen. G. Hewish-Adams (late Royal Irish Rifles), and has issue living Edward Hewish and Roger John. Address: The Lodge, Queen's College, Cambridge.

RYLE, The Right Rev. John Charles, D.D., Bishop of Liverpool, eldest son of the late John Ryle, Esq., M.P., born near Macclesfield on May 16, 1816, educated at Eton and Christ Church, Oxford, where he graduated B.A. in 1836, was Craven University Scholar, and took a first class in classical honours. Having been admitted into orders in 1841, he was curate at Exbury, in the New Forest; was appointed Rector of St. Thomas's, Winchester, in 1843; Rector of Helmingham, Suffolk, in 1844; Vicar of Stradbroke, Suffolk, in 1861; Rural Dean of Hoxne in 1869; and an honorary Canon of Norwich in 1871. He was nominated to the Deanery of Salisbury by Lord Beaconsfield in March 1880, and soon afterwards the same statesman appointed him Bishop of Liverpool. He was consecrated in York Minster, June 11, 1880. He is the author of "Expository Thoughts on the Gospels," in 7 vols., published in 1856-59; of "Plain Speaking, First and Second Series," of

"Hymns for the Church on Earth," and "Spiritual Songs, First and Second Series," in 1861; of "Christian Leaders a Hundred Years Ago," "Coming Events and Present Duties," "Bishops and Clergy of other Days," in 1869; of "Church Reform Papers," in 1870; "Principles for Churchmen," &c., and of above two hundred tracts on religious subjects, many of which have been reprinted in French, German, Dutch, Portuguese, Italian, Russian, Hindustani, Chinese, Norwegian, Swedish, and Danish. Dr. Ryle is one of the leaders of the Evangelical School. He married (1) a daughter of J. P. Plimptre, M.P.; (2) a daughter of J. Walker, of Crawfordton, Dumfriesshire; and (3) a daughter of Colonel Clowes, of Broughton Hall, Manchester. Addresses: The Palace, Liverpool; and Athenæum.

S

SACHS, Dr. Julius von, Privy Councillor, and Austrian Professor in Ordinary of Botany, was born at Breslau, Silesia, on Oct. 2, 1832, where he attended the Elisabethanum Gymnasium. In 1851 he went to Prague, Bohemia, as private assistant to the Physiologist Purkyně; in 1857 he was private lecturer on the Physiology of Plants at Prague; in 1859 at the Agricultural Academy at Tharandt, near Dresden: from 1861 to 1867 he was Professor of Botany at the Academy of Poppelsdorf, near Bonn, on the Rhine; from 1867 to 1868, Professor of Botany at Freiburg, Baden; from 1868 to 1890, Professor of Botany at Würzburg, Bavaria. He is Knight of the Royal Order of Merit of the Bavarian Crown and of St. Michael; as well as of the Royal Bavarian Order of Maximilian for Science and Art; Member of the Royal Academies of Sciences in Munich, Turin, and Amsterdam; of the Royal Society of London; and of the Royal Irish Academy at Dublin; of the Silesian Society for Home-culture; of the Senkenberg Society; Honorary Member of the Philosophical Society of Cambridge; of the Botanical Society of Edinburgh; of the American Academy of Arts and Sciences; of the Literary and Philosophical Society of Manchester; of the Pharmaceutical Society of Great Britain; of the Society of Natural Philosophy of Odessa; Foreign Member of the Linnean Society of London; of the Royal Botanical Society of Brussels; holder of the Sömmering Medal; Honorary Doctor of the Medical Faculty of Bonn, and of the Faculty of Physical Science at Bologna. He is the author of the following scientific works: "Experimental Physiology

of Plants," translated into Russian and French, in 1865; "Compendium of Botany," 4 editions, translated into Russian, French, and English, in 1868-74; "History of Botany," 1875, translated into English in 1890, by H. E. F. Garnsey; "Lectures on the Physiology of Plants," 1882 and 1887, translated into English; and "Gesammelte Abhandlungen über Pflanzen-Physiologie," with illustrations.

SACKVILLE, Lord, Lionel Sackville Sackville-West, G.C.M.G., J.P., born July 19, 1827, at Bourn Hall, Cambridgeshire, is the fourth son of George John, 5th Earl De La Warr, by his marriage with Elizabeth Sackville, daughter of John Frederick, 3rd Duke of Dorset. He was educated at home, was assistant précis writer to the Earl of Aberdeen, Secretary of State for Foreign Affairs in 1845; entered the diplomatic service in 1847; served as Attaché to her Majesty's Legations in Lisbon, Naples, Stuttgart, and Berlin, till 1858; as Secretary of Legation in Turin, Madrid, and Berlin; and Secretary of Embassy in Paris till 1872; was appointed Envoy Extraordinary and Minister Plenipotentiary to the Argentine Republic, 1873; transferred to Madrid, 1878; and to the United States, 1881. He negotiated, in conjunction with Sir James Hudson, the commercial treaty with Sardinia, 1863; represented H.M.'s Government and that of Denmark at the Conferences of Madrid on the affairs of Morocco, 1880; was Minister Plenipotentiary at the Conference in Washington on the affairs of Samoa, 1887; and negotiated, in conjunction with Mr. Joseph Chamberlain and Sir Charles Tupper, the Fisheries Treaty of Washington, 1888. In the same year he succeeded his brother in his present title. He received his passports from the United States Government in 1889, and returned to England. He now resides at the historic Knole House, which he has again opened to the public on certain days, and where he entertained the Prince of Wales in the summer of 1898. Address: Knole, Sevenoaks, Kent.

SADLER, Michael Ernest, Director of Special Inquiries and Reports in the Education Department, was born at Barnsley on July 3, 1861, and is the eldest son of M. T. Sadler, M.D. He was educated at Rugby and at Trinity College, Oxford, of which he was sometime Senior Scholar. He took a first class in Classical Moderations in 1882, and a first class in Lit. Hum. in 1884, and was a well-known President of the Oxford Union Society in 1882. Becoming interested in the then nascent University Extension Movement, he was appointed Secretary to the Oxford

University Extension in 1885, and held that post, with conspicuous administrative ability, for ten years. From 1886 to 1895 he was Steward of Christ Church, a post at one time held by the Right Hon. Arthur Acland; and from 1890 to 1895 he was Student of Christ Church. In 1893 he was appointed a Member of the Royal Commission on Secondary Education. A few years ago Government instituted a new office, the Directorship of Special Inquiries and Reports in the Education Department, and Mr. Sadler was appointed thereto. He has issued three volumes of Special Reports, written by himself and his assistants, which together will probably go far to revolutionise the ideas of intelligent Englishmen upon education. The first volume, issued in 1897, dealt, among other matters, with the elementary educational systems of Ireland, Belgium, Denmark, and Prussia; and also with the Higher Primary Schools of France, and the Realschulen of Berlin. He is a Member of the Education sub-committee of the Royal Commission for the Paris Exhibition of 1900. Jointly with an old Oxford friend, Mr. Mackinder, of Christ Church, he has written on "University Extension" in all its bearings. He married, in 1885, a daughter of Charles Harvey. Addresses: Eastwood, Weybridge; and Athenæum.

SADLER, Walter Dendy, was born at Dorking, on May 12, 1854, and is the fifth son of John Dendy Sadler, solicitor, of Horsham. He was educated at Horsham, and studied at Heatherley's, in London, for six months in 1871, and at Düsseldorf, under J. M. Burfield and William Simmler. He returned to London in 1877, and has exhibited at the Royal Academy since 1873. His subjects are those thoroughly English types—the post-boys, squires, farmers, and ruddy-cheeked country tradesmen of the beginning of the century—of whom quaint survivals must have been familiar to him in the Surrey towns and villages during the seventies. Among his principal works we may mention "Friday," "It's always the Largest Fish that is Lost," "The Old Squire and the Young Squire," "Old and Crusted," "Uninvited Guests," "Dummy Whist," and of late years, at the Royal Academy, "Toddy at the 'Cheshire Cheese,'" and "An Offer of Marriage," 1895; "The End of the Skein," "Time and the Flowers," and "Married," 1896; "Nearly Done," and "For Weal or Woe," 1897; "The Young and the Old," and "A Little Mortgage," 1898; "The Christening," and "The Plaintiff and the Defendant," 1899. Address: Hemingford Grey, St. Ives, Hants.

SAGASTA, Praxedes Mateo, a Spanish statesman, was born at Torrecilla de Cameros, July 21, 1827. He studied in the School of Engineers in Madrid, practised his profession at Valladolid and Zamora, and was elected by the latter town to the Constituent Cortes of 1854. He took part in the insurrection of 1856, and was obliged to seek refuge in France. On the amnesty being proclaimed he returned to Spain, and became a Professor in the School of Engineers in Madrid. He was also the editor of *La Iberia*, the principal organ of the Progressist party. After the unsuccessful insurrection of June 1856, he was again under the necessity of seeking an asylum in France, and he did not return to Spain until after the fall of Queen Isabella II. Appointed Minister of the Interior in the first Cabinet formed by General Prim, he gradually adopted more and more the views of that statesman and of the Conservative party, and completely broke off his relations with his old friend Zorilla. He was consequently exposed to bitter attacks from the Republican minority in the Cortes. Appointed Minister of State in January 1870, he ordered several towns, including Barcelona, to be placed in a state of siege, declared himself in favour of the monarchy, and proposed, on Dec. 17, 1870, the dissolution of the Chamber, after the king had taken the oath. He continued to be Minister of State and Minister of the Interior in the first Cabinet of King Amadeus, and during that monarch's brief reign he took part in several ministerial combinations, either as a Member or as President of the Council. Under the Presidency of Marshal Serrano, in 1874, he was Minister for Foreign Affairs (Jan. 4), Minister of the Interior (May 13), and President of the Council (Aug. 4). After the *coup d'état* re-establishing the monarchy, he withdrew for a time from public life. In June 1875 he gave in his adherence to the cause of Alfonso XII., and endeavoured to form a Liberal Constitutional party. Subsequently he joined the Opposition, and attacked the administrations formed by Martínez Campos and Cánovas, 1877-79. When a new Liberal party was formed in 1880 Señor Sagasta gave in his adhesion to it. The Conservative Cabinet of Señor Cánovas del Castillo was overthrown early in the year 1881, and a coalition between Señor Sagasta and General Martínez Campos came into power. Sagasta's ministry remained in office till Oct. 1883, when it was superseded by a Cabinet formed from the Dynastic Left. This, however, was short-lived, and was followed by a return of the Conservatives to power. On the death of Alfonso XII., Nov. 23, 1885, Señor Sagasta,

at the request of the Queen Regent, again became the head of the Government; but, in consequence of a crisis, he re-formed the Cabinet in 1888, and gave to his policy a more markedly democratic character. Among the acts of his ministry may be mentioned the passing of the Anglo-Spanish commercial treaty. After fresh ministerial crises, Señor Sagasta was again commissioned to form a new ministry in January 1890, but in the July following, after violent scenes in the Chamber, he was obliged to retire, and was replaced by Cánovas del Castillo, whose Cabinet remained in power till the elections of March 1893, when Sagasta returned to office as President of the Council and Foreign Minister. He relinquished the latter post, however, on the assembling of the Cortes, in order to devote himself entirely to a general supervision of affairs, 5th April 1893. A Cabinet crisis occurred on March 8, 1894, the ministry resigned, and Señor Sagasta was again requested to form a Cabinet, which came into power, met with constant opposition, and resigned office on October 31. A new ministry was formed a few days afterwards, and Señor Sagasta again became Premier, five of his former ministers resuming office under him. In March 1895 occurred an extraordinary incident, which resulted in the resignation of Sagasta's ministry. A number of army officers, irritated at their conduct being criticised in certain of the Madrid papers, attacked and wrecked the offices of the *Resumen* and *Globo*. The editors naturally claimed the protection of the Government, which was granted, and the officers in question were strongly guarded by the police. When the subject was discussed in the Chamber on the following day (March 15, 1895), the reply of the War Minister, General Lopez Dominguez, was regarded as practically hacking up the officers in their illegal conduct. The Press representatives left the House in a body, and the ministry subsequently resigned on the War Minister insisting that the charge of libel against the two newspapers which had attacked the officers should be tried before a court-martial. Previous to the resignation of the Cabinet, a deputation of officers waited upon Señor Sagasta to require the suppression of the *Resumen*. Sagasta met this insolent demand with a flat refusal, and confined to barracks all the officers concerned, while some were court-martialled. The succeeding Premier, the ill-fated Señor Cánovas del Castillo, on assuming office, stated that the new Government had effected no compromise with the military, but were counting on the loyal support of Sagasta and his followers, in order to legalise the strained

situation. In July 1897 Sagasta issued a manifesto to the nation, severely criticising the policy of the Government in regard to Cuba, and stated that the Liberal policy was to send out to Cuba a capable general, whose mission should be limited to suppressing the insurrection, while a civilian should be appointed to conciliate the conflicting elements in the island. In alluding to the Philippines, the manifesto insisted upon the necessity of breaking the influence of the monks and missionaries, and preventing their interference outside the sphere of their religious duties. In the previous month, owing to a Parliamentary dead-lock, the Government had tendered their resignations, which the Queen-Regent (*q.v.*), after some delay, refused to accept. However, the ministry came to a sudden end on the cruel assassination of Señor Cánovas by an anarchist, on the first Sunday in August 1897. The Premier *pro tempore*, General Azcarra, resigned in the following month, stunned by the receipt of the famous Woodford note, and Sagasta was sent for by telegraph. He resumed office at once, and at the first meeting of the Cabinet indicated, in plain terms, his dissatisfaction at the course of events in Cuba, and affirmed the importance of a report on the financial position, and details of the campaign which General Weyler was conducting. The Premier also said that he supposed Weyler would tender his resignation, "but, if he did not, he would be recalled." This step was taken, and General Weyler was superseded by Marshal Blanco. Sagasta attempted to redeem his promise of granting autonomy to the Cubans, but their leaders, emboldened doubtless by the critical internal state of Spain, demanded complete independence. It is impossible to enter here upon the long history of the failure of Sagasta's policy of moderation, and the consequent imbróglio with the United States. Sagasta came to his country's aid at a time when her fortunes touched their lowest point, and his statesmanship saved a nation. He averted crisis after crisis, soothed internal dissensions, allayed public anxiety, skilfully circumvented a hopeless war, organised an almost bankrupt treasury, and restored, in a measure, the national confidence. He is still engaged on these great tasks.

ST. ALBANS, Duke of, Charles Victor Albert Aubrey de Vere Beauclerk, Hereditary Grand Falconer of England, and Hereditary Registrar of the Court of Chancery, was born on March 26, 1870, and is the eldest son of the 10th Duke, whom he succeeded in 1898, and Sybil Mary, daughter of Lieut.-General the Hon. Charles Grey, and grand-

daughter of the 2nd Earl Grey. He was at one time in the Lothian Militia, and, on succeeding to his dukedom, was a Lieutenant in the Notts Yeomanry. Addresses: 13 Grosvenor Crescent, S.W.; and Bestwood Lodge, Notts.

ST. ALBANS, Bishop of. See FESTING, THE RIGHT REV. JOHN WOGAN.

ST. ANDREWS, Bishop of. [See WILKINSON, THE RIGHT REV. GEORGE HOWARD.

ST. ASAPH, Bishop of. See EDWARDS, THE RIGHT REV. ALFRED GEORGE.

ST. DAVID'S, Bishop of. See OWEN, THE RIGHT REV. JOHN.

ST. GAUDENS, Augustus, American sculptor, was born in Dublin, March 1, 1848. At the age of six months he was taken to New York City, which has since been his home. He began to draw at Cooper Union in 1861, and in 1865-66 was a student at the National Academy of Design. From 1867 to 1870 he attended the École des Beaux-Arts at Paris. Thence he went to Rome, where in 1871 he produced his first figure, "Hiawatha." He returned to New York in 1872, and opened a studio. His most important works are: "The Puritan"; "Adoration of the Cross by Angels," a bas-relief in St. Thomas's Church, New York; statues of Admiral Farragut (1880) in New York; Robert R. Randall (1884) at Sailors' Snug Harbour, Staten Island, New York; Abraham Lincoln (1887) in Chicago; and the Shaw Memorial, unveiled in Boston in 1897; and portrait busts of W. M. Evarts (1872-73), T. D. Woolsey (1876), the late General Sherman (1888); and many other busts and statues. Early in 1898 he removed his studio to Paris.

ST. JOHN, Frederick Robert, British Minister at Bern, is the fourth son of the late Hon. Ferdinand St. John, and entered the diplomatic service in 1855 as Private Secretary to the Marquis of Normanby at Florence. He was an Attaché at Pekin (1861), the Hague (1865), Constantinople (1866), and Vienna (1868). He was promoted to be Secretary of Legation at Buenos Ayres (1872), transferred to Rio de Janeiro (1877), and Constantinople in 1879. In 1881 he became Minister to the Republics of Central America, in 1884 he was transferred to Colombia, and later in the same year to Venezuela, which he left in March 1887, diplomatic relations having been broken off, owing to the dispute with British Guiana as to the

boundary. In 1888 he was promoted to be Minister to Serbia, and was transferred to his present post in 1893.

ST. JOHN, Sir Spenser, G.C.M.G., third son of the late Mr. James Augustus St. John, was born in London, Dec. 22, 1825. After receiving a careful education, he began to turn his attention towards the East, and having applied himself diligently to the study of the Malay language, was in 1848 appointed secretary to Sir James Brooke. He resided in Borneo several years as H.M. Consul-General, and received in 1861 the appointment of Chargé d'Affaires to the Republic of Hayti. On returning to this country in 1862, he published an account of his Eastern residence and travels, entitled "Life in the Forests of the Far East." Early in 1863 he left England for the West Indies, and some years later was promoted to the post of Minister Resident and Consul-General in Hayti. About the same time he was accredited also as Chargé d'Affaires to the Dominican Republic. In 1874 he was appointed Minister Resident and Consul-General at Lima, Peru, and in 1875 he proceeded on a special mission to Bolivia. He was created a K.C.M.G. in 1881 for services rendered during the war between Peru and Chili, and a G.C.M.G. in 1894. In May 1883 he was sent on a special mission to Mexico, to negotiate for the resumption of diplomatic relations with that country; and was appointed Envoy Extraordinary and Minister Plenipotentiary at Mexico, Nov. 28, 1884, and was transferred to Stockholm, July 1, 1893. Sir Spenser St. John, who is a Fellow of the Royal Geographical Society, published in 1879 "The Life of Sir James Brooke, Rajah of Sarawak," and in 1885, "The Black Republic," an account of Hayti. Address: Athenæum.

ST. JOHN - BRENON, Edward, F.S.A., F.R.G.S., journalist, the eldest son of the Rev. William Brenon, M.A., was born in Dublin, Feb. 21, 1847, and educated at the High School and Trinity College in that city. In 1866 he published his first volume of poems, entitled "Bianca, the Flower-girl of Bologna." In 1869 followed "Ambrosia Amoris," and a few years afterwards, in rapid succession, "Two Gallian Laments," "The Witch of Nemi," and "The Tribune Reflects." Mr. St. John-Brenon has on several occasions essayed unsuccessfully to enter Parliament.

ST. LÉON, Madame, née Cerito, Francesca, called Fanny, a celebrated dancer, born in Naples, March 11, 1821, is the daughter of an old soldier of the

Empire. While quite a child she was distinguished for great natural grace and vivacity. She made her first appearance in 1835 at the San Carlo Theatre, in a ballet called "The Horoscope," and created great enthusiasm, and afterwards danced at the principal theatres of Italy. She was in Vienna for two years, and was a favourite every season from 1840 to 1845, in London, where she danced the famous *pas de quatre* with Taglioni, Carlotta Grisi, and Lucille Grahn. About this time she was married to a distinguished dancer and violinist, M. A. St. Léon, from whom she was separated in 1850. M^{me}. Cerito, who was called the "Fourth Grace," composed, jointly with M. Théophile Gautier, the "Gipsy," "Gemma," and other ballets. She is now residing in Paris.

SAINT-SAËNS, Charles Camille, musical composer, was born in Paris, Oct. 9, 1835. Having lost his father, he was brought up by his mother and a great-aunt, who taught him the elements of music. At seven he began to study the piano with Stamaty, and afterwards had lessons in harmony from Maleden. In 1847 he entered Benoist's class at the Conservatoire, obtained the second organ prize in 1849, and the first in 1851. At the age of seventeen he composed his first symphony, which was performed with success by the Société de Sainte Cécile. In 1853 he became organist of the church of St. Merri. In 1858 he was appointed organist at the Madeleine, and distinguished himself as much by his talent for improvisation as by his execution. Shortly afterwards he occupied the post of Piano-forte Professor at Niedermeyer's Ecole de Musique Religieuse. For his cantata, "Les Noces de Prométhée," he gained the prize awarded by the International Exhibition of 1867. "La Princesse Jaune" was produced at the Opéra Comique, June 12, 1872, and "Le Timbale d'Argent," at the Théâtre Lyrique, Feb. 23, 1877. Neither of these operas met with much success, and M. Saint-Saëns produced his next work, "Samson et Delilah," a sacred drama, at Weimar, in December 1877, and "Étienne Marcel," an opera, at Lyons, Feb. 8, 1879. The printed catalogue of his works includes sixty-four numbered, besides many unnumbered, pieces. He visited England in 1871, and played at the Musical Union. In 1874 and 1879 he took part in the Philharmonic Concerts, and on Dec. 6, 1879, he conducted his "Rouet d'Omphale" at the Crystal Palace. He produced at the great Opéra of Paris "Henry VIII." in 1883, and "Ascanio" in 1890. "Samson et Delilah" was produced at the great Opéra of Paris, Nov. 23, 1892, and "Phryné" at the Opéra Comique, May

1893. M. Saint-Saëns was elected an LL.D. of Cambridge University, June 1893. "Chœurs d'Antigone" was produced at the Comédie Française, November 1893. In 1886 he conducted his last great symphony in C minor in the Philharmonic Concerts (first performance). In addition to his other claims to distinction, M. Saint-Saëns is an able musical critic, and has contributed articles to *La Renaissance*, *L'Estafette*, *Le Voltaire*, *La France*, *La Nouvelle Revue*, and *L'Artiste*. He was elected a member of the Institute, Feb. 19, 1881. Saint-Saëns is one of the greatest living exponents on the piano and organ. His instrumental works, which are very numerous, show consummate mastery, if not genius. His faults are chiefly those of inequality and occasional eccentricity. He lives in Paris during the summer, but all the winter he goes on prolonged travels, no one knows where; and he has several times been thought to be dead. His Paris address is: 4 Place de la Madeleine.

SAINTSBURY, George Edward Bateman, Professor of Rhetoric and English Literature in Edinburgh University, was born at Southampton on Oct. 23, 1845, and educated at King's College School, London. In 1863 he was elected to a Post-Mastership at Merton College, Oxford, where he took the degree of B.A. in 1868, and that of M.A. in 1873. After holding for a few months a Mastership in the Manchester Grammar School, he became Senior Classical Master in Elizabeth College, Guernsey, and held that post from 1868 to 1874. In the latter year he was appointed to the Head-Mastership of the Elgin Educational Institute, which he resigned in 1876. For the following period of ten years Mr. Saintsbury was a frequent contributor to the London periodical press on literary and political subjects. In 1895 he was appointed Professor of Rhetoric and English Literature in Edinburgh University. He has also published "A Primer of French Literature," 1880; "Dryden," in the series of English Men of Letters, 1881; "French Lyrics," and "A Short History of French Literature," 1882; "Specimens of French Literature," 1883; "Specimens of English Prose Style," and "Marlborough," in the series of English Worthies, 1885; besides contributing to the "Encyclopædia Britannica," superintending a revised edition of Scott's "Dryden," editing several volumes of "Selections from French Authors" for the Clarendon Press, and furnishing prefaces to some reprints of English Classics. He has edited Herrick for the Aldine Poets (1893), and Fielding. He is editor of the

works of Balzac, and has published a version of that writer's "Chouans." Other works of his are: "Essays on English Literature, 1780-1860," 1890; "Essays on French Novelists," "Political Verse," and "Seventeenth Century Lyrics," 1891; an edition of Florio's "Montaigne," 1892; a translation of the "Heptameron," 1894. He is also editor of the "Pocket Library of English Literature." Among his most recent publications are: "Corrected Impressions, and Essays in English Literature," second series, 1895; "Nineteenth Century Literature," 1896; "The Flourishing of Romance and the Rise of Allegory," and "Sir Walter Scott," 1897; and "A Short History of English Literature," 1898. He is married to Emily, daughter of H. W. King. Address: Murrayfield House, Edinburgh.

SALAMAN, Charles Kensington, composer and professor of music, born in London, March 3, 1814, was educated by private tuition. He began the study of music at a very early age, and in 1824 was elected by competitive examination a student of the newly-founded Royal Academy of Music, but, instead of studying there, he became a pupil of Charles Neate and Dr. Crotch; made his first appearance as a composer and pianist in 1828, and entered the musical profession in 1831. In 1830 he composed the Jubilee Ode for the great Shakespearian Jubilee of that year, this choral and orchestral work being performed first at Stratford-on-Avon, and subsequently at the Old King's Theatre on May 29, 1830. Mr. Salaman began an annual series of grand orchestral concerts in 1833, in which were engaged all the famous artists of the day. In 1835 he, in conjunction with a few other musicians, introduced the chamber concert under the title *Concerti da Camera*. He was elected member of the Royal Society of Musicians in 1837. He is now the "Father" of the Society. Mr. Salaman has acquired considerable reputation as a pianist in England, Germany, and Italy, and was elected an honorary member of the Academy of St. Cecilia in Rome in 1846, and also of the Philharmonic Society of Rome. His first series of songs, in which is included Shelley's celebrated serenade, "I arise from Dreams of Thee," was composed in 1836, and published in 1838. He has since contributed largely to the repertory of English, Italian, French, and German vocal music, and to chamber pianoforte music. Besides about 100 musical settings of poems by the most eminent lyric poets of this country, Mr. Salaman has been the first composer to wed music to the odes of Horace, Catullus, and Anacreon in the original texts. He has also composed

part-songs, and anthems for the English Church service, and nearly 100 numbers of sacred part music in the Hebrew language, for the service of the Synagogue. His orchestral compositions have been few, the most recent being the "Grand Funeral March in memory of Victor Hugo," first performed at the Albert Hall. He has also won reputation as a writer and lecturer on musical subjects, being the first to trace the history of the pianoforte and its precursors. Mr. Salaman, who founded the first amateur choral society in London in 1849, was one of the founders of the Musical Society of London in 1858, and was for nearly ten years its honorary Secretary. He was also one of the founders in 1874 of the Musical Association for the "investigation and discussion of subjects connected with the art and science of music," and he performed the duties of honorary secretary until the end of 1877, when he retired as a Vice-President of the Association. In 1882 he published an important volume entitled "Jews as they are," which deals with the modern Jews from a social, political, and religious point of view, and seeks to vindicate the Jewish character from reproach and prejudice. Mr. Salaman has now retired from professional life, but, in his 85th year, he still continues to compose music, and to celebrate each birthday by the publication of new songs, his latest dating exactly seventy years after his earliest. Address: 24 Sutherland Avenue, W.

SALISBURY, Marquis of, The Most Hon. Robert Arthur Talbot Gascoigne-Cecil, P.C., K.G., D.C.L., LL.D., F.R.S., D.L., J.P., Prime Minister and Secretary of State for Foreign Affairs, is the eldest surviving son of the 2nd Marquis of Salisbury, by his first wife, the daughter and heir of Bamber Gascoigne, Esq., born at Hatfield in 1830, was educated at Eton and at Christ Church, Oxford, where he graduated, and was elected a Fellow of All Souls' College (1853). In 1853 he was elected M.P. for Stamford, and he represented that borough in the Conservative interest until his succession to the marquise on the death of his father, April 12, 1868. While in the Lower House he was known as Lord Robert Cecil, until the decease of his elder brother on June 14, 1865, when he assumed the courtesy title of Viscount Cranborne. His lordship took an active part in all public measures which affected the interests of the Established Church, and in the chief political questions of the day, and was a frequent contributor to the *Quarterly Review* and to other periodicals. In Lord Derby's third administration he was, in July 1866,

appointed Secretary of State for India, which post he resigned on account of a difference in opinion respecting the Reform Bill, March 2, 1867, when two other Cabinet ministers, viz., General Peel, War Secretary, and Lord Carnarvon, Colonial Secretary, also gave in their resignations. On Nov. 12, 1869, he was elected Chancellor of the University of Oxford, in succession to the late Earl of Derby. In 1871-72 he and Lord Cairns, as arbitrators, conducted a long investigation into the complicated affairs of the London, Chatham, and Dover Railway Company. His lordship was again appointed Secretary of State for India when Mr. Disraeli returned to office in February 1874. When, at the close of the war between Turkey and Servia, differences arose between the former Power and Russia, the Marquis of Salisbury was sent as Special Ambassador to the Sublime Porte, and he and Sir Henry Elliot acted as joint Minister Plenipotentiaries of Great Britain at the Conference of Constantinople. His lordship left England Nov. 20, 1876, and, *en route*, visited Paris, Berlin, Vienna, and Rome. The progress towards agreement made at the preliminary meetings held at the Russian Embassy in Constantinople were so satisfactory that the formal Conference, at which the joint proposals of the Powers were pressed upon the Porte, was opened on December 23. At the same time the new Constitution of the Ottoman Empire was formally promulgated by its author, Midhat Pasha. The Marquis of Salisbury really took the place of leader at the Conference, which held altogether seven plenary meetings. On Sunday, Jan. 14, 1877, he had an audience of the Sultan, at which Sir Arnold Kemball acted as interpreter, and pressed upon his Majesty the two points on which the two Powers intended to insist, informing him that if they were not accepted the Ambassadors would immediately leave Constantinople. These two proposals were, that there should be a mixed Turkish and International Commission of Supervision, and that the first appointment of the Governors should be ratified by the Powers. On Jan. 18 a special meeting of the Ottoman Grand Council was held, and about 140 Mussulmans and about sixty leading Christians were present. The proceedings lasted two hours, and were opened by Midhat Pasha. With one dissentient voice the Council were unanimous in insisting on the rejection of the proposals of the Powers. The Conference held its last sitting on January 20, and immediately afterwards Lord Salisbury left for England. On April 2, 1878, he was appointed Secretary of State for Foreign Affairs, in the room of the Earl

of Derby, resigned, and he at once wrote a memorable despatch, in which he clearly enunciated the policy of the Government with regard to the Eastern Question. He and the Earl of Beaconsfield soon afterwards were the representatives of Great Britain at the Congress of Berlin, and on their return to London they met with the most enthusiastic reception at Charing Cross, July 16, 1878. The Queen invested the Marquis of Salisbury with the Order of the Garter, July 30. On August 3 he and the Earl of Beaconsfield received the freedom of the City of London, and were afterwards entertained at a grand banquet at the Mansion House. He went out of office with his party after the defeat they sustained at the general election of April 1880. At a meeting of Conservative Peers held on May 9, 1881, after the death of Lord Beaconsfield, the Marquis of Salisbury was elected to lead the party in the House of Lords. Since then his career has been identified with that of the Conservative party. He opposed, but finally accepted, the Irish Land Act of 1881; he vigorously criticised Mr. Gladstone's Egyptian policy; he carried the rejection of the County Franchise Bill in 1884; he represented the Conservatives at the memorable conference between the opposing leaders, which led to the framing of the Redistribution Bill of 1885. On June 9 of that year Mr. Gladstone was beaten on a Budget vote, and resigned, and Lord Salisbury took office as Premier. The principal events of his short tenure of power were the annexation of Burma, and the re-opening of the Eastern Question by the revolution in Eastern Roumelia and the Servo-Bulgarian war; England supporting Prince Alexander by her "friendly" neutrality. After the general election of November 1885, Lord Salisbury was turned out on the address at the end of January. He vigorously opposed Mr. Gladstone's Home Rule policy, and after the second general election in 1886 he became once more Prime Minister. When the late Lord R. Churchill's resignation led to the reconstruction of the Cabinet, Lord Salisbury took the Foreign Office, in the place of Lord Iddesleigh, resigned. In May 1888 Lord Salisbury introduced a Bill into the House of Lords for the reform of that assembly, and the creation of life peers. The city of Glasgow presented him with its freedom on May 20, 1891, and in July the German Emperor and the Prince of Naples visited him, and were entertained at Hatfield. The general election of 1892 caused Lord Salisbury to go out of office, though his government did not actually resign till they had suffered defeat in the Commons. In February 1893 Lord Salisbury opened the

overhead electrical railway at Liverpool, and in the course of a speech delivered on the occasion, dwelt on the marvellous future of electricity. He is himself an electrician, and has applied it to practical purposes at Hatfield House and on his estates. He is also much interested in chemistry and the whole range of experimental physics, and spends much of his time in his private laboratory. On March 2, 1893, he presided at Oxford, as Chancellor of the University, over a meeting in aid of the building fund of the Radcliffe Infirmary, and spoke on that occasion on the necessity of giving increased attention to the study of medicine. In April, illness prevented him from visiting Belfast to attend great Unionist demonstrations, but he received a number of Ulster delegates at Hatfield, and himself travelled in Ulster in May. In August 1894 he presided over the meeting of the British Association at Oxford, and delivered a notable inaugural address, in which he dwelt on the necessary limitations to scientific speculation. In October 1895 the Liberal Government was defeated on the ammunition question in Committee on Army Estimates, and Lord Rosebery immediately resigned. Lord Salisbury was sent for, and duly formed an administration. His Cabinet, as ultimately constituted, consisted of nineteen members, of whom four were Liberal Unionists. The general election resulted in giving the Unionist Coalition a majority of 150, the strongest Government of modern times. During 1896 Lord Salisbury was much occupied by the conduct of our relations with America in regard to the Venezuelan Boundary dispute, and his conciliatory attitude has since been much appreciated at Washington. Indeed, the present cordial understanding between the two branches of the Anglo-Saxon race is, in great measure, due to Lord Salisbury's endeavours. The Armenian atrocities added very much to the burden of office. The action of Mr. Gladstone and others, who on every occasion vehemently denounced the Sultan, severely handicapped the Government in their efforts to obtain a peaceful solution of the problem. Isolated action on the part of England was strongly advocated, especially by a section of the press, but Lord Salisbury resolutely pursued a policy which enabled him to act in concert with the European Powers, since he held that a European war would follow the isolated intervention of Great Britain. During the Cretan crisis a similar attitude was followed, and Lord Salisbury's policy was very severely criticised. But the chaotic state of the island itself, and the conflicting interests of the Great Powers, rendered forcible action by any single Power very

difficult. Upon the outbreak of a conflict at Candia, in which British soldiers were killed and Christian inhabitants massacred, Admiral Noel, in command of the British squadron, bombarded the town, and afterwards sent an ultimatum to the Turkish Governor demanding the ringleaders. His request was speedily complied with, and several of them were executed. Later, a collective note signed by Great Britain, France, Russia, and Italy, demanding the withdrawal of the Turkish troops from the island, was presented to the Sultan, who surrendered unconditionally. The evacuation was completed in November, when Lord Salisbury urged upon the Russian Minister at Constantinople to formally propose Prince George of Greece as High Commissioner and Governor of Crete. The proposal met with universal approbation, and was ultimately accepted by the Sultan. Affairs in the Far East reached an acute stage during 1897-98. Li Hung Chang, the most influential personage in China, had been sent in 1896 to Europe as an Envoy Extraordinary, and after visiting the various capitals, came to London and received a hearty welcome. During his visit to this country, he went to Hatfield as the guest of Lord Salisbury, and endeavoured, in vain, to get his lordship to assent to an increase of the import duties levied upon British goods entering China. The refusal to accede to the wishes of Li Hung Chang was probably the cause of his hostility to England throughout the Chinese crisis, which was precipitated by the act of Germany in November 1897, when a force of German marines landed at Kiao Chau in order to exact reparation for the murder of two missionaries. They made their position secure, and shortly afterwards demanded, and obtained, the port and the territory around it on a lease of 99 years. Russia almost immediately after occupied Port Arthur and Talienwan in a similar manner, and Lord Salisbury had to face a considerable alteration in the balance of power in the Far East. As a set-off against the Russian aggression, Great Britain put forward a demand, which was granted, for the cession of the islands and waters of Wei-hai-wei for the same number of years and on the same terms as Port Arthur had been ceded to Russia. Throughout the Chinese crisis Lord Salisbury was subjected to a good deal of criticism from both sides of the House, and also in the press, for not pursuing a more active policy. But the lack of vigorous action was more apparent than real, as among the various concessions secured by his lordship were the opening of all inland waters to navigation to the vessels of all nations; the opening of various treaty

ports; the assurance that no portion of the province adjoining the Yangtse-Kiang Valley should be alienated to any other power. The Chinese Government also undertook that so long as British trade continued to exceed that of any other nation the Inspector-General of Maritime Customs should be a British subject. A convention was also signed by which the mainland opposite Hong Kong, and the island of Lan-tao and Mirs Bay, were secured to Great Britain, the area thus acquired covering about 200 square miles. The consecutive victories in the Soudan, and the capture of Khartoum by Lord Kitchener in 1898 brought into prominence our relations with France and her interests in Egypt, and when a French force was discovered posted at Fashoda a serious situation was created. In September Lord Salisbury pointed out to the French Foreign Office that all the territories which had been subject to the Khalifa had passed by right of conquest to the British and Egyptian Governments, and that H.M. Government did not consider this right open to discussion. Lord Salisbury also insisted upon the withdrawal of the French force as a condition precedent to negotiation on the matter. His lordship had the unanimous support of the country on the question of the evacuation of Fashoda by the French, and ultimately a satisfactory solution of the difficulty was arrived at by which the French Government relinquished all claims to the Nile Valley in consideration of concessions made to them in the Niger Hinterland. During 1898 Lord Salisbury was obliged for some weeks to give up his duties and go abroad on account of his health, which for some time had given his friends much anxiety. The duties of the Foreign Office devolved upon Mr. A. J. Balfour during his absence. The Marquis of Salisbury is a member of the Council of King's College, London; Lord Warden of the Cinque Ports, and Constable of Dover Castle; High Steward of Great Yarmouth; Elder Brother of Trinity House, and Hon. Colonel of the 4th Batt. of the Bedfordshire Regiment and of the Herts Militia. For many years he was Chairman of the Middlesex Sessions. Lord Salisbury's tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which her Majesty paid him by going in person to visit him at Hatfield. In 1857 he married Georgiana Caroline, daughter of Sir Edward Hall Alderson, Baron of the Exchequer, and niece of the celebrated Mrs. Opie. His eldest son is Viscount Cranborne (born 1861), M.P. for the Darwen Division of Lancashire from 1885 to 1892, and in 1893 returned for Rochester.

SALISBURY, Bishop of. See WORDSWORTH, THE RIGHT REV. JOHN.

SALMON, The Rev. George, D.D. Dublin, and Hon. Edin., D.C.L. Oxon., LL.D. Cantab., F.R.S., born in Dublin in 1819, was educated at Cork, and at Trinity College, Dublin, where he graduated as Senior Moderator in Mathematics in 1839. He was successively Scholar and Fellow of his College, and was elected Regius Professor of Divinity in the University of Dublin in 1866, which office he held until his appointment as Provost of the College in 1888. Besides various contributions to theological and mathematical periodicals, and in particular to Smith's "Dictionary of Christian Biography," he is the author of treatises on "Conic Sections," on "The Higher Plane Curves," on "The Geometry of Three Dimensions," and on "The Modern Higher Algebra," which have been translated into the principal European languages, and which have been honoured by the Royal and Copley Medals of the Royal Society, and the Conyngham Medal of the Royal Irish Academy. He has published four volumes of sermons, besides many single sermons. He has also published two series of lectures delivered in the Divinity School of the University, one forming an Introduction to the New Testament, and the other treating of the Infallibility of the Church. His most recent publication is "Thoughts on Textual Criticism of the New Testament," 1897. He is a member of the Royal Irish Academy, a Fellow of the Royal Societies of London and Edinburgh, and a corresponding member of the Institute of France, and of the Royal Academies of Sciences at Göttingen, Berlin, and Copenhagen, and a Fellow of the Academy dei Lincei, Rome. He was President of the Mathematical and Physical Science Section of the British Association at the meeting held in Dublin in August 1878. Address: Provost's House, Dublin.

SALMON, Admiral Sir Nowell, G.C.B., &c., was born in February 1835, and educated at Marlborough College. He is the son of the Rev. H. Salmon, Rector of Swarraton, by Emily, a daughter of Admiral Nowell. He entered the navy in May 1847, and was promoted lieutenant in January 1856. While holding that rank he served in H.M.S. *James Watt*, took part in the Russian war, and was awarded the Baltic medal. In the Indian Mutiny he gained his V.C. while attached to Captain Peel's "Shannon Brigade." At the second relief of Lucknow, during the assault of a strongly occupied fort, the sailors making the attack suffered severely from the extraordinary marksmanship of a sepoy,

who had posted himself on the wall well under cover. There appeared to be no means of checking this deadly fire except by climbing a big tree, which meant almost certain death to the climber. However, Lieutenant Salmon volunteered the attempt, and although his binocular glass (which he took in order that he might make sure of the right man) was shattered in his hand, he took aim and shot the sepooy dead. For his gallant services during the Indian Mutiny Sir Nowell was specially promoted to the rank of commander, and received the medal with the Lucknow clasp. He was promoted Captain in 1863, and created C.B. in 1875, being shortly afterwards appointed aide-de-camp to the Queen. Admiral Salmon was successively Commander-in-Chief at the Cape and China stations, and also at Portsmouth. He hoisted his flag in H.M.S. *Renown* as senior officer at the naval review held in June 1897. On that occasion the First Lord of the Admiralty, in expressing his appreciation of the arrangements made for the assembling of so vast a fleet, said, "The perfect moorings of that 25 miles of ships reflected the greatest credit upon Sir Nowell Salmon and his staff." He was created K.C.B. in 1887 and G.C.B. in 1897, and is the senior admiral on the active list. Address: Curdrige Grange, Botten, Hants.

SALMONÉ, Professor H. Anthony, who holds the Chair of Arabic at King's College, London, was born in Beyrout, Syria, on Sept. 1, 1860. He is of Cretan parentage, and derives his family name from Mount Salmoné in Crete, which is mentioned in the Acts of the Apostles. Our subject was brought to England when one year old, and later was sent to the Patriarchal College, Beyrout, in which city he afterwards entered St. Joseph's University, where he completed his education, and then returned to England. He early devoted his whole energy to philological and literary studies. His father, who died in 1894, was himself an accomplished linguist, and was able to read, write, and converse fluently in about a dozen languages. He soon found a number of friends amongst the most distinguished Orientalists and scholars in this country, and in 1883 was elected a member of the Royal Asiatic Society. During the same year, and under the presidency of the late Sir Bartle Frere, he delivered an address before a well-attended meeting of the society, "On the importance to Great Britain of the study of Arabic." In 1884 Professor Salmoné was appointed lecturer on Arabic at University College, London, when he began to devote himself to the compilation of an Arabic-English and

English-Arabic lexicon, which was dedicated by special permission to the Queen. It was compiled on a new and unique system, comprising about 120,000 Arabic words in vol. i. and about 50,000 in vol. ii.; this important work, published by Trübner in 1890, was well received by the press and by Oriental scholars at home and abroad. In the same year he was appointed Professor of Arabic at King's College, London. In 1891 he went on an extended tour in the East, visiting among other places some parts of India, Persia, Mesopotamia, Arabia, Egypt, Syria, and various other places in Turkey. His reputation as an Arabic scholar secured for him a welcome reception by the leading native scholars in Syria, Egypt, and Constantinople. In 1892 Professor Salmoné received a gratifying acknowledgment of his work, the Sultan of Turkey sending him the Order of the Medjidieh of the third class, in recognition of the services he had rendered to Oriental literature by the publication of his Arabic-English lexicon. Soon after starting on his Eastern travels in 1891 he was offered the post of special correspondent to the *Times* in Egypt, which, however, he was unable to accept. After his return from the East Professor Salmoné edited and conducted for nearly a year and a half the *Eastern and Western Review*, a monthly periodical intended to arouse public interest in Imperial affairs and Oriental subjects generally. After the discontinuance of this periodical he contributed various miscellaneous and political articles to the reviews and to newspapers, including the *Nineteenth Century*, *Blackwood*, the *Times*, and other journals. One of his most interesting works is "The Fall and Resurrection of Turkey" (published in 1896 by Messrs. Methuen), which gives a full and graphic account of the condition of the Turkish Empire, and indicates the reforms which are needed. He has also devised and edited an interesting work entitled "The Imperial Souvenir" (D. Nutt, 1897), dedicated by special permission to the Queen. It gives a metrical translation of the third verse of the National Anthem in fifty languages spoken in the British Empire. Professor Salmoné was employed at the War Office during 1885 and 1886 in the translation of important documents, also undertaking similar duties for the Admiralty. He has always been an active agitator for the encouragement of Oriental studies in England, and recently delivered an address "On the importance to Great Britain of establishing an Oriental School in London" at the Royal Asiatic Society. Address: 39 Colville Gardens, W.

SALOMONS, Sir David Lionel, Bart., J.P., D.L., A.I.C.E., M.S.T.E., is the

son of the late Mr. Philip Salomons, and was born on June 28, 1851, at Brighton. Having lost both his parents when he was very young, the responsibility of his guardianship was undertaken by his uncle, the late Sir David Salomons. He was educated by private tutors and at University College, London, afterwards proceeding to Caius College, Cambridge, graduating in the Natural Science Tripos, his tastes tending rather to physical science than to pure mathematics. The pursuit of scientific attainments has been almost the exclusive occupation of his life. Not content with mere theoretical knowledge, he was in the habit of frequenting workshops, working with the men, and thus gaining an insight into the practical work; his uncle, moreover, provided him with a laboratory where he could devote his attention to the subjects which interested him so deeply. When, however, he succeeded to his uncle's position he was not neglectful of its duties and responsibilities. He worked assiduously as a county magistrate, being a Justice of the Peace for Kent, Sussex, Middlesex, Westminster, and London, and he is also a Deputy-Lieutenant for Kent. In 1874 Sir David Salomons stood in the Liberal interest for Mid-Kent, but he was defeated; and at the general election of 1880, through holding the offices of sheriff and returning officer, he was precluded from seeking election. Since that period he had relinquished things political, until 1885, when he consented to contest the new borough of St. George's-in-the-East. Sir David Salomons is a member of several clubs, including the Savage Club; a County Councillor for Kent, representing one of the Tunbridge Divisions; and belongs to many societies, being an Associate of the Institute of Civil Engineers, a Fellow of the Royal Astronomical Society, of the Physical Society, of the Chemical Society, of the Geological Society, of the Royal Meteorological Society, and a Fellow of the Royal Microscopical Society. He is a Past Vice-President of the Institution of Electrical Engineers, and a Past Manager of the Royal Institution of Great Britain. Sir David has also studied drawing and painting, the better to appreciate art and its difficulties. He has served on the Scientific Committees appointed by the Institute of Electrical Engineers for settling symbols, fire risks, &c., and has brought out several new and successful inventions. He is also the author of several scientific papers read before many scientific societies: "Electric Light Installations and Management of Accumulators," 7th edit., in 3 vols. (the 8th edition will shortly appear), and of "Photographic Notes and Formulae," &c. Regarding the "Woman's Rights"

question, Sir David Salomons has adopted a distinct attitude by his "Address to the Ladies of England," which opened up several new fields for the employment of women. He is Chairman of the City of London Electric Lighting Company, and a Director of the South-Eastern Railway Company. At present he takes no active part in politics. He has recently been engaged on "High Frequency" work, and experiments connected with vacuum tubes. He was Master of the Coopers' Company, 1893-94. He takes a great interest in all educational matters. He was Mayor of Tunbridge Wells in 1895, and alderman of that town for two years afterwards, when he retired. He took a ready part in the promotion of the Bill and in obtaining the Locomotive on Highways (1896) Act. Under his auspices an exhibition of motor-carriages was held at Tunbridge Wells in the autumn of 1895. He is President of the Self-Propelled Traffic Association, Member of Committees of the Automobile Club de France and Automobile Club Belge. In 1895 he enlarged his laboratories and built a lecture theatre. These laboratories, with the various rooms adjoining, form one of the best laboratories in England for scientific work. He married, in 1882, the daughter of Baron de Stern, of Hyde Park Gate, London, by whom he has had issue four daughters and a son and heir. Addresses: Broomhill, Tunbridge Wells; and 49 Grosvenor Street, W.

SAMAROW, Gregor. *See* MEDING, J. F. M. O.

SAMBOURNE, Edward Linley, is the sole surviving child of Edward Mott Sambourne, city merchant; was born Jan. 4, 1845, and was educated at the City of London School, and the College, Chester. He was intended for the engineering profession, and was placed at John Penn and Son's Works, Greenwich, 1861-67, but in 1867 he was introduced to Mark Lemon, and published his first drawing in *Punch*, April 27, 1867. Since then he has devoted himself to the art of illustration. His principal works are the illustrations to "New History of Sandford and Merton," by F. C. Burnand, 1872; "Military Men I have Met," by Captain Dyne Finton, 1872; "Our Autumn Holiday on French Rivers," by L. J. Molloy, 1874; "Our Holiday in the Scottish Highlands," by Arthur à Beckett, 1876; "Modern Venice," 1877; "The Water Babies," by Charles Kingsley, 1885; "Hans Andersen's Fairy Tales," 1887. He designed the Diploma for the Great International Fisheries Exhibition, 1883, which was exhibited at the Royal Academy, 1885; and more recently the cover of the *Sketch*. It is, however, by his innum-

able drawings for *Punch* that he is best known. It is singular that although Mr. Sambourne is the *doyen* of English caricaturists, and as such maintains the ancient and highly honourable traditions of a typically English art, he has never received recognition from any Academy. He was elected to the Athenæum under Rule 2 in April 1896. He is married to Marion, eldest daughter of the late Spencer Herapath, F.R.S. Addresses: 18 Stafford Terrace, Kensington, W.; and Athenæum.

SAMPSON, William Thomas, American naval officer, was born at Palmyra, N.Y., Feb. 9, 1840, and graduated at the Naval Academy in 1861. He became a Master the same year, and a Lieutenant in July 1862; was stationed at the Naval Academy in 1864, and then served in the monitor *Patapasco*, and was in that vessel when she was destroyed by a torpedo in Charleston Harbour in January 1865. He was in the European squadron in 1865-67, when he became a Lieut.-Commander, and in August 1874 was made a Commander. He was on the Asiatic station in command of the *Svatara*, 1879-82; was Assistant-Superintendent of the U.S. Naval Observatory, Washington, 1882-83, and Superintendent of the Naval Academy, 1886-90, becoming a Captain in 1889. From January 1892 till 1897 he was Chief of the Bureau of Ordnance, and from June 1897 to the spring of 1898 was in command of the battleship *Iowa*. Just before the war with Spain broke out in April 1898 he was placed in command of the American fleet at Key West, with rank of Acting Rear-Admiral, and had the direction of operations in West Indian waters, which culminated in the destruction of the Spanish squadron near Santiago de Cuba, July 3, 1898. He was appointed in August one of the Commissioners to concert measures with the Spanish authorities for the evacuation of Cuba by Spain, having previously been advanced to the full grade of Rear-Admiral for his services.

SAMUEL, The Right Hon. Sir Saul, Bart., K.C.M.G., C.B., J.P., born Nov. 2, 1820, is the son of the late Sampson Samuel, Esq., of London. He sailed for New South Wales in 1832; and, after completing his education at the Sydney College, he became extensively engaged in squatting, commercial, mining, and manufacturing pursuits, and is recognised as the pioneer of several industries which have since developed into importance. His public career commenced in 1854, two years before responsible government was inaugurated in New South

Wales; he was then elected a member of the Legislative Council. Soon after the promulgation of the new Constitution in 1856 he was elected a member of the Legislative Assembly; and, in 1859, first accepted office in the Forster Administration as Colonial Treasurer. He held the same portfolio in the Cowper Government of 1865, the Robertson Ministry in 1868, and the Cowper Administration of 1869. He has also acted as Postmaster-General in several Governments, and successfully conducted negotiations with the United States Government for a Postal Convention with New South Wales, which resulted in the establishment of the San Francisco Mail Service with Australia. After holding high office under every Governor of the Colony (except Lord Carrington) since the inauguration of responsible government, he, in 1880, resigned the Postmaster-Generalship in the Parkes Administration, and was appointed Agent-General for the Colony in London, a position which he continues to fill. In that capacity he has conducted diplomatic and financial business of the highest importance with uniform success, and to the great satisfaction of successive Governments. He was created C.M.G. in 1874; K.C.M.G. in 1882; and C.B. (Civil) in 1886. He was created a Baronet in January 1898. He retired in October 1898, after a year's leave, and was thanked by Mr. Chamberlain for the manner in which he had discharged the duties of his post. He has been twice married (1), in 1857, to Henrietta Matilda, daughter of Benjamin Goldsmid Levien, Esq., of Geelong, Victoria; and (2) in 1877, to Sara Louise, daughter of E. Isaac, Esq., of Auckland, New Zealand. Address: 34 Nevern Square, S.W.

SAMUEL-MONTAGU, Sir Montagu, Bart. (usually called Sir Samuel Montagu), M.P., J.P., D.L., head of the banking firm of Samuel Montagu & Co., London, was born at Liverpool on Dec. 21, 1832, and is the son of the late Louis Samuel, of Liverpool, and afterwards of Bloomsbury, a watchmaker. He assumed the name of Montagu by royal license in 1894. He was educated at Liverpool Institute and privately, and established the banking-house, of which he is now head, in 1853. He was a member of the Gold and Silver Commission from 1887 to 1890. He has represented the Tower Hamlets, Whitechapel Division, since 1885, and is a Liberal in politics. He is an authority on currency and a leading member of the Hebrew community in London, a member of the Jewish Board of Deputies, President of the Jewish Working-Men's Club, J.P. for London, D.L. for Tower Hamlets. He married Ellen, youngest daughter of the

late Louis Cohen, of the London Stock Exchange, in 1862. Addresses: 12 Palace Gardens, Kensington, W.; and South Stoneham House, Hants.

SAMUELSON, The Right Hon. Sir Bernhard, Bart., F.R.S., M.Inst.C.E., was born on Nov. 22, 1820, and is the son of S. H. Samuelson, a Liverpool merchant. He was educated privately, and was for some time in a general merchant's office in Liverpool, until in 1842 he was placed in charge of the Continental affairs of Sharp, Stewart & Co., engineers, of Manchester. Leaving their service in 1845, he established railway works at Tours between 1846-48. In 1849 he purchased the agricultural implement works at Banbury, and in 1854 erected blast furnaces at Middlesborough, where he bought collieries and ironstone mines between the years 1872-80. He is Chairman of Samuelson & Co., of Banbury and Orleans. He represented Banbury in Parliament in 1859, and sat as Liberal member for North Oxfordshire from 1885 to 1895. He was Chairman of several Royal Commissions, notably that on Technical Education, and was made a Baronet for his services in 1884. He was member of the Royal Commission on Scientific Instruction, was for three or four years Chairman of the Association of Chambers of Commerce of the United Kingdom, has been President of the Iron and Steel Institute, is J.P. for Oxfordshire, Knight of the Legion of Honour, &c. He was made F.R.S. in 1881, and P.C. in 1895. His publications take the form of Reports to the House of Commons on Technical Education, Patent Laws, Railway Rates, and Thames Conservancy, &c. He married, in 1889, Mrs. Denny, a daughter of Chevalier Leon Serena, and widow of William Denny, of Dumbarton. Addresses: 56 Prince's Gate, S.W.; and Bodicote Grange, Oxfordshire.

SAMUELSON, James, is the eighth son of the late Samuel H. Samuelson, merchant, of Liverpool and Hull. He was born in the latter place in 1829, was educated in Liverpool by the Rev. John Brunner (father of Sir John Brunner, M.P.), and studied zoology under Dr. Zaddach at Königsberg University. In 1867 he passed the General Examination of the Inns of Court, and was called to the Bar of the Middle Temple in 1870, but never practised. Mr. Samuelson has all his life been connected with manufacturing industries, and he is now the chief proprietor in a limited company at Birkenhead, managed by his two sons, for crushing palm kernels and cocoa-nuts. His leisure has been employed in literary and social work, the latter including the foundation of the

Liverpool Science and Art Classes, of which he was President, and which are now under municipal management. He has frequently acted as an intermediary in the settlement of trade disputes, and notably in conjunction with the late Earl of Derby, and the late Mr. R. Lowndes, as arbitrator in the great Dock Strike of 1879. Mr. Samuelson's earlier works were chiefly of a popular scientific character. In 1860 he published two works called "Humble Creatures," dealing with the microscopic anatomy of certain insects. In 1862 he founded, and for a short time edited, the *Popular Science Review*, and in 1864 the *Quarterly Journal of Science*. This review he edited for eight years, with the assistance of Mr. W. Crookes, F.R.S., Sir W. Fairbairn, Bart., F.R.S., and other leading scientists. Amongst his works on Social Science are "The German Working-Man," 1869; and the "History of Drink," 1879. He has travelled over a great part of the civilised world, east and west; and has published monographs of some of the countries visited, as "Roumania, Past and Present," 1882; the only work of the kind in the English language, for which he received from the King the Roumanian Cross, and was made Officer of the Crown of Roumania; "Bulgaria, Past and Present," 1887; "India, Past and Present," 1889. He projected, and for some time edited for Messrs. Routledge, a quarterly review called *Subjects of the Day*, the distinctive feature of which was that each number treated exhaustively of one current topic of interest, and was composed so as to form a text-book of permanent value, to which a bibliography and index were attached. The magazine, which was discontinued for financial reasons only, reckoned among its contributors many leading experts and officials connected with the subjects to be treated. In 1893 he visited Greece, and on his return published a treatise on the financial and industrial condition of that country. In the same year he founded the Liverpool Board of Conciliation, and was mainly instrumental in establishing a Labour Registry in that city, whilst his publications on these questions stimulated the formation of similar institutions in other towns. In 1896 he edited and contributed largely to "The Civilisation of our Day," an illustrated composite work dealing with the progress of the present century. In this he had the co-operation of many leading writers, notably Dr. Garnett, C.B., on "Free Libraries"; Mr. F. E. Baines, C.B., on "Post Telegraphs and Telephones"; Sir Hugh Gilzean-Reid, "The Press"; E. W. Maunder, "Our Knowledge of the Universe"; Right Hon. Prof. F. Max-Müller, "The Dawn of Reason in Religion" (a

review of the present state of religious belief), and of many other experts in their respective departments. Mr. Samuelson has always been an advanced Liberal, and has helped to foster liberty at home and abroad. He filled the chair on two committees, the Liverpool Cretan and the Liverpool Greek Committee, both of which sent considerable sums to the suffering Greeks. He has three times unsuccessfully contested constituencies; belongs to the Liverpool Reform Club, and is an original member of the National Liberal Club. Address: 42 Grosvenor Road, Birkenhead.

SAN BARTOLOMEO, Francesco de Renzis, Baron de, Italian Ambassador to the Court of St. James, was born in 1836, and was educated at the military school of La Nunzcatella, at Naples, which he left in 1854 with the grade of Sub-Lieutenant of Engineers. In 1860 he left the service of King Francis II. of Naples, and entered that of Victor Emmanuel. He was at the siege of Gaeta, and his bravery there gained for him the Military Order of Savoy. He was given a high post in the Ordnance Corps, and fought against the Austrians in 1866. He is, however, best known as a writer, and in 1867 founded *La Fanfulla* at Florence, which became one of the most popular newspapers in Italy. He sold his share on entering Parliament in 1874. His best-known work is "Ananke," published in 1878. He was appointed to his present post in August 1898.

SANDAY, The Rev. William, D.D., LL.D., Lady Margaret Professor of Divinity and Canon of Christ Church, Oxford, was born at Holme Pierrepont, Nottingham, Aug. 1, 1843, and is the eldest son of William Sanday, of Holme Pierrepont, and of his wife, Elizabeth Mann, of Scawsby, Doncaster. He was educated at Repton School, and at Balliol and Corpus Christi Colleges, Oxford, being elected scholar of the latter in 1863. He obtained a first class in 1865, and was ordained Deacon in 1867, Priest in 1869, taking his M.A. degree in 1868. He held a fellowship at Trinity from 1866 to 1873. Dr. Sanday has been successively Lecturer of St. Nicholas, Abingdon, 1871; Vicar of Great Waltham, 1872; Rector of Barton-on-the-Heath, Warwick, 1873; and Principal of Bishop Hatfield's Hall, Durham, 1876. In 1882 he was appointed Professor of Exegesis at Oxford, in succession to the late Canon Liddon, who resigned the post; and in 1895 he was elected to the Lady Margaret Professorship of Divinity attached to a Canonry at Christ Church, which he now holds. He was Whitehall Preacher in

1889-90, and Select Preacher in Cambridge University between 1880 and 1892. Dr. Sanday has published "Authorship and Historical Character of the Fourth Gospel," 1873; "The Gospels in the Second Century," 1876; "Commentaries on Romans and Galatians for English Readers," 1878; and is joint editor of "Variorum Bible," and "Studia Biblica," and of a larger "Commentary on Romans," 1895, which is now in a third edition. In 1893 Dr. Sanday delivered the Bampton Lectures, his subject being "Inspiration." They were published later in the year. He married, in 1877, Marion, daughter of W. H. Woodman Hastings, J.P., of the family of Warren Hastings. Address: Christ Church, Oxford.

SANDEMAN, Albert George, late Governor of the Bank of England, was born on Oct. 21, 1832, and is the son of George Glas Sandeman, Portuguese merchant. He is senior partner in George G. Sandeman, Sons & Co., of London. He was High Sheriff of Surrey in 1872, stood for Reading as a Conservative in 1880, was Chairman of the London Dock Company when the working agreement with the East and West India Dock Company was effected, is one of the Commissioners of Lieutenancy and Commissioner of Income Tax for the City of London, was Governor of the Bank of England, 1895-97, and in July 1898 was elected President of the London Chamber of Commerce. He is Grand Cross of the Royal Military Order of Our Lady of the Conception of Villa Vicosa. He married a daughter of the Portuguese Ambassador to England, Viscount Moncorvo, in 1856. Address: Presdales, Ware, Herts.

SANDERSON, Professor Sir John Scott Burdon, Bart., M.A., M.D., D.Sc. Trinity College, Dublin, D.C.L. Durham, LL.D. Edinburgh, F.R.S., F.R.S.E., Regius Professor of Medicine, University of Oxford, was born at Newcastle-on-Tyne, in December 1828, and educated at the University of Edinburgh. He was Medical Officer of Health for Paddington, 1856-67; has been Physician to the Middlesex Hospital and the Hospital for Consumption, Brompton. He held the office of Jodrell Professor of Physiology in University College from 1874 to 1882. On Nov. 29, 1882, he was elected Waynflete Professor of Physiology at Oxford. He was Professor Superintendent of the Brown Institution from 1871 to 1878. Dr. Sanderson was employed by the Royal Commissioners to make investigations respecting the Cattle Plague, 1865-66; was sent by her Majesty's Government to North Germany in 1865 to inquire into an Epi-

demic of Cerebro-Spinal Meningitis; and was occupied in an inquiry for a Royal Commission as to the influence of extreme heat on the health of workers in the Cornwall mines in 1869. In 1883 he sat on the Royal Commission on Hospitals for Infectious Diseases, and has since served on two other Royal Commissions, viz., that on the consumption of tuberculous meat and milk, 1891, and that on the University of London, 1892. He is the author of numerous Reports on infectious diseases and other subjects connected with Public Health in the Reports of the Medical Officer of the Privy Council in 1860 and for several succeeding years; and of papers on physiological and pathological subjects read before the Royal Society, particularly an elaborate series of researches on the Electrical Properties of the *Dionæa Muscipula*, as well as on the electrical organs of the skate and other electrical fishes. He was President of the Biological Section of the British Association at the meeting at Newcastle-on-Tyne in 1889, and was elected President of the Association at Nottingham in 1893. He has three times filled the office of Croonian Lecturer, viz., in 1867 and 1877 at the Royal Society, and at the College of Physicians in 1891. For his physiological and pathological researches he received a Royal Medal in 1883, and the Baly Medal of the Royal College of Physicians in 1880. In 1895 he was appointed Regius Professor of Medicine in the University of Oxford. In recognition of his services to science he was created a Baronet at the Birthday, 1899. Address: Oxford.

SANDFORD, The Right Rev. Charles Waldegrave, D.D., Bishop of Gibraltar, son of the late Archdeacon Sandford, born in 1828, received his academical education at Oxford, where he was a student of Christ Church, and obtained a first class in Lit. Hum., was for several years Tutor and Senior Censor of Christ Church, 1855-1870, became Commissary of the Archbishop of Canterbury in 1869, and Rector of Bishopsbourne, Kent, in 1870. On the resignation of Bishop Harris he was nominated by the Secretary of State for the Colonies to the See of Gibraltar, and was consecrated at Oxford, Feb. 1, 1874. He is married to Alice, daughter of Sir George Baker, Bart. Addresses: 4 Hyde Park Square, W.; Cannes, France; and Athensæum.

SANDFORD, The Right Rev. Daniel Fox, D.D. Hon. Durham, LL.D. Glasgow, late Bishop of Tasmania, third son of the late Sir Samuel Keyte Sandford, D.C.L., sometime M.P. for Paisley, and Professor of Greek at Glasgow, was born

in 1831. After taking orders he became Incumbent of St. John's and Canon of St. Mary's Cathedral, Edinburgh; and, having been elected to the Bishopric of Tasmania, he was consecrated by the Archbishop of Canterbury (Dr. Benson), in St. Paul's Cathedral, April 25, 1883. He resigned his bishopric and was appointed Rector of Boldon, and Assistant-Bishop in the diocese of Durham, 1889. Address: Boldon Rectory, Durham.

SANDHURST, Lord, William Mansfield, G.C.I.E., J.P., the eldest son of General Lord Sandhurst, G.C.B., G.C.S.I., the victor of the Indian Mutiny, was born Aug. 21, 1855. He became a Lieutenant in the Coldstream Guards in 1873, and three years later succeeded to the title on the death of his father. In 1879 he retired from the army, and in the next year became a Lord-in-Waiting to the Queen. In 1886 he was Under-Secretary for War in Mr. Gladstone's short-lived administration, and he held the same post from 1892 to 1894. As a junior member of the Government he had few opportunities of showing his talents of organisation and method, and he accepted his present post of Governor of Bombay in 1895. In May 1898 he was created Knight of Justice in the Order of St. John of Jerusalem. His mother was elected a member of the first London County Council in 1888, but was disqualified from sitting by the Queen's Bench. She died in 1892. His great-grandfather was the famous Chief-Justice Mansfield. He married, in 1881, Lady Victoria Alexandrina, daughter of the 4th Earl Spencer. Addresses: Government House, Bombay; and 10 Cadogan Gardens, S.W.

SANDYS, John Edwin, Litt. D. Camb., Hon. Litt. D. Dublin, son of the late Rev. T. Sandys, was born May 19, 1844. He was educated at Repton School, and entered St. John's College, Cambridge, as a minor scholar, in 1863. He was elected first Bell's Scholar in 1864, obtained the Gold Medal for a Greek Ode on the "Art of Phidias" in 1865, the Porson Prize for Greek Trochaics in 1865, and for Greek Iambics in 1866, and was twice awarded the Members' Prize for Latin Prose Composition. In 1867 he graduated as Senior Classic, and was elected Fellow and Lecturer of St. John's College; and, on taking his M.A. degree in 1870, was appointed Tutor of his College, an office which he still holds. He was an Examiner for the Classical Tripos on five occasions between 1871 and 1876, and was principal Classical Lecturer of Jesus College from 1867 to 1877. He resigned his last appointment after his election, Oct. 19, 1876,

to the office of Public Orator of the University of Cambridge. In 1868 he edited the *Ad Demonium* and *Panegyricus* of Isocrates; in 1874, the second part of the "Select Private Orations" of Demosthenes (3rd edit., 1896); in 1880, the *Bacchæ* of Euripides, with illustrations from works of ancient art (3rd edit., 1892); in 1885, the *Orator* of Cicero; in 1890, the "Speech of Demosthenes against the Law of Leptines"; in 1893, Aristotle's "Constitution of Athens"; in 1896, a "First Greek Reader and Writer"; and in 1897, the "First Philippic and Olynthiacs" of Demosthenes. He has contributed to the *Classical Review* since its foundation in 1887, and has written articles on the History of Scholarship for "Social England" in 1896-97. He has also edited the late Mr. Cope's Commentary on the Rhetoric of Aristotle, 1877; and (in conjunction with the late Professor Nettleship) has revised and enlarged an English translation of Seyffert's "Dictionary of Classical Mythology, Religion, Literature, Art, and Antiquities," 1891. In 1887 he published "An Easter Vacation in Greece." He is one of the Managing Committee of the British School at Athens, a Vice-President of the Hellenic Society, and Examiner in Greek in the Victoria University. He has been President of the Cambridge Philological Society, and Chairman of the Board of Classical Studies. In 1885 he was admitted to the degree of Doctor of Letters by his own University, in 1892 he received an honorary degree from the University of Dublin, and in 1894 he was specially elected a member of the Athenæum Club. Address: Merton House, Cambridge.

SANT, James, R.A., was born at Croydon, April 23, 1820, and received his first instructions in art from John Varley, one of the fathers of the British School of painting in water-colours. Later on, Sir Augustus Calcott, R.A., gave him some valuable hints and instruction in oil painting. It was not, however, till 1842 that he devoted himself to painting as a profession by becoming a student of the Royal Academy, where he studied for four years. Shortly after leaving, he began to exhibit those "subject pictures," or "fancy subjects," of single figures generally, and these frequently children, by which pictures he is probably most widely known, many of them having been engraved. Of these we may select as typical examples the "Infant Samuel," the "Infant Timothy," "Little Red Riding-Hood," and "Dick Whittington." Among Mr. Sant's numerous other works of this description are "The Light of the Cross," "Mother's Hope," "Morning" and "Evening," "She Never Told her Love," "Harmony,"

"Young Minstrel," "Retrospection," "Saxon Women," "The Boy Shakespeare," "The Walk to Emmaus," "The Miller's Daughter," and "Young Steele." After some years, however, Mr. Sant began to paint portraits, and his pretty pictures of ladies and children became, and for some time continued to be, the fashion. Since 1895 he has continued to exhibit largely at the Royal Academy's Exhibitions, his subjects being chiefly portraits. In 1896 he exhibited a portrait of Miss Dorothea Baird as "Tribby," and in 1899 as many as five portraits. The largest collection of Mr. Sant's works was at Strawberry Hill. For Countess Waldegrave the artist painted no fewer than 22 members of her distinguished circle, including the Duchess of Sutherland, the Marchioness of Westminster when Lady Constance Grosvenor, the Countess of Shaftesbury, the Duke and Duchess d'Aumale, the Duchess of Wellington when Marchioness of Dour, the Earl and Countess of Clarendon, Lord Lyndhurst, the Marchioness of Clanricarde, M. Van de Weyer, the Belgian Minister, Viscount Stratford de Redcliffe, Countess Morley, Earl Grey, Bishop Wilberforce, and Countess Waldegrave herself. This Strawberry Hill gallery of pictures was exhibited at the French Gallery, Pall Mall, in 1861. He was elected A.R.A. in 1861; R.A. in 1870; and in January 1871 was appointed Principal Painter in Ordinary to the Queen in succession to the late Sir George Hayter, and was commissioned to paint a large picture of her Majesty and her Royal grand-children, the eldest three children of the Prince of Wales, and a State portrait of the Queen for the Turkish Embassy. In June 1877 Mr. Sant was elected a corresponding member of the Royal Accademia Raffaello in Urbino. Mr. Sant married a daughter of R. M. M. Thomson, staff-surgeon, Bengal Presidency. Address: 43 Lancaster Gate, Hyde Park, W.

SANTLEY, Charles, baritone singer, was born at Liverpool in 1834, and after receiving a good musical and general education in his own country, proceeded to Italy to complete his professional training. He made his first appearance as an operatic singer in this country at Covent Garden, during the Pyne-Harrison management, and achieved his first great successes in the part of Hoel in the opera of "Dinorah" in 1859, and in that of Rhineberg, in Vincent Wallace's opera of "Lurline," in March 1860. He created so favourable an impression in this latter character that he took rank as one of the most effective baritones of the day. His career, especially since he attached himself exclusively to the Italian operatic stage, where he has distinguished himself in

most of the great capitals of Europe, has been very successful. His voice is as remarkable for its quality as for the extent of its register, in the upper part of which it partakes of a pure *tenore robusto*, while in the lower portion it displays the qualities of the *basso profondo*. In Gounod's opera of "Faust," Mr. Santley performed in the same season the parts of Valentine and Mephistopheles. He sang in Australia in 1889-90 and at the Cape in 1893. He has published a work entitled "Student and Singer" (1892). Mr. Santley married, in 1859, Gertrude Kemble, a grand-daughter of Charles Kemble; she had appeared in public as a soprano singer, but gave up her professional career after her marriage. Address : 67 Carlton Hill, N.W.

SARASATE, Pablo Martin Meliton, Spanish violinist, was born at Pampeluna, March 10, 1844. He entered the Paris Conservatoire in January 1856, became the favourite pupil of Alard, and gained the first prizes for *soffeggio* and violin. He then entered Rebur's harmony class and secured a *premier accessit* in 1859, but afterwards relinquished the study of composition for the career of a concert player. His performances were highly successful. He has played in nearly all the great towns between Naples and Norway, and Portugal and Moscow, and has visited America, North and South. His first appearance in London was at the Philharmonic Concert on May 18, 1874. He again appeared at the Musical Union of June 9 of the same year. In 1877 he played at the Crystal Palace on October 13; on March 28, 1878, at the Philharmonic; in 1885 he gave several violin recitals in London, with very remarkable success, and in 1886 a series of equally successful concerts. Since then the "Sarasate Concerts" have become an annual feature of the St. James's Hall musical season. His works, which amount to over thirty, have as their favourite numbers, "Souvenir de Domont," "Spanische Tänze," and "Serenade Andalose." He is unmarried, a fact that is said to be due to advice given him by his master, Auber.

SARAWAK, Rajah of. See BROOKE, SIR CHARLES.

SARDOU, Victorien, French dramatist, is the son of M. Léandre Sardou, a professor in Paris, and the compiler of several publications. He was born in Paris, Sept. 7, 1831. At first he studied medicine, but he was obliged, in consequence of the embarrassments of his family, to give private lessons in history, philosophy, and mathematics. He also made attempts in literature, writing articles for several reviews, for the minor

journals, and for the "Dictionnaire de la Conversation." His first comedy, "La Taverne des Étudiants," was brought out at the Odéon, April 1, 1854, and proved a complete failure. In the year 1857 M. Sardou was in a state of abject poverty and extreme distress. He was living in a garret, and was prostrated by an attack of typhoid fever; but a neighbour, Mlle. de Brécourt, nursed him with tender care during his illness, from which he slowly recovered. He married this friend in the following year, and by her he was introduced to Mlle. Déjazet, who had just established the theatre which was named after her. M. Sardou, undeterred by his former failure, now turned his attention again to dramatic composition, and quickly built up for himself a brilliant reputation. Nine years later he was in possession of a handsome fortune and a European renown, when a gloom was temporarily cast over his career by the death of his devoted wife (1867). M. Sardou's earlier pieces were performed at the Théâtre Déjazet, viz.: "Les Premières Armes de Figaro," Sept. 27, 1859; "Monsieur Garat," April 30, 1860; and "Les Prés-Saint-Gervais," April 24, 1862. "Monsieur Garat" was one of the most prolonged successes of the little theatre, and "Les Prés-Saint-Gervais," transformed into an *opéra-bouffe*, was afterwards brought out at the Théâtre des Variétés, and also, in an English version, at the Criterion Theatre, London. Subjoined is a list of his other works, with the dates of their first representation: "Les Gens Nerveux," Palais Royal, Nov. 4, 1859; "Les Pattes de Mouche," Gymnase, May 15, 1860; "Les Femmes Fortes," Vaudeville, Dec. 31, 1860; "L'Écureuil," under the pseudonym of Carle, Vaudeville, Feb. 9, 1861; "Piccolino," Gymnase, July 18, 1861; "Nos Intimes," one of his most brilliant successes, Vaudeville, Nov. 16, 1861; "La Papillonne," Théâtre Français, April 11, 1862, a piece which was unfavourably received; "La Perle Noire," Gymnase, April 12, 1862; "Les Ganaches," same theatre, Oct. 29, 1862; "Batailles d'Amour," a comic opera in three acts, written in conjunction with M. Daclin, Opéra Comique, April 13, 1863; "Les Diables Noirs," Vaudeville, 1863, a drama in four acts, which after being interdicted by the censorship, was severely criticised by the press; "Le Degel," Déjazet, April 12; "Don Quichotte," 1864; a fairy piece in three acts, Gymnase, June 25, 1864; "Les Pommes du Voisin," Palais Royal, Oct. 25, 1864; "Capitaine Henriot," Opéra Comique, Dec. 26, 1864; "Les Vieux Garçons," Gymnase, Jan. 21, 1865; "La Famille Bénoiton," Vaudeville, Nov. 4, 1855; "Nos bons Villageois," Gymnase, Oct. 3, 1866; "Maison Neuve," Vaude-

ville, Dec. 4, 1866; "Séraphine," originally entitled "La Dévôte," *Gymnase*, Dec. 21, 1868; "Patrie," *Porte-Saint-Martin*, March 18, 1869; "Fernande," *Gymnase*, March 8, 1870; "Le Roi Carotte," *Gaité*, Jan. 15, 1872; "Rabagas," *Vaudeville*, January 1872, a piece which was supposed to have reference to M. Gambetta; "Les Merveilleuses," *Théâtre des Variétés*, 1873; "Andréa," *Gymnase*, March 17, 1873; "L'Oncle Sam," a satire on American society, *Vaudeville*, Nov. 1873; "La Haine," a tragedy which was not successful, *Gaité*, December, 1874; "Férréol," *Gymnase*, November, 1875; "Dora," a comedy in five acts, which is known in England under the title of "Diplomacy," and is a good sample of M. Sardou's cleverness in play construction, *Vaudeville*, January 1877; and "Les Bourgeois de Pontarcy," *Vaudeville*, 1878; "Daniel Rochat," a five-act comedy, *Théâtre Français*, Feb. 16, 1880; "Odette," a play in four acts, *Vaudeville*, November 1881; "Divorçons," a comedy in three acts, 1881; "Fédora," 1883; and "Théodora," 1884; the last two being written for Madame Sarah Bernhardt. Since then his best-known plays have been "La Tosca," also written for Sarah Bernhardt, and brought out by her at the *Porte-Saint-Martin Theatre* in 1887; a comedy, "Marquise," produced at the *Vaudeville*, 1889; "Thermidor," produced in January 1891, and prohibited by the French government owing to the political demonstrations it excited; and "Gismonda," produced by Madame Bernhardt at the *Renaissance Theatre*, Paris, on Oct. 31, 1894, and "Spiritisme," produced by her in 1897. In the same year appeared one of his most successful plays "Madame Sans-Gêne," written expressly for Madame Réjane (*q.v.*), in which she portrayed the outspoken good-hearted wife of Marshal Lefevre. It was translated into English, and Sir Henry Irving and Miss Terry were seen in it at the *Lyceum*. In 1899 he wrote a play on the subject of Robespierre for Sir Henry Irving. M. Sardou has realised a princely fortune by his writings, and has built a splendid château at Marly-le-Roy. He married, secondly, on June 17, 1872, Mdlle. Soulier, daughter of the *Conservateur* of the *Museum of Versailles*. He was decorated with the *Legion of Honour* in 1863, and was elected a *Member of the French Academy* in June 1877, in succession to M. Joseph Autran. His reception into the *French Academy* took place, May 23, 1878. An English monograph was written on M. Sardou in 1892 by Roosevelt. His Paris address is 28 Rue de Madrid.

SARGENT, John Singer, R.A., is an American by parentage, and, like some

other masters of style in art, is the son of a scientific father and an artistic mother. He was born in Florence, Italy, in 1856, his father, who had come to live there, being Dr. Fitz Hugh Sargent, a Boston physician, and his mother, a Miss Newbold, of the Philadelphia Newbolds, a clever water-colourist. He received his education partly in Italy, partly in Germany, and entered the *Academy Schools*, where he had completed some years of diligent study before he was eighteen. On a visit to the Tyrol with his mother, he met the late Lord Leighton, who praised his work. This encouraged him to study, under M. Carolus-Duran. In 1879 he exhibited at the *Salon* and was honourably mentioned, and in 1881 obtained a medal of the second class. He has won his European reputation as a peculiarly masterly portrait-painter and painter of genre. Some of the most celebrated portraits in the United States are from his brush, and he is represented at the *Luxembourg* by his "Carmenita," which was produced in New York, and first exhibited at the *Society of American Artists*. In 1894 he painted for Sir Henry Irving a portrait of Ellen Terry, and during the last twenty years has exhibited the following principal works: "Fishing for Oysters at Cancale," and "En Route pour la Pêche," 1878; "Neapolitan Children Bathing," 1879; and "El Jaleso," 1882, and, among portraits, those of Carolus-Duran and of Pozzi, the gynæcologist, as well as the "Portrait of a Young Lady" (*Salon*, 1881); group of four young girls, "Hall of the Four Children," 1882; "Madame G." (*Salon*, 1884); "Mrs. Marquand" and "Mrs. Boit" (*Royal Academy*, 1888). At the latter's exhibition in 1895 he exhibited portraits of Mrs. Ernest Hills, Coventry Patmore, W. Graham Robertson, and Mrs. Russell Cooke; in 1896, of the Right Hon. Joseph Chamberlain, M.P., Mrs. Ian Hamilton, Sir George Lewis, and Mrs. Colin Hunter, &c.; in 1897, of Mrs. Carl Meyer and her children, a group which made a profound sensation among connoisseurs; and the Hon. Laura Lister; in 1898, of Francis Cranmer Penrose (President, R.I.B.A., 1894-96), Mrs. Harold Wilson, Johannes Wolff, Asher Wertheimer (a portrait like that of Mrs. Carl Meyer), Sir Thomas Sutherland, G.C.M.G., M.P., the Right Hon. Lord Watson (painted for members of the legal profession in Scotland), and Mrs. Wertheimer; in 1899, of Mrs. Charles Hunter, Miss Octavia Hill, Miss Jane Evans, and Lady Faudel-Phillips, the last three presentation portraits. Mr. Sargent became an A.R.A. in 1894, R.A. in 1897, and, with Mr. E. A. Abbey, another American, is one of the most famous of English Academicians.

He was elected a member of the Athenæum under Rule 2 in 1898. Address: 33 Tite Street, Chelsea, S.W.

SARLE, Sir Allen Lanyon, J.P., Director of the London, Brighton, and South Coast Railway, was born at Rousay, Orkney, on Nov. 14, 1828, and is the second son of the late Charles Sarle, at one time Stipendiary Magistrate at Dominica. He was educated at Selkirk Grammar School, and at the High School, Edinburgh, and entered into the service of the London, Brighton, and South Coast Railway in 1849. He was General Manager and Secretary of this line from 1886 to 1897. He is a Lieut.-Colonel of Railway Volunteers, and was knighted in 1896. He married, in 1859, Elizabeth Ann, *née* Horn. Address: Greenhayes, Banstead, Surrey.

SARRIEN, Jean Marie Ferdinand, French politician, was born at Bourbon-Lancy, Saône et Loire, Oct. 13, 1840. He was brought up as a lawyer, and having become Mayor of his native town, he was elected to the Chamber of Deputies in 1876, where he sat among the Republican Left. In 1884 he replaced M. Rouvier (*q.v.*), as President of the Budget Commission, and in 1885 became Minister of Posts and Telegraphs in the Brisson Cabinet. When this fell, in the same year, he exchanged the portfolio of Posts for that of the Interior in the De Freycinet Cabinet, which was formed in January 1886. In the Goblet Ministry, which followed, he held the Portfolio of Justice. In the second Brisson Cabinet of 1898 he again held that position, and distinguished himself with the Premier as an advocate of the revision of the Dreyfus trial. His Paris address is: 22 Avenue de la Observatoire.

SASSOON, Sir Edward Albert, Bart., D.L., was born on June 20, 1856, and is the eldest surviving son of the 1st baronet, Sir Albert A. Sassoon, of Bombay. He succeeded his father in 1896, and has been a Major in the Middlesex Yeomanry (Duke of Cambridge's Hussars). He married, in 1887, Aline Caroline, daughter of Baron Gustave de Rothschild. Addresses: 25 Park Lane, W.; 1 Eastern Terrace, Brighton; Sans Souci, Bombay.

SATOW, Sir Ernest Mason, K.C.M.G., was born in 1843, and having been educated at London University, became a student interpreter in 1861. He accompanied Colonel Neale, the *Chargé d'Affaires*, to Japan, and was present at the battle of Kagosima, in September 1863, and at the bombardment of Shimonosaki. In 1864 he was interpreter to

Admiral Kuper. In 1865 he was appointed an interpreter in Japanese, and promoted to be Japanese Secretary in 1868, and second Secretary of Legation in 1876. In 1883 he was made a C.M.G., and promoted to be Agent at Bangkok, 1884. He was transferred to Monte Video in 1883, and promoted to be Minister to Morocco in 1893. Two years later he returned to Japan as Minister Plenipotentiary. Sir E. M. Satow is one of the finest of Japanese scholars, and has written much on the affairs of the country, being one of the authors of Murray's Guide.

SAUNDERS, Sir Edwin, Knight, F.R.C.S., F.G.S., son of Mr. Saunders, publisher and author, of the firm of Saunders & Ottley, was born in London, March 12, 1814, and has become distinguished as a dental surgeon. From 1837 to 1854 he was Surgeon-Dentist and Lecturer on the Anatomy and Diseases of the Teeth at St. Thomas's Hospital, and has been Surgeon-Dentist to the Queen since 1848. He is also Dentist to the Prince and Princess of Wales. He is a Fellow of the Royal Medical and Chirurgical Society, has been twice President of the Odontological Society, was President of the Met. B. of the British Medical Association, and President of Section XII. of the International Medical Congress of 1881, and is the author of "Advice on the Care of the Teeth," and "Teeth the Test of Age, considered with reference to the Factory Act." Sir Edwin Saunders received the honour of knighthood in 1883. He was for many years a Member of Council of the Royal Botanic Society, Regent's Park, London, and is President of the National Chrysanthemum Society. He married, in 1848, Marian, daughter of G. Burgess. Address: Fairlawn, Wimbledon Common, Surrey.

SAUNDERSON, Colonel, The Right Hon. Edward James, M.P., J.P., D.L., was born in 1837, and is the son of the late Colonel A. Sanderson, M.P., of Castle Sanderson, and Sarah, daughter of the 6th Lord Farnham. He served for some time in the Royal Irish Fusiliers, and retired with the rank of Major. In 1886 he was promoted to be Hon. Lieut.-Colonel of the 4th Battalion (Militia) of the same regiment. He sat in the House of Commons as Liberal member for County Cavan from 1865 to 1874. Since 1885 he has represented Co. Armagh (North), and as a Unionist has been the doughty and constant opponent of the Home Rulers. He is J.P. and D.L. for Cavan, and in 1859 was High Sheriff for the county. He was appointed a member of the Privy Council, January 1879. He married, in

1865, a daughter of the 3rd Lord Ventry. Addresses: 5 Deanery Street, Park Lane, W.; and Castle Saunderson, Belturbet, Cavan.

SAUSSIER, Félix Gustave, French General, was born at Troyes, Jan. 16, 1828, and left the military school of St. Cyr as Second Lieutenant of Infantry, Oct. 1, 1850. He became a Lieutenant in 1854, a Captain in 1855, a Major in 1863, and a Lieut.-Colonel in 1867. He took part in the wars of the Crimea, Italy, and Mexico, and was promoted Colonel in 1869. During the siege of Metz he commanded the 41st Regiment of Infantry, and when Marshal Bazaine surrendered the fortress, he protested, with forty-two other officers, against his treachery. He was taken to Germany as a prisoner, but succeeded in making his escape, crossed Austria and Italy, and rejoined the army of the Loire. In January 1871 he was promoted General of Brigade, and commanded at Algiers. In 1873 he was elected to the Chamber of Deputies for his native Department of the Aube, and being relieved of his command, joined the Left Centre, and took a prominent part in the discussions on army re-organisation. He refused to be elected to the Senate, in order to devote himself exclusively to his military duties, and in May 1876 he was appointed to the command of the 58th Brigade of Infantry at Marseilles. In July 1878 he became a General of Division, and commanded Army Corps at Nancy, Algiers, and Châlons. When the occupation of Tunis was in progress, he returned to Algiers, and the French success there was greatly aided by his energy. In 1884 he succeeded General Lécointe as Governor of Paris, and during his long tenure of that difficult post, he succeeded in inspiring all parties with confidence in his abilities. During 1886, when General Boulanger was Minister of War, he protested in the press against the attacks of that Minister on the Paris garrison. On being reprimanded for this, he sent in his resignation, which created such a stir in high military quarters that he was persuaded to withdraw it. When M. Grévy retired from the Presidency in 1887, he took measures to repress vigorously any disturbances that might arise if M. Jules Ferry were elected in his place. During the great manoeuvres of 1891 he held the supreme command, and four corps d'armée obeyed his orders. In 1893 he reached the limit of age, but was granted a special dispensation, under which he remained at his post until recent years, when he was succeeded by General Zurlinden. He became a Grand Officer of the Legion of Honour in 1881, and was awarded the military medal

in 1882. Addresses: 9 Place Vendôme, Paris; and Château de Thimécourt, Seine et Oise.

SAVAGE, George Henry, M.D., F.R.C.P., was born at Brighton, Nov. 12, 1843, and is the second son of William Dawson Savage, J.P., of Brighton. He was educated at private schools at Brighton, then attended classes at Brighton College, and was pupil at the Sussex County Hospital, under Drs. Ormerod, Moon, Blaker, Lowdell, and others. He entered at Guy's after matriculating at the London University, and took his degree at that University, obtaining a Gold Medal for organic chemistry and materia medica, being bracketed with scholar in medicine at the final M.B., obtaining honours in obstetric medicine. He received the treasurer's Gold Medal at Guy's for clinical medicine, and held all the appointments open to students at Guy's Hospital, including the House Surgeonship. He then was appointed medical officer of the London Lead Company's mines in Nent-Head, Cumberland, where for over four years he had charge of a very extensive district. He left the North on his appointment to the assistant medical officership to Bethlehem in 1872, in succession to Dr. Rayner, who was appointed to Hanwell. He succeeded Dr. Rhys Williams as senior physician and superintendent in 1878, which post he held till 1888. He is now Lecturer on Mental Diseases at Guy's Hospital. He has been co-editor of the *Journal of Mental Science*, the organ of the Medico-Psychological Association, for over ten years, and has written a manual on insanity, besides many papers in the *Guy's Hospital Gazette* and other medical papers. He has been President of the Medico-Psychological Association, and also President of the Psychological Branch of the British Medical Association. He is ex-President of the Neurological Society, Vice-President of the Alpine Club, and sub-editor of the section "Mental Diseases" in Clifford Allbutt's "System of Medicine." He was secretary of the psychological section of the International Medical Congress held in London. He married (1) Margaret, daughter of Jacob Walton, Esq., of Greenends, Alston Moor, who died at the birth of her first child. He married (2), the daughter of Dr. Sutton, physician to the London Hospital, by whom he has one son. Address: 3 Henrietta Street, Cavendish Square, W.

SAVAGE, Richard Henry, author, soldier, diplomat, traveller, &c., was born in 1846 at Utica, New York, and educated at the United States Military Academy, West Point. He is descended from the

Savages of Worcester and the Ewarts of Stirling. His boyhood was spent in California from 1851 to 1864 among the wild scenes of western American life. Promoted as an honour graduate to be an officer of the Corps of Engineers, United States Army, he served upon the western frontiers until 1871. Transferred to the diplomatic service, he filled various high positions in Europe and America under General Grant's administration. Selected by General Sherman, he served as Major and Chief of Staff to Stone Pasha in Egypt. For some years he was identified with railroad construction and practical engineering, but since 1884 has devoted himself to travel and literature. He served with distinction in quelling the Kearny riots in San Francisco as Colonel of the National Guard, and afterwards qualified himself for the Bar, being admitted to practise in the Supreme Court of the United States. He is a member of many scientific and literary societies, and has travelled the whole world over, making special explorations in Siberia, Corea, Central America, Africa, and Russia. He is well known as a public speaker and lecturer upon graver matters, but has latterly gained distinction as a poet and writer of romantic fiction. In 1890 Colonel Savage selected New York City as a residence, and definitely devoted himself to literary pursuits. In eight years he has produced twenty-four volumes, novels, poems, and stories. His first novel, "My Official Wife," scored a wonderful success, and has been translated into seventeen languages, as well as extensively dramatised. "Prince Schamyl's Wooing," "In the Old Château," and "Delliah of Harlem" have been also notable hits. The works of this writer are published in the United States, England, and Germany, and have been translated into nearly all the Continental languages. Colonel Savage enjoys an enormous cosmopolitan acquaintance, the result of twenty-five years of travel and a life of the most stirring adventure. He spends a large portion of his time in Russia, his only daughter being married to a Russian noble of high rank.

SAVAGE-ARMSTRONG, George Francis, M.A., D.Lit., poet, born in the county of Dublin, May 5, 1845, is the third and only surviving son of the late E. J. Armstrong, Esq., and Jane, daughter and eventual co-heiress of the late Rev. Henry Savage, of Glaslary, J.P., Incumbent of Arkeem, co. Down, and representative of the Glaslary branch of the ancient Anglo-Norman family of Savage of the Ards. He received his early education partly in Dublin and partly in Jersey. In 1862 he made a long pedestrian tour in France

with his elder brother, the poet, Edmund Armstrong. In the same year he obtained a civil appointment in Dublin, and matriculated in Dublin University, where his career was most brilliant. In 1869 he published a volume of "Poems, Lyrical and Dramatic." In 1870 appeared "Ugone; a Tragedy," written for the most part during his residence in Italy. In 1871 he was appointed by the Crown Professor of History and English Literature in Queen's College, Cork, and a Professor of the Queen's University in Ireland; and the next year he was presented with the degree of M.A. by the Board of Trinity College, Dublin, in recognition of his "high literary character and attainments." In 1872 he published "King Saul" (the first part of the "Tragedy of Israel"), and new editions of "Poems, Lyrical and Dramatic," and "Ugone." In 1874 these were followed by "King David" (the second part of the "Tragedy of Israel"), and in 1876 by "King Solomon," which completed the Trilogy. In 1877 he published the "Life and Letters" of his late brother Edmund, together with a volume of his "Essays," and a new and enlarged edition of his "Poetical Works" (1st edit., 1865). In 1882 he was presented with the degree of Doctor of Literature, *honoris causa*, by the Queen's University, and was elected a Fellow of the Royal University of Ireland; and in the spring of the same year he published a volume of poems under the title of "A Garland from Greece," suggested by travels in Greece and Turkey a year or two before. In 1866 he published a new volume of poems entitled "Stories of Wicklow"; in 1887, "Victoria Regina et Imperatrix: a Jubilee-song from Ireland"; and in 1888, "Mephistopheles in Broadcloth: a Satire in Verse." In 1892 he published "One in the Infinite," a philosophical poem in three parts, and a new and enlarged edition of "Poems, Lyrical and Dramatic," and in the same year he was entrusted by the Board of Trinity College, Dublin, with the honourable duty of writing the Ode for the Tercentenary Festival of Dublin University, which was set to music by the late Professor Sir Robert Stewart, Mus. Doc., and performed with great *déclat* on the opening night of the Festival. In 1897, on the occasion of her Majesty's Diamond Jubilee, Mr. Savage-Armstrong published an ode in celebration of the event, entitled, "Queen-Empress and Empire," written in the old Anglo-Saxon alliterative measure, for which he was honoured by a gracious expression of her Majesty's thanks. Mr. Savage-Armstrong has delivered many public lectures on literary subjects to crowded audiences. He is a Vice-Presi-

dent of the National Literary Society of Ireland, a Vice-President of the Dublin University Amateur Dramatic Club (of which Sir Henry Irving is President), President of the Cork Shakespearian Society, and a member of various other learned societies. In Ireland he is known as the "Poet of Wicklow." In 1879 Mr. Savage-Armstrong married Marie Elizabeth, younger daughter of the late Rev. John Wrixon, M.A., Vicar of Malone, co. Antrim. In 1891, consequent upon the death of a maternal uncle, he assumed the additional surname of Savage, prefixed to Armstrong, as representative of his grandfather, the late Rev. Henry Savage, of Glaslary. Address: Beech Hurst, Bray, co. Wicklow.

SAVORY, Sir Joseph, Bart., M.P., D.L., J.P., was born on July 23, 1843, and is the son of Joseph Savory. He was educated at Harrow. He is an Alderman of the City of London, was Sheriff in 1882-83, and Lord Mayor in 1890-91. The German Emperor's visit to the city occurring during his Lord Mayoralty, he was created a baronet. He is Chairman of Princess Helena College, and Governor of the Royal Holloway College, Queen Anne's Bounty, and St. Bartholomew's and St. Thomas's Hospitals. He has sat as Conservative member of Parliament for the Appleby Division of Westmoreland since 1892. He is J.P. and D.L. for Westmoreland and Berks, and Lord of the Manors of Wharton and Nateby, Westmoreland. He married, in 1888, Helen Pemberton, daughter of Lieut.-Col. Sir George A. Leach, K.C.B. Addresses: 33 Upper Brook Street, W.; and Buckhurst Park, Sunninghill, Berks.

SAWYER, Sir James, M.D., F.R.C.P., F.R.S.E., J.P., son of James Sawyer, of Carlisle, was born at Carlisle in 1844, and educated at Queen's College, Birmingham. He became M.B. of University of London in 1867, taking this degree with first-class honours in Medicine; M.D. Lond. 1873; M.R.C.P. 1874. He was chosen a Fellow of the Royal College of Physicians of London in 1883, and a Fellow of the Royal Society of Edinburgh in 1891. He is in practice as a consulting physician. He was appointed Resident Physician at the Queen's Hospital, Birmingham, in 1867, Honorary Physician in 1871, Consulting Physician in 1889. He was appointed Professor of Pathology at the Queen's College, Birmingham, in 1875; Professor of *Materia Medica* in 1878, Co-Professor of Medicine in 1885. He has also been Honorary Physician to the Birmingham and Midland Hospital for Sick Children, President of the Birmingham Clinical Board (of the General and Queen's Hos-

pitals), President of the Midland Medical Society, President of the Birmingham and Midland Counties Branch of the British Medical Association, Vice-President of the New Sydenham Society (London), President of the Birmingham Blue-Coat School, editor of the *Birmingham Medical Review*. He was knighted in 1885, in recognition of his eminence as a physician and his long and valuable services to the Queen's Hospital, is a magistrate for Birmingham, and author of "Physical Diagnosis of Diseases of the Lungs and Heart, &c.," London, 1870, pp. 251; "Contributions to Practical Medicine," 1886, 2nd edition, pp. 201, 1891; "Notes on Medical Education," pp. 113, 1889; and has published essays upon "Floating Kidney," "Clinical Thermometry," "Phthisical Laryngitis," "Treatment of Eczema," "Treatment of Gastralgia," "Application of Sphygmograph," &c. He was President of the Birmingham Conservative Association, 1886-89; Chairman of the Midland Union of Conservative Associations (ten counties), 1886-90. He married Adelaide Mary, daughter of the Rev. J. Hill, B.A., F.S.A., Rector of Cranoe, Leicestershire, and has issue two sons and two daughters. Addresses: 31 Temple Row, Birmingham; and Haseley Hall, Warwick; &c.

SAXE-COBURG and GOTHA, Duke of, H.R.H. Prince Alfred Alexander William Ernest Albert, first Duke of Edinburgh, K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.V.O., the second son of her Most Gracious Majesty the Queen and his Royal Highness the late Prince Albert, was born at Windsor Castle, Aug. 6, 1844. His early education was entrusted to the Rev. H. M. Birch; from 1852 to F. W. Gibbs, Esq., C.B.; and in 1856 the Prince was placed under the special care of Major Cowell, R.E., and spent the winter of 1856-57 at Geneva, studying modern languages. Having decided upon joining the naval service, Prince Alfred was placed under the Rev. W. R. Jolly, at Alverbank, near Gosport, where he pursued the preparatory studies for his profession during the summer of 1858. He entered the service, after a strict and searching examination, Aug. 31, 1858, was appointed a Naval Cadet, and joined her Majesty's screw steam-frigate *Euryalus*, fifty-one guns, Captain John Walter Tarleton, C.B. After a leave of absence for a few weeks, Prince Alfred joined his ship for active sea-service, Oct. 27, 1858, and served in the *St. George* on various foreign stations, visited many of the countries on the shores of the Mediterranean, and extended his travels to America and the West Indies. In Dec.

1862 Prince Alfred declined the offer made to him of the throne of Greece. In Feb. 1866 Parliament granted him £15,000 a year, payable from the day on which he attained his majority, with an additional £10,000 on his marriage. He was created Duke of Edinburgh, Earl of Kent, and Earl of Ulster, in the peerage of the United Kingdom, May 24, 1866, and took his seat in the House of Lords, June 8. His Royal Highness was sworn in Master of the Trinity House, March 21, 1866, and received the freedom of the City of London, June 8. Early in 1867 the Duke was appointed to the command of the frigate *Galatea*, which sailed from Plymouth Sound, Feb. 26. Since then he has visited nearly every country in the world, proceeding first to Australia, where he met with an enthusiastic reception on the part of the inhabitants; and great indignation was felt at the dastardly attempt of an Irishman, named O'Farrell, to assassinate the Prince at a picnic held at Clontarf, near Port Jackson, New South Wales, on March 12, 1868. The Prince, however, was only slightly wounded in the back by a pistol-shot. O'Farrell was tried on March 31, found guilty, and executed on April 21. His Royal Highness subsequently visited Japan (where he was received both publicly and privately by the Mikado), China, and India. In 1873 he went to Italy, and on April 20 had an audience with the Pope in Rome. On Jan. 23, 1874, his marriage with the Grand-Duchess Marie Alexandrovna, only daughter of Alexander II., Emperor of Russia, was celebrated with great pomp at St. Petersburg; and on March 12 the Duke and Duchess, accompanied by her Majesty the Queen, made a public entry into London amid much popular enthusiasm. He and the Duchess celebrated their silver wedding at Coburg on Jan. 23, 1899. His Royal Highness is Duke of Saxony and Prince of Saxe-Coburg-Gotha. In Nov. 1882 he was promoted to the rank of Vice-Admiral in her Majesty's fleet; and since that time he has held various important commands. In 1888 his Royal Highness, in command of the Mediterranean Squadron, visited some of the chief continental capitals, and on the occasion of his visit to Madrid he was invested with the Order of the Golden Fleece by the Queen-Regent of Spain. He gave up his command in 1889. On the death of H.R.H. the Duke of Saxe-Coburg and Gotha, on Aug. 22, 1893, the Duke of Edinburgh succeeded him in the Duchy, and took the oath of loyalty to the constitution in the German Emperor's presence, afterwards paying him a state visit at Potsdam. He had previously (June 1888) been promoted to the rank (honorary) of an Infantry

General in the German Army. The Prince of Saxe-Coburg resides a portion of every year in England, and keeps up an establishment at Clarence House. He thus retains the annuity of £10,000 given him in 1873, but has voluntarily relinquished the annuity of £15,000 conferred on him in 1866. As a foreign sovereign he has ceased to be a Privy Councillor. He was created G.C.V.O., at the Birthday in 1899.

SAXE-COBURG AND GOTHA, Duchess of, Her Royal Highness **Marie Alexandrovna**, Grand-Duchess of Russia, only daughter of the late Emperor of Russia, and sister of the present Emperor, was born at St. Petersburg, Oct. 17, 1853, and was married at St. Petersburg to his Royal Highness Prince Alfred, Duke of Edinburgh. On Oct. 15, 1874, the Duchess gave birth at Buckingham Palace to a son, who, on the 23rd of the following month, was baptized by the names of Alfred Alexander William Ernest Albert, the sponsors being Queen Victoria, the Emperor of Russia, the Emperor of Germany, the Prince of Wales, the Crown Princess of Germany, and the Duke of Saxe-Coburg-Gotha. Prince Alfred died on Feb. 6, 1899. The Duchess of Edinburgh's other children are the Princess Marie Alexandra Victoria, born Oct. 29, 1875; the Princess Victoria Melita, born at Malta, Nov. 25, 1876; the Princess Alexandra Louise Olga Victoria, born at Coburg, Sept. 1, 1878; and the Princess Beatrice Leopoldine Victoria, born April 20, 1884. Her eldest daughter, the Princess Marie, was married at Sigmaeringen, on Jan. 10, 1893, to the Crown Prince of Roumania, and has issue, Prince Carol, born Oct. 15, 1893, and a daughter, Princess Elizabeth; and her second daughter, Princess Victoria Melita, was married at Coburg to the Grand-Duke of Hesse in April 1894, and has issue, a girl. Her third daughter, Alexandra, was married in 1896 to Ernest, Hereditary Prince of Hohenlohe-Langenburg, and has issue, Prince Godefroi.

SAXE-WEIMAR, H.H. Field-Marshal Prince William Augustus Edward of, K.P., G.C.B., P.C., Colonel of the 1st Life Guards, was born at Bushey Park in 1823, and is the eldest son of the late Duke Bernard of Saxe-Weimar-Eisenach and Princess Ida, daughter of George, Duke of Saxe-Meiningen. He entered the Grenadier Guards in 1841, and served through the Crimean campaign, being present at the battles of Alma, Balaklava, Inkerman, and Sebastopol. From 1870 to 1876 he commanded the Home District, and from 1878 to 1883 the Southern District, while from 1885 to

1890 he was in command of the Forces in Ireland. His Highness was sworn of the Privy Council (Ireland) in 1885, and was created K.P. in 1890, G.C.B. (Military) in 1887, and raised to the rank of Field-Marshal in 1897. He married, in 1851, Lady Augusta Catherine Gordon-Lennox daughter of the 5th Duke of Richmond she being subsequently granted the title of Princess Edward of Saxe-Weimar in England, and of Countess of Dornburg, in Germany. Address: 16 Portland Place, W.

SAXONY, King of. See ALBERT, KING OF SAXONY.

SAYCE, The Rev. Archibald Henry, M.A., LL.D., D.D., Professor of Assyriology at Oxford, born at Shirehampton, near Bristol, Sept. 25, 1846, is the eldest son of the Rev. H. S. Sayce, Rector of Caldicot, and was educated partly at home, and partly at Grosvenor College, Bath. He became Scholar of Queen's College, Oxford, in 1865, was first class in Moderations in 1866, first class in the Final Classical Schools in 1868, and was elected a Fellow of his College in 1869, Tutor in 1870. He was ordained Deacon in 1870, and Priest in 1871. He became Deputy-Professor of Comparative Philology in 1876; was appointed Professor of Assyriology at Oxford University in 1891, and is a Foreign Member of the Royal Academy of Madrid, Honorary Centenary Member of the Asiatic Society of Bengal, Honorary Member of the American Anthropological Society, the Peking Oriental Society, &c. He is President of the Society of Biblical Archaeology. He received an honorary LL.D. degree in Dublin in 1881, and an honorary D.D. degree in Edinburgh in 1889. He has published: "Outlines of Accadian Grammar," in the *Journal of Philology*, 1870; "An Assyrian Grammar for Comparative Purposes," 1872; "The Principles of Comparative Philology," 1874 (2nd edit., 1875); "The Astronomy and Astrology of the Babylonians," 1874; "An Elementary Assyrian Grammar and Reading Book," 1875 (2nd edit., 1877); "Lectures on the Assyrian Syllabary and Grammar," 1877; "Babylonian Literature," 1877; "Critical Examination of Isaiah xxxvi.—xxxix., the Chaldean Account of the Deluge, and the Date of the Ethnological Table of Genesis," in the *Theological Review*, 1873-74; "The Jelly-Fish Theory of Language," in the *Contemporary Review*, April 1876; "The Karian Inscriptions," in the *Transactions of the Society of Biblical Arch.*, ix. 1; "Accadian Phonology" in *Transactions of the Philological Society*, 1877; "The Tenses of the Assyrian Verb" in the *Transactions of the R.S.A.*, 1877; "Introduction to the Science of Language,"

2 vols., 1880; "The Monuments of the Hittites," 1881; "The Vannic Inscriptions Deciphered and Translated," 1882; "Herodotus, i.—iii." 1883; "The Ancient Empires of the East," and "Fresh Light from the Ancient Monuments," 1884; "Introduction to Ezra, Nehemiah, and Esther," and "Assyria," and decipherment of "The Inscriptions of Mal-Amir," 1885; "Presidential Address to the Anthropological Section of the British Association," 1887; "Life and Times of Isaiah," and "The Hittites," 1889. Mr. Sayce has edited the late George Smith's "History of Babylonia," 1877, and "Sennacherib," 1878; and "Chaldean Genesis," 1879, and the second series of "Records of the Past," 1888-90. In 1891 he wrote largely on Greek papyri. In 1893 appeared his edition of Vaux's "Ancient History from the Monuments," and in 1894 "The Higher Criticism and the Verdict of the Monuments" (C.K.S.). In the same year he contributed chapters to Flinders Petrie's "Tell El Amarna." His most recent publications are: "Patriarchal Palestine," "The Egypt of the Hebrews and Herodotus," 1895; "Murray's Handbook to Egypt," 1896; "The Early History of the Hebrews," 1898. He has also edited the English translations of Maspero's "Dawn of Civilisation," and "Struggle of the Nations." In May 1898 he had in the press (1) "Early Israel and the Surrounding Nations," and (2) "The Life and Customs of the Babylonians and Assyrians." In 1887 he delivered the Hibbert Lectures on "The Religion of the Ancient Babylonians," and presided over the Anthropological Section of the British Association. Professor Sayce left Oxford in November 1890, to spend the winter in Egypt, and since that time has spent more than half the year on the Nile in his tahabia, *Istar*, engaged in exploration and literary work. Addresses: 23 Chepstow Villas, W.; Queen's College, Oxford; Cairo; and Athenæum.

SCHÄFFER, Professor Edward Albert, LL.D. Aberdeen, M.R.C.S., F.R.S., was born in Hornsey in June 1850, and is the third son of the late J. W. H. Schäfer, of Highgate. He was educated at Clewer House School, Windsor, and in the Medical School of University College, London, gaining at the University of London the scholarships in Zoology and in Anatomy and Physiology. He was for some time assistant to Dr. Burdon Sanderson, and is famous as a physiological investigator, and from 1883 to 1899 was Jodrell Professor of Physiology at University College, London, having been appointed first Sharpey Scholar in 1873, and Assistant-Professor of Physiology in 1874. Since 1895 he has

been General Secretary of the British Association. In 1878 he was elected F.R.S., and was a member of Council of the Royal Society, 1890-92. In succession to the late Professor Rutherford he was elected Professor of Physiology in the University of Edinburgh in 1899. He is well known for his "Course of Practical Histology," "Essentials of Histology," and as editor of the "Advanced Text-Book of Physiology." "Histology" and "Embryology" in the 8th, 9th, and 10th editions of Quain's "Anatomy" are from his pen; he has edited ten numbers of the "Collected Papers of the Physiological Laboratory of University College," and has contributed many papers to the *Transactions* and *Proceedings of the Royal Society*, and other leading scientific periodicals. Addresses: Croxley Green, Rickmansworth; and Athenæum.

SCHARLIEB, Mary Ann Dacomb, M.D. Lond., 1888; M.S. 1896, &c. &c., is the wife of Dr. Herbert Johann Scharlieb, and received her medical training at the London School of Medicine for Women, and at the Madras Medical College and the University of Vienna. She obtained the M.B. and B.Sc. at the London University in 1882, being Scholar and Gold Medallist and gaining other honours in medical subjects. In December 1889 she passed the M.D., London, and is the first lady to attain to that distinction. Mrs. Scharlieb is Senior Surgeon at the New Hospital for Women, Lecturer on the Diseases of Women at the London School of Medicine for Women, Queen's Lecturer on Gynæcology to the National Association of Nurses, and was formerly Superintendent at the Royal Victoria Hospital, Madras, Lecturer at the Madras Medical College, and Examiner at Madras University. In 1897 she published a "Review of Surgery at the New Hospital for Women" in the *British Medical Journal*. Address: 149 Harley Street, W.

SCHIAPARELLI, Giovanni Virginio, F.R.S., was born March 14, 1835, in Savigliano, Piedmont. He took the degree of Doctor of Mathematics in the Royal University, Turin, in 1854, and in 1859 became First Assistant in the Brera Observatory, Milan. In 1862 he was appointed Director of the same institution. He has published some memoirs on shooting stars, on double stars, on Mars, Mercury, and Venus, and on several other astronomical subjects. Address: Royal Observatory, Milan, Italy.

SCHILLER, Madame (formerly Mdle. Yvette Guilbert), French singer, first attracted notice at the Cafés Concerts of

Paris by her extremely artistic rendering of songs dealing with exclusively Paris subjects. She is a serious artist, and believes that the music-hall singer has a high dramatic calling. She has often visited London professionally, as well as America. In 1897 she married M. Schiller. Paris address: 79 Avenue de Villers.

SCHILLING, Johann, a German sculptor, was born at Mittweida, in Saxony, June 23, 1828. After studying with Rietschel and Hänel he made his début as a sculptor in 1851 with a beautiful group, "Amor and Psyche." Working then in Berlin with Drake, the artist of the Victory Column, he produced a pair of relief medallions—"Jupiter and Venus," which procured him a travelling scholarship; and the result of the two years' residence in Italy which he was thus enabled to spend were his "Wounded Achilles" and his "Centaur and Venus." Returning to steady industry in Dresden he turned out in rapid succession a variety of high productions; and on the death of Rietschel undertook the execution of the city of Spire figure for the Luther monument at Worms. Equal admiration was bestowed on his "Four Seasons" on the Brühl Terrace in Dresden, his Schiller statue in Vienna, his Maximilian statue in Trieste, and his War Memorial at Hamburg, not to mention other creations, which were all surpassed and crowned by the Grand National Monument, on the edge of the Niederwald, overlooking the Rhine. This was unveiled by the Emperor William, Sept. 28, 1883. On June 18, 1889, his statue of King Johann was unveiled at Dresden.

SCHLESWIG-HOLSTEIN, H.S.H. Prince Christian Victor Albert Louis Ernest Anton of, G.C.B., G.C.V.O., was born on April 14, 1867, and is the eldest son of their Royal Highnesses Prince and Princess Christian. He was educated at Magdalen College, Oxford, joined the King's Royal Rifle Corps, and has risen to be Major. He served in the Ashanti campaign of 1895-96, and at the battles of the Atbara and Khartoum, 1898. In December 1898 he was created G.C.V.O.

SCHLEY, Rear-Admiral Winfield Scott, American naval officer, was born near Frederick, Maryland, Oct. 9, 1839. Graduating from the U.S. Naval Academy in 1860, he served in the U.S. frigate *Niagara* in Chinese and Japanese waters, after carrying the Japanese Embassy back to their own country in 1860 and 1861. He was promoted to Master in 1861, and ordered to the U.S. frigate *Potomac*, and while serving on her was present at the

occupation of Mexico by the combined forces of England, France, and Spain, early in 1862. He was commissioned Lieutenant in July 1862, and participated in the operations which led to the capture of Port Hudson, in Louisiana, in 1863. From 1864 to 1866 he was attached to the steam gunboat *Wateree* in the Pacific squadron, and suppressed an insurrection among the Chinese coolies on the Chincha Islands in 1864. He became Lieut.-Commander in 1866, and in 1871 participated in the attack on the forts on the Salee River in Corea. After his return to the U.S. he was ordered to the Naval Academy as head of the department of modern languages in 1872. He became Commander in 1874, and commanded the *Essex* in 1876. He commanded the Greely Relief Expedition in 1884, and on June 22 rescued Lieutenant Greely and six survivors at Cape Sabine. In 1889 he commanded the *Baltimore* as Captain, and was in her during the trouble with Chili in 1891. He became Commodore in 1898, and on the breaking out of war with Spain he was put in command of a squadron and went to the West Indies, where he was the ranking officer actually present at the destruction of the Spanish squadron off the coast of Cuba, July 3, 1898. After that battle he was made a Rear-Admiral and received the thanks of Congress.

SCHNADHORST, Francis, was born at Birmingham, 1840, and educated at King Edward VI.'s Grammar School of that town. In 1873 he was invited by the leading Liberals of Birmingham to reorganise the party in the city. He became secretary of the Liberal Association, and speedily made for it a considerable reputation through the country. His services were recognised by the presentation of a purse of a thousand guineas and an address in the Birmingham Town Hall on April 9, 1877, the presentation being made by Mr. J. Chamberlain, M.P. Under Mr. Schnadhorst's organisation, Liberal associations upon the lines of the Birmingham organisation were established in most of the English constituencies; and in 1887 these associations were banded together in the National Liberal Federation, of which body Mr. Schnadhorst became Secretary. The inaugural meetings of the new national organisation were attended by Mr. Gladstone. In 1884 Mr. Schnadhorst resigned the secretaryship of the Birmingham Association, and was made its Chairman of Committee. In the following year he was appointed President, but resigned that post on leaving Birmingham to take up his residence in London, to which place the headquarters of the National Liberal Federation were removed after the split

in the Liberal party upon the Irish question. On March 9, 1887, Mr. Schnadhorst was entertained at a banquet at the Hotel Métropole, and was there presented with a national testimonial of ten thousand guineas and an illuminated address. Lord Burton presided at the banquet, and Sir Wm. Harcourt was the chief speaker. A letter was read from Mr. Gladstone expressing his sense of the services which Mr. Schnadhorst had rendered to the party. On coming to London Mr. Schnadhorst accepted the post of honorary secretary to the Liberal Central Association, which office he still retains. Ill-health has compelled Mr. Schnadhorst during recent years to pay lengthened visits to Australia, Egypt, and to South Africa. On his return from Africa in 1890, Mr. Schnadhorst addressed himself again to the organisation of the Liberal party, and was rewarded by its triumph at the General Election in 1892. In 1893 Mr. Schnadhorst resigned the secretaryship of the Federation, and was elected Chairman of its Committee, which post he held until his retirement in the autumn of 1894, owing to ill-health. Mr. Schnadhorst has been frequently invited to enter Parliament, but has hitherto declined all requests. Address: Woodford Green.

SCHNEIDER, Hortense Catherine, a French actress, born at Bordeaux about 1835, displayed while very young an aptitude for the stage, and at the age of fifteen played with applause in "Michel et Christine" at the Athénée of her native city. An old teacher named Schaffner gave her lessons in singing, and she subsequently spent three years at Agen, playing secondary parts. Going to Paris, she obtained an engagement in the company of the Bouffes-Parisiens, and on Sept. 19, 1853, made her début in "Le Chien de Garde" at the Théâtre des Variétés. Here she met with considerable success, which was increased by her performances at the Théâtre du Palais Royal, where she made her first appearance, Aug. 5, 1858. In Dec. 1864 Mdle. Schneider returned to the Variétés, and elicited great applause by her acting in "La Belle Hélène." She achieved a success even more signal in "La Grande-Duchesse de Gérolstein" during the Universal Exposition of 1867, and appeared in the same part in London in July 1868. In the following year she returned to the Bouffes-Parisiens. On her marriage, in 1881, she retired from the stage.

SCHOFIELD, Alfred Taylor, born June 4, 1846, is the eldest son of Robert Schofield, Esq., of Heybrook, Lancashire, and Mary, eldest daughter of James

Taylor, Esq., of Ravenswood, Croydon. He was educated by private tutors in Devonshire, &c., and at Elizabeth College, Guernsey, passing the Senior Cambridge Local Examination. He entered the London Hospital in 1879, whence he passed out in 1883 First Prizeman in Medicine and Obstetrics, and second in Surgery. While there he held the post of House Physician to Dr. Langdon Down. He took the diplomas of both Colleges, M.R.C.S. Eng. and L.R.C.P. Lond., and in 1884 passed the examination for M.D. in all subjects in honours at the University of Brussels. The same year he commenced general practice, but soon turned his attention to the treatment of nervous diseases, in which he has now for some years been almost exclusively engaged. Struck with the unconscious mental origin of most of these diseases, he studied psychology, and became a member of the Philosophic Institute. He is the author of a book on "The Unconscious Mind," dealing *in extenso* with the unconscious psychic forces within, and of works on "The Formation of Habit in Man," "Some Relations of Mind and Body," "The Natural and the Artificial," "Nerves in Order and Disorder," "Faith Healing," and "The Fourth Dimension," as well as of various papers in the *Lancet*, &c. He helped to found the Friedenheim Hospital for the Dying, of which he is a Trustee and Hon. Physician. He holds the latter post also in the Homes for Working-Girls, the Factory Girls' Union, the Morley Homes for Working-Men, the Church Army, &c. Dr. Schofield is also Member of the British Medical Association and Sanitary Institute, Member of Council Central Hospital Committee, Lebanon Hospital for Insane, District Nurses' Association, Royal British Nurses' Association, Chairman Parents' National Educational Union, Member of Council and Examiner to the National Health Society and the British College of Physical Education, Consulting Physician to Bishopstoke Asylum, Bedford. Soon after commencing practice Dr. Schofield's attention was drawn to the deplorable general ignorance of personal and domestic hygiene, and for many years most of his leisure time has been absorbed by seeking to make this an integral part of the education of every woman. In this cause he enlisted the sympathy and active co-operation of hygienic reformers, and eventually succeeded in 1895 in getting hygiene added to the subjects for the Oxford and Cambridge Local Examination. He has continued actively working in the cause, and has written and spoken much on the subject. Among his works are two manuals of physiology, "Personal and Domestic Hygiene," "How to Keep

Healthy," "Health at Home Tracts," as well as numerous articles in the periodicals and reviews. He is also an active religious worker, and has written many religious books. Address: 141 Westbourne Terrace, Hyde Park, W.

SCHOFIELD, General John M'Allister, was born in Chautauqua County, New York, Sept. 29, 1831. He graduated at the Military Academy at West Point in 1853, and served two years in Florida as Lieutenant of the 1st Artillery. From 1855 to 1860 he served at West Point as Assistant-Professor of Natural and Experimental Philosophy, and from 1860 to 1861 was Professor of Physics at Washington University, St. Louis. Soon after the outbreak of the Civil War he was appointed Brigadier-General of Volunteers, and in November 1862 Major-General of Volunteers, commanding in Missouri and Kansas, with head-quarters at St. Louis. In February 1864 he took command of the Army of the Ohio, and joining the combined armies under General Sherman bore a prominent part in all their operations to the close of the war. He was appointed Brigadier-General in the regular army in 1864 and Major-General in 1869. In 1867 he was placed in command of the First Military District, consisting of the State of Virginia. In 1868 he was appointed Secretary of War, but resigned in 1869, and was given the command of the Department of the Missouri, and in 1870 of the Division of the Pacific. From 1876 to 1881 he was Superintendent of the Military Academy at West Point. In 1882 he was again given the command of the Division of the Pacific; from which in 1883 he was transferred to the command of the Division of the Missouri, with head-quarters at Chicago; and in 1886 to the Division of the Atlantic, with head-quarters at Governor's Island, New York City. After the death of General Sheridan, in August 1888, he was in command of the army with head-quarters at Washington, until retired because of the age limit, Sept. 29, 1895. In February preceding his retirement he had received promotion to be Lieut.-General of the army. In 1897 he published "Forty-six Years in the Army."

SCHREINER, Olive (Mrs. Cronwright), a South African authoress, is the second daughter of a Lutheran clergyman in Cape Town, and was born in the early sixties. At the age of twenty she came to England with the manuscript of her best-known work, "The Story of an African Farm." She was anxious to devote herself to physiological study, but the publication of her book, after it had been submitted to Mr. George Meredith,

who saw in it great promise, led her to devote herself to literature. "The Story of an African Farm," by "Ralph Iron," achieved immense popularity, and in 1893 had run through many editions. A later work by Olive Schreiner is entitled "Dreams," 5th edit., 1893, a collection of occasional parables. In May 1893 she again visited England, and in October she published a little African story, "Dream Life and Real Life," in the Pseudonym Library. Her most notable book of recent years has been the controversial tale "Trooper Peter Halket of Mashonaland," 1897. Her latest work (July 1899) is "An English South African's View of the Situation," being a critique on the Transvaal imbroglio from a philo-Boer point of view. In February 1894 Miss Schreiner married a young colonist, Mr. Cronwright. She is the sister of the Hon. W. P. Schreiner, Q.C., C.M.G.

SCHREINER, The Hon. William Philip, Q.C., C.M.G., Cape Premier, is the son of a German missionary to South Africa and an English lady, Miss Tindell, who still lives in a convent at Grahamstown. He was born in 1859. He was educated at the Cape University, where he carried everything before him. He then came to England, entered Downing College, Cambridge, and was Senior in the Law Tripos in 1881, obtaining the Vice-Chancellor's medal. He gained an Inns of Court studentship, and was called to the Bar at the Inner Temple in 1882. Then he returned to the Cape, and soon secured a good practice before the Supreme Court, and was appointed Counsel to the High Commissioner of South Africa. When Mr. Rhodes became Prime Minister in 1893, Mr. Schreiner was appointed Attorney-General, and on President Krüger closing the Drifts to all colonial traffic in 1895, he advised the Government that the action of the South African Republic was entirely opposed to the terms of the London Convention. This opinion being supported by the Imperial Government, the pressure brought to bear on the Transvaal nearly resulted in war. In 1897, however, when he was a witness before the British South Africa Committee of the House of Commons, his evidence was that arbitration would have been a better solution of the difficulty, although he still maintained that the London Convention had been violated. Mr. Schreiner was a leading witness before the South Africa Committee, and his description of his interview with Mr. Cecil Rhodes on the day on which news of the Jameson Raid reached Cape Town, and of Mr. Rhodes's reiterated exclamation, "Jameson has upset my apple-cart," formed one of the

sensational incidents of the inquiry. Mr. Justice Bigham, as a member of the Committee, had taken a view strongly in favour of the Uitlanders, and he subjected Mr. Schreiner to a very searching interrogatory. The struggle was an intellectual one, and has been regarded as one of the most notable displays of mental power ever witnessed in a parliamentary committee room. The Government of Sir Gordon Sprigg (*q.v.*) was defeated in July 1898, on a motion of want of confidence moved by Mr. Schreiner, by a majority of 41 against 36. Thereupon, the Government appealed to the country, and the General Election of September 1898 left them in a minority of one, which the election of the Speaker, Dr. Berry (*q.v.*), increased to two. Mr. Schreiner then brought forward another vote of want of confidence, by which the Government were defeated by 39 to 37. He accordingly was called upon to form a Ministry, and, although he professes steadfast loyalty to the Imperial crown, it is felt that Mr. Hofmeyr of the Africander Bond really directs the policy of the new combination. Holding office with such a small majority, he had to consent in the early days of his administration to a conference with the opposition led by Mr. Rhodes, on the subject of a Redistribution Bill, which, if carried, will be the knell of his party. Mr. Schreiner is the brother of Miss Olive Schreiner ("Ralph Iron"). He is married to a daughter of Mr. Retz, for many years the President of the Orange Free State. Address: Sweet Repose, Cape Town.

SCHUNCK, (Henry) Edward, Ph.D., F.R.S., was born in Manchester on Aug. 16, 1820, and is the youngest son of the late Martin Schunck, foreign merchant. On the completion of his school education, he was sent to Germany to study chemistry, as it was intended that he should take the direction of his father's large print and calico works in Manchester. At Berlin, under Rose and Magnus, he made first-rate progress, and under Liebig, at Giessen, he took the degree of Ph.D. On returning to England, Dr. Schunck engaged for some years in practical work, but finding this repugnant to his tastes and inclination, he gave it up, and devoted himself to pure science. It is in consequence, however, of his early connection with print and dye work, that his attention was directed more especially to the chemistry of colouring matters, a knowledge of which is most essential to the proper understanding of dyeing processes. The research which Dr. Schunck conducted in Germany was "On the Action of Nitric Acid on Aloes." The chief result

of this investigation was the discovery of a new and remarkable nitro-acid with curious optical properties, called "chrysammic acid." The acid crystallises in golden-yellow laminæ, sparingly soluble in water, and it reacts like a strong bibasic acid. The product of the action of ammonia on the acid belongs to the class of which oxamic acid is the type, but it was discovered and described before the latter. By the action of reducing agents on "chrysammic acid" a remarkable substance, resembling indigo-blue, is produced, "hydrochrysammide," which crystallises in blue needles with a coppery lustre. This body has formed the subject for many subsequent investigations. The next subject which occupied the attention of Dr. Schunck was the class of substances contained in various species of lichens. Several memoirs resulted from this investigation, notably one read to the Chemical Society, in 1842, "On some of the Substances contained in the Lichens employed for the preparation of Archil and Cudbear." Among all the colouring matters there are none the study of whose properties and reactions is calculated to throw more light on the whole class than those which are prepared by an artificial process from certain kinds of lichens. Dr. Schunck, in common with many other philosophers, was surprised that lichens, a class of plants themselves colourless, should yield colouring matters by the combined action of ammonia and oxygen. Another paper on this subject appeared in 1846, being a special research "On the Substances contained in the *Roccella tinctoria*," which derives its interest from the fact of its being that species of lichen from which the finest kind of archil dye is prepared. From 1846 to 1855 Dr. Schunck was at work on the subject of the colouring matters of madder, then one of the most important dye-stuffs used in calico-printing, but which has since been replaced by artificial alizarin. Dr. Schunck investigated the properties of "rubian" at great length, and read several memoirs on the subject to the Royal Society. In 1854 Dr. Schunck produced, among other papers, one "On the Action of the Ferment of Madder on Sugar," being one of a series of papers on various ferments. Dr. Schunck discovered a very interesting fact, unique in the history of fermentation, viz., the production of succinic acid. That important subject, the formation of indigo-blue, next occupied Dr. Schunck; and in 1855 he read to the Literary and Philosophical Society of Manchester a long investigation "On the Formation of Indigo-blue." An investigation by Dr. Schunck, "On the Occurrence of Indigo-blue in Urine," appeared in the *Philoso-*

phical Magazine in 1857, and in the following year one "On a yellow Colouring Matter obtained from the leaves of the *Polygonum fugopyrum*, or Common Buckwheat," was read to the Manchester Society. On the discovery of the artificial formation of alizarin in 1867—a discovery by which the names of Græbe, Liebermann, and Perkin have been immortalised—Dr. Schunck undertook an investigation of the products formed at the same time, and discovered, partly in conjunction with Dr. Roemer, three new bodies isomeric with alizarin, viz., anthraflavic acid, iso-anthraflavic acid, anthrarufin, which, singular to say, have no dyeing properties whatever. From 1868 to 1873 he was engaged on investigations of anthraflavic acid, a yellow colouring matter accompanying artificial alizarin. In 1874 a paper "On Methyl-Alizarin and Ethyl-Alizarin" appeared. During the last few years he has been engaged in the study of chlorophyll, the green colouring matter of plants, and has arrived at interesting results as regards the chemical nature of that substance, one of the most important of all known compounds, its presence being essential in connection with the growth of most plants. An investigation undertaken by him in connection with Mr. George Brebner has led to the conclusion—important from a physiological point of view—that the green cells of leaves and other vegetable organs contain some form of active oxygen. One of his most pleasing and interesting researches was commenced in 1879, and the first communication on the subject was read to the Chemical Society of London, in September of that year, entitled, "On the Purple of the Ancients." This colour, which in ancient times was extracted from various kinds of sea shellfish and applied to the dyeing of linen and woollen fabrics, has at all times excited the interest of the curious, and has been made the subject of numerous learned treatises. Of the investigations undertaken by Dr. Schunck, one may be mentioned of technical rather than of purely scientific interest, "On Some Constituents of Cotton Fibre," in which it is shown that cotton fibre contains, in addition to cellulose, a number of other substances, some of which may possibly play a part in the process of dyeing cotton fabrics. Dr. Schunck has been a Fellow of the Royal Society since 1850, and has taken much interest in the affairs of the Manchester Literary and Philosophical Society, in which he has held the post of Secretary, Vice-President, and President; and was President of the Chemical Section of the British Association at its meeting in Manchester in 1887. In 1896-97 he held the office of President of

the Society of Chemical Industry, and at the annual general meeting of the Society at Manchester in 1897 delivered an address, which was published *in extenso* in their *Journal*. In March 1898 he received from the Manchester Literary and Philosophical Society the Society's Dalton Medal (bronze) for his researches, particularly those on colouring matters. In 1851 he married Judith, daughter of John Brooke, of Stockport. Address: Kersal, Manchester.

SCHURMAN, Jacob Gould, American educator, was born at Freetown, P.E.I., May 22, 1854. In 1870 he won a Scholarship at Prince of Wales College, Charlottetown, and in 1875 he won the Canadian Gilchrist Scholarship in connection with the University of London, and two years later graduated there with the University Scholarship in Philosophy. In 1877-78 he was a student in Paris and Edinburgh, and in June 1878 he won the Hibbert Traveling Fellowship, spending the ensuing two years as Hibbert Fellow at Heidelberg, Berlin, and Göttingen, as well as in Italy. He became a Professor at Acadia College, N.S., in 1880, and in 1882-86 was Professor of Metaphysics and English Literature in Dalhousie College, Halifax. From that date he was head of the Philosophical Department at Cornell University, Ithaca, N.Y.; and in 1892 became President of the University, a position which he still (1898) holds. He was elected a Fellow of the American Association for the Advancement of Science in 1895. He has published "Kantian Ethics," 1881; "Ethical Import of Darwinism," 1887; "Belief in God," 1890; and "Agnosticism and Religion," 1896.

SCHURZ, Carl, was born at Liblar, near Cologne, Germany, March 2, 1829. He was educated at the Gymnasium of that city, and at the University of Bonn. In 1848 he became associated with Gottfried Kinkel, in editing a revolutionary journal, and subsequently he participated in the insurrectionary movement in South Germany. At the surrender of the fortress of Rastadt, he escaped into Switzerland, whence in May 1850 he returned secretly to Germany and rescued Kinkel, who had been sentenced to twenty years' imprisonment in the fortress of Spandau. The two escaped to Leith, Scotland. Schurz then went to Paris as a newspaper correspondent, but a year later returned to London as a teacher. In 1852 he went to the United States, remained in Philadelphia for two years, and then settled in Wisconsin, and became prominent as a political orator in the German, as well as the English language. The following year he was

nominated by the Republicans for Lieut.-Governor of the State, but was defeated. In 1861 he was appointed Minister to Spain, where he remained till December 1861. Returning to the United States, he resigned his office, and entered the army, and in the May following was appointed Brigadier-General of Volunteers. He took part in the second battle of Bull Run, was promoted to the rank of Major-General, and commanded a division in the battles of Chancellorsville and Gettysburg. In the autumn of 1863 he went to Tennessee, and took part in several battles, but resigned after the close of the war in 1865. In the summer of 1865 he was sent by President Johnson on a confidential mission into the Southern States, and his elaborate report on their condition was published by Congress. In 1866 he removed to Detroit, Michigan, where he founded and edited for some time the *Detroit Post*. In 1868 he removed to St. Louis, and in 1869 was elected U.S. Senator from Missouri. He opposed President Grant's San Domingo policy, and in several speeches advocated the return to specie payments. In the Presidential canvass of 1872 he united with that portion of the Republican party known as Liberals, who nominated Mr. Greeley for President, in opposition to General Grant; but on the defeat of Mr. Greeley he, with most of the Liberals, returned to the regular Republican party; and in 1876 took an active part in the canvass for Mr. Hayes, by whom he was in 1877 appointed Secretary of the Interior. During his occupancy of that position he seconded Mr. Hayes's efforts at a reform of the civil service by instituting competitive examinations for appointments to clerkships in his department. At the expiration of his term, 1881, he removed to New York, and was the editor of the *Evening Post* until August 1883. Since then he has been engaged in literary pursuits. In 1884 he took a leading part in the Independent movement in the Presidential campaign, opposing the election of James G. Blaine and advocating that of Grover Cleveland. He published a "Life of Henry Clay," in 2 vols., in 1887, and a biographical sketch of Abraham Lincoln in 1891. In 1888 he visited Germany, and was received with distinction by Prince Bismarck, the present Emperor (then Crown Prince), and many of the prominent public men of the Empire. In the same year he wrote a public letter in favour of the re-election of President Cleveland. In 1893 he was elected President of the National Civil Service Reform League, succeeding George William Curtis, deceased.

SCHUSTER, Professor Arthur, Ph.D., F.R.S., son of Francis Joseph

Schuster, of London, was born in Frankfurt-on-Main, on Sept. 12, 1851, and educated in the Gymnasium of that city, until he went to Geneva in his eighteenth year, where he attended the lectures given at the academy. His parents having settled in Manchester in 1869, he joined them there in the following year and entered business in his father's firm. In October 1871, however, all intentions of a commercial career were relinquished, and he pursued his studies first at the Owens College, and then at the University of Heidelberg, where Kirchhoff held the Chair of Physics. He took his degree of Ph.D. while at Heidelberg. During the session 1873-74, he held the post of Honorary Demonstrator in the Physical Laboratory of the Owens College. After having spent a few months in Helmholtz's Laboratory in Berlin, he was appointed, early in the year 1875, by the Council of the Royal Society, chief of the Eclipse expedition which was then about to leave England for Siam. In 1881 a Professorship of Applied Mathematics was founded at the Owens College, and he was appointed to the chair, which he held till 1888, when he succeeded Balfour Stewart as Professor of Physics. He took part on four different occasions in observations of total solar eclipses:—the Siamese eclipse, which has already been mentioned; the eclipse in Colorado, which took place in 1878; the 1882 eclipse in Egypt, in which he photographed for the first time, on plates prepared by Captain Abney, the spectrum of the solar corona; and finally the eclipse of 1886, in the West Indies. He was elected a Fellow of the Royal Society in 1879. In 1892 he was President of Section A of the British Association, which met at Edinburgh during that year. He was appointed by the Council of the Royal Society to give the Bakerian Lecture in 1884 and 1890, on the discharge of electricity through gases. He is the author of several papers published in the *Transactions and Proceedings of the Royal Society*, and the *Reports of the British Association*; amongst others a paper, published by the Royal Society in 1884, in which the experimental proof was first given that the apparent repulsion observed in Crookes's radiometer is due to the residual gas left in the vacuum. The *Philosophical Transactions* of the year 1889 contain a full discussion of the diurnal variation of terrestrial magnetism, in which it is proved that the cause of variation is to be found in the earth's atmosphere. A number of his papers "On the present state of Spectrum Analysis," are published in the *Reports of the British Association*. During the last few years Prof. Schuster's time has principally been given up to the investigation of the dis-

charge of electricity through gases. At the annual meeting of the Royal Society in 1893, he received one of the Royal Medals for his spectroscopic researches, and for his investigations concerning the electric discharge in gases and in terrestrial magnetism. He is married to the eldest daughter of George Loveday, of Wardington, Oxfordshire. Addresses: 4 Anson Road, Victoria Park, near Manchester; and Athenæum.

SCHWANN, Charles Ernest, M.P., was born on Jan. 25, 1844, and is the fifth son of F. Schwann, of London. He was educated at Owens College, Manchester, and at University College, London. He is a prominent Manchester merchant, and has been secretary, treasurer, and president of the Manchester Liberal Association. He was at one time President of the Manchester Reform Club, and for nine years of the National Reform Union. He has been a Director of the Manchester Chamber of Commerce. Elected to Parliament as Liberal member for North Manchester in 1886, he is at present the only Liberal M.P. for that ancient school of his party. As a member of the House of Commons he has interested himself in Indian affairs, and was instrumental in abolishing the Paddy Tax in Ceylon. The Armenian Question has also commanded his earnest attention. He carried the bill for granting the franchise to policemen in municipal and School Board elections. Address: 4 Prince's Gardens, S.W.

SCLATER, Philip Lutley, M.A., Ph.D., F.R.S., F.L.S., F.G.S., F.R.G.S., of Odiham Priory, Winchester, Hants, second son of the late W. L. Sclater, Esq., of Hoddington House, Hants, and younger brother of the Right Hon. George, Lord Basing, born in 1829, was educated at Winchester School, and at the age of sixteen was elected Scholar of Corpus Christi College, Oxford, where he graduated in 1849, taking a first class in mathematics. He was subsequently a Fellow of the same College until 1862, and in 1897 was re-elected an honorary Fellow. He was called to the Bar at Lincoln's Inn in 1855, and went the Western Circuit for several years; became secretary to the Zoological Society of London in 1859, was elected F.R.S. in 1861, and was made Doctor Philosophiæ by the University of Bonn (*honoris causa*) in 1860. He was elected to the Athenæum under Rule II. in 1896. He is editor of the *Ibis*, a journal of ornithology, and is author of a "Monograph of the Tanagrine Genus *Calliste*," "Monograph of the Jacamars and Puff-Birds," "Zoological Sketches," "Catalogue of American Birds," "Guide to the Gardens of the

Zoological Society of London," of three volumes of the "Catalogue of Birds in the British Museum," and of upwards of 800 papers and memoirs on ornithology and other branches of natural history in the *Transactions and Proceedings* of the Zoological Society, the *Journal of the Linnean Society*, the "Annals of Natural History," and in the *Ibis*, the *Natural History Review*, and the *Journal of Science*. Of his numerous scientific papers a catalogue has been prepared, and was published at Washington, U.S.A., by the Smithsonian Institution in 1896, under the title, "Bibliography of the Published Writings of P. L. Sc Slater." In 1875 Mr. Slater was appointed Private Secretary to his brother, then the Right Hon. G. Slater-Booth, President of the Local Government Board (afterwards Lord Basing), but resigned that office in 1877. In the same year he became one of the general secretaries to the British Association for the Advancement of Science, and continued to act in that capacity until 1882. He is also a member of the Council of the Royal Geographical Society. Mr. Slater married, in 1862, Jane Anne Eliza, youngest daughter of the late Sir David Hunter-Blair, Bart., of Blairquhan, Ayrshire, and has issue. His son, Captain Slater, R.E., died at Zanzibar in July 1897. Addresses: 3 Hanover Square, W., &c.; and Athenæum.

SCOBLE, Sir Andrew Richard, Q.C., K.C.S.I., M.P., was born in London on Sept. 25, 1831, and is the second son of John Scoble, of Kingsbridge, Devon, at one time a member in the Parliaments of the Dominion of Canada. He was educated at the City of London School, and was called to the Bar at Lincoln's Inn in 1856. From 1872 to 1877 he was Advocate-General and member of the Legislative Council, Bombay, and from 1886 to 1891 Legal Member of Council of Governor-General of India. In 1899 he became treasurer of Lincoln's Inn. In 1892 he was returned to the House of Commons as Conservative member for Central Hackney, which he now represents. He took silk in 1876, became a Bencher in 1879, a C.S.I. in 1889, and K.C.S.I. in 1890. He has translated historical works by Guizot and Mignet. Addresses: Chivelston, Wimbledon Common; and Athenæum.

SCOTT, Charles Prestwich, M.P., J.P., was born at Bath, Oct. 26, 1846, and is the youngest son of Mr. Russell Scott and his wife, Isabella Prestwich, sister of the late Prof. Sir Joseph Prestwich, F.R.S. He was educated privately, and at Corpus Christi College, Oxford, where he graduated M.A.; first class honours Final Classi-

cal School, 1869. In 1872 he became editor of the *Manchester Guardian*, and in 1874 a member of the firm of Taylor, Garnett & Co., proprietors of that paper. He unsuccessfully contested North-East Manchester in 1886, 1891, and 1892 against Sir James Fergusson. He was selected for the Leigh Division of Lancashire in 1895. He has taken an active part in political and other public works in Manchester, is President of the Manchester Liberal Union, and a member of the governing bodies of the Victoria University, the Owens College, the Manchester Grammar School, and Hulme's Trust. In 1874 he married Rachel, youngest daughter of the late Rev. John Cook, D.D., Professor of Ecclesiastical History in St. Andrews University. Address: The Firs, Fallowfield, Manchester.

SCOTT, Right. Hon. Sir Charles Stewart, G.C.M.G., G.C.B., Ambassador at St. Petersburg, was born in Ireland, March 17, 1838, and is the fourth son of the late Major Thomas Scott, of Willsborough, co. Londonderry. He was educated at Cheltenham and Trinity College, Dublin, and entered the Diplomatic Service in 1858. After seeing service at many capitals, he was appointed Chargé d'Affaires at Coburg in 1879, and in 1886 Secretary of Embassy at Berlin, being created C.B. in the same year. In 1888 he went to Switzerland as Minister, and in 1889 he was Plenipotentiary to the Samoan and Labour Conferences at Berlin. He was transferred to Copenhagen in 1893, and to his present post in June 1898, in succession to Sir Nicholas O'Connor (q.v.). He was created G.C.M.G. at New Year, 1899, and G.C.B. at the Birthday in the same year. Address: British Embassy, St. Petersburg. Clubs: St. James's, and Travellers'.

SCOTT, Clement William, son of the Rev. William Scott, Vicar of St. Olave, Old Jewry, London, was born Oct. 6, 1841, at Christ Church Parsonage, Hoxton, London, and educated at Marlborough College, Wiltshire, under the late Dr. G. E. Cotton, Bishop of Calcutta, and Dr. Bradley, the present Dean of Westminster. He was appointed to a clerkship in the War Office in 1860, and retired on a pension in May 1879. He then joined the editorial staff of the *Daily Telegraph*, to which paper he had contributed dramatic criticisms and special articles since 1871. Previous to that time, Mr. Scott was successively dramatic critic to the *Sunday Times* (1863), the *Weekly Dispatch*, and the *Observer*. He is the author of "Lays of a Londoner," 1882; "Poems for Recitations," 1884; and "Lays and Lyrics," all

books of lyrical and dramatic poems, principally contributed to *Punch* after Mr. Burnand became editor. He has also written "Round about the Islands," "Poppy Land Papers," 1886; and "Blossom Land (2nd edit.), 1891, being collections of holiday articles contributed to the *Daily Telegraph* and other papers, and was for many years the dramatic critic on the staff of the *Illustrated London News*. In 1891 he edited the life and reminiscences of E. L. Blanchard, and in 1892 was part author of "The Fate of Fenella." Recently he has been round the world, and the result in print was "Pictures of the World," 2nd edit., 1894. Among many other popular books written by Clement Scott from time to time may be mentioned "The Wheel of Life," a volume of literary, journalistic, and dramatic recollections: "From 'The Bells' to 'King Arthur,'" a collection of criticisms on various plays produced by Sir Henry Irving at the Lyceum Theatre; and "Among the Apple Orchards" and "Sisters by the Sea," collections of holiday articles and essays. Among the successful plays of which Mr. Clement Scott has been author, or part author, are "Diplomacy," "Peril," "The Vicarage," "Off the Line," and "The Cape Mail." Mr. Scott has written about plays and players for a period now extending to nearly forty years, and is the doyen of the dramatic critics of England. Mr. Clement Scott married (1) Isabel Busson du Maurier, sister of the late George du Maurier; and (2) Constance Margaret, daughter of Horatio Brandon, a London solicitor. Addresses: 15 Woburn Square, W.C.; and Athenæum.

SCOTT, Dukinfield Henry, M.A., Ph.D., F.R.S., F.L.S., F.G.S., youngest son of Sir George Gilbert Scott, R.A., architect, and great-grandson of the Rev. Thomas Scott, author of a "Commentary on the Bible," was born in 1854, and educated privately, and at Christ Church, Oxford. After taking his degree in 1876 he studied botany under Professor Sachs at Würzburg, where he obtained the degree of Ph.D. in 1881. He was Assistant-Professor of Botany at University College, London, from 1882 to 1885, and Assistant-Professor, with sole charge of botanical teaching, at the Royal College of Science, South Kensington, from 1885 to 1892. He resigned the latter post in order to carry on botanical investigations at Kew, where he is now Honorary Keeper of the Jodrell Laboratory at the Royal Gardens. He is joint-translator, with Professor F. O. Bower, F.R.S., of De Bary's "Comparative Anatomy of the Phanerogams and Ferns" (1884), joint-editor with Professor Howes of Huxley and Martin's "Elementary Bio-

logy" (1888); author of an "Introduction to Structural Botany," and one of the editors of the "Annals of Botany." Numerous papers, principally referring to anatomical botany, have been published by him in the scientific journals, and he is the author of several memoirs on the structure of fossil plants (partly in conjunction with the late Professor W. C. Williamson, F.R.S.), published in the *Phil. Trans. of the Royal Society*. He was President of the Botanical Section of the British Association, Liverpool Meeting, 1896, and is a Vice-President of the Linnean Society. Addresses: The Old Palace, Richmond, Surrey; and Jodrell Laboratory, Kew Gardens.

SCOTT, Major-General Sir Francis Cunningham, K.C.B., K.C.M.G., J.P., was born in 1834. He entered the Black Watch in 1852, and in 1881 attained the rank of colonel. He served through the Crimean war, the Mutiny, and the Ashanti war of 1874. In 1891 he was appointed Inspector-General of the Gold Coast Constabulary, and in 1895 was placed in command of the second Ashanti expedition. It will be remembered that in that year considerable disagreement arose between the British authorities and the King of Kumasi, who in 1894 had declared himself King of Ashanti, a state which lies inland at the back of the central portion of the Gold Coast Colony. An ultimatum was finally despatched to the king requiring his assent to the establishment of a British protectorate over Ashanti, and to the placing of a British commissioner at Kumasi. He was also required to abandon the slave-trade, foreign conquest, and the system of human sacrifices, which, forming part of the ritual of his particular kind of negro fetish-worship, had made him horribly conspicuous in the annals of savagery. The king took no notice of the ultimatum, and an expedition was despatched against him under the command of Sir Francis Scott, which easily reduced him to submission. His country was placed under British protection, and a Resident was appointed at Kumasi. The English losses in this expedition resulted chiefly from fever, and the most melancholy was that of the late Prince Henry of Battenberg. Sir Francis Scott was created K.C.M.G. in 1892, and, for his services in the Ashanti campaign of 1895, K.C.B. (military) in 1896. He is one of the Queen's Gentlemen-at-Arms. He married, in 1859, Mary Olivia, daughter of the Rev. E. J. Ward. Address: Accra, Gold Coast.

SCOTT, Hugh S., novelist, writing in the name of "Henry Seton Merriman,"

has published the following books: "The Phantom Future," 1889; "Suspense," 1890; "Prisoners and Captives," 1891; "From one Generation to Another," and "The Slave of the Lamp," 1892; "With Edged Tools," 1894; "The Grey Lady," 1895; "Flotsam," "Dross," "The Money-Spinner," and "From Wisdom Court" (the latter in collaboration with S. G. Tallentyre), 1896. His best-known book, "The Sowers," appeared in the same year, and he has since published "In Kedar's Tents," 1897; and "Roden's Corner," 1898.

SCOTT, The Hon. Sir John, K.C.M.G., was born at Wigan in 1841, and is the son of Edward Scott, solicitor, of that town. He was educated at Bruce Castle School, Tottenham, and at Pembroke College, Oxford (M.A. 1868). He was called to the Bar at the Inner Temple in 1865, joined the Northern Circuit, was Judge, and afterwards Vice-President of the International Court of Appeal in Egypt from 1874 till 1882, and from the latter year to 1890 was Judge of the High Court of Bombay. He was Judicial Adviser to the Khedive of Egypt from 1890 to 1898, and in October 1898 became Deputy-Judge-Advocate-General. Oxford University conferred upon him the Hon. D.C.L. in June 1898. He was created K.C.M.G. in 1894. He married, in 1867, Leonora, daughter of Frederick Hill, one of the Secretaries of the General Post Office. Addresses: Cairo, Egypt; Malabar House, St. Albans.

SCOTT, Sir John Murray, Bart., J.P., was born at Boulogne, on Feb. 23, 1847, and is the eldest son of the late John Scott, M.D. He was educated at Marlborough College, at the University of Paris, and in Germany. He was called to the Bar in 1869, and was private secretary to the late Sir Richard Wallace, Bart., M.P., from 1871 to 1890. He is a Trustee of the National Gallery, having been appointed to a newly-created trusteeship in 1897, and a J.P. for co. Antrim. He was created a Baronet at New Year, 1899. Addresses: Hertford House, Manchester Square; and Castle House, Lisburn, co. Antrim.

SCOTT, Robert Henry, M.A., D.Sc., F.R.S., youngest son of James Smyth Scott, Q.C., and Louisa, daughter of the Hon. Charles Brodrick, D.D., Archbishop of Cashel, Secretary of the Meteorological Council, born in Dublin, at 3 Merrion Square South, on Jan. 28, 1833, was educated at Rugby, and Trinity College, Dublin, where he graduated as First Senior Moderator in Experimental Physics in 1855. He was appointed Lecturer in Mineralogy to the Royal Dublin Society in 1862, and Director

of the Meteorological Office in 1867, a title changed to Secretary of the Meteorological Council in 1877. Since 1874 he has been Secretary of the International Meteorological Committee, which organises occasional meetings and conferences in the various capitals of Europe. Mr. Scott is author of a "Manual of Volumetric Analysis," 1862; "Weather Charts and Storm Warnings," 1876; "Elementary Meteorology," 1883; and of various papers on geology and meteorology in the *Transactions* of scientific societies. Mr. Scott is responsible for the daily weather forecasts which are one of the features of the modern newspapers. He married, in 1865, Louisa, daughter of the Hon. W. Stewart, Island Secretary, Jamaica. Addresses: 6 Elm Park Gardens, S.W.; and Athenæum.

SCOTTER, Sir Charles, late General Manager of the London and South-Western Railway, was born in 1835. Originally connected with the Manchester, Sheffield, and Lincolnshire Railway, he was knighted in 1895 for his long services to the public in connection with the now greatly prospering L. and S. W. R. He is now Director of that line, and Chairman of the Great Northern and City Railway. In February 1899 he was elected Deputy-Chairman for the ensuing year of the London and South-Western Railway, the new Chairman being the Hon. H. W. Campbell. He was presented with his portrait, by H. J. Wells, R.A., on his retirement from the General Managership of the L. and S. W. R. The presentation took place in March 1899, and represented some 13,000 subscribers. He is a Lieutenant-Colonel in the Engineer and Railway Volunteers. Address: Surbiton Hill Park, Surrey.

SCRUTATOR. See MACCOLL, CANON MALCOLM.

SCUDDER, Horace Elisha, American writer, was born at Boston, Massachusetts, Oct. 16, 1838. He graduated at Williams College in 1858, and soon after went to New York, where he taught for three years. In 1862 his first book "Seven Little People and their Friends," appeared, and for a time his principal attention was given to writing for the young. Returning to Boston he edited the *Riverside Magazine* from 1867 to 1870, and then became associated with the publishing house which now bears the name of Houghton, Mifflin and Co., first as partner and afterwards as editorial adviser and manager. In 1890, upon the resignation of Mr. Aldrich, he added to his duties the editorship of the *Atlantic Monthly*. In addition to editorial work and voluminous periodical contributions, Mr. Scudder has published

"Dream Children," 1863; "Life and Letters of David Coit Scudder" (his brother), 1864; "Stories from my Attic," 1869; "The Bodley Books," 8 vols. 1875-87; "The Dwellers in Five Sisters' Court," 1876; "Stories and Romances," 1880; "The Children's Book," and "Boston Town," 1881; "Noah Webster," 1882; "History of the United States," 1884; "George Washington," 1886; "The Book of Folk Stories," and "Men and Letters," 1887; and "Childhood in Literature and Art," 1894. He was also joint-author with Mrs. Taylor of the "Life and Letters of Bayard Taylor," 1884; was one of the writers of Bryant and Gay's "History of the United States," and of Justice Winsor's "Memorial History of Boston," 1880-81; and edited the series of "American Commonwealth," and also "American Poems," 1879; and "American Prose," 1880.

SEALE-HAYNE, The Right Hon. Charles, J.P., M.P., born in 1833, was educated at Eton, and is the son of Charles H. Seale-Hayne, of Fuge, Dartmouth. He was called to the Bar at Lincoln's Inn in 1857. He has sat as Liberal member for the Ashburton Division of Devonshire since 1885. He was Paymaster-General of the Forces from August 1892 to the dissolution of the Gladstone Government in 1895. He is J.P. for Devon and Middlesex, was appointed Hon. Colonel of the 3rd Battalion of the Devonshire Regiment in 1895, and was first Chairman of the Dartmouth Harbour Commission. He was sworn of the Privy Council in 1892. In February 1899 he was appointed Treasurer of the Cobden Club. Addresses: 6 Upper Belgrave Street, S.W.; and Kingswear Castle, Dartmouth.

SEAMAN, Owen, member of the staff of *Punch*, son of the late William Mantle Seaman, was born on Sept. 18, 1861. He was educated at Shrewsbury School, of which he was captain in 1880, and at Clare College, Cambridge. He was a foundation scholar of Clare from 1881 to 1884, and in 1882 winner of the Porson University Prize for Greek Verse. In 1883 he was in the first class in the Classical Tripos, and from 1884 to 1885 Master at Rossall School. In 1888 he became Lecturer on Literature at the Durham College of Science, Newcastle-on-Tyne, and in 1890 Professor in the newly appointed Chair of Literature in that College. In 1888 he became Extension Lecturer of the Syndicate of Cambridge University, and in '93 Lecturer to the London Society for the Extension of University Teaching. He published at Cambridge "Paulopostprandials," in 1883;

in 1888, "With Double Life," and "Œdipus the Wreck." In 1894 he began to write in the *National Observer*, also for *Punch* and the *World* ("Nauticus"). He published in 1895 "Horace at Cambridge," and "Tillers of the Sand: a Fitful Record of the Rosebery Administration from the Triumph of Ladas to the Decline and Fall Off," also wrote "Rossall, an Ode," which has been set to music. In 1896 he published "The Battle of the Bays," which has gone through several editions. In 1897 he was called to the bar at the Inner Temple, and in the same year was appointed a member of the staff of *Punch*. Present address: The Tower House, Putney.

SEARLE, Rev. Charles Edward, D.D., Master of Pembroke College, Cambridge, was educated at Pembroke College, Cambridge, and stood 10th Wrangler in the Mathematical Tripos (M.A. 1854). He was ordained Deacon in 1854, and Priest in 1855. He was Fellow of his College from 1851 to 1880, when he was appointed Master. He was Tutor of Pembroke College for twenty years (1870-90), was Lady Margaret Preacher in 1871, and Vice-Chancellor in 1888-89. He has published several religious works, among which we may mention "The Clerical Fellow's Stewardship," 1878. Address: Master's Lodge, Pembroke College, Cambridge.

SEBAG-MONTEFIORE, Sir Joseph, J.P., is the son of Solomon Sebag, and was born in 1822. On succeeding in 1885 to the estate of his maternal grandfather, Sir Moses Montefiore, he assumed the additional surname. He is a Lieutenant of the City of London, and was knighted in 1896. Addresses: 4 Hyde Park Gardens, W.; and East Cliff Lodge, Ramsgate.

SEDDON, John Pollard, son of Thomas Seddon, was born Sept. 19, 1827, at London House, Aldersgate Street, E.C., and educated at Bedford Grammar School. He was articled 1848-51 to Professor Donaldson, architect, and from 1852 to 1862 was in partnership with John Prichard, diocesan architect, at Llandaff. In 1862 he settled in London, where he has since practised. His principal works are the restoration of Llandaff Cathedral in connection with Mr. Prichard, and numerous churches, parsonages, and schools in Llandaff Diocese; Lambeth Place Chapel; St. Nicholas and St. James', Great Yarmouth; St. Barnabas', near Swindon; St. James', Redruth; St. Peter's Orphanage and Sanitarium, Thanet; University College and Llanbadern Church, Aberystwith; Hoarwithy Church, Herefordshire; man-

sions at Abermaide, Merionethshire; Rosdohan, County Kerry; Oxted, Surrey; Roughwood, Bucks, &c.; North and South Wales Bank, Birkenhead. He has published "Progress in Art and Architecture," 1852; in 1859 "Memoir and Letters of the late Thomas Seddon, Artist," and in 1868 "Rambles in the Rhine Provinces."

SEDDON, Right Hon. Richard John, LL.D., Premier of New Zealand, son of Thos. Seddon and Jane Lindsay, was born at Eccleston, in Lancashire, in 1841, and emigrating to Victoria at the height of the gold fever in 1863, as a mechanical engineer, he soon grasped the possibilities of colonial life. In 1867 he married Miss L. J. Spotswood at Williamstown, and soon after removed to New Zealand. His first public office was as Chairman of the Westland Provincial Council, and he was the first Mayor of Kumara. In 1879 he was returned to the House of Representatives as member for Hokitika, and afterwards for Kumara (1881), and Westland (1890). In January 1891 he accepted office in the Ballance Ministry as Minister of Mines; afterwards he was Minister of Public Works, and in 1895 he became Premier. He came to England in 1897 for the Jubilee, when he was made a Privy Councillor.

SEDGWICK, Adam, M.A., F.R.S., Fellow and Tutor of Trinity College, Cambridge, and Reader of Animal Morphology in the University, was born in Norwich on Sept. 28, 1854, and is the eldest son of Richard Sedgwick, Vicar of Dent, Yorks. He was educated at Marlborough and Trinity College, Cambridge. He was appointed F.R.S. in 1886, and served on the Council of the Royal Society in 1892-94. He has contributed many papers, sometimes written in collaboration with the late Maitland Balfour, to the learned *Transactions*, &c., the subject in very many cases being the anatomy of the embryo chick. He married a daughter of Captain Robinson, of Armagh, in 1892. Address: Whitefield, Great Shelford, Cambridge.

SEELEY, Professor Harry Govier, F.R.S., F.R.G.S., F.L.S., F.Z.S., &c., born in London, Feb. 18, 1839, is the second son of Richard Hovill Seeley, and is of Huguenot descent on his mother's side through the Goviers of the Vale of Taunton. He was educated privately; attended lectures at the Royal School of Mines by Sir A. Ramsay, Edward Forbes, and Sir R. Owen; and afterwards at Sidney Sussex College, Cambridge. In 1859 the late Rev. Adam Sedgwick, F.R.S., invited him to arrange the fossils in the Woodwardian Museum, and this work continued till

1871, with teaching of Field Geology and Palæontology and occasional lectures for the Professor. In 1876 he was appointed Professor of Geography and Lecturer on Geology in King's College and Queen's College, London; of Queen's College he became the Dean in 1881. He originated in 1885, and has since conducted, the London Geological Field class, having published in 1891 a handbook for its use. He became a member of the British Association for the Advancement of Science in 1861, and subsequently Fellow of the Geological, Linnean, Zoological, and Royal Geographical Societies. He was elected Fellow of the Royal Society in 1879. His original writings, about 120 in number, relate to Palæontology and other departments of geology, and to Comparative Anatomy. He has published a "Catalogue of Fossil Reptiles in the Woodwardian Museum," 1869; the "Ornithosauria," 1870; "Physical Geology and Palæontology," 1885, issued as vol. i. of Phillips's Geology; "The Freshwater Fishes of Europe," 1886; and "Factors in Life," 1887; "Fossil Reptilia," 1887; and "Story of the Earth in Past Ages," 1895. He has studied the Fossil Reptilia in the public museums of France, Belgium, Holland, North and South Germany, Austria, Russia, and Cape Colony, from which country he has collected several new types of reptiles. His scientific memoirs are contained in the publications of the Geological, Linnean, and Royal Societies, the *Geological Magazine*, and *Annals of Natural History*. Among the results of his researches was the discovery (1865) that the Fossil Reptiles named Pterodactyles, are more nearly related to birds than are living reptiles; this was made out by evidence from the breathing organs and brain. He regarded (1865) the succession of geological deposits of different mineral character as evidence of changed geographical outlines of ancient lands; and explained the changes in fossil life of successive deposits as results of migration of faunas consequent on geographical changes. He enunciated the mechanical law in 1866, that growth is in proportion to work done; and regarded it as explaining the different proportions of organs and of animals. In 1869 he founded the genus Ornithopsis on a vertebra in the British Museum which had previously been regarded as part of the skull of *Iguanodon*, indicated it as a new ordinal group of reptiles, which have since been found in the Isle of Wight and the United States. He discovered that *Ichthyosaurus* was viviparous, 1880, and that some *Plesiosaurs* were viviparous, 1887. In a Croonian lecture of the Royal Society, 1887, the Fossil Reptilia of South Africa were found to be a link between

the existing Amphibia and Mammalia. Professor H. G. Seeley received from the Geological Society the Murchison Fund, 1876, and the Lyell Medal, 1885. He was made a Foreign Correspondent of the Academy of Sciences of Philadelphia in 1878; Corresponding Member Kk. Geologische Reichsanstalt, Vienna, in 1879; and member of the Imperial Society of Naturalists of Moscow in 1889. Address: 25 Palace Gardens Terrace, Kensington, W.

SEFTON, Earl of, Charles William Hylton Molyneux, Bart., K.G., Knight Grand Cross of the Order of the Tower and Sword, was born on June 25, 1867, and succeeded his father, the 4th Earl, in 1897. He is a Lieutenant in the Lancs. Hussars, Yeomanry Cavalry. Addresses: 37 Belgrave Square, S.W.; and Croxteth Hall, Liverpool, &c.

SELBORNE, Earl of, William Waldegrave Palmer, J.P., Under-Secretary for the Colonies, was born on Oct. 17, 1859, and is the son of the 1st Earl, the eminent Lord Chancellor Selborne, and Laura, daughter of the 8th Earl Waldegrave. He succeeded his father in 1895. He was educated at Winchester College, and University College, Oxford, where he obtained a first class in the Modern History School. He was Assistant Private Secretary to the Right Hon. H. C. E. Childers, Chancellor of the Exchequer, from 1882 to 1885. As Viscount Wolmer he was Member of Parliament for East Hampshire, first as a Liberal and afterwards as a Liberal Unionist from 1885 to 1892, when he was returned for West Edinburgh. He represented that constituency until 1895, when he entered the Upper House, and was appointed Under-Secretary for the Colonies. He is a Major in the Hants Militia, and co. Alderman. He married, in 1883, Lady Beatrix Maud Cecil, daughter of the Marquis of Salisbury. Addresses: 49 Mount Street, W.; and Blackmoor, Petersfield, Hants.

SELLA, Vittorio, was born at Biella, in N. Italy, in August 1859, and is distinguished as a mountaineer, geographer, and photographer. Between 1881 and 1890 he received many medals and diplomas for photography in London, Turin, Vienna, and Florence; and in the last year he received the Murchison award in recognition of his recent journey in the Caucasus, and his series of panoramic photographs of the chain. He has written many memoirs, the last being "*Nel Cáucaso Centrale: Excursioni colla camera oscura*," and he is well known as having obtained the largest, and probably the

best, views of the Alps; also as having made, in 1882, the first winter ascent of the Matterhorn, and in 1884 of Monte Rosa.

SELOUS, Frederick Courtenay, explorer, naturalist, and sportsman, was born in London on Dec. 31, 1851. His father was of Huguenot extraction, and on his mother's side he is descended from the Bruces of Clackmannan. He was educated at Bruce Castle and at Rugby, where he was famous for his high spirits, his love of violent mischief, and his personal courage. His schoolfellows showed their appreciation of his character by converting his name of Selous into "Zealous," which became his nickname. When sixteen years of age he left Rugby and spent a couple of years in Switzerland and Germany, where he learnt French and German, the former, as he thinks, with inherited facility. Whilst in the latter country he attracted some notice in the local papers by jumping into the Rhine during winter after a wild duck which he had shot. He had on a greatcoat and top-boots which filled with water, and though a splendid swimmer he found great difficulty in getting to shore with the game. Whilst still quite a youth he had determined to cast his lot in South Africa. At nineteen he sailed from England, and in 1871 first set foot upon the shores of Algoa Bay. In 1881 he published his first work, "*A Hunter's Wanderings in Africa*." This won instant recognition, but its author received more credit from the critics and the general public for his wonderful prowess as a hunter than for what he had done as a naturalist and an explorer. From the Royal Geographical Society, however, he received successively the Cuthbert Peake grant, the Back premium, and finally, in 1893, the Founders' Gold Medal, the highest honour which it is in their power to bestow. Such honours are not gained by hunting, and the map of Africa, to which he has so largely contributed, will show how Mr. Selous won them. His services to natural history have also received recognition from the Zoological Society, who have made him one of their corresponding members. In 1893 Mr. Selous published his second and now well-known work, "*Travel and Adventure in South-East Africa*." Amongst other matter of varied and often of thrilling interest, it contains an account of the historic pioneer expedition which its author so successfully led. During the first Matabele campaign Mr. Selous fought with great gallantry on the side of the colonists, and was wounded whilst bravely protecting some waggons which had been surprised by the enemy. On his return to

England after the campaign, he characteristically defended his fellows-in-arms from charges of bloodthirstiness and cruelty brought against them by Mr. Labouchere. The controversy ran for some months in the columns of the *Times* during 1894. Mr. Selous returned to Matabeleland in 1895, raised a troop when the native rebellion broke out in March 1896, and served throughout the campaign until the disbandment of the Bulawayo Field Force. Afterwards he wrote an account of the outbreak of the rebellion in a book entitled "Sunshine and Storm in Rhodesia." He came home to England, and will probably not return to Africa except on short visits. He has been again involved in controversy, in the columns of the *Times*, this time with Mr. White, on charges similar to those previously brought against his friends in South Africa. He married recently Marie Katherine Gladys, daughter of Canon Maddy, Down Hatherley, Gloucestershire. English address: Alpine Lodge, Worplesdon, Surrey.

SELVES, M. de, Préfet of the Seine, was born at Toulouse, July 19, 1848. During the war of 1870, he was a Captain of Mobiles, and became Bâtonnier, or Head of the Bar, at Montauban. Before occupying his present post, he governed the Departments of the Oise, and the Meurthe et Moselle, and had been the Director of the General Post Office. He replaced M. Poubelle in 1896. Address: Hôtel de Ville, Paris.

SELWYN, The Rev. Edward Carus, head-master of Uppingham School, was born Nov. 25, 1853, at Lee, Kent. His father was the Rev. E. J. Selwyn, then head-master of Blackheath Proprietary School, and latterly (till 1893) the Rector of Pluckley, Kent. The family includes many names of scholars and divines, notably the late Bishop Selwyn of New Zealand and Lichfield, and his brothers, Professor Selwyn of Cambridge, and Sir Charles Jasper Selwyn. Mr. Selwyn was educated at Blackheath Proprietary School and at Eton; whence, after obtaining the Newcastle scholarship, he proceeded, in 1872, to King's College, Cambridge, of which college he was elected a scholar. As an undergraduate, he obtained the Carus Greek Testament Prize in 1872; was Bell's Scholar in 1873; and Browne's Medallist 1874 and 1875. In 1876 he graduated B.A. as 7th Classic; was very shortly afterwards elected to a Fellowship; and from 1876 to 1878 was Assistant Classical Lecturer at King's College. He was ordained in 1879, and held, for some months, a curacy at St. Paul's, Jarrow-on-Tyne, of which the Rev. Canon Edward

Liddell was rector. He returned to Cambridge in 1880, as Divinity Lecturer of Emmanuel College, and Dean and Divinity Lecturer of King's College. On the retirement of the late Canon Butler in 1882, Mr. Selwyn was offered and accepted the Principalship of Liverpool College. In 1887 he succeeded Mr. Thring as Head-Master of Uppingham School, the position he now holds. He married (1) a daughter of Thomas Arnold, Esq., Professor in the Royal Irish University, second son of Dr. Arnold of Rugby; and (2) Maud Stuart Dunn, first cousin of his first wife. Address: Uppingham School.

SEMBRICH, Marcella, a distinguished vocalist, was born at Lemberg, Galicia, Feb. 15, 1858, and for some years studied the piano and violin, firstly under her father, and before she was six she appeared on the concert platform. While receiving piano lessons from Liszt in Vienna, it was discovered that she had a splendid voice, and she was at once sent to Milan to study singing under Lamperti. She made her début as an opera singer in Athens in "I Puritani," 1877, and then returned to Vienna for further study; she subsequently appeared in Dresden, and remained at the Royal Opera House till 1880. She soon became a great favourite in the characters of "Zerlina," "Susanna," "Constance," "Martha," "Lucia," &c. In 1880 she made her first appearance in London. Mdle. Sembrich has sung in all the principal cities of Europe, and has been everywhere received with the greatest enthusiasm. In 1883-84 she was a member of Mr. Abbey's Italian Opera Company at New York, where she created a great sensation by the compass of her voice and the brilliance of her execution.

SEMON, Sir Felix, M.D., F.R.C.P., was born at Danzig, in Eastern Prussia, on Dec. 8, 1849. His father was the late Mr. S. J. Semon, stockbroker, of Danzig, later of Berlin; his mother the eldest daughter of the late Alderman S. Aschenheim, of Elbing. He received his education at one of the Berlin High Schools, between 1856 and 1868, and from 1868 to 1874 studied medicine at Heidelberg and Berlin. His studies were interrupted by the Franco-German war, through which he served as a volunteer in the 2nd Uhlans of the Guard (medal and five clasps). In 1873 he passed the examination for the M.D. of Berlin; in 1874 the German States examination. After the completion of his official course of studies he went to Vienna, Paris, and London, with a view of seeing practice abroad. Having been appointed Clinical Assistant at the Throat Hospital, Golden Square, in 1875, he

determined to settle in London and to practise as a specialist for diseases of the throat and nose. In 1876 he passed his examination for the Membership of the Royal College of Physicians, and was elected a Fellow in 1885. In 1877 he became Physician to the Throat Hospital, Golden Square, in 1882 Assistant-Physician, and some years later, Physician in charge of the Throat Department of St. Thomas' Hospital, and in 1888 Laryngologist to the National Hospital for Epilepsy and Paralysis in Queen's Square, Bloomsbury; the last position he still holds. In 1888 his Majesty the German Emperor conferred upon him the Order of the Red Eagle (third class), and in 1894 the title of a Royal Prussian Professor. In 1897 her Majesty the Queen, on the occasion of her Diamond Jubilee, conferred upon him the honour of knighthood. Sir Felix Semon is a Fellow or Member of many learned societies of London, an Honorary Member of the Laryngological Societies of Vienna and Italy, and a Corresponding Member of the Imperial and Royal Society of Physicians of Vienna, and of the American Laryngological Association. He has been twice President of the Section of Laryngology at the meetings of the British Medical Association (Glasgow 1888, London 1895), President of the Laryngological Society of London, which he, together with some other throat specialists, founded in 1893, and Honorary President of the Laryngological Sections of several of the recent International and Medical Congresses (Copenhagen 1884, Berlin 1890, Rome 1893). His contributions to medical literature have been very numerous. He is the founder (1884) and editor of the "Internationales Centralblatt für Laryngologie und Rhinologie," an analytical record of the literature of his specialty. He has contributed articles on diseases of the throat, nose, and thyroid gland to Mr. Christopher Heath's "Dictionary of Practical Surgery," 1886, and to Prof. Clifford Allbutt's "System of Medicine," 1897. Lectures, introductory addresses, essays, and papers on subjects connected with his special branch of practice have been published by him in the Transactions of various London Medical Societies, the *Philosophical Transactions* and the *Proceedings of the Royal Society*, the *Proceedings of the Royal Institution*, and in various British and foreign Medical Journals. His most important original work has been in connection with the diagnosis and treatment of cancer of the larynx, and with the functions and diseases (particularly paralysis) of the motor nerves of the larynx. Addresses: 39 Wimpole Street, Cavendish Square, W.; and "Little Dawley," Hayes, Middlesex.

SENDALL, Sir Walter Joseph, G.C.M.G., Governor of British Guiana, was born in 1832. He is the son of the late Rev. S. Sendall, Vicar of Rillington, Yorkshire, and was educated at Bury St. Edmunds and Christ's College, Cambridge (B.A. 1858, First Class Classics; Junior Dpt., Mathematics). While at the University he was the friend of the poet C. S. Calverley, whose "Literary Remains" he edited with an introductory biography in 1885. He was a Member of the Colonial Civil Service, Ceylon, 1860-73; Inspector of Schools, 1860-70; Director of Public Instruction, 1870-73; Assistant-Inspector Local Government Board, 1873-76; General Inspector, 1876-78; Assistant-Secretary, 1878-85. He was Governor and Commander-in-Chief of the Windward Islands, 1885-89; was appointed Governor and Commander-in-Chief of Barbados in November 1889; and High Commissioner of Cyprus in 1892. He was created C.M.G., 1887; K.C.M.G., 1889; G.C.M.G., 1899. He left Cyprus in 1898 to take up his present appointment.

SENIOR, William, journalist and author ("Redspinner"), is the angling editor of the *Field*. In 1873 he published "Notable Shipwrecks," which has passed through several editions. This was followed in 1875 by "Waterside Sketches"; in 1877 by "Stream and Sea"; in 1878 by "Anderton's Angling," a novelette; in 1880 by "Travel and Trout in the Antipodes"; in 1883 by "Angling in Great Britain," being one of the handbooks issued in connection with the Great International Fisheries Exhibition; in 1888 by "Near and Far," a book of sport in Australasia and at home; in 1891 by "The Thames from Oxford to the Tower," illustrated by F. S. Walker; and in 1895 by "A Mixed Bag." Mr. Senior is a regular contributor to periodical literature. In 1875 he accepted a Government appointment as editor of the Queensland "Hansard," and proceeded to that colony to start an official daily report of the Parliamentary debates. This publication, the first of the kind ever issued in the Colonies, having been most successfully established, he returned to England, after five years' residence in Queensland, and rejoined the special correspondent staff of the *Daily News*. Address; Field Office, Bream's Buildings, E.C.

SERGEANT, Emily Frances Adeline, daughter of the Rev. Richard Sergeant (whose wife, *née* Jane Hall, was well known in religious circles as a writer of verse and short stories under the name of "Adeline"), was born at Ashbourne, Derbyshire, July 4, 1851. Her early edu-

cation was partly conducted by her mother, and partly in private schools. Frequent changes of residence, necessitated by her father's profession, took her to a succession of places, ending with Rochester, where her father's death broke up the household. She had, for some years before this event, been a pupil at Miss Pipe's school at Clapham and Queen's College, Harley Street, where she held a scholarship. Her mother's death followed quickly on that of her father, and for some years afterwards Miss Sergeant occupied herself in teaching. But she had written prose and verse since she was eight years old, and after a time resolved to devote herself more fully to literature. It was not, however, until the winter of 1881-82, that a novel from her pen found acceptance. A prize of £100, offered by Messrs. John Leng & Co., proprietors of the *People's Friend* in Dundee, was gained by Miss Sergeant for a story called "Jacobi's Wife"; and this piece of success was followed up by the publication by Messrs. Richard Bentley & Son of a novel, "Beyond Recall," dealing with the events of the Egyptian outbreak and the bombardment of Alexandria, where the author had spent the winter. Other novels followed, and in 1885 Miss Sergeant accepted a post on the staff of Sir John Leng's papers in Dundee, where she remained for more than two years. Since then she has lived chiefly in London, with occasional winters abroad, and has devoted herself to writing. "The Story of a Penitent Soul" is generally accounted her best book; it appeared (anonymously at first) in the summer of 1892. Other of her works are: "No Saint," "Esther Denison," "Caspar Brooke's Daughter," "Sir Anthony," "The Surrender of Margaret Bellarmine," "The Idol-Maker," 1896; "In Vallombrosa," 1897; "Miss Betty's Mistake," and "A Valuable Life," 1898, &c. At present Miss Sergeant has written more than thirty novels and stories of various kinds. She is deeply interested in philanthropic matters, and especially concerns herself with the lives and welfare of working-girls. London address: 14 Chenies Street Chambers, W.C.

SERVER PACHA, a Turkish statesman, commenced his official career in the Imperial Divan, and after filling the post of chief of the correspondence department in the Ministry of War, was appointed First Secretary of the Ottoman Embassy in Vienna; then in the same capacity in Paris; and when the Sultan sent Mehemet Kubrisli Pacha to St. Petersburg as Ambassador upon the coronation of the Emperor Alexander, Server Effendi was chosen as principal secretary. After the

return of the Ambassador to Constantinople, Server Effendi remained in Russia as Chargé d'Affaires, and by his ability and tact succeeded in establishing the most friendly relations between the Cabinet of St. Petersburg and the Sublime Porte. On his return to Constantinople he was appointed Secretary-General of the Ministry for Foreign Affairs. In 1859 he was Imperial Ottoman Delegate on the Commission for settling the frontier of Montenegro. After this he was successively appointed Under-Secretary of State of the Ministry of Commerce; then President of the Municipality; Imperial Commissioner in Egypt in reference to the Suez Canal; and Civil Commissioner in Crete during the insurrection of 1867. The improvements carried out by him during his tenure of office as Mayor of Constantinople, 1868-70, caused him to be styled the "Haussmann of Stamboul." On Aug. 31, 1870, he was appointed Musteschar of the Ministry for Foreign Affairs, and during the three months' illness of A'ali Pacha was Minister *ad interim*. On the death of A'ali Pacha, Sept. 6, 1871, Server Effendi was created a Muchir by the Sultan, and definitely appointed Minister for Foreign Affairs. Server Pacha possessed in an eminent degree all the qualifications necessary for this high post—experience in its special duties, a very conciliatory manner, a European education, and great popularity with the diplomatic body. Server Pacha subsequently became, in succession, Minister of Public Works, Commissary-General for carrying out the reforms in Bosnia, Governor-General of Herzegovina, and President of the First Ottoman Senate. He was recalled to the Ministry of Foreign Affairs in the place of Aarifi Pacha, July 31, 1877. He resigned in Feb. 1878, in consequence of the publication of statements which had been made by him to the correspondent of the *Daily News*, and which had been declared by Mr. Layard, our Ambassador at the Porte, to be injurious to Great Britain. On Aug. 4, in the same year, Server Pacha succeeded Mahmoud Pacha as Minister of Justice.

SERVIA, King of. See ALEXANDER I.

SERVIA, ex-King of. See MILAN (OBRENOVITCH) I.

SERVIA, Queen of. See NATALIE.

SETH, Professor James, M.A., is a brother of the present occupant of the Chair of Logic and Metaphysics in Edinburgh University, and was born in 1860. He matriculated in Arts in Edinburgh in 1876, and devoted himself chiefly to the study of philosophy, gaining, besides other

distinctions, the Bruce of Grangehill and Falkland Prize in the advanced class of Metaphysics. He graduated as Master of Arts with first-class honours in Philosophy in 1881, and was afterwards awarded the John Edward Baxter Philosophical Scholarship and the Ferguson Scholarship in Mental Philosophy—the latter open to graduates of all the Scottish Universities. He continued his study of Philosophy at Leipzig, Jena, and Berlin, with a view to a more thorough mastery of modern German thought. From 1883 to 1885 he acted as assistant to Professor Campbell Fraser in the class of Logic and Metaphysics, and in this capacity lectured both to junior and senior students; and in the summer of 1885 he organised and conducted independent classes in Logic and Psychology and in the History of Philosophy. In 1886 he was appointed to the Professorship of Philosophy in Dalhousie College and University, Halifax, Nova Scotia. In 1892 he was called to the Chair of Philosophy in Brown University, Providence, Rhode Island, and four years later he was appointed to the Sage Professorship of Moral Philosophy in Cornell University, Ithaca, New York. In 1897 he succeeded the late Professor Calderwood in the Chair of Moral Philosophy at Edinburgh University. He has been a frequent contributor to magazines on philosophical subjects, and he assisted the late Professor Calderwood in the revision and re-writing of Fleming's "Vocabulary of Philosophy." In 1891 he published an essay, entitled "Freedom of the Ethical Postulate," and in 1894 completed and published a larger work, entitled "A Study of Ethical Principles." While at Cornell University he acted as co-editor of the *Philosophical Review*. Address: Edinburgh University.

SEWELL, Elizabeth Missing, sister of the Rev. William Sewell, was born in the Isle of Wight in 1815. She became known as a writer of High Church fiction by her "Amy Herbert," 1844. This was followed by "Gertrude," "Sketches," and "Laneton Parsonage," 1847; "Margaret Percival," "Child's History of Rome," 1849; "The Earl's Daughter," 1850; "Readings for Lent, from Bishop Taylor," 1851; "Experience of Life," "First History of Greece," and "Journal of a Summer Tour on the Continent," 1852; "Readings for a Month, Preparatory to Confirmation," 1853; "Katherine Ashton, a Tale," 1854; "Ivors," 1856; "Thoughts for the Holy Week for Young Persons," 1857; "Ursula, a Tale of Country Life," "Cleve Hall," "Self-Examination before Confirmation," and "History of the Early Church," 1859; "Contes Faciles from Modern French Authors," 1861; "Ancient

History," 1862; "A Glimpse of the World," 1863; "Dictation Exercises," "Impressions of Rome, Florence, and Turin," and "After Life," 1868; "Passing Thoughts," and "Thoughts for the Age," 1870; "Grammar made Easy," 1872; and "Catechism of Grecian History," 1874; "Some Questions of the Day," 1875; "Popular History of France, from the Earliest Period to the Death of Louis XIV.," 1876; "Private Devotions for Young Persons," 1881; "Letters on Daily Life," 1885; "Home and After Life," 2nd edit., 1891; and various other works. Address: Asholiff, Bonchurch, Isle of Wight.

SEWELL, Rev. James Edwards, D.D., Warden of New College, Oxford, was born on Dec. 25, 1810, and is the sixth son of Thomas Sewell, a solicitor of Newport, Isle of Wight. He was educated at Winchester College, of which he was a Scholar, and at New College, where he matriculated as long ago as December 1826, when he was only sixteen. He was Winchester Scholar from 1827 to 1829, Fellow of New College from 1829 to 1860, Tutor from 1835 to 1850 (M.A. 1835, D.D. 1860), and from 1874 to 1878 he was Vice-Chancellor of the University. In 1860 he became Warden of New College, and is the *doyen* of Heads of Colleges at Oxford. Address: New College, Oxford.

SEYMOUR, Vice-Admiral Sir Edward Hobart, K.C.B., son of the Rev. Richard Seymour, and grandson of Admiral Sir Michael Seymour, 1st Bart., was born in April 1840. He was educated at Radley, and entered the Navy in 1852. He served as a midshipman in H.M.S. *Terrible* throughout the Russian war in the Black Sea, and was present at the bombardment of Odessa and of Sebastopol, besides minor engagements, including the capture of Kertch and Kinburn. He received the Crimean and Turkish medals. In 1857 he went to China in H.M.S. *Calcutta*, and was midshipman of a launch which was sunk at the destruction of the Chinese flotilla in Fatshaw Creek. He was also engaged at the capture of Canton in 1857 and the Peiho Forts in 1858. He received the China Medal with three clasps. He was promoted Lieutenant in 1860, and served in H.M.S. *Chesapeake* during the China war of that year. In 1862 he commanded a small-arm party of H.M.S. *Impérieuse* at the relief of Sing-poo and the capture of Kah-ding. As Commander of H.M.S. *Groveler* Sir Edward rescued an English vessel from pirates in the Congo River in January 1870, being severely wounded on that occasion, but he received the special approval of the Admiralty for his services. He was promoted

Captain in 1873, and commanded H.M.S. *Iris* during the Egyptian war, taking part in the bombardment of Alexandria. He was awarded the Medal, Khedive's Bronze Star, and the Osmanieh of the third class. From 1887 to 1889 Sir Edward was a Naval Aide-de-Camp to the Queen, and in July of the latter year was promoted to the rank of Rear-Admiral. He hoisted his flag as Second-in-Command of the Channel Squadron in September 1892, and was appointed Admiral Superintendent of Naval Reserves in 1894, and, by virtue of this appointment, took part in the Naval Manœuvres for five years in succession. He was promoted K.C.B. in June 1897, and in December of the same year was selected as Commander-in-Chief on the China Station. This appointment he now holds, and the fleet under his command is, excepting the Mediterranean, the largest and most powerful ever commissioned for a foreign station in time of peace. Admiral Sir Edward Seymour has a very high reputation as a tactician and strategist, and is considered one of the most capable officers in the Navy. Address: 9 Ovington Square, S.W.

SEYMOUR, Sir Michael. See CULME-SEYMOUR, ADMIRAL SIR MICHAEL.

SHAFTER, William R., American soldier, was born in 1835 at Galesburg, Michigan, and received a common-school education in his native place. He entered the Army in 1861 as Lieutenant in the Seventh Regiment of Michigan Volunteers, and distinguished himself in the campaigns under M'Clellan in Virginia, receiving promotions to be Major, and later Lieut.-Colonel. In 1864 he organised a regiment of coloured troops and fought them brilliantly. When the war between the States closed he was breveted Brigadier-General for distinguished gallantry in action, and after the Volunteer Army was disbanded he entered the Regular Army as Lieut.-Colonel of the 41st U.S. Infantry. He was made Colonel in 1879, Brigadier-General in 1897, and on the outbreak of the war with Spain he was made Major-General of Volunteers and put in command of the expedition which landed in Cuba in June 1898. Having captured Santiago together with all the eastern end of the island and over 20,000 prisoners, on July 17th of the same year, he greatly influenced Spain to sue for peace, the proposal for which was signed Aug. 12, 1898.

SHAH OF PERSIA. See MUZAFFER-ED-DIN.

SHAND, Lord, The Right Hon. Alexander Burns Shand, D.C.L. Hon.

Oxford, LL.D. Glasgow, D.L., was born Dec. 13, 1828, and is the son of Alexander Shand of Aberdeen, and Louisa, daughter of John Whyte, M.D., of Banff. He was educated at the Universities of Glasgow, Edinburgh, and Heidelberg, was called to the Bar, at Edinburgh, in 1853, and was Advocate-Depute from 1860 to 1862. He has been Sheriff of Kincardineshire, Haddingtonshire, and Berwickshire. In 1872 he was appointed a Judge of the Court of Session, and retired in 1890, when he was appointed a Member of the Judicial Committee of the Privy Council. In 1882 he was appointed a Commissioner under the Educational Endowments Act. In 1892 he was made Hon. Benchet of Gray's Inn, and raised to the Peerage as Baron Shand. He was Chairman of the Coal Owners' and Miners' Conciliation Board in 1894. He married Emily Merelina, daughter of John Clarke Meymott, in 1857. Addresses: 32 Bryanston Square, W., and Athenæum.

SHANNON, James Jebusa, A.R.A., is an Irish Canadian, and was born at Auburn, in New York State, in 1862. He came to England at the age of sixteen, and was for three years a student at South Kensington, where he gained the gold medal for the figure. He first became known as an admirable portrait-painter by his likeness of the Hon. Horatia Stopford, one of the Queen's maids of honour, exhibited at the Royal Academy in 1881, and painted for her Majesty. In 1887 appeared his full-length portrait of Henry Vique, Esq., a picture for which he has been awarded first-class medals at the Paris, Berlin, and Vienna Exhibitions. At the Chicago Exhibition he gained a medal for his full-length portrait of Mrs. Charlesworth. His noted Academy portraits and pictures during recent years have been—"The Marquis of Granby, M.P.," "Winifred, daughter of G. H. Pember, Esq.," and "The Lady Boston," 1895; "Mrs. Baird," 1896; "Clare Sewell Read, Esq., M.P. for Norfolk, 1865-85" (presentation portrait), "Mrs. George Peck," "Jill, the daughter of G. W. Rhodes," and "The Right Hon. Sir John T. Hibbert, K.C.B.," 1897; "The White Mouse," "Kathleen, daughter of Hon. Mr. Justice Mathew," "Mrs. Herbert Cohen," "Sir James Smith" (presentation portrait), and "Sir Thomas Roe" (presentation portrait), 1898; "Babes in the Wood," and portraits of Lady Mathew, the Lady Ulrica Duncombe, and Lord Cranworth, 1899. Mr. Shannon was for some years a Member of the New English Art Club, of which he was an original member. With Mr. E. A. Abbey and Mr. Sargent he shares the distinction of being one of

the few Americans who, since the time of West, have won a high place in the annals of English art. In 1897 he was made A.R.A. Address: 3 Holland Park Road, Kensington, W.

SHARP, William, was born at Paisley on Sept. 12, 1856, and was educated at Glasgow University. He spent his boyhood in the West Highlands, and there probably acquired his appreciation of things Celtic. He has travelled in Australia, and among the South Sea Islands; also extensively in Europe, Canada, &c. In 1879 he came to London, and was introduced by Philip Bourke Marston to Rossetti, of whom he saw much, and whose biography he wrote. He is well known as a critic and magazine-writer, and as general editor of the "Canterbury Poets," in which series he published "Sonnets of this Century," which has gone into nearly twenty editions, and as editor of "Lyra Celtica," published in collaboration with Mrs. Sharp, a Highland relative of his, who is herself an author, and ardent student of literature. "Lyra Celtica" is an anthology of English poems, written by authors with Celtic blood in their veins. The above are only a few among the works published by Mr. and Mrs. William Sharp, which include many volumes of verse, novels, anthologies, monographs on Philip Bourke, Marston, Brown, &c. Address: 30 Greencroft Gardens, Hampstead, N.W.

SHARPE, Richard Bowdler, LL.D., was born Nov. 22, 1847, at 1 Skinner Street, Snow Hill, London, where his father was publisher and editor of *Sharpe's London Magazine*, a famous literary journal of the time. He was a King's Scholar at Peterborough and Loughborough Grammar Schools, of both of which successively his cousin, the Rev. James Wallace, was headmaster. At the age of eighteen he was appointed the first Librarian of the Zoological Society of London, a post which he held from November 1866 to February 1872. In September of the latter year he received the appointment of Senior Assistant in the Zoological Department of the British Museum, in charge of the collection of birds, which post he still holds. In 1875 he received the Honorary Fellowship of the Zoological Society, "for distinguished services to science." He is also an Honorary Member of the New Zealand Institute, a Foreign Member of the Academy of Sciences of Lisbon, of the Zoological Society of Amsterdam, of the Imperial Society of Naturalists of Moscow, and many other foreign societies. He is also LL.D. of the University of Aberdeen, and holds the Gold Medal for Science

from H.I.M. the Emperor of Austria, bestowed upon him after the second Ornithological Congress at Budapest in 1891, when he was President of the Section of Zoology and Comparative Anatomy, and delivered an address on the "Classification of Birds." Dr. Bowdler Sharpe's principal works are: "A Monograph of the Alcedinidae, or Family of Kingfishers," "A Monograph of the Hirundinidae, or Family of Swallows," a 2nd edition of Layard's "Birds of South Africa," and many popular books on Ornithology. His greatest work, however, is the "Catalogue of Birds" in the British Museum, a monographic record of all the birds of the world. Of the twenty-three volumes of this work as yet published he has written no less than eleven himself. Dr. Sharpe also completed several of the folio works of the late John Gould, after the death of the latter, such as "The Birds of Asia," "The Birds of New Guinea," and others. The donations of the great private collections of birds, notably those of Mr. Allan Hume, C.B., Mr. F. Du Cane Godman, Mr. Osbert Salvin, Major Wardlaw Ramsay, and Mr. Henry Seebohm, during Dr. Sharpe's curatorship of the ornithological collections of the British Museum, have increased the series of specimens to an enormous extent, so that at present the series amounts to about 300,000 specimens—more than four times the number possessed by any other museum in the world. Address: Natural History Museum, Cromwell Road, S.W.

SHAW, Byam, painter, was born in Madras on November 13, 1872, and is the son of John Shaw of Ayr, solicitor and Registrar of the High Court, Madras. He was educated at home, and studied art at St. John's Wood Art School in 1888, and at the Royal Academy Schools, 1890-95. In November 1898 he was elected a Member of the Royal Institute of Painters in Water-Colours, and in January 1899 a Member of the Society of Oil Painters. He is a brilliant colourist, and a most interesting and talented disciple of the now fast-vanishing Pre-Raphaelites. He has exhibited notable pictures at the Royal Academy since 1893, among which we may mention a scene illustrative of D. G. Rossetti's "Blessed Damozel," and a portrait, 1895; "Whitner," "Jezebel," and a portrait, 1896; "Love's Baubles," and "The Comforter," two very daring, original, and notable paintings, 1897; "Truth," and "The Queen of Spades," 1898; and "Love the Conqueror," 1899. There is a great future before Mr. Byam Shaw, who in time should be the accepted successor to Sir Edward Burne-Jones, Rossetti, Madox-Brown, and Mr.

Holman Hunt. Home address: 12 Kensington Crescent, W.

SHAW, Sir Eyre Massey, K.C.B., D.L., late chief of the Metropolitan Fire Brigade, is the son of the late Bernard Robert Shaw, Esq., of Monkstown, co. Cork, and was born in 1830, and educated at Dr. Coghlan's School, Queenstown, and at Trinity College, Dublin, where he took his B.A. and M.A. degrees. He entered the army, but retired in 1860, and became Superintendent of the Borough Forces of Belfast, including Police and Fire Brigade. On the death of Mr. Braidwood, in 1861, he was appointed Chief Officer of the Metropolitan Fire Brigade, which, from being originally supported by the Insurance Companies, was taken in charge by the Metropolitan Board of Works, and under Captain Shaw's able guidance became the most efficient brigade in the world. In 1891 he retired on a pension from the captaincy of the Fire Brigade. He received the honour of knighthood at the same time as a mark of her Majesty's appreciation of his long and valuable services. He has published various books connected with Fires and Fire Protection, besides Annual Reports on the work of the Brigade. Among these may be mentioned the "Complete Manual of the Organisation, Machinery, and General Working of the Fire Brigade of London." He has been twice severely wounded at fires. Address: 48 Rutland Gate, S.W.

SHAW, Flora L., who is at the head of the Colonial Department of the *Times*, has been sent to South Africa and Australia by her paper. Her activity at the time of the Jameson Raid brought her prominently before the public. In Australia she investigated the question of forced labour by South Sea Islanders on the Queensland sugar-plantations. More recently she has been in Canada, her series of letters to the *Times* on the Dominion arousing much interest in 1898. She visited Klondike in that year, and recounted her experiences in a lecture at the beginning of 1899. Her account of her voyage to the diggings bore eloquent witness to the kindness, not to say chivalry, of her fellow-travellers, who were all men. At Klondike itself she was chiefly impressed by the honesty which reigns among the miners. Gold lies about openly in the shanties of the diggers, who never apparently think of locking it up. She is a firm believer in the great auriferous possibilities of British Columbia, and is of opinion that the Klondike lodes will not be exhausted for some fifty years.

SHAW, George Bernard, critic, was born in Dublin on July 26, 1856. His father, George Carr Shaw, was an ex-Civil servant, who capitalised his pension and embarked on flour-milling, failing entirely in this new business. His mother was Lucinda Elizabeth Gurly, who had much talent as an amateur singer and teacher. The only education George Bernard received was at the Wesleyan Connexional School in Dublin, although his family were not Methodists, and this ended when he was fourteen. He came to London in 1876, but for several years could obtain no literary recognition. Meantime, he flung himself into Socialism, and was one of the founders of the Fabian Society. For four years, from 1886 to 1890, he was art critic to the *World*, and for one year (1891) to *Truth*. He gained his reputation as a musical critic by his articles in the *Star*, signed "Corno di Bassetto" (1888-91). He then for four years was musical critic of the *World* (1890-94), until the death of Edmund Yates. From 1895 to 1898 he was dramatic critic of the *Saturday Review*, under the editorship of Frank Harris, and wrote such pertinent accounts of new plays that he reminded old readers of the palmy days of the "Saturday Reviler." In 1892 his play, "Widowers' Houses," was produced by the Independent Theatre Society, creating as much discussion as did his "Arms and the Man" at the Avenue Theatre in 1894. Other plays of his which have been performed in 1897 are: "Candida," "The Man of Destiny," and "The Devil's Disciple." His literary output began with four novels: "The Irrational Knot," "Love among the Artists," "Cashel Byron's Profession," and "An Unsocial Socialist," which were published between 1880 and 1883. In 1889 he edited a volume of Fabian Essays, to which he contributed two himself; and he has written other Socialist pamphlets, such as: "The Impossibilities of Anarchism," and "The Fabian Society, what has it done?" He has written an analysis of the plays of Henrik Ibsen, whom he regards as the greatest living dramatist. In 1898 appeared his "Plays Pleasant and Unpleasant," in two volumes, which provoked as much discussion as Mr. Shaw's works are accustomed to do; and in the same year he wrote a commentary on Wagner's "Der Ring der Nibelungen" for the use of spectators at the performances at Covent Garden in that year, entitled "Wagner's Ring, what it means." In this year he was nursed through a serious illness by Miss Payne Townshend, a wealthy supporter of Socialism, who had done much good work in connection with the Fabian Society and the London School of Economics. Mr. Shaw married this

lady on June 1, 1898. Address : 29 Fitzroy Square, W.C.

SHAW, Richard Norman, R.A., architect, was born at Edinburgh on May 7, 1831. He was educated at Edinburgh, studied art at the Academy Schools and won the Gold Medal for architecture at the biennial competition. With the Gold Medal goes the travelling studentship, which bore fruit in a book of architectural drawings. This aroused considerable interest among architectural students of that time. The work of Mr. Norman Shaw includes, besides the new Scotland Yard on the Thames Embankment in London, and a number of churches and private houses at Bedford Park and elsewhere: Flete, Ivybridge, Devon; Dawpool, near Birkenhead; Craigside, for Lord Armstrong; Lowther Lodge, Kensington, and the houses of several artists at Hampstead. Mr. Norman Shaw was elected a Royal Academician in 1877. In March 1898 the First Commissioner of Works and Sir William Harcourt, in the course of a Parliamentary debate on some proposed new Government buildings, referred disparagingly to Mr. Norman Shaw's New Scotland Yard. This criticism was thereupon met by a letter to the *Times*, signed by thirty leading artists and architects, who took that opportunity to place on record their admiration of Mr. Shaw's building, and their opinion that it is the one public building, erected during the century by Government in London, "of which London may be most justly proud." Mr. Norman Shaw published in 1858 "Sketches from the Continent," and in 1891 edited, jointly with Mr. T. G. Jackson, A.R.A., "Architecture, a Profession or an Art." Addresses: Hampstead, N.W.; and Athenæum.

SHAW, Thomas, LL.B., Q.C., M.P., D.L., was born at Dunfermline on May 23, 1850, and is the son of A. Shaw and Isabella Wishart, both of Dunfermline. He was educated at the High School of his native town and at Edinburgh University (M.A. 1874; LL.B. 1875). He was Hamilton Fellow in Mental Philosophy, and Lord Rector's Historical prizeman at the University. In 1875 he became an Advocate; in 1886, Advocate-Depute for the Western Circuit, and was Solicitor-General for Scotland from 1894 to 1895. In 1892 he was returned as Liberal member for the Hawick Burghs, which he now represents in the House of Commons. He has contributed to the "Encyclopædia Britannica." Addresses: 17 Abercromby Place, Edinburgh; and Queen Anne's Mansions, S.W.

SHAW, William Napier, M.A., F.R.S., was born on March 4, 1854, in Birmingham, and is the third son of Charles Thomas Shaw, a manufacturer. He was educated at King Edward's School in that town, 1862-72, and in 1870 was first in the first class of the Oxford Senior Local Examination. In 1872 he was elected to an open scholarship in mathematics at Emmanuel College, Cambridge. In 1876 he was bracketed 16th wrangler, and placed in Class I. of the Natural Sciences Tripos (with distinction in Physics). He studied at the University of Berlin during the year 1879. He was elected Fellow of Emmanuel College in 1877, and two years later was appointed Lecturer in Natural Science at that College. From 1880 to 1887 he was Demonstrator in Experimental Physics at the Cavendish Laboratory, and in the latter year was appointed Lecturer in Physics in the University of Cambridge. Since 1890 Mr. Shaw has been Senior Tutor at Emmanuel College. He was elected F.R.S. in 1891, and was appointed a member of the Kew Observatory Committee of the Royal Society in 1894, and of the Meteorological Council in 1897. He is author of a "Text Book of Practical Physics" (jointly with R. T. Glazebrook, M.A., F.R.S.), and reports to the Meteorological Office upon Evaporimeters, upon Hygrometric Methods (1888). The article on "Ventilation and Warming," in Messrs. Stevenson and Murphy's "Treatise on Hygiene" (1892) is from his pen. In 1890 he reported to the British Association on "The Present State of our Knowledge in Electrolysis and Electro-Chemistry, and in 1897 he was appointed by the Local Government Board to report on the Ventilation and Warming of Metropolitan Poor - Law Schools. He has written the articles "Electrolysis" and "Pyrometer" in the "Encyclopædia Britannica" (9th edit.), besides various papers on physical subjects in the scientific journals. In July 1885 he married Sarah Jane Dugdale, youngest daughter of the late Dr. Harland, of Salford. Permanent address: Emmanuel College, Cambridge.

SHAW-LEFEVRE, The Right Hon. George John, L.C.C., son of Sir John George Shaw-Lefevre, K.C.B., by Rachel Emily, daughter of Mr. Ichabod Wright, of Mapperley Hall, Nottingham, was born on June 12, 1832, and received his education at Eton and at Trinity College, Cambridge. He was called to the Bar at the Inner Temple in 1856. In 1863 he was first elected M.P. for Reading, in the Liberal interest, and he continued to be one of the representatives of that borough down to 1885, when he was de-

feated by Mr. Murdoch. He was a Lord of the Admiralty from May to July 1866; Secretary to the Board of Trade from December 1868 to January 1871; Secretary to the Admiralty from the last date to February 1874, and again from April 1880 to the following November, when he was appointed First Commissioner of Works and Buildings in succession to Mr. Adam, who had resigned that office on being appointed Governor of Madras. As First Commissioner Mr. Shaw-Lefevre introduced great improvements into the streets of London, notably at Westminster Hall, the Tower of London, and at Hyde Park Corner. On the death of Mr. Fawcett he was appointed Postmaster-General (November 1884), and his tenure of this office was marked by the introduction of sixpenny telegrams. Mr. Shaw-Lefevre was elected a Benchler of the Inner Temple in November 1882. He is the author of an important article on "Public Works in London," in the *Nineteenth Century* (November 1882). After his defeat at Reading in November 1885, he was without a seat until, at a bye election, April 1886, he successfully stood for Bradford, vacant by the death of the Right Hon. W. E. Forster. During 1893 appeared his important work on Agrarian Tenure. At the general elections of 1886 and 1892 he was again elected as a Gladstonian Liberal. In August 1892 he was appointed First Commissioner of Works, in which office he was succeeded by Mr. Herbert Gladstone in March 1894. He succeeded Mr. H. H. Fowler at the latter date as President of the Local Government Board. At the general election of 1895 he was defeated in the contest for Central Bradford. In 1898, after a severe contest, he was returned for the Haggerston Division of Shoreditch as member of the London County Council. Mr. Shaw-Lefevre took the leading part in establishing the Common Preservation Society in 1866, and has acted as Chairman of the Society, with some brief intervals, ever since. At his instance, mainly, a number of suits were instituted against Lords of Manors who had begun to enclose the commons round London. These suits were in all cases successful, and were the means of saving the London commons. In 1895 he published a work on "English Commons and Forests," which gave a history of the movement for the Preservation of Commons. Among other works which he has published is "Peel and O'Connell," a comparative criticism of the Irish policies of these statesmen. His sister, Miss Madeleine Shaw-Lefevre, was formerly Principal of Somerville Hall, Oxford. In 1873 he married Lady Constance Emily Moreton, daughter of the Earl of Ducie. Ad-

resses: 18 Bryanston Square, W.; Oldbury Place, Ightham, &c.; and Athenæum.

SHEA, Sir Ambrose, K.C.M.G., was born in Newfoundland in 1820, received his education there, and for over thirty years occupied a foremost place in the public affairs of that Colony. For six years he was Speaker of the Assembly, and subsequently for five years was an unofficial Member of the Council of Government. He was one of the two delegates from the Colony at the celebrated Quebec Conference at which the Constitution of the Canadian Dominion was framed. In 1888 Sir Ambrose was delegated to London to urge the right of the Colony to enforce restrictions on French fishing operations on the Newfoundland coasts, but owing to some Imperial Cabinet difficulties at the moment nothing could be done. The Legislature of the Island, however, renewed their efforts, and he was again sent, in conjunction with the Premier, Sir Robert Thorburn, to press the question, and this time with success. Soon afterwards Lord Knutsford offered Sir Ambrose the Governorship of the Bahamas, on the acceptance of which he retired from commercial pursuits. This post he assumed at the end of 1887, and it would be difficult to parallel the record he has made in that Colony during a short period of years. On his arrival the place was in a state of impending bankruptcy. The precarious resources, fruit, and sponge-fishing, were declining, and those having means were unwilling to invest a shilling in any untried adventure. The population was thinning by emigration to the Southern States, and no one thought of the future without misgiving. The prospect for a new Governor was cheerless in the extreme; but Sir Ambrose is sanguine, and he betook himself at once to an examination of the situation. He had not been a month in his position before he felt that he had lighted on a solution of the difficulties. His attention was attracted to a bold-looking plant of the aloe order, and he found on inspecting it that it held a fibre similar to manilla; and his experience enabled him to see that this had a stable commercial value, though he was not encouraged when he explained what he thought of the capabilities of this plant. He was told that attempts had before been made in the direction he proposed, but without any success, and that the plant was now universally regarded as a noxious weed, which defied all efforts to eradicate it. This was the prevailing feeling; but Sir Ambrose had formed a strong opinion, and gradually he gained assent to his views. The growth seems to set all ordinary adverse or disappointing influ-

ences at defiance; and the product is all but, if not quite, equal to the celebrated manilla-hemp. The exports of the Colony have hitherto averaged about £125,000 a year, but no one on the spot, who knows on what grounds the calculations rest, has a doubt that within a very few years the value of the exports will be quadrupled, and an output of a million is within range of the most reasonable contemplation. Land has gone up to four times its former value, and already the revenue responds to the industrial activity that prevails. These results are by common consent due solely to the ability and unflagging energy of the Governor. Sir Ambrose is the first Colonist who ever held the post of Imperial Governor, and his splendid success will be hailed with great satisfaction by Colonists everywhere, for there are few to whom his name as a prominent Colonist has not been long familiar. Sir Ambrose returned to England in January 1895, on the expiration of his term of office.

SHEEPSHANKS, The Right Rev. John, D.D., was born in 1834, and educated at Christ's College, Cambridge, of which he was a scholar. He was ordained, and was appointed Rector of New Westminster and Chaplain to the Bishop of Columbia in 1859. Returning to England in 1867, he became Vicar of Bilton, Yorks., in 1868, and in 1873 Vicar of St. Margaret Anfield, Walton-on-the-Hill, Liverpool. In 1893 he was consecrated Bishop of Norwich. Address: The Palace, Norwich.

SHERARD, Robert Harborough, man of letters, born in London, December 3, 1861, is the second son of the Rev. Bennet Sherard-Kennedy, of Stapleford Hall, Melton-Mowbray. His mother is a granddaughter of William Wordsworth, the poet. He was educated at Queen Elizabeth's College, Guernsey, at Oxford, and at the Universities of Bonn and Paris. In 1882 he dropped the affix of Kennedy. Since 1883 he has acted as special correspondent to leading English and American papers and magazines in various parts of the world. He has written poems, biographies, sociological works and novels, *inter alia*, "Emile Zola," 1893; "Alphonse Daudet," 1894; "A Bartered Honour," 1884; "Rogues," 1889; "By Right, not Law," 1891; "Jacob Niemand," 1895; "The Iron Cross," 1897; translated and edited "Ménéval's Memoirs," collaborated with the late Alphonse Daudet on a tale called "Premier Voyage, Premier Mensonge," 1898. He has written a series of articles on certain iniquities in English industries, entitled "The White Slaves of England." These appeared in serial form in *Pearson's Magazine*, and were republished in book form

(Bowden, London, 1st edit., 1897; 2nd edit., 1898). They attracted great attention and had a large sale. Mr. Sherard's novels formed the subject of an important critical study in *La Revue de Paris* ("Un Romancier Anglais," May 1896). Address: Author's Club, 3 Whitehall Court, S.W.

SHERMAN, The Hon. John, brother of the late Gen. W. T. Sherman, was born at Lancaster, Ohio, May 10, 1823. He received an academic education, studied law, and began its practice in 1844. He was a delegate to the National Whig Conventions of 1848 and 1852; and a Member of Congress from 1855 to 1861. He entered the Republican party soon after its formation, and has since acted with it. In 1861 he was elected to the U.S. Senate and re-elected in 1866 and 1872. On the accession to the presidency of Mr. Hayes, in 1877, Senator Sherman was appointed Secretary of the Treasury, a position retained by him until the close of President Hayes's administration in 1881, when he re-entered the Senate, and remained there until appointed Secretary of State in the Cabinet of President McKinley, March 4, 1897. In April 1898 he resigned from the Cabinet and retired to private life. It was due to his management while at the head of the Treasury that the resumption of specie payments (in 1879) was effected without disturbance to the financial or commercial interests of the country. Senator Sherman was a prominent candidate for the Republican Presidential nomination in 1880 and 1888, and was the presiding officer of the Senate, 1885-87. He published in 1879 a volume of his "Selected Speeches and Reports on Finance and Taxation," 1859-78. Address: Washington.

SHERRINGTON, Professor Charles Scott, M.A., M.D., F.R.S., was born in London on Nov. 29, 1859, and is the son of J. U. Sherrington, Esq., of Great Yarmouth, and Anne B. Thurtell, of Norwich. He was educated at Queen Elizabeth's School, Ipswich; Caius College, Cambridge; and St. Thomas's Hospital (M.A. and M.D. Cantab.). In 1884 he was appointed George Henry Lewes Student in Physiological Research, and in 1887 Lecturer in Physiology at St. Thomas's Hospital. From 1889 to 1895 he was Hon. Sec. of the Physiological Society, from 1891 to 1895 Professor Superintendent of the Brown Institution, University of London, and in 1895 was appointed to the Holt Professorship of Physiology, University College, Victoria University, Liverpool. In 1892, 1895, and 1898 he was British Secretary for the Triennial International Congresses of Physiology. He

became F.R.S. in 1893. He is well known in the world of science for the importance of his research work, and has published various papers in the *Royal Society's Transactions and Proceedings*, the *Journals of Physiology and Pathology*, *Brain*, &c. He is also the author of a "Report on the Epidemic of Asiatic Cholera in Spain, 1885," and of a "Report of Investigations into the Pathology of Asiatic Cholera in Italy in 1886." Address: 16 Grove Park, Liverpool.

SHERWOOD, The Rev. William Edward, Head-Master of Magdalen College School, Oxford, is the eldest son of Thomas Sherwood, of Workington, Cumberland, and was born in April 1851. He was educated at Magdalen College School, and at Christ Church, Oxford, where he was Junior Student from 1870 to 1875, and obtained a first class in Mathematical Moderations and a third class in the Final Honours School of Mathematics. In 1875 he was appointed a Mathematical Master at Magdalen College School, and in 1878 Vice-Principal of Sidney College, Bath, which was merged in Bath College during his tenure of office. He was appointed to his present post in 1888. Address: Magdalen College School, Oxford.

SHIELDS, Frederic, A.R.W.S., was born at Hartlepool, and educated at St. Clement's Danes National School, Stanhope Street, Lincoln's Inn Fields. He was the intimate friend of Dante Rossetti, and, as a painter, has been one of the most distinguished of the Pre-Raphaelites. He has painted many domestic and other subjects in water-colours, and has illustrated "The Pilgrim's Progress," Defoe's "Plague of London," and "The Rochdale Felly." He has decorated the Duke of Westminster's Chapel at Eaton Hall with stained glass and mosaic, and the "Chapel of the Ascension," Marble Arch, London. Address: Morayfield, Merton, Surrey.

SHIPLEY, Orby, M.A., youngest son of Rev. Charles Shipley, of Twyford House, in the county of Hants, and Charlotte, daughter of R. Orby Sloper, Esq., of East Woodhay, Berks, was born July 1, 1832. He was educated at a private school, and took his degree at Jesus College, Cambridge. For twenty-three years he worked as a clergyman of the Church of England, latterly at All Saints', Margaret Street, Cavendish Square (under Mr. Upton Richards), and at St. Alban's, Holborn, London (under Mr. Mackonochie); and on Oct. 26, 1878, being unable to find any sufficient or recognisable authority for faith or discipline in the Anglican Com-

munion, was received into the Roman Catholic Church by Cardinal Manning. Prior to 1878 he was the author of several works, sermons, liturgical books, essays and pamphlets in support of Anglicanism; issued from the press many ascetic and devotional books translated from Catholic sources; and edited three volumes of religious poetry from many sources, "Lyra Eucharistica," "Messianica," and "Mystica," 1863-65, as well as several volumes of Essays by various authors, "The Church and the World," three series, 1866-7-8; "Tracts for the Day," "Ecclesiastical Reform," and "Studies in Modern Problems." Subsequently to his submission to the Catholic Church he has published "Truthfulness and Ritualism," two parts, in answer to Dr. Littledale's strictures on the Church; has edited "Annus Sanctus: Hymns of the Church for the Ecclesiastical Year," and old English ascetical books; and for some years has been engaged in compiling an Anthology of Sacred Verse in honour of or in relation to the Blessed Virgin Mary, "Carmina Mariana," of which the second edition has lately been published, and a second series, "Poëmata Mariana," is in preparation. The range of poetical sources for these Anthologies includes English, Irish, and American poems from Chaucer to Tennyson, augmented by verse translated from the Greek, Armenian, Syriac, and Latin, the German, the Italian, the Spanish, and French, together with Early English and old Irish poems, MS. poems of old Catholic origin from the British Museum, the Bodleian, Oxford, and other public and private libraries, and others from Catholic periodicals, together with a few original contributions. He has been and is an occasional contributor to periodical literature, amongst other papers and reviews to the *Nineteenth Century*, *Contemporary*, and *Fortnightly*; the *Month*, *Catholic World* (U.S.A.), the *American Ecclesiastical Review* (U.S.A.), and *Dublin Review*; the older *Saturday Review* and *Guardian*; and the *Weekly Register* and *Tablet*. His last Anglican book, which passed through the press at the time of his reception, is called "Principles of the Faith in Relation to Sin." It contains a brief apology for his conversion, reprinted from a letter in the *Times* newspaper, 1878, and a complete list of his literary work in the Church of England. Addresses: 39 Thurloe Square, S.W.; and Colway, Lyme Regis, Dorset.

SHORE, The Rev. Thomas Teignmouth, M.A., Canon of Worcester, eldest son of the Rev. T. R. Shore, B.D., born in Dublin, Dec. 28, 1841, was educated at Trinity College, Dublin, where he gra-

duated in 1861, having obtained distinguished honours in English composition and in divinity. He afterwards proceeded to the degree of M.A. (*comitatus causæ*) at Oxford. He was ordained in 1865 by the Bishop of London (Dr. Tait), and having held successively the curacies of Chelsea and of Kensington, and of St. Peter's, Vere Street, under Frederick Maurice, and been for two years incumbent of St. Mildred's, Lee, he was appointed in 1873 to the incumbency of Berkeley Chapel, Mayfair. He has published two volumes, entitled "Some Difficulties of Belief," and "The Life of the World to Come," and "St. George for England," a volume of sermons to children which has been translated into French, German, and Italian. He was one of the contributors selected by the Bishop of Gloucester and Bristol for his lordship's New Testament Commentary. He has also edited a series of volumes, entitled "Helps to Belief," and has written the one on "Prayer" in that series. Mr. Teignmouth Shore was appointed one of her Majesty's chaplains in July 1878, in succession to Dr. Maclagan, now Archbishop of York. He prepared the daughters of the Prince and Princess of Wales for their confirmation, and officiated at the marriage of the Princess Louise of Wales with the Duke of Fife in 1889; and was made Chaplain of the Order of St. John of Jerusalem in 1889, and Canon of Worcester in December 1890. Canon Teignmouth Shore has the Jubilee Medal with a clasp, which was conferred on him by the Queen, and the Order of Princess Alice of Hesse, which was given him by the Grand-Duke of Hesse, as well as the Order of St. John of Jerusalem. He is married to Eleanor, daughter of J. F. Waller, J.P. Addresses: College, Worcester; and Athenæum.

SHORTER, Clement King, editor of the *Illustrated London News*, the *Sketch*, and, for short periods, of the *English Illustrated Magazine* and *Pick-Me-Up*, is descended from Huntingdonshire ancestry, and was born in London, July 19, 1858, and educated at Downham Market, Norfolk. In 1877 he entered the Exchequer and Audit Department at Somerset House, and twenty years later retired from the Civil Service in order to become editor of the *Illustrated London News*. Subsequently he took over the editorship of the *Sketch* and *English Illustrated*. Mr. Clement Shorter is also well known as an author, and has published in volume form: "Charlotte Brontë and her Circle," 1896, and a comprehensive work on Victorian Literature, 1897. He has edited (1898) the Temple Edition of the Waverley Novels. He has also edited a selection of the

poems of Wordsworth. He married, in 1896, Dora, daughter of George Sigerson, M.D. (see **SHORTER, MRS. CLEMENT**). Address: 16 Marlborough Place, St. John's Wood, N.W.

SHORTER, Mrs. Clement, *née* Dora Sigerson, under which name she is well known as a poetess, is the daughter of George Sigerson, M.D., Professor of Biology in the Royal University, Dublin. In July 1896 she was married to Mr. Clement Shorter. She is one of the most brilliant of Irish poetesses, and has published "Verses" in 1894, and "The Fairy Change-ling and other Poems" in 1897, "My Lady's Slipper and other Poems," 1898, besides contributing poems to the *Century Magazine*, the *Chap-Book*, &c. One of her most remarkable long poems appeared recently in the *Daily Chronicle*. It was entitled "The Woman who went to Hell," and is republished in a volume of collected poems, 1899. Address: 16 Marlborough Place, St. John's Wood, N.W.

SHORTHOUSE, Joseph Henry, eldest son of Joseph Shorthouse, chemical manufacturer, of Birmingham, and Mary Anne, daughter of John Hawker, manufacturer, of the same town, was born on Sept. 9, 1834, in Great Charles Street, Birmingham, and educated at private schools. He is famous as the author of the romance "John Inglesant," which took him some twenty years to think out and write. It was first privately printed and afterwards published in 1881, and excited a great amount of interest. He subsequently published "The Platonism of Wordsworth," 1881; the Preface to George Herbert's "Temple," 1882; a preface to "The Spiritual Guide" of Miguel Molinos, 1883; "The Little Schoolmaster Mark, a Spiritual Romance," 1885; "Sir Percival," 1886; "A Teacher of the Violin, and other Tales," "The Countess Eve," 1888; and "Blanche, Lady Falaise," 1891; and articles on George Herbert, Wordsworth, and F. D. Maurice, &c. He married, in 1857, Sarah, daughter of John Scott, of Birmingham. Address: Lansdowne, Edgbaston.

SHREWSBURY, Bishop of. See **STAMER**, THE RIGHT REV. SIR LOVE-LACE T.

SHUTTLEWORTH, Rev. Henry Cary, Rector of St. Nicholas Cole-Abbey, City of London, 1884; Professor of Pastoral and Liturgical Theology, King's College, London, 1890; Lecturer in English Literature, King's College (Ladies' Department), Chaplain, 1st Tower Hamlets R.V., was born at Eglos-hayle, Cornwall, 1850, and is the eldest son of the late Rev.

Canon Shuttleworth, and Letitia, second daughter of the late Captain Cary, R.N. He was educated at Forest School, Walthamstow, under the late Dr. Guy, and at St. Mary's Hall and Christ Church, Oxford, where he gained various scholarships (such as the Duke) and prizes, and was placed in the second class of Final Theological School in 1873 (B.A. 1873, M.A. 1875). Ordained in 1873 to the curacy of St. Barnabas', Oxford, and Chaplain of Christ Church, 1874, he was Minor Canon of St. Paul's, 1876-84, and became Lecturer at King's College, London, in 1883. He founded, in 1889, the Shuttleworth Club (formerly St. Nicholas Club) for men and women employed in the City. He is well known as a preacher, lecturer, writer, and contributor to the *Saturday Review*, the *Outlook*, and occasionally to the *Times*. His publications are: "The Place of Music in Public Worship" (Elliot Stock), 1892; "Some Aspects of Disestablishment" (A. D. Innes), 1894; "Hymns for Private Use" (Gay and Bird), 1896; "St. Nicholas Manual and Hymnal Appendix" (E. Stock), 1897; *Addresses to Lads* (S.P.C.K., 3rd edit.), 1897; and various sermons, lectures, articles. He is well known as an authority on Church Music, and as a leader of the same, and is prominently identified with Christian Socialism and other advanced movements. He married, in 1878, Mary, eldest daughter of Thomas Fuller, M.D., Brighton. Address: St. Nicholas Rectory, Lambeth Hill, E.C.

SICKERT, Walter, painter, was born on May 31, 1860, at Munich, and is the son of Oswald Adalbert Sickert, and grandson of Johannes Sickert, both painters. He was educated at King's College School, and at first thought of embracing an actor's career. He studied art at the Slade School, and has exhibited at the Royal Academy, the Royal Institutes of Painters in Oil-Colours and Water-Colours, at the Royal Societies of British Artists and Painter Etchers, and at the New English Art Club. He has contributed many papers on art to journals and magazines, writing himself down "a pupil of Whistler," of whose impressionism or method he is an exponent. Address: 13 Robert Street, Cumberland Market.

SIDGWICK, Eleanor Mildred, was born in 1845, being the eldest daughter of James Maitland Balfour, Esq., of Whittingham, Prestonkirk, father of the Right Hon. Arthur James Balfour. She was educated at home, and married in 1876 to Mr. Henry Sidgwick, now Knightbridge Professor of Moral Philosophy in the University of Cambridge. For two years, from 1880 to 1882, she held the position of Vice-Principal of Newnham College,

Cambridge, and succeeded Miss A. J. Clough as Principal in 1892. Mrs. Sidgwick has published "Health Statistics of Women Students of Cambridge and Oxford" (1890), and various papers on educational and other subjects. She was a member of the Royal Commission on Secondary Education of 1894. Permanent address: Newnham College, Cambridge.

SIDGWICK, Professor Henry, M.A., Litt.D., born at Skipton, Yorkshire, May 31, 1838, was educated at Rugby and Trinity College, Cambridge. He was Fellow of Trinity College from 1859 to 1869, and Lecturer of Trinity College from 1869 to 1875, when he was appointed Prælector of Moral and Political Philosophy. He was elected an honorary Fellow of Trinity College, April 16, 1881; and was appointed Knightbridge Professor of Moral Philosophy in 1883. Professor Sidgwick is the author of "The Methods of Ethics," 1874; "Outlines of the History of Ethics," the "Principles of Political Economy," 1883; the "Elements of Politics," 1891; "Practical Ethics," 1898; and of several articles on philosophical and literary subjects. He took a prominent part in the promotion of the higher education of women at Cambridge, especially in the foundation and management of Newnham College. Professor Sidgwick is LL.D. of Edinburgh, Glasgow, and St. Andrews, and was made a D.C.L. of Oxford in 1890. He married Eleanor Mildred, daughter of the late James Maitland Balfour, in 1876. Address: Newnham College, Cambridge.

SIENKIEWICZ, Henryk, Polish novelist, was born at Okreya, in Podlasia, on an estate belonging to his mother. His family was originally Lithuanian, and removed to Poland in consequence of the Russian war; his grandfather served under Napoleon, and his father took part in the revolutions of 1830 and 1863. Having been educated at the Warsaw Gymnasium and the University, he emigrated in 1876 to California, to the colony that Madame Modjeska (*q.v.*) intended to found there. But the colony was a failure, and he returned to his own country, where his first literary work, the recital of his travels, was published in the Warsaw reviews. In 1891 he travelled to Central Africa with Count Tyshekevich. His great work is an early Christian story, "Quo Vadis," which he finished at Nice in 1896. It has been translated into almost every European language, and has given him a world-wide reputation. His other works include: "Szkiecy Weglem" (Sketches in Charcoal), 1874; "Ogniem i Mieczem" (Fire and Sword), 1885; "Potop" (The Hood), 1886. Most of his works have been translated

by Mr. Jeremiah Curtin, the latest being "*Hania*," a collection of short stories, published in the spring of 1898. His next book is to be "*The Knights of the Cross*."

SIEVEKING, Sir Edward Henry, M.D., F.R.C.P., LL.D., F.S.A., Physician in Ordinary to H.M. the Queen and H.R.H. the Prince of Wales, was born in London, within the sound of Bow Bells, on Aug. 24, 1816. He is descended from an old North German family, still flourishing in Hamburg, and was educated partly in England and partly in Germany. He commenced the study of medicine at the universities of Berlin and Bonn, and continued it at University College, London, and the University of Edinburgh, where he took his degree of M.D. in 1841. He travelled abroad, studying in Paris, Vienna, and Berlin. He practised among the English colony at Hamburg for four years, and while there contributed to *Oppenheim's Medical Journal*; wrote a treatise on Ventilation, a previously unconsidered subject in Germany, and built a children's hospital. In 1847 he returned to London, became a Member of the Royal College of Physicians, and four years later Fellow. After serving as Physician to the Northern Dispensary he was appointed in 1851 to St. Mary's Hospital, with which he remained actively associated for thirty-five years, and is now Consulting Physician. He has been President of the Harveian, and President of the Royal Medical Chirurgical Society. His first publication in England was in 1849, and was a pamphlet on nursing, in which the provision of nurses for the poor, as part of a perfect system of state sanitation, was strongly urged. A paper on the same subject by Dr. Sieveking was subsequently read before the Epidemiological Society, and this led to the formation of a committee, which, for a series of years, sought to carry out the views advocated by him. Lord Shaftesbury on two different occasions introduced the committee to the Poor-Law Board, which gave its official support; but nothing came of it. The present appreciation of nursing, as an aid to curative medicine, may, in a great measure, be attributed to the work done by the committee. Dr. Sieveking was a co-translator of Rokitsky's great work on Pathology for the Sydenham Society, and subsequently translated from the German for the same society Romberg's work on nervous diseases. In 1854, with his colleague at St. Mary's, Dr. Handfield Jones, he published a work on Pathological Anatomy, of which a second edition has since been edited by Dr. Payne. From 1855 to 1860 Dr. Sieveking was editor of the *British and Foreign Medical and Chirurgical Review*,

founded, and long carried on, by his friend Sir John Forbes. In 1863, on the recommendation of Sir J. Clark, the position of Physician in Ordinary to H.R.H. the Prince of Wales was offered to, and accepted by, Dr. Sieveking. In 1873 he was made Physician Extraordinary, and in 1888 Physician in Ordinary, to H.M. the Queen. He was knighted in 1886; made Honorary LL.D. Edinburgh, at the Tercentenary of Edinburgh University; wrote a work on Epilepsy, two editions; a work on Medical Advice in Life Assurance; and has delivered frequent addresses of various kinds. He was Croonian Lecturer at the Royal College of Physicians; and delivered the Harveian oration there in 1877, in consequence of which the Colleges of Physicians and Surgeons materially aided Sir E. H. Sieveking in producing an autotype publication of the MS. of W. Harvey's original Physiological Lectures, delivered in 1616 *et seq.* Sir E. H. Sieveking has filled many offices at the Royal College of Physicians. He was the Founder of the Edinburgh University Club, and is a member of the Athenæum. He married, in 1849, Miss Jane Ray, youngest daughter of John Ray, of Finchley, J.P., and has five sons and three daughters. Addresses: 17 Manchester Square, W.; and Athenæum.

SIGERSON, Dora. See SHORTER, MRS. CLEMENT.

SIMEON, Sir John Stephen Barrington, Bart., M.P., J.P., D.L., was born at Swainston, Isle of Wight, on Aug. 31, 1850, and is the eldest son of the 3rd baronet, whom he succeeded in 1870, and Jane, daughter of Sir Frederick Baker, Bart. He served as a Lieutenant in the Rifle Brigade from 1868 to 1871, and was Private Secretary to the Right Hon. John Bright, M.P., from 1880 to 1883. In 1895 he was returned to the House of Commons as Liberal Unionist member for Southampton. He is a Director of the London and South-Western Railway, a J.P. for Hants, and D.L. and County Alderman for the Isle of Wight. He married the only daughter of the Hon. R. H. Dulton in 1872. Addresses: 19 Wilton Crescent, S.W.; and Swainston, Newport, Isle of Wight.

SIMMONS, Field-Marshal Sir John Lintorn Arabin, G.C.B., G.C.M.G., son of Captain Thomas Frederick Simmons, R.A., was born at Langford, Somerset, on Feb. 12, 1821, and educated at Elizabeth College, Guernsey, and at the Royal Military Academy, Woolwich. He entered the Royal Engineers in 1837, and after serving for several years in North America, was appointed Inspector of Railways, December 1846, and in 1850 Secretary to

the Railway Commissioners. Upon the dissolution of that Commission he was transferred to the Board of Trade as Secretary to the Railway Department. In 1853, being in Turkey, he was specially employed by the late Viscount Stratford de Redcliffe on several important missions, and became her Majesty's Commissioner with the Turkish Army under the command of Omar Pacha, in which position he served on the Danube, and during the occupation of Wallachia. In November 1854 he went to the Crimea to concert with the allied Commanders-in-Chief as to the employment of the Turkish army, when it was decided that it was to occupy Eupatoria. He took part in the battle of Eupatoria, in the siege of Sebastopol, and subsequently in the Caucasus, and was present at the forced passage of the Ingur, where he commanded the division which crossed the river and turned the enemy's position, capturing his works and guns. He was the British Commissioner for the regulation of the Turco-Russian Boundary in Asia in 1857; Consul-General at Warsaw from 1858 to 1860; commanding Royal Engineers at Aldershot, 1860-65; Director of the School of Military Engineering at Chatham, 1865-67; appointed Lieutenant-Governor of the Royal Military Academy, Woolwich, March 18, 1869, and Governor the succeeding year, which appointment he held till June 1875. He then became Inspector-General of Fortifications, which post he held until 1880. He served on Royal Commissions on Accidents on Railways, and on the Defence of British Possessions and Commerce abroad. He was attached to the special Embassy during the Congress in Berlin, and was appointed to assist Lord Ampthill at the Conference in Berlin on the Greek Frontier Question. He has received the Crimean Medal and clasp, the Turkish Gold Medal for the Danubian Campaign, a Sword of Honour from the Turkish Government, the Grand Cordon of the Order of the Medjidieh, and the fourth class of the Legion of Honour. He was made C.B. in 1855; K.C.B. in 1869; G.C.B. in 1878; G.C.M.G. in 1887. He was Governor and Commander-in-Chief of Malta from June 1884 to Sept. 1888, and has since been Envoy Extraordinary and Minister Plenipotentiary to Pope Leo XIII. In 1890 he became Field-Marshal. He married (1) Ellen, daughter of John Lintorn Simmons, of Keynoham, in 1846; and (2) Blanche, daughter of the late Samuel Charles Weston, in 1856. She died in February 1898. Addresses: Hawley House, Blackwater, Hants; and Athenæum.

SIMON, Sir John, K.C.B., F.R.C.S., F.R.S., Hon. M.D. Dublin, Hon. D.C.L.

Oxford, Hon. LL.D. Edinburgh and Cambridge, Consulting Surgeon St. Thomas's, was born on October 10, 1816, and is the son of Louis Michael Simon, for thirty-one years an influential member of the Committee of the Stock Exchange, and of his wife, *née* Nonnet. By both grandfathers he was of French origin, each grandfather having come to England (where he soon married an English wife) at about the beginning of the last quarter of last century. John Simon was educated chiefly at the Rev. Dr. Burney's school at Greenwich, spent a year in the family of a German Pfarrer, and in 1833 began the study of medicine at King's College, then of new establishment in the Strand, and St. Thomas's, under the famous Joseph Henry Green, who was Professor of Surgery at the latter institution. During the winter of 1837-38 he acted as Prosecutor to Dr. Todd during his course on physiology. On Aug. 24, 1838, he was allowed by Mr. Green to go up for examination at the College of Surgeons, although his hospital apprenticeship had not yet expired, in order to be ready for an appointment as Joint-Demonstrator of Anatomy at King's College, London. He held this Demonstratorship for nine years, his colleague being Dr. (afterwards Bishop) Macdougall. In 1840, on the foundation of King's College Hospital, the subject of our memoir was at once appointed Senior Assistant-Surgeon, under Partridge and Fergusson, his colleague being Mr. (afterwards Sir William) Bowman, who had become second to him in the Demonstratorship. The dissecting-room at King's College was not in those days one of the finest in London, and the future sanitary reformer's health suffered from constant confinement there. He was accordingly rescued from an increasingly difficult situation, when, in 1847, he received the very high honour of appointment as Lecturer in Pathology, and virtually as Surgeon, at his more familiar home, St. Thomas's, of which he is still an officer. At King's College his career had been practically a period of waiting; he had enjoyed considerable leisure there, and, in accordance with the honourable tradition of the medical profession in old days, had devoted much time to cultivated pursuits, such as the study of art, metaphysical literature, Oriental languages, which he studied in the Marsden Library at King's, and kindred subjects. These interests, which have been lifelong, and have left their impress upon his polished literary style, led him at different times into the society of a very varied and brilliant circle, including such names as William Wordsworth (to whom he was introduced by Green), Tennyson, Ruskin,

Thackeray, Jowett, George Henry Lewes, Thomas Woolner, Buckle, Renan, Claude Bernard, many of the Saint-Simonians, Norton the American author, Ludwig, Tieck, Retzsch, Schelling, Sir Edward Burne-Jones, Canon Kingsley, and a host of others too numerous to mention. At St. Thomas's, however, he became convinced of the necessity of concentration, and found the work of his post a keen stimulus to industry. In December 1847 he delivered a lecture at St. Thomas's on the "Aims and Philosophic Method of Pathological Research," and followed this up with courses of lectures on Diagnosis and Therapeutics, published in the *Lancet* in 1850-52. It was in this early period, also, that he began that work of sanitary reform for which his name will ever be honoured and famous. In 1848 the City of London Officership of Health was instituted, and he was appointed thereto, remaining in it until he entered the service of the Government as Medical Officer to the Local Government Board seven years later. He continued in the service of Government until 1876. The lay mind can scarcely estimate the stupendous importance to civilisation and humanity of Simon's pioneer work. The wide-reaching sanitary legislation of 1848 might have remained a dead-letter but for the practical shape into which he of all others put it. It may be briefly stated that he drained the City, and rendered it healthy, abolishing the pernicious, and till then existent, system of central cesspools under houses, abolishing intra-mural slaughter-houses and other malodorous trade establishments, and actively crusading against smoke, intra-mural graveyards, Thames pollution, impure water, overcrowded dwellings, and a number of other similar nuisances. The reports written by him at this time to the City Commissioners of Sewers bear abundant testimony to his activity. Cholera threatening London at the time of his appointment, his conduct of this novel post was naturally the object of public scrutiny. The disease visited England in 1848-49, and in his report for that year he stated the facts and lessons of the visitation. Again in 1853 he foretold a return of the epidemic, and in 1854 recorded his experience of its severity. In the report of 1853 he laid particular stress on the fact that London was still left without comprehensive sanitary legislation. In the long run these reports led to much valuable legislation, and to a healthy revolution of public opinion, hitherto indifferent to hygienic considerations, especially as they affected the poor masses of the community. The Central Medical Officership, created in 1855, was held by the subject of our memoir for twenty-

one years. From 1855 to 1858 the office was attached to the General Board of Health, which was superseded by the epoch-making Public Health Act of 1858. From 1858 to 1871 the office was under the Privy Council, and from 1871 to 1876 it was in great part detached from the Privy Council and under the Local Government Board created in 1871. During this latter long tenure of office, Sir John Simon's work was of the most important and wide-reaching nature. His "Reports to the Privy Council" are its best monument and record. They, of course, deal with a variety of subjects, more especially with vaccination. The report of 1857 treats comprehensively of this subject, and is a defence of Jenner's discovery, drawn from vast stores of material. It may be called the standard defence of vaccination, and formed part of the counter-evidence successfully employed in Mr. Forster's Select Committee of 1871, to silence the anti-vaccinationists, who, in an age less swayed by semi-educated people, hysterical persons, and fanatics than the present, had nevertheless begun to make their voices heard. To enumerate the full details of Sir John Simon's official career would be to write a history of hygienic reform during the last fifty years. Some idea, however, of the esteem in which a grateful nation and admiring circle of co-workers and contemporaries have held him may be gained from a perusal of his list of honours. In 1844 he was made an Hon. Fellow of the Royal College of Surgeons, Eng., his name occurring in the second batch of Fellows, appointed by the Council in accordance with their then novel powers. He is therefore, with Sir James Paget, Mr. Image and others, one of the eight surviving Fellows of the 1843 and 1844 appointments. From 1868 to 1880 he was a member of Council, was Vice-President in 1876-78, and President in 1878-79. Early in 1845 he was elected F.R.S., and in 1879-80 was one of the Vice-Presidents of the Royal Society. He has been Vice-President of the Medico-Chirurgical and Clinical Societies, and President of the Medical Teachers' Association and of the Pathological Society. He is Hon. Member of the Pathological and Clinical Societies. In 1868 Oxford University conferred upon him the Hon. D.C.L.; in 1872 he was made an Hon. Med. Chir. Doctor of the University of Munich; in 1880 an Hon. LL.D. of the University of Cambridge; in 1882 an Hon. LL.D. of the University of Edinburgh, and in 1887 an Hon. M.D. of the University of Dublin. He was created K.C.B. in 1887, at the time of the first Jubilee. He has sat on many Royal Commissions, and has attended many congresses at home and abroad. In

1853-54 he was a member of the Royal Commission of Inquiry into the Causes of Cholera in Newcastle-on-Tyne, Gateshead, and Tynemouth; in 1854-55 a member of Sir Benjamin Hall's Medical Council; and in 1881 a member of the Royal Commission to inquire into the constitution of the medical profession. Sir John Simon's works include "Reports on the Sanitary State and Requirements of the City of London," 1848-55, and on those of the "People of England," 1855-77; "Observations on Medical Education," being a letter addressed to the President of the Royal College of Surgeons, 1842; "Comparative Anatomy of the Thyroid Gland," *Phil. Trans.*, 1844; "Physiological Essay on the Thymus Gland," 1845; "Sub-acute Inflammation of the Kidney," *Med. Chir. Trans.*, 1847; "The Aims and Philosophical Method of Pathological Research," 1847; "General Pathology," 1850; "Introduction to Reprint of City Sanitary Reports," 1854; "English Sanitary Institutions," 2nd edit., 1897. He has also edited (1865) the "Spiritual Philosophy" of his old master, Joseph Henry Green. He has contributed to Holmes's "System of Surgery" the article on "Inflammation," and to Quain's "Dictionary of Medicine" that on "Contagion." In the "Life of Lord Sherbrooke," 1893, the "In Memoriam" is from his pen, as also is an article on "Early Self-Government" in the *Nineteenth Century*, 1894. In July 1848 he married Jane, daughter of Matthew Delaval O'Meara, who had served with distinction as Commissary-General in the Peninsular war, and his wife, a daughter of the Rev. John Beamish, Rector of Ross-Carberry, and Castletown-Berehaven, co. Cork. Addresses: 40 Kensington Square, W.; and Athenæum.

SIMPSON, Maxwell, M.D., LL.D., Hon. D.Sc., F.R.S., born in 1815, in the city of Armagh, Ireland, is the youngest and ninth child of the late Thomas Simpson, Esq., of Beechhill, co. Armagh, and was educated at Newry School, and Trinity College, Dublin, and is A.B. and M.B. of Dublin University. The degree of M.D. (*honoris causa*) was conferred on him by the Dublin University in 1864; and that of LL.D. (*honoris causa*) in 1878; and the degree of Hon. D.Sc. by the Queen's University in 1880. He was appointed Examiner in Materia Medica in the Queen's University in 1869, and Professor of Chemistry in Queen's College, Cork, in 1872. He is the author of papers on several chemical researches, which appeared in the *Comptes Rendus*, the *Annalen der Chemie*, and the *Proceedings and Transactions of the Royal Society*, and were afterwards copied into most of the scientific

journals in Europe. The following is a list of some of the most important of the papers: "On Two New Methods for the Determination of Nitrogen in Organic and Inorganic Compounds," "Sur une Base nouvelle obtenue par l'action de l'Ammoniaque sur le Tribromure d'Allyle," "On the Action of Acids on Glycol," "On the Synthesis of Succinic and Pyrotartaric Acids," "On the Action of Chloride of Iodine on Iodide of Ethylene and Propylene Gas," "On the Synthesis of Tribasic Acids." Dr. Maxwell Simpson became a Fellow of the Royal Society in 1862; is Honorary Fellow of the King and Queen's College of Physicians; a Fellow of the Chemical Society, and of the Institute of Chemistry. He was a member of the Senate of the Queen's University; and, on its extinction, became a Fellow of the Royal University of Ireland. At the meeting of the British Association in Dublin, Dr. Simpson acted as President of the Chemical Section. In the year 1845 he married Mary, second daughter of Samuel Martin, Esq., of Longhorne, co. Down, and sister of the late John Martin, member for co. Meath. Address: 9 Barton Street, West Kensington, W.

SIMPSON, William, R.I., artist, was born at Glasgow, Oct. 28, 1823. He began life as an architect, and turned from that to art. He went through the war in the Crimea as an artist, and published sketches in two volumes, entitled "Campaign in the East," 1854-55. Mr. Simpson travelled in India, including the Himalayas and Tibet, from 1859 to 1862. The result was published in a work entitled "India, Ancient and Modern," 1867. Since 1866 he has travelled in Russia, Palestine, Abyssinia, China, Japan, America, India, Afghanistan, and Central Asia, the last being with the Afghan Boundary Commission, and other places as special artist of the *Illustrated London News*, which he has represented as special artist since 1860. In addition to the works already mentioned, he has published: "Meeting the Sun; a Journey all Round the World," 1873; "Shikare and Tamasha," 1876; "Photographs from Drawings of the Prince of Wales's Visit to India," "Picturesque People," 1876; "The Buddhist Praying - Wheel," 1896; and numerous archaeological papers at various times. Mr. Simpson is a member of the Royal Institute of Painters in Water-Colours; an Hon. Associate of the Royal Institute of British Architects; a member of the Royal Asiatic Society; and a Fellow of the Royal Geographical and other societies. Address: 19 Church Road, Willesden, N.W.

SIMS, George Robert, was born in London, Sept. 2, 1847, and educated at Hanwell College, and afterwards at Bonn. He first joined the staff of *Pan* on the death of Tom Hood the younger in 1874; and the *Weekly Dispatch* the same year. Since 1877 he has been a contributor to the *Referee* under the pseudonym of "Dagonet." In that newspaper his "Dagonet Ballads" first appeared. To the *Dispatch* Mr. Sims contributed "Social Kaleidoscope," "Three Brass Balls," and "Theatre of Life." These have been translated into German, French, and Danish. He edited *One and All* in 1879. He produced his first play, "Crutch and Toothpick," at the Royalty Theatre in April 1879; "Mother-in-Law," and "Member for Slocum," 1881. These were followed by "The Gay City," and "Half-Way House," "The Lights o' London," Princess's, Sept. 10, 1881, which ran nearly 260 nights. It was followed by "The Romany Rye," and "The Merry Duchess," a comic opera. "In the Ranks" (of which Mr. Sims was part author) was produced at the Adelphi in 1883, and ran 457 consecutive nights. His other plays are: "The Golden Ring," 1883; and "Jack in the Box" and "The Harbour Lights," written in collaboration, in 1885, ran for 513 consecutive nights. Mr. Sims has since written in collaboration the following plays: "The Golden Ladder," produced at the Globe Theatre in 1887; "The Silver Falls" and "London Day by Day," at the Adelphi; "Master and Man," at the Princess's; and "Faust Up to Date," a burlesque, at the Gaiety. In 1893 he brought out, in conjunction with Mr. Cecil Raleigh, "Little Christopher Columbus," a burlesque opera, which has had a long run. The novels he has published include "Rogues and Vagabonds," "The Ring o' Bells," "Memoirs of Mary Jane," "Mary Jane Married," "Tales of To-day," "Dramas of Life," and "The Case of George Candlemas"; and his revelations of the condition of the poor in "How the Poor Live," and "Horrible London," a series of letters to the *Daily News*, helped to focus public attention on the housing of the working-classes, and to bring about the Royal Commission. Among Mr. Sims's later literary works may be mentioned: "Dramas of Life," 1890; "Dagonet Ditties," and "Tinkletop's Crime, and other Tales," 1891; "In the Harbour" (a poem), 1892; "My Two Wives, and other Stories," "Memoirs of a Landlady," 1894; "Scenes from the Show," 1895; "The Ten Commandments" (*Weekly Dispatch*), 1896; "As it was in the Beginning" (*Weekly Dispatch*), 1897. His recent dramatic works include "The English Rose," "The Trumpet Call," "The Lights of

Home," and "The White Rose," in collaboration with Robert Buchanan, and produced at the Adelphi; "The Star of India," and "The Two Little Vagabonds," at the Princess's Theatre in 1895 and 1896-97 respectively; and "When the Lamps are Lighted," 1897. His comedies include: "The Grey Mare," "The Guardsman," Court Theatre, 1892; and "My Innocent Boy," Royalty Theatre, May 1898. His musical pieces include "Carmen Up to Date," Gaiety, 1890; "Blue-Eyed Susan," Prince of Wales Theatre, 1892; "Dandy Dick Whittington," 1895; and "The Dandy Fifth," Prince of Wales Theatre, Birmingham, April 11, 1898; "The Gipsy Earl," Adelphi, 1898, &c. Address: Clarence Terrace, Regent's Park.

SINCLAIR, The Venerable William Macdonald, D.D., Archdeacon of London and Canon of St. Paul's, eldest surviving son of the Rev. William Sinclair, Prebendary of Chichester and Rector of Pulborough (fifth son of the Right Hon. Sir John Sinclair, Bart., of Thurso Castle, Caithness), was born June 3, 1850, at Bellevue House, Leeds. He was educated at Repton School, obtained a scholarship at Balliol in 1868, and proceeded to the degrees of B.A. in 1872, M.A. in 1873, B.D. in 1888, and D.D. in 1892. In 1872 he was also President of the Oxford Union Society. He was ordained deacon and priest by the Bishop of Gloucester and Bristol, and was chaplain and secretary to Bishop Jackson of London from 1877 to 1880; Vicar of St. Stephen's, Westminster, from 1880 to 1890; member of the London School Board from 1885 to 1888; Examining Chaplain to Bishop Jackson, Bishop Temple, and Bishop Creighton of London; Hon. Chaplain to the Queen in 1889, Chaplain-in-Ordinary in 1895, Archdeacon of London and Canon of St. Paul's in 1889. The Archdeaconry of London comprises the City and the districts of East and North London, with a population of 1,442,779, and 251 parishes. Among his theological works are the following: "The Psalms in the Original Rhythm" (Hatchards); "Commentary on the Epistles of St. John" (Cassells); "Lessons on the Gospel of St. John" (Sunday School Institute); "The Servant of Christ" (Elliot Stock); "The Christian's Influence" (Nisbet); "Words to the Laity" (Nisbet); "Christ and our Times" (Isbister); "Simplicity in Christ" (Constable); "The New Law" (Nisbet); and "Chapters in the Christian Life." He has also published several Charges: "The Condition of the People," "The Church, Invisible, Visible, Catholic, National," "The English Church and the Canon Law," "Higher Reli-

gious Education," "The Ancient British Churches," and "The Churches of the East." He declines to identify himself with any party in the Church, while believing the settlement of the Reformation to be as near as circumstances would admit to the standard of the Holy Scriptures and the Primitive Church of the first three centuries both in doctrine and practice. He has always pursued a policy of conciliation both within and without the Church of England. He has shown that he thinks that the meeting of the two great parties in Church congresses, diocesan conferences, and clerical meetings, is likely to make each understand the other better, and do more justice to the other's motives. He has also shown that he thinks it possible for even the strictest Churchman to meet on friendly and courteous terms with Nonconformists without the smallest sacrifice of principle. In educational matters he has always desired that the children in Board Schools should have as much religious instruction and training as the law will admit; but this, he thinks, is more likely to be secured by coming to an understanding with the vast body of Nonconformists than by triennial contests on the subject. He thinks that if the clergy would throw themselves heartily and sympathetically into School Board management, they would find the Nonconformists ready to co-operate with them. He is at the same time a warm and steady supporter of the voluntary schools, as affording the best system of management, and maintaining the highest standard and security in religious teaching. With regard to parliamentary and municipal politics, he is understood to maintain that the clergy act most wisely in keeping out of all party combinations and associations, giving, like the Bishops in the House of Lords, a general support, where possible, to the Queen's Government. He has always shown great interest in institutions for young men, and in the various associations of Scotsmen in London, being President of the London Caithness Association, Chaplain of the Royal Scottish Corporation, of the Royal Caledonian Asylum, of the Highland Society of London, and of the Gaelic Society. He also believes that Freemasonry is thoroughly in accordance with the principles of Christianity, and does much to soften party and class distinctions, and he is a Past Grand Chaplain of England. He has carried out the traditions of his family in joining constantly in philanthropic and social work, and has desired to prove his sympathy with the working-classes by joining the Foresters, the Oddfellows, and other friendly societies. Addresses: The Chapter House, St. Paul's Cathedral, E.C.; and Athenæum.

SKEAT, Professor the Rev. Walter William, Litt. D., LL.D., D.C.L., Ph.D., born in London, Nov. 21, 1835, was educated at King's College School; at Sir R. Cholmeley's School, Highgate; and at Christ's College, Cambridge, where he graduated B.A. in 1858, being fourteenth Wrangler. He was elected Fellow of his College in July 1860; became Curate of East Dereham, Norfolk, in December 1860; Curate of Godalming, Surrey, in December 1862; and Mathematical Lecturer at Christ's College in October 1864. He was elected to the recently founded Erlington and Bosworth Professorship of Anglo-Saxon at Cambridge, May 15, 1878; and re-elected to a Fellowship at Christ's College in January 1883. Dr. Skeat, who has chiefly devoted his attention to early English literature and English etymology, has published "The Songs and Ballads of Uhlund, translated from the German," 1864; "A Tale of Ludlow Castle: a Poem," 1866; and "A Moeso-Gothic Glossary," printed by the Philological Society, 1868. For the Early English Text Society he has edited "Lancelot of the Laik: a Scotch Metrical Romance," 1865; "Parallel Extracts from twenty-nine MSS. of Piers the Plowman," 1866; "The Romans of Partenay or Lusignen; otherwise known as the Tales of Melusine," 1866; "The Vision of William concerning Piers the Plowman," five parts, 1867-84; "Piers the Plowman's Crede," 1867; "The Romance of William of Palerne; or William and the Werwolf," 1868; "The Lay of Havelok the Dane," 1868; "The Bruce; by Master John Barbour," four parts, 1870-89; "Joseph of Arimathea; or the Romance of the Saint Graal, or Holy Grail; with other Lives of Joseph of Arimathea," 1871; "Chaucer's Treatise on the Astrolabe"; "The Wars of Alexander," 1886; "Ælfric's Lives of Saints," four parts, 1882-98; &c. In a new edition of Chatterton's Poems, he has finally settled the question of the authenticity of the so-called Rowley Poems, by showing the precise sources whence Chatterton obtained the old words which abound in them. Dr. Skeat was chosen by the Syndics of the Cambridge University Press to continue and complete the work of the well-known Anglo-Saxon scholar, the late J. M. Kemble, who died before his edition of the Anglo-Saxon Gospels was finished. In 1873, with the help of others, Dr. Skeat started the English Dialect Society, for the record and preservation of provincial English words, of which Society he was the Director for four years, and afterwards President. In the course of 1873 and 1874 six works were published for this Society, five of which were edited by him. The Society lasted for twenty-four years

(1873-96), during which time it issued eighty publications, upon which the English Dialect Dictionary is mainly founded. For the Oxford Press he has edited several of Chaucer's Canterbury Tales, a portion of "Piers the Plowman," and two volumes of Specimens of English Literature, one of them in conjunction with Dr. Morris; also, for the same press, the "Gospel of St. Mark in Gothic," an "Etymological English Dictionary" (his chief work), and an abridgment of the same, entitled a "Concise Etymological Dictionary"; besides two vols. on the Principles of English Etymology. In 1886 he completed a two-volume edition of "Piers the Plowman," showing all three texts, with notes, &c.; and, in 1897, a new edition of Chaucer's Works in seven volumes. A Scottish Text Society having been founded in 1883, Dr. Skeat edited the Society's first volume, viz., an edition of the King's Quair, by King James the First of Scotland; and, subsequently, a reprint of his edition of Barbour's Bruce. In 1895 he edited "The Student's Chaucer," in one volume; and in 1896 reprinted numerous short articles in a work entitled "A Student's Pastime." His various works have greatly contributed to the increased interest which is now taken in the intelligent study of our older literature. Address: 2 Salisbury Villas, Cambridge.

SKRINE, Rev. John Huntley, M.A., Canon of St. Ninian's, Perth, Warden of Trinity College, Glenalmond, was born April 3, 1848, and is the third son of H. D. Skrine of Warleigh Manor, Somerset. He was educated at Uppingham and at Oxford, where he became a Scholar of C.C.C. in 1867; took a first class in Classical Mods. and in "Greats," and won the Newdigate Prize Poem, "Margaret of Anjou," in 1870. He was elected Fellow of Merton in 1871, and graduated M.A. in 1874. He was ordained Deacon in 1874 and Priest in 1876 (Oxon.). In 1873 he became Assistant-Master at Uppingham under his old Headmaster, Edward Thring, with whom he shared the migration of the school to Borth, N. Wales, in 1876-77, of which he wrote the story "Uppingham-by-the-Sea." He left Uppingham at the end of 1887, on the death of Edward Thring, and became Warden of Trinity College, Glenalmond, Perthshire. The school has extended during his tenure, rising in numbers from 60 to 150, and acquiring further buildings and land. On Oct. 1, 1891, he celebrated the jubilee of the foundation, at which were present, by an interesting conjuncture, the survivor of the founders, William Ewart Gladstone; the first Warden, Dr. Wordsworth, Bishop of St. Andrews; and the first boy who had entered the school,

the Marquis of Lothian. In 1897 he was appointed Canon of St. Columba in St. Ninian's, Perth, by the Bishop of St. Andrews. His published works are: "A Memory of Edward Thring," 1889; "Columba," a dramatic poem, 1893; "Joan the Maid," a dramatic poem, 1895; "Songs of the Maid and other Lyrics," 1896; "A Goodly Heritage" (sermons at Glenalmond), 1897, with some smaller volumes. In 1878 he married Mary, daughter of the Rev. G. M. Tooke. Address: Trinity College, Glenalmond, Perth.

SLADE, Wyndham, J.P., is the sixth son of General Sir John Slade, Bart., of Montys Court, Somerset, and was born on Aug. 27, 1826. He was educated at Eton, and Balliol College, Oxford, where he graduated B.A. in 1848. He was called to the Bar at the Inner Temple in 1850, was Counsel for the Post Office at the Central Criminal Court, and acted as a revising barrister from 1865 to 1877. Appointed Recorder of Penzance in 1876, he became, in the following year, Police Magistrate at the Greenwich Court, and was transferred to the Police Court at Southwark in 1879. Mr. Slade was married in 1863 to Cicely, daughter of Sir Richard Digby Neave, Bart. Address: 88 Chester Square, S.W.

SLADEN, Douglas (Brooke Wheelton), B.A., LL.B., editor of "Who's Who," born at 29 Gloucester Terrace, Hyde Park, W., Feb. 5, 1856, is elder son of Douglas Brooke Sladen of Phillimore Lodge, Kensington, W., and Mary, daughter of John Wheelton, of 59 Gloucester Terrace, W., and Meopham Bank, Kent, who was first Chairman of the London and County Bank, and Sheriff of London, 1840. Mr. Wheelton was imprisoned by the House of Commons for levying distress in the famous Stockdale v. Hansard Case. He is a nephew of the late Sir Charles Sladen, K.C.M.G., for many years Leader of the Conservative party in Victoria. Mr. Sladen was educated at Temple Grove, East Sheen; at Cheltenham College and Trinity College, Oxford, where he took open classical Scholarships, and the University of Melbourne, Australia; is B.A. Oxford, and B.A., LL.D. Melbourne; took a first class in Modern History at Oxford, and was the first holder of the Chair of History in the University of Sydney, N.S.W. He is editor of "Who's Who"; principal critic of the *Queen*; Hon. Secretary of the Authors' Club; Joint Hon. Secretary of the New Vagabond Club. He is author of "Frithjof and Ingebjorg," 1882; "Australian Lyrics," 1882; "A Poetry of Exiles," 1883; "A Summer Christmas,"

1884; "In Cornwall and Across the Sea," 1885; "Edward the Black Prince," 1886; "The Spanish Armada," 1888; "Lester the Loyalist," 1890; "The Japs at Home," 1892; "On the Cars and off," 1895; "A Japanese Marriage," 1895; "Brittany for Britons," 1896; "Trincolor," and "The Admiral," 1898, the last-mentioned a work in defence of Nelson and Lady Hamilton. He has edited "Australian Ballads and Rhymes," 1888; "A Century of Australian Song," 1888; "Australian Poets," 1888; "Younger American Poets," 1891; "Who's Who," 1897-98-99. He won the Spencer Cup at Wimbledon in 1874. He has spent much time in Italy, Sicily, Greece, and Japan, and lived four years in Australia and two in Canada and the United States. Address: 32 and 34 Addison Mansions, Kensington, W.

SLATIN PACHA, Sir Rudolf C., K.C.M.G., C.B., M.V.O., was born in Vienna in 1860, and having entered the Austrian army, visited the Soudan in 1876. He returned to take part in the war against Turkey, but at the end of 1878 General Gordon offered him a position at Khartoum. Soon after he was appointed Governor of Darfur, and tried to stem the tide of Mahdism which had arisen in Kordofan. He fought twenty-seven battles, and lost the greater part of his troops and ammunition. Being cut off from all communication with Khartoum and El Obeid, and his men being disaffected, he was forced to surrender. The Mahdi placed him in chains, and he was subjected to the greatest privations until, after the fall of Khartoum and the death of the Mahdi in June 1885, he was released by the Khalifa, who made him one of his body-guard. Being always under his eye, escape was exceedingly difficult, and he failed in nine attempts. But in 1895, through the efforts of Sir Francis Wingate, of the Egyptian Intelligence Department, he succeeded in eluding his janitors, after having been eleven years in close captivity. After his escape to Egypt he returned to Europe, but soon went back as one of the chief officers in the Egyptian Intelligence Department. As a Colonel in the Egyptian army he accompanied the British force through the successive campaigns of Dongola, the Atbara, and Omdurman, and his knowledge of the Dervish dispositions was invaluable. He has written a vivid description of his experiences, entitled "Fire and Sword in the Soudan," which was published in 1896. He was created C.B. in 1895, and K.C.M.G., 1898. He is also M.V.O. (1896). The Emperor Francis Joseph conferred upon him the title of *Ritter* (1899).

SMEATON, Oliphant. See SMEATON, WILLIAM HENRY OLIPHANT.

SMEATON, William Henry Oliphant, "Oliphant Smeaton," joint-editor of the Famous Scots Series, was born at Aberdeen, on Oct. 24, 1856, and is the youngest son of the late Rev. Prof. Smeaton, D.D., and great-grandnephew of the builder of the Eddystone. He was educated at the Royal High School, Edinburgh, and at Edinburgh University. He studied for the Church, but did not enter it. In 1878 he went out to New Zealand, and was for some years Principal of Whangarei High School. In 1883 he became leader-writer and dramatic critic on the *Daily Telegraph*, Melbourne, and from 1888 to 1893 was editor of the *Daily Northern Argus*, Queensland. In 1893 he returned to England, where he has been editor of the *Liberal*, and has written constantly in home, colonial, and American journals. His works include: "By Adverse Winds," 1895; "Allan Ramsay," 1896; "Smollett," 1897; "William Dunbar and His Times," and "Memorable Edinburgh Houses," 1898; "A Mystery of the Pacific," "English Satires and Satirists" (Warwick Library), 1899, &c. Address: 37 Mansion-House Road, Edinburgh.

SMILES, Samuel, LL.D., was born at Haddington, Scotland, on Dec. 23, 1812. His father died of cholera in 1830, and his mother was left to educate eleven children. He was educated for the medical profession, and practised for some time as a surgeon at Haddington; but abandoning medicine, he succeeded the late Mr. Robert Nicoll as editor of the *Leeds Times*. He became, in 1845, secretary of the Leeds and Thirsk Railway, and after ten years (on the amalgamation of the railway with the North-Eastern) he transferred his services, at the end of 1854, to the South-Eastern Railway, from which he retired in 1866. The University of Edinburgh conferred on him the honorary degree of LL.D. in 1878. He has written, "Physical Education; or, Nurture and Management of Children," 1838; "History of Ireland," published while he was at Leeds; "Railway Property, its Conditions and Prospects," 1849; "Life of George Stephenson," 1857, of which the fifth edition appeared in 1858; "Self-Help; with Illustrations of Character and Conduct," 1859; "Workmen's Earnings, Strikes, and Wages," and "Lives of Engineers, with an account of their works," 1861; "Industrial Biography," 1863; "Lives of Boulton and Watt," 1865; "The Huguenots: their Settlements, Churches, and Industries in England and Ireland," 1868, 3rd edit.,

1869; "Character," a companion volume to "Self-Help," 1871; "The Huguenots in France after the Revocation of the Edict of Nantes: with a Visit to the Country of the Vaudois," 1874; "Life of a Scotch Naturalist," 1876; "George Moore, Merchant and Philanthropist," 1878; "Life of Robert Dick (Baker of Thurso), Geologist and Botanist," 1878; "Duty, with illustrations of Courage, Patience, and Endurance," 1880; "Men of Invention and Industry," 1884; "Life and Labour; or Characteristics of Men of Industry, Culture, and Genius"; "Jasmin: Barber, Poet, Philanthropist," 1891; "Life of Josiah Wedgwood"; "Life of George Moore." He also edited the Autobiography of Mr. James Nasmyth, 1883, and has been a constant contributor to the *Quarterly Review* and other periodicals. In 1897 the King of Servia presented him with the Knight Commander's Cross of the Royal Order of St. Sava in appreciation of his literary work. Address: 8 Pembroke Gardens, Kensington, W.

SMITH, The Right Hon. Sir Archibald Levin, Lord Justice of Appeal, was born in 1836, educated at Trinity College, Cambridge, and called to the Bar at the Inner Temple in 1860. He was Junior Counsel of the Treasury from 1863 to 1868, and from 1879 to 1883, when he was elevated to the Bench as a Judge of the Queen's Bench Division of the High Court of Justice. In 1888 he was one of the three Judges appointed on the Parnell Commission. In 1893 he was appointed a Lord Justice of Appeal. In 1867 he married Isabel, a daughter of J. C. Fletcher. Address: Salt Hill, Chichester; and 66 Cadogan Square, S.W.

SMITH, Benjamin Leigh, was born March 12, 1828, and educated at Jesus College, Cambridge, where he graduated as a Wrangler in 1852. He was called to the Bar by the Inner Temple in 1856. Mr. Smith has made five voyages to the Arctic regions. He visited them first in 1871, in the *Samson*, when he sailed to the north-east of Spitzbergen; reached latitude 81° 24', and added greatly to the knowledge of land in that direction; secondly, in 1872, in the *Samson*, to the north of Spitzbergen; thirdly, in 1873, with the *Diana* steamer and *Samson*, again to Spitzbergen, when he relieved the Swedish Expedition, for which he received the Order of the North Star from the King of Sweden. In these three voyages he took deep-sea temperatures, which added much to the knowledge of the Gulf Stream, and established the fact of warm under-currents flowing

beneath surface-water of a much lower temperature. In 1880 he built the steamer *Eira*, and again went north. After attempting to reach the east coast of Greenland, and to pass to the north-east of Spitzbergen, he returned to the south of Spitzbergen; and steaming east, and then north, through much ice, reached Franz-Josef Land, on August 14; then, going to the west, he discovered many islands, and over 200 miles of new coast-line. In 1881 he again started in the *Eira* for Franz-Josef Land, which he reached on July 24, but unfortunately the *Eira* was crushed in the ice on August 21, and sank before many stores were saved. The crew built a hut of turf and stones, where they wintered, living mostly on bears and walrus. On June 21, 1882, they left in four boats, and reached Nova Zembla on August 2. The next day they fell in with the *Willem Barents* and the *Hope*, which had been sent to their relief, and they arrived at Aberdeen on board the *Hope* on August 20. Mr. Smith received a Gold Medal of the Paris Geographical Society in 1880; and a Gold Medal of the Royal Geographical Society in 1881.

SMITH, Sir Cecil Clementi, G.C.M.G., was born in London, Dec. 23, 1840, and is the son of the Rev. John Smith, M.A., and of Cecilia, daughter of the celebrated composer, Muzio Clementi. He was educated at St. Paul's School, and Corpus Christi College, Cambridge; B.A. 1862, M.A. 1868. He entered the Colonial Civil Service on appointment, after competitive examination, as a Student Interpreter, Hong Kong, in 1862; filled the office of Police Magistrate, Registrar-General, Treasurer, and Acting Colonial Secretary in that Colony. In 1878 he was appointed Colonial Secretary of the Straits Settlements. From 1884 to 1885 he acted as Governor, and was appointed Lieutenant-Governor and Colonial Secretary, Ceylon, 1885. He was promoted to be Governor and Commander-in-Chief of the Straits Settlements in 1881. He was also Governor of Christmas Island, and Governor of the Cocos-Keeling Islands, and was appointed H.M. High Commissioner and Consul-General for Borneo, 1890. He was created C.M.G. 1880, K.C.M.G. 1886, and G.C.M.G. in 1892. He went in 1878 on a special mission to the Government of the Philippine Islands to settle certain British marine claims, and received the thanks of H.M. Government. He also received the thanks of H.M. Government for the settlement of the "Nisero" case, 1884. He retired on a pension in 1893. He married, in 1868, Teresa, daughter of A. Newcomen, Kirkleatham Hall, Redcar. Address: The Garden House, Wheathampstead, Herts.

SMITH, Charles, M.A., Master of Sidney Sussex College, Cambridge, was born at Huntingdon on May 11, 1844. He was educated at Sidney Sussex College, and in 1868 stood third Wrangler, and was elected a Fellow of his College, of which he has also been Tutor. He was appointed Master in 1890, and was Vice-Chancellor of the University in 1895-96 and 1896-97. He is a Governor of Eton College. His publications include the popular text-books "Elementary Algebra," 1886, and "Treatise on Algebra," 1887, which are to the present generation of schoolboys what "Todhunter" was to their predecessors in the seventies and eighties. He has also published text-books on Conics, Solid Geometry, Geometrical Conics, &c. He married Annie, only daughter of Lieut. E. B. Hopkins, R.N., in 1882. Address: The Lodge, Sidney Sussex College, Cambridge.

SMITH, Sir Charles Bean Euan.
See EUAN-SMITH, SIR CHARLES BEAN.

SMITH, Charles Emory, American political leader, was born at Mansfield, Connecticut, Feb. 18, 1842, and received an academic education at Albany, N.Y., where his parents had removed early in his life. He was graduated from Union College in 1861, and the same year was appointed on the staff of General Rothbone, where he spent two years in organising volunteers for the army. In 1865 he became editor of the *Albany Express*, which position he held for five years, acting for a time also as Private Secretary of the Governor of the State of New York. In 1870 he was associate editor of the *Albany Journal*, and in 1876 its editor-in-chief. In 1880 he was selected as editor-in-chief of the *Philadelphia Press*. He was chosen Trustee of Union College in 1871, and the Legislature of New York in 1879 elected him a Regent of the University of the State of New York. He was appointed Minister to Russia by President Harrison, and became Postmaster-General of the United States, April 21, 1898, under President M'Kinley.

SMITH, The Rev. Frederick John.
See JERVIS-SMITH, THE REV. FREDERICK JOHN.

SMITH, George Barnett, was born at Ovenden, near Halifax, Yorkshire, May 17, 1841, and educated at the British Lancastrian School, Halifax. In March 1864 he came to London for the purpose of pursuing a journalistic and literary career. He was first engaged on the staff of the *Globe* newspaper, and afterwards for eight

years on that of the *Echo*. He contributed to the *Edinburgh Review* articles on "The Works of Thackeray," "Recent Editions of Molière," "English Fugitive Poetry," and other subjects. Mr. Smith has contributed a great number of literary, critical, and biographical articles to the *Cornhill Magazine*, and has likewise contributed to the "Encyclopædia Britannica," the *Fortnightly* and *British Quarterly Reviews*, and *Fraser's* and *Macmillan's Magazines*. He is also a contributor to the *Times* and the *Saturday Review*, and has written many biographical and other articles for the "Dictionary of National Biography," and the new edition of "Chambers's Encyclopædia." His first published work was a volume of poems, 1869; followed by "Poets and Novelists," a series of literary studies, 1875; and "Shelley: a Critical Biography," 1877. In 1879 was published his "Life of Mr. Gladstone." Two years afterwards appeared the companion work, "The Life of Mr. Bright." Mr. Barnett Smith has edited, with introductions and notes, a work entitled "Illustrated British Ballads," in two volumes. He is also the author of "The Prime Ministers of Queen Victoria," and of "The Life of Queen Victoria"; likewise "Victor Hugo; His Life and Work"; this appeared in 1885; and his "William I. and the German Empire" in 1887. Mr. Barnett Smith is a Fellow of the Royal Geographical, Royal Historical, and other societies. In 1892 his most important work was published in two large octavo volumes, "History of the English Parliament, together with an Account of the Parliaments of Scotland and Ireland." This standard work occupied five years in preparation. Among the writer's most recent volumes are: "Eminent Christian Workers," a Biography of Ferdinand de Lesseps, and a volume of Nineteenth-Century Studies, entitled "Women of Renown." In 1896-97 he wrote two volumes on "The United States," and one volume on "Canada," for a series of works on "The Romance of Colonisation," and in 1898, "The Right Honourable William Ewart Gladstone." Mr. Barnett Smith is known as an artist, and has published a number of etchings. Owing to prolonged ill-health he now resides permanently at Argyle Lodge, Surrey Road, Bournemouth.

SMITH, George Vance, B.A., Philos. and Theol. Doct., was educated for the Nonconformist ministry at Manchester College, York, and was afterwards Professor of Theology in the same College, established of late years at Oxford. Subsequently he was minister of St. Saviour-gate Chapel, York, and later, for twelve years, terminating in 1888, Principal of

the Presbyterian College, Carmarthen. He is the author of various works, including "The Prophecies relating to Nineveh and the Assyrians," from the Hebrew, with notes, &c., 1857; "The Prophets and their Interpreters," 1878; "Texts and Margins of the Revised New Testament affecting Theological Doctrines," 1881; "Eternal Punishment," in reply to Dr. Pusey, 6th edit., 1894; "The Bible, and its Theology," enlarged, 1892; "The Spirit and the Word of Christ," 2nd edit., 1874; "Chapters on Job for Young Readers," 1887; is also joint-author of "The Holy Scriptures of the Old Covenant, in a Revised Translation," 3 vols., 8vo, 1864, and is the writer of various articles in the *Nineteenth Century* and other periodicals. He was a member of the company for the revision of the New Testament from the formation of the company in May 1870, till the conclusion of the work. Address: Bath.

SMITH, Colonel Sir Gerard, K.C.M.G., Governor of West Australia, son of M. T. Smith, Esq., M.P., was born in 1839, in London, and at the age of eighteen entered the army as ensign of the Scotch Fusiliers. He served in Canada with the expedition sent out in consequence of the seizure of Mason and Slidell by the Americans. He retired from the army with the rank of Lieut.-Colonel in 1874, and joined his father's business, of Smith and Wilberforce, bankers, of Hull. In 1879 he suggested the idea of the Hull and Barnsley Railway in order to break down the North-Eastern monopoly, and became its first Chairman. He entered political life in 1883 as Liberal member for High Wycombe, but with the introduction of the Home Rule Bill he became a Unionist. He was appointed to his present post in 1895. He married Chatelaine, daughter of Canon Hamilton, in 1871. Addresses: Tranby Lodge, Hull; Government House, Perth, W. Australia.

SMITH, Professor Goldwin, D.C.L., LL.D., eldest son of Richard Smith, M.D., was born at Reading, Berkshire, Aug. 13, 1823, and educated at Eton and Oxford. He gained in 1842 the Hertford Scholarship, and in 1845 that founded by Dean Ireland. In the latter year he graduated B.A. as first class in Classics, and subsequently he proceeded to the degree of M.A. He gained the Chancellor's prizes for Latin Verse, 1845; for the Latin Essay, 1846; and for the English Essay, 1847. In 1847 he was elected a Fellow of University College; and in the same year he was called to the Bar at Lincoln's Inn, but he has never practised law. He is also an Honorary Fellow of Oriel College.

In 1850 he was appointed by the Government Assistant-Secretary of the Royal Commission on the State of the University of Oxford. He was also Secretary to the second Oxford Commission, and was a member of the Popular Education Commission appointed in 1858. The same year he was appointed to the Regius Professorship of Modern History at Oxford, and he held that chair till 1866. Prof. Goldwin Smith was a prominent champion of the North during the Civil War, when he wrote "Does the Bible sanction American Slavery?" 1863; "On the Morality of the Emancipation Proclamation," 1863; and other pamphlets on the same subject. In 1864 he visited the United States on a lecturing tour. He met with an enthusiastic reception, and the Brown University conferred upon him the honorary degree of LL.D. On his return he published "England and America," 1865, and "The Civil War in America," 1866. In November 1868, having resigned his chair at Oxford, he settled in the United States as Professor of English and Constitutional History in the Cornell University at Ithaca, New York. This post he occupied till 1871, when he removed to Canada, where he was for a time a member of the Senate of the University of Toronto. He was editor of the *Canadian Monthly*, 1872-74, and he subsequently founded the *Week* and the *Bystander*; the publication of the latter was discontinued in 1890. In addition to the works mentioned above, he is the author of "Canada and the Canadian Question," 1891; "History of the United States," 1894; "Irish History and Irish Character," "Three English Statesmen," "The Empire," "Lectures on the Study of History," "The Reorganisation of the University of Oxford," "A Plea for the Abolition of Tests," "Rational Religion, and Rationalistic Objections," "Essays on Questions of the Day," "A Trip to England," "Oxford and her Colleges," "William Lloyd Garrison," and a number of other works indicating an immense range of culture, and various lectures and letters in the *Daily News*, and letters in the *Times*, some of the most recent of which deal at length with Cobdenism (December 1898) and Party Government. The degree of D.C.L. was conferred upon him by Oxford in 1882. He married Harriett S. M. Boulton, whose maiden name was Dixon. Address: The Grange, Toronto.

SMITH, Lieut.-Colonel Sir Henry, K.C.B., is the son of the Rev. George Smith, D.D., of Edinburgh, and was born in 1835. He filled the office of Chief Superintendent of Police in the City of London from 1885 to 1890, and in the latter year he was appointed Commissioner

of Police in the City. He was created a K.C.B. in 1897. Addresses: 26 Old Jewry, E.C.; and 42 Seymour Street, W.

SMITH, Horace, is the son of the late Robert Smith, of London, and was born in London on Nov. 18, 1836. He was educated privately, at Highgate Grammar School, King's College, London, and Trinity Hall, Cambridge, where he graduated B.A. with Mathematical Honours. Called to the Bar at the Inner Temple in 1862, he became Counsel to the Mint, was a revising barrister on the Midland Circuit, and acted as Secretary to the Oxford Bribery Commission. In 1881 he was appointed Recorder of Lincoln, and in 1888 became a Metropolitan Police Magistrate at the Clerkenwell Court. Mr. Horace Smith is the author of "A Treatise on Landlord and Tenant, and Negligence"; he has edited "Addison on Contracts," "Addison on Torts," "Roscoe's Criminal Evidence," "Russell on Crimes," and he has published: A volume of "Poems," 1860; "Poems," 1890; "Interludes," 1892; "Interludes" (2nd series), 1894; and "Poems," 1897. Address: Ivy Bank, Beckenham.

SMITH, Hugh Colin, Governor of the Bank of England, was born in 1836, and is the third son of John Abel Smith, M.P., of Dale Park, Sussex. He became Governor of the Bank of England in 1897. He married, in 1865, a daughter of Henry J. Acheane, M.P. Address: 71 Prince's Gate, S.W. &c.

SMITH, The Rev. Isaac Gregory, M.A., Hon. LL.D., Rector of Great Shefford, Berks, was born Nov. 21, 1826, at Manchester, being the fourth son of the Rev. Jeremiah Smith, D.D., High Master of the Free Grammar School, and Rector of St. Anne's, Manchester. He was educated at Rugby and Trinity College, Oxford; was elected Hertford University Scholar in 1846, Ireland University Scholar in 1847, Fellow of Brasenose College in 1848. He was appointed Rector of Tedstone, Delamere, Herefordshire, in 1854; Prebendary of Hereford Cathedral in 1870; Vicar of Great Malvern in 1872; Bampton Lecturer at Oxford in 1872; Examining Chaplain to the Bishop of St. David's, and Rural Dean of Powyke, 1882. In 1886 he received the honorary degree of LL.D. from Edinburgh University, and of the same year made Honorary Canon of Worcester Cathedral. He became Rector of Great Shefford, Berks, in 1896. He is the author of "Faith and Philosophy" and "Epitome of the Life of Our Saviour," 1867; "The Silver Bells," 1869; "Fra An-

gelico and other Poems," 1871; "Prayer for Every Hour," 1879; "Thoughts on Education," "Diocesan History of Worcester," "Aristotelianism," and "History of Christian Monasticism," "What is the Bible?" "Life of Boniface." Address: Great Shefford Rectory, near Lambourn, Berks.

SMITH, The Hon. Sir John Smalman, M.A., was born at the Chauntry, Shropshire, on Aug. 23, 1847, and is the eldest son of the late S. Pountney Smith, J.P. He was educated at Shrewsbury School and St. John's College, Cambridge, where he took his M.A. degree. He was called to the Bar, November 1872; went the Oxford Circuit; was appointed Puisne Judge in the Gold Coast Colony, 1883; sole Judge of the Supreme Court of the Colony of Lagos, 1886; Chief-Justice of the Colony of Lagos, 1889-95. He received the honour of knighthood in 1896. His Honour has published three editions of "How we are Governed," "The Modern County Court," "County Government," and various works on legal subjects, e.g., "The Law of Support in relation to Land, Mines, and Buildings," "The Law of Fixtures and Dilapidations," &c. Addresses: Courtfield, Chiswick, W.; and 8 King's Bench Walk, Temple, E.C.

SMITH, His Honour Judge Lumley, Q.C., J.P., was educated at Trinity Hall, Cambridge, where he was a Fellow of his College. He was called to the Bar at the Inner Temple in 1860, and became a Q.C. in 1880. He was Recorder of Sandwich from 1883 to 1894, Judge of the Shoreditch and Bow County Courts from 1892 to 1893, and, in the latter year, was appointed Judge of the Westminster County Court. He was married, in 1874, to Jessie, daughter of Sir Thomas Gabriel, Bart. She died in 1879. Address: 25 Cadogan Square, W.

SMITH, Sir Thomas, Bart., F.R.C.S., was born in 1833, and is the son of Benjamin Smith, of Great Lodge, Kent. He was educated at Tonbridge School and at St. Bartholomew's Hospital, of which he is Surgeon. In 1895 he was appointed Surgeon-Extraordinary to her Majesty the Queen, and was created a Baronet in Jubilee year, 1897. He has been Vice-President of the Royal College of Surgeons, England, is Examiner in Surgery at the Royal College of Physicians, London, and Hon. Secretary of the Royal Medical Chirurgical Society. He is Consulting Surgeon to the Children's Hospital, Great Ormond Street. He has contributed largely to Holmes's "System of Surgery,"

to the Royal Medical Chirurgical *Transactions*, and the reports of his own hospital. Address: 5 Stratford Place, Oxford Street, W.

SMITH, Thomas Roger, F.R.I.B.A., Professor of Architecture at University College, London, was born in 1830, and is the son of the Rev. Thomas Smith, of Sheffield, a well-known scholar and eloquent preacher. His mother was of Huguenot family, and was a grand-daughter of Roubiliac the sculptor. He was articled to the late Samuel Beazley as an architect, and, on his death, to Mr. P. C. Hardwick, having as fellow-pupils Mr. (now Sir Arthur) Blomfield, Mr. Eastlake, and the late Mr. F. P. Cockerell. He travelled as an architectural student for about a year, and spent some time under Sir James Pennethorne before starting in practice in 1855. Since that time he has practised his profession continuously, and has designed and erected many public and private buildings of importance in London and the provinces. A design by him for the European Hospital, Bombay, was selected by the Government for execution. This led to his visiting India in 1865, and subsequently preparing, in co-operation with the architect to the Bombay Government, the plans from which several public buildings in that Presidency were erected. Among these were the Elphinstone College, the enlargement of the Cathedral, and (with modifications made on the spot) the Post Office, Bombay, the Government House at Gunnish Khind, and the Engineering College, Poonah. Professor Roger Smith is an Examiner in Architecture for the Science and Art Department, an Examiner under the Metropolitan Building Act of Candidates for the Office of District Surveyor, and in 1879 he was appointed Professor of Architecture in University College, London, in succession to Professor T. Hayter Lewis (resigned). He is the author of two or three manuals on subjects connected with his profession, and of many papers or special lectures delivered before the various societies which deal with his subjects in London, and he has been engaged, both as an editor and a writer, on the professional press. Professor Roger Smith is a Fellow of the Institute of Architects, and has been a Member of the Council. He is a Past President of the Architectural Association, and belongs to other societies. He holds one or two professional appointments, including that of Architect to the Carpenters' Company of the City of London, in which capacity he has been able to assist the Court of that Company in organising its classes, its technical library and free public lectures, its examination

for skilled artisans in carpentry and joinery, and, more recently, its Exhibitions and School of Wood-Carving. Address: University College, Gower Street, W.C.

SMITH, The Hon. William Frederick Danvers, M.P., D.L., J.P., partner, since 1890, in W. H. Smith & Son, booksellers, librarians, newsagents, &c., is the only son of the late Right Hon. William Henry Smith, M.P., and the first Viscountess Hambleden. He was educated at Eton and New College, Oxford. He has sat as Conservative member for the Strand Division since 1891. He is Treasurer and Member of Council of King's College, London, to which body, in pursuance of his late father's wishes, he has been a munificent benefactor. In 1896 he was appointed Chairman of the Metropolitan Unionist Members in succession to Lord Glenesk. He married, in 1894, Lady Esther C. G. Gore, daughter of the 5th Earl of Arran. Addresses: 3 Grosvenor Place, S.W.; Greenlands, Henley-on-Thames, &c., &c.

SMITH, Professor William Robert, M.D. Aberdeen; D.Sc. Edinburgh; D.P.H. Cantab.; F.R.S. Edin.; Barrister-at-Law, was born May 28, 1850, at Plumstead, Kent, and is the eldest son of Captain R. T. Smith, Plumstead. He is Professor of Forensic Medicine and Director of the Laboratories of State Medicine in King's College, London; Medical Officer of the School Board for London; and Medical Officer of Health and Public Analyst for Woolwich. For many years he has taken a prominent and important part in all matters concerning the public health, and to his exertions it is mainly due that statutory provision exists necessitating that Medical Officers of Health should possess a qualification in Public Health, and that before obtaining such, candidates for the diploma should be required to undergo a thorough and prolonged special training. He was the founder of the British Institute of Public Health, an Association mainly composed of Medical Officers of Health, or those qualified to be such, and of the Medical Officers of the Royal Navy and of the Royal Army Medical Corps. For the past five years he has been its President, and as such presided over the largest National Health Congress ever held in London, at the close of which he was the recipient, at the Mansion House, at the hands of the Lord Mayor, of an address and an international presentation of plate. Her Majesty the Queen, in 1897, to mark her approval of the great influence for good exerted by the Institute, commanded that it should be called the

Royal Institute of Public Health, and became its patron. He organised the Dublin meeting of the Institute in August 1898. He has also done much for the public health interests of London as one of the elected Managers of the Metropolitan Asylums Board, has taken the most prominent part in putting all questions of school hygiene on a proper footing, and has rendered noteworthy service in connection with the Special Schools for Feeble-Minded Children, being one of the Departmental Committee of the Education Department who reported on this subject in 1898. He has taken a great interest in the Volunteer movement, and holds the rank of Brigade Surgeon-Lieutenant-Colonel, East London Volunteer Brigade and to the London Rifle Brigade (1st London), and was one of the Departmental Committee of the War Office in 1887, which drew up the scheme of Volunteer Medical Organisation. He is the author of "The Laboratory Text-Book of Public Health," and editor of the 7th edition of "Guy and Ferrier's Forensic Medicine," and has contributed extensively to the medical and scientific press. His classes at King's College have been largely attended, and many of those occupying important Public Health positions in all parts of the world have received their instruction under his superintendence. In January 1899 the Council of the Royal Institution of Public Health appointed him Harben Lecturer for 1899. He chose diphtheria as his subject. Addresses: 74 Great Russell Street, Bloomsbury Square, W.C.; and Plumstead, Kent.

SMITH, The Most Rev. William Saumarez, D.D., Lord Bishop of Sydney, Metropolitan of New South Wales, and Primate of Australia, was educated at Trinity College, Cambridge, where his career was brilliant. He was a scholar of his College, was in the first class of the Classical Tripos, and in the first class of the Theological Tripos, and graduated in 1858. He won several University prizes, and in 1859 was elected Crosse Theological Scholar, and in 1860 Tyrwhitt's Hebrew Scholar. He twice won the Seatonian English Verse prize, and proceeded M.A. 1862; B.D. 1871; D.D. 1889. In 1859 he took Holy Orders, and was successively Curate of St. Paul's, Cambridge, 1859-61; Fellow of Trinity College, Cambridge, 1860-70; Chaplain to the Bishop of Madras, 1861-65; Curate of Holy Trinity, Cambridge, 1866; Vicar of Trumpington, 1867-69; Principal of St. Aidan's College and Examining Chaplain to the Bishop of Norwich, 1869-90. From 1880 to 1890 he was Hon. Canon of Chester, and on June 24, 1890 was consecrated, in St. Paul's

Cathedral, Lord Bishop of Sydney, Metropolitan of New South Wales, and Primate of Australia. He is author of "Obstacles to Missionary Success" (Maitland Prize Essay), 1868; "Christian Faith," 1869; "Lessons on the Book of Genesis," 1879; "The Blood of the New Covenant," 1889; and articles in the ninth edition of the "Encyclopædia Britannica" on Corinthians and Colossians. Address: Bishops-court, Randwick, New South Wales.

SMITH-WILLIAMS, Mrs., née McKenzie, Marian, A.R.A.M., contralto singer, is the elder daughter of Captain Joseph McKenzie, shipowner, of Plymouth, where she was born. She studied singing under Mr. Samuel Weeks of that town, and, coming to London to complete her education, gained the Parepa-Rosa Scholarship at the Royal Academy of Music, also the Westmoreland Scholarship, and the bronze, silver, and gold medals of the Academy, the latter for declamatory singing. She was a pupil of Signor Randegger, and for elocution, of Mr. Walter Lacy. She has also studied oratorio singing with Miss Anna Williams, and has an extensive repertoire in works of the classical composers from Bach and Handel down to those of the present day. Among the latter we notice repeated successes in Sir Arthur Sullivan's "Golden Legend," Dr. Mackenzie's "Rose of Sharon," Dvorák's "Stabat Mater," and Dr. Hubert Parry's "Judith." Besides having an established reputation as a festival singer, especially as principal contralto at the Handel and Bach festivals, &c., Miss McKenzie has achieved distinction in classic and ballad concerts. She has also sung at State Concerts and at Welsh Eisteddfods. With a voice remarkable for richness and sympathy, she is perhaps unrivalled for sweetness and distinctness in the use of the mother tongue. She is an Associate of the Royal Academy of Music, and of the Philharmonic Society. Miss Marian McKenzie married Mr. Smith-Williams, the brother of Miss Anna Williams, the soprano. Address: Prince's House, Victoria Street, S.W.

SMYTH, Charles Piazzi, LL.D. Edin., F.R.A.S., F.R.S.E., for a time F.R.S., and for forty-three years Astronomer-Royal for Scotland, was born in 1819 at Naples, and is the second of three sons of the late Admiral Smyth, but was educated in England. He commenced his astronomical service at the Royal Observatory, Cape of Good Hope, under Sir T. Maclear, in 1835, and subsequently assisted in the re-measurement of La Caille's South African Arc of the Meridian. He was appointed, in 1845, to succeed Thomas

Henderson, First Astronomer-Royal for Scotland, in the Royal Observatory, Edinburgh. He applied himself, on arrival, to clearing off five years' arrears of computation and printing, and next to continuing Meridian star observations, besides establishing a daily time-ball, and afterwards an electrically-fired daily time-gun for the service of the city. In 1858 he was appointed to prepare for Government all the meteorological deductions furnished by 55 observing stations. In 1856, soon after his marriage with Jessie Duncan, he spent several months in testing, with her, the qualities of the Peak of Teneriffe for star observation above the level of the clouds. In 1859 he visited and published on the Russian Observatories. In 1864-65 he visited (accompanied again by his wife), investigated, and published on, the great pyramid in Egypt, and described the results in various works, one of which has just reached its 5th edition. In 1871 he began to compose a comprehensive star-catalogue and ephemeris of all the Edinburgh and best contemporary observations of the same stars, of which new kind of catalogue the first four hours were published in 1877 in the 14th volume of the Edinburgh Observatory's publications, and the last twenty hours were published in 1886, as the 15th volume. Then, with failing instruments and insufficient means for rectifying them, he applied for retirement, and obtained it in August 1888, and was awarded a small pension. He and Mrs. Piazzzi Smyth have since resided near Ripon, where he has devoted himself to solar photographic spectroscopy, and to watching and photographically recording cloud-forms. Address: Clova, Ripon.

SMYTHE, Lionel Percy, painter in oil and water-colours, was born in London in 1840, of English parents, and was educated at King's College School. He was elected a Member of the Royal Institute of Painters in Water-Colours in 1880, but retired in 1889. Being elected an Associate of the Old Society of Painters in Water-Colours in 1893, he became a full member in the following year, and was elected an Associate of the Royal Academy of Arts in 1898. Addresses: Château d'Honvault, par Wimilla, Pas de Calais; and 36 Gloucester Crescent, Regent's Park, London, N.W.

SNELUS, George James, F.R.S., F.C.S., Bessemer Medallist, Vice-President of the Iron and Steel Institute, &c., an iron-master, was born June 25, 1837, at Camden Town, London, and is the son of James Snelus, a builder, who died when George James Snelus was seven and a half years of age, and the family was left im-

poverished by a long and heavy lawsuit. Thanks, however, to his mother, George James Snelus was provided with a good education. He was originally trained as a teacher at St. John's College, Battersea; and for some years he acted in that capacity with great success, particularly in the conduct of Science Classes under the Science and Art Department. During that time he also attended Owens College, Manchester, as a student under Professor Roscoe, and the Physical Classes under Professor Clifton. In the May examinations of 1864 he obtained the first of the Royal Albert Scholarships in competition with the whole of the United Kingdom, securing the Gold Medal for Physical Geography, Bronze Medal for Chemistry, &c., and a free education for three years at the Royal School of Mines. His career there was eminently successful, as he obtained the first scholarship in the first year, second scholarship in the second year, and the first place and the De La Beche medal for Mining in the third year, passing out as an Associate of the School in mining and metallurgy. He was then nominated by Dr. Percy for the appointment of chief chemist to the Dowlais Works, which appointment he filled for four and a half years, to the great satisfaction of the late William Menelaus, who, in 1871, recommended him for the post of scientific adviser to the commission then being sent out by the Iron and Steel Institute to the United States to investigate and report on the Danks Rotatory Puddling Process. Mr. Snelus had carefully studied the theory of all the processes of making steel and iron when at Dowlais, and he had at this time formed a very clear idea of the action of phosphorus, &c., upon iron, and the investigation of the Danks process enabled him to point out to Dr. Percy, on his return to England in the spring of 1872, that contrary to the ideas entertained up to that date by all metallurgists, and in opposition to the teachings of the Doctor himself (who held that the phosphorus was eliminated in the puddling process by liquation of a third phosphide of iron from the pasty puddled ball), the phosphorus was most largely eliminated in the early stage of the process, and while the iron was perfectly fluid and contained a large quantity of carbon, and that therefore it should be possible to eliminate the phosphorus during the Bessemer process; and further, that he believed he had discovered the secret of overcoming the difficulty hitherto considered insurmountable. The Doctor at the time remarked that if this was so, he had made a very great discovery. For his discovery the Iron and Steel Institute in 1883 awarded Mr. Snelus the Bessemer

Gold Medal for being "the first to make pure steel from impure iron in a Bessemer converter lined with basic materials." Over ten million tons of steel have since been made from phosphoric iron, previously useless for steel-making. This invention has to a large extent revolutionised steel-making, and no country has benefited by the invention so much as Germany, while owing to the stringency of the Patent Laws of that country in 1872 Mr. Snelus was unable to obtain a patent for his invention, and so has never reaped the slightest reward or recognition from Germany, although his work has brought large fortunes to those who have availed themselves of the process. At the Inventions Exhibition in London Mr. Snelus exhibited some illustrations of these improvements, together with the first piece of dephosphorous steel made by the basic process, and was awarded a Gold Medal for discoveries and inventions. At the Paris Exhibition of 1878 Mr. Snelus exhibited an elaborate set of analysed samples illustrating the manufacture of iron and steel in various countries, for which he was awarded a Gold Medal. The collection was subsequently purchased as an educational collection for the Polytechnic School at Aix-la-Chapelle. Mr. Snelus is an original member of the Iron and Steel Institute, has been a member of the Council since 1881, and in 1897 was elected one of the Vice-Presidents. The following is a list of his most important contributions to the "Iron and Steel Proceedings": "On the Condition of Carbon and Silicon in Iron and Steel," 1870; "Composition of Gases evolved from the Bessemer Converters during the Blow," 1871; "Sherman Process," 1871; "Scientific Features of the Danks Puddling Furnace," 1872; "Manufacture and Use of Spiegeleisen," 1874; "Fireclay and other Refractory Materials," 1875; "Use of Molten Iron direct from the Blast Furnace for Steel-making," 1876; "Removal of Phosphorus and Sulphur during the Bessemer and Siemens-Martin Processes of Steel Manufacture," 1879; "Distribution of Elements in Steel Ingots," 1881; "Chemical Composition and Testing Steel Rails," 1882. He has also contributed to the literature of Iron and Steel on many other occasions; his principal works in this direction are two able articles on "Iron and Steel in Chemistry, as applied to the Arts and Manufactures." For his work generally, and his discovery of the Basic Process in particular, the Royal Society elected him a Fellow in 1887. He was married in 1867 to Lavinia Woodward, daughter of a silk manufacturer of Macclesfield, and has now a family of three sons and three daughters. Mrs.

Snelus died in 1892. Address: Ennerdale Hall, Frizington, Cumberland.

SODOR AND MAN, Bishop of. See STRATON, THE RT. REV. NORMAN DUMENIL JOHN.

SOLLAS, Professor William John-son, M.A., D.Sc. Cambridge, LL.D. Dublin, F.R.S., M.R.I.A., F.R.S.E., F.G.S., Officier d'Académie, Professor of Geology and Mineralogy, Oxford; born May 30, 1849, at Birmingham, eldest son of William Henry Sollas, was educated in the City of London School, afterwards in the Royal School of Mines, and next at St. John's College, Cambridge, of which he was elected a Fellow in 1882. He took his B.A. degree in 1873, subsequently D.Sc., and was made an honorary LL.D. (Dublin) in 1886. In 1893 he received the Bigsby Medal of the Geological Society. He was appointed Lecturer on the Cambridge University Extension in 1878, and for it delivered courses of lectures on geology in most of the large towns of England and Wales; in 1880 he was appointed Professor of Geology and Zoology in the University College, Bristol; in 1883 he was elected Professor of Geology and Mineralogy in the University of Dublin; and in 1897 Professor of Geology and Palæontology in the University of Oxford. From 1895 to 1898 he was also Petrologist to the Geological Survey of Ireland. He has been continuously writing memoirs on scientific subjects since 1872. Most of these have appeared in the *Quarterly Journal of the Geological Society*, the *Annals and Magazine of Natural History, Geological Magazine*, and in the publications of the Royal Irish Academy and the Royal Dublin Society. These have for subjects, amongst others, the relations of fossil to recent sponges, the replacement of silica (opal) by carbonate of lime, the origin of flint, of fresh-water faunas, the estuary of the Severn, the characters of plesiosaurus, glacial phenomena, particularly the nature of the movement of glacier ice and the origin of eskers, the structure and history of granite and other igneous rocks, and the anatomy of living sponges. He is the author of the article "Sponges" in the "Encyclopædia Britannica," and of the twenty-fourth volume of the Reports of the *Challenger* Expedition, treating of the Tetractinellida, 1888. He has paid special attention to theories of coral reefs, and in 1896 conducted an expedition sent by the Royal Society to investigate the coral island of Funafuti. He has travelled over many parts of Europe, North America, and Australia, and has visited several islands in the Pacific. He married Helen, daughter of W. J. Coryn, Weston-super-

Mare. Address : 169 Woodstock Road Oxford.

SOLOMON, Solomon Joseph, A.R.A., artist, was born in Southwark, Sept. 16, 1860. His father is a leather manufacturer, and his mother a native of Prague (Bohemia). He was educated at the school of Mr. Thomas Whitford, M.A., and privately by the Rev. Mr. Singer. His artistic training was begun in 1876, at Heatherly's School of Art in Newman Street, and the next year he entered the Schools of the Royal Academy. In 1879, through the kindness of H.I.H. Prince Lucien Bonaparte, he got an introduction to Cabanel, who received him into his studio in the Beaux Arts in Paris. The following year found him in Munich : but he thought little of the German training, and, after a tour round Italy and Holland, he returned to England, and exhibited his first picture at the Royal Academy (a portrait of a gentleman). With his friend Mr. Hacker, Mr. Solomon journeyed through Spain, resting a while at the Shrine of Velasquez in Madrid, and passed the winter working in Morocco, where it was difficult at that time to induce the Moors to become their models. He again sought his master, Cabanel, and remained with him for about nine more months, having a studio of his own in Paris, and exhibiting at the Salon a portrait of Dr. Stevens, and, at the Royal Academy, a small highly-finished work, "Waiting." His next exhibit was "Ruth and Naomi," done in his garden in Tangier, on his second visit to Morocco ; and since then, every year, he has shown a composition and a portrait at the Academy. The picture which first brought him any reputation was "Cassandra," now in Ballarat ; then "Samson," "Niobe" following, and an allegorical work, "Sacred and Profane Love," with a portrait of the late Sir John Simon. Mr. Solomon was elected a Member of the Institute in 1887. At the Salon of 1889 he received a Medal for "Niobe," and in 1890, at the Academy, he exhibited "Hippolyte," and a portrait of "Mrs. George Mosenthal," full length. In 1893 he exhibited, at the Academy, two portraits and "Your Health !" and in 1894 "Mrs. Patrick Campbell as Paula Tanqueray," and a likeness of Mr. I. Zangwill. In 1895 he exhibited a portrait of Mr. Arthur Hacker, A.R.A., another of Miss Ingram, and "Echo and Narcissus" ; in 1896 a portrait of Mrs. Albert H. Jessel and "The Birth of Love" ; in 1897 portraits of George Frampton, A.R.A., Raphael Tuck, and Mrs. Adolph Tuck ; and in 1898 portraits of Mrs. Kenneth Foster, of his wife, of Sir George Faudel Phillips, Bart., and a Jubilee picture, "On

the Threshold of the City, June 22, 1897." In 1899 he exhibited "Laus Deo !" and two portraits, at the same Exhibition. He has also recently painted a decoration for the Royal Exchange. Mr. Solomon Solomon was elected A.R.A. in February 1896. In 1897 he married a daughter of Hyman Montague, F.S.A. Address : 2 St. John's Wood Studios, N.W.

SOMERSET, Duke of, Algernon St. Maur, Bart., J.P., was born on July 22, 1846, and is the son of the 14th Duke, whom he succeeded in 1894, and Horatia, daughter of John Philip Morier, Minister at Dresden. He was formerly a Lieutenant in the 60th Rifles, and served in the Red River Expedition of 1870, and is now Lieut.-Colonel of the 1st Wilts Rifles. In 1877 he married Susan Margaret Richards, daughter of Charles Mackinnon. Address : Maiden Bradley, Bath, &c.

SOMERSET, Lady Henry, was born in London, Aug. 3, 1851. She was Isabel, the eldest daughter of Earl and Countess Somers, and in 1872 married Lord Henry Somerset, M.P., second son of the Duke of Beaufort. She has one son, Henry Somers Somerset, who in 1896 married Lady Katherine Beauchlerk, daughter of the Duke of St. Albans. In 1890 Lady Henry Somerset was elected President of the British Women's Temperance Association, which is now the largest Women's Temperance Association in England. In 1892 she was elected Vice-President of the World's Women's Christian Temperance Union. By the death of Miss Frances Willard in 1898, she took her place as President of the International Association, which numbers over half a million women. For two years she edited the *Women's Signal*, a newspaper for women, dealing with questions of the times. She has written magazine articles, and a book of short stories entitled "Sketches in Black and White." In 1895 she founded the Industrial Farm Colony at Duxhurst, and this scheme has now grown to considerable dimensions. In 1884, on the death of her father, she succeeded to his estates in Herefordshire, Worcestershire, Surrey, and London. She has done a great deal of platform work, and has been in the habit of addressing very large meetings in all parts of this country and on the continent of America, in the interest of Temperance, and for the advancement and education of women. Addresses : Eastnor Castle, Ledbury ; and the Priory, Reigate.

SOMERSET, Lord, The Right Hon. Henry Richard Charles, J.P., D.L., was born on Dec. 7, 1849, and is the second son of the 8th Duke of Beaufort. He

was Conservative M.P. for Monmouthshire, 1871-80, and from 1874 to 1879 Comptroller of the Household. He has composed many songs, some of which are of great beauty. He married, in 1872, Isabel Caroline, daughter and co-heiress of the last Earl Somers (*see* LADY HENRY SOMERSET). Address: 1 Via Guido Monaco, Florence.

SORBY, Henry Clifton, LL.D., F.R.S., J.P., was born at Woodbourne, near Sheffield, May 10, 1826, and educated at the Sheffield Collegiate School, and by private tutors. He is an honorary LL.D. of Cambridge (1879), and he has been President of the Geological Society. On April 25, 1882, he was elected President of Firth College, Sheffield, and has been for years active in developing literature, art, and science in the West Riding. He is the author of many separate papers on the microscopical structure of rocks, on the construction and use of the microspectroscope in studying animal and vegetable colouring matter, on a new method of studying the optical characters of minerals, on the physical geography of former geological periods, and on various other subjects connected with geology and the use of the microscope. His latest publications have been on the microscopical structure of iron and steel, and on the temperature of the water in estuaries. He has in recent years been much occupied with certain special archaeological studies, and in making preparations of invertebrate animals, as lantern slides, and for museum specimens. He spends almost half the year on board his yacht, the *Glimpse*. Address : 6 Beech Hill Road, Broomfield, Sheffield.

SOUTAR, Mrs. R. *See* FARREN, ELLEN (NELLIE FARREN).

SOUTHWARK, Bishop Suffragan of. *See* YEATMAN-BIGGS, THE RIGHT REV. HUYSHÉ WALCOTT.

SOUTHWELL, Bishop of. *See* RIDDING, THE RIGHT REV. GEORGE.

SPAIN, King of. *See* ALFONZO XIII.

SPAIN, Queen Regent of. *See* MARIA CHRISTINA.

"SPECTATOR." *See* WALKLEY, ARTHUR BINGHAM.

SPENCE, Catherine Helen, Member of the State Children's Council of South Australia, daughter of David Spence, first Town-Clerk of the City of Adelaide, was born in Melrose, Scotland, in 1825, and

emigrated with her parents to Australia in 1839. She has written several novels of Australian life: "Clara Morison: a Tale of the Gold Fever," 1854; "Tender and True," 1856; "Mr. Hogarth's Will," 1865, and "The Author's Daughter," 1868. Her little book on "The Laws we Live Under," with some chapters on political economy and the duties of citizens, was published under the direction of the Minister of Education in 1880, and is taught in the schools of South Australia. She has taken an active part in the work of dispersing the Children of the State in natural foster homes, which was initiated first in that province under the leadership of Miss Emily Clark. This was so great a success both socially and financially that it was adopted all over Australia, Tasmania, and New Zealand. She has contributed to the *Cornhill*, *Fraser's*, and *Hurper's Magazine* and the *Arena*, as well as to Australian newspapers and to Australian magazines, literary, critical, and social articles, and has generally identified herself with all public movements, political and educational. The main object, however, of her life since the year 1860 has been electoral reform on the lines of equitable representation of minorities, and her "Plea for Pure Democracy," published in 1861, is an argument from the popular side for Hare's system of voting. In 1892 she thought that democratic developments in the colonies made the reform urgently necessary, and changed her position as a writer for that of a lecturer. On this mission she travelled all over her own province with ballot papers to give practical proof of this method of "Effective Voting." Having been appointed Delegate to the Chicago Congresses in 1893, and having received a Government commission to inquire into and report on matters of public interest in America and elsewhere, Miss Spence travelled through the United States, and paid a visit to Toronto, in order to explain and advocate this method of voting, as the only means of moralising politics and educating representatives and citizens. She visited England in 1865-66, and again in 1894, when she lectured before the Royal Colonial Institute and other audiences, on Social and Intellectual Aspects of Life in the Colonies. She resides at Eildon, East Adelaide, South Australia.

SPENCE, The Very Rev. Henry Donald Maurice, M.A., D.D., Dean of Gloucester, son of George Spence, Esq., Q.C., M.P., born in Pall Mall, London, on Jan. 14, 1836, was educated at Westminster School and at Corpus Christi College, Cambridge (B.A. 1864; M.A. 1866; D.D. 1887). While at the University he obtained a first class in the voluntary theological

trijos (1864), the Carus Undergraduate University Prize (1864), and the Carus and Scholefield University Prizes (1865 and 1866). He was Select Preacher at Cambridge in 1883 and 1887, and at Oxford in 1893. He was appointed Professor of Modern Literature in David's College, Lampeter, in 1865; Rector of St. Mary de Crypt, Gloucester, 1870; Examining Chaplain to the Bishop of Gloucester and Bristol (Dr. Ellicott), in 1870; Principal of the Theological College of Gloucester, and Honorary Canon of Gloucester, in 1875. In 1877, on the appointment of Dr. Thorold to the Bishopric of Rochester, the vicarage of St. Pancras, London, was presented to him by the Queen. Dr. Spence was in the same year appointed Rural Dean of St. Pancras. In 1886 he was appointed by the Crown to the Deanery of Gloucester. He has contributed many papers to the *Quarterly*, *Contemporary*, "Bible Educator," *Good Words*, and other magazines; is joint author with Dean Howson of a commentary on the Acts of the Apostles (Anglo-American Commentary); and is one of the Commentators of the New Testament and also of the Old Testament, edited by the Bishop of Gloucester and Bristol. Dean Spence is likewise editor and one of the writers of the "Pulpit Commentary on the Old and New Testaments," 47 volumes, and of several works on the Talmud. He is the author of a translation of the "Teaching of the Twelve Apostles," with excursus and notes (1885). Amongst other works he has written are "Dreamland and History," the story of the Norman dukes, and "Cloister Life in the Days of Cœur de Lion," "The Church of England, a History of the People," in 4 vols., 1898. He married Louise, daughter of David Jones, Esq., of Pantglas, M.P. for Carmarthenshire. Addresses: The Deanery, Gloucester; and Athenæum.

SPENCER, The Right Hon. Charles Robert, M.A., heir to his half-brother, Earl Spencer, was born on Oct. 30, 1857, and is the son of the 4th Earl. He was educated at Harrow and at Trinity College, Cambridge (M.A.). He represented North Northamptonshire in the House of Commons from 1880 to 1885, and the Mid-Division of the same county from 1885 to 1895. He was Parliamentary Groom-in-Waiting in Mr. Gladstone's Third Administration, a post to which no appointments have been made of late years. From 1892 to 1895 he was Vice-Chamberlain. He married, in 1887, Margaret, daughter of the 1st Baron Revelstoke. Address: Dallington House, Northampton.

SPENCER, Herbert, was born at Derby, on April 27, 1820. He was educated

by his father, a schoolmaster and private teacher in Derby, and his uncle, the Rev. Thomas Spencer, a clergyman of the Established Church, who was active in various philanthropic movements. At the age of seventeen he became a civil engineer, but after about eight years abandoned the profession, having during that period contributed various papers to the *Civil Engineers' and Architects' Journal*. His first productions in general literature were a series of letters on "The Proper Sphere of Government," published in the *Nonconformist* in 1842, which were reprinted in pamphlet form. From 1848 to 1853 he was engaged as sub-editor of the *Economist*, and during that time published his first considerable work, "Social Statics: or, the Conditions essential to Human Happiness specified, and the first of them developed," 1851. Various articles, chiefly for the *Westminster* and other quarterly reviews, were written during the next four years. In 1855 appeared his "Principles of Psychology," which interpreted the phenomena of mind on the general principle of evolution (this was four years before the "Origin of Species" appeared). A break-down in health followed, which prevented work for eighteen months: 1857, 1858, and 1859 were occupied in writing various essays for the quarterly reviews, &c. In 1860 Mr. Spencer issued the programme of his "System of Synthetic Philosophy," which proposed to carry out in its application to all orders of phenomena the general law of evolution set forth in two essays published in 1857. To the execution of this project his subsequent life has been mainly devoted. The works composing the System are now all published. They are: "First Principles," 1862 (10th edit., 1897); "The Principles of Biology," 2 vols., 1864 (5th edit., 1894); "The Principles of Psychology," 2 vols., 1872 (5th edit., 1890); "The Principles of Sociology," vol. i., 1876 (4th edit., 1893); vol. ii., 1890 (3rd edit., 1893), comprising "Ceremonial Institutions," first issued 1879, and "Political Institutions," 1882; vol. iii., 1896 (2nd edit., 1897), including "Ecclesiastical Institutions," first issued 1885; "Principles of Ethics," vol. i., 1892 (2nd edit., 1898), including "The Data of Ethics," first issued 1879; vol. ii., 1893, including "Justice," 1891. Mr. Spencer's other works are: "Education: Intellectual, Moral, and Physical," 1861 (38th edit., 1898); "Essays: Scientific, Political, and Speculative," 2 vols., 1858-63 (5th edit., 3 vols., 1891); "The Classification of the Sciences; to which are added, Reasons for Dissenting from the Philosophy of M. Comte," 1864 (3rd edit., 1871); "The Study of Sociology," 1873 (21st edit., 1894); "The Man versus the State," 1884 (14th

thousand, 1897); "Various Fragments," 1897. Beyond his own proper work Mr. Spencer has published eight parts of the "Descriptive Sociology," classified and arranged by himself, and compiled by Professor Duncan, Dr. Scheppig, and Mr. Collier. This work was originally undertaken simply for the purpose of providing himself with materials for the "Principles of Sociology," but was eventually published for the use of others. Part VIII., published in 1881, contained the announcement that having during the preceding 14 years sunk between £3000 and £4000 in the undertaking, he could no longer continue it. Mr. Spencer paid a visit to the United States in 1882. On May 12, 1883, he was elected a correspondent of the French Academy of Moral and Political Sciences for the section of Philosophy, in the room of Emerson, but he declined that in common with all academic honours, and other distinctions. Mr. Spencer's works have been extensively translated. All are rendered into French, nearly all into German and Russian, many into Italian and Spanish; and the work on Education has appeared also in Hungarian, Bohemian, Polish, Dutch, Danish, Swedish, Greek, Japanese, and Chinese. Since 1886 Mr. Spencer has been an invalid. From that date up to 1891 he published nothing; but he has since completed the "Synthetic Philosophy," besides an abridged and revised edition of "Social Statics," 1892, and a revised and enlarged edition of his "Essays" in three volumes, 1891. Mr. Spencer has recently gone to reside at Brighton, and is devoting himself to a revision of "The Principles of Biology." Permanent address: 5 Percival Terrace, Brighton.

SPENCER, Earl, The Right Hon. John Poyntz Spencer, K.G., D.C.L., LL.D., only son of the 4th Earl Spencer, born at Spencer House, Oct. 27, 1835, received his education at Harrow and at Trinity College, Cambridge, where he graduated in 1857. He represented the Southern Division of the county of Northampton in the House of Commons from April to December 1857, when he succeeded to the title on his father's death. He was Groom of the Stole to the late Prince Consort, 1859-61; and Groom of the Stole to the Prince of Wales, 1862-67. In December 1868 he was appointed Lord Lieutenant of Ireland, and he made his public entry into Dublin, Jan. 16, 1869. He retained that office till the resignation of the Gladstone Ministry in February 1874. On the return of the Liberals to office in May 1880, he was appointed Lord President of the Council. He was nominated Lord Lieutenant of Ireland, on the

resignation of Earl Cowper, May 4, 1882, retaining his seat in the Cabinet. He arrived in Dublin Castle on May 6, on the evening of which day Lord Frederick Cavendish, the newly-appointed Chief Secretary, and Mr. Thomas A. Burke, the Under-Secretary, were stabbed to death by assassins in the Phoenix Park, close to the Viceregal Lodge. After this it fell to Lord Spencer to administer the provisions of the Crimes Act. In March 1883 Earl Spencer resigned the office of Lord President of the Council, but still remained a member of the Cabinet, until the close of Mr. Gladstone's Administration in June 1885. On the return of Mr. Gladstone to office in February of the following year, Lord Spencer became for the second time Lord President of the Council. By that time he had adopted Home Rule opinions, and his support was of great value to the Government. In August 1892 he was appointed First Lord of the Admiralty, and held office until 1895. The University of Dublin conferred on Lord Spencer the honorary degree of LL.D., June 30, 1883. His lordship is Lord-Lieutenant, and was Chairman of the County Council of Northamptonshire. Since 1890 he has been Master of the Pytchley. In 1892 he became Chancellor of the Victoria University, Manchester. His lordship married Charlotte, daughter of Frederick Charles William Seymour, grandson of the 1st Marquis of Hertford. Addresses: 27 St. James's Place, S.W.; and Althorp Park, Northampton.

SPENCER, Joseph William, Canadian geologist, was born at Dundas, Ontario, Mar. 26, 1850. He was educated at McGill University and at Göttingen University, graduating at the latter institution in 1877. In the same year he was elected a Fellow of the Geological Society of London (England), and he is also a Fellow of the Geological Society of America and of other learned bodies. He was Science Master in Hamilton College Institute, 1877-79; Professor of Chemistry in King's College, N.S., 1880-82; Professor of Geology in the University of Missouri, 1882-87; State Geologist of Georgia in 1888-93; and is now (1898) conducting geological investigations in the West Indies. His observations on the interesting geological phenomena of his native valley near Dundas gave rise to enthusiasm in scientific work at an early age, and from his college days until the present time he has been engaged in original geological work. Many papers from his pen have been published since 1881 up to the present time in the *American Journal of Science*, the *Bulletins of the Geological Society of America*, the *Journals of the Geological Society of Lon-*

don, the Royal Society of Canada, the American Philosophical Society, &c. He received the degree of Ph.D. from Göttingen in 1877. His work has been mainly in questions relating to surface and glacial phenomena, both in America and in Europe, and he was one of the pioneers in America in Lacustrine geology.

SPENDER, John Alfred, born at Bath, 1862, is the eldest son of Dr. J. K. Spender and of Mrs. Spender (author of many novels). He was educated at Bath College and Balliol College, Oxford (M.A. 1887). He was editor of the *Eastern Morning News*, Hull, 1886-90, assistant-editor of the *Pall Mall Gazette* till it changed ownership in 1892, then joined the staff of the *Westminster Gazette*, of which he became editor in 1896. He is author of the "State and Pensions in Old Age" (Social Science Series), and "The New Fiction and other Papers" (by the "Philistine"), which appeared originally in the *Westminster Gazette*. The humour of this work depended on the "Philistine's" apparently assumed ignorance of the names and reputations of the best-known younger men in the world of art and letters. He is Fellow of the Royal Statistical Society. His brother, Mr. E. Harold Spender, is a journalist and author. Address: 29 Cheyne Walk, Chelsea.

SPICER, Albert, M.P., J.P., is the second son of James Spicer, J.P., D.L., of Woodford, Essex, and was born in 1847. He was educated at Mill Hill School, and privately at Heidelberg. He is a wholesale stationer and manufacturer, and a member of the firm of James Spicer and Sons, which has seven branches in principal towns in London, &c., and the Colonies. He has been Liberal M.P. for the Monmouth District since 1892, is Treasurer of the London Missionary Society and of Mansfield College, Oxford, and was Chairman of the Congregational Union of England and Wales in 1893, and Joint Chairman of the London Congregational Union in 1897. He is the author of several pamphlets on social questions, and was member of special deputations on behalf of the London Missionary Society to India in 1881-82, and to the Samoan Islands in 1887-88. He also accompanied the late Dr. Dale to Australasia on behalf of the Congregational Union. He married a daughter of the late D. Stewart Dykes, Grove Hill, Surrey. Address: 10 Lancaster Gate, W.

SPIELHAGEN, Friedrich, a German novelist, was born at Magdeburg, Feb. 24, 1829, being the son of a Government official. At an early age he accompanied

his father to Stralsund, and on that journey the sea made a lasting impression on the susceptible mind of the future novelist, who has in most of his works described life and incidents at sea with remarkable force and vividness. In 1847 he entered the University of Berlin, and then removed to Bonn, where he applied himself to the study of the law for about six months, and then turned his attention to philological and literary studies, which he pursued with great zeal in Berlin and at Greifswald. In 1854 he settled at Leipzig, where he taught in the Gymnasium, but the sudden death of his father changed his circumstances and prospects, and led to his adopting literature as a profession. Since the year 1854 he has brought out, with ever-increasing success, a series of novels, which have gained for him a foremost place among German writers of fiction. His larger works are: "Problematical Natures," 1861 (9th edit. 1880), and its sequel, "Through Night to Light," 1862; "Hammer and Anvil," 1869 (8th edit., 1881); "Ever Forward!" 1872; "What the Swallow Sang," 1873; and "Storm-Floods," 1878. He has also written: "The Hohensteins," 1864; "Rank and File," 1866; "Low Land," 1879; and "Quisiana," 1880. Among his smaller pieces are: "Clara Vere," 1857; "On the Downs," 1858; "At the Twelfth Hour," 1863; "The Rose of the Court," 1864; "Hans and Margaret," a village story, 1868; "The Village Coquette," 1869; "German Pioneers," 1870; "Ultimo," 1873; "The Skeleton in the House," 1879; and "Angela," 1881; two comedies, "Love for Love," 1875, and "Uhlenhanns," 2 vols., 1884, a family romance, with political background representing the period 1830-40; "Die schönen Amerikanerinnen," 1885; "Noblesse Oblige," 1888; "A New Pharaoh," 1889. His poems appeared in 1891. He has made translations into German of works by Emerson, Michelet, and others. In 1897 he published "Faustulus." He has related his life in his "Recollections," published in 1889.

SPIELMANN, Marion H., born in London (7 Mecklenburg Square) on May 22, 1858, son of Adam Spielmann, banker, of Lombard Street, and, later, of Hereford House, West Brompton, was educated chiefly at University College School, partly in a public school in France, and finally at University College, London, which he quitted early in order to enter upon the profession of engineering. This he relinquished in 1883 in order to devote himself to the study of literature and art, and in that year began his connection with the *Pall Mall Gazette*, which he maintained

until 1890. In 1887 he was appointed editor of the *Magazine of Art*, and on the foundation of the *Daily Graphic* was invited to become art critic to that paper, contributing at the same time to the weekly *Graphic*. In 1890 he accepted the post of art editor of *Black and White*, of which he was part organiser, but from which he withdrew in 1891, on account of stress of work. On the foundation of the *Westminster Gazette* he became a regular contributor, ultimately discontinuing at a time when he turned attention rather to books, reviews, and magazines than to regular journalism, in respect to which, however, he remains an occasional contributor to the *Daily News*, *Speaker*, *Literature*, as well as to the *Graphic* and *Daily Graphic*. In respect of the art and the art politics of the day, he is a contributor to the *Nineteenth Century*, *Contemporary Review*, *National Review*, *Revue de l'Art Ancien et Moderne*, *Scribner's Magazine*, &c., and an occasional correspondent of the *Times*. He is a prolific contributor to the *Magazine of Art*, which he still edits. Several of his writings on art and literature have been translated into French and German. In 1886 he published, as a *Pall Mall* "extra," "The Works of Mr. G. F. Watts, R.A.," an artist on whose extended artistic biography he is at present engaged. In 1891 he published "Henriette Ronner," of which a second edition was issued in the following year; "The History of *Punch*," Cassell & Co., 1st and 2nd edit., 1895; "Millais and His Works," Blackwood & Co., 1896, reprinted with special reference to the Millais Exhibition at the Royal Academy, 1898; and is joint-author of "The Modern Poster," Scribner, 1895; and editor of the eighth edition of Professor Unger's "Belvedere Gallery." He is a Fellow and Member of Council of the Royal Society of Literature, an original Fellow of the Institute of Journalists, Member of the Society of Authors, Member of the Royal Literary Fund, Honorary Member of Artistic Societies, was Working Member of the Committee of the Fine Art Section of the Brussels International Exhibition, and assisted in inducing Parliamentary inquiry into the condition and administration of the South Kensington Museum. In 1880 he married Mabel, daughter of the senior partner in the firm of Samuel, Montague, & Co. Address: 21 Cadogan Gardens, S.W.

SPIERS, Victor Julian Taylor, B.es.L., M.A., Professor of French language and literature at King's College, London, is the fourth son of the late Dr. Spiers, the author of the famous dictionary, and was born in 1860. He was educated at the Lycée St. Louis, Paris,

and at University College, Oxford. In 1881 he obtained the Taylorian Exhibition for French, and two years afterwards took his degree, with honours, in the School of Modern History. From 1883 to 1885 he was an Assistant-Master at the Merchant Taylors' School, and since then he has been Senior French Lecturer at "Wren's." His works include: "History and Literature of France in Synoptic Tables and Essays" (Rivingtons); "Rapid Exercises on French Grammar" (Rivingtons); "Graduated Course of French Prose" (Simpkin, Marshall, and Co.); "Drill on French Accidence and the Essentials of Syntax"; "French Vocabulary for Repetition" (Simpkin, Marshall, and Co.); "Practical French Primer" (Simpkin, Marshall, & Co.); "Historical French Grammar and Etymological Lexicon for Schools" (Simpkin, Marshall, and Co.); and several editions of *Modern French Classics*. He has been Examiner in French to the University of London since 1893, to the University of Wales since its foundation, to the Victoria University (1894-97), to the London Chamber of Commerce since 1893, to the Oxford and Cambridge School Examinations Board, &c. Since the foundation of the Modern Language Association he has been an active member of its committee, and is on the committee of the Société Nationale des Professeurs de Français; he is also a member of the Entente Cordiale, and in the summer of 1899 received the guests at an At Home given by this Society, at which Mme. Bernhardt and many other distinguished visitors were present. In 1895 he was decorated an Officier de l'Instruction Publique. In 1891 he married Florence, daughter of the late George Mathews, of Streatham. Address: 75 Lancaster Road, North Kensington, W.

SPRENGEL, Hermann Johann Philipp, Dr.phil. (Heidelberg, 1858); F.R.S. (London, 1878); Royal Prussian Professor, 1893; was born on Aug. 29, 1834, at Schillerslage, near Hanover, in Germany, where his father owned a property, and received his education first at the family home, by a private tutor, later at school in the town of Hanover, whence he removed to the Universities of Göttingen and Heidelberg, where he studied natural sciences (chemistry and physics in particular), and took his degree Aug. 2, 1858 ("Examine rigoroso summa cum laude superato"). Coming to England early in 1859, he engaged in research work with the Professor of Chemistry at the University of Oxford till the middle of 1862; after which he settled in London, engaged in research work at the laboratories of the Royal College of Chemistry, Guy's and St. Bartholomew's Hospitals, till the

autumn of 1864; and since then in work more or less connected with his inventions and discoveries. These, with some omissions, are: "Über einen neuen Löhrohr-apparat," *Pogg. Ann.*, B. cxii., 1861; "On the Detection of Nitric Acid," *Jour. Chem. Soc.*, 1863; "Researches on the Vacuum," *ibid.*, 1865; "On Determining the Weight of Heterogeneous Liquids," *ibid.*, 1866; "Improvements in Explosive Compounds," *Engl. Pat.*, No. 921 and No. 2642, 1871; "The Water Air-pump," *Phil. Mag.*, 1873; "An Air-bath of Constant Temperature between 100° and 200° C.," *Jour. Chem. Soc.*, 1873; "A Method of Determining the Specific Gravity of Liquids with Ease and great Exactness," *ibid.*, 1873; "A New Class of Explosives, which are Non-explosive during their Manufacture, Storage, and Transport," *ibid.*, 1873; "Use of the Atomiser or Spray-Producer in the Manufacture of Sulphuric Acid," *Engl. Pat.*, No. 3189, 1873, and *Chem. News*, 1875; "Sprengel's Vacuum Pump, commonly called Bunsen's Pump" (London, E. & F. N. Spon), 1881; "Notes on so-called Panclastite," *Chem. News*, 1886; "The Hell Gate Explosion near New York and so-called 'Rackarock,'" *Chem. News*, 1885; "Use of Exhaust Steam in the Production of Sulphuric Acid," *Engl. Pat.*, No. 10,798, 1886, and *Chem. News*, 1887. The more important among these refer to the two extremes in the gaseous state of matter—to vacua and detonating agents. As to vacua he discovered a new method of producing them, viz., by the fall of water or mercury in tubes, a method distinguished by its convenience and effectiveness. Thus we see, *Chemical News*, vol. xxix., p. 125, that in 1870 his mercury air-pump produced vacua so nearly perfect that the trace of air remaining in the exhausted vessel amounted to only $\frac{1}{1000000}$ part of its original volume, leaving for further cultivation that field which lies between $\frac{1}{1000000}$ and 0. The eyes of the scientific world turned towards this instrument in 1866, after the late Prof. Graham, Master of the Mint, had bestowed upon it (anent his then newly-discovered occluded gases) the following encomium: "The pneumatic instrument of Dr. Sprengel is peculiarly applicable to researches of the present kind. Indeed, without the use of his invention some parts of the inquiry would have been practically impossible" (*Philosophical Transactions*, vol. clvi., p. 408). Since then this instrument has become a most useful servant both in science and industry, and has been singularly productive of further important results, which to enumerate fully we have no space. Suffice it to point to a few, e.g., to Bunsen's filtering process, to Crookes's radiometer-work, and to Edison and Swan's incandescent

vacuum-lamp industry. Prof. Sprengel's researches on explosives can likewise be only briefly referred to here. He was the first to shake our old belief in water as an infallible means of rendering explosives non-combustible, by virtue of his patents of 1871, which announced the explosibility of certain nitro-compound solutions, when fired by a detonating fuse. These solutions contain water up to 15 per cent. He was the first also who described the method (*Jour. Chem. Soc.*, 1873, pp. 806 and 807) now called "cumulative detonation" (*Witt's Prometheus*, Berlin, R. Mückenberger, 1892, p. 230), by means of which all semi-sensitive explosives, if explodable by concussion (such as wet gun-cotton, i.e., a nitro-compound with 15 per cent. of water), may readily be exploded, and by means of which every charge of wet gun-cotton has since been exploded up to the present. As wet gun-cotton is now employed on an extensive scale for military and naval purposes, Sprengel's cumulative detonation and first use of a hydrated explosive have attained a high degree of practical importance. He was the first to draw attention (in 1873) to Picric Acid (Melinite, Lyddite) as "a powerful explosive when fired by a detonator" ("The Inventor of Melinite," *Standard*, April 10, 1899). At the present time this material is largely used as a detonating charge for shells, which, by virtue of their prodigious force, have greatly raised the influence of artillery in modern warfare. Witness "the absolute havoc which was made of the Mahdi's tomb at great ranges" by Lyddite shells (*Times*, Sept. 11, 1890, and Sept. 9, 1898). He was the first who described and patented in England a number of substances called Safety-explosives, consisting either of two liquids or of a liquid and a solid, which are non-explosive by themselves, but become explosive when mixed, and are known as Hellhoffite, Oxonite, Panclastite, Rackarock, &c. The latter one in particular, consisting of 79 parts of potassium chlorate and 21 parts of nitrobenzol, has recently become famous in America, for it was chosen by Gen. John Newton, Chief of Engineers, U.S. army, to rack a rock called Flood Rock, which, covering an area of nine acres, obstructed Hell Gate, an entry to the harbour of New York. The mine excavated underneath this rock was charged with 107 tons of "rackarock," primed by 22 tons of dynamite, and the whole enormous charge (costing £22,190), was successfully fired Oct. 10, 1885. The explosion which ensued produced an earth-tremor of one minute's duration, felt at a distance of 185 miles, and will be remembered as the greatest of its kind as yet recorded. Address: Savile Club, 107 Piccadilly, London, W.

SPRIGG, The Right Hon. Sir John Gordon, K.C.M.G., D.C.L. Oxon., Commander of the Legion of Honour, was born at Ipswich, Suffolk, in 1830, and is the son of a Baptist minister. He went to the Cape Colony in 1858, owing to ill-health, and worked there as a journalist for eleven years. He was first returned to the House of Assembly in 1869. He was Colonial Secretary and Prime Minister, 1878-81; Treasurer, 1884-86, when he became Premier for the second time. In 1888 he presided over a Free-Trade Conference of delegates from Cape Colony, Natal, and the Orange Free State, at which the project of a South African Federation was discussed. In 1890 he was succeeded as Premier by Mr. Cecil Rhodes, under whom he became Finance Minister in 1892. On Mr. Rhodes's retirement in January 1896, Sir Gordon Sprigg became Premier for a third term. He was defeated at the polls in 1898, when Mr. Schreiner (*q.v.*) took office by a majority of one. He is a staunch Imperialist, and was made a Privy Councillor in 1887. Address: The Gardens, Cape Town.

STACK, The Right Rev. Charles Maurice, M.A., D.D., Bishop of Clogher, was educated at Trinity College, Dublin, where he graduated B.A. in 1848, M.A. in 1858, and D.D. in 1875. He was ordained in 1848, and became Curate of Lack, co. Fermanagh. He held the Rectory of Tydavnet, co. Monaghan, from 1871 to 1873, became Rector of Monaghan, and Archdeacon of Clogher in 1873, and was in 1866 elected Bishop of Clogher, being consecrated in Armagh Cathedral in the same year. Address: Knockballymore, Clones, Ireland.

STACPOOLE, Frederick, A.R.A., is almost the last representative of the old school of engravers. He has engraved, among many other important pictures, Briton Rivière's "Circe." His latest pictures at the Royal Academy have been "In the Doldrums," 1896; "An Anxious Moment," 1897; "A Glimpse of the Sea," 1898; "Baby's First Voyage," 1899. Address: 249 King Street West, Hammer-smith.

STAINER, Sir John, M.A., Mus. Doc., D.C.L., was born in 1840, and is the son of a schoolmaster in Southwark; he was a chorister at St. Paul's between 1847 and 1856. At the age of sixteen he became organist to St. Michael's College, Tenbury, then recently founded by the late Sir F. G. Ouseley; and three years afterwards he was at the early age of nineteen made organist of Magdalen College, Oxford. He seized the opportunity

of graduating in arts as well as in music, proceeding to Mus. Bac. in 1859, B.A. 1863, Mus. Doc. 1865, M.A. 1866. In 1860 Dr. Stainer had been appointed organist of the University Church by the then Vice-Chancellor, the Rev. Dr. Jeune, late Bishop of Peterborough, and he held this appointment, together with the organistship of Magdalen, until 1872, when he was appointed to succeed Sir John Goss as organist of St. Paul's Cathedral, London, which post he resigned early in 1888. He has composed a large number of anthems and Church services, as well as songs of a secular character, a Treatise on Harmony, educational Primers on Harmony, Composition, and the Organ. Jointly with W. A. Barrett he has published a "Dictionary of Musical Terms," is joint-editor of "Carols New and Old," with the Rev. H. R. Bramley, and with the Rev. W. Russell, of the "Cathedral Prayer-Book." He has achieved a high reputation as a scientific musician. A cantata by Dr. Stainer, "The Daughter of Jairus," was composed for, and produced at, the Worcester Festival, 1878. In the same year he was nominated by H.R.H. the Prince of Wales one of the jurors of the Exhibition in Paris, and when it was closed he was made a Chevalier of the Legion of Honour. In 1883 his cantata, "St. Mary Magdalen," was produced at the Gloucester Festival. In the same year Dr. Stainer was appointed Inspector of Music to the Education Department in the place of the late Dr. Hullah, and also had the honour of being nominated a member of the Council of the Royal College of Music by H.R.H. the Prince of Wales. In 1885 Dr. Stainer received the degree of Mus. Doc., and in 1895 that of D.C.L., *honoris causa*, from the University of Durham. In 1888 he received the honour of knighthood, and in 1889 was appointed Professor of Music in the University of Oxford, as successor to Sir F. G. Ouseley, deceased. He is an Honorary Member of the Royal Academy of Music, one of the Vice-Presidents of the Royal College of Organists, and President of the Musical Association. In 1893 he received the distinction of being elected an Honorary Fellow of Magdalen College, Oxon. In July 1899, he was entertained at dinner by the Dean and Chapter of St. Paul's, to commemorate the completion of the fiftieth year of his association with the Cathedral. Addresses: 10 South Parks Road, Oxford; and Athenæum.

STAIR, Earl of, John Hamilton Dalrymple, Bart., K.T., D.L., LL.D., was born on April 1, 1819, and is the son of the 9th Earl, whom he succeeded in 1864, and Margaret, daughter of James Penny, of Arrad, Lancs. He was educated

at Harrow, and as John H. Dalrymple and afterwards as Viscount Dalrymple, represented Wigtownshire in the House of Commons from 1841 to 1856, was Lord High Commissioner to the General Assembly of the Church of Scotland from 1869 to 1871, was at one time Captain in the Scots Guards, was Lord-Lieutenant of Ayrshire from 1870 to 1897, has been Lord-Lieutenant of Wigtownshire since 1851, Chancellor of Glasgow University since 1884, and is Chairman of the Bank of Scotland and Major-General of the Royal Scottish Archers. He was created a Knight of the Thistle in 1865. He married, in 1846, the late Louisa Jane Henrietta Emily de Franquetot, daughter of the Duc de Coigny, and grand-daughter of Sir Hew Dalrymple Hamilton, Bart. She died in 1896. Addresses: Lochinch, Castle Kennedy, Wigtownshire; Oxenfoord Castle, Midlothian.

STALBRIDGE, Lord, The Right Hon. Richard de Aquila Grosvenor, Chairman of the London and North-Western Railway, was born at Motcombe House on Jan. 28, 1837, and is the second son of the 2nd Marquis of Westminster, and Elizabeth, second daughter of the 1st Duke of Sutherland. He was educated at Westminster School and Trinity College, Cambridge, was Liberal M.P. for Flintshire from 1861 to 1886; Chief Liberal Whip, 1880-86; Vice-Chamberlain of the Queen's Household, 1872-74; Patronage Secretary to the Treasury, 1880-85. He was created Lord Stalbridge in 1886, and sworn of the Privy Council in 1872. Since 1891 he has been Chairman of the L. and N. W. R. He married (2), in 1897, Eleanor Frances B. H., daughter of the late Robert H. Stubber, of Moyne, Queen's Co. Addresses: Motcombe House, Shaftesbury; and 32 Queensborough Terrace, W.

STALKER, James, M.A. Edinburgh, D.D. Glasgow and Yale, was born at Crieff, Perthshire, on Feb. 21, 1848, and educated there, and at Edinburgh, Berlin, and Halle. He was appointed minister of St. Brycedale Church, Kirkcaldy, 1874; of Free St. Matthew's, Glasgow, 1897; and delivered the Lyman Beecher Lectures on Preaching at Yale University, U.S.A., in 1891. He has been appointed Cunningham Lecturer for 1899 in Edinburgh. His published works include: "The Life of Jesus Christ," 1879; "The Life of St. Paul," 1884; "Imago Christi," 1889; "The Preacher and his Models," 1891; "The Trial and Death of Jesus," 1894; "The Two St. Johns," 1895; which books have been translated into many languages. He is married to Charlotte Melville, daughter of Francis Brown-Douglas, of Edin-

burgh. Address: 6 Claremont Gardens, Glasgow.

STAMER, The Right Rev. Sir Lovelace Tomlinson, Bart., Bishop of Shrewsbury, Suffragan to the Bishop of Lichfield, was born in York on Oct. 18, 1829, and was educated at Trinity College, Cambridge, where he graduated B.A. in 1853, after being placed in the second class of the Classical Tripos; M.A. in 1856, and D.D. in 1888. He was curate of Clay Cross, Derbyshire, in 1853; of Turvey, Beds., in 1854; and of Long Melford, Suffolk, in 1856-58. From that year to 1892 he was Rector of Stoke-upon-Trent, and from 1858 to 1888 he was Rural Dean, and from 1877 to 1888 Archdeacon of Stoke-upon-Trent. In 1875 he became a Prebendary of Lichfield Cathedral, and was consecrated Bishop of Shrewsbury in 1888, and Suffragan to the Bishop of Lichfield. In 1892 he was presented to the Vicarage of St. Chad, Shrewsbury, and was thence transferred to the Rectory of Edgmond, Salop, in 1896. He married Ellen, daughter of Joseph Dent, Ribston Hall, Yorks., in 1857. Address: Edgmond Rectory, Newport, Salop.

STANFORD, Professor Charles Villiers, M.A., Mus.D., D.C.L., is the son of the late John Stanford, Esq., Examiner to the Irish Court of Chancery, and Mary, third daughter of William Henn, Esq., Master in Chancery. He was born in Dublin, Sept. 30, 1852, and received his first musical instruction from Mr. A. O'Leary and Sir R. P. Stewart. In 1870 he matriculated at Queen's College, Cambridge, but shortly afterwards migrated to Trinity, where, on the death of Dr. J. L. Hopkins in 1873, he was elected organist of the College, a post he has retained ever since. In the same year he was appointed conductor of the University Musical Society. In 1874 Dr. Stanford graduated in classical honours, and shortly afterwards studied music at Leipzig under Reinecke, and in Berlin under Kiel. His principal compositions up to 1876 are a setting of Klopstock's Hymn "Die Auferstehung" (op. 5), incidental music to Tennyson's "Queen Mary" (op. 6), and a setting of the 46th Psalm (op. 8), first performed by the Cambridge University Musical Society in 1876. In 1877 Dr. Stanford took the degree of M.A. In the same year an Overture by him was produced at the Gloucester Festival, and a Symphony at the Crystal Palace. The next few years were devoted to the writing of various chamber compositions, two church services, one of which was written for the Festival of the Sons of the Clergy in 1880, and a grand opera, "The

Veiled Prophet of Khorassan (libretto by W. Barclay Squire), which was produced at Hanover, Feb. 6, 1881. In 1882 an *Elegiac Symphony* was performed at Cambridge, a Choral Hymn (op. 16) to words by Klopstock at St. Paul's Cathedral, and an *Orchestral Serenade* (op. 17) at the Birmingham Festival. Shortly afterwards he published a collection of old Irish songs. At the opening of the Royal College of Music Dr. Stanford was appointed Professor of Composition and Orchestral playing, and in 1883 the honorary degree of Mus. Doc. was conferred upon him by the University of Oxford. In 1884 he produced two new operas, "*Savonarola*" at Hamburg, and (within a fortnight) "*The Canterbury Pilgrims*" at Drury Lane; the librettos of both works were by G. A. A'Beckett. The same year witnessed the production at the Norwich Festival of a setting of Walt Whitman's *Elegiac Ode for Abraham Lincoln* (op. 21), three Cavalier songs (words by Robert Browning) (op. 18), and a pianoforte sonata (op. 20), played at the Monday Popular Concerts. In 1885 Dr. Stanford was elected Conductor of the Bach Choir. His oratorio "*The Three Holy Children*" (op. 22) was produced at the Birmingham Festival, and his music to the "*Eumenides*" (op. 23) of *Æschylus* at the performance of the play at Cambridge. His choral setting of Tennyson's ballad, "*The Revenge*" (op. 24), was performed at the Leeds Festival of 1886, and a pianoforte quintet (op. 25), at the Monday Popular Concerts. In 1887 he set to music the "*Carmen Sæculare*" of Lord Tennyson, which was performed at a State Concert with Madame Albani as solo soprano. The same artist sang the principal part in a setting of the 150th Psalm, written expressly for the opening of the Manchester Exhibition of the same year. Dr. Richter conducted the first performance of his "*Irish*" Symphony (op. 28), and the following autumn his music to the "*Edipus Rex*" (op. 29) of Sophocles was given at Cambridge. Shortly afterwards he was elected Professor of Music in the University of Cambridge, in succession to Sir George Macfarren. In January 1888 Professor Stanford conducted at Berlin his fourth Symphony in F (op. 31), on which occasion also Dr. Joachim played a Violin Suite with orchestral accompaniment (op. 32). His setting of Tennyson's "*Voyage of Maeldune*" was produced at the Leeds Festival of the same year. An oratorio, "*Eden*," of which the poem was written by Mr. Robert Bridges, was produced at the Birmingham Festival of 1891. In the same year he was elected a corresponding member of the French *Société de Compositeurs de Musique*, and received the

diploma of honorary membership of the Beethoven-Haus at Bonn. A ballad for chorus and orchestra, "*The Battle of the Baltic*" (op. 41), was given at the Hereford Festival of the same year. The year 1892 saw the production of two string quartets (op. 44 and 45), and a sonata for violoncello and piano (op. 39), and two sets of part songs. In 1893 he wrote in conjunction with Mr. Swinburne an ode, "*East to West*," for the Chicago Exhibition, which was first given in the Albert Hall; and a Mass in G major (op. 46). He was requested by Mr. Henry Irving to write the incidental music for the production of Lord Tennyson's tragedy, "*Becket*," for the Lyceum. He also published a further set of thirty Irish Songs and Ballads. His first opera, "*The Veiled Prophet*," was given for the first time in England at Covent Garden Theatre in July 1893. On the occasion of the Jubilee of the Cambridge University Musical Society in June 1893, when Saint Sæns, Bruch, Tschaikowsky, and Boito conducted their own compositions and received honorary degrees from the University, Professor Stanford resigned the conductorship and took up his residence in London. His six Irish Fantasies for Violin were produced in London in 1894. In the same year the University of Durham conferred upon him, in conjunction with Lord Leighton and Sir Hubert (then Dr. Hubert) Parry, the honorary degree of D.C.L. A setting of Gray's ode, "*The Bard*" (op. 50), was first given at the Cardiff Festival of 1895, and in the same year his fifth symphony, "*L'Allegro ed il Penseroso*," was produced by the Philharmonic Society, and a Pianoforte Concerto (op. 59) was played by Mr. Borwick at the Richter concerts. Both these works formed part of a concert of English music conducted by Mr. Stanford at Berlin in December of that year. His Irish opera "*Shamus O'Brien*" was produced at the Opéra Comique in the spring of 1896, and after a long run both in London and the provinces, was given in New York and other American cities. At the Norwich Festival of the same year his choral ballad "*Phauidrig Coshone*" (op. 59) was first given. His most recent works have been a Requiem (op. 63), composed in memory of Lord Leighton, first performed at the Birmingham Festival of 1897, repeated by the Royal Academy of Music and the Bach Choir in London, and the Apollo Club at Chicago; a String Quartet, No. 3 (op. 64), composed for the Joachim quartet, and given by them both in Berlin and London; a Cycle of Songs from Tennyson's "*Princess*," for vocal quartet; and a Te Deum in honour of her Majesty's Diamond Jubilee (Leeds Festival of 1898). In 1897 Mr. Stanford was ap-

pointed Conductor of the Leeds Philharmonic Society, and besides other concerts directed the Festival given to the foreign guests of the Society of Naval Architects. In the winter of the same year he conducted two of his symphonies at Amsterdam, and directed one of the series of international concerts, devoted to music of the British school, given by the Concerts Ysaÿe at Brussels. He married Jennie, fourth daughter of the late Champion Welton, Joldwynds, Surrey. He was elected a member of the Athenæum under Rule 2. Addresses: 50 Holland Street, Kensington, W.; and Athenæum.

STANLEY, Lord, Edward George Villiers, M.P., J.P., D.L., Junior Lord of the Treasury, was born on April 4, 1865, and is the eldest son and heir of the 16th Earl of Derby and Lady Constance Villiers, eldest daughter of the late Earl of Clarendon. He was educated at Wellington College, entered the 2nd Battalion Grenadier Guards, and retired with the rank of Lieutenant in 1896, and was A.D.C. to his father, then Governor-General of Canada, from 1889 to 1891. In 1892 he was returned to Parliament as Conservative member for the West Houghton Division of Lancs., and in 1895 was appointed a Lord of the Treasury. He is a J.P. and D.L. for Lancashire. In 1889 he married Lady Alice Maude Olivia Montagu, daughter of the 7th Duke of Manchester. Addresses: 36 Great Cumberland Place, Hyde Park, W.; and Coworth Park, Sunningdale, Berks.

STANLEY, The Hon. Edward Lyulph, was born in London on May 16, 1839, and is the son of the 2nd Lord Stanley of Alderley, and heir to his brother, the 3rd Baron. He was educated at Eton, and at Balliol College, Oxford, where he obtained a second class in Classical Moderations, and a first class in Lit. Hum., 1861. In 1862 he was elected a Fellow of his College. In 1865 he was called to the Bar at the Inner Temple, and in 1872 was appointed Assistant-Commissioner on the Friendly Societies Commission. In 1880 he was returned to the House of Commons as Liberal M.P. for Oldham, and represented that constituency until 1885. He was a member of the Royal Commission on the Housing of the Poor, 1884; on Elementary Education, 1887; and was a Commissioner to investigate the Royal Liver Friendly Society and Cardiff Savings Bank. In 1895 he was appointed a member of the Departmental Committee on London Poor-Law Schools. He has long been keenly interested in primary education, has sat on the London School Board almost continuously since

1876, and still represents the Marylebone Division. He may be said, we are informed on the authority of one of his most influential colleagues, to have latterly devoted all his life to the work of the London School Board, where his mastery of the detail of 440 schools is, owing to his marvellous memory and energy, complete. He married, in 1873, Mary, daughter of Sir Isaac Lowthian Bell, Bart. Address: 18 Mansfield Street, W.

STANLEY, Sir Henry Morton, G.C.B., D.C.L., LL.D., African explorer, was born near Denbigh, in Wales, on Jan. 28, 1841. When three years of age he was placed in the poor-house of St. Asaph, where he remained ten years, and received an education which enabled him to teach in a school. At the age of fifteen he sailed as cabin-boy in a vessel bound for New Orleans. Here he was adopted by a merchant named Stanley, whose name he took in place of his original one, which was John Rowlands. His patron died without leaving a will, and young Stanley was left to his own resources. He enlisted in the Confederate army, was made a prisoner, and subsequently joined the Federal navy, serving as acting ensign on the *Ticonderoga*. After the close of the war he went to Turkey as a newspaper correspondent, and in 1867 was sent by the *New York Herald* as its correspondent with the British army in Abyssinia, and subsequently travelled in Spain and elsewhere for the same paper. He was finally sent by the conductor of the *Herald* to find Dr. Livingstone, of whom nothing had been heard for more than two years. Stanley sailed from Bombay in October 1870, and reached Zanzibar, on the east coast of Africa, early in January 1871, and on Nov. 10 found Livingstone at Ujiji, on Lake Tanganyika, where he had just arrived from the south-west. Stanley furnished him with supplies, explored the northern part of Lake Tanganyika with him, and remained until February 1872, when Livingstone started on the journey from which he never returned, and Stanley made his way back to Europe, reaching England in July 1872. Here he was received with great enthusiasm, was publicly entertained, and presented by her Majesty with a gold snuff-box set with diamonds, and by the Royal Geographical Society (1873) with the patron's Gold Medal. The *éclat* of his first expedition induced the conductors of the *New York Herald* and of the London *Daily Telegraph* to send him, at their own expense, on another African Expedition. He reached Zanzibar in the autumn of 1874, and learning that Livingstone was dead, resolved to go north-westward and

explore the region of Lake Victoria N'yanza. This, after many encounters with the natives and the loss by death or desertion of 104 men out of 300, he reached in February 1875, and found it to be the largest body of fresh water on the globe, having an area of 40,000 square miles. He then pushed westward towards Lake Albert N'yanza, and was able to satisfy himself that it was not, as had been generally supposed, connected with Lake Tanganyika. Forced by the hostility of the natives to return to Ujiji, he determined to descend the great river discovered by Livingstone, and believed by him to be the Nile, but which others thought was the Congo (and Stanley by this journey ascertained it was). It had been named by Livingstone the Ludlaba, but by Stanley it was named the Livingstone. The descent, chiefly by canoes, occupied him eight months, cost him the lives of thirty-five men, and was accomplished under the greatest difficulties and privations. On reaching a settlement on the coast, a Portuguese national vessel took him to St. Paul de Loanda, whence an English vessel conveyed the party to the Cape of Good Hope, and thence to Zanzibar. Here his men were left at their home; and Stanley reached England in February 1878. He has published an account of his first expedition, under the title of "How I Found Livingstone," 1872. Of his second expedition an account is given in "Through the Dark Continent," 1878 (abridged edition, 1885). The President of the French Geographical Society presented the Cross of Chevalier of the Legion of Honour to Mr. Stanley at the Sorbonne, Paris, June 28, 1878. In 1879-82 he visited Africa again, sent there by the Brussels African International Association with a view to developing the great basin of the river Congo. The King of the Belgians devoted from his private purse £50,000 per annum towards this costly enterprise. Stanley completed the work in 1884, having established trading stations along the Congo River from its mouth to Stanley Pool, 1400 miles by river. A description of his labours in this field was published by him in 1885 under title "The Congo and the Founding of its Free State." On Jan. 13, 1887, he was presented with the honorary freedom of the City of London, just on the eve of his departure for a fourth time to Africa. This expedition was made for the purpose of relieving Emin Pacha, Governor of Equatorial Africa, whose condition was known in Europe to have become precarious. Stanley fulfilled his mission, succoured Emin and brought him and his followers safely back to Egypt, but only after the most severe hardships endured

in any of his explorations, and with a loss of over 400 out of the 650 men he had taken with him. Nearly three years were occupied in the journey. Among the important geographical results of the expedition were the discovery of the Semliki River, of Mount Ruwenzori (thought to be 17,000 feet high), of Lake Albert Edward, and of the south-western extension of Lake Victoria. Lake Albert Edward proved to be the primary source of the White Nile, and it was shown that its waters connect through the Semliki with the Albert N'yanza. Stanley reached Cairo near the close of 1889, and remained there until the following spring in order to write a record of the journey. This was published simultaneously in England, France, Germany, and the United States in June 1890, under the title of "In Darkest Africa" (2 vols.). His return to England was an unending ovation. The Universities of Oxford and Durham bestowed upon him the degree of D.C.L.; that of LL.D. was conferred upon him by the University of Cambridge, and every institution and individual sought to do him honour. On July 12, 1890, in Westminster Abbey, he was married to Miss Dorothy Tennant, an artist of considerable talent, and a lady well known in society. She is the daughter of Sir C. Tennant. A controversy subsequently arose relative to certain incidents mentioned in a "Life of Major Barttelot," which amounted to charges against Mr. Stanley. He defended himself from these charges before undertaking a lecturing tour to America. On his return with Mrs. Stanley in 1891, he lectured in many parts of the United Kingdom, and in 1892 paid a visit to Australia. On his return he settled in London and took out a certificate of naturalisation. At the general election in July he stood as a Unionist for North Lambeth, but was not returned. During the controversy about Uganda he was strongly in favour of retaining that country. In November 1893 appeared his book on "My Dark Companions and their Strange Stories." In 1898 appeared his "Through South Africa," being an account of his recent visit to the Cape. He was created G.C.B. at the Birthday, 1899. Addresses: 2 Richmond Terrace, S.W.; and Cadoxton Lodge, Neath, Glamorganshire.

STANMORE, Lord, The Right Hon. Arthur Hamilton Gordon, G.C.M.G., Hon. D.C.L. Oxon., D.L., J.P., Ex-Governor of Ceylon, is the youngest son of the 4th Earl of Aberdeen, and was born in 1829, and educated at Trinity College, Cambridge (M.A. 1851; Hon. D.C.L. Oxon. 1879). He sat in Parliament as Liberal Member for Beverley from 1854

to 1857; was Secretary to the special mission to the Ionian Islands in 1858; appointed Governor of New Brunswick in 1861; Governor of Trinidad in 1866; Governor of Mauritius in 1871; the first Governor of the Fiji Islands in 1875; High Commissioner for the Western Pacific in 1877; Governor of New Zealand in 1880; and Governor of Ceylon from 1883 to 1890. In 1878 he was made G.C.M.G. In 1879 he received the honour of the Hon. D.C.L. of Oxford University. He was raised to the peerage in 1893. As an author he has published "Wilderness Journeys in New Brunswick," 1864; "Story of a Little War," 1879; "Life of Lord Aberdeen," 1893; together with pamphlets and articles. His wife, who died in 1889, was the eldest daughter of Sir John Shaw Lefevre. Addresses: The Red House, Ascot; and Athenæum.

STANNARD, Mrs. Arthur, "John Strange Winter," F.R.S.L., the popular author of "Bootles' Baby" and many other well-known novels, was born at York on Jan. 13, 1856. She was the only daughter of the late Rev. H. V. Palmer, Rector of St. Margaret's, York, who, before taking Holy Orders, was in the Royal Artillery, and was one of the officers selected to attend the coronation of Queen Victoria. One of her ancestors was the celebrated actress, Hannah Pritchard. Mrs. Stannard began her public literary career in 1874. Her first publication in volume form was a collection of military sketches entitled "Cavalry Life," issued in 1881, for which her publishers induced her to adopt the masculine *nom de guerre* by which she has since become so well known. In 1885 two stories from her pen, entitled "Bootles' Baby," and "Houp-la," appeared in the *Graphic*; and attracted immediate attention from the author's evident familiarity with army matters and child life. Up to this time it was universally assumed that the author was a cavalry officer, but when the success of "Bootles' Baby" had established her reputation as a writer on army life, she disclosed her identity. In 1892 Mrs. Stannard became the first President of the "Writers' Club," which is the first women's Press Club ever established. In 1893 she was unanimously elected a Fellow of the Royal Society of Literature, an honour which had only once before been conferred on a woman. She was married in 1884 to Mr. Arthur Stannard, a civil engineer, and has four children. Since 1896 Mr. and Mrs. Stannard have lived at Dieppe, and have prominently identified themselves with the interests of that town as a resort for English visitors. It is to their efforts that English tourists

owe the Golf Club, of which Mr. Stannard is secretary, and the Committee of Publicity and Information. To this committee Mrs. Stannard has presented the letterpress for a handsome album, setting forth the attractions of Dieppe. Mrs. Stannard has published upwards of sixty novels, including: "Cavalry Life," "Regimental Legends," "Bootles' Baby," "Houp-la," "Pluck," "In Quarters," "On March," "Army Society," "Garrison Gossip," "Mignon's Secret," "That Imp," "Mignon's Husband," "A Siege Baby," "Confessions of a Publisher," "Bootles' Children," "Beautiful Jim," "My Poor Dick," "Harvest," "A Little Fool," "Buttons," "Mrs. Bob," "Dinna Forget," "Ferrals Court," "He went for a Soldier," "The Other Man's Wife," "Good-Bye," "Lumley the Painter," "Mere Luck," "Only Human," "My Geoff," "A Soldier's Children," "Three Girls," "That Mrs. Smith," "Aunt Johnnie," "A Man's Man," "The Soul of the Bishop," "A Blameless Woman," "The Truth-Tellers," "Grip," "Into an Unknown World," "The Peacemakers," "Heart and Sword," &c. Mrs. Stannard presented the entire copyright of "A Soldier's Children" to the Victoria Hospital for Children. Address: Villa des Rosiers, Dieppe.

STANTON, Rev. Arthur Henry, M.A., is the son of Charles Stanton, of Stroud, Gloucester, and was born on June 21, 1839. He was educated at Rugby, and Trinity College, Oxford, where he graduated B.A. in 1862, and M.A. in 1865. He was ordained in 1863, and has been since that date Curate of St. Alban's, Holborn. He is well known as an eloquent preacher, and as an indefatigable worker amongst the poorer classes, who form the major portion of the thickly populated parish of St. Alban's. He is unmarried, and resides in the clergy house which is attached to the church.

STANTON, Rev. Vincent Henry, D.D., son of Rev. V. J. Stanton, late Rector of Halesworth, Suffolk, and formerly Colonial Chaplain of Victoria, Hong Kong, is descended, on the mother's side, from Robert Barclay, of Ury, and was born at Victoria, Hong Kong, June 1, 1846. He was educated at Kensington Grammar School, and by private tuition; was Minor Scholar of Trinity College, Cambridge, 1866; Major Scholar, 1868; B.A. 1870 (20th Wrangler and 2nd class in Classical Tripos); M.A. 1873; B.D. 1890; D.D. 1891; and Fellow of Trinity College, 1872. He was ordained deacon 1872, and priest 1874; appointed one of the first University Extension Lecturers on the commencement of the scheme in 1873; was Junior Dean

of Trinity College, 1874-76; Senior Dean, 1876-84; Tutor, 1884-89; Divinity Lecturer at Trinity, 1882-89; Ely Professor of Divinity in the University of Cambridge, and Canon of Ely, 1889; Select Preacher before the University in 1874, 1878, &c.; Hulsean Lecturer, 1879; Cambridge Whitehall Preacher, 1880-81; Select Preacher before the University of Oxford, 1897-98; Examining Chaplain from 1875 to two successive Bishops of Ely. He has for some years taken an active part in College and University business, and is the author of "The Jewish and the Christian Messiah, a Study in the Earliest History of Christianity"; "The Place of Authority in Matters of Religious Belief," 1891; and of various sermons and pamphlets. Addresses: Trinity College, Cambridge; and the College, Ely.

STEAD, William Thomas, was born at Embleton, Northumberland, on July 5, 1849, and is the son of a Congregational minister who, a few months later, settled in Howdon-on-Tyne. Mr. Stead was educated at home and at Wakefield. He left school when fourteen; became office boy in a mercantile office, then Russian Vice-Consulate at Newcastle-on-Tyne; was appointed editor of the *Northern Echo*, a halfpenny daily paper published at Darlington, July 1871; assistant editor to Mr. J. Morley on the *Pall Mall Gazette*, September 1880; succeeded to the control of the paper in the spring of 1883; resigned the editorship, Dec. 31, 1889; and is now editing and publishing the *Review of Reviews*, a sixpenny monthly, founded by him in January 1890. As editor of the *Pall Mall Gazette* he was said by Mr. Matthew Arnold to have invented the "New Journalism," naturalised the interview in the English press, introduced illustrations into the daily newspaper, and established the *Pall Mall Extras*. It was his interview with General Gordon at Southampton which led to the mission to Khartoum. His "Truth about the Navy and its Coaling Stations" marked the beginning of the revival of our Naval Supremacy. In July 1885 Mr. Stead published "The Maiden Tribute of Modern Babylon," an exposure of crimes against women and children, for which the law provided no remedy. The immediate result was the passing of the Criminal Law Amendment Act of 1885. Mr. Stead visited Ireland in 1886, and published "No Reduction, No Rent, a Plea for the Plan of Campaign." In 1888 he visited Russia, of which country he has been the foremost advocate in the English press, and published on his return "Truth about Russia," in one volume. In 1889 he went to the Vatican to report on the attitude of

the Pope to the new era, and published a work on that subject in January 1890. On Jan. 15, 1890, having terminated his editorship of the *Pall Mall Gazette*, he brought out the first number of the mid-monthly *Review of Reviews*, and a few months afterwards became its sole proprietor, as well as editor. On July 15, 1893, he brought out the first number of *Borderland*, a quarterly devoted to the study of psychical phenomena. He has also carried on a vigorous propaganda in many cities and towns with a view to the establishment of what he has styled "The Civic Church," an organisation or federation of religious, philanthropical, industrial, and other bodies in a given town in furtherance of its civic welfare, a voluntary ethical advisory counterpart of the Town Council. In the same year he visited the World's Fair at Chicago, and published a book, "If Christ came to Chicago," on the latter city, which has run through several editions. Among his other publications should be mentioned "The Story that Transformed the World," 1890; "The Labour War in the United States," 1894; and "Her Majesty the Queen," and "Satan's Invisible World: a Study of Despairing Democracy," 1897; "Blastus, the King's Chamberlain: a Political Romance," "Gladstone, 1809-98: a Character Sketch," "The Centenary of 1798," 1898. He is also issuing a series of "Books for the Bairns," and has taken great interest in the Peace Conference, which he visited (1899). He married, in 1873, Emma L. Wilson. Address: Cambridge House, Wimbledon Park.

STEBBING, The Rev. Thomas Roscoe Rede, M.A., F.R.S., F.L.S., F.Z.S., was born in Euston Square, London, Feb. 6, 1835, and is the fourth son of the late Rev. Henry Stebbing, D.D., F.R.S. He was educated at King's College School and King's College, London, and at Worcester College, Oxford. He obtained the Classical Scholarship and a divinity prize at the B.A. examination, University of London; at Oxford took a First Class in Moderations, Second Class in Literæ Humaniores, First Class in Law and Modern History, was Scholar of Lincoln College, and successively Scholar, Fellow, and Tutor of Worcester College; was ordained Deacon in 1858, Priest in 1859, by Samuel Wilberforce, Bishop of Oxford; was engaged in tuition from 1857 to 1884; devoted several arduous years to preparing the Report on the *Challenger* Amphipodæ, contained in three quarto volumes, and is now engaged on a "Monograph of the Amphipoda" in general for "Das Tierreich"; was elected President of the Torquay Natural History Society for the

years 1873, 1874; of the Devonshire Association for the advancement of Science, Literature, and Art, 1884; of the Tunbridge Wells Natural History Society, 1889 to 1898; of the South-Eastern Union of Scientific Societies, 1896, 1897; of the Tunbridge Wells Literary Society, 1898; from 1872 to the present time has contributed numerous papers and articles to scientific and literary serials, including the *Annals and Magazine of Natural History*, *Geological Magazine*, *Nature*, *Natural Science*, the *Zoologist*, *Knowledge*, *Popular Science Review*, *Fraser's Magazine*, the *Westminster Review*, *Good Words*, the *Nineteenth Century*, *Blackwood*, the *Edinburgh Review*, *Transactions of the Zoological Society of London*, the *Linnean Society of London*, and the Society *Natura Artis Magistra* of Amsterdam; has also published separately, "Eventide, a Book of Prayer for the Schoolroom" (Bell & Daldy), 1864; translation of Longinus on the Sublime (Shrimpton, Oxford), 1867; "Essays on Darwinism" (Longmans), 1871; "Report on the Amphipoda collected by H.M.S. *Challenger*, 2 vols. text, 1 vol. plates (H.M. Stationery Office), 1888; "The Naturalist of Cumbria" (Kegan Paul & Co.), 1891; "A History of Crustacea," International Scientific Series (Kegan Paul & Co.), 1893. He married, in 1867, Mary Anne, third daughter of the late W. Wilson Saunders, Esq., F.R.S. Address: Ephraim Lodge, the Common, Tunbridge Wells, Kent.

STEDMAN, Edmund Clarence, was born at Hartford, Connecticut, Oct. 8, 1833. He is a graduate of Yale College, 1853; A.M. of Yale and of Dartmouth; and L.H.D. of Columbia. After some experience on the Connecticut press, he obtained a position, in 1859, in the *New York Tribune* office. During the Civil War he was a war correspondent of the *New York World*. In 1865 he left journalism and went into business in Wall Street, in order to obtain the means and time for purely literary work. Besides his contributions to the *Atlantic*, *Century*, and other periodicals, he has published "Poems," 1860, 1873; "Alice of Monmouth," 1864; "The Blameless Prince," 1869; a volume of essays on Victorian Poets, 1875; "Octavius Brooks Frothingham and the New Faith," 1876; "Hawthorne and other Poems," 1877; "Lyrics and Idyls" (London), 1879; "Edgar Allan Poe," 1888; and a collection of his "Poetical Works," 1884. In 1885 his "Poets of America" appeared, and in 1887 the thirteenth edition of "Victorian Poets," extended to the fiftieth year of her Majesty's reign. From 1883 he was engaged, with Ellen M. Hutchinson, in the compilation of "A Library of Ameri-

can Literature," an inclusive work, of which the eleventh and final volume appeared in 1890. He initiated the newly-founded Turnbull Lectureship on Poetry at Johns Hopkins University, with the opening course of lectures, early in 1891. These lectures were repeated at the University of Columbia, New York, in 1892, and gained him his doctorate from that corporation. In the same year they were published in book form, and entitled "The Nature and Elements of Poetry." In 1896 he published "A Victorian Anthology." Upon the death of Professor Lowell, 1891, he succeeded to the Presidency of the American Copyright League, a station which he still holds. Address: 16 Broad Street, New York, &c.

STEEL, Flora Annie, novelist, was born at Harrow on April 2, 1847, and is the second daughter of the late George Webster, Sheriff-Clerk of Forfarshire. She was educated at home, and lived in India till 1889, her husband, whom she married in 1867, being a civil servant in Bengal. She was for some time Provincial Inspector of Government and Aided Schools in the Punjab, and Member of the Educational Committee. In India she gained that knowledge and experience which places her second only to Mr. Kipling among novelists of Hindu or Mohammedan life and character. Her more recent works are: "From the Five Rivers," 1893; "The Potter's Thumb" and "Tales from the Punjab," 1894; "Red Rowans," 1895; "On the Face of the Waters" and "In the Tideway," 1896; "In the Permanent Way," 1897. Address: Dunlugas, Turriff, Scotland.

STEEL, Miss Kate, the first lady Professor of Singing at the Royal Academy of Music since 1867, was educated at Liverpool. As a child she was remarkable for her extraordinary vocal powers, having then a high soprano of great natural flexibility. She studied music and composition under Mr. Toms, of the Royal Academy, and achieved early a great proficiency on the pianoforte under Mr. Walter Macfarren. At sixteen she came up to London, and her rare musical sensibility and great natural facility seemed to point her out as destined to become a pianiste of the first order, but after a successful début at St. James's Hall, her wrists gave signs of weakness, which made the needful practising impossible. Meanwhile she had prosecuted her vocal studies with such success that a brilliant career in the concert-room or on the stage seemed open to her. But here, too, she was doomed to disappointment, for no sooner had she appeared once or twice in public, and won golden opinions,

than her throat also proved unequal to the excessive strain now put upon professional singing, and she had to abandon this second career also. But so exceptionally gifted a musician could not be allowed to leave the Royal Academy, so her services were retained unofficially by Signor Randegger, and for some years she was chiefly engaged in preparing his pupils. Subsequently it was decided to offer Miss Steel the post of Lady Professor of Singing at the Academy, which she accepted, and is at present the only lady Professor at the Royal Academy of Music. Miss Steel has done a good deal to place her own art on a more scientific, and, above all, on a more philosophic basis than has hitherto been done; and after spending many years in studying some obscure points of psychophysiology (notably the influence of the nervous system on respiration and circulation), she has established a complete system of physical and mental training. This, though intended primarily for executive art, has attracted the attention of the medical faculty through its therapeutic effects, and is being recommended for all forms of nervous exhaustion and kindred ailments. The Organ School of Music is the first public institution which has organised classes on these important subjects, and has recently appointed Miss Steel to lecture and to hold classes on "Physical Culture: Nerve and Muscle Training," "Memory and Ear Training," and "Medical Gymnastics," in addition to her work on the vocal staff. Address: 7 Porteus Road, Maida Hill, W.

STEERE, The Hon. Sir James George Lee, third son of Lee Steere, Esq., of Jayes, Surrey, was born in 1830, and was educated at the Clapham Grammar School. He emigrated to Western Australia in 1860; became Justice of the Peace, 1861; has been Member of the Legislative Council since 1868; Member of the Executive Council since 1884; Member of the Federal Council of Australasia since 1885; and Speaker of the Legislative Council since 1886. He received the honour of knighthood, 1888. Sir J. G. Steere married, in 1859, Kate, the only daughter of the late Luke Leake, Esq., of Perth, Western Australia. Address: Perth, West Australia.

STEEVENS, George Warrington, was born Dec. 10, 1869, and educated at the City of London School and Balliol College, Oxford (B.A. Oxford and London). He became a Fellow of Pembroke College in 1892. He was on the staff of the *Pall Mall Gazette* during the editorship of Mr. Henry Cust, 1893 to 1896, and contributed to the *National Observer* during the editor-

ship of Mr. W. E. Henley. He is author of "Monologues of the Dead" and "Naval Policy," 1896. The latter work brought him prominently before the public. He has been on the staff of the *Daily Mail* from 1896, for which paper he visited on journalistic missions the United States, Germany, Egypt, and served as correspondent during the Turco-Grecian war and Soudan Expedition of 1898. He has embodied his experiences successively in "The Land of the Dollar," "With the Conquering Turk," 1897; "Egypt in 1898," and "With Kitchener to Khartoum," 1898. Address: Russell Mansions, Southampton Row, W.C.; and Merton Abbey, Surrey.

STEINITZ, William, was born May 14, 1836, at Prague, Bohemia, where he was also educated, finishing his studies, however, at the Polytechnic Institute, Vienna. He early attained distinction as a chess-player, and by his defeat of the late Professor Anderssen in 1866 won the match championship of the world, a position which he held against all contestants for a long time. He won every single-handed match or series for thirty years after 1862, and gained either first or second place (or tied for first or second) in every tournament he entered for many years after 1867. His average score in tournaments was the highest, and in any single one his score was the best. Among the tournaments in which he has taken part have been those held in Dublin, 1865; Paris, 1867; Dundee, 1867; Baden, 1870; London, 1872-1883; Vienna, 1873 and 1882; and among the well-known players he has been matched against are Anderssen, Blackburne, Bird, Gunsberg, Zukertort, Martinez, Mackenzie, Tschigorin, Golmayo, and Vasquez. In 1883 he settled in the United States, where, since 1885, he has been the editor of the *International Chess Magazine*. In 1889 he published the first part of a work entitled the "Modern Chess Instructor." In 1894 he suffered defeat at the hands of Lasker, who won ten games to his five (four drawn).

STEPHEN, Sir Alexander Condie, K.C.M.G., C.B., Minister at Dresden, was born in 1850, and is the younger son of Oscar Stephen, a former partner in Allsopp's. He was educated at Rugby, and entered the Diplomatic Service in 1876. Having served at St. Petersburg and Constantinople, he was appointed Consul-General in Eastern Roumelia in 1880, and C.M.G. in 1881. In the next year he was employed on special service to inquire into the condition of Khorassan. In 1884 he was Assistant-Commissioner for the demarcation of the N.W. Boundary of Afghanistan. He became Consul-General

in Bulgaria in 1886, Secretary at Vienna in 1887, and in Paris in 1888. In 1893 he became *Chargé d'Affaires* at Coburg, and in 1897 was appointed, in addition, to his present post, Minister Resident at Dresden and Coburg. He is a good Russian and Persian scholar, and has published translations of tales in these languages. Addresses: British Legation, Dresden; 84 Cadogan Square, S.W.

STEPHEN, Leslie, M.A., Litt.D., son of the late Right Hon. Sir James Stephen, the author of "Essays on Ecclesiastical Biography," and brother of the Hon. Sir James Fitzjames Stephen, was born at Kensington, Nov. 28, 1832, and educated at Eton College and at King's College, London, whence he proceeded to Trinity Hall, Cambridge, where he graduated B.A. in 1854 and M.A. in 1857. For several years he was Fellow and Tutor of Trinity Hall. In 1864 Mr. Stephen left Cambridge, and since then he has been actively engaged in literary pursuits in London. He was editor of the *Cornhill Magazine* from 1871 till 1882, when he resigned that post in order to undertake the responsible task of editing the important "Dictionary of National Biography," which is in course of publication in a series of quarterly volumes. He was succeeded in the editorship in 1891 by Mr. Sidney Lee. In May 1883 he was elected to the Lectureship of English Literature at Cambridge, founded in honour of the late W.G. Clark, of Trinity College, but he held the office for only a year. His separate publications are: "The Playground of Europe," 1871; "Hours in a Library," 1st series, 1874, 2nd series, 1876, 3rd series, 1879; "Essays on Free-thinking and Plain Speaking," 1873; "History of English Thought in the 18th Century," 1876; "The Science of Ethics," 1882; and "Johnson," "Pope," and "Swift," in "English Men of Letters." He edited Fielding's works, "with a biographical essay," 10 vols., 1882. His other publications include: "The Life of Henry Fawcett," 1885; "An Agnostic's Apology," 1893; the standard "Life of Sir James Fitzjames Stephen," 1895; "Social Rights and Duties," 1896; and "Studies of a Biographer," 1898. Mr. Leslie Stephen has also contributed numerous articles to the *Saturday Review* and the *Pall Mall Gazette*. Mr. Stephen married Harriet Marion, younger daughter of William Makepeace Thackeray. This lady died in 1875. He married, secondly, in 1878, Julia Prinsep Duckworth. She died in 1895. Address: 22 Hyde Park Gate, S.W.

STEPHENS, The Very Rev. William Richard Wood, B.D., F.S.A., the Dean of Winchester, was born in

Gloucestershire on Oct. 5, 1839, and is the youngest son of Charles Stephens, banker. He was educated at Balliol College, Oxford, taking his degree with a first class in the Final Classical Schools in 1862. Two years later he was ordained by the Bishop of London to the curacy of Staines, and since 1870 his work has lain in the diocese of Chichester. For three years Mr. Stephens was Vicar of Mid-Lavant, and in 1876 was presented to the Rectory of Woolbeding. His association with Chichester dates from 1872, when he became a Lecturer at the Theological College, and three years later was appointed to a non-residential stall in the Cathedral. He was appointed to the Deanery of Winchester in 1894. He is the author, amongst other works, of "Memorials of the See and Cathedral of Chichester," "Cathedral Chapters considered at Diocesan Councils," "History of the Diocese of Chichester," and a Biography of Dr. Hook, the Vicar of Leeds, and afterwards Dean of Chichester, who was his father-in-law, and a Life of Lord Hatherley. In 1872 he published "St. John Chrysostom; his Life and Times," and afterwards translated the "Treatises and Letters of Chrysostom." His last important work is the "Life and Letters of E. A. Freeman, D.C.L.," 1895. The Dean, who represented the diocese in the Lower House of Convocation from 1880 to 1886, is a High Churchman. He married, in 1869, Charlotte, the youngest daughter of Dean Hook. Address: The Deanery, Winchester.

STEPHENSON, Sir Augustus Frederick William Keppel, K.C.B., was born in London, Oct. 18, 1827, and is the son of the late Henry Frederick Stephenson, Barrister-at-Law, formerly M.P. for Westbury, and a Commissioner of Inland Revenue, and the Lady Mary Keppel, daughter of William Charles, 4th Earl of Albemarle. He was educated privately and at Caius College, Cambridge, where he took his M.A. degree in 1849, and was called to the Bar as Barrister-at-Law of Lincoln's Inn, 1852; for two years he was Marshal and Associate in the Court of Queen's Bench to the Lord Chief-Justice Campbell; went the Norfolk Circuit; was a Revising Barrister and Recorder of Bedford; appointed Assistant-Solicitor of the Treasury by Earl Russell in 1865; *ad interim* Registrar of Friendly Societies by Mr. Lowe, when Chancellor of the Exchequer; appointed Solicitor to the Treasury in 1876; and her Majesty's Procurator-General, 1877, by Mr. Disraeli, when First Lord of the Treasury; Director of Public Prosecutions by Statute 47 & 48 Vic. cap. 58, 1884. He

was created a C.B. on the recommendation of Mr. Gladstone, when First Lord of the Treasury, in 1883, and a K.C.B. on the same recommendation in 1886. Sir Augustus Stephenson was made Queen's Counsel in 1889, on the recommendation of Lord Chancellor Halsbury, and retired from his official position as Public Prosecutor in 1894. He married, in 1864, Eglantine, second daughter of the late Right Hon. Edward Pleydell-Bouverie. Addresses: 46 Ennismore Gardens, S.W.; and Athenæum.

STEPHENSON, General Sir Frederick Charles Arthur, G.C.B., Constable of the Tower of London, Keeper of the Crown Jewels, was born in 1821, and joined the Scots Guards in 1837, retiring in 1888 with the rank of General, to which he rose in 1885. His military career was distinguished. He served during the Crimean war, and was present at Alma, Inkerman, Balaklava, and the siege of Sebastopol. In the China war as Assistant Adjutant-General he was present at the capture of the Taku Forts, 1857-61. From 1876 to 1879 he commanded the Home District. The army of occupation in Egypt and the Soudan was under his command from 1883 to 1888, and for services then rendered he received the thanks of both Houses of Parliament and the Grand Cross of the Medjidieh. He was created K.C.B. in 1884, G.C.B. (Mil.) in 1886, Keeper of the Crown Jewels in 1884, and Constable of the Tower in 1898. Address: 83 St. George's Square, W.

STEPHENSON, Vice-Admiral Sir Henry Frederick, K.C.B., was born on June 7, 1842, and entered the navy in February 1855. He served as midshipman in H.M.S. *St. Jean d'Acre* in the Black Sea during the Crimean war, and was present at the capture of Kerch and the siege and fall of Sebastopol. In 1857 he went to China as midshipman in H.M.S. *Ruleigh*, which was afterwards wrecked, and served in the operations in Fatshan Creek and in the Canton River. During the Indian Mutiny he landed with the *Pearl's* Naval Brigade, and took part in every engagement against the mutineers, being several times mentioned in despatches for meritorious services. The Naval Brigade afterwards received the thanks of both Houses of Parliament. He was promoted to lieutenant in 1861, and had command of H.M.S. *Heron* on the lakes of Canada during the Fenian disturbances in 1866. He was also commander of H.M.S. *Rattler* when she was wrecked in the Japanese Sea in 1868. Sir Henry was promoted to captain in 1875, and in the same year was appointed to H.M.S. *Discovery*, which

formed part of an Arctic expedition. Upon returning to England he received the Arctic Medal and a C.B. (Civil Division). He was appointed equerry to the Prince of Wales in 1878, an honour that he retained till 1893. As Captain of H.M.S. *Carysfort* he served in the Egyptian war, being employed in the Suez Canal, and he also accompanied the Headquarters Staff in the night march from Kassassin. He was present at the battle of Tel-el-Kebir. For these services he received the Egyptian Medal with clasp, Khedive's Star, and the Osmanieh of the 3rd class. In the Mediterranean, from 1885 to 1888, with the Duke of York as one of his lieutenants, he commanded H.M.S.S. *Thunderer* and *Dreadnought*. Sir Henry was appointed aide-de-camp to the Queen in 1888, and was promoted Rear-Admiral in 1890, and Vice-Admiral in 1896. He became successively Commander-in-Chief in the Pacific, and Senior Officer in Command of the Channel Squadron, and was promoted to a K.C.B. in June 1897. He is also a Knight Grand Cross of the Order of Dannebrog. Address: 56 Rutland Gate, S.W.

STEPHENSON, Rev. Thomas Bowman, B.A. Lond., D.D., LL.D. (Hon.), minister of the Wesleyan Methodist Church, was born at Newcastle-on-Tyne in 1839. His father, the Rev. John Stephenson, was a minister of the same Church. Dr. Stephenson was educated at Wesley College, Sheffield, and graduated at the University of London in 1860. His first clerical appointment was to Norwich, where he took part in the then novel experiment of theatre preaching. Removing to Manchester in 1862 he threw himself into the various labours rendered necessary by the cotton famine; and then, and subsequently at Bolton, his attention was turned to those social and philanthropic problems which have specially engrossed his subsequent years. He held two charges in London, and in the year 1869 commenced the great group of institutions known as the Children's Home, by opening for waif lads a small cottage in Lambeth. He was a member of the second School Board for London, is an ardent "Temperance Reformer," and connected with several of the leading philanthropic societies. He has travelled extensively in many parts of the British Empire and in the United States, and has promoted, for many years, emigration, especially that of children, to Canada. He was elected in July 1891 to succeed Dr. Moulton as President of the Wesleyan Methodist Conference, and visited the United States as President when the second Œcumenical Conference of the Methodist Churches was held in Washing-

ton. He is one of two representatives of Nonconformity on the Council of the Prince of Wales's Hospital Fund, and has been prominently identified with the St. John's Ambulance Association. Address: The Children's Home, Alverstoke, near Gosport.

STEPNEY, Bishop of. See WINNINGTON-INGRAM, THE RIGHT REV. A. F. W.

STERLING, Antoinette. See MACKINLAY, MRS. JOHN.

STERNBERG, George Miller, Surgeon-General of the U.S. Army, was born in Hartwick Seminary, Otsego Co., N.Y., June 8, 1838. He graduated at the College of Physicians and Surgeons in New York City in 1860, and was appointed Assistant-Surgeon in the U.S. Army in 1861. In 1875 he was made a Surgeon, with the rank of Major; in 1891 Deputy-Surgeon-General, with the rank of Lieutenant-Colonel; and in 1893 Surgeon-General, with the rank of Brigadier-General. The National Board of Health appointed him, in 1879, Secretary of the Havana Yellow Fever Commission; the Secretary of State sent him, in 1885, as a delegate from the United States to the International Sanitary Conference at Rome; and in 1885-87 he was detailed by the American President to make investigations in Brazil, Mexico, and Cuba relating to the ætiology and prevention of yellow fever. By authority of the War Department he was, at the special request of the New York Chamber of Commerce, made consulting bacteriologist to the Health Officer of the Port of New York in 1892. He is an honorary member of the Academies of Medicine of Rome, Rio Janeiro, and Havana, the American Academy of Medicine, and of the Epidemiological Society of London, and Associate Member of the French Society of Hygiene, a Fellow of the Royal Microscopical Society of London and of the American Association for the Advancement of Science, ex-President of the American Public Health Association, and is a member of many other scientific bodies. The Lomb prize of 500 dollars was awarded him in 1885 for his essay on "Disinfectants" by the American Public Health Association, and he has invented automatic heat-regulating apparatus. Besides numerous contributions to scientific journals he has published "Photo-Micrographs," 1883; "Bacteria," 1884; "Malaria and Malarial Diseases," 1884; "A Manual of Bacteriology," 1892; "Immunity: Protective Inoculations in Infectious Diseases, and Serumtherapy," 1895; and "A Text-Book of Bacteriology," 1896.

STEVENSON, Hon. Adlai E., Vice-President of the United States, was born in Christian County, Kentucky, Oct. 23, 1835, but removed in 1852 to Bloomington, Ill. He was educated at Centre College, Kentucky, and at the Illinois Wesleyan University; studied law, and began its practice at Metamora, Illinois, in 1858. From 1861 to 1865 he was Master in Chancery of Woodford County, from 1865 to 1869 States Attorney, from 1875 to 1879 Member of Congress, from 1885 to 1889 First Assistant Postmaster-General, and from 1893 to 1897 Vice-President.

STEVENSON, David Watson, R.S.A., was born in 1842 at Ratho, a few miles to the west of Edinburgh, and began his artistic life under the late William Brodie, R.S.A., in November 1857, devoting himself from the first alike to his work in the studio during the day and to his studies in the evening and during every leisure hour. Under Mr. Brodie he remained eight years, receiving every encouragement, and although not a pupil, he had opportunities of acquiring varied experience in all the departments of sculpture. During the first half of that period he attended the School of Art under the Board of Manufactures for Scotland; a copy of "The Venus of Melos," made in his last session at the school, was published by the Board, and largely subscribed for by the members. Admission to the life school of the Royal Scottish Academy having been gained, he continued his studies there for about four years, at the same time studying anatomy. In the exhibition of the Royal Scottish Academy for 1859 a juvenile work by Mr. Stevenson had, by a stretch of indulgence, been accepted; it was followed, however, next year by better work, and Mr. Stevenson has continued a regular contributor to the annual exhibitions of the Academy, of which body he was elected an Associate in 1877, and an Academician in 1886. In 1886, without friends and with a small sum which he had saved, augmented by £20 lent by his mother, he began work on his own account, his first sitters being Mr. J. H. A. Macdonald, afterwards Lord Advocate, now Lord Justice-Clerk, and Mrs. Millar, wife of Lord Craighill. The figure of a youth modelled at this time attracted the attention of Mr. (afterwards Sir John) Steel, R.S.A., her Majesty's Sculptor for Scotland, who, on the death of George Maccallum in October 1868, commissioned him to execute the life-size group representing "Labour" at one of the angles of the Prince Consort Memorial, Edinburgh, primarily entrusted to that sculptor, but by him only carried the length of the first sketch, and which was then begun *de novo*. The execution of this

group proving satisfactory to the committee, it was immediately followed by the commission to carry out the companion group representing "Learning," and on the unveiling of the memorial by the Queen in August 1876 he had the honour, along with the other artists who had been engaged upon the work, of being presented to her Majesty. In the spring of 1876 he paid a long-desired visit to Rome, modelling while there a life-size statue of Eve, a design for which he had carried with him. He modelled a statue to Tannahill, the poet, which was erected at Paisley, and a colossal statue of Wallace for the national monument to the hero and patriot on the Abbey Craig, Stirling, where are also, in the interior of the tower, a series of busts in marble, also by Mr. Stevenson, of eminent Scotsmen, beginning with that of King Robert the Bruce, not altogether ideal, being based on the cast taken from the bones of the head found in the grave of the king in Dunfermline Abbey. The series includes busts of Knox, Buchanan, Adam Smith, Burns, Scott, Watt, Tannahill, Thomas Chalmers, and Hugh Miller. A statue of Knox also was executed for Haddington. In the intervals between these larger works various ideal figures were executed, including a "Nymph at the Stream," a seated figure, now in the Art Gallery at Oldham. He executed also a statue in marble of "Lady Godiva," one of "Echo," in movement, and one of "Galatea." A group of a "Pompeian Mother," attracted the attention of the Prince of Wales at the International Exhibition of 1886 at Edinburgh. In 1881 Mr. Stevenson was one of the successful competitors in the first competition for four groups of statuary for Blackfriars Bridge, London; his design, "India visits Britain," being awarded the third premium by the assessors, among whom were Sir Frederick Leighton, P.R.A., Mr. W. Calder Marshall, the veteran sculptor, and other members of the Royal Academy. Mr. Stevenson has executed numerous portrait busts of eminent men, among the more recent being Sir John Fowler, Bart., the well-known engineer, exhibited at the Royal Academy in 1889, and Mr. (now Sir William) Arrol, the constructor of the Forth Bridge. A life-size statue of R. L. Stevenson and a bronze statue of Burns for Leith are among his most recent achievements. Address: The Dean Studio, Edinburgh.

STEVENSON, Francis Seymour, M.P., J.P., was born on Nov. 24, 1862, and is son of the late Sir William Stevenson, K.C.B., Governor of Mauritius. He was educated at Lausanne, Harrow, and Balliol College, Oxford, where he obtained a first

class in Lit. Hum. in 1884. He has been Liberal Member of Parliament for the Eye Division of Suffolk since 1885, was Parliamentary Charity Commissioner from April 1894 to August 1895, and has been of late years much before the public as an advocate of the Armenians, and as President, since 1892, of the Anglo-Armenian Association. In 1893 he published a work on "Historic Personality," and is author of numerous pamphlets and articles in English and French. Addresses: 5 Ennis-more Gardens, S.W.; and Playford Mount, Woodbridge.

STEVENSON, Thomas, M.D., F.R.C.P., received his medical education at Guy's Hospital, graduated M.D. Lond. (Univ. Scholar in Forensic Med. and Midwifery) in 1864, and became F.R.C.P. in 1871. He is Scientific Analyst to the Home Office, and Lecturer on Chemistry and Medical Jurisprudence at Guy's Hospital. He is also Examiner in Sanitary Science at the University of Cambridge, in Public Health at the Conjoint Board, and in Forensic Medicine at the University of London and Victoria University. He is editor of Taylor's "Medical Jurisprudence," and "Manual of Medical Jurisprudence," and is author of a "Treatise on Alcohol," and various papers in the *Chemical News*, *Guy's Hospital Reports*, *Proceedings of the Royal Society*, &c. Address: 45 Gresham Road, Brixton, S.W.

STEWART, Professor Charles, F.R.S., F.L.S., M.R.C.S., was formerly Curator of the Museum at St. Thomas's Hospital, Lecturer on Comparative Anatomy, and Joint-Lecturer (with Prof. Harley) on Physiology at the same institution. He was subsequently Professor of Biology and Physiology at Bedford College, and he now holds the position of Conservator of the Museum of the Royal College of Surgeons of England, where he is also Hunterian Professor of Human and Comparative Anatomy, and has frequently delivered courses of lectures, illustrative chiefly of the specimens added to the Museum under his charge. He is a Past President of the Linnean Society. Address: Royal College of Surgeons of England, Lincoln's Inn Fields, W.C.

STEWART, Field-Marshal Sir Donald Martin, Bart., G.C.B., G.C.S.I., C.I.E., Hon. D.C.L. Oxford, LL.D., was born on March 21, 1824. He received his education at the University of Aberdeen, and entered the Bengal Staff Corps in 1840. He served against the Hill Tribes in the Peshawur district in 1854 and 1855, when he was honourably mentioned in the

despatches. In May and June 1857, at the outbreak of the Sepoy Mutiny, he commanded the volunteers serving in the Allyghur district. When all communication with the Upper Provinces was cut off, Captain Stewart volunteered to carry despatches from the Government of the North-West Provinces to the officer commanding at Delhi. This he performed with success, and on his arrival at the camp before Delhi he was appointed Deputy Assistant-Adjutant-General, in which capacity he served with the field force throughout the siege of Delhi. He was again mentioned in despatches with signal approval, and was promoted to the brevet rank of Major. He afterwards served in the siege of Lucknow as Assistant-Adjutant-General, and throughout the campaign in Rohilcund. His services on this occasion were further recognised, and he obtained a brevet of Lieutenant-Colonel, with the medal and two clasps. In the Abyssinian Expedition of 1867-69 Colonel Stewart commanded the Bengal Brigade, and commanded for some time at Zulla and Senafé. He was then rewarded with the C.B. He attained the rank of Lieutenant-General in 1877. He was in command of the Candahar column of operations in the Afghan campaign from November 1878 to April 1880, and for his services received the thanks of Parliament and was made K.C.B. He commanded the field force which marched from Candahar to Cabul in April 1880, fought and defeated the Afghans at Ahmed Kheyl, and again at Oorzoo. General Stewart subsequently held supreme command of the army in Northern Afghanistan, and after despatching Sir Frederick Roberts to the relief of Candahar, he carried out the withdrawal of the British army from Cabul and Northern Afghanistan. For these services he received the thanks of Parliament, and was made G.C.B. and baronet. In September 1880 he was appointed Member of the Council of the Governor-General, and in April 1881 succeeded Sir F. Haines as Commander-in-Chief in India. Sir D. Stewart is Governor of the Royal Hospital, Chelsea, and, since 1885, a member of the Indian Council. He was made a Field-Marshal in November 1894. He married, in 1847, Marina, daughter of Commander Dabine, R.N. Addresses: East Court, Royal Hospital, Chelsea, S.W.; and Athenæum.

STEWART, Sir Thomas Grainger, M.D., LL.D., F.R.C.P., F.R.S.E., &c., son of Alexander Stewart of Edinburgh, and Agnes, daughter of Hugh Grainger, born in Edinburgh, Sept. 23, 1837, was educated at the High School and University of Edinburgh, and after graduating, studied

in the Universities and Hospitals of Berlin, Prague, and Vienna, especially under Virchow, Rokitsky, and Oppolzer. On his return to Edinburgh he became Resident Physician in the Royal Infirmary, and there made observations upon the diagnosis of certain forms of kidney disease, which attracted considerable attention. As a result of this work he was, in 1862, appointed Pathologist to the Royal Infirmary, and Lecturer on Pathology at Surgeons' Hall. During the succeeding seven years he published numerous papers on pathological and clinical subjects, and in 1869 unsuccessfully contested the chair of General Pathology in the University of Edinburgh. He then resigned the Pathologistship and the Physicianship to the Royal Hospital for Sick Children, and was elected Ordinary Physician to the Royal Infirmary and Lecturer on Clinical Medicine. In 1876 he was appointed Professor of the Practice of Physic in the University of Edinburgh. He is the author of a book on "Bright's Diseases of the Kidneys," which has passed through two editions in this country, and two in America. The views embodied in this work have been to a large extent accepted on the Continent as well as in this country. He has also published a volume of Lectures on the Nervous System, and works on Giddiness, and on Albuminuria, being the first and second of a series of Clinical Studies on Important Symptoms, as well as many papers, particularly on the nervous system, the lungs, and the liver. He is a Deputy-Lieutenant, and a member of many learned societies at home and abroad, an Honorary Fellow of the Royal College of Physicians of Ireland, and of the College of Physicians, Philadelphia, and M.D. (*honoris causa*) of the Royal University, and received the like honour from the University of Dublin, on the occasion of the Tercentenary of Trinity College. He also received from the University of Aberdeen the degree of Doctor of Laws. He has been President of the Royal College of Physicians, and of the Medico-Chirurgical Society of Edinburgh, and of the Medicine section of the British Medical Association, and was one of the Honorary Presidents of the Berlin International Congress. He presided over the meeting of the British Medical Association in August 1898. He has for many years taken a special interest in the Medical Students' Christian Association, and in the Medical Missionary Society. In 1882 he was appointed Physician in Ordinary to her Majesty the Queen in Scotland. He received the honour of knighthood in 1894. He was representative of England at the International Congress on Tuberculosis which began its sittings at Berlin, May 24, 1899. His ad-

dress to the Congress was much admired. He married (1) Josephine Dubois, daughter of Charles Anderson of Jamaica; and (2), in 1866, Jessy, daughter of the Rev. R. Macdonald, D.D. Address: 19 Charlotte Square, Edinburgh.

STEYN, M. T., President of the Orange Free State, was born at Winbury, Orange Free State, on Oct. 2, 1857, and is the third son of Martinus Steyn, of Bloemfontein. He was educated at Grey College, Bloemfontein, and in Holland, and has been called to the English Bar (Inner Temple). He practised as an advocate at Bloemfontein during the eighties, was appointed State Attorney in 1889, and was raised to the Bench as Second Puisne Judge in that year. In 1893 he was appointed First Puisne Judge. He was elected to the Presidency in 1896 by Universal Suffrage, and has drawn tighter the bonds connecting the Orange Free State with the Transvaal. In 1897 a Joint-Federal Council was appointed, of five members from each State, to consider questions of mutual interest; the franchise was granted to Burghers of either State indiscriminately, and the two Republics agreed to stand by each other in case either were attacked. In September 1898 President Steyn visited his brother President at Pretoria. He assisted at the Conference between Sir Alfred Milner and President Kruger, which was held in the summer of 1899 at Bloemfontein. He has married the daughter of the Rev. Colin J. Fraser. Address: Bloemfontein.

STIGAND, William, son of the late William Stigand, Esq., of Devonport, born in 1827, was educated at Shrewsbury and St. John's College, Cambridge. After studying the Equity branch of the profession of the law, he was called to the Bar at Lincoln's Inn in June 1852. He has written "A Vision of Barbarossa, and other Poems," 1860; "Athenais; or the First Crusade," 1866; and "Life, Work, and Opinions of Heinrich Heine," 2 vols., 1875. Mr. Stigand has contributed largely to the *Quarterly* and *Edinburgh Reviews*, the *Times*, and other periodicals; he entered the British Consular Service as Vice-Consul of Boulogne-sur-Mer in 1873, and has been successively Consul at Ragusa, Königsberg, and Palermo.

STIRLING, Edward Charles, C.M.G., M.A., M.D., F.R.C.S., F.R.S., Lecturer on Physiology at the Adelaide University, and Director of the South Australian Museum, was born in South Australia in 1848, and is the eldest son of the late Hon. E. Stirling. He was educated at St. Peter's College, South Australia, and at

Trinity College, Cambridge, and St. George's Hospital, London, where he held the posts of House Surgeon, Assistant-Surgeon, and Lecturer on Physiology. He is M.D. of Cambridge University. In 1881 he became Lecturer on Physiology at Adelaide University, of which he is now also a Member of Council. He is also Senior Surgeon to the Adelaide Hospital, and Director of the South Australian Museum. From 1883 to 1886 he was a member of the South Australian House of Assembly, and in 1893 was made C.M.G. and F.R.S. He is an Hon. Fellow of the Anthropological Institute of Great Britain, and has contributed numerous important papers to the medical journals, the *Transactions* of the Roy. Soc. of South Australia, the Roy. Zool. Soc., &c. Addresses: The University, Adelaide; and Athenæum.

STIRLING, The Hon. Sir James, LL.D., a Judge in the Chancery Division of the High Court of Justice, was born at Aberdeen, May 3, 1836, and is the eldest son of the Rev. James Stirling, George Street U.P. Church, Aberdeen, and Sarah Irvine. He was educated at the Grammar School and University of Aberdeen, and at Trinity College, Cambridge, where he was Senior Wrangler and first Smith's Prize-man in 1860. He was called to the Bar in 1862; was reporter at the Rolls Court on the Staff of the Law Reports, 1865-76; junior Counsel to the Treasury in 1881; Member of the Bar Committee in 1883; and was raised to the Bench in 1886. He received the honour of the hon. LL.D. of Aberdeen University in 1887. He married Aby, eldest daughter of John Thomson Renton, Bradstone Brook, Shalford, Surrey. Addresses: Finchcocks, Goudhurst, Kent; 3 Hans Crescent, S.W.; and Athenæum.

STIRLING, James Hutchison, F.R.C.S. and LL.D. Edin., born at Glasgow, June 22, 1820, youngest son of William Stirling, of James Hutchison & Co., Glasgow, was educated at Glasgow University for nine consecutive winter sessions in arts and medicine, and spent six years afterwards in France and Germany. He became LL.D. of Edinburgh, 1867; and a Foreign Member of the Philosophical Society of Berlin, 1871. In earlier days he held appointments as surgeon to the Hirwain and other iron and coal works, South Wales, but he relinquished professional practice in 1851, and went to the Continent to pursue there those literary and philosophical studies for which, as a student at college, he had shown a taste, and in which he had gained distinction. Returning to England in 1857, he devoted himself to the study of philosophy

and literary pursuits generally. Leaving earlier contributions out of view, he published in 1865 "The Secret of Hegel," from the appearance of which work there dates in Great Britain, academically and generally, a new movement towards the study of philosophy, more particularly German and ancient. A new edition of this work appeared in 1898. The following are the titles of his other works: "Sir William Hamilton, or the Philosophy of Perception," 1865; "Schwegler's History of Philosophy, translated and annotated," 1867 (11th edit., 1891); "Jerrold, Tennyson, and Macaulay, with other Critical Essays," 1868; "Address on Materialism," 1868; "As Regards Protoplasm," 1869 (2nd edit., 1872); "Lectures on the Philosophy of Law," &c., 1873; "Burns in Drama, together with Saved Leaves," 1878; "Text-Book to Kant," 1881; "Of Philosophy in the Poets," "The Community of Property," 1885; "Thomas Carlyle's Counsels," 1886. In 1888 he was the first appointed Gifford Lecturer; and, as such, he delivered, in the two subsequent sessions, courses of lectures on Natural Theology to the University of Edinburgh. These lectures, under the title of "Philosophy and Theology," were published in 1890. In 1894 he published his "Darwinianism: Workmen and Work." He has also contributed to periodicals. He married Jane Hunter, youngest daughter of William Mair, Irvine, Ayrshire. Address: Laverock Bank, Trinity, Edinburgh.

STOCKHAUSEN, Julius, was born in Paris, July 22, 1825. His father was a harpist, and his mother a well-known singer. Intended at first for the priestly calling, he received his early education at the school of Gebwiller in Alsace, and subsequently attended the College in Strasburg. His mother's success at a farewell concert given in Basle, however, changed the course of his life, and in 1845 he went with his father to Paris, and there became the pupil of Hallé and Stamaty for piano, and of the famous Garcia for singing. In 1848 he sang the part of Elijah in Basel, and with such success that from that time he gave himself up entirely to singing. In 1849 he came to England, where he continued his studies with Garcia, and in 1851 sang in the 9th Symphony in London. From 1857 to 1859 he was engaged at the Opéra Comique in Paris, where he specially distinguished himself in the part of the Sénéchal in Boieldieu's "Jean de Paris." There he formed a close friendship with Ary Scheffer, the painter, in whose house, together with Berlioz, Duprez, Pauline Viardot, &c., and Saint-Saëns, German music was diligently cultivated. Concert tours

followed in 1859-62. At Leipzig and Cologne he sang Schumann's "Faust" for the first time. In 1869 he entered on the second period of his musical activity as leader of the Hamburg Philharmonic Society; and in 1874, as director of the famous Stern Choral Society in Berlin. Great as his success as a leader and teacher has been, Stockhausen's musical importance culminates in his achievements as a singer. His technique was perfect, and he had such mastery over his instrument that the purity of tone and the intellectual expression never had to be sacrificed the one to the other. The astonishing distinction of his pronunciation, as well as its beauty and intellectual significance, was due to a complete understanding of the nature of the elements of speech. Nowhere was the slightest trace to be detected of a mere seeking after effect, or a display of the voice. As Joachim plays the violin, and Clara Schumann the piano, so does Stockhausen sing and interpret the thoughts of the great masters. Seldom, if ever, in singing has the reproductive art been distinguished for such purity, elevation, and dignity. In 1878 began the third period of his artistic career, that of a teacher, first at the newly founded Hoch Conservatoire in Frankfurt-on-Main, which, however, he quitted in the following year. Since then he has been at the head of a singing school of his own, and has repeatedly, up to the most recent date, himself sung in concerts and oratorios. His "Method of Singing," a very important work, was published in 1884 in Leipzig, and translated into English in 1888.

STOCKTON, Francis Richard, American writer, was born at Philadelphia, April 5, 1834. He graduated from the Philadelphia Central High School in 1852, and began life as an engraver, but abandoned engraving to devote himself to journalism. His earliest writings were a number of fantastic tales for children contributed to the *Riverside Magazine* and other periodicals. He subsequently became connected with a daily paper in Philadelphia, and afterwards with *Hearth and Home*, New York. Later he joined the editorial staff of *Scribner's Monthly* (now the *Century*), and on the establishment of *St. Nicholas* became its assistant editor. His "Rudder Grange" papers, which appeared in *Scribner's*, were the first to attract general public attention, which he had successfully held by the novel character of the short stories for which he is chiefly celebrated. Among the best known of these are: "The Lady or the Tiger," "The Transferred Ghost," "The

Spectral Mortgage," "The Discourager of Hesitancy," "Negative Gravity," &c. He has also published novels entitled: "The Late Mrs. Null," "The Hundredth Man," "Ardis Claverden," and "The House of Martha," besides "The Casting away of Mrs. Lecks and Mrs. Aleshine," "The Dusanter," "The Merry Chanter," "The Great War Syndicate," "The Stories of the Three Burglars," and "The Squirrel Inn," which are novelettes; also "Pomona's Travels," 1894; "The Adventures of Captain Horn," 1895; "Captain Chap," 1896; "Mrs. Cliff's Yacht," 1896; "Stories of New Jersey," 1896; "The Great Stone of Sardis," 1897; "A Story-Teller's Pack," 1897; and "The Associate Hermits," 1898, &c. Address: The Holt, Convent Station, New Jersey, U.S.A.

STODDARD, Richard Henry, was born at Hingham, Mass., July 2, 1825. His family removed, in 1835, to New York, where he learned the trade of an iron-moulder. In 1848 he began to write for periodicals both in prose and verse. In 1853 he received an appointment in the New York Custom-House, which he held until 1870, at the same time continuing his literary labours. He has published: "Footprints," 1849; "Poems," 1852; "Adventures in Fairy-Land," 1853; "Songs of Summer," and "Town and Country," 1857; "Life of Alexander von Humboldt," 1859; "Loves and Heroines of the Poets," 1860; "The King's Bell," 1863; "The Story of Little Red Riding-Hood," 1864; "Under Green Leaves," and "Late English Poets," 1865; "Melodies and Madrigals, mostly from the Old English Poets," 1865; "The Children in the Wood," 1866; "Putnam, the Brave," 1869; "The Book of the East, and other Poems," 1871; new and enlarged editions of "Griswold's Poets of America," 1873; "Female Poets of America," 1874; "Poets and Poetry of England in the Nineteenth Century," 1875; "Memoir of Edgar Allan Poe," 1875; "Poems," 1880; "Henry Wadsworth Longfellow," 1882; "The Lion's Cub, and other Verses," 1892; and "Under the Evening Lamp," 1893. He also edited a series of dainty works, entitled Bric-a-Brac Series, 1874-75; and Sans Souci Series, and more recently a number of volumes relating to English literary history and memorabilia. In conjunction with others he published in 1877 a volume, entitled "Poets' Homes." He was, for a short time after leaving the Custom-House, City Librarian, and is also the literary editor of the *New York Mail and Express*.—His wife, **ELIZABETH D. (BARSTOW) STODDARD**, born at Mattapoiset, Massachusetts, in 1823, is also a contributor to periodicals, and has published

three novels: "The Morgesons," 1862; "Two Men," 1865; and "Temple House," 1867. These novels have recently been reprinted, "Two Men" and "Temple House" in 1888, and "The Morgesons" in 1889, and have met with great critical success.

STODDART, Andrew Ernest, cricketer, member of the Middlesex Eleven, was born in South Shields on March 11, 1863. He was privately educated, and did not enjoy the cricket training which is to be obtained at public schools and at the universities. Indeed, though he played, he was not remarkable at the game. As a young man, too, he devoted his best energies to football, and gained celebrity as a three-quarter before he was ever heard of as a cricketer. He first came into notice as a batsman at Hampstead, where he made some big scores for the Hampstead Club, and thus earned for himself a place in the Middlesex Eleven in the latter part of 1885. From that time, when he was playing football in Australia, to the present day, he has been one of the finest bats in England, a bat second only to Dr. W. G. Grace. His most brilliant English season was in 1893, when both he and William Gunn scored over 2000 runs each in first-class matches, a feat only previously equalled by Dr. W. G. Grace. In a match against Notts at Lord's that summer he scored 195, not out, and 124. This was his highest score in a first-class match up to that date, though when playing for Hampstead Club against the Stoics, in 1886, he made his record score, amounting to 485 in one innings. This was said to be the highest individual innings ever played. In 1894 Mr. Stoddart took an English eleven over to Australia, and captained them throughout with brilliant success. In a match against All Australia, played at Melbourne on New-Year's Day, 1895, he made 173. In the series of five matches between the English team and All Australia played on this tour, victory rested with the English team. During recent years he has again headed English teams in Australia. Address: 30 Lithos Road, N.W.

STOKES, Sir George Gabriel, Bart., M.A., F.R.S., D.C.L., LL.D., Sc.D., ex-M.P., born Aug. 13, 1819, at Skreen, co. Sligo, is the youngest son of the Rev. Gabriel Stokes, Rector of Skreen, and Elizabeth, daughter of the Rev. John Haughton, Rector of Kilrea. He was educated at Dr. Wall's school, in Dublin, at the Bristol College, and at Pembroke College, Cambridge, where he graduated B.A. in 1841, as Senior Wrangler, and was elected to a Fellowship. In 1849 he was appointed

to the Lucasian Professorship of Mathematics, and in 1852 was awarded the Rumford Medal by the Royal Society (of which he had been chosen a member a few months before), in recognition of his services to the cause of science by his discovery of the change in the refrangibility of light. An account of this discovery will be found in the *Philosophical Transactions* for 1852. Mr. Stokes was chosen one of the Secretaries to the Royal Society in 1854, and President in 1885, on the retirement of Prof. Huxley, and was President of the British Association at the meeting at Exeter in 1869, and again at the meeting at Bristol in 1898. He has contributed to the *Transactions* of several learned societies, and has delivered professional lectures at Cambridge, and at the Museum of Practical Geology in London. He is an honorary Fellow of several foreign academies, and has received the Prussian order Pour le Mérite. He has also received the honorary degree of D.C.L. or LL.D. from the Universities of Oxford, Edinburgh, Dublin, and Aberdeen. On the death of Mr. Beresford-Hope, in 1887, he was returned as one of the representatives in Parliament of Cambridge University, and sat till 1892. In 1889 he was created a Baronet of the United Kingdom; and in 1892 retired from the Presidency of the Royal Society, and was succeeded by Sir William Thomson, now Lord Kelvin. He has also retired from the Committee of Solar Physics. In 1891 he published "Natural Theology," being the Gifford Lectures for the year, and has at various times contributed short articles on religious topics to periodical literature. He has published many papers on mathematics and physics in scientific journals, especially in the *Phil. Transactions* of Cambridge and of the Royal Society. In 1887 he delivered the Burnett Lectures on Light, and published them. His jubilee as a Cambridge Professor was celebrated in 1899. In 1857 he married Mary, daughter of the Rev. Thomas Robinson, D.D., Director of Armagh Observatory. Addresses: Lensfield Cottage, Cambridge; and Athenaeum.

STOKES, Lieut.-General Sir John, K.C.B., second son of the Rev. John Stokes, vicar of Cobham, Kent, was born there on June 17, 1825, and received his education at the Proprietary School, Rochester, and at the Royal Military Academy, Woolwich. He entered the Royal Engineers as Second Lieutenant in 1843, and saw active service in the Kaffir War of 1846-47, and received the thanks of the Commander-in-Chief on two occasions, and again in 1850-51. In 1851 he was appointed to act as Deputy Assistant-

Quartermaster-General of the Field Force in Kaffraria, and assisted in organising 4000 levies among the Hottentots, and was engaged in all the principal operations, frequently receiving the thanks of General Sir Harry Smith, G.C.B., and his marked approbation in General Orders. He received the Cape Medal for these services. In 1855 he was appointed Chief Engineer to the Turkish Contingent, and raised and organised the Engineer Corps and Train of that force. In the winter of 1855-56 he was employed in fortifying Kertch, for which he obtained a brevet majority, the Turkish Medal, and the order of the Medjidieh, fourth class. At the close of the war he was appointed by the Secretary of State for War (Lord Panmure), his Commissioner for regulating all matters connected with the breaking-up of the Turkish Contingent—disposing of the horses, stores, &c. All his decisions were approved. In July 1856 he was appointed her Majesty's Commissioner for the Danube, under the Treaty of Paris. In 1861 he was nominated Vice-Consul in the Delta of the Danube, and in 1866 he signed the convention for regulating the navigation of the mouths of that river. In 1868, with full powers under the great seal, he signed the Danube Loan Convention with the plenipotentiaries of France, Austria, Hungary, Prussia, Italy, and Turkey. He did not quit the Danube until the great works for deepening the Sulina entrance had been completed, in December 1871. He was in command of the Royal Engineers in South Wales from May 1872 to Aug. 1873; British Commissioner on the International Tonnage Commission (Suez Canal Question) from Aug. to Dec. 1873; was employed on Suez Canal Affairs in London and in Egypt in 1874 and 1875; was in command of the Royal Engineers at Chatham from Jan. to Nov. 1875; was Commandant of the School of Military Engineering at Chatham from Nov. 1875 to March 1881; was attached to Mr. Cave's special mission to Egypt in Dec. 1875, when he received the special thanks of H.M. Government for the convention concluded with M. de Lesseps, under which the many vexatious questions then pending were amicably settled. In 1876 he was appointed, and has since remained, representative of Great Britain on the Board of the Suez Canal Company. In 1879-80 he was sent on a special international mission to Egypt to solve a difficulty about the Harbour dues at Alexandria. In 1880-81 he served on the Royal Commission on Tonnage measurement. From March 1881 to July 1886 he was Deputy Adjutant-General, Royal Engineers. He was promoted to a Lieut.-Colonelcy in 1867, and became a full

Colonel in 1873, and Major-General in 1885. In 1871 he was nominated a Companion of the Bath, and in 1877 a Knight Companion of the same order (Civil Division). He retired with the rank of Lieutenant-General in 1887. In that year he was appointed one of the Vice-Presidents of the Suez Canal. In December 1893 he was charged, as Vice-President, with the mission of delivering to his Highness the Khedive Abbas Helmi, on his first visit to the Canal, a friendly greeting from her Majesty the Queen. He married, in 1849, Henrietta Georgina de Villiers, second daughter of Charles Maynard of Grahams-town. Address: Spring House, Ewell, Surrey.

STOKES, Whitley, C.S.I., C.I.E., Hon. D.C.L. Oxon., Hon. LL.D. Dublin, Hon. LL.D. Edinburgh, Hon. Fellow Jesus College, Oxford, Hon. Member of the Deutsche Morgenländische Gesellschaft, Associé Étranger de l'Institut de France (Académie des Inscriptions et Belles Lettres), of the Inner Temple, Barrister-at-Law, was born in Dublin in 1830, and is the eldest son of the late Wm. Stokes, M.D., Regius Professor of Medicine in the Dublin University. He was educated at Trinity College, Dublin, practised at the Chancery Bar, went to India in 1862, was reporter to the High Court and acting administrator-general, Madras, from 1863 to 1864; served subsequently as Secretary to the Government of India in the Legislative Department, and law member of the Council of the Governor-General, May 1877 to May 1882; President of the Indian Law Commission, 1879; draughtsman of the present codes of criminal and civil procedure, and of the Acts dealing respectively with the transfer of property, trusts, easements, specific relief, and limitation. In 1868 he framed the scheme for collecting and cataloguing the Sanskrit MSS. preserved in India. Mr. Stokes is the author or editor of the following legal works: "A Treatise on the Liens of Legal Practitioners," London, 1860; "On Powers of Attorney" (Bythewood and Jarman's Conveyancing, 1st edit., vol. viii., part 1), London, 1861; "Hindu Law Books," Madras, 1865; "The Indian Succession Act, with a Commentary," Calcutta, 1865; "The Indian Companies Act," 1866, with notes; "The Older Statutes in Force in India," with notes, 1874; "The Unrepealed General Acts of the Governor-General of India," with Chronological Tables, &c., 3 vols., Calcutta, 1875 and 1876; "The Anglo-Indian Codes," vol. i., 1887, and vol. ii., 1888, Clarendon Press, Oxford, with two supplements, 1889, 1891. In 1892 he edited for Mr. Murray a selection of the

Indian speeches and minutes of the late Sir Henry Maine. He is also the author of the following philological works: "Irish Glosses," Dublin, 1860; "Three Irish Glossaries," London, 1862; "The Play of the Sacrament," a Middle-English Drama, with a Glossary, Berlin, 1862; "The Passion," a Middle-Cornish Poem, with a translation and notes, Berlin, 1862; "The Creation of the World," a Cornish Mystery, with a translation and notes, Berlin, 1863; "Three Middle-Irish Homilies," Calcutta, 1871; "Goidelica, Irish Glosses, Prose and Verse," London, 1872; "The Life of S. Meriasek," a Cornish Drama, with a translation and notes, London, 1872; "Middle-Breton Hours," Calcutta, 1876; "The Calendar of Oengus," *Transactions of the Royal Irish Academy*, Dublin, 1880; "Togail Troi," Calcutta, 1881; "Saltair na Rann," Oxford, 1883; "The Tripartite Life of Patrick," with other documents relating to that Saint (in the Roll Series of Chronicles and Memoirs of Great Britain and Ireland), London, 1887; "The Old Irish Glosses at Würzburg and Carlsruhe," London, 1887; "Lives of Saints from the Book of Lismore," Oxford, 1889; "Ur-keltischer Sprachschatz" (the second volume of Professor Fick's "Comparative Dictionary of the Indo-Germanic Languages"), Göttingen, 1894; "The Martyrology of Gorman," 1895; "The Annals of Tigernach," 1897; and "The Gaelic versions of Marco Polo and Maundeville and Fierabras," 1897-98. He married (1) Mary, daughter of Colonel Bazeley; and (2) Elizabeth, daughter of William Temple. Address: 15 Grenville Place, S.W., &c.

STONE, Marcus, R.A., painter of historical and genre subjects, son of the late Frank Stone, A.R.A., a distinguished artist (who died in 1859), was born in London, July 4, 1840. He received his education at home, and was never a student in any art school. He was elected an Associate of the Royal Academy, Jan. 24, 1877, and was made full R.A. on Jan. 7, 1887. Mr. Stone received one of the medals awarded to the English school at the Vienna, Philadelphia, Paris, Berlin, Chicago, and Melbourne International Exhibitions. As a very young man he illustrated the works of Dickens, and later, those of Anthony Trollope, and various numbers of the *Cornhill Magazine*. Mr. Stone has been much in Paris, and has visited Italy several times. He exhibited first in 1858, and achieved his earliest marked success in 1863 with "From Waterloo to Paris," a picture of Napoleon in a peasant's cottage. His principal pictures since then are: "Stealing the Keys," 1866; "Nell

Gwynne," 1867; "The Princess Elizabeth forced to attend Mass," 1869; Henry VIII. and Anne Boleyn," 1870; "The Royal Nursery," 1871; "Edward II. and Piers Gaveston," 1872; "Le Roi est Mort—Vive le Roi," 1873; "My Lady is a Widow and Childless," 1874; "Sain et Sauf," 1875; "An Appeal for Mercy," 1876; "A Sacrifice," 1877; "The Post Bag," and "The Time of Roses," 1878; "In the Shade," 1879; "Amour ou Patrie," 1880; "Married for Love," 1881; "Bad News," and "Il y en a toujours un autre," 1882 (purchased under the terms of the Chantrey Bequest by the Royal Academy); "An Offer of Marriage," and "Asleep," 1883; "A Gambler's Wife," 1885; "A Peacemaker," 1886; "In Love," 1888; "The First Love-letter," 1889; "A Passing Cloud," 1891; "Two's Company, Three's None," 1892; "A Honeymoon," 1893; "A Sailor's Sweetheart," 1895; portrait of Miss Messel, 1896; "Thoughts," 1897; "A Welcome Footstep," and "The Question," 1898; and "Reverie," 1899. Several of these have been engraved. Mr. Stone has painted some landscapes, and some water-colour pictures. He is a Member of Council of the Royal Academy. Address: 8 Melbury Road, Kensington Road, W.

STONEY, Bindon Blood, C.E., LL.D., F.R.S., engineer of the Dublin Port and Docks Board, was born in Ireland on June 13, 1828, and is the second son of the late George Stoney, and Anne, second daughter of Bindon Blood, D.L. He was educated at home and at Trinity College, Dublin, was, like his brother, astronomical assistant to Lord Rosse, from 1850 to 1852, and then for a few years an engineer on Spanish railways and on the Boyne Viaduct. He became assistant-engineer at the Port of Dublin in 1856, and rose to his present position in 1862. In 1871 he was President of the Inst. C.E. of Ireland, and was awarded the Telford Medal and Telford Premium of the Inst. C.E. in 1884. He was made F.R.S. in 1881. He is well known as the author of a work on the "Theory of Stresses in Girders, &c.," 1886, and has contributed several communications on engineering subjects to the scientific journals. He married a daughter of J. F. Walker, Q.C. Address: 14 Elgin Road, Dublin.

STONEY, George Johnstone, D.Sc., F.R.S., was born in Ireland on Feb. 15, 1826, and is the eldest son of the late George Stoney, of Oakley Park, King's County, and Anne, second daughter of Bindon Blood, D.L. He was educated at home, and at Trinity College, Dublin, where, in 1847, he was Second Senior Moderator in Mathematics

and Physics. In 1852 he obtained the Madden Prize (M.A. Dublin, Hon. D.Sc. Queen's University). In 1848 he was appointed astronomical assistant to the late Earl of Rosse, and in 1852 Professor of Natural Philosophy in the Queen's University, Ireland, to which body he was also secretary from 1857 to 1882, in which year the University ceased to exist. He became F.R.S. in 1861. He has contributed many papers, chiefly on physical and chemical subjects, to the *Philosophical Magazine*, the *British Association Reports*, &c. He married a daughter of R. J. Stoney, of Parsonstown. Address: 8 Upper Hornsey Rise, N.

STOREY, George Adolphus, A.R.A., second son of James Payne Storey and his wife Emily Fitch, born in London, Jan. 7, 1834, was educated in Paris by M. Joseph Morand, Professor in the Athénée Royale, his painting master being M. J. L. Dulong. He returned to London in 1850, and attended Mr. J. M. Leigh's School in Newman Street. He first exhibited in the Royal Academy in 1852, and became a student there in the following year. In 1858 he painted the "Widowed Bride," which was followed by "The Bride's Burial," "The Annunciation," "The Closed House," and others in the Pre-Raphaelite manner. In 1863 he was in Spain, painting portraits at Madrid. In the following year he first attracted the special notice of the public by his picture of "The Meeting of William Seymour with the Lady Arabella Stuart at the Court of James I., 1609." It was followed by "A Royal Challenge," 1865; "After You," 1867; "The Shy Pupil," 1868; "The Old Soldier," 1869; "The Duet," and "Only a Rabbit," 1870; "Rosy Cheeks," and "Lessons," 1871; "Little Buttercups," 1872; "Scandal" (considered his best picture), "Love in a Maze," and "Mistress Dorothy," 1873; "Grand-mamma's Christmas Visitors," "The Blue Girls of Canterbury," and "Little Swansdown," 1874; "Caught," 1875; "A Dancing Lesson," 1876; "The Old Pump-room, Bath," and "The Judgment of Paris," 1877; "Sweet Margery," 1878; "Lilies, Oleanders, and the Pink," 1879; "Follow my Leader," 1880; "The Ivory Door," 1881; "The Connoisseur," 1883; "As Good as Gold," 1885; "The Violinist," and "On Guard," 1886; "A Young Prodigal," and "Salome," 1887; "The Padre," "A Spanish Interior," and "Pan and Syrinx," 1888; "Godiva," 1889; "The Hungry Messenger," and "Paris and Oenone," 1890; "The Milliner's Bill," and "Mrs. and Miss Storey," 1891; "Miss Meta Reid," 1892; "Waiting for Her Partner," and "Miss Jenny," 1893; "First Practice,"

and "Double Dummy," 1894; "Reflection," "Coming Events," "The Rival Minstrels," and "A Summer Song," 1895; "A Love Stratagem," and "The Town Gossip," 1896; "Summer Days," "A Fair Musician," "Mischief," and "A Daughter of the Regiment," 1897; "In Evening Shade," and "Two Girls Bathing," 1898; and "Lessons of Love," 1899. Mr. Storey was elected an A.R.A. in April 1876. Address: 39 Broadhurst Gardens, South Hampstead, N.W.

STORMONTH-DARLING, Lord, Moir Tod Stormonth-Darling, M.A. Edinburgh, Q.C., LL.D., D.L., Senator of the College of Justice, and one of the Lords of Session in Scotland, was born in Edinburgh, Nov. 3, 1844, and is the youngest son of the late James Stormonth-Darling, of Lednathie, Writer to the Signet, and Elizabeth Moir, daughter of James Tod of Deanstoun. He was educated at Kelso Grammar School under the late Dr. Fergusson, and at the University of Edinburgh, where he graduated 1864, and he was called to the Scottish Bar 1867, and made a Q.C., 1888. He unsuccessfully contested the county of Banff at the general election of 1885. He was appointed Lord Rector's Assessor in the University of Edinburgh, 1887, and Solicitor-General for Scotland, November 1888, whereupon he was elected without opposition Member of Parliament for the Universities of Edinburgh and St. Andrews. This position he resigned on being, in October 1890, raised to the dignity of Senator of the College of Justice, into which office he was installed with the usual ceremonies. He took the title of Lord Stormonth-Darling, and was succeeded by Sir Charles Pearson as Solicitor-General for Scotland. He is LL.D. Edinburgh, and a D.L. He married, in 1892, Ethel Hay, younger daughter of the late Major W. Baird Young, R.A., of Ascreavie, Forfarshire. Residences: 10 Great Stuart Street, Edinburgh; and Balvarran, Pitlochry.

STORR, Francis, B.A., chief master of the modern side of Merchant Taylors' School, and editor of the *Journal of Education*, was born in Suffolk, Feb. 28, 1839, and is the eldest son of the late Rev. Francis Storr. He was educated at Harrow, and became a Scholar of Trinity College, Cambridge, where he took the Bell University Scholarship, and was sixth in the Classical Tripos of 1861. From 1864 to 1875 he was an Assistant-Master at Marlborough College, when he went to Merchant Taylors' School on their removal from Suffolk Lane to the Charterhouse, to preside over the Modern Side, then first formed. Mr. Storr is the mainstay of more educational

societies than any other teacher in London, among them being the College of Preceptors, the Teachers' Guild, the Modern Language Association, the Assistant-Masters' Association, and the Froebel Society. He is also on the Council of the Authors' Society. His works include editions of many English and foreign classics, such as Cowper's Task and Bacon's Essays. He is a well-known master of the art of translation. Many of his renderings are included in the three volumes of Prize Translations, reprinted from the *Journal of Education*. He has edited the "Reisebilder," Livy V., Richter's "Schulmeisterlein Wuz," and Lermontoff's "Demon." He has been a constant contributor to the "Encyclopædia Britannica," such articles as those on Academies, Georges Sand, and other foreign *littérateurs* showing his broad sympathies and fine critical sense. Addresses: 40 Mecklenburgh Square, W.C.; and Athenæum.

STORRS, Richard Salter, D.D., was born at Braintree, Massachusetts, Aug. 21, 1821. He graduated at Amherst College in 1839. He studied law, and afterwards theology at the Andover Seminary, where he graduated in 1845. He was pastor of a church at Brookline, Massachusetts, for one year, and then took charge of the Congregational Church of the Pilgrims at Brooklyn, New York, where he has since remained. Dr. Storrs is noted as an eloquent preacher and as a student of history. For many years he has been President of the Long Island Historical Society, and since 1887 President of the American Board for Foreign Missions. From 1848 to 1861 he was one of the editors of the *Independent*, a religious weekly. In addition to a number of orations and discourses he has published a "Report on the Revised Edition of the English Version of the Bible undertaken by the American Bible Society," "The Graham Lectures on the Wisdom, Power, and Goodness of God, as Manifested in the Constitution of the Human Soul," 1856; "Conditions of Success in Preaching without Notes," 1875; "The Early American Spirit and the Genesis of It," 1875; "The Declaration of Independence and the Effects of It," 1876; "The Divine Origin of Christianity indicated by its Historical Effects," 1884; "The Puritan Spirit," 1890; and a volume of Eight Lectures on "Bernard of Clairvaux," 1892.

STORY, Mrs. Julian (Emma Eames), was born at Shanghai, on Aug. 13, 1867, and is the daughter of a distinguished American lawyer, employed at the time of her birth in the International Courts at Shanghai. She spent the first five years of

her life at Bath, Maine. Her early musical studies were directed by her mother, herself a musician of talent. From 1883 to 1886 she developed her voice under Miss Munger, of Boston, and in the latter year entered the School of Mme. Marchesi, in Paris, under whose tuition and that of M. Pluque of the Opéra, she studied diligently for two years. Her first engagement was at the Opéra Comique in 1888, and in 1889 she made her début at the Grand Opéra in Gounod's "Romeo and Juliette," as *remplacante* to Mme Patti. She sang with the brothers De Reszke, and her success was immediate and overwhelming. She shortly afterwards still further added to her reputation by her impersonation of Marguerite. The late Sir Augustus Harris engaged her for the Covent Garden season of 1891. She made her first great English success in the part of Marguerite at Covent Garden on April 7, 1891, and at the close of the year won fresh laurels in America, in Mr. Grau's "ideal cast," which included the De Reszkes. She has won her chief successes as Marguerite and Juliette, but has also sung in most well-known operatic parts, is one of the glories of Covent Garden, and one of the world's most admired *prime donne*. She was decorated at Osborne in 1897 with the Jubilee Medal. In 1891 she married, in England, Mr. Julian Story, son of the well-known sculptor of that name, long a leader of the artistic English colony in Italy. Address: 7 Place des États Unis, Paris.

STORY, The Very Rev. Robert Herbert, D.D., LL.D., Principal of Glasgow University, Queen's Chaplain, was born at Roseneath Manse, Scotland, Jan. 28, 1835, being the son of the Rev. Robert Story, minister of that parish. He was educated in Edinburgh, Heidelberg, and St. Andrews; was appointed assistant-minister of St. Andrew's Church, Montreal, in February 1859; ordained there Sept. 20, 1859; presented by the Duke of Argyll in the same year to the parish of Roseneath on the death of his father; and received the degree of D.D. *honoris causa* from the University of Edinburgh, April 22, 1874. Besides contributions to current literature of a minor character, including many pamphlets and articles on the ecclesiastical affairs of Scotland, he has published "Life of the Rev. Robert Story, including Passages of Scottish Ecclesiastical History during the Second Quarter of the Present Century," 1862; "Christ the Consoler, being a Manual of Scriptures, Hymns, and Prayers," 1864; "Memoir and Remains of Robert Lee, D.D.," 2 vols., 1870; "William Carstares; a Character and Career of the Revolutionary Epoch, 1649-1715," 1874;

"Creed and Conduct: Sermons preached in Roseneath Church," 1878; "Health Haunts of the Riviera," 1880; "Nugæ Ecclesiasticæ," 1884. As one of the founders of the Scottish "Church Service Society," and convener of its "editorial committee," he has had charge of its publication of "Euchologion: a Book of Common Order," now in the 7th edition; and has assisted in the promotion of the Liturgical restoration in the Church of Scotland. He became editor of the *Scottish Church*, a monthly magazine, which was instituted in 1885 in the interest of the Church of Scotland; and which was merged in 1887 in the *Scots Magazine*, also for some time edited by Dr. Story. He was appointed in 1886 one of her Majesty's chaplains; was elected by the General Assembly to the office of Depute Clerk in succession to Dr. Milligan, and subsequently to that of Principal Clerk, an office he now holds. In the autumn of the same year he was appointed Professor of Ecclesiastical History in the University of Glasgow. He was appointed Principal of Glasgow University in July 1898 in succession to Principal Caird, and is succeeded in his chair by the Rev. James Cooper, D.D., of Glasgow. Dr. Story is editor of a work in 5 vols. on "The Church of Scotland, Past and Present," issued in 1890-91; and has published "The Apostolic Ministry in the Scottish Church," being the Baird Lecture for 1897. He is a member of the "Moderate" or Broad Church party. He was Moderator of the General Assembly of the Church of Scotland in 1894. He married, in 1863, Janet Leith, daughter of Captain Philip Manghan, the novelist. Address: 13 The College, Glasgow.

STORY-MASKELEYNE, Mervyn Herbert Nevil, M.A., F.R.S., J.P., late Waynflete Professor of Mineralogy at Oxford University, and from 1857 to 1880 Keeper of Minerals at the British Museum, was born in 1823, and is the son of A. M. Story-Maskeleyne, F.R.S., and grandson of Dr. Maskeleyne, Astronomer-Royal. He graduated at Wadham College, Oxford, of which he is an Hon. Fellow, taking a second class in Mathematics in 1845. He was Examiner in Natural Science from 1855 to 1856. In 1856 he was appointed Waynflete Professor of Mineralogy at Oxford, and held that post until 1895. He represented Cricklade in Parliament from 1880 to 1885, and North Wilts from 1885 to 1892, being latterly a Liberal Unionist. He has written "The Morphology of Crystals," "A Guide to the Collection of Minerals in the British Museum"; in 1881 the "Catalogue of Minerals in the British Museum," and a

privately printed catalogue of the intaglios and cameos known as the "Marlborough Gems." He married a daughter of J. Dillwyn-Llewellyn, F.R.S., in 1858. Addresses: Basset Down House, Swindon; and Athenæum.

STOUT, Hon. Sir Robert, K.C.M.G., late Premier of New Zealand, is the eldest son of Thomas Stout of Lerwick, in the Shetland Isles, merchant, was born at Lerwick in 1844, educated at Lerwick Parish School, and was trained for the profession of teacher, serving his pupil-teachership in the same school. Towards the end of 1863 he went to Otago, New Zealand, and shortly after his arrival he obtained an appointment in the Grammar School. He was engaged in the exercise of his profession as teacher until 1867, either in the Government Schools or in private grammar schools, when he commenced the study of law. He was admitted to the New Zealand Bar in 1871, and before long became one of its leading members, not only of Dunedin, but of the colony. In 1872 Mr. Stout obtained a seat in the Provincial Council of Otago. In 1875 he was elected to the House of Representatives, as member for Caversham. In 1876 he was elected as one of the members for Dunedin, and retained his seat until his retirement in June 1879. He was offered, and accepted, the office of Attorney-General and Minister of Lands in Sir George Grey's Ministry in 1878. From 1879 to 1884 Mr. Stout was not engaged in politics, but during that period, as before, he took part in the administration of various local bodies, *e.g.*, the Otago Land Board and others. In 1884 Mr. Stout was elected Member of the House of Representatives for Dunedin East, and on the downfall of the Atkinson Ministry, took office as Premier, Attorney-General, and Minister of Education, with Sir Julius Vogel as Colonial Treasurer. In 1886 Mr. Stout received the Order of K.C.M.G. At the general election in 1887 Sir R. Stout again stood for Dunedin East, but was defeated, chiefly, it was said, as a protest against the unpopular financial policy of the Ministry. He was offered seats in several parts of the Colony, but preferred to retire into private life, and has not since taken any active part in politics. He has been an industrious contributor to numerous journals and magazines, and the writer of a number of pamphlets. He has also delivered, and still delivers, lectures and addresses on political, social, and religious subjects. He is a Fellow of the New Zealand University, and also a member of the Council of the Otago University, and has always taken an active interest in education. At

the general election of 1890 he was again requested to enter active political life by several constituencies, but declined. When the late Mr. Balance was on his death-bed, he requested Sir Robert Stout to again enter political life. A vacancy occurring at Inangahua in the Nelson District at this time, Sir Robert Stout became a candidate, and was returned in June 1893 by a very large majority, about two to one over his opponent. At the general election in November 1893 he was a candidate for the City of Wellington, which returned three candidates, and he was returned at the top of the poll, obtaining no less than 6200 votes. He held this seat until 1898. He married, in 1876, Anna, daughter of J. Logan, Esq. Address: Watson Street, Wellington, N.Z.

STRACHEY, John St. Loe, joint-editor and part-proprietor of the *Spectator*, was born in 1860, and is the second son of Sir Edward Strachey, Bart., and Mary Isabella, second daughter of the late J. A. Symonds. He was educated at Balliol College, Oxford, and obtained a first class in Modern History in 1882. He was afterwards called to the Bar, and entered upon the career of journalism. In 1896-97 he edited the *Cornhill*. He is author of "From Grave to Gay." Addresses: 14 Cornwall Gardens, S.W., &c.; and Athenæum.

STRACHEY, Lieut.-General Sir Richard, R.E., G.C.S.I., F.R.S., LL.D., third son of Edward Strachey, B.C.S., and Julia, daughter of Major-General Kirkpatrick, Indian Army, was born July 24, 1817, at Sutton Court, Somersetshire. He was educated at a private school and at Addiscombe, and in 1836 entered the corps of Bombay Engineers, from which he was shortly transferred to the Bengal Engineers. He was employed on irrigation works in the N.W.P. from 1840, and appointed executive engineer on the Ganges Canal in 1843. He served in the Sutlej campaign with Sir Harry Smith's division; was in the battles of Aliwal and Sobraon, was mentioned in despatches and received a brevet majority. In 1857 he became Under Secretary to the Government in the Public Works Department; and in the same year was appointed Secretary to the Government of the Central Provinces, which, during the mutiny, were placed under Sir John Peter Grant as Lieut.-Governor. He became consulting engineer in the Railway Department in 1858; Secretary to the Government of India in the Public Works Department in 1862; and Inspector-General of Irrigation in 1866. He was appointed additional Member of the Governor-General's Council

in 1869. He took an active part in the organisation of the Public Works Department, and improvement of the System of Accounts, as well as in the formation of the Meteorological and Forest Departments, and originated the scheme for the decentralisation of the finances of India. He also originated the measures taken by the Government for carrying out railway and irrigation works on a large scale by means of borrowed capital. On leaving India, in 1871, he was appointed Inspector-General of railway materials and stores at the India Office. In 1875 he retired from the army on full pay as a Lieut.-General; and in the same year was appointed a Member of the Council of India; which post he vacated in 1877, in order to proceed to India on special duty, viz., to arrange for the purchase by the Government of the East Indian Railway. He is Chairman of this railway and of the Assam Bengal Railway Company. He became Officiating Financial Member of the Council of the Governor-General in 1878, and Officiating Military Member thereof in 1879; he also presided over the Famine Commission which was then formed. On his return to England, in 1879, he was reappointed to the Council of India, from which post he retired in 1889, and became Chairman of the East Indian Railway Company. He was appointed Grand Commander of the Star of India in 1897, and is in receipt of a good-service pension. In 1892 he was sent as a representative of the Indian Government to the Monetary Conference at Brussels, and became a Member of the Committee under Lord Herschel to report on the Currency of India. Lieut.-General Strachey was employed on a scientific survey of the Himalayan province of Kumaon in 1848 and 1849, and made valuable geological and botanical researches and collections. He was elected a Fellow of the Royal Society in 1854, and received one of the Royal Medals in 1897. He is Chairman of the Meteorological Council. He was President of the Royal Geographical Society from 1887 to 1889, and is an Honorary Member of the Geographical Societies of Berlin and Italy. He was appointed one of the Delegates of Great Britain at the International Prime Meridian Conference which was held at Washington in 1884. In 1892 he received the honorary degree of LL.D. at Cambridge. He has contributed papers to various scientific societies, and is the author of "Lectures on Geography," and, jointly with Sir John Strachey, of "The Finances and Public Works of India." He married, in 1859, Jane, daughter of Sir John Peter Grant, G.C.M.G., K.C.B., of Rothiemurchus, Scotland. Address: 69 Lancaster Gate, W.; and Athenæum.

STRAIGHT, Sir Douglas, LL.D., born in London on Oct. 22, 1844, is the son of Robert Marshall Straight, barrister and Clerk of the Central Criminal Court, by Janet, daughter of James Douglas, of Great Yarmouth. He was educated at Semple Grove, East Sheen, and Harrow, which latter school he had to leave owing to his father's sudden death. From 1863 to 1865 he wrote frequently for newspapers and magazines, and was well known as a writer for children under the pseudonym of "Sidney Daryl." He was called to the Bar in 1865, and soon obtained a considerable and varied practice at the Central Criminal Court, Surrey Sessions, and before many other courts in London and the county. He was a candidate for Shrewsbury in 1868, but withdrew before the poll; was elected for that place at a bye-election in 1870, and had to fight an election petition, but, after a four days' trial, was maintained in his seat by Mr. Baron Channell. He was Junior Counsel for the Treasury and Bankers' Association at the Central Criminal Court, in the former of which appointments he was, on his appointment as a Judge of the High Court at Allahabad in 1879, succeeded by his great friend, Mr. Montagu Williams. He sat on the Bench in India for thirteen years, retiring on pension in 1892, when he was knighted, and in the same year contested Stafford at the general election, but was defeated. While at Allahabad he took much interest in the formation of the University there, and was a Member of the Senate and Syndicate and President of the Law Faculty. In recognition of his services the Senate, on his departure from India, conferred on him the degree of LL.D. In 1893 he became sole editor of the *Pall Mall Magazine*, and in March 1895 succeeded Mr. H. Cokayne Cust as editor of the *Pall Mall Gazette*, which position he has since held. He married, in 1867, Jane Alice, daughter of William Bridgman, D.C.L., who died in June 1894, by whom he has one son, Douglas Marshall, in the North-West Provinces and Oudh Police Force. Address: 16A New Cavendish Street, Portland Place.

STRANG, William, painter and etcher, was born at Dumbarton on Feb. 13, 1859, and was educated at Dumbarton Academy, afterwards studying art at the Slade School. Since 1875 his work has been done in London. In 1897 he gained the first-class Gold Medal for Painting at the Dresden International Exhibition. Address: 17 St. George's Square, Regent's Park, N.W.

STRASBURGER, Edward, For. F.R.S., Polish botanist, was born at War-

saw, Feb. 1, 1844, and studied Natural Sciences at the Universities of Bonn and Jena, 1864-67, when he became a Professor of Botany at Warsaw, but two years later the introduction of the Russian language into Poland made him resign his chair for one at Jena, and in 1880 he was transferred to Bonn. He has chiefly concerned himself with studies on the formation of cells. His chief works are: "Zellbildung und Zellteilung," Jena, 1876; "Befruchtung und Zellteilung," Jena, 1878; "Ueber Bau und Wachsthum, der Zellhäute," Jena, 1882; "Ueber Befruchtungsvorgang bei den Phanerogamen," Jena, 1882; "Das Botanische Praktikum," Jena, 1884; and "Strifzüge an der Riviera." In 1891 he was elected a Fellow of the Royal Society; in 1887 the University of Göttingen made him an Honorary Doctor of Medicine, and in 1894 the University of Oxford conferred upon him the honorary degree of D.C.L. Address: Bonn.

STRATON, The Right Rev. Norman Dumenil John, Bishop of Sodor and Man, is the eldest surviving son of the late Rev. George W. Stratton, Rector of Aylestone, was born in 1840, and educated at Trinity College, Cambridge; B.A. 1862; M.A. 1869; Hon. D.D. 1892. From 1865 to 1866 he was Curate of Market Drayton; from 1866 to 1875, Vicar of Kirkby-Wharfe, Yorkshire; from 1875 to 1892, Vicar of Wakefield, and Rural Dean. He has also been Proctor for the Archdeaconry of Craven, Hon. Canon of Ripon, Hon. Canon of Wakefield, and from 1888 to 1892 Archdeacon of Huddersfield. He was consecrated Bishop of Sodor and Man in York Minster on March 25, 1892. At Wakefield the Bishop was one of the secretaries of the Wakefield Bishopric Fund together with Archdeacon Brooke, and was largely instrumental in bringing that movement to a successful issue after eleven years of hard work, at a cost of nearly £100,000. In the Isle of Man his Lordship has been instrumental in founding a Dean and Chapter of Man, and in inaugurating a successful movement for assisting the poorer clergy of the Diocese. In 1873 he married Emily, daughter of J. R. Pease, of Hull. Addresses: 1 Whitehall Gardens, S.W.; and Bishopscourt, Isle of Man.

STRAUSS, Edward, Austrian musician, is the third son of Johann Strauss, the inventor of the waltz (1804-49), and the younger brother of the late Johann Strauss, who died in June 1899. He was born in 1835, and educated at Thérèse College, being intended for the Diplomatic Service, but heredity was too strong for

him, and he took to music. He has his own orchestra in Vienna, and conducts the Imperial Orchestra at the great Court functions. He visited England during the Inventions Exhibition of 1885, and the Imperial Institute in 1897. But his mannerisms were somewhat too pronounced to suit the taste of the British public. He has composed a great deal of dance music, but nothing to compare with his brother's famous works.

STREET, George Slythe, author, was born at Wimbledom on July 18, 1867, and is the son of the late Samuel Street. He was educated at Temple Grove, East Sheen, at Charterhouse, and at Exeter College, Oxford, where he was in the first class in Mods., 1888, and second class in Lit. Hum. in 1890. He is author of "Miniatures and Moods," 1893; "The Autobiography of a Boy," perhaps his best-known book, 1894; "Episodes," and an edition of Congreve's Comedies, 1895; "Quales Ego," 1896; "The Wise and the Wayward," 1897; "Some Notes of a Struggling Genius," 1898, and has besides contributed stories and critical articles to the *Pall Mall Gazette*, the *New Review*, *Cosmopolis*, &c. Address: 3 St. James's Place, St. James's, S.W.

STRINDBERG, Auguste, Swedish novelist and dramatist, was born at Stockholm in 1849, and having been educated at the public school of his native town he was about to enter the University, when poverty compelled him to earn a livelihood instead, and he was by turns private tutor, theatrical super, telegraphist, and librarian, and even endeavoured to try painting and photography. Finally he resolved to devote himself wholly to literature, and became a successful exponent of poetry, journalism, social satire, romance, and drama. In all of these, however, the bitterness of his early struggles and miseries exhibit themselves in the form of pessimism. This is especially seen in his hatred of women, which has been caused by domestic disappointment. After his first success he left Stockholm, and travelled through Denmark, Germany (where he met and became a disciple of Nietzsche), France, Switzerland, and Italy; everywhere preparing or writing works inspired by the scenes he was observing. He returned to his native country in 1885 to answer an attack upon the supposed atheism displayed in his novel "Marie," but such was his popularity that the accusation became, for him, a triumph. Among the better-known works of Strindberg are: "Nuits d'un Somnambule," 1885, a set of poems; "La Chambre Rouge," 1879, a novel satirising Swedish

Society, so called from the "red room" of a café, which forms the framework of the story; "Le Nouveau Règne," 1882; "Le Fils de la Servante," 1886, with the subtitle of "A Madman's Ancestors"; and "Au Bord de la Mer," 1892, which is regarded as his masterpiece of description and analysis. It is, however, to his dramatic works that Strindberg owes his European reputation, the keynote to them being the notion that the love between the sexes is a fight. The first, "Mademoiselle Julie," a tragedy in prose, was introduced by a preface enunciating his principles, which has been compared to Hugo's preface to "Cromwell," 1888. His other plays are: "Camarades," 1888; "Père," 1888; and "Créanciers," 1889. Some of his plays have been seen in Paris at the Théâtre Libre and in London under the auspices of the Independent Theatre Society.

STRONG, The Right Hon. Sir Samuel Henry, Chief-Justice of Canada, was born at Poole, England, Aug. 13, 1825. He accompanied his father to Canada in 1836, and was educated at the High School, Quebec, and under private tutors. He studied law, and was called to the Bar in 1849, entering on the practice of his profession in Toronto. In 1856 he was appointed on the Commission for the Consolidation of the Statutes of Canada and Upper Canada, and in 1863 he was created a Q.C. On Dec. 27, 1869, he was appointed one of the Vice-Chancellors of the Court of Chancery. In 1874 he was called to the Court of Error and Appeal of Ontario, and the following year was chosen by Lord Dufferin to become a Puisne Judge in the newly constituted Supreme Court of Canada. He became Chief-Justice on the death of Sir W. J. Ritchie, Dec. 13, 1892, and received the honour of knighthood, June 1893. He was appointed a Member of the Judicial Committee of H.M.'s Most Honourable Privy Council in January 1897, and proceeding to England was sworn as a Privy Councillor before the Queen at a Council held at Windsor Castle, July 14, 1897. Address: Ottawa.

STROSSMAYER, The Right Rev. Joseph George, D.D., a distinguished prelate of the Roman Church, born at Essak, in Slavonia, Feb. 4, 1815, received his education in the Universities of Vienna and Padua, and on May 20, 1850, was consecrated Bishop of Bosnia and Sirmio. During the sittings of the Œcumenical Council of the Vatican in 1869-70, he was constantly represented as an opponent of the dogma of the infallibility of the Pope. However when certain

journals reproduced the text of a speech alleged to have been delivered at the Council by Mgr. Strossmayer, the Bishop addressed to the *Français* a letter, in which he absolutely denied having made any such discourse. In September 1888 he congratulated the Slav Committee of Kiev on the conversion of the Russians to Christianity, was remonstrated with by the Emperor, and finally retired from his See in 1891, in order to put an end to the difficulties of the situation. He has published some important Slavonic works, notably "Monumenta Slavorum Meridionalium historiam illustrantia," Rome, 1863.

STUART, The Right Rev. Edward Craig, D.D., was born in 1827, and is the son of Alexander Stuart, of Edinburgh. He was educated at Trinity College, Dublin, where he obtained honours in Theology, and was ordained in 1850. He has held three important positions: firstly, as a missionary in India, from 1851 to 1872; secondly, as Bishop of Waiapu, New Zealand, from 1877 to 1893; and thirdly, as missionary in Persia since 1894. Address: Julfa, Ispahan, Persia.

STUART, Professor James, M.A., LL.D., and M.P., born at Balgonie Works, Markinch, Fifeshire (of which works his father, Joseph Gordon Stuart, was owner), Jan. 2, 1843, was educated at home, afterwards at St. Andrews University, and then at Trinity College, Cambridge. He became Fellow of Trinity College in 1867, Assistant-Tutor of that College in 1868, first Professor of Mechanism and Applied Mechanics in the University of Cambridge, Nov. 17, 1875. This post he resigned in 1890. He graduated as third Wrangler in 1866; M.A. of the University of Cambridge in 1869; LL.D. of the University of St. Andrews in 1876. Professor Stuart has taken a leading part in popular education. He inaugurated the system of courses of educational lectures of a University standard in connection with Cambridge and Oxford, in Nottingham, Sheffield, and many other towns, on the system indicated by his experiments, and recommended by him to the universities. He has been instrumental in the foundation and establishment of several local colleges; has taken special interest in women's education, having originated the Ladies' Lectures in 1867, and the Cambridge Higher Examination for Women in 1868. He has been a consistent friend of all movements for the amelioration of the condition of women, and honorary Secretary of "La Fédération Britannique Continentale et Générale pour le relèvement de la Moralité publique." He has taken an active

part in the organisation of University education, and especially in its adaptation to the wants of the engineering profession, having founded extensive workshops and drawing-offices in the University of Cambridge. He is an Associate Member of the Institute of Civil Engineers, and has been representative of the University and the governing bodies of the Colleges at Bristol, Nottingham, Liverpool, Sheffield, and Aberystwith. He is the author of "Six Lectures to the Workmen of Crewe," "A Chapter of Science," "Science and Religion, a Lecture," "The New Abolitionists," "A Letter on University Extension, addressed to the University of Cambridge," and a number of articles, speeches, and pamphlets on educational, scientific, and social questions. Professor Stuart contested Cambridge University in 1882 unsuccessfully. On the death of Professor Fawcett in November 1884, he was unanimously chosen by the Liberal party of Hackney as his successor, and was returned to Parliament by a majority of 6000. At the general election of 1885, Hackney being divided into seven districts, Professor Stuart stood for the Hoxton Division of Shoreditch, and was elected by a majority of 1037. He was again returned (as a Gladstone Liberal) in 1886, and in 1892 and 1895 was re-elected. Professor Stuart has been editor of the *Morning Leader*, and was one of the founders of the *Star*. In the recent County Council election, March 1898, he was returned second on the poll for Central Hackney with 3125 votes to Mr. McKinnon Wood's 3162. In the same year he was elected Lord Rector of St. Andrews University. He married in 1890 Laura Elizabeth, daughter of J. J. Colman, M.P., Norwich. Address: 24 Grosvenor Road, S.W.

STUART-WORTLEY, The Right Hon. Charles B., Q.C., M.P., is the son of the Right Hon. James Stuart-Wortley, Q.C., and grandson of the 1st Baron Wharnccliffe, and was born on Sept. 15, 1851, at Eserick Park, York. He was educated at Rugby, and Balliol College, Oxford, where he took his M.A. in 1879, and was called to the Bar at the Inner Temple in 1876. He practised on the North-Eastern Circuit from 1876 to 1885, and was appointed a Q.C. in 1892. Mr. Stuart-Wortley was elected as Conservative member for the Hallam Division of Sheffield in 1885, and still represents that constituency. He was Parliamentary Under-Secretary for the Home Department in 1885, and again from 1886 to 1892. He was appointed one of the Deputy Chairmen of Committees of the House, and was added to the Chairman's Panel for Stand-

ing Committees in 1895, and in the same year he acted as a Church Estates Commissioner. In 1890 he went as principal delegate of the British Government to the Madrid International Conference on the Protection of Industrial Property, and the Repression of False Trade Descriptions; and again, in 1898, he attended, in the same capacity, the Brussels Conference on the Industrial Property Convention. He is a Director of the Great Central Railway. Mr. Stuart-Wortley has been twice married, viz. (1) to Beatrice, daughter of Thomas Adolphus Trollope, in 1880 (she died in 1881); and (2) to Alice, daughter of the late Sir John E. Millais, Bart., P.R.A., in 1886. Address: 7 Cheyne Walk, Chelsea, S.W.

STUBBS, The Very Rev. Charles William, D.D., Dean of Ely, was born in Liverpool, Sept. 3, 1845, and is descended from the same Yorkshire stock as Bishop Stubbs, of Oxford. He received his earlier education at a Quaker school at Southport, and was afterwards sent to the school of the Liverpool Royal Institution, when he was contemporary with the present Bishop of Ripon. In 1864 he proceeded to Sidney Sussex College, Cambridge (Divinity Prizeman and Scholar of his College). He graduated in 1868, having obtained honours in the mathematical tripos. He subsequently won the Le Bas University Prize for an essay on "International Morality," which was published by Messrs. Macmillan. Ordained in 1868, he held the curacy of St. Mary's, Sheffield, from that year till 1871, during which period he became intimately acquainted with the labour question among the Sheffield grinders. In 1871 he became Vicar of Granborough, Bucks, on the presentation of the late Sir Harry Verney, and took a prominent part in North Bucks in the agricultural labourers' agitation (1872), of which Joseph Arch was the leader. Whilst at Granborough, his church, on Sunday evenings, became a rallying-ground for the labourers who crowded to hear him; and he published a volume of sermons and addresses on "Village Politics." He held the appointment of Commissioner of Education to the Government of Siam (1878-81), and published a report on the training of Siamese students. In 1881 he was preferred to the Vicarage of Stokenham, Devon, by Mr. Gladstone. In the same year he was Select Preacher before the University of Cambridge, and in 1883 he occupied the pulpit of St. Mary's at Oxford. These University sermons are published under the title of "Christ and Democracy." In 1888 Canon Warr preferred him to the Rectory of Wavertree. At St. Bridget's, the parish church of

Wavertree, he has carried on an active Liberal and Broad Church propaganda, throwing open his pulpit to many leading Liberal preachers. In May 1894 Dr. Stubbs was appointed Dean of Ely, and the honorary degree of D.D. was conferred upon him by Cambridge University. He was appointed Lady Margaret Preacher at Cambridge, 1896-97, and is Select Preacher at Oxford for 1898-99. Dr. Stubbs is author of "Christ and Democracy" (his University sermons for 1883), "The Conscience, and other Poems," "The Land and the Labourers," "The Church in the Villages," "God's Englishmen" (sermons on the Prophets and Kings of England), "For Christ and City," "God and the People, selections from Mazzini," "Christ and Economics," "St. Nicholas at the Port, a Vision of the City," "Historical Memorials of Ely Cathedral," "Christ and Socialism," "A Creed for Christian Socialists, with Expositions," 1896; "Historical Memorials of Ely Cathedral," 1897, and Handbook to the same, and "Charles Kingsley and the Christian Social Movement," 1898. Dr. Stubbs has also taken great interest in secondary education in Liverpool, and was one of the founders of the Greenbank School in Sefton Park, and President of the Royal Institution, Liverpool. He is married to Harriett, third daughter of William Turner, of Liverpool. Address: The Deanery, Ely.

STUBBS, The Right Rev. William, D.D., and Hon. D.C.L. of Oxford, Bishop of Oxford, eldest son of William Morley Stubbs, solicitor, of Knaresborough, and Mary Ann, daughter of William Henlock of the same town, born at Knaresborough, June 21, 1825, was educated at the Grammar School, Ripon, and at Christ Church, Oxford, where he took a first class in Lit. Hum. and a third in mathematics, in Easter Term, 1848, and was immediately elected to a Fellowship at Trinity College. He was ordained in 1848, became vicar of Navestock, Essex, in 1850, and Librarian to Archbishop Longley, at Lambeth, in 1862. He was a Diocesan Inspector of Schools in the Diocese of Rochester from 1860 till 1866, when he was appointed Regius Professor of Modern History at Oxford. In 1867 he was elected Fellow of Oriel College, Oxford, of which he became an honorary Fellow in 1888; in 1876 an honorary Fellow of Balliol; and in 1878 an honorary student of Christ Church. On Nov. 20, 1868, he was elected a Curator of the Bodleian Library; the same year, became a delegate of the Clarendon Press; and in 1872 was chosen a member of the Hebdomadal Council. In 1875 he was presented to the Rectory of Cholderton, Wilts. In 1879 he was ap-

pointed Canon Residentiary of St. Paul's; and in consequence resigned the rectory of Cholderton. In 1884 he was consecrated on St. Mark's Day to the See of Chester, from which See he was translated to Oxford, being confirmed Jan. 15, 1889. He published in 1850 "Hymnale secundum usum Sarum"; in 1858, "Registrum Sacrum Anglicum"; in 1860, "Tractatus de Sancta Cruce de Waltham"; edited in 1863, "Mosheim's Institutes of Church History"; in 1864 and 1865, "Chronicles and Memorials of Richard I.," published by the Master of the Rolls; in 1867, the "Chronicle" ascribed to Benedict of Peterborough, in the same series; in 1868-71, the "Chronicle of Roger Hoveden"; in 1872-73, the "Memorial of Walter of Coventry"; in 1874, "Memorials of St. Dunstan"; and in 1876, the "Works of Ralph de Diceto"; and several other books issued by the Master of the Rolls; in 1870, "Select Charters and other Illustrations of English Constitutional History, from the Earliest Period to the Reign of Edward I.," and published in 1874, 1875, and 1878, "The Constitutional History of England, in its Origin and Development," 3 vols. Dr. Stubbs is honorary LL.D. of Cambridge, Edinburgh, and Dublin, and doctor *in utroque jure* of Heidelberg; Chancellor of the Order of the Garter; a Knight of the Royal Prussian Order "pour le Merite"; he is [the President of the Surtees Society, and the Pipe Roll Society; a member of the Historical MSS. Commission; a member of the Court of the Victoria University, and a Vice-President of the Yorkshire Archaeological Society; an honorary member of the Royal Irish Academy and of the Historical Society of Massachusetts, a foreign member of the Bavarian Academy, a corresponding member of the Prussian Academy, of the Royal Danish Academy, of the American Academy of Arts, of the Academy of Moral and Political Sciences of the Institute of France, of the Royal Society of Sciences at Göttingen, and of the Imperial University of Vladimir at Kieff. In 1859 he married Catherine, daughter of John Dellar, of Navestock. Addresses: Cuddesdon Palace, Wheatley, Oxford; and Athenæum.

SUDELEY, Lord, The Right Hon. Charles Douglas Richard Hanbury-Tracy, F.R.S., D.L., J.P., was born at Brighton on July 3, 1840, and is the second son of the 2nd Baron, and Emma, daughter of George H. D. Pennant, of Penrhyn Castle. He succeeded his brother, the 3rd Baron, in 1877. He entered the navy in 1854, was promoted to Lieutenant's rank in 1860, served in the Baltic and China, and was gunnery Lieutenant in the

Mediterranean in 1862. He retired from the navy in 1863, and was elected for the Montgomery District, which he represented until 1877. He was called to the Bar at the Inner Temple in 1866, was Lord-in-Waiting from 1880 to 1885, and was Captain of the Hon. Corps of Gentlemen-at-Arms in 1886 (February to July). He was sworn of the Privy Council in 1886, and was made F.R.S. in March 1888. He married, in 1868, Ada Maria Katherine, daughter of the Hon. Fredk. J. Tollemache, and niece of the 8th Earl of Dysart. Address: Ormeley Lodge, Ham Common, Surrey.

SUDERMANN, Hermann, German poet and novelist, was born at Matzicken, East Prussia, Sept. 30, 1857. He studied at Königsberg and Berlin, and in 1881 became the editor of the *Deutsches Reichsblatt*, but subsequently gave himself up purely to literary work. He was made famous by his realistic drama, "Ehre," 1888. His chief novels are: "Im Zwiellicht," 1885; "Frau Sorge," 1886, which has been translated into English with the title of "Dame Care"; "Geschwister," 1887; and "Der Katzensteg," 1889. This last has been translated into English in 1898, under the title of "Regina, or the Sins of the Fathers." It is evidently generated by a desire to revolt against the petty parochialism of his native East Prussia, and it is a Teutonic compound of Rousseau and Maupassant. His tragedy, "Sodoms Ende," 1890, was forbidden to be represented by the censor, but "Heimat," 1892, better known as "Magda," has been translated into most European languages, and its heroine has been played by Mme. Bernhardt, and Mrs. Patrick Campbell. A comedy called "Die Schmetterlings-schlacht" was composed in 1896; "Das Glück im Winkel" and "Morituri" and other dramas appeared in the same year. He is the representative master of realism in Germany. Address: 13 Tauenzienstrasse, Berlin.

SUESS, Edward, Foreign F.R.S., Austrian geologist, was born in London, Aug. 20, 1831. He was educated at the Universities of Prague and Vienna, and in 1852 was appointed to a post in the Imperial Mineralogical Museum. In 1857 he was appointed Professor of Geology at the University of Vienna, and ten years later a Member of the Academy of Sciences. In 1869 he was elected a member of the Diet of Lower Austria, and occupied himself especially with educational questions, and published many pamphlets on Elementary Instruction. In 1889 he was elected a Corresponding

Member of the Institute of France. His chief works have to do with the Geology of Italy, and the classification of Molluscan Brachiopods. Other works by him are "Der Boden der Stadt Wien," 1862; "Die Entstehung der Alpen," 1875; "Die Zukunft des Goldes," 1877; and "Das Antlitz der Erde," 1885. Address: Geologisches Museum, Vienna.

SUFFIELD, Lord, The Right Hon. Charles Harbord, Bart., K.C.B., was born at Gunton Park, on Jan. 2, 1830, and is the son of the 3rd Baron. He succeeded his half-brother, the 4th Baron, in 1853. He was educated at home by tutors, and in 1847 joined the 7th (Queen's Own) Hussars. He retired in 1853, and is now Hon. Colonel of the 3rd Battalion of the Norfolk Regiment, having commanded the Norfolk Militia Artillery from 1866 to 1892, when he resigned. He was Lord-in-Waiting to the Queen from 1868 to 1872, was Chief of the Staff of the Prince of Wales during H.R.H.'s visit to India in 1875-76, was appointed Master of the Buckhounds in 1886, and is Militia A.D.C. to the Queen. In 1876 he was created K.C.B. (Civil). Since 1872 he has been Lord of the Bedchamber to the Prince of Wales, and is his Superintendent of Stables. He was sworn of the Privy Council in 1886. He is a keen sportsman, and has for many years been Master of the Norfolk Foxhounds and Staghouounds. In 1854 he married Cecilia Annetta, daughter of the late Henry Baring, and niece of the 1st Lord Ashburton. Addresses: 4 Manchester Square, W.; and Gunton Park, Norwich.

SULLIVAN, Sir Arthur Seymour, Mus.D., was born in London, May 13, 1842. His father, Thomas Sullivan, was principal Professor of Kneller Hall, the training school for British military bands. He received his first systematic instruction in music at the Chapel Royal, St. James's, under the Rev. Thomas Helmore, and he was still a chorister when, at the age of fourteen, he gained, the first time it was competed for, the Mendelssohn Scholarship. After two years' study under Mr. (afterwards Sir Sterndale) Bennett, and Mr. (afterwards Sir John) Goss, he studied at Leipzig for three years at the Conservatorium. Upon his return to England in 1861 he brought with him his music to Shakespeare's "Tempest," which was performed for the first time at the Crystal Palace. His next work was the cantata "Kenilworth," produced at the Birmingham Festival in 1864. This was followed by the Symphony in E (Crystal Palace), 1865; overture "In Memoriam" (Norwich), 1866; overture "Marmion" (Phil-

harmonic), 1867; oratorio, "The Prodigal Son" (Hereford), 1868; overture "Di Ballo" (Birmingham), 1869; "On Shore and Sea" (International Exhibition), 1871; Festival "Te Deum," to commemorate the recovery of the Prince of Wales (Crystal Palace), 1872; oratorio, "The Light of the World" (Birmingham), 1873; and the sacred musical drama, "The Martyr of Antioch" (Leeds), 1880; and "The Golden Legend," a dramatic cantata (Leeds), 1886. Sir Arthur Sullivan has produced also the following popular and successful operas and operettas: "Cox and Box," 1866; "Contrabandista," 1867; "Thespis," 1872; "Trial by Jury," 1875; "The Sorcerer," 1877; "H.M.S. *Pinafore*," 1878; "The Pirates of Penzance," 1879; "Patience," 1881; "Iolanthe," 1882; "Princess Ida," 1884; "The Mikado," 1885; "Ruddigore," 1887; "The Yeomen of the Guard," 1888; "The Gondoliers," 1889; "Haddon Hall," 1892; "Utopia," 1893; "The Chieftain," December 1894; and "The Grand Duke," 1896. He was also musical editor of "Church Hymns," for which he composed several of the best-known tunes. He has written also the incidental music to the following of Shakespeare's plays: "The Tempest," "The Merry Wives of Windsor," "The Merchant of Venice," and "Macbeth." The honorary degree of Doctor of Music was conferred upon him by the University of Cambridge in 1876, and a like honour by the University of Oxford in 1879. Sir Arthur Sullivan was Principal of the National Training School (now the Royal College) of Music from its foundation in 1876 to 1881. Sir Arthur conducted the Leeds Triennial Musical Festival in 1880, 1883, 1886, 1889, 1892, and 1895, and in 1885 and 1886 he conducted the Philharmonic Concerts in London. In 1888 he was President of the Birmingham and Midland Institution, and is a member of a large number of foreign learned and musical societies. He was British Commissioner for music at the Paris Exhibition in 1878, when he was made a Chevalier of the Legion of Honour. He is also a Knight of the Order of the House of Coburg, and received from H.M. the Sultan of Turkey the Order of the Medjidieh, 1888. He was knighted by the Queen at Windsor, May 24, 1883. On the occasion of the Queen's Jubilee he was honoured by the Royal Victorian Order. Addresses: 1 Queen's Mansions, S.W.; River House, Walton; and Athenæum.

SULLY, James, M.A., LL.D., born at Bridgewater, Somersetshire, on March 3, 1842, eldest son of J. W. Sully, merchant and colliery proprietor, was educated in the Independent College, Taunton, the

Regent's Park College (one of the affiliated colleges of the University of London), and the University of Göttingen. He is M.A. and Gold Medallist of the University of London, where he graduated in 1866 and 1868. He is also Hon. LL.D. of the University of St. Andrews. He took to a literary career in 1871, beginning as a contributor to the *Saturday*, *Fortnightly*, and *Westminster Reviews*. He is the author of "Sensation and Intuition: Studies in Psychology and Æsthetics," 1874; "Pessimism: a History and a Criticism," 1877; "Illusions," International Scientific Series, 1883; "The Outlines of Psychology," 1884; "The Teachers' Handbook of Psychology," 1886; "The Human Mind," 1892; "Studies of Childhood," 1895; and "Children's Ways," 1897. He is also the writer of articles on "Æsthetics," "Dreams," and "Evolution," in the ninth edition of the "Encyclopædia Britannica." These writings, as their titles suggest, are mainly occupied with the modern science of Psychology, as developed more especially in Germany, in connection with the physiology of the brain and nervous system. At the same time they have a distinctly practical bearing, discussing such questions of the day as the Aims of Art, the Value of Human Life and of Social Progress, and the Principles of Education. Mr. Sully has served as Examiner in Philosophy (Mental and Moral Science) to his own University, and has held a similar office in the University of Cambridge and the Victoria University. He has also held for several years the post of Lecturer on the Theory of Education at the College of Preceptors, Bloomsbury Square. In 1892 he was appointed to the Grote Chair of the Philosophy of Mind and Logic at University College, London. Permanent address: 10 Park Hill, Ealing, W.

SULLY-PRUDHOMME, René *Françoise Armand*, French poet, was born in Paris, March 16, 1839, and educated at the Lycée Bonaparte. He afterwards became a lawyer's assistant, and published his first volume, "Stances et Poèmes," in 1865. It attracted considerable attention, and the poem "Le Vase Fêlé" was pronounced a masterpiece of its kind. M. Sully-Prudhomme has since published several volumes of poems, mostly of a philosophical tendency: "Les Épreuves," 1866; "Les Solitudes," 1869; "Les Destinées," 1872; "Les Vaines Tendresses," 1875; "La Justice," 1878. He has also published (1869) a very remarkable translation of the "De Natura Rerum" of Lucretius. One of his latest works is "Réflexions sur l'Art des Vers," 1892. A general edition of his works, in 3 vols., appeared in 1883-84. In 1881 he was

elected a member of the Académie Française in succession to Duvergier de Hauranne. Other works of his are "Le Bonheur," 1888, and "Étude sur Pascal." He is a frequent contributor to the *Revue des Deux Mondes*, and his finest work is noted for its subtlety and serene melancholy. Address: 82 Faubourg St. Honoré.

SUMNER, The Right Rev. George Henry, D.D., Bishop Suffragan of Guildford, youngest son of the Right Rev. Charles Richard Sumner, Bishop of Winchester, 1827-68, and nephew of Archbishop Sumner, was born at Windsor, July 3, 1824, and was educated at Eton and Balliol College, Oxford, whence he graduated in 1845, taking his M.A. in 1848. In 1847 he was ordained Deacon, and in 1848 Priest. His title for Orders was that of Crawley, near Winchester, and in 1850 he was preferred to the Rectory of Old Alresford, which he held until 1885, for the last twenty-seven years of the time acting as Rural Dean, and as Chaplain to the Archbishop of Canterbury and Bishop of Winchester, during their lifetime. In the year 1866 he was elected Proctor in the Lower House of the Convocation of Canterbury for the Archdeanery of Winchester, which office he held until his appointment as Archdeacon of Winchester, in 1884, gave him an official seat in Convocation. A year after he was elected Prolocutor of the Lower House, in succession to Lord Alwyne Compton, appointed to the Bishopric of Ely, on which occasion he had the degree of D.D. conferred upon him by decree of Convocation of the University of Oxford. The Bishop of Winchester also conferred upon him a Canonry of Winchester. He resigned the Rectory of Old Alresford, and entered upon the canonical residence at Winchester. In the year 1888 he was appointed by the Crown Bishop Suffragan of Guildford, which office he now holds. In the year 1869 the Bishop edited a volume of essays, published under the title of "Principles at Stake," which passed through two editions; and in 1881 he edited "Our Holiday in the East," by Mr. George Sumner, which also passed through two editions. In 1876 the Bishop published a "Life of Charles Richard Sumner, D.D., Bishop of Winchester"; and in 1890 a "Churchwarden's Manual," showing their rights, privileges, and duties, which is now in its third edition. In 1848 he was married to Mary Elizabeth, younger daughter of Thomas Heywood, Esq., of Hope End, Ledbury. Address: The Close, Winchester; and Athenæum.

SUTHERLAND, Duke of, Cromartie Sutherland-Leveson-Gower, J.P., was born on July 20, 1851, and is the

son of the 3rd Duke, whom he succeeded in 1892, and Anne, only child of John Hay-Mackenzie, who was created Countess of Cromartie. He entered the 2nd Life Guards in 1870, and retired as a Lieutenant in 1875. From 1882 to 1891 he was Lieutenant-Colonel of the Sutherland Rifles. From 1874 to 1886 he was Liberal M.P. for Sutherlandshire, is Alderman of Longton, and was Mayor in 1895-96, and Lord-Lieutenant of Sutherlandshire from 1892 to 1898; since 1892 has been Hon. Colonel of the Queen's Own Staffordshire Yeomanry, &c. He is a very extensive landowner. In 1884 he married Millicent, daughter of the 4th Earl of Rosslyn. Addresses: Stafford House, St. James's, S.W.; Dunrobin Castle, Sutherlandshire, &c.

SUTHERLAND, Sir Thomas, G.C.M.G., LL.D., M.P., son of Robert Sutherland and Christian, daughter of Thomas Webster, was born in Aberdeen, Aug. 16, 1834, and was educated at the Grammar School and University of his native city. At a very early age he entered the service of the Peninsular and Oriental Steamship Company, and before completing his twentieth year he was sent by the Company to Bombay, and subsequently to Hong Kong, where he may be said to have begun his real career. In a few years he rose to be the head of the Company in China and Japan, the various stations in these countries being under a central management in Hong Kong. While in this position Mr. Sutherland not only succeeded in administering the affairs of the P. and O. Company with much success, so far as it lay in his power, but he came gradually to take a leading part in connection with local affairs in China, such as in founding the Hong Kong and Shanghai Banking Corporation, at present the greatest financial institution in the East, and the Hong Kong and Whampoa Docks Company, a corporation which owns the finest system of dry docks out of Europe. In a very large measure Sir Thomas Sutherland may be said to have originated both those important undertakings. In 1864 he was called upon by Sir Hercules Robinson, in highly flattering terms, to fill a vacancy in the Legislative Council of the colony, and serving there he took an active part in promoting the welfare of the colony, but in 1866 he returned to England to become associated with the management of the P. and O. Company in London. He did not, however, settle down in this capacity until nearly two years afterwards, subsequently to having made a complete tour of the whole of the Company's Eastern stations. Scarcely had he commenced his duties in London, when the Suez Canal

was opened, with results which were utterly subversive of the conditions under which the Company's business had been carried on in connection with the overland route. At one time it seemed almost as if the P. and O. Company could hardly hold its position in the new era which the Suez Canal and the compound engine together had almost simultaneously inaugurated; but through the energetic efforts made by the Company the situation was again changed for the better, and from 1875 or thereabouts, when the Company was enabled, by the creation of a new fleet, to adopt the Suez Canal route, it may be fairly considered to have been a flourishing concern. Its fleet has been nearly quadrupled in tonnage since 1870, and now aggregates about 300,000 tons. Sir T. Sutherland became Chairman of the Company in 1881, and holds that position still. In 1884 he was largely instrumental in bringing about an agreement between the English shipowners and the Suez Canal Company, after the Childers Gladstone agreement was withdrawn. By this agreement the Suez Canal was doubled in width and increased in depth without the aid of English money; the tariff was reduced and remains subject to further reduction, according to the increase of traffic; while a certain number of Englishmen were admitted members of the Board in addition to those representing the shares held by the Government. Sir T. Sutherland was among the first chosen of these new directors, and has also held the position of Chairman of the London Board of the Canal Company ever since. He has been elected five times as M.P. for Greenock, and since 1886 his political position has been that of a Unionist Liberal. He has served on many public committees and Royal Commissions. In 1891 Mr. Sutherland had conferred on him a Knight Commandership of St. Michael and St. George, and in 1897 he was advanced to the rank of Grand Cross of that order. He has also received the order of St. John of Jerusalem, and the Legion of Honour. Some years ago the University of Aberdeen conferred on him its honorary degree of LL.D. He is married to Alice, a daughter of the Rev. John Magnaught, Vicar of St. Chrysostom's, Liverpool. Addresses: 4 Buckingham Gate, S.W.; and Coldharbour Wood, Liss, Hants.

SUTTON, John Bland, F.R.C.S., consulting and operating surgeon, was born April 21, 1855, at Enfield Highway. In 1878 he entered as a student at the Middlesex Hospital, and Mr. Thomas Cook's School of Anatomy. In 1879 he was appointed a Demonstrator of Anatomy at the Hospital, subsequently Senior Demonstrator, and finally a Lecturer on

this subject, which post he resigned in 1896, having taught anatomy in this School for seventeen years. He became a Member of the Royal College of Surgeons 1882, and Fellow 1884, a week previously gaining the Murchison Scholarship in Medicine at the Royal College of Physicians. From 1880 to 1884 he spent the summer sessions in the Paris and Vienna hospitals, gaining a knowledge of Continental pathology and surgery. In 1881 he was appointed by the Pathological Society to examine the animals dying at the Gardens of the Zoological Society with a view to obtaining a better knowledge of their diseases. As a result of this work he was elected Erasmus Wilson Lecturer, and afterwards Hunterian Professor of Anatomy at the Royal College of Surgeons. In these capacities, between 1886 and 1891, he delivered the lectures "Evolution and Pathology," which brought him prominently before the scientific world. During this period he also published his original investigations on the "Nature of Ligaments." In 1886 he was elected to the Surgical staff of the Middlesex Hospital. This led him to undertake a critical investigation of morbid growths on embryological and morphological lines. The results of eight years' study were embodied in the work entitled "Tumours Innocent and Malignant," 1893, which immediately attracted great attention on account of its original classification and the large amount of new light it threw on Dermoids and cysts. This work also contains his observations on teeth tumours (odontomes) for which he was elected an Honorary Member of the Odontological Society. Having devoted especial attention to tumours of the uterus and ovaries, he published in 1891 the work "Disease of the Ovaries and Fallopian Tubes," and for his essay on this subject he was awarded the Jacksonian Prize the same year. In this book first appeared his well-known work on tubal pregnancy, which was chiefly distinguished by the discovery of the tubal mole, August 1889. He was appointed an Examiner for the Fellowship of the Royal College of Surgeons, and an Examiner in Surgery at the University of Durham in 1895. He has also published the following works: "Ligaments, their Nature and Morphology," 1887; "Evolution and Disease," 1890; "Diseases of Women" (with Dr. Giles), 1897; "The Treatment of Uterine Myomata," 1898; and he has made a large number of original communications in anatomy, pathology, and surgery to the various scientific and medical societies and journals. Of late years his name has been more especially associated with the surgical treatment of tumours, particularly those which affect

the uterus and its adnexa, and as a consequence he was appointed in 1895 to the surgical staff of the Chelsea Hospital for Women. Address: 48 Queen Anne St., W.

SVERDRUP, Otto, Norwegian Arctic explorer, first attracted notice as the assistant of Dr. Nansen (*q.v.*). He accompanied him in his famous expedition across Greenland, and still more famous voyage in the *Fram*, on which occasion he remained in command of the ship when Nansen and Johansen left for their dash to the Pole. He brought the ship safely back to Norway, and was fêted with his brother explorers. On June 24, 1898, he left Christiania on another expedition to explore the North and North-West Coast of Greenland, in Dr. Nansen's old ship the *Fram*. This is the same day on which he left in 1893, and the boat is in every way better fitted out than she was before, having been partly rebuilt by her constructor, Mr. Colin Archer.

SWALLOW, The Rev. Robert, M.D., is the eldest son of the late Mr. James Swallow, of Sunderland, and was born on the 6th of November 1846, at Sheepwash, in Northumberland. He became a local preacher at eighteen, and after a short time at this work determined to enter the ministry of the United Methodist Free Churches. After going through the usual course of study he was ordained, and subsequently laboured in the Hartlepool and Grimsby Circuits. He then offered himself for foreign work, and was accepted as a missionary to China. In that country he has laboured for upwards of twenty-four years in connection with the church at Ningpo, which is in a very flourishing condition. Feeling the great need of medical knowledge in his work, he entered upon a hospital course in London, and then went through the usual medical course at the Hahnemann Medical College, San Francisco, where he graduated as M.D. in 1892. Upon his return to China he opened a Hospital and Medical School in connection with the church at Ningpo. He returned to England, on furlough, for the second time in 1897, and in that year was elected the President of the United Methodist Free Churches at the annual Assembly which was held at Nottingham. Address: Ningpo, China.

SWAN, John Macallan, A.R.A., R.W.S., was born at Old Brentford in 1847, and studied at Worcester School of Art, at Lambeth Art School, and in Paris under Gérôme, Bastien-Lepage, and Dagnan-Bouveret, who taught him painting, and under Frémiet, who was his master in sculpture. He began exhibiting at the

Royal Academy in 1878, painting animals and the figure. He has also been an exhibitor at the Old Grosvenor and the New Gallery. He draws his inspiration from the Zoological Gardens, which he constantly visits. His principal works include: "Orpheus," "The Prodigal Son," 1888 (Academy), purchased under the terms of the Chantry Bequest; "Lioness Defending her Cubs" (Salon picture), "Polar Bears Swimming," "A Dead Hero," &c. In the Royal Academy of 1895 he exhibited "The Goatherd," "Tigers at Dawn," and "Orpheus," a silver statuette; in 1896, "The Lion-Hunter," "Study of East African Leopards," "The Sirens"; in 1897, "Tigress and Cubs at a Torrent," and a "Young Indian Leopard and Tortoise," in silver; in 1898, "Fortune and the Boy," and "A Broken Solitude"; in 1899, "Leopard Running," and "Leopard Eating," bronzes. He was elected A.R.A. in 1894, obtained honourable mention at the Salon in 1885, a silver medal in 1889 at the Paris Exhibition, and the first and second gold medals at the Munich Exhibition. He held a special exhibition of his studies at the Fine Art Society in 1897. In April 1899 he was elected a full member of the Royal Society of Painters in Water-Colours. Address: 3 Acacia Road, N.W.

SWAN, Joseph Wilson, M.A., F.R.S., the second surviving son of John Swan and Isabella Cameron, was born at Sunderland, on Oct. 31, 1828. He was educated at Hendon Lodge and Hylton Castle, near Sunderland. Mr. Swan is chiefly known as the inventor of the incandescent electric lamp. After many years of tentative experiment he succeeded in producing a lamp of the type now so well known. In 1879 a degree of success was reached that gave complete assurance of the feasibility of electric lighting on the incandescent principle. Early in that year Mr. Swan publicly exhibited lamps having all the essential features of the lamps which are now manufactured so widely, and which have brought electric lighting into general use, incidentally giving a great impulse to the use of electricity for many other purposes. Among other electrical inventions of Mr. Swan are: The miners' electric safety-lamp, improvements in the electric accumulator, and also in electric meters. Mr. Swan's name is equally well known in connection with photographic inventions. Amongst these are the "carbon process," better known as "Autotype," and the modern "dry plate," which has revolutionised the art of photography. He was also co-inventor, with the late Mr. Woodbury, of "Woodbury type," and an early

inventor and patentee of methods of photo-engraving for typographic and copper-plate printing. Mr. Swan is President of the Institution of Electrical Engineers, a Fellow of the Royal Society, Vice-President of the Royal Photographic Society, and a Fellow of the Institute of Chemistry, and of the Institution of Mechanical Engineers. He is also a Member of the Council of University College, London; M.A. of Durham University (*honoris causa*); and a Chevalier of the Legion of Honour. He has published the more important of his inventions through the Patent Office, and through communications to the learned societies and public lectures. Address: 58 Holland Park, London, W.

SWANSEA, Bishop Suffragan of. See LLOYD, THE RIGHT REV. JOHN.

SWANWICK, Anna, is the youngest daughter of the late John Swanwick, Esq., of Liverpool, a descendant of Philip Henry, the celebrated Nonconformist divine. She was born June 22, 1813; left school at the age of thirteen, and after some years of private study, repaired to Berlin, where she studied, not only German, but Greek and Hebrew. On her return to England she joined her family, which then resided in London, and while continuing her philological pursuits she studied the Higher Mathematics under Professor Newman. In 1843 she published a volume of translations, entitled "Selections from the Dramas of Goethe and Schiller." Her translation of Schiller's "Maid of Orleans" was published in 1847; and in 1850 the volume containing her translation of the first part of "Faust," with other master-works of Goethe, "Tasso," "Iphigenia," and "Egmont." In 1878 appeared her translation of the two parts of "Faust," 4to, with Retchs's illustrations, which was followed by a smaller edition in 1879. She was strongly urged by the late Baron Bunsen to undertake the translation of the Great Dramas. Acting upon his suggestion she translated the *Æschylean Trilogy*, published in 1865, which was followed, in 1873, by her translation of the complete dramas of *Æschylus*, with Flaxman's illustrations. A fourth and revised edition has since been published. In 1888 she published a little book entitled "A Utopian Dream," which was followed in 1892 by a longer work, "Poets, the Interpreters of their Age." Having been requested to republish an article contributed by her to the *Contemporary Review*, it appeared in an expanded form in 1894 under the title of "Evolution, and the Religion of the Future." Impressed with the low standard of female education which prevailed in England during her younger

days, Miss Anna Swanwick has taken an active part in the establishment of Ladies' Colleges and other educational centres. She sympathised also most deeply with those who were labouring to raise the people to a higher level, moral and intellectual, and for many years she superintended classes of young working men and women, whom she instructed in various departments of knowledge. Permanent address: 23 Cumberland Terrace, Regent's Park, N.W.

SWEATMAN, The Right Rev. Arthur, M.A., D.D., D.C.L., Bishop of Toronto, was born in London, Nov. 19, 1834. He was educated at London University College, and is an honour graduate of Christ's College, Cambridge. In 1862 he was appointed to the curacy of St. Stephen's, Canonbury, and to the Master-ship of the Modern Department of the Islington Proprietary School. On the invitation of Bishop Hellmuth, he accepted, in 1865, the Head-Mastership of Hellmuth Boys' College, London, Ontario, and at a later date became Clerical Secretary to the Synod of the Diocese of Huron, and Secretary to the House of Bishops. Resigning his educational charge, he became Assistant-Rector of St. Paul's, Woodstock, and Archdeacon of Brant; and, during the Bishop of Huron's absence in England, acted as his commissary. In March 1879 he succeeded Bishop Bethune in the see of Toronto, and in the same year received the degree of D.D. from Cambridge; and in 1882 that of D.C.L. from Trinity University, Toronto. Address: Toronto, Canada.

SWEDEN and NORWAY, King of. See OSCAR II.

SWETE, Professor the Rev. Henry Barclay, D.D., Hon. Lit.D. Dublin, Fellow of Caius College, was born at Bristol, March 14, 1835, and is the son of the Rev. John Swete, D.D. He entered at Gonville and Caius College, Cambridge, in 1854, and received the Carus Greek Testament Prize in 1855, and the Members' Prize in 1857, and graduated B.A. in the Classical Tripos in 1858. He was Professor of Pastoral Theology at King's College, London, 1882-1890, and is now Regius Professor of Divinity at Cambridge. He has published the following works: "Early History of the Doctrine of the Holy Spirit," 1873; "Theodorus Lascaris, Junior: De Processione Spiritus Sancti oratio apologetica," 1875; "History of Doctrine of the Procession of the Holy Spirit," 1876; "Commentary of Theodore of Mopsuestia on the minor Epistles of St. Paul," 1880-82 (2 vols.);

articles in the "Dictionary of Christian Biography," 1877-86; "The Old Testament in Greek, according to the Septuagint" (3 vols.), 1887-94; "The Akhmim Fragment of the Apocryphal Gospel of St. Peter," 1893; "The Apostles' Creed in relation to Primitive Christianity," 1894; "Faith in relation to Creed, Thought, and Life," 1895; "Church Services and Service-Books," 1896; "The Gospel according to St. Mark, with introduction, notes, and indices," 1898. Address: Cambridge.

SWETTENHAM, Sir Frank Athelstone, K.C.M.G., Resident-General of the Federated Malay States, was educated at Dollar Academy, Scotland, and St. Peter's School, York. He entered the Civil Service of the Straits Settlements in 1870, was Assistant British Resident at Selangor from 1874 to 1875, was Deputy Commissioner with the Perak Expedition in 1876-77, being mentioned in despatches and obtaining a medal and clasp, held various other important posts in the Malay States, and in 1896 was appointed to his present position. He was created K.C.M.G. in 1897; C.M.G., 1892. Like Mr. Conrad and others, he has been attracted by the literary possibilities and tradition of his environment, and has recently published a most interesting work, "Unaddressed Letters" (John Lane), which reflects the feelings of Englishmen exiled in distant and barbarous lands. His works include "Malay-English Vocabulary," 1880; "About Perak," 1893; "Malay Sketches," 1895, &c. Address: Carcosa, Selangor, Malay Peninsula.

SWIFT, Benjamin. See **PATERSON, WILLIAM ROMAINE.**

SWINBURNE, Algernon Charles, poet and essayist, son of the late Admiral Charles Henry Swinburne, by Lady Jane Henrietta, daughter of George, 3rd Earl of Ashburnham, and grandson of Sir John Edward Swinburne, Bart., of Capheaton, Northumberland, was born in Chester Street, Grosvenor Place, London, April 5, 1837. He entered as a commoner at Balliol College, Oxford, in 1857, but left the University without taking a degree. Afterwards he visited Florence, and became acquainted with Walter Savage Landor. His first production, "The Queen Mother," and "Rosamond," two plays published in 1861, attracted little attention. "Atalanta in Calydon, a Tragedy," followed in 1864; "Chastelard, a Tragedy," in 1865; and "Poems and Ballads," in 1866. The latter work was very severely, and not very discerningly, censured, and was withdrawn from circulation by Messrs. Moxon. Mr. W. M.

Rossetti then published "Poems and Ballads: a Criticism," and Mr. Swinburne himself "Notes on Poems and Reviews." Among his other works are: "A Song of Italy," and "William Blake: a Critical Essay," 1867 (2nd edit., 1868); "Siena: a Poem," 1868; the second part of "Notes on the Royal Academy Exhibition," 1868, the first part of which was written by Mr. W. M. Rossetti; "Ode on the Proclamation of the French Republic," Sept. 4, 1870; "Songs before Sunrise," 1871; "Bothwell: A Tragedy," 1874; "Essays and Studies," 1876; "Erechtheus," 1876; "A Note on Charlotte Brontë," 1877; "Poems and Ballads: Second Series," 1878; "A Study of Shakespeare," 1879; "Studies in Song," 1881; "Tristram of Lyonesse," 1882; "A Century of Roundels," 1883; another volume of "Prose Miscellanies," and "The Life of Victor Hugo," 1886; "The Armada," 1888; "A Study of Ben Jonson," 1890; "Astrophel, and other Poems," and "Studies in Prose and Poetry," in 1894. Mr. Swinburne is the greatest living English poet. He has not travelled very much, but with his family he stayed at Florence and on the Riviera, and with Sir Richard Burton he visited Vichy. Subsequently he spent some time with Mr. Watts-Dunton in the Channel Islands, and in Paris, where the two friends went to witness the memorable jubilee revival of Victor Hugo's "Le Roi s'Amuse" at the Théâtre Français. There Mr. Swinburne met Victor Hugo for the first time. For twenty years Mr. Swinburne has lived with Mr. Theodore Watts-Dunton at the Pines, Putney. He is a good pedestrian, and his physical vigour is exceptional for a man of his years.

SYLVA, Carmen. See **ELIZABETH, QUEEN OF ROUMANIA.**

SYMONS, Arthur, was born in Wales, Feb. 28, 1865, of Cornish parentage. He was educated at various private schools, and has lived in many parts of England, in France, and in Italy. His earliest literary work was in connection with Shakespeare; he edited four of Quaritch's Shakespeare Quarto Facsimiles, in 1884-86, and afterwards seven plays in the Henry Irving Shakespeare, 1888-89. He has done literary criticism, chiefly of poetry, in the *Athenæum* from 1891, and in the *Saturday Review* from 1894. He edited the *Savoy* during the year of its existence, from January to December 1896. His play in one act, "The Minister's Call," was performed at the Royalty by the Independent Theatre, March 24, 1892. He has published, in verse: "Days and Nights," 1889; "Silhouettes," 1892; "London Nights," 1895; "Amoris Victima," 1897;

in prose: "An Introduction to the Study of Browning," 1886; "Studies in Two Literatures," 1897. Address: Fountain Court, The Temple.

SYMONS, George James, F.R.S., was born on August 6, 1838, and is the only child of Joseph and Georgiana Symons. He was educated privately. Before he was twenty-one he had been elected member of the Meteorological Society, had given several lectures upon the subject, had commenced a series of observations with standard instruments, the records of which were supplied to Mr. Glaisher, F.R.S., for insertion in the "Quarterly Reports" of the Registrar-General; and had started in 1857 an organisation for the observation of thunderstorms and the record of injuries by lightning. In 1859 he was elected a member of the General Committee of the British Association, and is now a member of the Council. In 1860 he became a member of the Scottish Meteorological Society, issued its first separate publication, "Notes on the Solar Eclipse of July 18, 1860," and accepted the invitation of Admiral Fitzroy, F.R.S., to become one of his assistants at the Meteorological Office, where he continued until nearly the time of his chief's death, being occupied principally with preparing for publication the records of the Anemometers at Bermuda and Halifax. During these years he devoted all his non-official time to collecting details of the fall of rain, and commenced the organisation known as the British Rainfall system, which now includes more than 3000 observers. The results have been published in 36 successive volumes of *British Rainfall*, and in 32 volumes of the *Meteorological Magazine*, which have been compiled and edited under his direction. With the above exception, Mr. Symons has written few books, but his papers and reports communicated to scientific societies in this and other countries, and his letters to the *Times* on meteorological subjects, are to be numbered by hundreds. In 1872 he was elected Membre de la Soc. Mét. de France, and has served three times on the Council. In 1873 Mr. Symons was elected Hon. Secretary of the (now) Royal Meteorological Society, which office he has held ever since, excepting during 1880 and 1881, when he was President. In 1875 he was elected a Fellow of the Royal Colonial Institute, and during that and the subsequent year drew up a complete summary of the statistics and bibliography of the meteorology of our Colonial Empire. The results of that inquiry were embodied in a paper which he read before the Royal Colonial Institute in 1877. In the autumn

of 1875 serious floods occurred, and he submitted to the Institution of Civil Engineers a paper "On the Floods in England and Wales, and on Water Economy," for which he was awarded a Telford Premium. In 1878, on the initiative of the Meteorological Society, a conference of delegates from various scientific societies was formed, to consider "the desirability, or otherwise, of issuing a code of rules for the erection of lightning conductors." The work of the conference extended over four years, Mr. Symons acting throughout as Hon. Secretary, and editing the "Report of the Lightning-Rod Conference." In 1878 Mr. Symons was Président Étranger of the Congrès Internationale de Météorologie held in Paris, and in 1889 Vice-President of a similar meeting. In 1879 he was elected Fellow, and from 1880 to 1896 was Registrar of the Sanitary Institute. He was a Juror of the Health Exhibition, Section for Water Supply, 1884, in which year he was elected Membre Corresp. Étranger de la Soc. Roy. de Médecine Publique de Belgique, and in 1886 he was elected Korrespondendes Mitglied der Deutschen Met. Gesellschaft. In the autumn of 1886 the first Session of the Congrès International d'Hydrologie was held at Biarritz; and Mr. Symons was appointed Vice-Président Étranger, and subsequently Juror of the Exhibition. He afterwards visited the thermal stations of the Pyrenees, and this drew his attention to the question of the constancy or otherwise of the temperatures of these waters. After full inquiry, and with the co-operation of the Royal Society, he designed special thermometers, and revisited all the principal stations in the autumn of 1887, determining the temperatures with all possible precision. Mr. Symons was elected F.R.S. in 1878; and when, in 1884, a Committee of the Royal Society was appointed to report upon the eruption of Krakatoa, he was chosen as its Chairman, and subsequently as editor of the report. In 1891 Mr. Symons received from the President of the French Republic the Cross of Knight of the Legion of Honour, and in 1898 from H.R.H. the Prince of Wales the Albert Medal for the year 1897, "for the services he has rendered to the United Kingdom by affording to engineers engaged in the water supply and the sewage of towns a trustworthy basis for their work, by establishing and carrying on during nearly forty years systematic observations (now at over 3000 stations) of the rainfall of the British Isles, and by recording, tabulating, and graphically indicating the results of these observations in the annual volumes published by himself." Address: 62 Camden Square, N.W.

SZÉLL, Coloman, Hungarian Premier, was born on July 8, 1845, at Gosztony, in Hungary. He graduated at the National University of Budapest, and in 1868 was returned to Parliament, his political career being begun under the auspices of Francis Deák. He is well known as a financier, having founded one of the great Hungarian banks. Selected President of the Financial Commission of Parliament, he became Minister of Finances in 1875, but left this position after the occupation of Bosnia. He rose to the Premiership early in 1899. His wife is a daughter of the poet Vörösmarty.

TACCHINI, Pierre, Foreign F.R.S., Italian astronomer, was born at Modena, March 21, 1838, and studied mathematics at the university of his native town, where he took his degree of Doctor in 1857. Two years later he was appointed astronomer at the Observatory of Modena, and was transferred to Palermo in 1863. In 1879 he was made Director of the Observatory of the Roman College at Rome, and of the Chief Meteorological Office. Here he organised a complete seismological service throughout all Italy. He is a member of the Royal Academy of Rome, of the Academies of Sciences of Turin, Modena, Venice, Bologna, and Palermo, and of the Royal Society, and the Royal Astronomical Society of London. In 1888 the Royal Society awarded him the Rumford Medal, and in 1892 the French Academy granted him the Taupier Medal. He has taken part in several astronomical expeditions to Africa, America, and India. He has founded Italian Societies of Spectroscopy and Seismology, in the journals of which are to be found most of his published works. He has received several Italian and foreign decorations. Address: Ufficio Meteorologico Centrale, Rome.

TAIT, Patrick Macnaghten, F.S.S., F.R.G.S., son of the late William Tait, Esq., was born in Edinburgh, and educated in his native city, having for some time been under the late Principal Tulloch. He first entered the Scottish Union Insurance Office, Edinburgh, of which Sir Walter Scott was a Director, and in 1851 proceeded to India; was in India during 1857, 1858, and 1859, the years of the Mutiny, when he raised the Rifle Company of the Calcutta Volunteer Guards, in which corps he held a command. Subsequently he travelled in India, Ceylon, China, Japan, Canada, and the United States of America. He has contributed

largely to the *Edinburgh Review* and *Calcutta Quarterly Review*, also to the *Examiner*, *Life*, and other London weekly papers. He is the author of numerous papers read before different societies, including the British Association, the Institute of Actuaries, and the Royal Statistical Society; amongst which may be mentioned: "Observations on Existing Tables of Mortality of Europeans in India," 1855; "Mortality of East Indians," published in the *Calcutta Review* for December 1858; "Mortality of Christian Females in India," published in the *Calcutta Review* for March 1859; "The Mortality of Eurasians," 1864; "The Population and Mortality of Calcutta," 1867; "The Population and Mortality of Bombay," 1869; "Anglo-Indian Vital Statistics," 1874; "The Theory and Practice of Accident Insurance on Sea and Land," "Original D and N Tables for Joint Lives in India," "Vital and other Statistics Applicable to Musicians," 1880; "Vital and other Statistics of Eastbourne," 1885; "On the Value of European and Native Life in India," 1888. Address: 6 Rossetti Mansions, Cheyne Walk, S.W.

TAIT, Professor Peter Guthrie, M.A., D.Sc., whose father was private secretary to the late Duke of Buccleuch, was born at Dalkeith, April 28, 1831, and educated at the Academy and University of Edinburgh, and at Peterhouse, Cambridge, where he was Senior Wrangler and First Smith's Prizeman. In 1852 he was elected Fellow of Peterhouse, and in 1854 was appointed Professor of Mathematics at Queen's College, Belfast, where he remained until 1860, when he was elected Professor of Natural Philosophy in Edinburgh, a post since held by him. He is Secretary of the Royal Society of Edinburgh. Professor Tait has published a number of scientific and other works, amongst which are: "Dynamics of a Particle," 1856; "Quaternions," 1867 (translated into French by the late Dr. Gustav Plarr, 1882); "Thermo-Dynamics," 1868; "Recent Advances in Physical Science," 1876; "Heat," and "Light," 1884; "Properties of Matter," 1885; "Dynamics," 1895; besides a large number of papers contributed to different periodicals, among which may be mentioned those on "Knots," on the "Kinetic Theory of Gases," and on "Thermo-electricity." In conjunction with Lord Kelvin (then Sir William Thomson) he published in 1867 a "Treatise on Natural Philosophy." He was also, with the late Prof. Balfour Stewart, joint-author of the essay called "The Unseen Universe." To the *Challenger* Reports Prof. Tait has contributed an experimental discussion of the

"Pressure Errors of the *Challenger* Thermometers," and of the "Physical Properties of Water." Another experimental work which he carried out in conjunction with the late Dr. Andrews, deals with the "Volumetric Relations of Ozone." His collected "Scientific" papers were published (1898). His latest papers, "On Impact," and "On the Path of a Rotating Spherical Projectile," have very obvious bearings on the game of golf. Professor Tait's son, affectionately known to followers of the game as "Freddy," is champion amateur golfer of Scotland. Address: 38 George Square, Edinburgh.

TALBOT, The Right Rev. Edward Stuart, M.A., D.D., Bishop of Rochester, born in London on February 19, 1844, is the second son of the Hon. J. C. Talbot, Q.C., one of the leaders of the Parliamentary Bar, and of Caroline, daughter of the first Lord Wharncliffe. He was educated at Charterhouse, and Christ Church, Oxford, where he obtained a first class Lit. Hum., 1865; and first class Law and Modern History, 1866. He was ordained in 1867 and took priest's orders in 1870. He was elected senior student of Christ Church in 1866, and obtained the Elliott Prize Essay in 1869, on the "Influence of Christianity on Slavery." In 1870 he was appointed first Warden of Keble College, Oxford, and was Select Preacher in 1873 and in 1883. He was Examiner in the Final Classical Honour Schools in 1874-76, and was appointed examining Chaplain to the Archbishop of Canterbury in 1883. In 1889 he retired from the wardenship of Keble College, and was appointed to the Vicarage of Leeds. In 1890 he was appointed Hon. Chaplain to the Queen, and in 1895 became Bishop of Rochester. He is author of "The Preparation in History for Christ," in "Lux Mundi," 1889; "Some Titles and Aspects of the Eucharist"; Leeds Parish Church Sermons. Dr. Talbot married, in 1890, Lavinia, third daughter of the 4th Baron Lytton. Addresses: Bishop's House, Kennington, S.E.; and Athenæum.

TALBOT, Major and Brevet Lieut.-Col. the Hon. Milo George Talbot, successor to Sir Francis Wingate, as Director of Military Intelligence in the Egyptian Army, is a younger brother of Lord Talbot de Malahide, was born in 1854, and was educated at Wellington. He entered the Royal Engineers at the age of 19, in 1873, and served with distinction in the Afghan war of 1879-80, when he was present at the capture of Ali Musjid, the action of Charasiah, the operations round Kabul, the march from Kabul to the relief of Candahar, and the battle

of September 1. He was mentioned in despatches (*London Gazette*, Dec. 3, 1880), and received a medal with four clasps, and the Bronze Star. He also gained a medal with clasp in the Jowaki Expedition of 1877-78, and in 1881 took part in the Mashood Wuzereee Expedition. More recently he served in the advance upon Khartoum. He has gained considerable distinction as a surveyor and explorer, chiefly in Beluchistan, and with the Afghan Boundary Commission, of which he was a member. He acquired his thorough knowledge of Egypt when surveying for the Egyptian Government on the Nile, before being specifically attached to the Egyptian army. He was for some time a D.A.A.G. at head-quarters. In January 1899 he was appointed to succeed Sir Francis Wingate in his present post.

TALMAGE, Thomas de Witt, D.D., was born at Bound Brook, New Jersey, January 7, 1832. He studied at the University of the City of New York, and graduated at the New Brunswick (N.J.) Theological Seminary in 1856. On ordination he was chosen pastor of the Reformed Dutch Church at Belleville, N.J.; from 1859 to 1862 he had charge of a church in Syracuse, N.Y.; and from 1862 to 1869 of one in Philadelphia. During the Civil War he was chaplain of a Pennsylvania Regiment, and he is now chaplain of the 13th New York Regiment. Since 1869 he has been pastor of the Central Presbyterian Church at Brooklyn, N.Y. Thrice during this period his church edifice has been destroyed by fire, once in 1872, once in 1890, and again in 1894. In 1884 he received the degree of D.D. from the University of Tennessee. Dr. Talmage is a popular lecturer and preacher, and his sermons are weekly reported in a large number of newspapers. He visited England in November 1889, and afterwards made a Continental tour, and visited Palestine. He was in 1894 again making an extended tour in foreign lands. From 1873 to 1876 he edited the (N.Y.) *Christian at Work*; in 1877-78 the (Chicago) *Advance*; and later *Frank Leslie's Sunday Magazine*, and the *Christian Herald*. He has published "The Almond-Tree in Blossom"; and "Crumbs Swept Up," 1870; "Abominations of Modern Society," 1872; "One Thousand Gems," 1873; "Old Wells Dug Out," and "Around the Tea-Table," 1874; "Sports that Kill," and "Every-Day Religion," 1875; "Night-Sides of City Life," 1878; "Masque Torn Off," 1879; "The Brooklyn Tabernacle," 1884; "The Battle for Bread," and "The Marriage Ring," 1886, besides several volumes of collected sermons and a number of lectures, addresses, and magazine articles.

TANCOCK, The Rev. Charles Coverdale, M.A., Head-Master of Tonbridge School, is the third son of the Rev. Osborne John Tancock of Truro, and was born in 1852. He was educated at Sherborne School, and Exeter College, Oxford, of which he was a scholar from 1870 to 1875. He took a first class in Classical Moderations in 1872, and a first in Lit. Hum. in 1874; B.A. 1874; M.A. 1877. He was for eleven years an assistant-master at Charterhouse, and in 1886 was elected Head-Master of Rossall School, where he remained for ten years until ill health compelled him to resign and to accept the living of Leck, near Manchester. In December 1898 he was appointed Head-Master of Tonbridge School, in succession to the Rev. Dr. Wood, then Head-Master elect of Harrow. Address: The Schoolhouse, Tonbridge.

TANKERVILLE, Earl of, The Right Hon. Charles Bennet, P.C., D.L., J.P., was born on January 10, 1810, and is the son of the 5th Earl, whom he succeeded in 1859, and a daughter of the Duc de Gramont. He was educated at Christ Church, Oxford (B.A.). He represented North Northumberland in the Conservative interest in the House of Commons from 1832 to 1859, when he was summoned to the Upper House as Viscount Ossulston, succeeding his father as Earl a month later. In 1866-67 he was Captain of the Corps of Gentlemen-at-Arms, and in 1867-68 Lord Steward of the Household. He is Hon. Colonel of the Northumberland Fusilier Volunteers. He married, in 1850, Lady Olivia Montagu, daughter of the 6th Duke of Manchester. Addresses: Chillingham Castle, Belford, Northumberland; and Coombe End, Kingston-on-Thames.

TANNER, Charles Kerns Dease, M.P., M.D., was born in 1850, and is the son of the late William K. Tanner, M.D. He was educated in Paris, at Winchester, and Queen's College, Cork, and at the Universities of Leipzig and Berlin, and entered the medical profession. He was Lecturer on Anatomy at Queen's College, Cork, and is now surgeon to the South Cork Infirmary and County Hospital. Since 1885 he has been prominently before the House of Commons as Nationalist member for Mid Cork. He is Town Commissioner of Cork. Addresses: 2 Colherne Mansions, Bolton Gardens, S.W.; and Cork.

TATE, Sir Henry, Bart., J.P., was born at Chorley, Lancashire, in 1819, and is a son of the Rev. W. Tate. He was for many years head of the firm of Henry

Tate & Sons, sugar refiners, of Liverpool and London. He has long been engaged in philanthropic enterprises, and has given Lambeth a Free Library, which is equipped on a handsome scale. His libraries are alone sufficient to perpetuate his name, but these have of late years been put in the background by his grand donation to England of the Tate Gallery. Some years ago Sir Henry Tate learnt, to quote his own words, that "a great want was felt of some place where works of modern art could be seen at any time of the year." He decided that if he could succeed in obtaining from the Government a suitable plot of land he would build a gallery for a permanent exhibition of British art. Sir William Harcourt warmly interested himself in his proposal, and, chiefly through that statesman's representations, the Government placed the site of Millbank Prison at his disposal. Here Sir Henry, then Mr. Tate, built what are known as the "Tate Galleries," the architect being Mr. Sidney Smith, and the contractors Messrs. Higgs and Hill. The new galleries contain an overflow of pictures from the National Gallery, the Chantrey Bequest pictures from the South Kensington Museum, a number of his masterpieces presented by Mr. Watts to the nation, and sixty-five modern pictures, chiefly illustrative of the pre-Raphaelite movement, from Sir Henry Tate's own collection. The trustees of the National Gallery have become trustees of the new institution, which Sir Henry Tate has made over to the nation and intends enlarging. The galleries were opened by the Prince of Wales, the Princess of Wales, and other members of the Royal Family, on July 21, 1897, on which notable occasion the beneficent donor stated the objects and history of the gift, and was eloquently thanked, in the name of the British people, by the Prince of Wales, the Right Hon. A. Balfour, and the Right Hon. Sir William Harcourt. Sir Henry Tate received the honour of a baronetcy in 1898. He is one of the newly-created Trustees of the National Gallery. Lady Tate is a daughter of the late Charles Hishop. Address: Park Hill, Streatham Common, S.E.

TAYLOR, The Rev. Charles, M.A., D.D., Hon. LL.D. Harvard, Master of St. John's College, Cambridge, and late Vice-Chancellor of the University, was born in Middlesex, May 27, 1840, and was educated at King's College School, London, and St. John's College, Cambridge. He proceeded to the degree of B.A. in 1862, and in the same year became an editor of the *Oxford, Cambridge, and Dublin Messenger of Mathematics*. In 1863 he published his first work on "Geometrical Conics." He

was elected Fellow of St. John's College in 1864, and Master of the same, 1881, and shortly afterwards received the degree of D.D., *jure dignitatis*. He is the author of numerous articles on Hebrew, geometrical and other subjects; of the Kaye Essay for 1867, on the citations from the Old Testament in the New, published under the name, "The Gospel in the Law," 1869; and of the following works: "The Dirge of Coheleth," 1874, a monograph giving a new and literal interpretation of the 12th chapter of Ecclesiastes; "Sayings of the Jewish Fathers," in Hebrew and English, edited for the Syndics of the Cambridge University Press, 1877; an "Introduction to the Ancient and Modern Geometry of Conics, with Historical Notes and Prolegomena," 1881. In the Prolegomena he proves that the modern period properly begins with Kepler, who distinctly formulated the principles of infinity and continuity, which differentiate the modern from the ancient geometry. He has given a course of lectures at the Royal Institution on the "History of Geometry," 1886; also on the then lately discovered *Διδαχὴ τῶν δώδεκα ἀποστόλων*, 1885; these were published in April 1886, under the title "The Teaching of the Twelve Apostles, with illustrations from the Talmud: two Lectures on an Ancient Church Manual discovered at Constantinople." More recently he has published "An Essay on the Theology of the Didache," 1889; and "The Witness of Hermas to the Four Gospels," 1892. He was joint-editor of the *Messenger of Mathematics* from 1862 to 1887. Dr. Taylor received the honorary degree of LL.D. from Harvard (Cambridge, Mass.), 1886; and was Vice-Chancellor of the University of Cambridge, 1887 to 1888. He was Select Preacher at Cambridge in 1887 and 1893, and delivered the Macbride Sermon at Oxford in 1897; was an Alderman of Cambridge Borough from 1889 to 1895, and Acting President of the Statutory International Congress of Oriental Scholars held in the Temple in 1891. Addresses: St. John's Lodge, Cambridge; and Athenæum.

TAYLOR, The Rev. Isaac, M.A., Litt.D., LL.D., Canon of York, born May 2, 1829, at Stanford Rivers, is the eldest son of the late Isaac Taylor, author of the "Natural History of Enthusiasm." Educated at Trinity College, Cambridge, he obtained the Silver Oration Cup, and graduated as a Wrangler in 1853. In 1854 he edited a translation of Becker's "Charicles." He was ordained in 1857 to a country curacy, and published in 1860 "The Liturgy and the Dissenters." Removing to London, where he successively held two West-End curacies, he published

in 1864 a work on the Etymology of Local Names, entitled "Words and Places, or Etymological Illustrations of History, Ethnology, and Geography," which has passed through numerous editions. In 1865 he undertook the charge of one of the poorest parishes in Bethnal Green. His plans and labours for the benefit of his destitute parishioners were described in a little book entitled "The Burden of the Poor." In 1867 he published "The Family Pen; Memorials, Biographical and Literary, of the Taylor Family of Ongar." In 1869 he accepted the incumbency of a church at Twickenham. In 1873 he read a paper before the Philological Society on "The Etruscan Numerals," and in 1874 brought out a volume entitled "Etruscan Researches," which was followed by a condensed abridgment, entitled "The Etruscan Language." Presented in 1875, by Earl Brownlow, to the Rectory of Settrington, in Yorkshire, he undertook systematic researches into the origin and history of the alphabet. The first-fruit of these studies appeared in 1879, in a book called "Greeks and Goths, a Study on the Runes," in which the origin of the mysterious runes received a novel explanation, now generally accepted by European scholars. Shortly afterwards he published at Berlin a paper "Ueber den Ursprung des glagolitischen Alphabets," in which he discussed the origin of the earliest Slavonic alphabet. In 1879 he received from the University of Edinburgh the degree of LL.D., *honoris causa*, in recognition of his discoveries and philological attainments. In 1883 Dr. Taylor published, in two large volumes, his most important work, entitled "The Alphabet, an Account of the Origin and Development of Letters." In consideration of its merits the Board of Classical Studies at Cambridge unanimously recommended its author for the degree of Doctor in Letters. In the same year (1885) he was collated to a Canonry and Prebendal Stall in York Minster, and two years later was appointed Rural Dean. In 1887 he read a paper at the Manchester meeting of the British Association on "The Origin and Primitive Seat of the Aryans," which was afterwards enlarged into a volume, published in the Contemporary Science Series in 1889, which has received the honour of being translated into French by Dr. H. de Varigny. The winter of 1887-88 he spent in Egypt, whence he wrote to the *St. James's Gazette* a series of letters recording conversations with Egyptians on social life, politics, and religion. These letters, which involved him in considerable controversy, were republished, with additional chapters on the tenets of Islam, in the autumn of 1888, in a volume entitled "Leaves from an

Egyptian Note-book," with the object of dispelling prejudices as to the beliefs and practices of our Mohammedan fellow-subjects in India and elsewhere. In 1886 he took a prominent part in the Domesday celebration, and afterwards, in 1888, he published, in the memorial volume called "Domesday Studies," essays on "Domesday Survivals," "The Ploughland and the Plough," and "Wapentakes and Hundreds." In 1896 he followed up his popular work of 1864 by a more complete and scientific treatise on the same subject, entitled "Names and their Histories; a Hand-book of Historical Geography and Topographical Nomenclature." Canon Taylor, who was one of the founders of the Alpine Club, is a frequent contributor to learned periodicals, especially on subjects connected with Aryan and Ural-Altaic Philology, Onomatology, Ethnology, Palæography, Epigraphy, and Comparative Mythology. He has also written numerous articles, chiefly on the subjects dealt with in his books, for "Chambers's Encyclopædia," and similar publications. He has been elected a member of various learned societies in England and America. In 1865 he married a daughter of the Hon. H. Cockayne-Cust, Canon of Windsor. Address: Settrington Rectory, Malton, Yorks.

TAYLOR, General Sir Richard Chambré Hayes, K.C.B., born in Dublin, March 19, 1819, second son of the Hon. and Rev. Edward Taylor, younger son of the 1st Earl of Bective, by Marianne, daughter of Colonel the Hon. Richard St. Leger, was educated at Hazelwood School and at the Royal Military College, Sandhurst, and entered the army as Ensign of the 79th Highlanders in 1835. He served in various colonies and in the Crimean war, including the battles of the Alma and Balaklava, siege and fall of Sebastopol (in command of his regiment), also in the Indian Mutiny, including the siege and capture of Lucknow, operations in Oude and Rohilkund, Trans-Gogra campaign, actions of Rooyah-Allygunge, Bareilly, Shahjehanpore, Punnar, Mahomdee, Rampoorakussia, passage of the Gogra (commanded column), and was frequently mentioned in despatches. He was Assistant-Adjutant-General, Shorncliffe and Dover Division, from July 1860 to July 1865; Inspecting Field Officer and Assistant-Adjutant-General, Home District, from May 1867 to April 1871; Inspector-General of Recruiting from August 1873 to December 1876; Deputy-Adjutant-General of the Forces from December 1876 to October 1878; Adjutant-General of the Army from August 1882 to November 1882; Governor of the Royal Military

College, Sandhurst, from January 1883 to August 1886. He was promoted Colonel, May 1858; Major-General, March 1868; Lieutenant-General, October 1877; General, April 1883; and nominated C.B. 1857, and K.C.B. 1882; retired list, August 1886. He married, in 1863, the Lady Jane Hay, daughter of the 8th Marquis of Tweeddale, and has issue one son and four daughters. Permanent addresses: 16 Eaton Place, S.W.; and Dowestown, Naven, co. Meath.

TAYLOR, William Mackergo, D.D., LL.D., was born at Kilmarnock, Scotland, Oct. 23, 1829. He graduated at the University of Glasgow in 1849, and at the Divinity School of the United Presbyterian Church at Edinburgh in 1852. For two years he was pastor of a small church at Kilmaurs, Ayrshire, and in 1855 went to Liverpool to take charge of a newly organised Presbyterian Church, which under his care became a large and influential church society. Visiting the United States in 1871, his preaching while there was received with so much favour that he was called to succeed the late Dr. Joseph P. Thompson in the pulpit of the Broadway Tabernacle (New York City), one of the most prominent Congregational Churches in America, and of this church he has been, since 1872, the pastor. In 1876 and 1886 he was lecturer at the Yale Seminary, and in 1880 at Princeton Seminary. From 1876 to 1880 he was editor of *The Christian at Work*. He has published "Life Truths" (sermons), 1862; "The Miracles," 1865; "The Lost Found and the Wanderer Welcomed," 1870; "Memoirs of the Rev. Matthew Dickie," 1872; "Prayer and Business," 1873; "David, King of Israel," 1875; "Elijah the Prophet," and "The Ministry of the Word" (Yale lectures), 1876; "Songs in the Night," 1877; "Peter the Apostle," and "Daniel the Beloved," 1877; "Moses the Lawgiver," 1879; "The Gospel Miracles in Relation to Christ and Christianity" (Princeton lectures); and "The Limitations of Life" (sermons), 1880; "Paul the Missionary," 1882; "Contrary Winds" (sermons), 1883; "Jesus at the Well," 1884; "John Knox, a Biography," 1885; "Joseph the Prime Minister," and "The Parables of Our Saviour," 1886; "The Scottish Pulpit," 1887; "Ruth the Gleaner," and "Esther the Queen," 1890; "The Miracles of Our Saviour Expounded," 1890; and "The Boy Jesus and other Sermons," 1893. The degree of D.D. was conferred upon him by both Yale and Amherst Colleges in 1872, and that of LL.D. by Princeton College in 1883. In the spring of 1892 he had a stroke of paralysis, in consequence of which he

resigned his pastoral charge in the following fall, but was made Pastor Emeritus, an honorary position which he holds for life.

TCHIGORIN, T., Russian chess-player, was born at St. Petersburg, Oct. 14, 1850, and entered the Russian Civil Service, which he left to devote himself entirely to chess. His first appearance as an European master was at Berlin in 1881, when he divided the third prize, Blackburn and Zukertort being first and second. He was fourth in the London Tournament of 1883. In 1889 he met Steinitz at Havana, and was beaten by four games out of twenty; but in 1891 he beat him in two games played by cable. In the next year he was defeated by the same player for the championship of the world. His style is always to attack.

TEALE, Thomas Pridgin, M.A., M.B. Oxon., F.R.S., F.R.C.S., was born at Leeds, June 28, 1831, and is the son of Thomas Pridgin Teale, F.R.S., sometime surgeon to the General Infirmary at Leeds, and one of the first members of the General Medical Council nominated by the Queen. He was educated at the Leeds Grammar School, Winchester, Brasenose College, Oxford, and King's College, London. He has been a "Crown nominee" on the General Medical Council since the year 1876, and is now serving his fifth period of five years. He was Lecturer on Anatomy and Surgery in the Leeds School of Medicine, 1856 to 1876; Surgeon to the General Infirmary at Leeds, 1864 to 1884; and subsequently Consulting Surgeon. He was President of the Health Section of the Social Science Congress at Huddersfield, 1883; President of the Public Health Section of the British Medical Association at Liverpool, 1883; President of the Association of Sanitary Inspectors of Yorkshire from 1888 to 1898; and President of the Leeds Philosophical Society from 1889 to 1891. He is the author of "Dangers to Health, a Pictorial Guide to Domestic Sanitary Defects," first published in 1879, now in the 4th edition. This work has been translated into French, Spanish, and Italian, and into German by H.R.H. the Princess Christian, and is now in its 2nd edition. "Hurry, Worry, and Money, the Bane of Modern Education," being the Presidential address in the Health Section of the Social Science Congress at Huddersfield, 1883; "Economy of Coal in House Fires," 1886; "The Principles of Domestic Fireplace Construction," a lecture delivered at the Royal Institution, 1886; "Dust and Fresh Air: How to keep out the one and let in the other," a lecture delivered at the

Society of Arts, 1892; and many contributions to medical literature. In reference to Mr. Pridgin Teale's work on the economy of coal, it is noticeable that the revolution in fireplace construction which has recently taken place in the United Kingdom is the direct result of the principles which the author has been teaching the public for the past twenty years. This revolution, he contends, has led to increase of warmth, a reduction in the consumption of coal, and a marked decrease in the production of soot. He married, in 1862, Alice, daughter of the Rev. W. H. Teale, M.A., Rector of Devizes. She died in 1891. Addresses: 38 Cookridge Street, Leeds; and North Grange, Headingley, Leeds.

TECK, H.S.H. Prince Adolphus Charles Alexander Albert Edward George Philip Louis Ladislaus of, K.C.V.O., was born at Kensington Palace on Aug. 13, 1868, and is the eldest son of H.H. the Duke of Teck and H.R.H. Princess Mary Adelaide. He was educated at Wellington College, and, after passing through the Royal Military Academy at Sandhurst, was gazetted Second Lieutenant in the 17th Lancers in April 1888, and rose to Lieutenant's rank in January 1893. In June 1895 he was promoted to be Captain in the 1st Life Guards. He married, in December 1894, Lady Margaret Evelyn, third surviving daughter of the Duke of Westminster, K.G. Address: 4 Devonshire Place, W.

TECK, H.S.H. Prince Alexander Augustus Frederick William Alfred George of, K.C.V.O., was born at Kensington Palace on April 14, 1874, and is the third son of H.H. the Duke of Teck and H.R.H. the late Princess Mary Adelaide. He was educated at Eton, passed through Sandhurst, and was gazetted in the 7th (Queen's Own) Hussars in October 1894. He served in the operations in South Africa as Acting Staff Officer under Sir Frederick Carrington in 1896, and was mentioned in despatches and awarded a medal. In December 1898 he was created K.C.V.O.

TECK, Captain H.S.H. Prince Francis of, K.C.V.O., D.S.O., is the second son of the Duke of Teck and H.R.H. the late Princess Mary Adelaide. He was born at Kensington Palace on Jan. 9, 1870, and received his education at Wellington and the Royal Military Academy, Sandhurst. He was gazetted Second Lieutenant in the 1st Royal Dragoons in January 1889, and rose to be Lieutenant in August 1891, and Captain in July 1894. He has been A.D.C. to the General Officer commanding at Quetta,

and is a Knight of Justice of St. John of Jerusalem. He fought with distinction in the battles of Atbara and Khartoum (1898), and received the Distinguished Service Order. In December 1898 he was created K.C.V.O.

TECK, Duke of, His Highness Francis Paul Charles Louis Alexander, G.C.B., only son of Duke Alexander of Württemberg and the Countess Claudine, *née* De Rhédey, to whom he wasmorganatically married, was born on Aug. 27, 1837. His Highness served in the Austrian army, was Major in the Austro-Italian Campaign, 1859, and was mentioned in despatches, but resigned after the campaign in 1866. He served on the staff of Lord Wolseley in Egypt in 1882, and received the Egyptian medal and the Khedive's Star, was mentioned in the despatches, and was made colonel unattached, and is now a general in the British army. His Highness is general *à la suite* of the Württemberg dragoon regiment, "Queen Olga"; Honorary Colonel, 1867, of the First City of London Artillery Volunteers; Honorary Colonel, 1874, of the 24th Middlesex Rifle Volunteers, "Post Office"; and President of the Royal Botanic Society of London. His Highness married, on June 12, 1866, H.R.H. the Princess Mary Adelaide, daughter of H.R.H. Prince Adolphus Frederick, Duke of Cambridge, the seventh son of his Majesty King George III. This lady, who was most popular in society, and widely known for her charities and the unassuming cordiality of her manners, died, after a painful illness, at the White Lodge, greatly lamented by her family and the nation, on Oct. 27, 1897. He has issue, their Serene Highnesses (all born at Kensington Palace) the Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes (*q.v.*), born May 26, 1867, married July 6, 1893, to H.R.H. the Duke of York, K.G.; the Prince Adolphus Charles Alexander Albert Edward George Philip Louis Ladislaus, K.C.V.O., born Aug. 13, 1868; the Prince Francis Joseph Leopold Frederick, born Jan. 9, 1870; and the Prince Alexander Augustus Frederick William Alfred George, born April 14, 1874. Address: White Lodge, Richmond Park, Surrey.

TEGETMEIER, William B., F.Z.S., of German extraction, eldest son of G. C. Tegetmeier, Surgeon in the Royal Navy, was born at Colnbrook, Bucks, in 1816, and educated for the medical profession at University College, London. He was Medallist at London University and the Society of Apothecaries, was Lecturer at Government Training College, and Davis

Lecturer at the Zoological Society. Together with Mr. A. Halliday he was first Secretary of the Savage Club. Mr. Tegetmeier is well known as a writer on natural history. He is the author of "The Poultry Book," "Pigeons," "The Natural History of the Pheasants," "Monographs of the Cranes," "Pallas's Sand Grouse," "Poultry for the Table and Market," "The Cottager's Manual of Poultry-keeping," &c., and as having republished many rare ornithological treatises, as "Boddaert's Planches Enluminées" and "Moore's Columbarium." In conjunction with Mr. C. L. Sutherland, of the Indiana Service, he has published an important work on the utilisation of mules for military and agricultural purposes, entitled "Horses, Asses, Mules, and Mule Breeding," 1895. He has devoted much attention to the variation of species, and greatly assisted Darwin in the preparation of his volumes on "The Variation of Animals and Plants under Domestication," and other works. Mr. Tegetmeier has contributed articles to the "Encyclopædia Britannica" and the organ of the British Ornithologists' Union, of which he is one of the old members; and is the author of two text-books on "Domestic Economy," written at the request of the School Board of London, and for the Government Training Colleges. He has been for more than forty years on the staff of the *Field* newspaper, and actively continues his ornithological work. Address: *Field* Office, Bream's Buildings, E.C.

TEMPLE, The Most Rev. Frederick, D.D., LL.D., Archbishop of Canterbury and Primate of All England, son of an officer in the army, Major Octavius Temple, late Governor of Sierra Leone, was born Nov. 30, 1821, in Santa Maura, Ionian Islands. He was educated at the Grammar School at Tiverton, and proceeding to Oxford, became Scholar of Balliol College, and took his degree of B.A. in 1842 as a double first class. He was elected Fellow and Mathematical Tutor of his college, and, having been ordained in 1846, was appointed Principal of the Training College at Kneller Hall, near Twickenham, in 1848. This post he resigned in 1855; and having held an Inspectorship of Schools during the interval, was appointed, on the resignation of Dr. Goulburn, in 1858, Head-master of Rugby School. Dr. Temple, who was a Chaplain to the Queen, gained some notoriety in 1860 as the author of the first of the seven "Essays and Reviews," which caused so much controversy soon after their appearance. The Essay was entitled "Education of the World," and was held, by the timid and partially educated opinion of those

days, to savour of German rationalistic tendencies. At the general election of 1868 Dr. Temple took an active part in support of Mr. Gladstone's measure for the disestablishment of the Irish Church; and the Premier nominated him to the Bishopric of Exeter, in succession to the late Dr. Philpotts—an appointment which caused considerable commotion in clerical circles. The confirmation of Dr. Temple's election took place Dec. 8, 1869, at the church of St. Mary-le-Bow, Cheap-side, when Bishop Trower, as the representative of a portion of the clergy who were opposed to Dr. Temple, because he was the author of one of the "Essays and Reviews," instructed counsel to oppose the election. Counsel were accordingly heard on both sides, and Dr. Temple's election was confirmed by the Vicar-General. Dr. Temple received episcopal consecration at Westminster, Dec. 21, 1869, together with the Bishops-elect of Bath and Wells, and of the Falkland Islands. Dr. Temple published "Sermons preached in Rugby Chapel in 1858-60," in 1861. In April 1883 he was elected Bampton Lecturer at Oxford for the ensuing year. His Bampton Lectures, which might have been delivered by a highly critical man of science, were entitled "The Relation between Science and Religion." They were afterwards published. On the death of Dr. Jackson in January 1885 Dr. Temple was appointed Bishop of London, and was succeeded at Exeter by Dr. Bickersteth. He was appointed Archbishop of Canterbury in December 1896, as successor to Archbishop Benson. As Bishop of London his Grace was known, to the surprise of many, as a conservative and disciplinarian, especially in matters affecting the standard of clerical education and admission to Holy Orders, and since becoming Archbishop he has been a champion of Orthodoxy. Jointly with the Archbishop of York, he issued, in February 1897, a lengthy and learned reply, in English and Latin, to the Pope's Bull on Anglican Orders. The reply, addressed to the whole body of Bishops of the Catholic Church, bears the significant motto, "Give peace in our time, O Lord," and follows throughout the ancient and rational tradition, in matters of doctrine and usage, of such authorities as Hooker. The Archbishop's attitude towards matters ecclesiastical was further emphasised in his Charge, nominally addressed to his diocese, but in reality to the whole Church of England, and delivered by him in Maidstone Parish Church early in October 1898. The gist of the Charge is contained in the sentence, "The ceremonial is the order of the Church; the teaching must be, to a large extent, the voice of the individual."

Besides the works above mentioned, his Grace is the author of many tracts and pamphlets. In October 1898 he was appointed Commissioner under the London University Act to make statutes and regulations for the new University. He married, in 1876, Beatrice, daughter of the late Right Hon. W. S. Lascelles. Together with Mrs. Temple the Archbishop is widely known for the interest he takes in all movements which make for the social welfare of the working-classes, especially of working-women. Club: Athenæum.

TEMPLE, The Right Hon. Sir Richard, Bart., G.C.S.I., C.I.E., F.R.S., D.C.L. Oxon., LL.D. Cantab. and Montreal, son of Richard Temple and Louisa, daughter of James Rivett Carnac, was born in 1826, and entered the third class of the Bengal Civil Service in 1846. Was Secretary to Sir John Lawrence in the Punjab, and First Assistant to the Financiers, James Wilson and Samuel Laing; and eventually was appointed Chief Commissioner of the Central Provinces, and the Political Resident at Hyderabad. He was Foreign Secretary to the Governor-General, and Finance Minister of India from 1868 to 1874. In January 1874 he was appointed to superintend the relief operations in the famine-stricken districts of Bengal. He became Lieutenant-Governor of Bengal in 1875; was created a Baronet in August 1876; and was appointed Governor of the Presidency of Bombay in January 1877, which office he held till March 1880. He was appointed K.C.S.I. in 1867, G.C.S.I. in 1877. He returned home in 1880 in order to accept the candidature offered to him by the Conservative party for East Worcestershire, but was defeated. He sat for the Southern or Evesham division of Worcestershire from 1885 to 1892, after which he sat for the Kingston division of Surrey till 1895, when he retired from Parliament. He was appointed Privy Councillor in 1896. He has been Vice-Chairman of the London School Board; and has been President of the Social Science Congress. He was also the Financial Member of the London School Board from 1885 to 1894. He is the author of "India in 1880"; "Men and Events of my Time in India," 1882; "Oriental Experience," 1883; "Cosmopolitan Essays," 1886; "Palestine Illustrated," 1888; the memoir of "John Lawrence," in the series of English Men of Action, and that of James Thomason for the Clarendon Press series of Rulers of India; "The Story of My Life," 1896; "Sixty Years of the Queen's Reign," 1897; "A Bird's-eye View of Picturesque India," 1898. He was elected a Member of the

Royal Society in 1896. He is a J.P. for Worcestershire. He married (1), in 1849, Charlotte, daughter of B. Martindale (who died in 1855), and (2), in 1871, Mary, daughter of Charles Lindsay. Addresses: The Nash, Kempsey, near Worcester; Heath Brow, Hampstead; and Athenæum.

TEMPLE, Lieut.-Colonel Richard Carnac, C.I.E., the eldest son of Sir Richard Temple, Bart., was born in 1850, and received his first commission in the Indian Staff Corps in 1871. In 1879 he served in the Punjab as Assistant Cantonment Magistrate, and was promoted to be Cantonment Magistrate to Burma in 1887, and Deputy Commissioner in the next year. In 1890 he was Superintendent of the Census Returns, and President of the Rangoon Municipality in 1891. In 1895 he was promoted to the Chief Commissionership of the Andaman and Nicobar Islands, which post he still holds. He has published "Notes on the Transliteration of the Burmese Alphabet," "Wide-awake Stories" (Indian Folk Tales), and has founded *Indian Notes and Queries*. He married, in 1880, Agnes, daughter of Major-General G. A. Searle. Address: Port Blair, Andaman Isles.

TENNANT, Sir Charles, Bart., J.P., D.L., was born on Nov. 4, 1823, and is the son of John Tennant, of St. Rollox, Lanark. He is head of the firm of Charles Tennant, Sons, & Co., Chairman of the Union Bank of Scotland, and director of some twenty companies. His own firm has a large chemical manufacturing business in Glasgow, and employs a very large amount of labour. His other engagements include the chairmanships of most of the "John Taylor" group of Indian gold mines, such as the Champion Reef, the Coromandel, and the Mysore. He is a director of the Nine Reefs, the Road Block, the Balaghat, the Oriental, and the Gold-fields of Mysore in the same interest. He is chairman of the Glasgow Board of the North British and Mercantile Insurance Company, honorary president of the United Alkali Company and of the Steel Company of Scotland, chairman of the Tharsis Sulphur and Copper Company, and director of the Assam Railways and Trading Company, the Linlithgow Oil Company, the New Cycle Company, and the Forth Bridge Railway. He was Liberal M.P. for Glasgow in 1879-80, for Peebles and Selkirk from 1880 to 1886, and as a Gladstonian Liberal contested the Partick Division of Lanarkshire in 1890. He is a trustee of the National Gallery, and was created a baronet in 1885. He married Emma, daughter of Richard Winsloe, of Mount Nebo, Taunton, in 1849. She died in 1895.

Addresses: 40 Grosvenor Square, W.; and Innerleithen, Peebles.

TENNANT, Harold John, M.P., was born at The Glen, Innerleithen, Nov. 18, 1865, and is the third and youngest son of Sir Charles Tennant. He was educated at Eton, and at Trinity College, Cambridge (B.A.). He served as Secretary to the Departmental Committee on "the Various Lead Industries," appointed in 1893, and was appointed Chairman of the Departmental Committee on miscellaneous dangerous trades 1895-98. He was Private Secretary to the Home Secretary, the Right Hon. H. H. Asquith, from 1892 to 1895. Since March 1894 he has been Liberal Member of Parliament for Berwickshire. He married (1) Helen, daughter of Major Gordon Duff, of Drummair (she died in 1892); and (2) Margaret Edith, daughter of G. Whitley Abraham, of Rathgar, co. Dublin, formerly Superintending Inspector of Factories (*q.v.*). Address: 33 Bruton Street, W., &c.

TENNANT, Lieut.-General James Francis, R.E., C.I.E., F.R.S., was born in 1829, and as an officer in the Royal Engineers served through the Indian Mutiny. He was present at the siege and capture of Delhi and Lucknow, was mentioned in despatches (May 1858), and obtained a medal with two clasps and the brevet of major. He was for many years Assistant in the Survey of India, and was Master of the Mint at Calcutta from 1871 to 1874. He was made F.R.S. in 1869. He has contributed some important papers on astronomical subjects to the Astronomical Society's *Monthly Notices*, chiefly on the Transit of Venus of 1874. He reported in the *Astron. Society's Memoirs* "Observations of the Total Eclipse of the Sun on December 11-12, 1871, made by order of the Government of India, at Dodabetta, near Ootacamund." He is Vice-President of the Royal Astronomical Society. He has also written articles on Indian coinage in the *Bengal Asiatic Society's Journal*. Address: 11 Clifton Gardens, Maida Hill, W.

TENNANT, Mrs. (May), daughter of the late George Whitley Abraham, Esq., was born in 1870, at Blackrock, co. Dublin, and married, in July 1896, Mr. H. J. Tennant, M.P., Private Secretary to the Right Hon. H. H. Asquith, Secretary of State. Miss Abraham was appointed in 1892 an Assistant-Commissioner of the Royal Commission on Labour, for the purpose of investigating the conditions of the employment of women in England, and presented a valuable report. She was appointed in 1893 one of her Majesty's Inspectors of Factories, and in April 1896

was promoted to be the Superintending Inspector. She resigned that office in June 1897, having fulfilled its duties to the satisfaction of the Government and the advantage of the public, as the Secretary of State acknowledged in handsome terms. In June 1895 she had been appointed a member of a Home Office Committee on Dangerous Trades. In January 1896 she published a work on "The Law relating to Factories and Workshops," which reached a second edition in January 1897, and is acknowledged to be of authority. Mrs. Tennant has been called to the chair of the Industrial Law Committee for the enforcement of the law and the promotion of future reform, a body which has for its objects the supplying information as to the legal protection of the industrial classes with regard to the conditions of their trade, the watching over breaches of the law and securing its more effective administration, and its amendment where it is defective. In this and in other ways it is hoped that Mrs. Tennant, though she has retired from official life, may long continue her distinguished services. Address: 33 Bruton Street, W.

TENNIEL, Sir John, artist, born in London in 1820, was educated at Kensington. At a very early age he showed a taste for art, and whilst a boy his first picture was exhibited, and sold at the Gallery of British Artists in Suffolk Street. He studied art in his own way, and may be said to have been entirely self-taught. He was a successful candidate in one of the cartoon competitions in Westminster Hall in 1845, painted a fresco in the Palace at Westminster, and has produced many pictures since, chiefly for private collections. In 1851 he became a member of *Punch's* staff, and from that time has contributed to the illustration of that periodical. For many years he has, without the break of a single week, produced the political cartoon, and may thus claim a place not only as an artist but as a historian of the time. It is impossible to specify any of these illustrations, their number being already enormous, but mention should at least be made of the "Old Pilot Cartoon," representing the late Prince Bismarck and his Imperial master, habited respectively as a pilot and a skipper, the latter of whom watches the former as he casts off from the ship of state in his pilot-boat. Nor should the long and famous series of Gladstone and Beaconsfield cartoons be forgotten. Sir John Tenniel has illustrated, wholly or in part, many Christmas books and other works, amongst which may be mentioned "Æsop's Fables," "Lalla Rookh," "The Ingoldsby Legends," and *Once a Week*. He is also the illustra-

tor of "Alice's Adventures in Wonderland," and its sequel, "Through the Looking-Glass," but has long since entirely discontinued making drawings for "book illustration"; he has been for many years a member of the Royal Institute of Painters in Water-Colours, and received the honour of knighthood in 1893. A selection of his best-known *Punch* cartoons were exhibited at the rooms of the Fine Art Society in 1895. Address: 10 Portsdown Road, Maida Hill, N.W.

TENNYSON, Lord, Hallam Tennyson, K.C.M.G., J.P., Governor and Commander-in-Chief of South Australia, was born on Aug. 11, 1852, and is the eldest son of the late Alfred, Lord Tennyson, Poet Laureate and 1st Baron Tennyson of Aldworth, Blackdown, Sussex, and of Freshwater, Isle of Wight, whom he succeeded in 1892. He was educated at Marlborough and at Trinity College, Cambridge, and on leaving the University was his illustrious father's close companion and private secretary to the end of the poet's life. To him we owe the authoritative biography of Lord Tennyson published in 1897, under the title of "Alfred Lord Tennyson: a Memoir," in two vols. His appointment as Governor and Commander-in-Chief of South Australia in succession to Sir Thomas Fowell Buxton, G.C.M.G., was popular, although it came as a surprise to many. He was made K.C.M.G. on his appointment in February 1899, and shortly afterwards proceeded to his colony accompanied by Lady Tennyson. He is a Member of the Inner Temple, a J.P. for Hants, and a Member of the Executive Councils of Marlborough College and the Gordon Boys' Home. Besides the book above mentioned, he has edited "Poems by Two Brothers," Charles Turner's "Collected Sonnets," &c., and has contributed both in verse and prose to the magazines. In 1884 he married Audrey, daughter of Charles Boyle, and granddaughter of Admiral the Hon. Courtenay Boyle. He owns the houses of Blackdown and Freshwater, so long associated with his father's name, and his London address is 134 Sloane Street. He is a member of the Athenæum.

TERBY, François Joseph Charles, was born on Aug. 9, 1846, at Louvain, Belgium, in which city he was educated; and in 1869 he obtained the degree of Docteur-ès-Sciences. As early as 1862 he had begun making astronomical and occasional meteorological observations; and these he has never abandoned, though for some years he was Lecturer on Physics at the University of Louvain. He has now in his private observatory an eight-

inch equatorial by Grubb, which he devotes chiefly to planetary and lunar work. His papers have mostly been inserted in the publications of the Royal Academy of Belgium. Dr. Terby is a Member of the Commission d'Inspection de l'Observatoire Royal de Belgique; Correspondent of the Academy of Sciences of Belgium; and Foreign Member of the Royal Astronomical Society of London.

TERRY, Edward O'Connor, actor and proprietor of Terry's Theatre, London, was born in London, March 10, 1844, and is the son of John Terry, actor. He was educated privately, made his first histrionic attempt as an amateur with the Thespian Dramatic Club, and showing promise as an actor, entered the profession in 1863. He played at Woolwich, Rochester, Sheffield, and Belfast. On leaving Belfast he became a member of Mr. Charles Calvert's company at the Prince's Theatre, Manchester. In 1867 he made his debut in London, at the Surrey Theatre. In 1868 he appeared at the Lyceum Theatre, under the management of the late Mr. E. T. Smith. After remaining the season, he accepted an engagement from Mr. Swanborough for the Strand Theatre, where he played Paul Pry for ninety-five consecutive nights, the longest run of the play on record. He next became a member of the Gaiety Company in 1876, where he has played in "Little Don César de Bazan," "Bohemian Gyrl," "Little Doctor Faust," "Robbing Roy," "Forty Thieves," and "Bluebeard." Latterly he has given up burlesque, appearing in comedy parts, as Walkinshaw in "The Rocket"; Montague Jolliffe in "In Chancery," &c. In May 1885 he fulfilled his last engagement at the Gaiety, and travelled in the provinces, where he has produced a new farcical comedy entitled "The Churchwarden," adapted from the German by himself, and presented for the first time (in London) at the Olympic Theatre, Thursday, Dec. 16, 1886. Mr. Terry is now proprietor of a theatre called by his name, which was erected in the Strand during 1887; in which house he produced and played Dick Phenyl, the kind-hearted eccentric barrister, in "Sweet Lavender," which was performed 670 consecutive times, and has been revived 1898-99. Mr. Terry was invited to speak at the Church Congress at Cardiff, and read to an audience of over 2000 a paper on "Theatres as an Amusement for the People," and was compelled to repeat it (the same night) at an overflow meeting. Of late years Mr. Terry has been on tour. During part of 1897-98 he acted, at his own theatre, the principal part in the "White Knight," a comedy dealing with the doings of a

Quixote among company directors. Mr. Terry is well known as a Freemason and public man. He is Past Grand Treasurer of English Masons, Treasurer of the Royal General Theatrical Fund, President of the Theatrical Fire Fund, a Trustee of the Dramatic Sick Fund, member of the Strand District Board of Works, and Vice-President of three large London hospitals. He has travelled much in all parts of the world. Address: Priory Lodge, Barnes, Surrey.

TERRY, Miss Ellen (Alice), actress (Mrs. E. A. Wardell), was born at Coventry, Feb. 27, 1848, and made her first appearance on the stage at the Princess's Theatre under the management of Mrs. Charles Kean, playing the parts of Mamilus in "Winter's Tale," and Prince Arthur in "King John," and remained with the Keans until they gave up management in London. Miss Terry next appeared at the Royalty Theatre, and afterwards at the Haymarket, learning her first steps in legitimate comedy in this the London Comedy Theatre. Then followed a short engagement at the Queen's Theatre, with Mr. and Mrs. Wigan at the head of affairs, where she played in the "Taming of the Shrew," and acted for the first time with Mr. Henry Irving. Leaving the stage for seven years she returned to the Queen's Theatre, making her reappearance as Philippa Chester in Charles Reade's "Wandering Heir." In 1875 Miss Terry was engaged by Mr. Bancroft to play at the Prince of Wales's Theatre. In 1876 Lord Lytton's play, the "House of Darnley," was produced by Mr. John Hare, at the Court Theatre, and in this play Miss Terry took the principal character. She remained at the Court Theatre until Mr. Hare gave up its direction. On Mr. Irving taking the management of the Lyceum Theatre, he was enabled to secure the services of Miss Ellen Terry, who made her first appearance at that theatre on Dec. 30, 1878, playing Ophelia to the Hamlet of Mr. Irving. "Hamlet" was followed by the "Lady of Lyons," in which she played Pauline. Her subsequent parts have been Portia, Viola, Beatrice, Juliet, Henrietta Maria in Mr. W. G. Wills's "Charles I.," Camma in Tennyson's "Cup," and Ruth Meadows in "Eugene Aram." She went on American tours with Mr. Irving in 1883, 1884, 1887, 1893, and 1894, and won great applause. During 1889 she visited Germany, and after her return had the honour of appearing before the Queen at Sandringham. Her later appearances have been as Marguerite in the late W. G. Wills's "Faust," which was revived in 1894, as Lucy Ashton in "Ravenswood," as the heroine in

"A Dead Heart," as Queen Catherine in "Henry VIII.," as Lady Macbeth, and Cordelia, as Rosamonde in "Becket," 1893, as Guinevere in "King Arthur," 1895, as Imogen in "Cymbeline," 1896, as Madame Sans-Gêne in the English version of the play of that name in 1897, and as the ci-devant Marquise in "Robespierre," 1899. Miss Terry's son plays under the name of "Gordon Craig," and made a spirited appearance in "A Dead Heart," &c. Address: Lyceum Theatre, Strand.

TERRY, Fred, was born in London in 1865, and is the youngest of the Terry family. He was educated in France and at Geneva, and made his first appearance on the stage in 1880, when at the age of fifteen he appeared at the Haymarket, at the beginning of the Bancrofts' tenancy of that theatre. He is well known as an actor of romantic parts, both here and in America, and is married to Miss Julia Neilson (*q.v.*), to whom, as leading lady, he has played in "Hypatia," "As You Like It," &c. Address: 27 Elm Park Gardens, S.W.

TERRY, Mrs. Fred. See NEILSON, JULIA.

TERRY, Kate (Mrs. Arthur Lewis), was first seen as Arthur in Kean's performance of "King John," on which occasion Lord Macaulay, who was present when the play was represented before the Queen at Windsor, wrote to the effect that "The little girl who acted Arthur did wonders. It is almost worth while to be past middle life to see Miss Kate Terry play this." This was the first of many Shakespearian triumphs. She played as Cordelia to Charles Kean's King Lear, at the Princess's; as Ophelia to Fechter's Hamlet, at the Lyceum; as Ariel, and as the Boy in "Henry V.," at the Princess's; and as Juliet to Henry Neville's Romeo, at the Adelphi. She doubled the parts of Viola and Sebastian in "Twelfth Night." For some time she appeared in romantic drama at the Olympic, and achieved one of her chief successes at the St. James's, when, as understudy to Miss Herbert, she played in Horace Wigan's "Friends and Foes," a version of "Nos Intimes." Other famous impersonations were as Monee in "Up at the Hills," an Anglo-Indian drama; as Lena in "Bel Demonio," where she played to Fechter, as the original Blanche de Nevers, in that great actor's production of "The Duke's Motto"; and as the original Mary Leigh in Bonicault's "Hunted Down," a play in which Irving took the part of Rawdon Soudamore. She made the part of Alice in Tom Taylor and Dubourz's play of

"A Sister's Penance," produced at the Adelphi, and won laurels as Dora in Charles Reade's play founded on Tennyson's poem. She returned to the stage in the spring of 1898 in "The Master," produced by Mr. John Hare at the Globe.

TESLA, Nikola, electrician and inventor, was born at Smiljau, near the border of Austro-Hungary, in Servia, in 1857. He was educated in the public schools, and then went to a Real Schule at Karlstadt, where he graduated in 1873; he devoted himself to experiments in electricity and magnetism, much against the wishes of his father (himself a priest of the Greek Church), who had intended him for a priest; but his genius was so strong in the direction of mechanics that he was allowed to continue his studies at the Polytechnic School at Gratz, and later studied languages at Prague and Budapest to qualify himself thoroughly for the engineering profession. He served a short time in the Government telegraph engineering department as an assistant, and later he went to Paris and was employed by one of the large electric lighting companies in 1881. About a year later he went to America, and has since made his home in the United States. He found employment at once in the establishment of Thos. A. Edison, for whom he has always had the greatest admiration; but later he worked independently in a different part of the field of electrical investigation. He was the first to devise a method of utilising effectively the undulating current, and has made many startling innovations and inventions in using currents of high tension. He has lectured before the highest scientific authorities in London, Paris, and New York.

THACKERAY, Miss Anne Isabella. See RITCHIE, ANNE ISABELLA.

THEEBAW, ex-King of Ava (Burma), whose Burmese titles are Theebaw Min, His Most Glorious and Excellent Majesty, &c., is the eleventh king of the Alompra Dynasty, founded in 1853 by the first Burmese king of that name. He was born in 1858, and succeeded his father, Mindong Min, in October 1878. He was placed on the throne by the intrigues of the favourite Queen of the late King, who assumed the position of Dowager-Queen, and caused Theebaw to be proclaimed, at the same time forming an alliance between Theebaw and her second daughter, Soo Pyah Lat, whom he married shortly after his accession. His reign was unfortunately remarkable for palace orgies, and for the murder of his

relatives, followers, and servitors. Anarchy and misrule reigned throughout his kingdom. Theebaw sought to injure British trade and influence by placing the control of the whole commerce of his country and the taxation of the frontier in the hands of French agents, and took away the teak forests from British *cessionnaires* to give to French monopolists. For some time he endeavoured to establish relations with foreign agents, and to contract agreements or alliances, with the object of creating a situation full of embarrassment for the English Government. In November 1885 an ultimatum was despatched to King Theebaw, but the proposals for an amicable settlement were refused. General Prendergast then sailed up the Irrawaddy to his capital, and proclaimed his deposition and the annexation of Upper Burma to England. Theebaw surrendered on November 29, and shortly afterwards was sent first to Rangoon, thence to British India, where he still remains.

"THEODORUS." See MULLINGER, JAMES BASS.

THETFORD, Bishop of. See LLOYD, THE RIGHT REV. ARTHUR THOMAS.

THIBAUDIN, Jean, a French general, was born at Moulins-Engilbert (Nièvre), Nov. 13, 1822, and received his military education at Saint-Cyr. He first saw active service in Africa, and afterwards went through the Italian campaign. On the outbreak of the Franco-Prussian war he was sent as Lieut.-Colonel to serve under General Frossard, took part in the battles of Forbach and Rezonville, and was taken prisoner after Bazaine's capitulation at Metz. He succeeded, however, in escaping, and made his way back to the French army, where, under an assumed name, he commanded a regiment. After the conclusion of peace he was promoted Colonel, and in 1882 became General. In 1883 he succeeded General Billot as Minister of War, and at once appeared as a prominent Radical, hostile to the Orleans Princes. By his order the Duc d'Aumale and the Duc de Chartres were placed on the retired list. On the visit of the late Alfonso XII., king of Spain, to Paris, in September 1883, General Thibaudin was thought to be compromised in the hostile demonstrations that took place, and he was dismissed from the Ministry, Oct. 5, 1883. In 1885 he resumed his duties as a Member of the Committee of Infantry. In December 1886 he was appointed Commandant of Paris. In 1885 and 1889 he presented himself first as a Radical, then as a Radical-Boulangist,

for election to the Chamber of Deputies, but on both occasions he was defeated.

THICKNESSE, The Right Rev. Francis Henry, D.D., Suffragan Bishop in the Diocese of Peterborough, Archdeacon of Northampton, Canon of Peterborough, was born on May 14, 1829, and is the second son of the Rev. H. E. Coldwell, Prebendary of Lichfield. He was educated at Brasenose College, Oxford, of which he was a scholar (M.A. 1856; B. and D.D. 1879), was successively Vicar of Deane, Lincs., and Brackley, Northants; was Hon. Canon of Manchester from 1863 to 1875, when he was appointed Canon of Peterborough. He was appointed Suffragan Bishop of Peterborough in 1888, and became Rector of Oxendon, Northamptonshire, in 1892. He assumed the name and arms of Thicknesse by Royal license in 1859. He married (2) a daughter of Dean Argles, of Peterborough. Address: Oxendon Rectory, Northamptonshire.

THISELTON-DYER, Sir William Turner, K.C.M.G., C.I.E., M.A., LL.D., Ph.D., F.R.S., son of the late W. G. Thiselton-Dyer, M.D., was born in the parish of St. James, Westminster, July 28, 1843, and educated at King's College School, where he was first class Mathematical Scholar, at King's College, and at Christ Church, Oxford, where he became Junior Student in 1863. He obtained a second class in Mathematics, a first class in Natural Science in the Final Schools, 1867, the B.Sc. London, 1870, and the M.A. Oxford in 1873. He is also Hon. Fellow of King's College, London. He has held successively the following appointments: Professor of Natural History at the Agricultural College, Cirencester, 1868; Professor of Botany at the Royal College of Science for Ireland, 1870; Professor of Botany, Royal Horticultural Society, 1872; Assistant-Director of the Royal Gardens, Kew, 1875; and Director, 1885. At the International Phylloxera Congress, Bordeaux, 1881, he was the representative of New South Wales, South Australia, and Victoria. He has been a Royal Commissioner for the Melbourne Centennial International Exhibition of 1888, and is the same for the Paris Exhibition of 1900. In 1873 and several succeeding years Mr. Thiselton-Dyer delivered in the Schools of the Science and Art Department, South Kensington, courses of instruction in Botany to teachers in training. In these a new treatment of the subject was developed; the leading types of vegetable organisms were described and practically demonstrated, and for the first time the same methods of class exposition

were applied to the vegetable kingdom as were more or less in general use for the animal kingdom. Mr. Thiselton-Dyer was Examiner in Botany in the Science and Art Department, South Kensington, in 1873-85. He examined in Botany and Vegetable Physiology in the University of London during the years 1878-83, and was a Member of the Senate in 1887-90. At Kew he has been specially occupied with the development of botanical work and the organisation of botanical departments in the Colonies and India. In 1885 he organised a system of botanic stations for the West Indies, which has since been extended to our African possessions. In recognition of these services he received in 1891 the Clarke Medal from the Royal Society of New South Wales. He was a member for India of the Governing Body of the Imperial Institute, 1891-93; and was made Ph.D. of the Acad. Leop. Car. 1891; Honorary LL.D. Glasgow, 1896; V.P.R.S., 1896-97. He was created K.C.M.G. at New Year, 1899. He has published "Flora of Middlesex," 1869 (with Dr. Trimen); an English edition of "How Crops Grow," 1869 (with Professor Church); and an English edition of "Sachs's Text-Book of Botany," 1875 (with Mr. A. W. Bennett). He is now engaged in editing the "Flora of Tropical Africa" for the British Government, and the "Flora Capensis" for the Governments of Cape Colony and Natal. He also edits the "Kew Bulletin of Miscellaneous Information," commenced in 1887 at the instance of the House of Commons for the purpose of assisting colonial and commercial interests in vegetable products. Sir Thiselton-Dyer married, in 1877, a daughter of Sir J. D. Hooker, G.C.S.I., late Director of Kew Gardens. Addresses: Kew Gardens, Surrey; and Athenæum.

THOMAS, Annie. See CUDLIP, MRS. PENDER.

THOMAS, Brandon, was born at Hull in 1865, and was educated by a private tutor and at a private school, but his family suffering great pecuniary losses, he was at an early age apprenticed to a Liverpool shipwright. Subsequently he became a clerk to a firm of timber merchants at Hull, and while in this employ he made his mark as a reciter and gave promise of his powers as a dramatist. In 1879 he was induced to try his fate as an actor in London, and his first part was given him by Mr. John Hare, when he appeared as Sandy McPibroch in the "Queen's Shilling." For a long period subsequent to this first appearance, he was only able to obtain small parts and matinée engagements, and was at last glad to proceed to

America in Miss Rosina Vokes's Company. He played leading light-comedy parts, and his talents were at once recognised by the Transatlantic public. Mr. Thomas is the author of the following plays, in the leading rôles of several of which he has appeared: "Comrades," 3 acts (appeared December 1882, at the Old Court Theatre); "The Colour-Sergeant," 1 act (February 1885); "The Lodgers," 3-act farce (January 1887); "A Highland Legacy," 1 act (November 1888); "The Gold Craze," 4 acts (November 1889); "A Lancashire Sailor," 1 act (June 1891); "Charley's Aunt," 3 acts (February 1892), which is said to have brought him a fortune; "Marriage," 3 acts (May 1892). "Comrades" and "Marriage" were written in collaboration; and "A Lancashire Sailor" and "A Highland Legacy" formed, with the "Pantomime Rehearsal," a programme of three short plays which, under the title of the "Triple Bill," was for some time substituted for the customary three-act play constituting an evening's entertainment. His most notable recent appearance was in "Sowing the Wind," at the Comedy. He is understood to be now entirely devoted to play-writing.

THOMAS, Theodore, Mus. Doc., was born at Esens, Hanover, Germany, Oct. 11, 1835. He first played in public at the age of six. In 1845 his family removed to the United States, and for two years he played violin solos at concerts in New York. He then travelled for a time in the South, and returning to New York in 1851, he played at concerts and at the opera; at first as one of the principal violinists, and afterwards as orchestral leader, until 1861. In connection with others he began a series of Chamber Concerts in 1855, which were continued until 1869. His first symphony concerts were given in 1864-65, and extended (excepting from 1869 to 1872) until he left New York in 1878, to take the direction of the College of Music at Cincinnati. He remained in Cincinnati until 1880, when he resigned this position and returned to New York. With brief intervals he was conductor of the Brooklyn Philharmonic Society from 1862 to 1891, and of the New York Philharmonic Society from 1878 to 1891. From 1866 to 1878 he gave a series of summer concerts nightly in various cities; and in 1869 he made his first concert tour in the Eastern and Western States, which he has repeated from time to time since. He has conducted eight musical festivals in Cincinnati (1873, 1875, 1878, 1880, 1882, 1884, 1886, and 1889), two in Chicago (1882 and 1884), and one in New York (1882). In the winter of 1885-86 he organised a series of popular concerts in New York, and during the same

season was conductor of the American Opera Company. In 1891, Mr. Thomas left New York to take the Conductorship of the Chicago Symphony Orchestra and the Directorship of the Music of the World's Columbian Exposition, and has since then resided in Chicago. Mr. Thomas has unquestionably done more than any one else to raise the musical standard in America during the past thirty years.

THOMAS, William Lusson, managing director of the *Graphic* and *Daily Graphic*, was born on Dec. 4, 1830, and was educated privately. He is the younger brother of the late George H. Thomas, the well-known artist, and the youngest son of William Thomas, shipbroker, of London. At the age of sixteen he went to Paris; then to New York; afterwards to Rome, where he studied drawing with his brother. In 1848 he returned to London, and was articulated pupil to James W. Linton, the wood engraver; and two years afterwards commenced business on his own account, with great success. He employed his spare time in painting, and was elected an Associate of the Institute of Painters in Water-Colours, and a few years afterwards full member; since which time he has been a constant exhibitor. The Institute deciding to alter their laws and admit all artists' works at their exhibition, it was proposed to build a new gallery for the advancement of Water-Colour Art in Piccadilly, and invite the senior society and the Royal Water-Colour to amalgamate. Mr. W. L. Thomas was very active in this attempt, viz., to have only one large Water-Colour Exhibition, but, unfortunately for the advancement of Water-Colour art, was not successful; he, however, succeeded in obtaining the principal portion of the large capital required, and was elected Chairman of the Piccadilly Art Galleries Co. The building embraces the picture galleries of the Institute and Prince's Concert Hall. In 1869 he established the *Graphic*, and was decorated by the French Government "Officier de l'Instruction Publique." In 1890 he attempted the even more formidable task of starting a daily illustrated paper—the *Daily Graphic*, which has long been firmly established. He married, in 1854, Miss Annie Carmichael. Addresses: Weir Cottage, Chertsey; and 31 Brixton Hill, S.W.

THOMAS, William Moy, was born in Hackney, London, in 1828, and is the youngest son of Moy Thomas, solicitor. He was educated by private tutors, and became one of Charles Dickens's "young men" in 1851, when he joined the staff of *Household Words*, for which celebrated journal he wrote for some seven years.

Subsequently he joined the staff of the *Athenaeum*, and has since then been a contributor to many important journals and reviews. He was the first editor of *Cassell's Magazine*, in which his novel, "A Fight for Life," appeared in 1866-67. He joined the staff of the *Daily News* in 1868, and has for many years been prominently before the public as its dramatic critic. From 1875 to 1879 he was also dramatic critic to the *Academy*. He is Honorary Secretary of the Copyright Association, Fellow of the Institute of Journalists, and member of Committee of the Society of Authors. He has published an edition of William Collins in the Aldine Poets, and of the works of Lady Mary Wortley Montagu, with life; also "When the Snow Falls," 1859; and "Pictures in a Mirror," 1861. Address: 18 Overstrand Mansions, Chelsea Reach, S.W.

THOMPSON, Edmund Symes, M.D., F.R.C.P., is the third son of the late Theophilus Thompson, M.D., F.R.S., Physician to the Hospital for Consumption, Brompton; author of "Annals of Influenza"; Clinical Lectures on "Pulmonary Consumption," &c. Dr. Symes Thompson was born in London on Nov. 16, 1837, and was educated at St. Paul's School and at King's College Hospital. At the M.B. examination of the University of London he obtained the Scholarship and Gold Medal in Medicine. He took the M.D. Lond. in 1860, and was appointed in the same year Assistant-Physician to King's College Hospital. In 1864 he was elected Assistant-Physician to the Hospital for Consumption at Brompton, Physician in 1871, and Consulting Physician in 1889. In 1867 he became Professor of Physic in Gresham College (founded A.D. 1574); Fellow and (for four years) Secretary of the Royal Medical and Chirurgical Society; Fellow and (for three years) Secretary and Vice-President of the Medical Society of London; and F.R.C.P. in 1868. He is also Physician to the Equity and Law Assurance Society, and to the Artists' Annuity and Benevolent Funds, and is Chairman of the Society for Training Teachers of the Deaf, at Ealing. In 1894 he was Provost of the Guild of St. Luke. He is editor of the 2nd edition (with additional chapters) of "Lectures on Pulmonary Consumption," and author of "Influenza, an Historical Survey," "Gout in Relation to Life Assurance," "Essays on the Influence of Cod-liver Oil," on "Sciatica," on "Mediastinal Growths," on "Indigestion in Early Phthisis," on "The Elevated Health Resorts of the Southern Hemisphere," "Gresham Lectures," on "Coughs and Colds," on "South Africa as a Health Resort," on "Winter Alpine Health Re-

sorts," on "Sea Voyages," articles on Devonshire and the Channel Islands, and on the "Climates and Baths of England," issued by the Royal Medical and Chirurgical Society. In 1872 he married Elizabeth, daughter of the Rev. H. G. Watkins. Address: 33 Cavendish Square, W.

THOMPSON, Sir Edward Maunde, K.C.B., F.S.A., Hon. LL.D. of St. Andrews, Hon. D.C.L. of Oxford and of Durham, Hon. Fellow of University College, Oxford, Correspondent of the Institute of France and of the Royal Prussian Academy of Sciences, is the eldest son of the late Edward Thompson, Custos of Clarendon, Jamaica. He was born May 4, 1840, in Jamaica, and was educated at Rugby and Oxford. He was appointed an Assistant in the British Museum in May 1861, became Assistant-Keeper of the MSS. in 1871, and was appointed Keeper of the MSS. in 1878, and Principal Librarian and Secretary in 1888. Sir E. M. Thompson, who is a barrister of the Middle Temple, has edited "Chronicon Angliæ, 1328-1388" (in the Rolls Series), 1874; "Letters of Humphrey Pricdeaux" (for the Camden Society), 1875; "Chronicon Adæ de Usk, 1377-1404" (for the Royal Society of Literature), 1876; "Correspondence of the Family of Hatton" (for the Camden Society), 1878; "Diary of Richard Cocks, in Japan, 1615-1622" (for the Hakluyt Society), 1883; jointly with Professor Jebb, the facsimile of the "Laurentian Sophocles" (for the Hellenic Society), 1885; "Chronicon Galfridi le Baker de Swynebroke, 1303-1356," 1889; and "Adæ Murimuth Continuatio Chroniconum, 1303-1347," with "Robertus de Avesbury de gestis mirabilibus Regis Edwardi Tertii" (in the Rolls Series), 1889. He was joint editor of the publications of the Palæographical Society from 1873 to 1893, and in 1893 published a "Handbook of Greek and Latin Palæography" in the International Scientific Series. In the summer of 1898 the Trustees of the British Museum changed the official title of Sir Edward Maunde Thompson from "Principal Librarian and Secretary" of the British Museum to "Director and Principal Librarian." This change was effected in order to remove misapprehension as to his actual position at the head of the national collection. He is married to Georgina, only child of George Mackenzie, of Frankfield, Jamaica. Addresses: The British Museum; The Hollies, Brasted, Kent; and Athenæum.

THOMPSON, Francis, the son of a medical man in Lancashire, and the nephew of the Rev. Edward Healy Thompson, one of the Oxford seceders to the

Roman Catholic Church, was educated at Ushaw College, near Durham. Subsequently, while studying medicine at Owens College, Manchester, he decided to devote himself to literature. Coming to London, he endured a time of suspense which was ended by the acceptance of his first contributions to *Merry England*. Mr. Thompson's poems soon won the admiration of Mr. Browning, Mr. Coventry Patmore, and others; and his first volume, when it appeared at the end of 1893, ran instantly through edition after edition, and attracted an admiration not often expressed towards a poet by his contemporaries. His later volumes are "Sister Songs," 1895; and "New Poems," 1897. Address: 47 Palace Court, W.

THOMPSON, Sir Henry, Bart., F.R.C.S., M.B. Lond., born at Framlingham, Suffolk, Aug. 6, 1820, is the only son of Henry Thompson, of Framlingham, and Susannah, daughter of Samuel Medley. He was educated at University College, London, was appointed Assistant-Surgeon of University College Hospital, London, in 1853, Surgeon in 1863, Professor of Clinical Surgery in 1866, and Consulting Surgeon in 1874. In 1884 he held the post of Professor of Surgery and Pathology to the Royal College of Surgeons, London. He gained the Jacksonian Prize of the Royal College of Surgeons in 1852, with an essay on "The Pathology and Treatment of Stricture of the Urethra"; and the same prize in 1860, with an essay on "The Healthy and Morbid Anatomy of the Prostate Gland," both which, together with his "Clinical Lectures" and his work on "Practical Lithotomy and Lithotripsy," have run through numerous editions here, and have been translated into all the chief European languages. After performing a difficult but successful operation upon the late King of the Belgians, in 1863 he was appointed Surgeon Extraordinary to his Majesty, and to the present King in 1866. He is an honorary member of the Society of Surgery in Paris, of the French Society of Hygiene, and of that of Italy; also an honorary member of l'Accademia de' Quiriti at Rome, and of the Royal Society of Fine Arts of Antwerp, besides numerous other foreign societies; he became an officer of the Order of Leopold in 1864, and a Commander of the same Order in 1876. He was knighted in 1867. Two articles written by him in the *Contemporary Review*, in 1874, drew public attention to the subject of cremation. Sir Henry has since written other articles on the same subject; and in the *Contemporary Review* in 1872, a paper on "The Prayer for the Sick: hints towards a serious attempt to estimate its value." At various times

since 1879 he has written on matters relating to Food and Diet, in the *Nineteenth Century*; also a work entitled "Food and Feeding," the 9th edit. of which, much enlarged, has been issued in 1898. Sir Henry Thompson studied painting under Mr. Elmore and Mr. Alma Tadema, and he has frequently exhibited pictures at the Royal Academy, in the Salon of Paris, and elsewhere. He is also known as the author of two novels under the pseudonym of "Pen Oliver"; the former entitled "Charley Kingston's Aunt"; the second "All But," which met with considerable success. More recently he has written a small work entitled "Diet in relation to Age and Activity," followed by "Modern Cremation, its History and Practice," of which several editions have appeared. He has been President of the "Cremation Society of England" since 1874, when it was founded, and has taken an active part in advocating the practice here and abroad. For many years he has devoted himself at several times (first in 1874) to the object of exposing the inefficient method of certifying the cause of death in all cases adopted throughout Great Britain, and the total neglect of it in many. He was at length mainly instrumental, by letters to the *Times* on the well-known case of Matilda Clover, whose death had been caused by criminal poisoning in 1892, in securing public attention to the subject, and by means of a deputation to the Home Secretary bringing it under the notice of the Government, who ordered a select committee of inquiry on "Death Certification." The result was a report completely justifying the allegations made, adopting the remedies which had been suggested by him on the part of the Cremation Society, and recommending "that in the interest of public safety such regulations should be enforced by law" (p. xxii.). It forms a blue-book issued under the above title in 1893. He was created a Baronet at the New Year, 1899. In 1851 he married Kate Fanny, daughter of George Loder, of Bath. Addresses: 35 Wimpole Street, W.; and Athenæum.

THOMPSON, The Rev. John, A.M., was born in the city of Carlisle more than sixty-four years ago. He is to a large extent a self-made man. Losing his father at the age of four, his early training was conducted by his mother. During leisure hours he studied Latin and Greek. He entered Glasgow College in 1843, and left it in 1848, after taking the degree of M.A. In Greek classics he obtained two prizes, and in Moral Philosophy one, awarded by the votes of his fellow-students. During his theological course at the United Presbyterian Divinity Hall, in Edinburgh, he

obtained four scholarships, varying in value from £15 to £31, 10s. He was ordained to the ministry in West Calder United Presbyterian Church in 1852. There he laboured more than six years; was then translated to St. Paul's, Birkenhead; and thence, after fourteen years, was removed in 1872 to Westmoreland Road Presbyterian Church, Newcastle-on-Tyne. Mr. Thompson gave his chief strength to ministerial work, and was favoured with much success. At his ordination in West Calder the membership of his church was 250; at his removal it was 375. At his induction in St. Paul's Church, Birkenhead, the members were 33; at his leaving they were 153. In 1872 the members of Westmoreland Road Church were about 130; at the end of 1889 they were over 600. He was unanimously chosen Moderator of the Presbyterian Church of England by the Synod of 1890. There he delivered an inaugural address on "The Spiritual Success of Christianity." He has been on the Newcastle-on-Tyne School Board. For many years he has been Chairman of the Works Committee; and throughout his career he has done everything in his power to secure for England the benefits of a liberal education. He published "Life-Work of Peter the Apostle," in 1870; and "Life and Writings of John the Apostle," in 1882.

THOMPSON, Joseph, F.R.G.S., African explorer, was born at Penpont in 1858, and at the age of twenty, visited Central Africa in company with the late Keith Johnston, and assumed the command of the expedition on the death of his chief. In 1884 he began his famous journey to Masai Land, and was successful in reaching the north-eastern corner of Lake Victoria Nyanza. He published a description of his journey under the title of "Through Masai Land." In 1888 he started on an expedition to Morocco, during which he crossed the Atlas chain of mountains in six different places. In 1889 he published "Travels in the Atlas and South Morocco." He has received the Gold Medal of the Royal Geographical Society, and is also Gold Medallist in geology and zoology at the University of Edinburgh.

THOMPSON, The Right Hon. Sir Ralph Wood, K.C.B., was born in 1830, and in 1853 became a clerk in the War Office, of which he was appointed Registrar in 1854. In 1871 he rose to be Chief Clerk, and in 1877 was appointed Under-Secretary of State for War. From 1878 to 1895 he was Permanent Under-Secretary for the War Department. He was created K.C.B. in 1882, and was sworn of the Privy

Council in 1895. Addresses: 16 Somerset Street, Portman Square, W.; and Little Woolpits, Ewhurst, Surrey.

THOMPSON, Professor Silvanus Phillips, F.R.S., D.Sc., M.D. Königsb., was born in York, June 19, 1851, and is the son of Silvanus Thompson, of York. He was educated chiefly at Bootham School, York, the Founders Institute, Pontefract, and the Royal School of Mines. He took the degree of B.A. Lond., 1869; B.Sc. Lond. (bracketed first in Honours), 1876; and D.Sc. Lond., 1878. He was appointed Science Master, Bootham School, York, 1874; Lecturer in Experimental Physics, University College, Bristol, 1876; Professor of Experimental Physics in the same college, 1879; and Principal of, and Professor of Physics in, the City and Guilds Technical College, Finsbury, 1885. He is the author of "Elementary Lessons in Electricity and Magnetism," 1881 (43rd thousand in 1889); "Dynamo-electric Machinery," 1885 (5th edition in 1895); and of several other technical works, as well as of a volume of Royal Institution Lectures on Light, and of "Michael Faraday: His Life and Work," in the Century Science Series, 1898. Professor Thompson has made numerous scientific researches in electricity, magnetism, acoustics, and optics. He has also taken an active part in the movement for the reorganisation of the University of London. He is Vice-President of the Institution of Electrical Engineers, President of the Röntgen Society, Vice-President of the Physical Society of London, Membre de la Société de Physique (Paris), Hon. Member of the Physical Society of Frankfurt-am-Main, Member of the Swedish Academy of Sciences, Fellow of the Royal Society, and a Member of the Sette of Odd Volumes. In 1881 he married Jane, eldest daughter of the late James Henderson, of Pollokshields. Address: City and Guilds Technical College, Finsbury.

THOMSON, David Croal, was born in Edinburgh on May 24, 1855, and was educated there. He studied drawing and painting at leisure times, and attended the School of Art classes for several years, contributing pictures occasionally to public exhibitions. He spent some time in Paris in 1880, painting, writing, and studying art. He has published a number of papers in the *Scotsman*, and for several years wrote the annual articles on the Paris Salon therein. From 1881 to 1885 he assisted Mr. M. B. Huish in compiling "The Year's Art." In February 1881 he was appointed sub-editor of the *Art Journal*, in which publication some time previously his first published article had

appeared. In 1882 he published a large quarto illustrated volume on "The Life and Works of Thomas Bewick"; in 1884, "The Life and Work of H. K. Browne ('Phiz')," also quarto, and heavily illustrated with the original plates and from unpublished drawings; in 1890, "The Barbizon School of Painters," in the same large size, with many etchings, drawings, and reproductions. These three volumes are now out of print. In 1895 he wrote a monograph on Luke Fildes, R.A., with etchings and reproductions; in 1897, the "Tate Gallery Catalogue," illustrated. He has been editor of the *Art Journal* since 1892, and has also written for the *Magazine of Art*, &c. He represented Messrs. Goupil & Co., of Paris, in London from 1885 to 1897, and in that capacity selected and superintended the illustrations to Skelton's "Mary Stuart," 1893; the Bishop of London's "Queen Elizabeth," in 1896; Mr. R. R. Holmes's "Queen Victoria," 1897; and "Charles I.," by Sir John Skelton, 1898. He has visited the private art collections and galleries of France, Italy, Belgium, Holland, and Berlin, also the United States and Canada. He is connected with Messrs. Thomas Agnew & Sons, the Old Bond Street Galleries; is a member of the Society of Arts, the Franco-Scottish Society, and the Caledonian Society. Addresses: Dartmouth Tower, Highgate, N.W.; 294 City Road, E.C.

THOMSON, John Millar, LL.D., F.R.S., Professor of Chemistry in King's College, London, was born in the College of Glasgow in 1849, and is the son of Allen Thomson, D.C.L., LL.D., F.R.S., formerly Professor of Anatomy in the University of that city. Professor Thomson's family have had a long and intimate connection with education in Scotland, six of its members having held Chairs in the Universities at various times, among whom were his grandfather Dr. John Thomson, Professor of Surgery and Pathology in the University of Edinburgh, and his great-grandfather, John Millar, Professor of Law in the University of Glasgow. Professor Thomson was educated at the High School and at the University of Glasgow, when, after passing through the usual curriculum in arts, he began the study of medicine. After a short period in the Medical Faculty, on the advice of Dr. Thomas Anderson, then Professor of Chemistry in the University, he turned his attention to the special study of Chemistry with the view of becoming a teacher in that subject, and in 1869 he received an appointment as one of the assistants in the Chemical Laboratory of the University. In 1871 he was appointed Junior Demonstrator of Chemistry in King's Col-

lege, London, became Senior Demonstrator and Lecturer on Photography in 1879, and on the death of Professor C. L. Bloxam in 1887 was appointed to the chair which he now holds. He also held the Professorship of Chemistry in Queen's College, London, from 1880 till 1887. Professor Thomson was elected a Fellow of the Chemical Society in 1872; he served on the Council of that Society from 1880 till 1883, when he was appointed one of the Honorary Secretaries, which office he held till 1897, when he retired, becoming a Vice-President. He became a Fellow of the Institute of Chemistry in 1878, held the office of Examiner to the Institute from 1887 till 1891, and is at present Honorary Registrar of that body. He was elected a Fellow of the Royal Society of Edinburgh in 1879, and of the Royal Society of London in 1897. He is an Honorary LL.D. of the University of Glasgow and Honorary Fellow of Queen's College and King's College, London. Professor Thomson has been mainly occupied during his scientific life as a teacher, taking at the same time an active part in the business of the institutions with which he has been connected. Among his writings and lectures may be mentioned his papers "On the Constitution and Optical Properties of Double Salts of Nickel and Cobalt," in the Reports of the British Association; "On the Nature and Action of Nuclei in Determining the Crystallisation of Supersaturated Solutions," in the *Transactions of the Chemical Society*; "On the Chemistry of Pigments"; "On the Chemistry of Substances taking part in Putrefaction and Antiseptis"; and "On the Chemistry of Building Materials" (Cantor Lectures delivered before the Society of Arts). He is also the author of the article "Photography" in Professor Thorpe's "Dictionary of Chemistry applied to Arts and Manufactures," and is the editor of the 7th and 8th editions of Bloxam's "Chemistry." Address: 85 Addison Road, W.

THOMSON, Professor Joseph John, M.A., D.Sc., F.R.S., Cavendish Professor of Experimental Physics, Cambridge, was born on Dec. 18, 1856, at Manchester, and is the eldest son of the late Mr. J. J. Thomson, of Manchester. He was educated at the Owens College, Manchester, and Trinity College, Cambridge, where he was 2nd Wrangler in the Mathematical Tripos, 1880. He was elected Professor of Experimental Physics in the University of Cambridge in 1884. In 1894 he was President of the Cambridge Philosophical Society, and in 1896 he presided over Section A of the British Association. He is the author of a treatise "On the Motion of Vortex Rings," 1883; "The Applica-

tion of Dynamics to Physics and Chemistry," 1888; "Recent Researches in Electricity and Magnetism," 1892; "Elements of the Mathematical Theory of Electricity and Magnetism," 1895, 2nd edit., 1898; and of various papers in the *Transactions* of scientific societies. He is Fellow of Trinity College, Cambridge, and Fellow of the Royal Society. Address: 6 Scrope Terrace, Cambridge.

THOMSON, Leslie, R.I., landscape painter, was born at Aberdeen in 1851, and partly educated at the Grammar School there. He has exhibited at all the leading exhibitions since 1873. His most recent Royal Academy pictures have been "A Stack-Barge, Essex," 1895; "Gold-hanger, Essex," and "A Bit of Dorset," 1896; "Dordrecht" and "A Spring," 1897; and "A New Forest Stream," 1898. Address: 98 James Street, Buckingham Gate, S.W.

THORBURN, Hon. Sir Robert, K.C.M.G., was born March 28, 1836, at Juniper Bank, in the county of Peebles, Scotland, and is the son of the late Robert Thorburn, Esq., of Juniper Bank, and Alison, daughter of the late Robert Grieve, Esq., of Kailatar, Perthshire, Scotland. He was educated in Edinburgh; went to Newfoundland in 1852; settled at St. John's, the capital of the island, where he has followed mercantile pursuits, and is now engaged in business. He was appointed Member of the Legislative Council of Newfoundland, Feb. 14, 1870, but resigned his seat in that body in 1885, when he entered the House of Assembly, and became Premier, which office he held till the close of 1889. Sir Robert Thorburn represented the Colony of Newfoundland at the Colonial Conference in London in 1886, when he received the honour of knighthood, and, being senior member of the Conference, had the honour of reading and presenting the address of the Conference to her Majesty the Queen. He is now a Member of the Legislative Council of Newfoundland. He is by Royal permission an Honourable for life. He married, in 1865, Susanna Janetia, daughter of the late Andrew Milroy, of Hamilton, Canada. Address: St. John's, Newfoundland.

THORLEY, The Rev. George Earlam, M.A., Warden of Wadham College, Oxford, was born at Knutsford, in Cheshire, on Aug. 25, 1830, and is the eldest son of Robert Thorley, Commander R.N. He was educated at Manchester Grammar School, and at Wadham College, of which he was scholar, 1849-54. He obtained a first class in Classical Modera-

tions in 1852, and a first in Lit. Hum. in 1853; he also took honours in Law and History in that year (B.A. 1853, M.A. 1856). From 1854 to 1881 he was Fellow of his College, and was also appointed Tutor in 1856, and Sub-Warden in 1868. He was Proctor in 1866, Examiner in Classics in 1868-69, 1870, 1874-75, was Member of the Hebdomadal Council, 1881-1884, History Lecturer at Oriel and Lincoln Colleges, and was appointed Warden of his College in 1881. He was Curator of the Taylorian Museum, 1890-93, and has held other University offices. Address: Wadham College, Oxford.

THORNE, Sir Richard Thorne, K.C.B., M.B., F.R.S., D.Sc. hon. and LL.D. hon., was born Oct. 13, 1842, at Leamington, Warwickshire, and is the eldest living son of the late Mr. T. H. Thorne, J.P., banker, Leamington. He is Bachelor of Medicine (double first class), University of London; Fellow of the Royal Society; Fellow of the Royal College of Physicians, London; was appointed a Medical Inspector to H.M. Privy Council Office in 1871; and Principal Medical Officer to the Local Government Board in 1892. He is Lecturer on Public Health to St. Bartholomew's Hospital Medical School; and Stewart Prizeman of the British Medical Association, 1893. He was appointed delegate to represent the British Government at the International Sanitary (Cholera and Plague) Conferences of Rome, 1885; of Venice (Paris sitting), 1892; of Dresden, 1893; of Paris, 1894; and Venice, 1897; appointed H.M. Plenipotentiary to sign the Conventions of Dresden, 1893; Paris, 1894; and Venice, 1897; was President of the Epidemiological Society of London, 1887-89; and Milroy Lecturer to the Royal College of Physicians of London, 1891; is Hon. Memb. Royal Academy of Medicine of Rome; and Corresponding Member of the Royal Italian Society of Italy. He was elected a member of the Athenæum under Rule 2 in April 1899. He is the author of a paper "On the Origin of Infection," published in the *Transactions of the Epidemiological Society*, 1878; "The Progress of Preventive Medicine during the Victorian Era, 1837-87"; "Diphtheria: its Natural History and Prevention," 1891; "Report on the Use and Influence of Hospitals for Infectious Diseases," published in the Tenth Annual Report of the Medical Officer of the Local Government Board; and of a large number of official reports on the causation of epidemic diseases, and on the health of towns, published in the Reports of the Privy Council Office and of the Local Government Board. He married, in 1866, Martha, daughter of the late Joseph

Rylands, of Sutton Grange, Hull. Residences: 45 Inverness Terrace, W., and Goldsworthy, Woking, Surrey; and Athe-

THORNTON, The Right Hon. Sir Edward, G.C.B., D.C.L., LL.D., is the only surviving son of the late Right Hon. Sir Edward Thornton, G.C.B., who was for some time Envoy Extraordinary and Minister Plenipotentiary in Portugal, and upon whom the title of Count de Cassilhas, in that kingdom, had been conferred by King John VI. of Portugal. Sir Edward Thornton, who succeeded to the title of Count de Cassilhas (in the kingdom of Portugal) on the death of his father in 1852, was born on July 13, 1817, and was educated at King's College, London, and Pembroke College, Cambridge, where he was a Senior Optime (M.A., LL.D.). He entered the diplomatic service in 1842, when he was attached to the mission at Turin. He was appointed paid attaché in Mexico in 1845, and Secretary of Legation to the Republic of Mexico in 1851. From April 1852 till October 1853 he acted as Secretary to the late Sir Charles Hotham's special mission to the River Plate. He was appointed Chargé d'Affaires and Consul-General to the Republic of New Granada in May 1854, but was transferred to the Republic of Uruguay in September of the same year. He was appointed Minister Plenipotentiary to the Argentine Confederation in 1859; in July 1865 he was sent on a special mission to the Emperor of Brazil, and in the following month he was appointed Envoy Extraordinary and Minister Plenipotentiary to the Emperor of Brazil. He retained this post until September 1867, when he was transferred in the same capacity to the court of the King of Portugal. He, however, did not proceed thither, but was appointed in the following December to the post of Envoy Extraordinary and Minister Plenipotentiary at Washington. In recognition of his diplomatic services he was made a Companion of the Bath (civil division) in February 1863; and a Knight Commander of the same Order, Aug. 9, 1870. He was sworn of the Privy Council, Aug. 19, 1871. Sir Edward Thornton was appointed Ambassador at St. Petersburg in May 1881, and to the Sultan of Turkey, Dec. 1, 1884. This post he held from February till October 1886, and he retired on a pension at the end of the same year. He was created a G.C.B. in August 1883. Addresses: 90 Eaton Square, London, S.W.; and Athenæum.

THORNYCROFT, Hamo, R.A., sculptor, son of Thomas and Mary Thornycroft, was born in London, March 9, 1850.

He was brought up in a remote part of Cheshire, and educated at Macclesfield Grammar School, and at University College School, London. At the age of seventeen he began to work in his father's studio, and in 1869 was admitted a student at the schools of the Royal Academy. In 1871 he first exhibited at the Royal Academy, and in the same year proceeded to Italy, where the nature of his art received considerable modification from study of the works of the Renaissance. In 1875 Mr. Thornycroft gained the biennial Gold Medal of the Royal Academy for a group of "A Warrior bearing a Wounded Youth from the Field of Battle." In 1880 he made his first great success, with a statue of "Artemis," which he executed in marble for the Duke of Westminster, and which is now at Eaton Hall. In January 1881 Mr. Thornycroft was elected A.R.A., and for the exhibition of the same year produced his statue of "Teucer," which was purchased from the Chantry Fund, and is now, in bronze, in the National Gallery of British Art. Since then his most important works have been: the statue of "The Mower," 1884; "The Memorial to the Poet Gray," at Pembroke College, Cambridge, 1885; and the statue of "The Sower," 1886. Also in 1885 he executed a bust of Samuel Taylor Coleridge for Westminster Abbey; also a memorial to Sir John Gosse for the crypt of St. Paul's, and was commissioned by the Government to execute the National Memorial to General Gordon which now adorns Trafalgar Square. A replica of this statue, but with different sculptural treatment of pedestal, he executed for Melbourne also. In 1888 he exhibited his statue of "Medea" and was elected a Royal Academician, and in 1890 an Hon. Member of the Royal Academy of Munich. He executed, in 1890, a public statue of John Bright, for Rochdale. In the same year Mr. Thornycroft exhibited at the Academy his diploma work, a marble relief, entitled "The Mirror," and some small bronzes. Among his more recent works may be mentioned his statue of "Summer," 1893; a marble statue of Sir Steuart Bayley erected at Calcutta; Lord Granville, in the House of Lords; Her Majesty the Queen, in the Royal Exchange; Archbishop Thomson, in York Minster; Bishop Goodwin, in Carlisle Cathedral; "The Joy of Life," 1896. In 1897 he completed a monument to William Owen Stanley at Holyhead, the most important intra-mural work Mr. Thornycroft has yet executed. In 1898 he exhibited a bronze statue entitled "The Bather," and a portrait bust of Sir George Stokes, F.R.S., destined for Cambridge. Mr. Thornycroft exhibited at the Royal Academy (1899) a colossal statue in bronze

of Cromwell for Westminster, and also a memorial statue to Dean Colet, the founder of St. Paul's School. In 1884 Mr. Thornycroft was married to Agatha, daughter of the late Homersham Cox, Esq., lately County Court Judge of Tonbridge. Addresses: 2A Melbury Road, Kensington, W.; and Athenæum.

THORNYCROFT, John Isaac, F.R.S., M.Inst.C.E., and naval architect, eldest son of Thomas and Mary Thornycroft, the sculptors, was born on Feb. 1, 1843, in the Via Felice, Rome, where his parents were then studying classic art. His mechanical training was commenced at an early age by his father, who made a locomotive, on which his children rode round his studio. The cylinders of this locomotive were afterwards adapted by his eldest son to form the engines of a very successful model steamer, which contained several of the most important elements to which the success of the modern torpedo boat is due, the closed stokehole and fan, by means of which air could be forced through the fire, and the relatively large size and low position of the propeller. Rather later, when eighteen years of age, he constructed a small steam-launch, the *Nautilus*, which was the first steam-launch on the Thames that attained sufficient speed to keep up with racing crews. In 1863 he designed the *Ariel*, which was built at Chiswick, where he started almost as an amateur boat-builder. The *Ariel* was an example of a very fast steam-boat, which was surpassed in speed by only the *Miranda*. The exact performance of the *Miranda* was measured by Sir Frederick Bramwell in 1872, and made a considerable sensation when published at a meeting of the Naval Architects. This boat may be considered as the progenitor of the torpedo boats of the present day. The closed stokeholes, however, were perfected by Mr. Thornycroft only in 1876, in the *Gitana*, a yacht on the Lake of Geneva, which has never yet been beaten by a boat of similar size. After building the *Ariel* Mr. Thornycroft went for nine months as a draughtsman to Palmer's Shipbuilding Co. on the Tyne; he then went to Glasgow to go through the engineering course at that University, and obtained the certificate of proficiency in less than the usual time. On leaving the University he spent nine months at Mr. John Elder's, of Govan, in studying the method of shipbuilding on the Clyde. He then returned to Chiswick, and became a builder of torpedo boats. In this profession he rapidly took the first place; and he has constructed a very large number of such boats for the British and foreign Governments. Among some of the more

recent inventions of Mr. Thornycroft we may mention a speed indicator which he has perfected during the last few years, and a water-tube boiler, which combines great economy of fuel with lightness of structure, and has been fitted in many torpedo boats with marked success. The turbine propeller, also designed by Mr. Thornycroft for shallow draught vessels, gives results which cannot be obtained by the use of the paddle-wheel. Mr. Thornycroft was elected F.R.S. in 1893, and is Vice-President of the Inst. Naval Architects. Addresses: Eyot Villa, Chiswick, Middlesex; and Steyne, Bembridge, Isle of Wight.

THORPE, Professor Thomas Edward, F.R.S., Ph.D., D.Sc., LL.D., was born at Harpurhey, near Manchester, Dec. 8, 1845, being the son of a Manchester merchant. He was educated at private schools, at Owens College, Manchester, and at the Universities of Heidelberg and Bonn. He was appointed Demonstrator of Chemistry at Owens College in 1869; Professor of Chemistry in Anderson's College, Glasgow, in 1870; Professor of Chemistry in the Yorkshire College at Leeds in 1874; and Professor of Chemistry at the Royal College of Science, South Kensington, in 1885. He at present holds the position of Principal of the Government Laboratories, to which he was appointed in 1894. He is a F.R.S., was a Member of Council, 1890 and 1894, and Vice-President. He is Treasurer of the Chemical Society of London, a Member of the Council of the Society of Chemical Industry, of which he was President in 1894, a Fellow of the German Chemical Society, and of the Physical Society of London, Ph.D. of Heidelberg, and B.Sc. of the Victoria University, Manchester, D.Sc. (Hon.) of Trinity College, Dublin, LL.D. (Hon.) of Glasgow, formerly Examiner in Chemistry at, and now Fellow of, the University of London, and Examiner to the Victoria University, and the Science and Art Department, South Kensington. He is a Longstaff Medallist of the Chemical Society of London, a Royal Medallist of the Royal Society (1889), and one of the Bakerian lecturers, and is honorary member of the Philosophical Societies of Glasgow, Leeds, and Manchester. Professor Thorpe is the author of upwards of 100 memoirs on Chemistry and Physical Chemistry, published in the *Philosophical Transactions*, the *Proceedings of the Royal Society*, the *Journal of the Chemical Society*, and the *British Association Reports*. He is also the author of a "Dictionary of Applied Chemistry," 3 vols.; "Inorganic Chemistry," 2 vols.; "Qualitative Analysis," "Quantitative Analysis," "Chemical Problems," "Essays in Historical Chemistry," "Hum-

phrey Davy, Poet and Philosopher," and editor of "Coal: its History and Uses." He has likewise written various articles in Watts's "Dictionary of Chemistry," and is a frequent contributor to *Nature* and other scientific periodicals. Professor Thorpe was a member of the Solar Eclipse Expeditions of 1870 (Sicily), 1878 (Central America), 1886 (West Indies), and 1893, when he had charge of the party sent to the West Coast of Africa. He has acted as one of the Secretaries of the Chemical Section of the British Association for the Advancement of Science, was a Vice-President of the Section at the Jubilee meeting at York in 1880, a Member of the Council, and President of the Chemical Section at the Leeds meeting in 1890. Addresses: The Government Laboratories, London; and Athenæum.

THRING, Lord, Henry Thring, K.C.B., born at Alford, Somerset, on Nov. 3, 1818, is the second son of the Rev. J. G. D. Thring, and Sarah, daughter of the Rev. J. Jenkyns, of Evercreech, Somerset. He was educated at Shrewsbury, and Magdalen College, Cambridge; was third in the first class of Classical Tripos, and fourteenth Junior Optime, 1841; B.A. 1841; M.A. 1844; called to the Bar in 1845, Inner Temple; was appointed Counsel to the Home Office in 1860, and Parliamentary Counsel in 1868. He was made K.C.B. in 1873, and a Peer in 1886, on his retirement from office. He has published works on the Succession Duty Act; "The Law of Joint-Stock Companies," "Practical Legislation," essays in the "Manual of Military Law," on "Insurrection" and the "Customs of War," and various articles in reviews. He married, in 1856, Elizabeth, daughter of the late John Cardwell, Esq., of Liverpool, and has one child, Katharine Annie. Lady Thring died in 1897. Addresses: 5 Queen's Gate Gardens, S.W.; Alderhurst, Englefield Green, Surrey; and Athenæum.

THUILLIER, General Sir Henry Edward Landor, C.S.I., F.R.S., was born at Bath, and is the youngest son of John Pierre Thuillier, Baron de Malapert. He was educated at the East India Company's College, Addiscombe, and in 1832 entered the Royal Artillery, from which he retired with the rank of General. Appointed to the Survey of India, he was employed on the Revenue Survey on the Eastern Frontier, and afterwards in Orissa, Patna, and Sylhet. From 1847 to 1878 he was Superintendent of the Revenue and Topographical Surveys of India, and from 1861 to 1878 was Surveyor-General of India. He became F.R.S. in 1869. He is part-author of a "Manual of Survey for India." He

married, in 1847, a daughter of Dr. Macpherson of the Bengal Army. Address: Tudor House, Richmond, Surrey.

THUN, Count Franz Hohenstein, Prime Minister of Austria, is a member of one of the oldest families of Bohemia, and was born in 1847. He was educated for the army, which he left, however, in 1877. Two years later he entered the Reichsrath as a member of Dr. Rieger's party, and distinguished himself for his violent anti-German policy, claiming for Bohemia complete independence. In 1888 he even advised his compatriots openly to gain their independence by force of arms. But Count Taaffe, then Premier, appointed him to be Governor of Bohemia, and his good points at once became apparent; he was strong, and honest, and held the balance even between the Germans and Czechs. In August 1893, owing to the formation of secret societies in Prague, he proclaimed a state of siege, and ruled despotically, but well. He put down all political agitation, and made all understand that the law had to be obeyed. In March 1898 he succeeded Baron Gautsch as Prime Minister of Austria, with a composite Cabinet, in order to appease the disorderly sections of the Reichsrath. In this he has been partially successful.

THURLOW, Lord, The Right Hon. Thomas John Howell-Thurlow-Cumming-Bruce, F.R.S., D.L., J.P., 5th Baron Thurlow, of Thurlow, county Suffolk, was born in London on Dec. 5, 1838. He is a son of the 3rd Baron, by Sarah, only daughter of Peter Hodgson, Esq., and succeeded his elder brother as the 5th Baron on April 22, 1874. Lord Thurlow is a descendant of a Norfolk family, which dates back several centuries. Amongst his ancestors was William Thurlow, of Burnham-Ulp, in Norfolk, who died in the year 1590. The Barony of Thurlow was created in 1792, and the first Baron was Edward Thurlow, who was born in 1732, and died in 1806. It was in recognition of his high legal merits that the first Lord Thurlow was created a peer, and occupied the woolsack, as Lord Chancellor, for close on twenty years. The present Lord Thurlow entered the Diplomatic Service in the year 1858, and in the year following became attached to the Embassy at Paris. During 1860-61 Lord Thurlow was attached to the Earl of Elgin's special mission to China. He was present at the capture of the Taku forts and of Peking, and was one of the recipients of the China Medal. In 1862 he was appointed Private Secretary to the Viceroy and Governor-General of India, and in 1864 was attached to H.M. Embassy at

Vienna. During the years 1865-66 he was Private Secretary to Sir Frederic Bruce, H.M. Minister at Washington. Subsequently he was appointed Second Secretary in the Diplomatic Service, proceeding to the Hague in December 1866. He resigned that appointment in July 1870, and retired from the Diplomatic Service. He is a Justice of Peace and Deputy-Lieutenant for the counties of Elgin, Nairn, Stirling, and Suffolk, and was a Lord-in-Waiting upon the Queen from September 1880 to June 1885, and from February to May 1886. From the April to the August of 1886 he occupied the position of Paymaster-General; and was also, in that year, appointed to represent her Majesty as Lord High Commissioner to the General Assembly of the Church of Scotland, which holds its annual meetings in Edinburgh. He was then also sworn a Privy Councillor. He is Chairman of the Salt Union. He has published, among other works, "The Company and the Crown" and "Trades Unions Abroad." In 1864 he married Lady Elma, the only surviving child of the 8th Earl of Elgin by his first wife, Elizabeth Mary, who was the only daughter of Charles Lennox Cumming-Bruce, Esq., M.P., of Roseisle, Dunphail and Kinnaird, N.B. Lord Thurlow assumed in the right of his wife, and by Royal license, in July 1874, the additional names of Cumming-Bruce. Lord Thurlow has six children, and his heir, the Honourable James Bruce, was born in 1867. Address: Dunphail, Scotland.

THURSTON, Professor Robert H., LL.D., formerly of the United States Naval Engineer Corps, late Professor of Engineering, was born in Providence, R.I., Oct. 25, 1839. He is the son of Robert L. Thurston, who built his first engine in 1821, and founded the Providence Steam-Engine Company in 1837. R. H. Thurston was educated at Brown University, and received, during youth, a useful practical education in his father's workshops. When he left college, in 1859, he was familiar with the work of the draughtsman, designer, pattern-maker, moulder, the forge, and machine-shop. Mr. Thurston applied for appointment in the engineer corps of the navy, passed examination in the summer of 1861, and was ordered to duty on board the *Unadilla*. He was six years continuously on duty at the Naval Academy. In July 1871 Mr. Thurston accepted an appointment at the school of mechanical engineering at Hoboken, and for fourteen years filled the chair of engineering in the Stevens Institute of Technology, resigning his commission in the navy in 1872. He organised, about 1873 or earlier, what was probably the

first mechanical laboratory for research in engineering that was ever founded. He was (1875-78) a member of the U.S. Board appointed to test iron, steel, and other metals, directed the greater part of the work completed by that Board, and, as its secretary, edited its reports. His investigation of the laws of friction, and of properties of the alloys of copper, tin, and zinc, which resulted in the determination, by a new and ingenious method, of the relative values of all combinations of those elements, were perhaps the most strikingly original and famous of these researches. In July 1885 Professor Thurston took charge of Sibley College, reorganised it, and saw immediate results in the rapid growth of the College. Dr. Thurston was the first President of the American Society of Mechanical Engineers, has been for many years a member of the American, French, Scotch, German, and Austrian Societies of Civil Engineers, of the British Institution of Mining Engineers, of which he is also past Vice-President, the American and British Associations for Advancement of Science, three times Vice-President of the former, and once of the latter (Montreal, 1884), and of other scientific and technical associations at home and abroad. He is a member of the "Loyal Legion," and is Officier de l'Instruction Publique de France, and was given the degree of LL.D. by his alma mater, Brown University, on the thirteenth anniversary of his graduation. He has been an extensive writer, on professional subjects mainly, his papers numbering something like 250, and he writes some articles of a speculative character. He is the author of many books, including a "History of the Steam-Engine," a three-volume treatise on "The Materials of Engineering," &c. a treatise on "Friction and Lost Work," &c. Address: Cornell University, U.S.A.

THYNNE, The Right Hon. Lord Henry Frederick, J.P., D.L., was born in 1832, and is the second son of the 3rd Marquis of Bath, and uncle of the present Marquis. He represented South Wilts as Conservative in the House of Commons from 1859 to 1885, when he contested West Wilts. From 1875 to 1880 he was Treasurer of the Household. He is Hon. Major in the Wilts Yeomanry, and was sworn of the Privy Council in 1876. He married, in 1858, the Lady Ulrica Frederica Jane St. Maur, daughter of the 12th Duke of Somerset. Addresses: 30 Grosvenor Gardens, S.W.; and Muntham Court, Worthing.

TIBBITS, Charles John, editor of the *Weekly Dispatch*, was born at Chester on Jan. 31, 1861, and is the youngest son

of George Tibbits, solicitor, of Chester. He was educated privately, and at Oxford (Non. Coll.) (B.A. 1886). Intended originally for the Church, he became a journalist, and was successively reporter, sub-editor, and editor of provincial newspapers. Coming up to London in due course, he became and for some years remained assistant-editor to Mr. Alfred Harmsworth. He has contributed stories and articles to almost every London newspaper. His present appointment dates from 1895. Mrs. Tibbits, *née* Annie Olive Brazier, is well known as a writer of stories. Address: 7 Ilchester Mansions, Abingdon Road, Kensington, W.

TICHBORNE, Professor Charles Robert, LL.D., Ph.D., Fellow of the Institute of Chemistry and the Chemical Society, Member of the Council of the Royal Irish Academy, and Licentiate of the Royal College of Surgeons of Ireland, Dip. in Public Health, was educated at Birmingham, and is the son of William S. Tichborne, a descendant in the direct line from Sir Robert Tichborne, whose name appears on the death warrant of Charles the First. Charles Tichborne studied chemistry under Professor Hoffmann, and shortly afterwards went to superintend the Laboratories of the Apothecaries' Hall of Ireland, with which body he has been associated for many years. He was Governor of that body, and is now their representative on the General Medical Committee. He was appointed, in 1872, Lecturer on Chemistry to the Carmichael College of Medicine, and in 1874-75 he was Extern Examiner in Chemistry to the University of Dublin. He is at the present time an Examiner under the conjoint board of the College of Surgeons and Apothecaries' Hall. On the retirement of Sir Dominic Corrigan, Professor Tichborne was elected President of the Pharmaceutical Society of Ireland, and was afterwards made Professor to that Society's School of Chemistry. He is at present a gas examiner for the Board of Trade, and one of the County Analysts. Professor Tichborne began very early in life to write scientific papers, some of the most important of which are the following: "Official Reports upon the Chemical Section of the International Exhibition, Dublin, 1864"; "Detection of Cantharides in Medico-legal Investigation," described in Taylor's "Principles of Medical Jurisprudence." He contributed to the pages of the *Cornhill Magazine* a description of the naturally-formed mummies found in St Michan's Church, Dublin. This was transferred to the pages of the *Pall Mall Gazette*, Sept. 6, 1866. In 1868 appeared an analysis of the well-known Schwalheim

Waters, in which the author discovered lithium; these waters had previously been examined by Liebig, and, in 1869, Tichborne described, in the *Transactions of the Royal Irish Academy*, a new body, which he called colophonic hydrate. As far back as 1871 the Royal Irish Academy voted £50 to aid him in his researches upon Molecular Dissociation. In 1870-71 he published many papers on dust as a ferment, and particularly street dust. These researches are briefly described in De Chaumont and Parkes' "Manual of Hygiene." His papers on subjects connected with Pharmacy are too numerous to mention, but many of the processes in the British Pharmacopœia are based upon his investigations. He is now a member of the Pharmacopœia Committee of the Medical Council of Education, and took an active part in the construction of the "New Pharmacopœia" of 1898. He was elected from time to time either Honorary or Corresponding Member of the following societies: Société Royale de Pharmacie de Bruxelles, Philadelphia College of Pharmacy, and the Chargo College. He has also published, in connection with Dr. Prosser James, a work entitled "The Mineral Waters of Europe." Professor Tichborne invented an instrument for scientifically determining the relative hardness of stones, which was most favourably received by the Institute of Civil Engineers, and about 1888 he patented, in association with a syndicate, the collection, liquefaction, and utilisation of the carbonic acid gas given off during fermentation. This Tichborne process is being successfully carried into operation in one of the largest breweries in the world, Messrs. Guinness's, of Dublin, and in some of the large breweries and distilleries in London, Paris, Melbourne, and Sydney. Professor Tichborne's latest researches have been in connection with purification of coal-gas, and are to be found in the *Journal of Gas-Lighting*, 1893. Also in the *Proceedings of the Academy of Medicine in Ireland* for the year 1899 appears a lecture on Dissemination of Micro-organisms by Sewer Gas. Professor Tichborne is well known amongst art circles as an amateur musician. He married, in 1861, Sarah, the daughter of Surgeon Wilkinson, of Black Rock, co. Dublin, and has one son and three daughters. Address: Pharmaceutical Society, Dublin.

TILDEN, Professor William Augustus, D.Sc., F.R.S., eldest son of Augustus Tilden, formerly of the Bank of England, was born in London on the 15th August 1842. Having passed through many schools, public and private, he was sent to a business house in London, to be

trained as a pharmaceutical chemist. Here he attended the lectures on Physics, Chemistry, and Botany, at the Pharmaceutical Society's School in Bloomsbury Square, and in 1860 followed Hoffmann's lectures at the Royal College of Chemistry. About this time he won the first Bell Scholarship awarded by the Pharmaceutical Society, and after attending courses of lectures on Physics by Tyndall, and Geology by Ramsay, at the School of Mines, he entered, in 1862, the research laboratory of the late Dr. Stenhouse, in the capacity of junior assistant. A year later he was appointed Demonstrator of Chemistry in the laboratory of the Pharmaceutical Society, where he remained seven years. In 1871 he obtained the D.Sc. degree Lond., and in 1872 was appointed Senior Science Master at Clifton, and there remained till 1880, when he was appointed the first Professor of Chemistry at Mason College. Dr. Tilden was elected a Fellow of the Royal Society in 1880. In 1892 he received the honorary degree of Doctor of Sciences from the University of Dublin on the occasion of the celebration of its 300th anniversary. He has completed three years' service as President of the Institute of Chemistry of Great Britain and Ireland; he is also a Vice-President of the Chemical Society of London, and has served for two years on the Council of the Royal Society. In 1893 he was elected an Honorary Member of the Pharmaceutical Society of Great Britain, Corresponding Member of the College of Pharmacy of Philadelphia, Honorary Member of the Society of Public Analysts, and in April 1894 was appointed Professor of Chemistry in the Royal College of Science, London. During his residence in Birmingham he held office as President of the Birmingham Teachers' Association, 1884, and of the Philosophical Society, 1886; as Vice-President of the British Association, 1886; and President of the Chemical Section of the British Association at its meeting in Bath, 1888. Dr. Tilden was for three years Chairman of the Academic Board in the early days of the Mason College. He is the author of some sixty papers in the *Transactions of the Chemical Society*, the *Phil. Trans. of the Royal Society*, the "Berichte" of the *German Chemical Society*, and other journals. He has also published several text-books, including recently "A Manual of Chemistry," 1896. Addresses: Royal College of Science, S. Kensington, S.W.; and 9 Ladbroke Gardens, Notting Hill, W.

TILLET, Benjamin, Labour leader was born in Bristol in 1859, and went to work in a brickyard before he was eight years old. At twelve he was for six

months "boy" on board a fishing-smack. After being apprenticed to a bootmaker, he ran away to sea, joined the navy, and after a short period of service was discharged invalided. Subsequently he shipped in merchant vessels, and went several voyages. He then settled in the midst of the London Docks, and began to form the Dockers' Union among the dock-labourers, who were then the most wretched and ill-paid of unskilled workmen. During the great Dock Strike he worked energetically and successfully as an organiser of his Union, which is now large and prosperous. "Ben" Tillett is a ready speaker of the demagogue type. At the general elections of 1892 and 1895 he stood for West Bradford, but was, on both occasions, beaten by a Liberal and a Conservative, though he polled a large number of votes. He was tried at Bristol in the earlier part of 1893 on the charge of inciting to riot, but acquitted. He has given important evidence before the Parliamentary Commission on Pauper Immigration, and before the Lords' Committee on Sweating. During the close of 1894 and beginning of 1895, he defended himself in the *Times* against the severe strictures of Mr. W. H. Mallock, who accused him in effect of complete ignorance of Economics. He is an Alderman of the London County Council. During recent years, in attempts to organise foreign strikes, he was imprisoned by the authorities at Hamburg and at Antwerp, and ejected from both towns. Address: Dockers' Union, Mile End Road, E.

TINWORTH, George, was born near Camberwell Gate, on Nov. 5, 1843. His father was a wheelwright, but the boy at an early age showed a talent for drawing, and afterwards developed powers as a wood-carver, and it was accordingly decided that he should be brought up as an art-worker. At the age of eighteen he entered the Lambeth School of Art, and studied modelling under Mr. Bale. In the year 1864 he entered the Academy Schools, and gained the Second Silver Medal in the Antique, and the First Silver Medal in the Life School. On the death of his father he entered the Lambeth Pottery. He was then twenty-three years old, and soon began to make his mark as a modeller of terracotta panels and a worker in stoneware. Of panels Mr. Tinworth has modelled over a hundred. Among his best-known work may be mentioned the "Preparing for the Crucifixion," the "Release of Barabbas," twenty-eight panels in the Guards' Chapel, executed for Mr. Street, R.A., and the altar-panel in York Minster, which last was executed in 1876. More recently he has executed a memorial to the late Mr.

Spurgeon, 16 feet long, with statue in centre, and a statue of Bradlaugh for the town of Northampton. A statue in Vauxhall Park is also by him; it was presented by the late Sir Henry Doulton, Mr. Tinworth's employer. Mr. Tinworth has recently modelled a large panel for Shelton Church, Staffordshire, and is now modelling a series of Scripture subjects from Genesis to Revelation, on 8-inch tiles, for schools. Mr. Tinworth has gained many honours at various Exhibitions, viz., the bronze medal at Vienna in 1873, an American medal in 1876, a silver medal and decoration in Paris in 1878, a gold medal at Nice in 1884, a gold medal in Tasmania, and a medal in America in 1894. Address: 8 Maze Villas, Kew.

TIRARD, Nestor Isidore Charles, M.D., F.R.C.P., received his medical education at King's College Hospital, and obtained, amongst other honours, the Scholarship and Gold Medal in Forensic and Obstetric Medicine, and Honours in Medicine at London University. He was Senior Scholar, House Physician, &c., at King's College (Medical Department), and is now Fellow and Professor of Materia Medica and Therapeutics at King's College, and Physician at King's College Hospital. He is a Fellow of the Roy. Med. Chir. Soc., Senior Physician to the Evelina Hospital for Children, &c., and has been Examiner in Materia Medica at the Roy. Coll. of Physicians, London, the University of London, the Examining Board for England, the Victoria University, &c. He is author of "Diphtheria and Antitoxin," 1896; "Albuminuria and Bright's Disease"; is editor of the "King's College Hospital Reports," and has contributed largely to these and to the leading medical papers. Address: 74 Harley Street, W.

TISSOT, James Joseph Jacques, French painter, was born at Nantes, Oct. 15, 1836, and was educated at the École des Beaux Arts under Flandrin and Lamothé. He made his first appearance in the Salon in 1859, and has sent etchings, water-colours, and oil pictures to its various annual exhibitions. Those by which he is best known are: "Rencontre de Faust et de Marguerite," 1861, now in the Luxembourg Museum; "Retour de l'Enfant Prodigue," 1863; "Confidence," 1867; "Un Veuve," 1869; "Partie Carrée," 1870; "Le Veau Gras," 1883; "La Frioleuse" and "Sur la Tamise," 1889. After having been a painter of distinctly modern type, he showed, in 1893, a series of 365 water-colours, illustrating the Life of Christ. For these a French firm had given the huge sum of 1,100,000 francs (£43,650), after an English publishing house had

offered £60,000. He had spent three years in Palestine, painting each picture on the spot traditionally associated with its subject. After being shown in Paris, these pictures were exhibited in London in 1898.

TISZA, von Borosjenő Koloman, late Prime Minister of Hungary, was born at Geszt, Dec. 16, 1830, and educated for the Civil Service, but his career was blocked at the outset by the Revolution of 1848. For some years he devoted himself to travel, and in 1859 first became known as an opponent of the Government policy of religious intolerance. In 1860 his party gained some independence; he then obtained a seat in the Hungarian Parliament, and succeeded Count Teleki as a leader of the Moderate Radicals. In 1875, carrying over this branch to the united Liberals under Deák, he became Minister of the Interior, and subsequently Prime Minister of the Hungarian Cabinet. In the critical period of 1876-78, he opposed Russia and Pan Slavism, being less vacillating than Count Andrassy, who kept hesitating between the views of Russia and Germany on the Eastern Question. He resigned with his co-ministers when Austrian finances were insufficient to meet the expenses of the Bosnian occupation, but eventually returned to his former position. In March 1890 he resigned the Premiership, and was succeeded by Count Szapary. On March 11, 1895, the ex-Premier delivered an important speech in the Diet in Budapest, in the course of which he severely criticised the attitude taken up by the Liberal opposition in antagonism to the existing constitutional relations between Hungary and Austria, and gave his whole support to the Government. In March of the following year M. Tisza, speaking on the Austro-Hungarian compromise, declared his strong personal adherence to Free Trade, and asserted that if the unreasonable claims of Austria in that regard were maintained, no alternative would remain but that of establishing a separate customs system for each kingdom. Tisza, on Dec. 20, 1898, delivered himself of a remarkable confession for a constitutional statesman in a speech at Grosswardein. After dwelling on the injury suffered by the vital interests of the country in consequence of the policy of obstruction, he referred to the course which England had taken in the treatment of obstructive tactics in the House of Commons. "All my life," he said, "I have been against the closure; but should I have to choose between the Constitution of Parliament and the closure, I would certainly declare for the latter. I am firmly of opinion that we cannot give way to obstruction, which would mean the

abdication of the majority and the abolition of the cardinal principle of Parliamentary rule. We may learn what true Parliamentaryism is from the English." Notwithstanding the compliment to this country in the last sentence, it was ably pointed out at the time that had Hungary copied the example of England, and devoted time and thought to the revision of Rules of Parliament, the constitutional difficulty in Austria-Hungary would never have arisen, and the necessity for government by decrees would have been averted. It has been said that Tisza has neither the glowing temperament of Gladstone nor the wise moderation of Deák. He knows not the art of winning the crowd, and while a truly remarkable man, he is not a great one. Still, the "General," as Tisza was popularly called by the people, has been a keen debater in his time, never at a loss for a reply, surveying his domain with sure gaze, detecting in cool blood the weaknesses of his adversary, and utilising them with patience and self-possession.

TITHERINGTON, The Rev. Arthur Fluit, youngest son of W. Titherington, of Dee Hills, Chester, was born Nov. 14, 1865, and was educated at Arnold House, Chester, Charterhouse, and Magdalen College School, Oxford. He was elected Scholar (Classical) of Queen's College, Oxford, in 1884, took a second class in Moderations in 1886, a second class in Lit. Hum. 1888, and a second class in Mod. Hist. in 1889. After reading with pupils in Oxford, 1888-89, he was appointed to an Assistant-Mastership at Radley in 1889, and was ordained in 1890. In 1895 he was appointed Head-Master of Brighton College. Whilst at Oxford Mr. Titherington stroked the winning trial eight in 1886, and also stroked the University eight in 1887. He married Gertrude, the youngest daughter of W. J. Kent, Heatherley, Grassendale, near Liverpool, in 1891. Address: The College, Brighton.

"**TOBY, M.P.**" See LUCY, HENRY W.

TODD, Sir Charles, K.C.M.G., M.A. Cantab., F.R.S., F.R.A.S., &c., Postmaster-General, Superintendent of Telegraphs, and Government Astronomer, Adelaide, South Australia, was born at Islington, July 7, 1826, and entered the Government Service at the Royal Observatory, Greenwich, in 1841. In 1848 he was appointed Assistant-Astronomer at Cambridge, under the late Rev. Professor Challis. In 1854 he was appointed Assistant-Astronomer at the Royal Observatory, Greenwich, and in the following year he was offered, by the Secretary of State for

the Colonies, Lord John Russell, and accepted, the appointment of Government Astronomer and Superintendent of Telegraphs in South Australia, and left for that colony in July 1855, where he introduced the electric telegraph system. In January 1870 the Colonial Government, having decided upon amalgamating the postal and telegraph services, appointed Mr. Todd Postmaster-General in addition to his duties as Superintendent of Telegraphs and Government Astronomer. Under his direction the telegraph was rapidly extended throughout the colony, his greatest work being the construction of a line from Adelaide through Central Australia, then a *terra incognita*, to Port Darwin, on the north coast, 2000 miles long, to meet the cable of the Eastern Extension Telegraph Co. This work was carried out, in the face of great natural difficulties, in the space of about twenty months, being completed towards the end of 1872, in which year Mr. Todd rode across the Continent and thoroughly organised the service; and, on his return to Adelaide, received from her Majesty the honour of the Companionship of the Order of St. Michael and St. George. Shortly after this, the South Australian section, 1000 miles long, of the telegraph line from Adelaide to Perth was constructed under Mr. Todd's immediate direction. As Government Astronomer, Mr. Todd has carried out an extensive series of Astronomical and Meteorological Observations, the latter affording much valuable information on the climate of Australia, including the dry interior, and the north coast. He determined the position of the eastern boundary line of the colony, or 141st meridian; and, in conjunction with Messrs. Ellery and Russell, the Government Astronomers of Victoria and of New South Wales, he made a careful telegraphic determination of the difference of longitude between Singapore, Adelaide, Melbourne, and Sydney. In 1886 Cambridge University conferred upon him the degree of M.A., *honoris causa*; and in 1889 he was elected a Fellow of the Royal Society of London. He is a Member of the Council of the Adelaide University; one of the Governors of the South Australian Public Library; has been President of the Royal Society of South Australia; and is a Member of the Council of the Adelaide School of Mines, &c. He was made a K.C.M.G. in 1893. He married Alice, daughter of E. Bell, Esq., in 1855. Address: Adelaide, South Australia.

TODHUNTER, John, M.D., eldest son of the late Thomas Hervey Todhunter, merchant, was born in Dublin on Dec. 30, 1839, and educated in Quaker schools. At

the age of sixteen he entered on a mercantile career in his father's offices at Dublin and Limerick. Afterwards, in 1861, he became a student of Trinity College, Dublin, and studied medicine, taking the degree of B.A. in 1865, M.B. and M.Ch. in 1866, M.D. in 1871. He completed his studies in Paris and Vienna, and then returned to Dublin to practise. From 1870 to 1874 he was Assistant-Physician to the Cork Street Fever Hospital, and at the same time held the Chair of English Literature in Alexandra College, Dublin. Resigning these appointments in 1874 he came to London, where he has since devoted himself to literature. His published works comprise: "The Theory of the Beautiful, a Saturday Lecture," 1872; "Laurella, and other Poems," 1876; "Alcestis," 1879; "A Study of Shelley," 1880. The True Tragedy of Rienzi," 1881. "Forest Songs and other Poems," 1881. "Helena in Troas," a play in Greek form, produced at Hengler's Circus in May and June 1886, and afterwards performed at Exeter; "The Banshee and other Poems," 1888; "A Sicilian Idyll," produced at Bedford Park, St. George's Hall, the Vaudeville Theatre, and Aubrey House, Campden Hill, between 1890 and 1893; and "The Poison Flower," acted with the "Sicilian Idyll" at the Vaudeville in 1891. Dr. Todhunter has also produced a modern drama in prose, "The Black Cat," played by the Independent Theatre Society at the Opéra Comique in December 1893; and "A Comedy of Sighs," acted, under Miss Florence Farr's management, at the Avenue Theatre in March 1894. His last published work is "Three Irish Bardic Tales," 1896. He married (1), in 1870, Katharine, daughter of the late Robert Ball, LL.D., of Dublin; and (2), in 1879, Dora Louisa, daughter of the late William A. Digby, of Dublin. Address: Orchardcroft, Bedford Park, W.

TOLSTOI, Count Lyof Nikolai-vitch, usually called Count Leo Tolstoy, the most eminent living Russian novelist and social reformer, is a descendant of Count Peter Tolstoy, the friend and comrade of Peter the Great, and was born on Aug. 28, 1828, at Yasnaia Poliana, in the Government of Toula, but was left an orphan at an early age. He received the usual education of a Russian noble, first privately and afterwards at the University of Kazan. He spent the subsequent years in study till 1851, when, at the age of twenty-three, he entered the army and accompanied his brother to the Caucasus. On the outbreak of the Crimean war (1853) he was called to Sebastopol and saw active service there, taking the command of a mountain battery, and assisting in the

defence of the citadel. Resigning his commission at the close of the war (1856), he devoted himself to literature. His "War and Peace" (1860), a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but "Anna Karenina," which appeared in 1876, is better appreciated abroad. Matthew Arnold spoke most enthusiastically in its praise a few months before his death, and George Meredith says that Anna, the beautiful but unfaithful wife, who ends her guilty passion by suicide, is the most perfectly depicted female character in all fiction. Since the publication of this last work, Tolstoi has given himself up to the earnest working out of the problems of life, the attainment of a higher religious and moral philosophy. He makes "Return not Evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of Christian life. His religious views are set forth in "Christ's Christianity" and "My Religion." His "Kreutzer Sonata," with its strange theory of morals, was published in 1890. In October 1892 Count Tolstoi deposited his memoirs and diaries with the Curator of the Rumyantsov Museum, on condition that they should not be published till ten years after his death. In November he legally made over his whole fortune to his wife and children. In 1893 he published "The Kingdom of God within Us," a work on the social question, and in 1894 "Patriotism and Christianity," a criticism of the Franco-Russian Alliance, in a series of articles which appeared in the *Daily Chronicle*. Since the foregoing was written (1894) Tolstoi's influence has steadily increased, and his personality and work have been the subject of much writing and speaking. Essays, appreciations, depreciations, and innumerable paragraphs, have kept him prominently before Europe, and the adoption of his views by various advanced societies—more particularly the Brotherhood Church at Croydon—marks the regard in which he is held by large numbers of men. In February 1895 the current issue of the *North American Review* contained a curious effusion exalting Tolstoi as "the greatest living moralist," and comparing his work with that of certain of his contemporaries—unquestionably to their disadvantage. Three months later (May 1895) the great Russian broke down completely in health, and was ordered a radical change, upon which he abandoned a tour then in preparation, and withdrew for some time to his estate in Poland. In October 1895 Tolstoi wrote a most powerful vindication of the Dukhobortsy sect, who, during the year, had suffered great persecution for their religion, and on the

Russian Censor refusing to allow its publication, Tolstoi sought the hospitality of the *Times*, which devoted full space to his somewhat lengthy article. Evidently convinced that speech was denied him in his native land, Tolstoi continued to address his literary pieces to the English press, notably to the *Daily Chronicle* and the *New Age*, the former publishing on March 17, 1896, a long letter of Tolstoi's to a correspondent in England on the Venezuela imbroglio which had recently occurred between this country and America. This letter exhibited that habitual "other-worldliness" of the novelist which distinguishes all his writings, but was without doubt a strong indictment of war, and consequently of patriotism, inasmuch as he argued that the former cannot exist without the latter. Rumours became current during September 1897 that the great novelist was suffering from an illness which necessitated a serious operation, but on a member of the staff of the *Odessa Listok* visiting the Count at Yasnaya Polyana he found him quite well. He was then working hard at a preface for a forthcoming book on contemporary science, and was giving the finishing touches to his long-promised and eagerly-expected work on art, which was to be published in London in the Russian original as well as in an English translation. In the following month (October 1897) a complete vindication of Tolstoi's robustness, both physical and mental, was afforded by the appearance in the *Peterburgskaya Vedomosti*, the organ of Prince Ukhtomsky, who was rigorously condemning the Government religious persecutions, of a daring letter on the fanatical intolerance which incited these outrages. The writer's wrath was fully aroused owing to several cases of children being actually removed from the custody of their parents on so-called religious grounds. It was truly noted at the time by a prominent English journal that the publication of such an epistle from Count Tolstoi in a St. Petersburg newspaper was a significant sign and an unusual event. A few months later was published the before-mentioned work of Tolstoi's on art. This book, "What is Art?" attracted wide-spread attention, and much interesting and suggestive writing was the result. Mr. George Bernard Shaw (*q.v.*) contributed a striking review to the *Daily Chronicle*, but the fundamental principles of Tolstoi's essay did not receive any general acceptance. Mention should be made of the issue in the autumn of 1898 of an excellent little monograph on Tolstoi by Mr. G. H. Ferris, who had previously written some articles in the *Ethical World* on "Ethics and Revolution in Russia."

TOMES, Charles Sissmore, M.A., F.R.C.S., F.R.S., was born in London in 1846, and is the son of the late Sir John Tomes. He was educated at Radley College, at Christ Church, Oxford, where he took a first class in natural science in 1866, and at the Middlesex Hospital. He practised as a dental surgeon in London from 1869 to 1897, when he retired into consulting practice. He was for many years Lecturer on Anatomy and Physiology at the Dental Hospital, London; is Crown Nominee on the General Medical Council, was their Inspector of Dental Examinations in the United Kingdom in 1895-96, besides being Examiner in Dental Surgery at the Roy. Coll. of Surgeons, Eng., for a period of fourteen years. He is Fellow of the Roy. Med. Chir. Soc., Hon. Member of the American Dental Association, &c. He was made F.R.S. in 1878. His principal works are his two editions of his father's well-known "Dental Surgery" (edits. 2 and 3), and his "Manual of Dental Anatomy." He has besides contributed many papers to the *Philosophical Transactions* on the teeth of reptiles, fishes, &c. Addresses: 37 Cavendish Square, W.; and 9 Park Crescent, W.

TOMLINSON, Herbert, B.A., F.R.S., was born at York, on Nov. 18, 1845, and was educated at St. Peter's School, York, and at Christ Church, Oxford. In 1868 he graduated B.A., both in the Mathematical and Natural Science Honour Schools; in 1870 he was Whitworth Exhibitioner, and in the same year was appointed Demonstrator of Natural Philosophy at King's College, London. In 1889 he was elected a Fellow of the Royal Society in consideration of his original researches in physics, and in 1894 was chosen as the first Principal of the South-Western Polytechnic, Chelsea. As a writer on natural science, Mr. Tomlinson is well known through his numerous contributions to the *Proceedings of the Royal Society*, the *Philosophical Magazine*, &c.; the most important of which relate to the influence of stress and strain on the Physical Properties of Matter. The following papers may be enumerated: "Effect of Magnetisation on the Electrical Conductivity of Iron" (*Proceedings of the Royal Society*, 1875); "Increase in Resistance to the Passage of an Electrical Current produced in Certain Wires by Stretching" (*ibid.*, 1877); "Alteration of Thermal Conductivity of Iron and Steel caused by Magnetism" (*ibid.*, 1878); "Moduli of Elasticity" (*Philosophical Transactions*, 1883); "Electrical Conductivity" (*ibid.*); "Relations between Moduli of Elasticity, Thermal Capacity, and other Physical Constants" (*Proceedings of the Royal Society*,

1885); "Alteration of the Electrical Conductivity of Cobalt, &c., by Longitudinal Traction" (*ibid.*, 1885); "Internal Friction of Metals" (*Philosophical Transactions*, 1886); "Co-efficient of Viscosity of Air" (*ibid.*); "On Certain Sources of Error in Connection with Experiments on Torsional Vibrations" (*Philosophical Magazine*, 1885); "Temporary and Permanent Effects on some of the Physical Properties of Iron produced by raising the Temperature to One Hundred Degrees C." (*ibid.*, 1886); "Effect of Change of Temperature on the Internal Friction and Torsional Elasticity of Metals" (abstract in *Proceedings of the Royal Society*, 1886); and "Effects of Magnetisation on the Elasticity and the Internal Friction of Metals" (*Philosophical Transactions*, vol. cxxix, p. 1). Mr. Tomlinson married Edith, daughter of F. W. Saunders. Address: 65 Oakley Street, Chelsea, S.W.

TOMS, Frederick, editor of the *Field*, began life as a printer's apprentice at Hertford. In 1855, having come up to London, he became managing printer of the *Field*, and in 1857 sub-editor. He was for very many years under J. H. Walsh, well known as "Stonehenge," and succeeded him as editor in 1888. He was joint-editor with Mr. J. H. Walsh of the "Modern Sportsman's Gun and Rifle." He has written much on sporting topics, on which he is one of the first living authorities. Address: *Field* Office, Bream's Buildings, Chancery Lane, W.C.

TOOLE, John Laurence, comedian, son of Mr. Toole, the civic toast-master, born in London, March 12, 1830, was educated at the City of London School, and became a clerk to a wine-merchant, but soon quitted this occupation; having been smitten with the "bias dramatic," he was induced to join the City Histrionic Club, where his qualifications for the dramatic profession were soon recognised, and he found a favourable opportunity for appearing before a public audience at a benefit to Mr. F. Webster, at the Haymarket Theatre, July 22, 1852. Having successfully passed this ordeal, he resolved to become an actor, and began his professional career under Mr. Charles Dillon, at the Queen's Theatre, Dublin, where he achieved a great success. After further testing his powers at Belfast, Edinburgh, and Glasgow, he accepted, in 1854, an engagement at the St. James's Theatre, London, under the management of Mrs. Seymour, and sustained a variety of characters in low comedy with considerable success. This was followed by an engagement with his old manager, Mr. C. Dillon, who had the Lyceum for a short term, and

on the opening of the New Adelphi Theatre by Mr. Webster, Mr. Toole became the leading comedian. He has for more than thirty years been a popular favourite, whether it be in the broad region of farce, or in those more important parts in which tears and laughter equally predominate; such as Caleb Plummer, in the version of Dickens's "Cricket on the Hearth," or the honest fireman, Joe Bright, in the drama "Through Fire and Water." For several years Mr. Toole has been in the habit of making a professional tour in the provinces, where he is as great a favourite as in the metropolis. In July 1874 he went on a "starring" tour to the United States, and made his American debut at Wallack's Theatre, New York, August 17. He re-appeared at the Gaiety Theatre, London, Nov. 8, 1875. On Nov. 17, 1880, he undertook the management of the Folly Theatre, which he reconstructed in accordance with all the requirements of the authorities, and re-named, calling it after his own name—Toole's Theatre. In 1888 he published his "Reminiscences." In March 1890 he started for a tour in Australia, which proved most successful. His most recent success was as Walker, in Mr. Barrie's play "Walker, London." Address: Maida Vale, W.

TOURGEE, Albion Winegar, Ph.D., LL.D., American author and jurist, was born at Williamsfield, Ohio, May 2, 1838. He studied at Rochester University, 1859–61; entered the Union army and served throughout the Civil War. At its close he settled at Greensboro, N.C., where he resided until 1880. He was a member of the N.C. Constitutional Conventions in 1868 and in the year 1875, and was one of the Commissioners to codify and revise the State laws. He was elected Judge of the Superior Court of the State in 1868, and held that position until 1874. He edited the *Continent*, a weekly magazine, New York, 1882–84. He has been a Professor of the Buffalo Law School since 1889, and wrote "A Bystander's Notes," which appeared in the *Chicago Inter-Ocean*, from 1888 to 1893. He is the author of several professional works: "The Code with Notes" (N.C.), 1877; "A Digest of Cited Cases" (N.C.), 1879; "Statutory Decisions of the North Carolina Reports," 1879. He is the author of the following novels: "Toinette" (now entitled "A Royal Gentleman"), 1874; "A Fool's Errand," 1879; "Figs and Thistles," 1879; "Bricks without Straw," 1880; "John Eax," 1882; "Hot Ploughshares," 1883; "Black Ice," 1886; "Button's Inn," 1887; "With Gauge and Swallow," 1889; "Pactolus Prime," 1890; "Murvale Eastman," 1891;

"A Son of Old Harry," 1892; "Out of the Sunset Sea," 1893; "An Outing with the Queen of Hearts," 1894; "The Mortgage on the Hip-roofed House," 1896; and "The Man who Outlived Himself: A Story," 1898. Miscellaneous Works: "An Appeal to Cæsar," 1884; "The Veteran and his Pipe," 1887; "Letters to a King," 1888. Since 1888 he has been a frequent contributor to the *North American Review*, *Forum*, and other magazines. His residence has been at Mayville, a village at the head of Lake Chautauqua, Chautauqua County, N.Y., since leaving the South.

TOWNSEND, Meredith, joint-editor and part proprietor of the *Spectator*, was born in 1831, and is the son of William Townsend, of Bures, Suffolk. In early life he went out to India, and during twelve years was successively sub-editor and editor and proprietor of the *Friend of India*. Returning to England, he became proprietor of the *Spectator* in 1861, and for many years edited the political department of that important journal, while the late Mr. Hutton was its distinguished literary chief. He now edits that journal jointly with Mr. J. St. Loe Strachey. Address of *Spectator*: 1 Wellington Street, Strand.

TOZER, The Right Rev. William George, M.A., D.D., was born in 1830, and is the third son of John Chapell Tozer, of Teignmouth. He was educated at St. John's College, Oxford (M.A. 1854; D.D. 1863). He was ordained Priest in 1855, and was Vicar of Burgh-le-Marsh with Winthorpe, Lincs., from 1857 to 1863, when he was ordained Missionary Bishop to Central Africa or Zanzibar. Remaining in this cure for ten years, he became Bishop of Jamaica in 1879, and was Bishop of Honduras from 1880 to 1881. In 1888–1889 he was Rector of S. Ferriby, Lincolnshire. Club: Oriental, 18 Hanover Square, W.

TRACY, The Hon. Benjamin Franklin, American statesman, was born at Oswego, N.Y., April 26, 1830. He received an academic education, studied law and began its practice as soon as he was of age. In 1853 and 1856 he was elected District Attorney of Tioga, his native county, and in 1862 was a member of the New York legislature. He was appointed, in 1862, by Governor Morgan, on a committee to organise recruiting for the United States army, and later commanded a regiment in the field, taking part in the battles of the Wilderness and Spottsylvania; and subsequently being in charge of the rendezvous and prison camp at Elmira, N.Y. When mustered out at the close of the war

he was breveted a Brigadier-General of Volunteers. He settled at Brooklyn, N.Y., and resumed his law practice. From 1866 to 1873 he was U.S. District Attorney for the district in which he lived; and from December 1881 to January 1883 he sat in the Court of Appeals (the highest judicial body in New York), to fill a vacancy. In 1882 he was nominated by his (the Republican) party as a Judge of the Supreme Court, but was not elected. From March 1889 to 1893 he was a member of President Harrison's Cabinet, holding the portfolio of Secretary of the Navy, and at the end of Mr. Harrison's term as President, he returned to New York and resumed the practice of his profession.

TRAILL, Henry Duff, D.C.L., sixth and youngest son of the late James Traill, a stipendiary magistrate of the Metropolitan District, and Caroline, daughter of William Whateley, Handsworth, Staffs., was born at Blackheath, Aug. 14, 1842, and educated at Merchant Taylors' School, whence he proceeded as Probationary Fellow to St. John's College, Oxford, where he graduated B.A. in 1864. He was called to the Bar by the Society of the Inner Temple in 1868, and joined the Home (now South-Eastern) Circuit. He adopted the journalistic and literary profession in 1871, and has been an extensive contributor to the *Pall Mall Gazette* (under the original management), the *St. James's Gazette*, the *Daily Telegraph*, the *Saturday Review*, &c. He published, in 1881, "Central Government" (the English Citizen series); in 1882, "Sterne" (the English Men of Letters series), and "Recaptured Rhymes," a re-issue of (principally) light political verse contributions to various newspapers and periodicals; in 1884, "The New Lucian," a series of Dialogues of the Dead; and "Coleridge" (English Men of Letters); in 1886, "Shaftesbury (the first Earl)," a monograph contributed to the series called English Worthies; in 1888, "William III." (Twelve English Statesmen); in 1889, "Strafford" (English Men of Action); in 1890, "Saturday Songs," a reprint of political verse contributions to the *Saturday Review*; in 1891, a life of the Marquis of Salisbury in "Reid's Prime Ministers of Queen Victoria." In 1892 he published "Number Twenty," a contribution to the Whitefriars Library of Wit and Humour; in 1896, "The Life of Sir John Franklin," and a volume of Egyptian sketches, "From Cairo to the Soudan Frontier"; in 1897, "Lord Cromer," a biography, and "The New Fiction, and other Essays on Literary Subjects." From 1893 to 1897 he was engaged in editing "Social England: a Record of the Progress of the People," a work which was

completed in six volumes in 1898. Mr. Traill has, since its commencement in October 1897, been editor of the weekly critical journal *Literature*, published from the *Times* office. Addresses: 47 Gordon Square, W.C.; and Athenaeum.

TRAILL, Professor James William Helenus, M.D., F.R.S., F.L.S., was born at Birsay, in the mainland of Orkney, on March 4, 1851. His father, the Rev. Samuel Traill, D.D., LL.D., was at that time minister of the parishes of Birsay and Harray, in Orkney, being subsequently appointed Professor of Systematic Theology in the University of Aberdeen, and in 1874 Moderator of the Church of Scotland. He was educated at home in Orkney, in the Grammar School of Old Aberdeen, and in the University of Aberdeen, taking the degrees of M.A. in 1870, and M.D. in 1879. In the years 1873 and 1875 he was the Naturalist of an expedition sent to survey several of the tributaries of the Amazon River in North Brazil, and made considerable collections of plants and animals, most of which were presented to the National Herbaria and Museums, and to the University. In 1877 he was appointed Regius Professor of Botany in the parent University. He has published numerous papers on the fauna and flora of Scotland, on new palms from the Amazon, on galls, &c.; and he has taken an active part in educational progress in the north of Scotland. Address: University, Aberdeen.

TRAQUAIR, Ramsay Heatley, M.D., LL.D., F.R.S., Keeper of the Natural History Collections in the Museum of Science and Art, Edinburgh, is the son of the late Rev. James Traquair, parish minister of Rhynd, Perthshire, and Elizabeth Mary Bayley, his wife, and was born at the Manse of Rhynd, July 30, 1840. Dr. Traquair received his school education in Edinburgh, and in 1857 entered the University of Edinburgh as a student of medicine. After a course of five years' study he received the degree of Doctor of Medicine in August 1862, and on that occasion a Gold Medal was awarded to him for his thesis on a biological subject, viz., the "Asymmetry of the Pleuronectidae." From 1863 to 1866 Dr. Traquair acted as Demonstrator of Anatomy in the University of Edinburgh, under the late eminent Professor Goodsir, and from 1866 to 1867 as Professor of Natural History in the Royal Agricultural College, Cirencester. In the autumn of 1867 he was appointed by the Lords of the Committee of Council on Education to the Professorship of Zoology in the Royal College of Science, Dublin,

from which post he was transferred, in 1873, to the Keepership of the Natural History Collections in the Museum of Science and Art, Edinburgh. He has also held the Swiney Lectureship in Geology at the British Museum for two periods of five years (1883-88) and one of three (1896-98). Dr. Traquair's attention was early drawn to the study of the structure of fishes, and among the extinct forms of the palæozoic rocks he soon found a rich and extensive field for original investigation. He has published over one hundred papers on Fossil Ichthyology, of which the most important are: "On the Structure and Affinities of *Tristichopterus alatus*," *Trans. Roy. Soc., Edin.*, 1875; "On the Agassizian Genera *Palæoniscus*, *Amblypterus*, *Pygopterus*, and *Gyrolepis*," *Qu. Journ. Geol. Soc.*, 1877; "The Structure and Affinities of the *Platysomidae*," *Trans. Roy. Soc. Edin.*, 1879; "Report on Fossil Fishes collected by the Geological Survey of Scotland in Eskdale and Liddesdale," *Trans. Roy. Soc. Edin.*, 1881. He is also engaged in monographing the Fishes of the Old Red Sandstone and Carboniferous Rocks of Great Britain for the Palæontographical Society. Of Dr. Traquair's contributions to the structure of recent fishes the two most important are his graduation thesis, "On the Asymmetry of the *Pleuronectidae*," published in *Trans. Linn. Soc.* for 1865, and his "Cranial Osteology of *Polypterus*," *Jour. Anat. and Phys.*, 1870. Mention should also be made of his "Extinct Vertebrata of the Moray Firth Area," in Harvie-Brown and Buckley's "Vertebrate Fauna of the Moray Basin," Edinburgh, 1896. Dr. Traquair received the Neill Medal of the Royal Society of Edinburgh in 1876; in 1881, was elected a Fellow of the Royal Society of London; and in 1893 the University of Edinburgh conferred on him the honorary degree of LL.D. in recognition of his services to science. Dr. Traquair married, in 1873, Phœbe Anna, daughter of the late Dr. William Moss, physician, Dublin, and has two sons and a daughter. Address: 8 Dean Park Crescent, Edinburgh.

TRAYNER, Lord, John Trayner, LL.D., Judge of the Court of Session and Lord Commissioner of Justiciary, Scotland, was born in Edinburgh on April 19, 1834, and is the son of Hugh Trayner, of Glasgow. He was educated at the Universities of Glasgow and Edinburgh, was called to the Scottish Bar in 1858, appointed Sheriff of Forfarshire in 1881, became a Judge of the Court of Session in 1885, with the official title of Lord Trayner, and since 1887 has been Lord Commissioner of Justiciary. He is also an ex-officio Member of the Scottish Railway

and Canal Commission. He is author of a well-known work on "Latin Maxims and Phrases." In 1863 he married a daughter of R. S. Wyld, LL.D., of Gilston. Address: 27 Moray Place, Edinburgh, &c.

TREDEGAR, Lord, Godfrey Charles Morgan, Bart., D.L., J.P., was born at Ruperra Castle, Cardiff, on April 28, 1830, and is the son of the 1st Baron, whom he succeeded in 1875, and Rosamund, only daughter of General Godfrey Basil Mundy. He was educated at Eton, and entered the army, joining the 17th Lancers, and as Captain Godfrey Morgan took part in the famous Balaclava Charge in 1854. In an interview with a representative of the *Western Mail* he recently gave a graphic account of his experiences. Describing the advance just after Nolan's death, and when the battery of the Russian Horse Artillery opened fire, he said: "I do not recollect hearing a word from anybody as we gradually broke from a trot to a canter, though the noise of the striking of men and horses by grape and round shot was deafening, whilst the dust and gravel struck up by the round shot that fell short was almost blinding, and irritated my horse so that I could scarcely hold him at all. But as we came nearer I could see plainly enough, especially when I was about a hundred yards from the guns. I appeared to be riding straight on to the muzzle of one of the guns, and I distinctly saw the gunner apply his fuse. I shut my eyes then, for I thought that settled the question as far as I was concerned. But the shot just missed me and struck the man on my right full in the chest. In another minute I was on the gun, and the leading Russian's grey horse, shot, I suppose, with a pistol by somebody on my right, fell across my horse, dragging it over with him, and pinning me in between the gun and himself. A Russian gunner on foot at once covered me with his carbine. He was just within reach of my sword, and I struck him across his neck. The blow did not do him much harm, but it disconcerted his aim. At the same time a mounted gunner struck my horse on the forehead with his sabre. Spurring 'Sir Briggs,' he half jumped, half blundered, over the fallen horses, and then for a short time bolted with me. I only remember finding myself alone amongst the Russians trying to get out as best I could. This, by some chance, I did, in spite of the attempts of the Russians to cut me down. When clear again of the guns I saw two or three of my men making their way back, and as the fire from both flanks was still heavy, it was a matter of running the gauntlet again. I have not sufficient recollection of minor incidents to describe

them, as probably no two men who were in that charge would describe it in the same way. When I was back pretty nearly where we started from I found that I was the senior officer of those not wounded, and, consequently, in command, there being only two others, both juniors to me, in the same position—Lieutenant Wombwell and Cornet Cleveland (afterwards killed at Inkerman). We remained formed up until the evening, when, as the enemy made no further attempt to advance, we returned to our tents, not very far off." From 1858 to 1875 Captain Morgan, who retired from the army in 1855, represented Brecknockshire in the Conservative interest in the House of Commons. Since 1885 he has been Hon. Colonel of the Royal Monmouth Engineer Militia. Addresses: 89 Portman Square, W.; Ruperra Castle, Glamorgan, &c.

TREE, Herbert Beerbohm, actor and manager, son of the late Mr. Julius Beerbohm, a grain merchant, was born in London on Dec. 17, 1853, and educated partly in England and partly in Germany. In 1870 he entered his father's office, but shortly afterwards became devoted to amateur acting, gradually drifting into the profession, and made his début on the regular stage (Globe Theatre, London), in 1878, in the character of "Grimaldi." After touring for some time in the provinces, he appeared in London in "The Two Orphans" and "The Congress at Paris." In March 1884 he made a hit in the part of the Rev. Robert Spalding in "The Private Secretary," at the Prince of Wales's, and shortly afterwards played the part of the spy Macari in "Called Back." His great versatility and subtlety as an actor made him so famous that he determined to try managership on his own account, and in 1887 he took the Comedy Theatre, where he produced "The Red Lamp," and played the part of an old Russian spy to perfection. Among his most successful productions at the Haymarket, which he took in the autumn of 1887, are: "A Man's Shadow," "Captain Swift," "The Village Priest," "Beau Austin," "The Ballad-Monger," "The Merry Wives of Windsor," "The Pompadour," "The Dancing-Girl," 1891; "Hamlet," and "Hypatia," 1892; "A Woman of No Importance," and "The Tempter," 1893; "The Charlatan," "A Bunch of Violets," and "John-a-Dreams," 1894. In all these pieces Mr. Tree has taken principal parts, and has been supported by Mrs. Beerbohm Tree (*née* Maud Holt), an accomplished actress, whom he married when she was a governess at Queen's College, Harley Street. Mr. Tree frequently makes known his views on the

actor's art. In December 1891 he read a paper to the members of the Playgoers' Club on "Some Interesting Fallacies of the Modern Stage," and in May 1893 he lectured at the Royal Institution on "The Imaginative Faculty." He also defended the art of "John-a-Dreams," in the columns of the *Times*, during November and December 1894, against various puritanical attacks. Before leaving England for a successful American tour in 1895, he was entertained at a banquet by many of his most important admirers. In 1896 he ceased to be manager of the Haymarket Theatre. The year 1897 was rendered notable in the annals of the stage by the opening of Her Majesty's Theatre, built by Mr. Tree on the site of the old Opera House. This is one of the largest and at the same time most scientifically arranged of London theatres. In his managerial capacity Mr. Tree has here revived some of his most noteworthy successes. He opened on April 28, 1897, with Mr. Gilbert Parker's "Seats of the Mighty," and subsequently produced "Old Clo' (May), "The Red Lamp," and "The Ballad-Monger" (June), "The Silver Key" (July), "Katherine and Petruchio" (Nov.), and "A Man's Shadow" (Nov.). The grand revival of 1898 was "Julius Cæsar," in which Mr. Tree sustained in a masterly manner the difficult part of Antony, while Mr. Waller and Mrs. Tree won laurels during the long run of the piece as Marcus Brutus and the slave Lucius respectively. Mr. Tree was (January 1899) playing D'Artagnan in an adaptation of the "Three Mousquetaires" of Dumas. Address: 77 Sloane Street, S.W.

TREFUSIS, The Right Rev. Robert Edward, Bishop of Crediton, Suffragan to the Bishop of Exeter, was born at Wear Gifford on Jan. 24, 1843, and is the second son of Captain the Hon. George Walpole Rolle Trefusis, R.N. He was educated at Cheltenham and Exeter College, Oxford (M.A. 1868). From 1866 to 1867 he was Curate of Buckingham, from 1867 to 1889 Vicar of Chittlehampton, in 1888 became Prebendary of Exeter, in 1889 Canon of Exeter, and in 1897 Bishop of Crediton. He married, in 1874, Emma, daughter of the late Owen Wethered, of Remnantz, Bucks. Address: The Chantry, Exeter.

TREVELYAN, The Right Hon. Sir George Otto, Bart., LL.D., D.C.L., D.L., born on July 20, 1838, at Rothay Temple, Leicestershire, is the only son of the late Sir Charles Edward Trevelyan, Bart., K.C.B., and Hannah More Macaulay, sister of Lord Macaulay. He was educated at Harrow School and Trinity

College, Cambridge, where he was second in the first class in classics. He was elected member for Tynemouth, in the Liberal interest, in 1865, and for the Border Burghs in 1868. Mr. Trevelyan was appointed Civil Lord of Admiralty, in Mr. Gladstone's Government, in December 1868, but resigned office in July 1870, on a point of conscience connected with the Government Education Bill. He advocated a sweeping reform of the army, including the abolition of the purchase of commissions, both in and out of Parliament, and was for many years the foremost supporter of the extension of the County Franchise. Mr. Trevelyan succeeded Mr. Shaw-Lefevre as Parliamentary Secretary to the Admiralty in November 1880, and held that office until his appointment, after the murder of Lord Frederick Cavendish, as Chief Secretary to the Lord-Lieutenant of Ireland (May 9, 1882). This arduous post he held through two most trying years, and in October 1884 he joined the Cabinet as Chancellor of the Duchy of Lancaster. On the formation of Mr. Gladstone's third Government in 1885, he was appointed to the new post of Secretary for Scotland, but resigned on March 27, 1886, in consequence of disagreement with the Prime Minister's proposed scheme for Ireland. He failed to secure re-election after the dissolution of 1886, but in 1887 he was returned as member for the Bridgeton Division of Glasgow. In August 1892 he again became Secretary for Scotland in Mr. Gladstone's Administration. He retired from Parliament in February 1897. He is the author of "Letters of a Competition Wallah," republished from *Macmillan's Magazine* in 1864; "Cawnpore," in 1865; "The Ladies in Parliament," "Horace at the University of Athens," and other pieces, collected and published in 1868; "The Life and Letters of Lord Macaulay," 2 vols. 1876 (2nd edit., 1877); and "The Early History of Charles James Fox," 1880. He is married to Caroline, daughter of R. N. Phillips, at one time M.P. for Bury, Lancs. Addresses: 8 Grosvenor Crescent; Wallington, Cambo, Northumberland; Welcombe, Stratford-on-Avon; and Athenæum.

TREVES, Frederick, F.R.C.S., was born at Dorchester on Feb. 15, 1843, and received his medical education at the London Hospital, where he was afterwards Surgeon and Lecturer on Surgery. He became F.R.C.S. in 1878, is a Member of Council and Member of the Court of Examiners of the Royal College of Surgeons, England, Surgeon-in-Ordinary to H.R.H. the Duke of York, Examiner in Surgery at the University of Cambridge, and in

Anatomy at the Universities of Aberdeen and Durham. He won the Jacksonian Prize Essay at the Royal College of Surgeons, England, in 1884; and as Hunterian Professor of Anatomy lectured in 1885-86, the subject in all cases being the Intestinal Canal. He is author of the following standard works: "Scrofula and its Gland Diseases," 1882; "A Manual of Surgical Applied Anatomy," 1883; "German-English Dictionary of Medical Terms," 1889; "A Manual of Operative Surgery," 1891; "The Surgical Treatment of Typhlitis," 1888 and 1891; "The Student's Handbook of Surgical Operations," 1892. He is editor of "A System of Surgery," 1895; and "A Manual of Surgery in Treatises by various Authors." He has also contributed largely to Heath's "Dictionary of Surgery," Morris's "Anatomy," Allbutt's "System," and other standard works of the same nature. Mr. Treves was appointed an Emeritus Professor of Surgery at the London Hospital in March 1899. Address: 6 Wimpole Street, W.

TREVOR-BATTYE, Aubyn Bernard Rochfort, explorer and zoologist, was born at Hever, in Kent, and is the second son of the Rector of Hever, the late William Wilberforce Battye, of Tingrith Manor, Beds., and Harriet, only daughter of Edmund Wakefield Meade-Waldo, of Stonewall Park and Hever Castle, whose ancestress, Ruth Hampden, daughter of the patriot John Hampden, married Sir John Trevor. He was educated at St. Edward's School and Christ Church College, Oxford (B.A.). He studied biology in his college days, under the then Linacre Professor, H. N. Moseley, of *Challenger* fame. On leaving the University he took to literary and scientific journalism, and wrote for the *Saturday*; but he is now best known as a zoologist who has travelled widely in little-known countries. He was the first white man to enter the farther parts of North-West Canada after the Riel Rebellion. He has also travelled on the Pacific sea-board of North America, in the north of Africa, Russia, Spitzbergen, Scandinavia, &c. In 1893 he investigated the Dwina Delta, after crossing to the White Sea, and explored the almost unknown Arctic Island of Kolquev, embodying these last experiences in his well-known book, "Ice-Bound in Kolquev," 1895. He has contributed largely to the scientific press, and has published: "Pictures in Prose," 1893; and "A Northern Highway of the Tsar," 1897. He is member of several learned societies. Address: 2 Whitehall Gardens, S.W.

TRIMEN, Roland, F.R.S., F.L.S., F.Z.S., F.Ent.S., Zoologist, third son of

Richard and Mary Ann Trimen, was born in London, Oct. 29, 1840, and was educated at a private school near Brighton, and at King's College School in London. He voyaged to the Cape (on medical advice) 1858-59; and was appointed to the Cape Civil Service, July 1860. He served in the Audit, the Colonial Secretary's, the Governor's, and the Crown Land's Offices, until 1876, when he was appointed Curator of the South-African Museum, Cape Town, a post from which he retired in January 1896. He was elected a Fellow of the Royal Society, June 1883, and in 1897 was elected President of the Entomological Society of London; and is the author of "Rhopalora Africæ Australis; a Descriptive Catalogue of South-African Butterflies" (London and Cape Town), 2 vols., 1862-66; and "South-African Butterflies; a Monograph of the Extra-Tropical Species" (London, 3 vols., 1887-89); also of various memoirs on Entomology, Ornithology, and Botany in the *Transactions* or *Proceedings* of the Entomological, Linnean, and Zoological Societies of London, the *Quarterly Journal of Science*, and other publications. He was President of the South African Philosophical Society from 1883 to 1885; and Commissioner of the Botanic Gardens, Cape Town, from 1876 to 1890. He was Chairman of the Phylloxera Commission, Cape Town, 1886; and represented the Cape at the Bordeaux Phylloxera Congress of 1881, and at the Congress of Zoologists held in Paris in August 1889. Address: 11 Chandos Street, W.

TRISTRAM, The Rev. Henry Baker, D.D., LL.D. Edin. and St. Andrews, F.R.S., C.M.Z.S., son of the late Rev. Henry Baker Tristram, Vicar of Eglington, Northumberland, a grandson of Viscount Barrington, was born May 11, 1822, and educated at the Grammar School of Durham, and at Lincoln College, Oxford (B.A. 1844, second class Lit. Hum.; M.A. 1846). In 1845 he was ordained to the Curacy of Morchard-Bishop, Devonshire, which he was obliged to resign in less than two years in consequence of ill-health. At that juncture Admiral Sir Charles Elliot was about to proceed to Bermuda as Governor, and Mr. Tristram accompanied him as Chaplain and Secretary. He resided at Bermuda three years, and then accepted, in 1849, the small rectory of Castle Eden, co. Durham. In 1855 the state of his health again induced him to seek a milder climate. He spent that winter in the city and neighbourhood of Algiers, making excursions into the Northern Sahara. A second year was occupied in researches beyond the range of the Atlas Mountains, guarded as far as

the southern frontier by an escort granted by Field-Marshal Randon, Governor-General of Algeria, and a third year spent on board a yacht in the Mediterranean afforded him the first opportunity of visiting Palestine. In 1860 he was collated by Bishop Longley to the Mastership of Greatham Hospital and Vicarage of Greatham, which he held till 1875, when he was appointed to a residential Canonry in Durham Cathedral by Bishop Baring. In 1863-4 he spent a year in the Holy Land, making scientific observations and identifying Scripture localities. In 1873 he made a similar tour to Moab, and in 1881 made an extensive tour through Palestine and the Lebanon, into Mesopotamia and Armenia. In 1879 he declined the offer made to him by the Earl of Beaconsfield of the Anglican Bishopric in Jerusalem. In 1891, during a tour round the world, he spent some months in exploring the little-visited interior districts of Japan, in which country he has a daughter engaged in high educational missionary work. He is a Member of the Convocation of the Province of York, and Provincial Grand-Master of "Mark Masons" for the two northern counties, and D. Prov.-G. Master Mason of the Province of Durham. He was President of the Biological Section of the British Association at Nottingham, 1893. Dr. Tristram is the author of "The Great Sahara," 1860; "The Land of Israel, a Journal of Travels with Reference to its Physical History," 1865 (4th edit., revised, 1884); "The Natural History of the Bible," 7th edit., 1883; "The Ornithology of Palestine," 1867; "A Winter Ride in Palestine," published in "Vacation Tourists," 1864; "Scenes in the East," 1870; "The Daughters of Syria," 3rd edit., 1874; "The Seven Golden Candlesticks," new edit., 1881; "Bible Places, or the Topography of the Holy Land," 1871 (13th thousand, 1896); "The Land of Moab," 2nd edit., 1874; "Pathways of Palestine," 1st series, 1881, 2nd series, 1883; "Incidents in Bible History chiselled on Ancient Monuments," 1875; "Genesis and the Brick Kiln," 1878; "Fauna and Flora of Palestine," 1884, for the Palestine Exploration Fund; "Eastern Customs in Bible Lands," 1894; "Rambles in Japan," 1895; contributions to the *Contemporary Review*, Smith's "Dictionary of the Bible," and many scientific periodicals. He married, in 1850, Eleanor Mary, daughter of P. Bowlby, an officer who fought in the Peninsula and at Waterloo. Addresses: The College, Durham; and Athenæum.

TROUTON, Frederick Thomas, M.A., D.Sc., F.R.S., was born in Dublin on Nov. 24, 1863, and is the youngest son of

the late Thomas Trouton of that city. He was educated at Dungannon Royal School and Trinity College, Dublin, taking a first Moderatorship in Experimental Science at his degree. With the intention, afterwards abandoned, of adopting an engineering career, he passed through the Engineering School connected with Trinity College. He received *stip. con.* the degrees of M.A. and D.Sc. from his University, and was elected a Fellow of the Royal Society in 1897. On taking his degree in 1884 he was offered and accepted the appointment of Assistant to the Professor of Experimental Physics, which post he still holds. From time to time he has published in various scientific journals accounts of experimental researches carried out in the Physical Laboratory of Trinity College, among which of most general interest are some giving an account of the repetition and extension of Hertz's classical experiments on Electrical Radiation, then new to the scientific world, the most important extension being an experimental determination of the direction of vibration of electric and magnetic force in plane polarised light; "Repetition of Hertz's Experiment, and Determination of the Direction of the Vibration of Light," *Nature*, 1889; "Experiments on Electro-Magnetic Radiation, including some on the Phase of Secondary Waves," *Nature*, 1889; "Secondary Electro-Magnetic Waves," *Phil. Mag.*, 1890; "The Influence the Size of the Reflector exerts in Hertz's Experiment," *Phil. Mag.*, 1891. Among his other published papers may be mentioned that on "Molecular Latent Heat," *Phil. Mag.*, 1884; "On the Motion under Gravity of Fluid Bubbles through Vertical Columns of Liquid of a different Density," *Proc. Roy. Soc.*, vol. 54; "An Experimental Investigation of the Laws of Attrition," *Proc. Roy. Soc.*, vol. 59; "On Temporary Thermo-Currents in Iron," *Rept. Brit. Assoc.*, 1889; "Arrangement of the Crystals of Certain Substances on Solidification," *Proc. Roy. Dublin Soc.*, vol. viii. 1898. Address: Caerleon, Killiney, co. Dublin.

TRUFFIER, Charles Jules, French actor, was born at Paris in 1856, and entered the Conservatoire, where he obtained a certificate for comedy. He was immediately engaged at the Odéon, where he made his first appearance in "Cendrillon," by Barrière. In 1875 he was admitted to the Comédie Française, where he acts low comedy parts, such as M. Purgon in the "Malade Imaginaire," Jean de Carillac in "Francillon"; Raymond in "Le Monde où l'on s'Ennuie," &c. M. Truffier is also known as a poet, having published "Sous les Frises," 1879, and "La Statue,"

1885. His comic opera, "Saute Marquis," was produced in 1883, and he has written a comedy, entitled "Le Papillon." He married Mdlle. Zoé Caroline Marie Molé, one of the chief singers at the Opéra Comique. He is an officer of Public Instruction, and lives at 178 Rue de Rivoli.

TRURO, Bishop of. See GOTT, THE RIGHT REV. JOHN.

TUKE, Henry Scott, was born at York on June 12, 1858, and is the son of the late Dr. D. Hack Tuke. He studied art at the Slade School, in Italy, and for two years under Laurens in Paris. His earliest Royal Academy picture was exhibited in 1879, since which he has been a fairly constant exhibitor there, and at the New, Grosvenor, and some foreign galleries. He is well known for his sea-pieces, &c. His "All Hands to the Pumps" and "August Blue," exhibited at the Royal Academy in 1889 and 1894 respectively, have been purchased under the terms of the Chantrey Bequest, and, in the latter year, his "Sailors Playing Cards" obtained the first gold medal at Munich, and was bought by the Bavarian Government. His more recent Royal Academy pictures have been a portrait of Mrs. George Talbot, and "The Swimmers' Pool," 1895; "Beside Green Waters," 1897; a portrait of Miss Muriel Lubbock, and "An Idyll of the Sea," 1898; and "The Diver," 1899. Address: Lyndon Lodge, Hanwell, W.

TUNIS, Bey of, Sidi Ali, was born in 1817, and succeeded his brother Bey Mohammed-es-Sadok in 1882. The very year of his accession the French established a Protectorate over Tunis, and reorganised the internal government of the country, under the direction of the Resident-General, M. Paul Cambon, the present French Ambassador in London (q.v.).

TUPPER, The Hon. Sir Charles, Bart., G.C.M.G., C.B., M.D., L.R.C.S. Edin., was born at Amherst, N.S., July 2, 1821. He is LL.D. of Cambridge and Edin., and M.A. and D.C.L. of Acadia College, Nova Scotia. He is Governor of Dalhousie College, Halifax (appointed by Act of Parliament in 1862); was President of the Canadian Medical Association from its formation, 1867, until 1870, when he declined re-election. He was a Member of the Executive Council and Provincial Secretary of Nova Scotia from 1857 to 1860, and from 1863 to June 30, 1867; and Prime Minister of that Province from 1864 until he retired from office with his Government, on the Union Act coming

into force on July 1, 1867; he was a delegate on public business from the Nova Scotia Government, 1858 and 1865, and from the Dominion Government, March 1868; leader of the delegation from Nova Scotia to the Union Conference at Charlottetown, 1864; to that in Quebec in the same year; and to the final Colonial Conference in London to complete terms of Union in 1866-67; he holds patent of rank and precedence from her Majesty as an Executive Councillor of Nova Scotia; was sworn as a Privy Councillor of Canada, June 1870, and was President of that body from that date until July 1, 1872, when he was appointed Minister of Inland Revenue, which office he held until Feb. 22, 1873, when appointed Minister of Customs. He resigned office with Sir John Macdonald in November 1873, and on the return of Sir John to power, was appointed Minister of Public Works in October 1878, and Minister of Railways and Canals in 1879. He represented the county of Cumberland, Nova Scotia, in Parliament for thirty-two years, in the Nova Scotia Assembly from 1855 until the Confederation in 1867, and thence in the Commons of Canada to 1884, when he resigned his seat in Parliament, and was appointed High Commissioner for Canada in London. He was appointed by the Dominion Government Executive Commissioner for Canada of the Antwerp Exhibition, 1885, and of the Colonial and Indian Exhibition, 1886, of which he was also appointed Royal Commissioner by the Queen. He received, in 1886, the honorary degree of Doctor of Laws (Cambridge), and the same day had conferred on him the honorary freedom of the Worshipful Company of Fishmongers of London. Just previous to the Federal elections of February 1887, he re-entered the Cabinet as Finance Minister, which position he retained until May 24, 1888, when he was re-appointed High Commissioner for the Dominion of Canada in London. Sir Charles was appointed one of her Majesty's Plenipotentiaries to the Fisheries Conference in Washington in 1887, the result of which Conference was the signature of a treaty on Feb. 15, 1888, subject to ratification, for the settlement of the matters in dispute between Canada and the United States in connection with the Atlantic Fisheries. Sir Charles carried a Bill through the Canadian Parliament for the ratification of a Treaty, where it was passed in both Houses without division. He was created a Baronet under patent dated Sept. 13, 1888. In January 1896 he entered the Bowell Administration as Secretary of State and Leader of the House of Commons, and later in the year succeeded him as Prime Minister of Canada. At the defeat of his party

at the polls, June 23, 1896, he resigned office, and was elected leader of the Opposition in the new Parliament in August. Address: Ottawa, Ontario, &c.

TUPPER, Hon. Sir Charles Herbert, K.C.M.G., LL.B., Q.C., M.P. (Canadian), Canadian jurist and statesman, was born at Amherst, N.S., Aug. 3, 1855, and was educated at Windsor Academy and at McGill University, where he won the Governor-General's Scholarship. He graduated LL.B. at Harvard University in 1876; was called to the Bar of Nova Scotia in 1878, and to the Ontario Bar in 1895. In 1882 he was elected to the House of Commons for Picton, and was re-elected in 1887 and in 1891. He entered Sir John Macdonald's Government, May 31, 1888, as Minister of Marine and Fisheries, and held that office under succeeding Governments until December 1894, and then became Minister of Justice and Attorney-General under Sir Mackenzie Bowell. In 1890 he was made a Q.C., and was selected to assist the British Ambassador at Washington in the discussion of regulations respecting fur seals, and in June 1892 he was chosen to be her Majesty's Agent for Great Britain in the Behring Sea Arbitration, which met at Paris, February 1893. His zeal and ability in the preparation of the case led to his appointment as K.C.M.G. In October 1897 he removed to British Columbia.

TURKEY, Sultan of. See ABD-UL-HAMID II.

TURNER, The Right Rev. Charles Henry, D.D., Bishop of Islington, Suffragan Bishop in the diocese of London, and Rector of St. Andrew Undershaft, is the eldest son of the late Thomas Turner, treasurer of Guy's Hospital, and was born on Jan. 14, 1842. He was educated at Cholmeley's School, Highgate, and at Trinity College, Cambridge, of which he was a Scholar. In 1864 he was tenth Wrangler, and in 1868 was ordained by the Bishop of Ely to the curacy of Godmanchester, Huntingdonshire. He was Resident Chaplain to the Bishop of London from 1873 to 1877, when he resumed parochial work as Vicar of St. Saviour's, Fitzroy Square. After five years in St. Pancras he succeeded the Rev. Harry Jones as Rector of St. George's-in-the-East, a position which he held for fifteen years and only recently resigned. He became a Prebendary of St. Paul's in 1895. In the same year he was appointed an honorary Chaplain to her Majesty, and was promoted to be a Chaplain-in-Ordinary in April 1898. He has taken an active part in connection with many religious

and social organisations in London, and for the last fourteen years has served as Examining Chaplain under three Bishops of London. He was appointed Bishop of Islington, and Suffragan to the Bishop of London in April 1898. He is married to a daughter of the late Dr. M'Dougall, Bishop of Labuan, and subsequently Canon of Winchester and Archdeacon of the Isle of Wight. Addresses: Westfield, West Hill, Hampstead, N.; and Athenæum.

TURNER, The Right Hon. Sir George, K.C.M.G., Premier and Treasurer of Victoria, was born at Melbourne, Aug. 8, 1851, and educated at the Central School. He practised as a Solicitor and Barrister, and was elected a member of the Victorian Parliament for St. Kilda in 1889. In 1891 he took office as Commissioner of Customs, and continued to hold this post while Mr. Shiels was reconstructing the Munro ministry. He has been successively Solicitor-General, Commissioner of Trade and Customs, and Minister of Health. In 1894 he became the Leader of the Opposition, and the Patterson Government was overthrown on his motion. His party returned to power at the general election, and he became Premier on September 27. He is well known as an organiser. He came to England with the other colonial Premiers for the Diamond Jubilee of 1897, when he was made a Privy Councillor, and an Honorary LL.D. of Cambridge University. He is a Member of the Australian National Federation Convention, and the successful issue of its labours early in 1899 has been greatly due to his enthusiastic advocacy of Federation. Address: Bovey-Carlisle Street, St. Kilda, Victoria.

TURNER, Professor Sir William, M.B., LL.D., D.Sc., D.C.L., F.R.S. London and Edinburgh, F.R.C.S. London and Edinburgh, was born in Lancaster in 1832, and is the son of William and Margaret Turner. He received his medical education at St. Bartholomew's Hospital, where he obtained a Scholarship, and in 1853 he became a member of the Royal College of Surgeons of England. As a student he gained an Exhibition and Gold Medal at the University of London, and took his degree in Medicine in 1857. In 1854 he was appointed Demonstrator of Anatomy in the University of Edinburgh; and in 1867, on the death of Professor John Goodsir, he became Professor of Anatomy. In addition, he is Honorary Professor of Anatomy to the Royal Scottish Academy. He has at various times held the following appointments: Examiner in Anatomy in the Universities of London, Oxford, and Durham; Lecturer on Anatomy and Phy-

siology in the Royal College of Surgeons of England; Dean of the Faculty of Medicine in the University of Edinburgh, and President of the Royal College of Surgeons of Edinburgh. For many years he has represented the University of Edinburgh on the General Council of Medical Education, and is now the President, having been elected in the spring of 1898. In 1889 he was elected by the Senate of the University as one of their representatives on the University Court. He was made, in 1881, a Member of the Royal Commission to inquire into the working of the Acts affecting the Medical Profession. He has written numerous articles on anatomy, both human and comparative, in the *Transactions* of various learned societies, in the Reports of H.M.S. *Challenger*, and in different journals, more especially in the *Journal of Anatomy and Physiology*, of which he is one of the founders and editors. Some years ago he was awarded by the Royal Society of Edinburgh the Neill Medal for his contributions to Scottish Natural History. He is a member of many scientific societies, and has received the Honorary Membership of the Royal Irish Academy, the Anthropological Societies of Berlin, Rome, and Paris, and the Royal Medico-Chirurgical Society of London, the Royal Academy of Science of Berlin, the Literary and Philosophical Society of Manchester, the Obstetrical Societies of London and Edinburgh. The Universities of Oxford, Glasgow, Dublin, Montreal, Trinity University, Toronto, and Durham have conferred on him honorary degrees, and he has been elected a member of the Athenæum under the rule which admits those who have attained eminence in Science, Literature, the Arts, or Public Service. In 1886 he received the honour of Knighthood, and is D.L. of the City and County of Edinburgh. He joined the Volunteer force at its institution in 1859, and held for thirty years a commission in the Queen's Rifle Volunteer Brigade, Royal Scots, when he retired with the honorary rank of Lieut.-Colonel. In December 1898, on the occasion of the Jubilee of the St. Petersburg Academy of Medicine, he was appointed an Honorary Member of the Academy. He is married to Agnes, eldest daughter of Abraham Logan, of Burnhouses, Berwickshire. Addresses: 6 Eton Terrace, Edinburgh; and Athenæum.

TÜRR, Gen. Stephen, born at Baja, in Hungary, in 1825, became a lieutenant in the Austrian army in 1848. His regiment was stationed in Italy, and his rooted dislike of the House of Hapsburg inspired him with a strong sympathy for the Italian cause. The Revolutionary Government of Hungary having called

upon all Hungarians serving under the Austrian flag in Italy to desert to the Piedmontese, he went over to the latter from Buffalora in January 1849, and was appointed Colonel of the Hungarian Legion in the Sardinian service. After the disaster of Novara, the greater part of the Hungarian Legion followed their Colonel into Baden, where a revolutionary movement had taken place, and throughout the struggle Colonel Türr commanded not only the remnant of his legion, but also three Baden battalions. After the insurrection had been put down, the Hungarians took refuge in Switzerland, and the Federal Government aided many of them to start for the United States; but Colonel Türr, being too ill to go, lived for four years on a small pension granted to him by the Sardinian Government. On the outbreak of the Russian war he vainly endeavoured to serve under Omar Pasha, but succeeded in taking part as a volunteer in several of the battles in the Crimea, especially in that of the Tchernaya, and received a commission from Colonel M'Murdo, the officer in command of the British transport service. While engaged in the performance of his duty, and in connection with this employment in the autumn of 1865, he was arrested at Bucharest by the Austrians as a deserter, and sent under escort to Cronstadt to be tried there. His illegal arrest caused great excitement throughout Europe, and was protested against by the British and French Governments. After a long incarceration he was tried by court-martial, and sentenced to death; which sentence was, however (owing to the urgent remonstrance of the British Government), commuted to perpetual banishment. In the Italian war in 1859 he was appointed a member of Garibaldi's staff, with the rank of Colonel, and was always at the General's side during this campaign, until he was seriously wounded in the left arm at Brescia. In the spring of 1860, when Garibaldi planned his Sicilian expedition, Colonel Türr again served under him in the capacity of aide-de-camp, and before Palermo was promoted to the rank of General of Division. The brilliant part he played in the War of Liberation was acknowledged by the Government of Victor Emmanuel, who promoted him to the rank of General of Division in the army of Italy in 1861, and confided to him the military command of the town and province of Naples. He is the author of "Arrestation, Procès, et Condamnation du Général Türr," 1853; and also of "The House of Austria and Hungary," 1865. He married the Princess Adeline Wyse Bonaparte, a cousin of Napoleon III., Sept. 10, 1861, and took up his residence at Pallanza. Since his

marriage he has made two journeys to Roumania, with a view of creating difficulties for Austria in the East of Europe. These political journeys were, however, thought to be compromising to the Italian Government, and, accordingly, Colonel Türr resigned his commission in 1864. He returned to Hungary after the war of 1866. In 1870 he busied himself in trying to effect an alliance between France, Italy, and Austria. During the Russo-Turkish War he was violently hostile to Russia. In June 1886 he obtained, under the patronage of the late Ferdinand de Lesseps, the concession for piercing a canal through the Isthmus of Corinth. The work was at first retarded by financial difficulties, but was finally accomplished in 1893.

TUSON, General Sir Henry Brasnell, K.C.B., Deputy Adjutant-General, Royal Marines, son of the late Lieutenant James Tuson, R.N., was born in April 1836. He joined the Royal Marine Artillery as a Lieutenant in 1854, and was promoted Captain in November 1865, Major in October 1877, and Colonel in November 1882. He served in China in 1858-60, and commanded a detachment on an expedition against pirates, and was present at the capture and destruction of over one hundred junks; he was also present at the attack on and capture of the Peiho Forts, and was mentioned in despatches. As a Major he had charge of the Royal Marine Artillery employed on special service in the Zulu War. He also commanded the battalion of the Royal Marine Artillery which did such good service throughout the campaign against Arabi Pasha. Colonel Tuson and his men were present at every action fought, rendering special service at the advance-guard affair at Tel-el-Mahuta, where they greatly helped the Horse Artillery against the Egyptian guns, and at the two fights at Kassassin and Tel-el-Kebir. He was promoted Colonel for his services, and appointed extra Aide-de-Camp to the Queen, and also received a C.B. and the Medjidieh of the 3rd class. Colonel Tuson commanded the Royal Marine forces during the naval and military operations in the Eastern Soudan, and at the battles of El-Teb and Tamai. He took part in the advance on and relief of Tokar and the advance on Tamaniet. His services on these occasions were officially acknowledged by the Admiralty, and publicly notified at the headquarters of the four divisions of the Royal Marines. He was promoted Major-General in 1888. The Duke of Edinburgh, upon his accession to the Duchy of Saxe-Coburg-Gotha, conferred upon General Tuson, with the permission of the Queen, the Saxe Ernestine

Order of the first class. He also received a K.C.B. on the 24th May 1895. Lieut.-General Sir Henry Tuson married, in 1864, Ann Frances, a daughter of the late Major J. Bates. Address: 43 Neverin Square, S.W.

TUTTIETT, M. G. ("Maxwell Gray"), was born at Newport, Isle of Wight, being the only daughter of Frank Bampfylde Tuttiett, M.R.C.S., and Eliza, daughter of Thomas Glead. She is the authoress of "The Silence of Dean Maitland," 1886; "The Reproach of Annesly," 1888; "In the Heart of the Storm," 1891; "Westminster Chimes, and other Poems," 1889; "An Innocent Impostor, and other Stories," 1892; "A Costly Freak," 1893; "The Last Sentence," 1892; "Lays of the Dragon-Slayer," 1894, a poem; "Sweethearts and Friends," 1897; "Ribstone Pippins," and "The House of Hidden Treasure," 1898. She has also published essays in reviews and magazines, also poems and short stories in magazines, &c. Address: 2 Mount Ararat Road, Richmond, Surrey.

TWAIN, Mark. See CLEMENS, SAMUEL LANGHORNE.

TWEEDDALE, Marquis of, William Montagu Hay, K.T., D.L., was born on Jan. 27, 1826, and is the third son of the 8th Marquis, whom he succeeded in 1878, and Susan, daughter of the 5th Duke of Manchester. He was educated at Haileybury, and entered the Bengal Civil Service, being appointed to be Deputy Commissioner of Simla and Superintendent of Hill States in Northern India. Returning home in 1862, he was subsequently elected an M.P., and as Lord William Hay represented Taunton in the Liberal interest from 1865 to 1868, and the Haddington Burghs in 1878, when he succeeded to the title. He has been Lord High Commissioner to the General Assembly of the Church of Scotland (1889-1892 and 1896-97), and when Chairman of the North British Railway Company was one of the most successful and hard-worked of directors. He married, in 1878, Candida, daughter of Signor Vincenzo Bartolucci, of Cantiano, Rome. Addresses: 6 Hill Street, W.; and Yester House, Haddingtonshire.

TWEEDIE, Mrs. Alec, author, is a daughter of the late Dr. George Harley, F.R.S., and widow of Alec Tweedie, grandson of Dr. Tweedie, F.R.S. She was educated at Queen's College, Harley Street, London, and in Germany. Her writings include: "A Girl's Ride in Iceland," 1890 (3rd edit. 1895); "The Oberammergau

Passion Play," 1890; "A Winter Jaunt to Norway," 1894 (2nd edit. 1895); "Wilton, Q.C.," a story, and "Danish ~~versus~~ English Butter-Making," 1895; "Through Finland in Carts," 1897; and "The First College for Women," being an account of Queen's College, Harley Street, London, 1898, and a memoir of her father, 1899. Mrs. Alec Tweedie's name is well known to readers of magazines and the daily journals. Address: 30 York Terrace, N.W.

TWEEDMOUTH, Lord, The Right Hon. Edward Marjoribanks, D.L., J.P., born in London, July 8, 1849, is the eldest son of the late Lord Tweedmouth. He was educated at Harrow, and at Christ Church, Oxford, which he left without taking a degree. He was called to the Bar at the Inner Temple in 1874. In 1880 he was elected member for Berwickshire in the Liberal interest, and in 1883 moved the Address in answer to the speech from the Throne. In February 1886 he was appointed Comptroller of her Majesty's Household, second whip to the Liberal party, and sworn a Privy Councillor. In 1883-84 he served as Chairman of the Select Committee on Harbour Accommodation, and was a member of the Royal Commission on Trawling. He was again returned for Berwickshire in 1886 and in 1892. In August of the latter year he was appointed Patronage Secretary and Chief Liberal Whip. In March 1894, shortly after the retirement of Mr. Gladstone from office, he succeeded to his father, the first Lord Tweedmouth, who died at that time. In March 1894 he was appointed Lord Privy Seal, and in May Chancellor of the Duchy. He is regarded as one of the mainstays of his party, has always been a staunch supporter of the Eighty Club, and was supposed to be peculiarly in the confidence both of Mr. Gladstone (whose intimate friend he was) and of Lord Rosebery. He was elected an Alderman (Progressive) of the London County Council in March 1898. He married, in 1873, Fanny Spencer Churchill, third daughter of the 7th Duke of Marlborough. Addresses: Brook House, Park Lane, W.; and Halton Hall, Berwick-on-Tweed, &c.

TWEEDY, John, F.R.C.S., received his medical education at University College, London, where he was at one time Assistant Medical Officer of the Skin Department, and is now Professor of Ophthalmic Medicine, Surgeon, and Ophthalmic Surgeon. He is Surgeon to the Royal London Ophthalmic Hospital, Fellow of the Roy. Med. Chir. Soc., and Medical Soc. of London, besides being Member of Council of the Roy. Coll. of Surgeons, Eng., and one

of the Vice-Presidents for 1899–1900. He has written largely on the Eye in Heath's "Dictionary of Practical Surgery," Quain's "Dictionary of Medicine," the *Transactions of the Ophthalmic Society*, &c. Address: 100 Harley Street, W.

TWINING, Louisa, was born in London, Nov. 16, 1820, and is the daughter of Richard Twining. She was educated at home, and by attending Lectures at the Royal Institution, Queen's College, Harley Street, and elsewhere. She acted as Guardian of the Poor at Kensington from 1884 to 1890, and of the Tonbridge Union from 1893 to 1896. Miss Louisa Twining has been engaged in Poor-Law Administration during more than forty years. In 1858 she founded the Workhouse Visiting Society, for the purpose of looking after the poor, especially the incurably sick, in workhouses. The Society consisted of ladies, and these aimed, as their prospectus set forth, at the moral and spiritual benefit of inmates, but their labours naturally led to the whole question of pauperism coming before the notice of Parliament and of the nation. In 1858 she wrote an important letter to the *Times*, which has throughout seconded her in her labours, on workhouse nurses, their habits of intemperance, &c. In 1861, when a Select Committee on Poor-Law Relief had been appointed, she gave important evidence about the work of her society before the Committee. Four years afterwards, in 1865, the *Lancet*, in obedience, as it stated, to the best traditions of the medical profession, who had played their part for years in establishing kindlier relations between rich and poor, started its Sanitary Commission for Investigating the State of the Infirmarys of Workhouses. The work of this Commission is well known, and was doubtless originally suggested by the labours of Miss Twining. Among books published by the subject of our memoir may be mentioned: "Symbols and Emblems of Early and Mediæval Christian Art," illustrated, 1st edit., 1852; 2nd edit., 1884; "Types and Figures of the Bible," illustrated, 1855; and many writings on the subject of workhouses, including "A Paper on the Condition of Workhouses," read before the Social Science Congress at Birmingham, 1857; "Letter to the President of the Poor-Law Board," "Morning and Evening Prayers for Workhouses," "Readings for Visitors to Workhouses and Hospitals," "Metropolitan Workhouses and their Inmates," "Workhouses and Women's Work," "Recollections of Workhouse Visiting and Management during twenty-five years," 1880; "Poor-Law Relief in Foreign Countries and Outdoor Relief in Eng-

land," 1884; "Workhouses and Pauperism," 1898. Address: Rochester.

TYLOR, Professor Edward Bur-nett, D.C.L., LL.D., F.R.S., J.P., was born at Camberwell, Oct. 2, 1832, and educated at the School of the Society of Friends, Grove House, Tottenham. His work has been specially devoted to the study of the races of mankind, their history, languages, and civilisation. At a time when anthropology was far from having attained to the consideration it now receives, and was not held to be a subject for instruction, he had the good fortune of accompanying his friend, Mr. Henry Christy, on a journey in Mexico in 1856, the archæological objects collected during which now form part of the Christy Collection in the Ethnological Department of the British Museum. He was elected a Fellow of the Royal Society in 1871, received the honorary degree of LL.D. from the University of St. Andrews in 1873, and of D.C.L. from the University of Oxford in 1875. In 1883 he was appointed Keeper of the Oxford University Museum and Reader in Anthropology, of which subject he became in 1896 the first Professor. In 1888 he was elected the first Gifford Lecturer by the University of Aberdeen, delivering a two-years' course on "Natural Religion," the results embodied in which still await completion and publication. Dr. Tylor has been President of the Anthropological Institute in 1879–80 and 1891–92. He is the author of "Anahuac, or Mexico and the Mexicans," 1861; "Researches into the History of Mankind," 1865; and "Primitive Culture: Researches into the Development of Mythology, Philosophy, Religion, Art, and Custom," 2 vols., 1871 (3rd edit., 1891). A more recent work is an educational handbook of the Science of Man, "Anthropology: an introduction to the Study of Man and Civilisation," 1881. He married, in 1858, Anna, daughter of the late Sylvanus Fox, of Wellington, Somerset. Addresses: Museum House, Oxford; and Athenæum.

TYNAN, Katharine (Mrs. Katharine Tynan Hinkson), was born in Dublin in the earlier sixties, but lived nearly all her life till her marriage at Whitehall, Clasdalkin, co. Dublin, where her father, Mr. Andrew C. Tynan, farms his own land. She went to school to the Dominican Convent of St. Catherine of Sienna, Drogheda, but left at an early age, and educated herself by miscellaneous reading, and a free country life in the shadow of the mountains. Her father was her first critic. She began writing to please him, published verse in *Young*

Ireland, a Dublin paper, the *Graphic*, and the *Irish Monthly* under the editorship of Father Matthew Russell, brother of the Lord Chief-Justice of England. To the discrimination of Father Russell she owes her successful entry on literature. She published her first volume of verse, "Louise de La Vallière," with Kegan Paul & Co. in 1885; "Shamrocks," two years later; "Ballads and Lyrics," in 1892. In 1887 she began to write prose for the *Providence Sunday Journal*, and soon after for the *Speaker* and *National Observer*. In 1893 she married Mr. H. A. Hinkson, of Dublin University, and came to live in London. The succeeding spring Mr. Lane published her "Cuckoo Songs," and Messrs. Lawrence & Bullen her "Cluster of Nuts," a volume of Irish stories. Since that time she has contributed to most of the magazines, reviews, and newspapers of a literary kind. To the *Pall Mall Gazette* she contributes much prose and verse in these latter days. In 1895 she published "Miracle Plays," with Mr. Lane; "An Isle in the Water," with Messrs. Black; and "The Way of a Maid," with Messrs. Lawrence & Bullen. In 1896, "Oh, what a Plague is Love!" with Messrs. A. & C. Black, and "A Lover's Breast-Knot," with Mr. Elkin Mathews. Her two most recent volumes are "The Hand-ome Brandons" and "The Wind in the Trees" (poems), 1898. She reviews much and writes many miscellaneous articles. Address: 107 Blenheim Crescent, Notting Hill, W.

TZE-HSI ("Tze," or "Tsze," signifying paternal love, or the love of a superior for an inferior), **Dowager-Empress of China**, the maternal aunt of Kwang-Hsu (*q.v.*), was a child of poor parents, who lived in the suburbs of Canton. At an early age, following a common practice in China, she was sold as a slave by her parents on account of their poverty. She became the property of a famous general, who, enchanted with her great beauty, adopted her, and offered her as a present to the reigning Emperor, Hsien-Feng. She so charmed the "Son of Heaven" by her looks and intelligence, that he made her his secondary wife, and on her bearing him a son, the future Emperor Tung Chih, raised her to the first rank. On his death she became the Regent of the Empire, administering the national affairs for fifteen years, with more vigour than any of her predecessors. According to rumour she has been the cause of the death of the present Emperor's mother, her own sister, the Marquis Tseng, and Prince Chun, and many others who have stood in her way. But this has been denied by Dr. Dudgeon. During the minority of Kwang Hsu she reigned until 1889. In September 1898 she

virtually deposed Kwang Hsu because of his desires for reform; she reinstated her ancient ally and adviser, Li Hung Chang (*q.v.*), and reintroduced the time-honoured celestial régime. She has lately received the ladies of the diplomatic body in Peking in an affable manner, an act probably without precedent in the imperial annals, and is now (1899) again permitting the Emperor to issue rescripts.

U

UDNY, Sir Richard, K.C.S.I., late Commissioner of the Peshawar Division, Punjab, was born in 1847, and is the eldest son of the late George Udney, H.E.I.C.S., Sub-Treasurer of the Bank of Bengal, and pursuer in the famous real property case of *Udney v. Udney*, and Anne Lydia, second daughter of the late Samuel Tomkins, banker, of Lombard Street. He was educated at schools at St. Andrews, and at Aberdeen University, where he took the M.A. degree in 1866, after obtaining first class honours in Mathematics and a second class in Classics. In 1867 he obtained the Fullerton Mathematical Scholarship at Aberdeen, and subsequently spent a term or two at Cambridge. He entered the Bengal Civil Service in 1869, and has served as political officer with the Jawaki Expedition, 1877-78; the Mahsud Wazir Expedition, 1881; the Samana (Miranzai), 1891, and Isazai or Black Mountain Expedition in 1892, for which he obtained a medal and two clasps. He was appointed on a special mission to the Kurram Valley in 1888, and was Commissioner for the delimitation of sections of the Indo-Afghan Boundary in 1894-95 and 1896-97. From 1891 to 1898 he was Commissioner of the Peshawar Division. His position here has been most responsible. He has been thrown into constant intercourse with wild tribes, members of which have not infrequently shot at him as he has ridden among their mountains. His tact, and his extreme versatility as a linguist, however, have endeared him to the frontier tribesmen, and their revolt in the recent war cannot be laid at Sir Richard's door. He has been repeatedly and violently assailed by a section of the Indian press for allowing weapons to fall into the hands of the enemy, and for refusing help, as he had advisedly refused it before, at a moment when the Khyber was threatened by the tribesmen. But from the vexatious charges of party journalists he was triumphantly cleared by Lord Lansdowne, in his great speech on the Indian Frontier Question, delivered in Parliament at the close of the

campaign. Sir Richard Udny was with General Lockhart during the greater part of the war, and was the spokesman of the English Government at a durbar where the rebel chiefs assembled to hear the conditions of peace propounded to them in Pushtu. He was honoured by his old University with the degree of LL.D. in August 1898. He retired in 1898. He is married to Alicia, daughter of the late Samuel Tomkins, jun., banker, of Lombard Street. Address: East Indian United Service Club, 16 St. James's Square, S.W.

UNITED STATES OF AMERICA,
President of. See M'KINLEY, THE HON.
WILLIAM.

UNWIN, Professor William Cawthorne, B.Sc., F.R.S., M.I.C.E., Hon. M.I.M.E., was born at Coggeshall, in Essex, in 1838, and is the son of William Jordan Unwin, LL.D., for many years Principal of Homerton College. He was educated at the City of London School, and was apprenticed in the works of Sir William Fairbairn at Manchester, 1855 to 1862. Professor Unwin was Instructor at the Royal School of Naval Architecture, South Kensington, 1868-72; Professor of Mechanical and Hydraulic Engineering, Royal Indian Engineering College, Cooper's Hill, 1872-84; and since that time has been Professor of Engineering, Central Institution of the City and Guilds Institute at South Kensington. He is the author of "Wrought-Iron Bridges and Roofs," 1869; "The Elements of Machine Design," 1877 (11th edit., 1890-91); "The Testing of Materials of Construction," 1888; and of various papers in the *Proceedings of Societies*. In 1893 he delivered the Howard lectures on the "Development and Transmission of Power from Central Stations." In 1895 he delivered the Forrest lecture on "The Experimental Study of Steam-Engines," and in 1896 the Watt Lecture on the life of Hirn. He was Secretary of the International Commission on the Utilisation of Niagara. Address: 7 Palace Gate Mansions, Kensington.

UZÈS, Duchesse d', Marie Adrienne Anne Clémentine de Rochechouart-Mortemart, was born in Paris in 1848, and in 1867 married the Duc d'Uzès, who died in 1878. Her husband was a great supporter of Legitimist principles, and his widow continued his policy, putting her immense fortune at the service of the monarchical party. She came greatly into notice during the Boulangist agitation, 1888-90, by spending vast sums of money in the electoral campaigns. She was reported to have given three millions of

francs to aid a *coup d'état*, which was to be brought about by General Boulanger in favour of the Comte de Paris. The Duchesse is also known as a successful sculptor, having several times exhibited at the Salon. Her huge monument to Émile Augier, for the town of Valence, could not be got into the Palais de l'Industrie, and was exhibited outside, in 1895. Her eldest son died while exploring the Congo in 1893, and she published, in 1894, "Le Voyage de mon Fils au Congo." Her Paris address is: 76 Avenue des Champs Élysées.

VAMBÉRY, Professor Arminius, born at Duna-Szerdahely, Hungary, in 1832, of very poor parents, was at an early age obliged to leave the shelter of the paternal roof and seek his own livelihood. He studied in the Latin school of Pressburg, and devoted his leisure hours to the study of foreign languages. In order to complete his knowledge of Oriental languages he went to the East; and, taking up his residence in Constantinople, visited many parts of the East, and travelled in the disguise of a dervish, by routes unknown to Europeans, through the deserts of the Oxus to Khiva, and thence by Bokhara to Samarcand, in 1861-64. His "Travels and Adventures in Central Asia" appeared in London in 1864. He has been appointed Professor of Oriental Languages at the University of Pesth. From that town he has for many years written frequent letters to the *Times* and other English papers, warning England against the designs of Russia. He has more than once visited England on a lecturing tour; the last occasion being in 1885, when he was in London at the same time as M. Lessar, whose diplomacy he endeavoured to counteract. His more recent works are "Djagatal Language," and an account of his "Wanderings and Adventures in Persia," 1867; "Sketches of Central Asia," 1868; "Uigur Linguistical Monument," 1870; "History of Bokhara, from the Earliest Period down to the Present," 1873; "Central Asia and the Anglo-Russian Frontier Question," 1874; "Mahomedanism in the Nineteenth Century," 1875; "Sketches of Manners and Costumes in Oriental Countries," 1876; "Etymological Dictionary of the Turco-Tartar Languages," 1878; "Primitive Civilisation of the Turco-Tartar Peoples," 1879; "Sheibaniname," and "The Coming Struggle for India," 1885. An interesting account of his "Life and Adventures," written by himself, with a dedication to

the boys of England, was published in English in 1889. Since that date he has published "The Story of Hungary," 1877, besides many essays in English, German, and Hungarian, and has written an introduction to the "Voyages and Adventures of Ferdinand Mendez Pinto," in the Adventure Series, 1891. Address: The University, Pesth.

VANBRUGH, Irene, was born at Heavitree, in Devon, and is the youngest daughter of the Rev. Preb. R. H. Barnes. She was educated first at the High School in Exeter, and then at a finishing school in Paris. After a season with Miss Sarah Thorne, she joined Mr. Toole's company in September 1889, and played the leads in his repertory in London, in the provinces, and in Australia. After the company returned to town, Miss Irene Vanbrugh played both in Mr. J. M. Barrie's skit, entitled "Ibsen's Ghost," and in his "Walker, London," which ran for eighteen months. In September 1893 she went to the Haymarket for "The Tempter," "Six Persons," &c.; and leaving Mr. Tree in February 1894, went to the St. James's for "The Masqueraders." This was followed by "The Importance of Being Earnest," by "Guy Domville," and by revivals. When her brother-in-law, Mr. Arthur Bouchier, in September 1895, undertook the management of the Royalty Theatre, Miss Irene Vanbrugh joined his company to its great advantage, for it was there she played in "Kitty Clive" and "The Liars," as well as in "The Chili Widow." After touring with Mr. and Mrs. Arthur Bouchier in America, she went to the Criterion to create the part of Lady Rosamond in "The Liars." Jan. 6, 1898, saw the first night of Miss Irene Vanbrugh's appearance in the title-rôle of "Trelawney of the Wells" at the Court Theatre. Permanent address: 190 Earl's Court Road, S.W.

VANBRUGH, Violet (Mrs. Arthur Bouchier), was born at St. Mary Church, Torquay, Devon, and is the eldest daughter of the Rev. Preb. Reginald H. Barnes. After a season with Miss Sarah Thorne, she joined Mr. Toole's London company, and as Lady Anne Babbicombe in "The Butler" made an instant success. When Mr. and Mrs. Kendal opened at the Court, Miss Vanbrugh went to them for "The Weaker Sex," and stayed with them both for their London work and for two of their American tours, playing throughout secondary parts to Mrs. Kendal. In 1892 "Henry VIII." was produced at the Lyceum. Miss Vanbrugh added greatly to its success by the charming fashion in which she represented Anne Boleyn.

After much good work at Daly's she was married to Mr. Arthur Bouchier on Dec. 9, 1895, and a few months later the young couple started in management on their own account at the Royalty Theatre, where they produced "The Chili Widow" and "The Queen's Proctor." These two plays they took to America in November 1896, and upon their return they played a short season at the Strand. In May 1898 Miss Vanbrugh created the title-rôle in George Bancroft's play "Teresa," and subsequently played in Mrs. Craigie's "Ambassador" at the St. James's. Permanent address: 190 Earl's Court Road, S.W.

VANDAM, Albert Dresden, the "Englishman in Paris," author and journalist, was born in London on March 1843, and is the eldest son of Mark Vandam, District Commissioner for the Dutch State Lotteries. He received a private education in Paris, and in 1866, during the war between Prussia and Austria, began his career as a publicist. During the war of 1870 he was correspondent to American papers. After the war he settled in London, and during ten years published "Amours of Great Men," "An Everyday Heroine," an adaptation, &c. In 1882 he became the *Globe* correspondent in Paris, which he left in 1887, finally settling in London, and only leaving it on special journalistic missions to France, Germany, &c. The book with which he achieved fame was his "Englishman in Paris," published in 1892, and followed in 1894 by "My Paris Note-Book." Both these works display a penetrating knowledge of French affairs under the Second Empire and in the early days of the Republic. Among his other works we may mention: "The Story of the Coup d'Etat," 1884; "Behind the Scenes of the Comédie Française," 1889 (both translations); "Undercurrents of the Second Empire," 1896, &c. He ranks with the late Philip Hamerton and with Miss Betham-Edwards and Mr. J. E. C. Bodley as one of those who speak with especial authority on French men, manners, and affairs. Address: 47A Manchester Street, Manchester Square, W.

VAN DYKE, Henry, D.D., LL.D., American author and preacher, was born at Germantown, Pa., Nov. 10, 1852. He graduated at the Brooklyn Polytechnic Institute in 1869, Princeton College in 1873, Princeton Theological Seminary in 1877, and studied for two years at the University of Berlin. In 1879 he was called to the United Congregational Church of Newport, R.I., and in 1882 to the Brick Presbyterian Church, one of the historic churches of New York City. In 1889 he

was appointed Preacher to the University at Harvard, and in 1893 elected to deliver the Lyman Beecher Lectures on Preaching at Yale. He has been a contributor to the *North American Review*, *Forum*, *Century*, *Harper's*, and *Scribner's*, and has taken active part in religious work among the colleges. His published works are: "The Reality of Religion," 1884; "The Story of the Psalms," 1887; "The National Sin of Literary Piracy," 1888; "The Poetry of Tennyson," 1889; "God and Little Children," 1890; "Straight Sermons," 1893; "The Christ-Child in Art; a Study of Interpretation," 1893. All of these, with two exceptions, have been republished in London, and had repeated editions.

VAN HORNE, Sir William Cornelius, K.C.M.G. (hon.) President of Canadian Pacific Railway, was born near Joliet, Illinois, Feb. 3, 1843. By the death of his father in his fourteenth year he was forced to seek employment to provide for the wants of the other members of the family, and began work about the railroads of his native place, and rose as his merits became known. In 1872 he had become General Superintendent of the St. Louis, Kansas City, and Northern Railway, and in 1878 had received an appointment to a similar position with the Chicago and Altan Railway. Two years later he was General Superintendent of the Chicago, Milwaukee, and St. Paul Railway, at that time the most extensive railway in America, with more than 5000 miles of track, but in 1881 he relinquished this place to become General Manager of the Canadian Pacific Railway. He became Vice-President of the company in 1884 and President in September 1888, and is connected with various other railroad and telegraph enterprises. He is also a Governor of McGill University; of the Royal Victoria Hospital; Vice-President of the Art Association of Montreal, &c. In May 1894 he was made an honorary K.C.M.G. by her Majesty in recognition of his distinguished public services.

VAPEREAU, Louis Gustav, author, born at Orleans, April 4, 1819, studied at the seminary and college of his native city, and in 1838 carried off, at a competition between all the colleges of France, the prize for Philosophy, established by M. de Salvandy. Admitted into the Normal School, he applied himself to various studies, with a special view to teaching philosophy. On quitting that establishment he remained a year in Paris, and in 1842 became Private Secretary to M. Victor Cousin, whom he assisted in his "Pensées de Pascal." He presided over a class on philosophy at the College of Tours

in 1843, and defended philosophy, violently attacked, in a treatise entitled "Du Caractère Libéral, Moral, et Religieux de la Philosophie Moderne," published in 1844. Though his course of lectures was frequently denounced, he retained his professorial chair for ten years, and, in addition, presided over the German course at the same college for five years, and began to study law. In consequence of the restrictions with which the teaching of philosophy was fettered, in 1852 M. Vapereau repaired to Paris, completed his law studies, and became "avocat" in 1854. About that time Messrs. Hachette entrusted to him the direction of the "Dictionnaire des Contemporains," which occupied his whole attention for four years, the first edition appearing in 1858. M. Vapereau continued to labour at this great undertaking, and the "Supplément" was published in 1859; a new edition of the work, revised and considerably augmented, in 1861, the "Supplément" to the new edition in 1863; the third edition, in a great measure re-written, in 1865; the fourth edition in 1870; the fifth edition in 1880, with a "Supplément" in 1886; and the sixth edition in 1891-93. Since 1859 M. Vapereau has issued yearly "L'Année Littéraire et Dramatique," an annual review of the principal productions of French literature, and the tenth volume contains a general table of the ten previous years. M. Vapereau subsequently brought out another important work, a "Dictionnaire Universel des Littératures." He was nominated Prefect of the Cantal by the Government of the National Defence in September 1870. He was Prefect of the department of Tarn-et-Garonne from March 26, 1871, till March 31, 1873. He returned to the University as Inspector-General of Public Instruction (primary education), Jan. 23, 1877, and he was decorated with the Legion of Honour, Feb. 7, 1878. He retired from his Inspector-Generalship in 1888, when that office was abolished, and was given the title of Honorary Inspector-General. In a preface, dated November 1891, to the last edition of his noble "Dictionary of Contemporaries" he announces his intention of handing over his editorial work to others, as he desires to devote the remainder of his life to more personal literary studies. However, on June 1, 1895, he published a supplement to the sixth edition, including five hundred new biographies, and bringing it fully up to date. Since then, however, much has happened among the mutable Gauls, and the world would be grateful if the veteran biographer could issue a seventh edition of his world-renowned work. Paris address: 10 Boulevard St. Michel.

VARDY, The Rev. Albert Richard, Headmaster of King Edward's School, Birmingham, was born at Warminster on Aug. 13, 1841, and is the eldest son of the late Richard Elliott Vardy. He was educated at the City of London School, and at Trinity College, Cambridge, of which he was a Fellow from 1866 to 1872. His academic career was brilliant. He was Senior Optime, obtained a first class in the Classical Tripos, was second Chancellor's Classical Medallist in 1864, and Carus Greek Testament Prizeman. He was first Assistant Classical Master at the City of London School from 1864 to 1872, when he was appointed to his present post. He was ordained Priest in 1867, was Curate of St. Andrew Undershaft from 1868 to 1872, and was appointed Examining Chaplain to the Bishop of Worcester in 1896. Addresses: King Edward's School, Birmingham; and Athenæum.

VASILI, Count Paul. See ADAM, MME. EDMOND.

VAUGHAN, His Eminence Herbert, Cardinal, D.D., late Roman Catholic Bishop of Salford, and now Roman Catholic Archbishop of Westminster, eldest son of the late Lieut.-Colonel Vaughan of Courtfield, Herefordshire, and his wife Eliza Rous, born at Gloucester, April 15, 1832, received his education at Stonyhurst College, Lancashire, on the Continent, and in Rome, where he entered the Accademia dei nobili Ecclesiastici. He was ordained a priest at Lucca, Oct. 28, 1854, and, returning to England, joined the Oblates of St. Charles, a congregation of secular priests founded at Bayswater by the late Cardinal Manning. From the Oblates he was sent to St. Edmund's College, near Ware, of which he was Vice-President until 1862. He went in 1863 to America in order to gather funds for founding a Missionary College. In 1869 he founded, and is still President-General of, St. Joseph's Foreign Missionary College, Mill Hill, Middlesex, and towards the close of the year 1871 accompanied to Maryland the first detachment of priests who were sent from that institution on a special mission to the coloured population of the United States. On the death of Bishop Turner he was elected Bishop of Salford, and consecrated in his cathedral by the Cardinal Archbishop of Westminster, Oct. 28, 1872. At Salford he published a series of pastoral letters, and has since identified himself prominently with the crusade against intemperance, with rescue work among children, and the cause of commercial education, in the interests of which he built St. Bede's College. On March 29, 1892, he was elected by the

Pope, and on the recommendation of the Propaganda, to the See of Westminster, left vacant by the death of Cardinal Manning. On May 12 he took possession of his See and received the pallium on August 16. He was summoned to Rome in January 1893 to be created a Cardinal, and was received with great distinction during his stay. Cardinal Vaughan, who has acquired a considerable reputation as a preacher, has published many letters and pamphlets, and is the proprietor of the *Tablet* newspaper and of the *Dublin Review*. A speech of his, in which he dwelt upon the validity of Anglican Orders, led to a long controversy in the *Times* and other papers during the autumn of 1894. In September 1897, on the occasion of the Roman Catholic celebration of the 13th centenary of the landing of St. Augustine and his monks at Ebbsfleet, Cardinal Vaughan delivered an important address at the Granville Hall, Ramsgate, which may be regarded as a Roman reply to the Lambeth Conference of that year. In this address the Cardinal reviewed the growth of Christianity in England and the present position of Anglicans and Romans in this country. He adverted especially to the proposition agreed to by the then recent Lambeth Conference, emphasizing "the Divine purpose of visible unity amongst Christians as a fact of revelation." Prior Vaughan, the Cardinal's brother, died in September 1896. Address: Archbishop's House, Westminster.

VAUGHAN, Sir James, B.A., is the son of the late Richard Vaughan, of Cardiff, and was born on March 14, 1814. He was educated privately, and at Worcester College, Oxford, where he graduated B.A. He was called to the Bar at the Middle Temple in 1839, acted as chief of the Commission of Inquiry into Corrupt Practices at Gloucester in 1857, and at Berwick-on-Tweed in 1859. He was appointed Police Magistrate at Bow Street Court in 1864, and served with distinction until his retirement in July 1899. During his long tenure of office he has presided over many *causes célèbres*, among them being the De Tourville extradition case, the Trafalgar Square riots, and the Liberator case. He married, in 1854, Joanna, daughter of the late R. Smethurst, of Chorley. Address: 124 Gloucester Terrace, Hyde Park, W.

VELEY, Victor Herbert, M.A. Oxon., F.R.S., was born at Chelmsford on Feb. 10, 1856, and is the son of Frederick Thomas and Louisa Veley, descended from the family of Develay of Yverdon, Switzerland. He was educated at Rugby School, where he was Natural Science Exhibitioner

in 1875, and at University College, Oxford. Here he obtained a first class in the Honour School of Natural Science (1878), and was Public Examiner in the same school in 1887-90. He was appointed Demonstrator and Lecturer at the University Museum, Oxford, in 1887, Lecturer of Queen's College in 1891, and Tutor to the Delegacy of the Non-Collegiate Students in 1890. He has published numerous memoirs on theoretical, physical, and applied chemistry in the *Philosophical Transactions and Proceedings* of the Royal Society, the *Journals of the Chemical Society* and of the *Society of Chemical Industry*, and the *Philosophical Magazine*. The most important are the following: "The Rate of Decomposition of Ammonium Nitrate," *Jour. Chem. Soc.*, 1883; "Some Sulphur Compounds of Calcium," *Jour. Chem. Soc.*, 1885; "The Lime Process for Purification of Coal Gas," *Jour. Soc. Chem. Indust.*, 1885; "The Conditions of Evolution of Gases from Homogeneous Liquids," *Phil. Trans.*, 1888; "The Conditions of Chemical Change between Nitric Acid and Metals," *Phil. Trans.*, 1891; "The Variations of Electromotive Force of Cells consisting of certain Metals and Nitric Acid" (with G. J. Burch), *Phil. Trans.*, 1891; "The Inertness of Quicklime," *Jour. Chem. Soc.*, 1893-94; and "The Phases and Conditions of Chemical Change," *Phil. Mag.*, 1894. He is joint-translator of the "Handbook of the Polariscopes." Address: 22 Norham Road, Oxford.

VENN, John, Sc.D., F.R.S., is the eldest son of the late Rev. Henry Venn, Prebendary of St. Paul's, who was for many years Hon. Sec. of the Church Missionary Society. He was born at Hull, Aug. 4, 1834, and was educated at the Grammar School, Highgate, the Islington Proprietary School, and afterwards at Caius College, Cambridge, where he graduated in 1857, and obtained a Fellowship in the same year. He took orders in 1858, and for some years held curacies at Cheshunt, Herts, and Mortlake, Surrey; but later (in 1883) he abandoned the clerical calling. Since 1862 he has resided mostly at Cambridge, being Lecturer in Moral Sciences at Caius College, and frequently an Examiner in the same subjects in the university. In 1869 he held the office of Hulsean Lecturer. In 1883 he was elected a Fellow of the Royal Society. He is the author of "Logic of Chance," 1866, 1876, 1888; "Symbolic Logic," 1880 (2nd edit., 1894); "Empirical Logic," 1889; and various papers in scientific and other periodicals. In 1891 he edited for the Cambridge Antiquarian Society the Register of Baptisms, &c., in St. Michael's Parish Church, Cambridge, between the years

1588-1837. He married, June 21, 1867, Susanna Carnegie, eldest daughter of the Rev. C. W. Edmonstone, M.A. Address: 3 St. Peter's Terrace, Cambridge.

VENOSTA, Marquis Visconti, Italian Minister of Foreign Affairs, was born in January 1829, and having adopted a diplomatic career early in life, he was Minister for Foreign Affairs when the Italian troops entered Rome in 1870, and Italian unity was completed. In 1876 he fell, and during the premierships of Depretis, Cairoli, and Crispi he was entirely forgotten. However, in 1894 Signor Giolitti (*q.v.*) appointed him Italian arbitrator in the Behring Sea question. In 1896, after Caetani Sermoneta had resigned in consequence of the indiscretions in the Green Book on Abyssinia, Venosta returned to the Foreign Office, exactly twenty years after he had left it. He resigned in May 1898 owing to differences of opinion with Signor Zanardelli. On the new Cabinet of General de Pelloux being formed in May 1899 he returned to his old post, succeeding Admiral Canevaro. His long experience of foreign affairs and his great moderation combine to give him greater prestige than that possessed by any other Foreign Minister in Italy.

VERBEEK, Reinier Dirk M., mining engineer, was born at Maarsen, Holland, Sept. 5, 1841, studied at the University of Liège, Belgium, and at the Mining Academies of Clausthal, Hanover, and Freiberg, Saxony, whence he received his degree of Mining Engineer in 1864. He is the author of several papers on the mining laws of the Netherlands, and on the mineral wealth of the Indian Archipelago, and was the first to draw public attention to the occurrence of gold in workable quantities in the Isles of Sumatra and Borneo. For many years he has resided in the Dutch East Indies, and in 1875 became Superintendent of the Geological Survey of Sumatra, and as such has published important maps and memoirs. When the Krakatau eruption occurred he was naturally selected by the Government as head of the commission appointed to examine and report upon the geological and other phenomena of that great convulsion; the report, and splendid atlases of maps, sections, and drawings which he subsequently issued, are permanent proofs of his energy and ability. M. Verbeek is Ingénieur-en-chef des Mines, and Chevalier du Lion Néerlandais.

VERDI, Giuseppe, composer, springs from very humble parentage, his father being a peasant in the little hamlet of Roncole, near Busseto, where Giuseppe

was born, Oct. 9, 1814. He early showed a passionate love for music, and his first musical education was obtained from one Baistrocchi, organist of the little church at Roncole, a position to which Verdi himself succeeded when only ten years old. An enthusiastic musical amateur, M. Barezzi, recognising the boy's genius, gave Verdi an appointment in his business house, and offered him every opportunity of following his natural bent. Verdi studied in Busseto under Ferdinando Provesi, the cathedral organist, until he was sixteen, when he gained a Scholarship at Milan, where he studied for some time, returning to Busseto in 1833, on the death of Provesi. Verdi was unsuccessful in his candidature for the post of cathedral organist rendered vacant by the decease of Provesi, but he stayed at Busseto for five years, and there published his first opera, "Oberto, Conte di San Bonifacio," which was produced by the impresario, Merelli, in 1840, at La Scala Theatre, Milan. This was followed by the comic opera, "Un Giorno di Regno," "Nabucco," and "I Lombardi," the last of which gained a wonderful popularity and laid the first foundation of his fame. It is curious to note that Verdi, while at Milan, was refused admittance to the Conservatoire by an old professor (Basil) on the ground that "you have no aptitude for music." His best-known operas are "Nabucodonosor," "Ernani" (founded on Victor Hugo's tragedy, and produced in 1884 at the Fenice Theatre, Venice); the "Due Foscari," "Attila," "Macbeth," the "Masnadieri" (founded on the "Robbers" of Schiller), "Louisa Miller," "Rigoletto," the "Trovatore," "La Traviata," "Un Ballo in Maschera" (performed in London in 1861), and "Don Carlos" (performed at the Royal Italian Opera, Covent Garden, in 1867). The "Masnadieri," written for her Majesty's Theatre, and produced in 1847, with Jenny Lind as heroine, proved a failure in London, though it has since been successful in Italy. The "Trovatore" and "La Traviata" have had great success, not only in Italy, but in Germany, France, and England. Signor Verdi's more recent operas are "Giovanno d'Arco," in 1868; "La Forza del Destino," in 1869; and "Aida," performed at the Scala, Milan, in 1872. His celebrated "Requiem Mass," composed in honour of his great countryman Manzoni, was first performed in the church of San Marco at Milan, May 23, 1874. He was elected a member of the Italian Parliament in 1861, and in 1871 he went to Florence in order to assume the post offered him by the Italian Minister of Public Instruction, for the improvement and reorganisation of the Italian Musical Institute. M. Verdi, who is a member of

the Legion of Honour, was elected corresponding member of the Académie des Beaux-Arts, Dec. 10, 1859; was made Grand Cross of the Russian Order of St. Stanislaus in 1862; Foreign Associate of the Académie des Beaux-Arts, June 15, 1864; and Grand Officer of the Order of the Crown of Italy in 1872, in which year the Viceroy of Egypt conferred on him the Order of Osmanieh. King Victor Emmanuel, by decree dated Nov. 22, 1874, created Signor Verdi an Italian Senator. In May 1875 he was nominated a Commander of the Legion of Honour, and the Italian Minister at Paris was charged to present him with the insignia of the order, accompanied by a flattering letter from the Duc Decazes. In the same year he was decorated with the Cross of Commander and Star of the Austrian Order of Franz-Joseph. Signor Verdi completed, in 1878, a new opera in five acts, entitled "Montezuma," which was given for the first time at La Scala, Milan. This was followed in 1886 by "Otello," which was reproduced at the Lyceum in London, in 1889. In 1893, "Falstaff," a new opera, was produced at Milan, and received with great enthusiasm. At its reproduction in Paris in 1894 Verdi himself was present. On his return from Paris to his native country, in April 1880, he received the Order of the Crown of Italy. Verdi is carrying to completion a great scheme of his own for providing a Home of Rest for old Italian artists of all classes. The building, which is situated outside the Gate Magenta, at Milan, was designed by Signor Camille Boilo, a brother of Arigo, the librettist of "Otello" and "Falstaff," and is estimated to cost £16,000. The Home will provide shelter for 100 inmates—60 men and 40 women—but the present arrangement is that the *Casa di Riposo*, as it is to be named, will not be opened until Verdi's death, although the Home will be ready for occupation shortly. The civilised world hopes that the master will long be spared to it, and his recovery from a most serious illness in 1897 gives renewed hope. In May 1898 Maestro Verdi received from the Philharmonic Choral Society of Berlin a magnificent palette of flowers, decorated with ribbons of the German and Italian colours. The affectionate inscription ran: "To the ever-young and incomparably great master, in sign of admiration and homage—The Philharmonic Choral Society of Berlin, May 1898." Address: Genoa.

VERESTCHAGIN, Vassili, Russian painter, was born at Tcherepovets, in Novgorod, Oct. 26, 1842. He entered the navy in 1859, but soon gave it up to enter the Academy of Fine Arts at St. Petersburg. In 1831 he obtained a silver medal with

his "Lovers of Penelope slain by Ulysses," which he afterwards destroyed as being too classical. He then went to Paris and studied under Gérôme, and in 1866 exhibited "Douchobortski singing the Psalms" at the Salon. He took part in General Kauffmann's Central Asian Expedition in 1867, went to India in 1874, and fought and sketched throughout the Russo-Turkish war of 1878. His pictures of the Turkistan campaign were acquired by the Moscow Museum, and in 1880 he exhibited a large number of his war pictures in Paris, and seven years later in London. In 1885 his exceedingly realistic pictures from the New Testament were removed from the Kunstlerhaus in Vienna by order of the Archbishop. He published his "Autobiographical Sketches" in 1887. His great aim in his work is to paint war as he actually sees it. He revisited London in 1898, when he was exhibiting a series of pictures on Napoleon's Russian campaign of 1812.

VERNE, Jules, a popular French writer, born at Nantes, Feb. 8, 1828, was educated in his native town, and afterwards studied law in Paris. Turning his attention to dramatic literature, he wrote a comedy in verse entitled "Les Pailles Rompues," which was performed at the Gymnase in 1850. This was followed by "Onze Jours de Siège," a three-act comedy, brought out at the Vaudeville, and "L'Oncle d'Amérique," and by several comic operas. But his fame rests chiefly on his scientific romances, the first of which appeared in 1863, under the title of "Cinq Semaines en Ballon." Its success led the author to produce many similar works, now numbering nearly sixty, of which the following have been translated into English and other languages, even into Japanese and Arabic: "Five Weeks in a Balloon: a Voyage of Exploration and Discovery in Central Africa," 1870 (2nd edit., 1874); "A Journey to the Centre of the Earth," 1872; "Twenty Thousand Leagues under the Sea," 1873; "Meridiano: the Adventures of Three Englishmen and Three Russians in South Africa," 1873; "From the Earth to the Moon Direct in Ninety-Seven Hours Twenty Minutes; and a Trip Round It," 1873; "The Fur Country; or, Seventy Degrees North Latitude," 1874; "Around the World in Eighty Days," 1874; "A Floating City, and the Blockade Runners," "The English at the North Pole," "Dr. Ox's Experiment," 1874; "Adventures of Captain Hatteras," "The Mysterious Island," "The Survivors of the *Chancellor*," 1875; "Michael Strogoff, the Courier of the Czar," 1876; "The Child of the Cavern," "Hector Servadac; or, the

Career of a Comet," 1877; "Dick Sands, the Boy Captain," 1878; "Le Rayon Vert," 1882; "Kéraban-le-têtu," 1883; "L'Etoile du Sud," "Le Pays des Diamants," 1884; "L'Archipel en Feu," "Le Billet de Loterie," "Robur le Conquérant," "Le Chemin de France," "Deux Ans de Vacances," 1888; "Famille sans Nom," 1889; "Mathias Sandorf," "Nord contre Sud," "César Cascabel," "The Purchase of the North Pole," 1890; "Claudius Bombarnac," and "Le Château des Carpathas," 1892; "Adventures of Master Antifer," 1894; "For the Flag," 1898. He lives at Amiens.

VERNON-HARCOURT, Augustus George, F.R.S., D.C.L., LL.D., Lee's Reader in Chemistry at Christ Church, Oxford, was born in London on Dec. 24, 1834, and is the eldest son of Admiral Frederick E. Vernon-Harcourt and Marcia, sister of the 1st Lord Tollemache, and daughter of Admiral Tollemache. His youngest brother is Professor of Civil Engineering at University College, Gower Street. He was educated at Harrow, and Balliol College, Oxford, where he obtained a first class in Natural Science in 1858, and a Senior Studentship at Christ Church in 1859. He was Science Tutor at Christ Church from 1871 to 1882, was appointed Lee's Reader in Chemistry in 1869, is Vice-President of the Chemical Society, and Gas Referee for the Metropolis. He has published, in conjunction with H. G. Madan, of Queen's, "Exercises in Practical Chemistry." Addresses: Cowley Grange, Oxford, &c.; and Athenæum.

VERTUE, The Right Rev. John, D.D., F.S.A., Roman Catholic Bishop of Portsmouth, was born in London, April 28, 1826. He was ordained Priest in Rome by Cardinal Patrizi in 1851, having previously studied at St. Edmund's College, Hertfordshire, and the English College, Rome. Poplar was the scene of his first missionary labours, and in 1853 he went with the Apostolic Nuncio (afterwards Cardinal) Bedini, as his Secretary, to the United States and Canada. On his return, in acknowledgment of his services, he was made Chamberlain of Honour to Pope Pius IX., April 18, 1854. Monsignor Vertue went to Aldershot Camp on temporary duty in 1855; but he was appointed Chaplain to the Forces, June 24, 1855, a post which he held for twenty-seven years. He was mentioned in General Order in 1864 for "distinguished and meritorious conduct during the epidemic of yellow fever in Bermuda," and was promoted from the fourth to the third class of army chaplains, Feb. 2, 1865, for the services he had rendered. Monsignor Vertue was six years stationed

at Malta. He was re-appointed Chamberlain of Honour to Pope Leo XIII., April 5, 1878, was appointed the first Bishop of Portsmouth by Apostolic brief of June 13, 1882, and was consecrated by Cardinal Manning, July 25. He has edited a "Prayer Book for the Army," 1859; and a revised edition of Bishop Challoner's "Meditations," 1880; and has contributed various articles to the *Dublin Review* and the *Month*. He represented the English hierarchy at the Centennial celebration at Baltimore, United States, in 1889. He is a Fellow of the Society of Antiquaries, a member of the Archæological Institute and of other learned societies. Address: Portsmouth.

VEZIN, Hermann, actor, was born on March 2, 1829, in Philadelphia, U.S., of German parents, his father being Charles Henri Vezin, a distinguished merchant of that city. He was intended for the legal profession, and took the degrees of B.A. and M.A. at the University of Pennsylvania. Having a passion for the stage, he came to England, and obtained, through the kindness of Mr. Charles Kean, an engagement in the Theatre Royal, York. He made his London début at the Princess's Theatre under Mr. Charles Kean's management. Having visited America professionally in 1857, he returned to England a year later, and after a few provincial engagements, appeared at the Surrey Theatre, London (1859), as Hamlet, Macbeth, Othello, Shylock, King John, and Louis XI. During Mr. Phelps's management of Sadler's Wells (1860) Mr. Vezin appeared as Orlando, Mark Antony, Romeo, and Cassio. In 1864 they produced Westland Marston's comedy of "Donna Diana," at the Princess's Theatre, London. In 1870 he alternated Othello and Iago with Mr. Phelps. Later he produced Mr. W. G. Wills's romantic drama "Hinko," at the Queen's Theatre. In 1873 Mr. Vezin played with Phelps, Toole, and Mathews, at the Gaiety Theatre. At Drury Lane, 1876, he played Macbeth for the benefit of the Philadelphia Centennial. On the production at the Crystal Palace, 1876, of Sophocles's "Œdipus at Colonus," the title part was assigned to Mr. Vezin. On Sept. 11, 1876, he made his first appearance at the Haymarket, in Mr. W. S. Gilbert's drama of "Dan'l Druce." After acting Dan'l Druce 106 times, he created the character of De Taldé in an English adaptation of "The Danicheffs," produced at the St. James's Theatre, 1877. In 1878 he first played, at the Court Theatre, Dr. Primrose, in Mr. W. G. Wills's drama of "Olivia," founded on "The Vicar of Wakefield." Since that time Mr. Vezin has constantly acted both in London and the

provinces. Address: 10 Lancaster Place, Strand, W.C.

VIARDOT - GARCIA, Madame Michelle Pauline, vocalist, daughter of the great tenor, Emmanuel Garcia, and sister of the lamented Madame Malibran, born in Paris, July 18, 1821, at four years of age spoke four languages, and at seven was able to play the pianoforte accompaniments for the pupils to whom her father gave lessons. After sharing the family migrations, first to England, and afterwards to the United States, she returned to Europe in 1828, and her education was continued at Brussels. In consequence of her manual facility on the piano, she became one of Liszt's most accomplished pupils. Her father died in 1832 before her voice was formed, and her sister being constantly absent on professional tours, her studies, which included various branches of the arts, drawing and painting, as well as music and singing, were directed by her own tastes and the counsels of her mother. She made her first appearance in London at the Opera-House in 1839, in the character of Desdemona. Her voice, like that of her sister, combined the twofold register of soprano and contralto, embracing a compass of three octaves. At the close of the season she joined the Italian operatic company, then acting at the Odéon, in Paris, and was equally successful. In 1841 she reappeared in England, singing with Mario in Cimarosa's opera "Gli Orazi e i Curiazi." Her next engagement was at Vienna; and Rubini, on forming an operatic corps for St. Petersburg, selected her for his prima donna. She afterwards appeared at Berlin, and when Jenny Lind quitted the German Opera, Madame Viardot-Garcia proved herself an able successor in the répertoire, which she greatly extended. Her name is associated with the first performances of "Les Huguenots," in which she took the part of Valentine, and of "Le Prophète," in which she performed the part of Fides, an exquisite impersonation. Madame Viardot is also celebrated for her singing of Spanish songs. She retired from the stage in 1862, and devotes herself to composition. In April 1840 she was married to M. Louis Viardot, Director of the Paris Italian Opera (he died in May 1883).

VIAUD, Louis Marie Julien, known as "Pierre Loti," French naval officer and man of letters, was born at Rochefort on Jan. 14, 1850, and is descended from an old noble Huguenot family long settled in that district. He went to school in his native town, entered the navy in 1867, and went several voyages in the Pacific.

He was promoted to the rank of midshipman in June 1873, and to that of lieutenant in February 1881. In 1899 he was raised to the rank of Captain. He served through the Tonkin campaign with distinction, but was retired from active service in October 1883, owing to the publication of a series of letters descriptive of the cruelties practised by the French soldiers at Hué, which he was so imprudent as to send to the *Figaro*. After this he served on board the *Atalanta*, and in the early days of February 1884 was allowed to resume his duties. He was decorated with the Legion of Honour in July 1887, and, under his pseudonym of "Pierre Loti," was presented for election as a member of the French Academy in opposition to Émile Zola. At the time of the election he was serving on board the *Formidable* off Algiers, and was thus freed from the necessity of paying the many official visits which usually fall to the lot of candidates for election to the French Academy. He was elected by 18 votes out of 35 on May 21, 1891, and succeeded the celebrated romancist, Octave Feuillet. His speech on election contained an attack upon the realism of Zola. As an author he is indeed the very antithesis of that writer, and his books, with their dreamy and melancholy beauty of style and subject, mark a revival of the spirit of romanticism and mysticism in French literature. His works, which have run through many editions, are: "Aziyadé" (Stamboul, 1876-77), 1879; "Rarahu," a Polynesian idyll, 1880, reprinted under the title of "Mariage de Loti," in 1889; "Le Roman d'un Spahi," 1881; "Fleurs d'Ennui," a volume containing some of his finest work, such as "Pasquala Ivanovitch," "Mon Frère Yves," of which there is an English translation, 1883; "Les Trois Dames de la Kasbah," 1884; "Pêcheur d'Islande," also translated into English, and into German by the author's friend, Carmen Sylva, and awarded the Prix Vitet by the Academy, 1886; "Madame Chrysanthème," 1887; "Propos d'Exil," 1887; "Japonneries d'Automne," 1889; "Au Maroc," 1890; "Le Roman d'un Enfant," an autobiography, 1890; "Le Livre de la Pitié et de la Mort," 1891; "Fantôme d'Orient," a sequel to "Aziyadé," 1892; "Matelot," 1893; "Le Désert," 1894; "La Galilée," 1895; and "Ramuntcho," a Basque story, 1897. His works are mostly in the form of diaries, and are undoubtedly descriptive of many personal experiences. Address: Rue St. Pierre, Rochefort.

VICARS, Sir Arthur Edward, was born at Leamington in 1864, and is the youngest son of Colonel William Henry Vicars, of the 61st Regiment, by Jane,

third daughter of R. Gun-Cunninghame, Esq., D.L., of Mount Kennedy, co. Wicklow (widow of P. K. Mahony, Esq., of Kilmorna, co. Kerry). He was appointed Ulster King of Arms and Principal Herald of all Ireland in 1893, in succession to the late Sir Bernard Burke. In 1896 he received the honour of knighthood. He is Registrar and Knight Attendant of the Order of St. Patrick; a Government Trustee of the National Library of Ireland; Fellow of the Society of Antiquaries of London; President since 1896 of the Ex Libris Society of London; Hon. Secretary of the Kildare Archaeological Society. He has published: "The Antiseptic Vaults of S. Michan's," Dublin, 8vo, 1888; "Index to the Pre-rogative Wills of Ireland," 8vo, 1897; "Index to Births, Deaths, and Marriages in Anthologia Hibernica," supplement to Farrar's "Index to Marriages" in the *Hibernian Magazine*, 4to, 1898. He has contributed papers to several archaeological and other serials. Addresses: The Castle, Dublin; 44 Wellington Road, Dublin; and Kildare Street Club, Dublin.

VICTORIA ALEXANDRINA, Queen of Great Britain and Ireland, and Empress of India, only child of the late Duke of Kent and of the Princess Louisa-Victoria of Saxe-Coburg (relict of the Hereditary Prince of Leiningen, and sister of Leopold, Prince of Saxe-Coburg, afterwards King of the Belgians), was born at Kensington Palace, May 24, 1819; her parents, who had been for some time residing abroad, having hastened to England in order that their child might "be born a Briton." The Duke of Kent died Jan. 23, 1820, and the general education of the young Princess was directed, under her mother's care, by the Duchess of Northumberland, wife of the 3rd Duke. Until within a few weeks of her elevation to the throne her life was spent in comparative retirement, varied by tours through different parts of the United Kingdom. Queen Victoria succeeded her uncle, William IV., June 20, 1837, as Victoria I., and her coronation was celebrated in Westminster Abbey, June 28, 1838. Her Majesty was married Feb. 10, 1840, to his late Royal Highness Prince Albert of Saxe-Coburg-Gotha, by whom her Majesty had issue: 1, H.R.H. Victoria Adelaide Mary Louisa, Princess Royal, born Nov. 21, 1840, married, Jan. 25, 1858, to H.R.H. the Crown Prince Frederick William of Prussia (he died June 15, 1888); 2, H.R.H. Albert Edward, Prince of Wales, born Nov. 9, 1841, married, March 10, 1863, the Princess Alexandra of Denmark; 3, H.R.H. Princess Alice Maud Mary, born April 15, 1843, married, July 1, 1862, to Prince Louis

of Hesse-Darmstadt (H.R.H. died Dec. 14, 1878); 4, H.R.H. Prince Alfred Ernest Albert, born Aug. 6, 1844, created Duke of Edinburgh, May 24, 1866, married, Jan. 23, 1874, the Grand-Duchess Marie Alexandrovna, sister of the late Emperor of Russia; 5, H.R.H. Princess Helena Augusta Victoria, born May 26, 1846, married, July 5, 1866, to Prince Christian of Schleswig-Holstein; 6, H.R.H. Princess Louise Caroline Alberta, born March 14, 1848, married to the Marquis of Lorne, March 21, 1871; 7, H.R.H. Prince Arthur William Patrick Albert, Duke of Connaught, born May 1, 1850, married, March 17, 1879, the Princess Louise Margaret Alexandra Victoria Agnes, third daughter of Prince Frederick Charles of Prussia; 8, H.R.H. Prince Leopold George Duncan Albert, Duke of Albany, born April 7, 1853, married, April 2, 1882, the Princess Helen Frederica Augusta, daughter of the Prince of Waldeck and Pyrmont (H.R.H. died March 28, 1884); and 9, H.R.H. Princess Beatrice Mary Victoria Feodore, born April 14, 1857, married July 23, 1885, to Prince Henry Maurice of Battenberg. The first domestic grief which her Majesty suffered was the loss of her mother, the Duchess of Kent, after a short illness, March 16, 1861, followed by the sudden death of the Prince Consort, to the great grief of the entire kingdom, Dec. 14 in the same year. Her Majesty's intense sorrow for her irreparable loss, although it has in a great degree disqualified her from appearing in public and at court ceremonials, and has imposed on her the habits of a life of comparative seclusion, has, however, never been allowed by her to interfere with the performance of her important duties as a sovereign. Neither has it checked the exercise of that anxious interest which her Majesty has ever since her accession to the crown steadfastly manifested for the social welfare of her people. It is a source of great pride to her subjects, and must doubtless tend in no small degree to assuage her Majesty's abiding grief, that not only in her own vast dominions, but throughout the civilised world, her Majesty's name is never mentioned save in terms of sympathy, affection, and respect as a Christian woman and as a queen. It would occupy much more space than our limits admit to give even a brief outline of the political events of her Majesty's reign, and we can therefore merely glance at its more prominent features. On succeeding to the throne, her Majesty found the Whig and Conservative parties nearly evenly balanced in the House of Commons. Lord Melbourne and his colleagues continued to hold office until September 1841, when, owing to their increasing unpopularity, arising mainly from a want of

financial ability, or at least of financial success, they were obliged to give place to the late Sir Robert Peel. Although he was pledged to maintain the Corn Laws, he found himself compelled, in 1845, to acquiesce in their repeal, which was carried into effect at his instance in 1846. The effect of this change in Sir Robert Peel's policy caused a disruption in the Conservative party, and led to the accession to power of Lord John Russell, who was succeeded in January 1852 by the Earl of Derby. In the following December the Conservative party, beaten on their own budget, resigned, and gave place to Lord Aberdeen and the Coalition Cabinet, which, in February 1855, was dismissed for having mismanaged the Russian war. It was succeeded by Lord Palmerston's first administration, which was defeated on the Conspiracy to Murder Bill, in March 1858, and Lord Derby held power for the second time, until June 1859, when Lord Palmerston formed his second Cabinet. On his death, October 1865, the Ministry was remodelled, Earl Russell assuming the post of Premier. His Ministry having decided upon introducing a Reform Bill, the duty of conducting it through the House of Commons devolved upon Mr. Gladstone. Having been defeated on an important clause in June 1866, Ministers resigned. Lord Derby formed his third administration, and during the session of 1867 carried a Reform Bill, thereby settling a question which had long been a stumbling-block impeding the progress of legislation. The Conservatives being placed in a minority at the general election of 1868, Mr. Disraeli resigned office, and was succeeded as Prime Minister by Mr. Gladstone. The chief events of Mr. Gladstone's administration were the disestablishment of the Irish Church, the passing of the Irish Land Act and the Elementary Education Act, the abolition of purchase in the army, the negotiation of the Treaty of Washington respecting the Alabama Claims, and the passing of the Ballot Act. At the general election of February 1874 the Conservatives again came into power, and a new administration was formed by Mr. Disraeli, afterwards Lord Beaconsfield. By virtue of the power conferred by an Act of Parliament passed in the previous session, her Majesty was, on Jan. 1, 1877, proclaimed Empress of India, by the Governor-General, at the durbar at Delhi, before an imperial assemblage of all the governors, lieutenant-governors, heads of Government, princes, chiefs, and nobles of India. On the defeat of the Conservatives at the general election of 1880 Mr. Gladstone formed another Liberal administration, which continued in office until June 1885, when it was succeeded

by a Conservative Government under Lord Salisbury. After the general election of November 1885 the Liberals again came into power, and the spring of 1886 was devoted by Mr. Gladstone to the consideration of the Irish question. His Home Rule Bill, however, met with so much opposition that the Government decided to appeal to the country, and the result of the general election of July 1886 was an immense Conservative majority. Lord Salisbury's second Government came into power on Aug. 3, 1886. In April 1882 an attempt on the Queen's life was made at Windsor by one Roderick Maclean, who after trial was ordered to be confined during her Majesty's pleasure. "The Early Days of His Royal Highness the Prince Consort," compiled under the direction of her Majesty, by Lieut.-General the Hon. C. Grey, was published in July 1867, and was followed, in 1869, by "Leaves from the Journal of our Life in the Highlands"; and in 1874 by the first volume of Mr. (now Sir) Theodore Martin's "Life of H.R.H. the Prince Consort," of which the fifth and concluding volume appeared in 1880. In 1885 her Majesty published a second volume, entitled "More Leaves from the Journal of our life in the Highlands." In 1887 her Majesty celebrated the Jubilee of her accession to the throne. A Thanksgiving Service was held in Westminster Abbey, and was attended by her Majesty and all the Royal Family, the Indian Princes, the King of Denmark, the King and Queen of the Belgians, the King of Saxony, the King of the Hellenes, the Crown Prince of Austria, the Crown Prince of Portugal, the Infante Don Antonio of Spain, Prince Ludwig of Baden, the Crown Prince of Greece, the Grand-Duke of Saxe-Weimar, the Queen of Hawaii, with her attendants in cloth of gold, and representatives from every nation upon earth. The service in the Abbey was conducted by his Grace the Archbishop of Canterbury in the presence of 10,000 spectators. Since the Jubilee of 1887 her Majesty has travelled abroad more than formerly, and has generously patronised music and the drama, on many occasions summoning eminent singers and actors to perform before her at Windsor and even at Balmoral. She has paid several visits to Florence or to such places in the south of France as Cimiez, and has made prolonged stays there. In 1892 the Queen addressed a letter to the nation thanking her subjects for the sympathy they had shown her at the time of the Duke of Clarence's death. Lord Salisbury's Government went out of office in 1892, and the Queen summoned Mr. Gladstone to form a Cabinet. In March 1894, on Mr. Gladstone's retire-

ment from office, Lord Rosebery became Premier, and some changes took place in the Ministry. On her return from Florence in 1894 she was present, at Coburg, on April 19, at the marriage of the Grand-Duke of Hesse and Princess Victoria Melita of Coburg, her grand-daughter. She spent some time at Coburg, and did not again reach Windsor till April 28. Later her Majesty met with a most enthusiastic reception in Manchester, where, on May 21, she opened the Ship Canal in person. The Rosebery Administration was of very short duration, and on June 21, 1895, the Government was defeated upon a question of the supply of ammunition to the army. The following day Lord Rosebery placed his resignation in the hands of the Queen, by whom it was accepted. Lord Salisbury was sent for, and duly formed an Administration, his Cabinet, as ultimately constituted, consisting of no less than nineteen members, of whom fifteen were Conservatives, and four Unionists. Mr. Goschen became First Lord of the Admiralty, and Mr. Chamberlain Secretary for the Colonies. One notable event of the dissolution of 1895 was the disappearance of the illustrious Right Hon. W. E. Gladstone from Parliamentary life. During 1895 her Majesty was visited by the King of Portugal, and also by the Shahzada Nasrulla Khan, son of the Ameer of Afghanistan. In January 1896 Prince Henry of Battenberg died, having contracted a fever in Ashanti, where he went as a volunteer with the punitive expedition despatched against King Prempeh. The Queen, who was much attached to the Prince, felt his death very keenly. In April a new Order of Knighthood was instituted. It had long been considered desirable to create some special mark of distinction in order to reward British subjects who had rendered important or personal services to the Sovereign, and the Queen instituted the Royal Victorian Order for that purpose. Its peculiar feature is its division into five classes, the first two alone conferring knighthood upon the recipient. In July the Queen invited to Windsor the Ancient and Honourable Artillery Company of Boston. She held a review of the Company in the Park, and they were permitted to march past fully armed and flying their colours. The gracious manner in which the Queen received them, and the hearty welcome which London accorded them, gave great satisfaction in America. About this time much indignation was aroused in England by the cruel massacre of Armenians which was going on in Asia Minor, with the alleged sanction of the Sultan of Turkey. Many influential people advocated independent action on the part

of this country to put a stop to these horrors, and in the hope of ameliorating the condition of the sufferers, the Queen sent an autograph letter to the Sultan requesting a special effort in respect of the Armenian difficulty. In September 1896 the Czar and Czarina of Russia paid a visit to the Queen at Balmoral, staying a fortnight. Lord Salisbury was summoned and honoured by an audience with the Czar, and many political questions, relating more particularly to Eastern affairs, were discussed. In May 1897 the Queen passed through Sheffield on her way to Balmoral, and after opening the new Town Hall, honoured Messrs. Armstrong's works with a visit, and viewed the rolling of a steel plate intended as armour for a battleship. On June 20 her Majesty completed the sixtieth year of her occupation of the English throne, thus establishing the longest reign of any monarch in the history of England or of modern Europe. It may be said that the whole world participated in the Diamond Jubilee celebrations which were held in honour of the event. The official programme was begun on Saturday, June 20, with a military tattoo at Windsor Castle by the troops of the garrison, and on the same day a route march through London was made by Imperial and Colonial troops. The force was composed of representatives from all the Colonies, and numbered 2500 officers and men. The anniversary of the Queen's accession falling upon a Sunday, the day was recognised throughout the Empire by public thanksgiving services. Her Majesty was at Windsor and attended divine service at St. George's Chapel, the congregation being limited to the Court and those members of the Royal Family staying at Windsor. At St. Paul's Cathedral there was an immense gathering, including the Prince of Wales and every Royal personage in London, foreign Ambassadors, Colonial Premiers, fifty peers, two hundred Queen's Counsel and members of the Bar, and representatives from all the learned and scientific bodies. Services of a special character were held in all the principal places of worship of every denomination in England. On Monday afternoon the Queen held a reception, which was followed by a State banquet. In the House of Lords a congratulatory address was moved by the Marquis of Salisbury and the Earl of Kimberley, and in the House of Commons a similar address was moved by Mr. Balfour and Sir William Harcourt. Amongst the honours announced on that day were eight peerages and fifteen appointments to the Privy Council, including the eleven Colonial Premiers. Many creations and promotions in the various orders of knighthood were made. On

Tuesday, Diamond Jubilee Day, the principal event of the celebration took place. An immense procession was organised, comprising representatives of all the naval and military forces of the Empire. It started from Buckingham Palace, followed by the Queen at 10 A.M. The morning was fine, and dense crowds of spectators lined the whole route, and thanks to the admirable arrangements of the police, the day passed off without any serious accident. The novelty and variety of the uniforms, many of which had never been seen before in London, gave a picturesque charm to the procession. The vociferous cheering all along the line left no doubt as to the loyal sentiments of the people, the greeting of the royal carriages being especially enthusiastic. Her Majesty's carriage was preceded by one containing the royal grandchildren, and this was followed by a conclave of forty Princes on horseback, mostly representatives of foreign Kings and Governors. Just before leaving the Palace the Queen telegraphed to all parts of her dominions the message, "From my heart I thank my beloved people. May God bless them." Upon the arrival of the Royal Procession at Temple Bar, the Lord Mayor, Sir F. Faudel-Phillips, and his deputation, on foot and bareheaded, met the Queen and presented to her the historic sword. Her Majesty touched the hilt, and commanded the Lord Mayor to lead the way into the City. He thereupon mounted his horse and preceded the Queen, bareheaded and holding the sword aloft. The great episode of the procession was the Thanksgiving Service outside St. Paul's Cathedral. An immense concourse was assembled there, including dignitaries of the Church in their robes, and City officials. A short service was held, and the benediction pronounced by the Archbishop of Canterbury; then the whole assembly joined in singing the Old Hundredth. On Wednesday the Queen received the addresses, and afterwards the Members of both Houses of Parliament at Buckingham Palace. It was remarked at the time that the restrained simplicity of the Parliamentary procession, headed by the Speaker in his ancient coach, did honour to the best traditions of English Parliamentarism. Thursday was marked at Windsor by the reception of the Lords of the Admiralty and of the Admirals of the foreign warships lying at Spithead. In the evening a carnival procession was held, and the Castle illuminated. In London interest chiefly centred in the Jubilee dinners given in fifty-six different districts to over 300,000 people. The scheme had been promoted at the suggestion of the Princess of Wales. Among the subscribers were Sir Thomas Lipton, who

gave £25,000, and the Australian Colonies, which sent 20,000 carcasses of mutton. Friday was a day of social royal gatherings. The naval review, which took place on Saturday, June 26, as an historical event was the most striking and important of the national celebrations in connection with the Diamond Jubilee. Between Portsmouth and the Isle of Wight was moored the most magnificent and efficient fleet that has ever been got together. The fleet was moored in five lines, each line extending nearly five miles, and with regard to the ships assembled it is important to point out that no single vessel had been recalled from a foreign station to swell the numbers at Spithead. The Prince of Wales, representing the Queen, at 2 P.M. began a procession between the lines, and following him in various vessels were Indian Princes, Colonial Premiers, foreign Ambassadors, and Members of both Houses of Parliament. As the Prince passed each ship a royal salute was fired, the whole fleet cheering lustily when the royal yacht anchored. The illumination of the fleet at night was a perfectly unique sight. At a given signal the whole fleet instantaneously burst into light, every ship being illuminated with lines of incandescent lamps, tracing out the hulls, barbettes, bridges, funnels, and masts. Just before midnight the Prince again passed down the lines, and again received a royal salute. The firing of the guns, combined with the illumination, made an exceedingly grand spectacle. The Queen afterwards expressed to Admiral Sir Nowell Salmon, *G.C.*, the Commander-in-Chief, her entire satisfaction with the management of the review. The number of vessels of all kinds was 150, manned by nearly 40,000 officers and men, and representing in money value a sum of £38,000,000 sterling. Not only our own countrymen, but foreigners of all nations were present, and expressed their admiration in no measured terms, and, taken as an exhibition of British naval power, the review made a deep impression upon the mind of Europe. In conclusion it may be mentioned that her Majesty has outlived all those members of the House of Lords who sat there at her accession, and all the members of her first House of Commons. She has seen six Archbishops of Canterbury, the same number at York, five Bishops of London, and every Episcopal See vacated at least twice. Eleven Lord Chancellors have received the Great Seal at her hands. Ten Prime Ministers and six Speakers of the House of Commons have taken office during her reign, and she has survived every member of her first Privy Council. To find in the closing years of her long reign

her people stronger, her Empire wider, and her own person more beloved than ever, is a happier fate than has befallen any of her predecessors.

VILERS, Charles Marie Le Myre de, was born in 1833 of a good Norman family. He began his career in the navy at the age of sixteen, and when but twenty-six received the Cross of the Legion of Honour. He subsequently entered the Civil Service, acting as Sous-Préfet at Joigny and Bergerac, and was promoted in 1877 to the office of Directeur des Affaires Civiles et Financières in Algeria. For his gallantry in the siege of Paris, on the special recommendation of Admiral Sassié, he obtained the rosette of the Legion of Honour. In the early part of 1879, the Cabinet of M. Waddington determined to appoint a Civil Governor to Cochinchina, and the choice falling on M. de Vilers, he left for Saigon in June of that year, being entrusted as Plenipotentiary to the Court of Annam. He made himself extremely popular there, and introduced many most useful reforms, repressing a serious insurrection and causing to be constructed the first railway in the colony. In 1882 he became embroiled with the chief of the Naval Department with respect to the appointment of an officer, and was recalled to France, where he lived quietly until 1885, when M. de Freycinet was desirous of bringing the war with Madagascar to an end, and concluded a treaty with that country which was duly ratified by the French Parliament, but would need most careful and delicate handling to carry out its clauses. In the spring of 1888 M. de Vilers set out for Antananarivo as Minister Plenipotentiary, being fully aware of the arduous nature of his task. The Malagasy Prime Minister, a clever and astute diplomatist, soon found he had a stubborn and expert antagonist to deal with, and, as the terms of the treaty had been left somewhat vague, the Résident-Général had to assert the rights of his country. The Queen's consort requiring funds to meet the indemnity due to France, had resolved on establishing a National Bank, and entered into communication with an English syndicate for a loan of 30,000,000 francs. The French Envoy disputed the right, and insisted on his applying to the French for the loan. After much discussion the Prime Minister accepted the offer made by the Comptoir d'Escompte at Paris, which advanced 15,000,000 francs at 5 per cent., to be repaid within 25 years by levies on the customs of certain selected seaports. The next question that arose between M. de Vilers and the Malagasy Government was on

account of a mission to Europe entrusted by it to an Englishman in the service of the Hovas. This was General Willoughby, whom M. de Vilers desired to see banished from the island, and he had at last the satisfaction of seeing him embarked for Zanzibar. M. de Vilers openly displayed his ill-feeling towards the English element in Antananarivo, especially against the missionaries, who are very influential there. From the first he kept entirely aloof from the British colony, and endeavoured to prevent British enterprise from getting a footing in the island. The Résident-Général refused to recognise the right of the Hova Government to grant the exequatur to representatives of foreign powers, alleging that the French Envoy alone had the right to do so. In 1887 Mr. Haggard, the British Consul, took no notice of this requirement of M. de Vilers, and applied for it to the Hovas' Minister. Many interviews took place, and at last the French Envoy broke off all negotiations, hauled down the tricolour, despatched his escort of marines to Tamatave, and prepared to leave the capital with all his staff. The Prime Minister, fearing the consequences of his leaving, immediately sent for the French Plenipotentiary, and complied with all his demands; but it is nevertheless a question which will always be mooted, and has more than once nearly caused a rupture between the two countries. In 1888 M. de Vilers returned to France, and was promoted to be Grand Officer of the Legion of Honour. He went back to Madagascar, and a few months later resigned his appointment there, and was elected Deputy for Cochinchina in September 1889. In 1893 he was sent to negotiate the convention with Siam, and successfully achieved it. In September 1894 he was once more sent as Envoy to settle affairs in Madagascar, and reached Antananarivo in October. With his accustomed promptitude he had at once started thither on his arrival at Tamatave. On Tuesday, October 9, he, M. Raichot, and the Vicomte d'Anthouard, had an audience of the Queen and the Prime Minister, and opened negotiations and put forward demands which, if acceded to, would have the effect of constituting Madagascar a French dependency.

VILLARI, Pasquale, Italian writer, was born at Naples in 1827, and having studied for the law, in 1847 became involved in revolutionary politics, for which he was imprisoned. He then retired, and engaged in historical research. In 1859 he was appointed Professor of History at the University of Pisa, and in 1862 came to London as the Italian delegate to the

Universal Exhibition. On his return he was promoted to be Professor of History at Florence. In 1884 he became Minister of Public Instruction in the Rudini Cabinet, and has distinguished himself by his reforms in education. His best-known works are: "*Vita di Savonarola*," Florence, 1859, "*Antiche Leggende e Tradizioni che illustrano la Divina Commedia*," 1865; "*Insegnamento della Storia*," 1869; "*Niccolo Machiavelli e suoi Tempi*," 1877. Most of these have been translated into English by his wife, *née* Linda White. His last book has been "*The First Two Centuries of Florentine History*," published in 1895.

VILLIERS, Frederic, was born in London on April 23, 1852. He is the son of Henry Villiers, by Caroline, daughter of Thomas Bradley, and was educated in the north of France at Guines. Afterwards he studied in the Schools of Art at South Kensington, and became a student of the Royal Academy in 1870. In 1876, as special artist and correspondent to the *Graphic*, he went through the Servian campaign with Mr. Archibald Forbes. He was with the armies of the Timok, Drina, Eber, and with Tcherniaeff on the Morava; was decorated with the Order of the Takova, and received a war medal for this campaign, being recalled in November to Constantinople. He then travelled in Roumelia and Bulgaria, examined the Turkish army, re-crossed the Servian lines, and returned with the Turkish troops to Constantinople. Having been ordered to go into Russia, he, in January, started for Kishineff, and saw the mobilisation of the Russian troops in Bessarabia. Mr. Villiers returned to England in February 1887. The day on which war was declared between Turkey and Russia, he started for Bucharest, where he joined Mr. Forbes and was present at all the chief engagements. When the armistice was declared, he was the only English correspondent who accompanied the Russian army to enter Constantinople, and was present at San Stefano when peace was signed and announced to the Russian Guard by the Grand-Duke Nicholas on Sunday, March 3, 1878. Mr. Villiers received the Cross for the passage of the Danube, and the war medal. In June of that year he went to Malta, and was present at the review of the Indian Contingent by the Duke of Cambridge. In November he left England for Afghanistan. He went through the first part of that campaign till the signing of the Treaty of Gandamak; then left for Australia; was at the opening of the Sydney Exhibition; travelled through New Zealand; and returned to England *via* San Francisco and New York, thus

making a journey round the world. Mr. Villiers left England for Egypt immediately on receipt of the news of the massacres at Alexandria, of June 11, 1882; was on H.M.S. *Condor* during the bombardment of that city; and landed with the marines. Afterwards he followed the army to Ismailia; was at the first fight at Tel-el-Mahouta, and was with the Highland Brigade during the night march and subsequent attack on Tel-el-Kebir. Mr. Villiers remained in Cairo till the trial and banishment of Arabi and his confederates. He received for this campaign the order and rosette of the Medjidieh, and the Egyptian war medal from the hands of the Khedive. In May 1883 he was one of the English correspondents invited to attend the coronation of the Czar at Moscow; received silver medal and badge. In February 1884 Mr. Villiers left for Suakim to join General Graham, who had gone to avenge the defeat of General Baker at the first battle of Teb. Mr. Villiers was present at the Arab defeat at the second battle of Teb. On March 13 he was at the battle of Tamai, and subsequently, as special correspondent of the *Daily News*, accompanied Admiral Sir W. Hewett on his mission to the court of King John of Abyssinia. In the autumn of 1884 and the spring of 1885, Mr. Villiers was with the Nile Expedition for the relief of Khartoum, being present at the battle of Abu-Klea and the advance upon Metemmeh. Returning to England, he started almost at once for Ireland, where he witnessed the manoeuvres of the Evolutionary Squadron in Bantry Bay, in June 1885. A period of rest followed, and in November 1885 Mr. Villiers started for Servia, and was with the Servian forces at all the chief encounters with the Bulgarians. An armistice being declared, he started on his homeward journey. At Venice he found a telegram from the proprietors of the *Graphic*, telling him to go to Burma. He accomplished the journey from Venice to Rangoon in one month—arriving just in time to accompany Lord Dufferin on his journey up the Irawaddy to Mandalay. When Lord Dufferin returned to India, Mr. Villiers left for Constantinople, to await the development of events in the Balkan Peninsula. He eventually joined the Greek army, and was in Athens during the blockade of the Greek ports. As a peaceful solution of the Turko-Greek question took place, Mr. Villiers returned to England. Since 1887 he has been lecturing in England, the United States, and Canada, on his varied experiences during the last decade. In August 1889 Mr. Villiers was invited by the Governor-General of Canada to accompany his Excellency on his official tour

through the Dominion, and journeyed from the Atlantic to the Pacific coast over the Canadian Pacific Railroad, visiting all the principal towns and Indian reservations of the Far West. During the Chino-Japanese war he represented a leading illustrated paper in China, and was present at the battles of Ping Yang and the advance on Port Arthur, and taking of that place. He went round the world on a lecturing tour in 1895, and in 1896 represented his paper at the coronation of the Czar. He represented the *Standard* during the war between Turkey and Greece, 1897, and visited Crete. In August 1898 he joined the Sirdar's army on the march to Omdorman, and represented the *Globe* and *Illustrated London News* during the campaign, being present at the battle of Sept. 2, 1898, and at the Gordon memorial service. Club: Arts.

VILLIERS, The Right Hon. Sir Henry de, K.C.M.G., Chief-Justice of Cape Colony, and President of the Legislative Council, was born in 1842, and was called to the Bar at the Inner Temple in 1865. From 1872 to 1874 he was Attorney-General of the Cape, when he was appointed to his present position. In politics he is Conservative, and an opponent to the Imperialist policy of Mr. Rhodes. He is a descendant of a French Huguenot family which settled in South Africa, after the revocation of the Edict of Nantes. His authority on points of Roman-Dutch law is regarded as supreme.

VINCENT, Colonel Sir Charles Edward Howard, K.C.M.G., C.B., J.P., D.L., was born May 31, 1849, at Slinfold, Sussex, being the second son of the late Rev. Sir Frederick Vincent, 11th Bart. He was educated at Westminster School, and the Royal Military College, Sandhurst. He was appointed Ensign in the 23rd Royal Welsh Fusiliers in 1868; retired as Lieutenant in 1873; and was appointed Captain in the Royal Berks Militia in the latter year; but resigned in 1875 to assume the Lieut.-Colonelcy of the Central London Rangers, which commission he resigned in 1878, on his appointment as Director of Criminal Investigations. He entered at the Inner Temple in 1873; was called to the Bar in 1876; went the South-Eastern Circuit; and practised in the Divorce Division; and entered at the Paris Faculté de Droit in 1877. He took over the control of the *Police Gazette* in 1883; and was Chairman of the Metropolitan and City Police Orphanage in 1880-83. Sir Howard Vincent was special correspondent of the *Daily Telegraph* in Berlin in 1871; received the thanks of the War Office and a pecuniary grant from the Treasury for his reports upon

Russia in 1872; gave numerous lectures upon Foreign Armies at the Royal United Service Institution between 1872 and 1878; was Military Commissioner of the *Daily Telegraph* at the outbreak of the Turco-Russian War in 1877; and assembled a Conference upon the requirements of the Volunteer Force, leading to considerable reforms in 1878, and obtained like results by his parliamentary action in 1887. He was appointed, March 4, 1878, to reorganise the Detective System of the Metropolitan Police, with the designation of Director of Criminal Investigations, and with absolute control over the criminal administration. This post he resigned in 1884, in order to enter Parliament, and was appointed Colonel Commandant of the Queen's Westminster Volunteers, which post he still holds, the regiment being one of the strongest in the country, and selected for the private inspection of the German Emperor in 1891. In 1888 he was elected to the Metropolitan Board of Works for St. George's, Hanover Square, and in 1889, and again in 1892, was returned unopposed for the same constituency to the London County Council. In 1895 he was returned again after a contest, but resigned in March 1896. He is a magistrate for Middlesex, Westminster, and Berkshire, a Deputy-Lieutenant for London, and has travelled over the whole world. In 1885 he was returned as Conservative Member for the Central Division of Sheffield by a majority of 1149, and by 1195 in 1886, again in 1892, and again unopposed in 1895. In Parliament he is identified with the Fair-Trade Movement, United Empire Trade, and British Labour Questions, while Acts for the Probation of First Offenders, in the first nine years of which 35,000 were saved under it from imprisonment, and £100,000 was not spent in prison maintenance, Saving Life at Sea, Reformatory Schools, the appointment of a Judicial Trustee, and prohibiting the Importation of Prison-Made Goods are due to his initiation. In 1886 he was created a Companion of the Bath, and K.C.M.G. at the Birthday, 1899, for his services as British Representative at the late Anarchist Conference in Rome. In 1895 he was Chairman of the Council of the National Union of Conservative Associations, and in 1898 was appointed to the Royal Commission for the Paris Exhibition of 1900. In 1891 he founded the United Empire Trade League, and has since acted as its Honorary Secretary, succeeding in 1897 in getting the treaties of 1862 and 1864 denounced, and was knighted by the Queen in 1896. He is also a knight of the Orders of the German Crown and of the Crown of Italy. His published works are "Stoffel's Reports upon the Prussian

Army," 1871; "Elementary Military Geography, Reconnoitring and Sketching," 1872; "Russia's Advance Eastward," 1873; "The Law of Criticism and Libel," 1876; "The Improvement of the Volunteer Force," 1878; "Procédure d'Extradition," 1880; and "A Police Code and Manual of Criminal Law," which has gone through ten editions, and has been adopted as the text book of all English-speaking police. Sir Howard Vincent married, in 1882, Ethel Gwendoline, daughter and co-heiress of Geo. Moffatt, Esq., M.P., of Goodrich Court, Herefordshire, a great traveller and authoress of "40,000 Miles over Land and Water," "Newfoundland to Cochinchina," and "China to Peru over the Andes," by whom he has an only daughter, Vera Howard, born 1883. Addresses: 1 Grosvenor Square, S.W.; and Athenæum.

VINCENT, Sir Edgar, K.C.M.G., youngest brother of the above, was born at Slinfold, Sussex, on Aug. 19, 1857. He was educated at Eton, and passed an examination for the appointment of Student Dragoman at Constantinople, in October 1877, but did not take up the appointment. He was subsequently appointed 2nd Lieutenant in the Coldstream Guards (1877), and resigned (1882). In May 1880 he was appointed Private Secretary to Lord E. Fitzmaurice, Commissioner for Eastern Roumelia; and in June 1881, Assistant to Her Majesty's Commissioner for the evacuation of the territory ceded to Greece by Turkey. He was appointed British, Belgian, and Dutch Representative on the Council of the Ottoman Public Debt at Constantinople, March 1882; President of the Council of Ottoman Public Debt at Constantinople, March 13, 1883; and Financial Adviser to the Egyptian Government, Nov. 4, 1883. He has received the first class of the Medjidieh, and was made a K.C.M.G. in August 1887. It was mainly owing to his efforts that Egyptian finance was restored to prosperity. When the financial difficulties of Egypt were overcome, Sir Edgar Vincent resigned the post of Financial Adviser and was appointed Governor of the Imperial Ottoman Bank, a post he held till 1897. As evidence of the progress of Egyptian credit during the six years that he was Financial Adviser, it may be stated that the selling value of Egyptian securities in 1883 was £76,251,678, and in 1889 had risen to £103,362,730, this result having been obtained with a diminution of the charges of the Egyptian Government and of the taxpayer. While in Egypt, Sir Edgar Vincent undertook and carried out with success a reform of the Egyptian currency. Since his appointment, Turkey has regularly paid

the Russian War Indemnity, thus removing one of the chief political dangers to the Ottoman Empire. Turkish credit has been greatly improved, and Turkish stocks now rank closely after Egyptian. All sums due on the debt have been regularly met, and an average sum of 2,000,000 Turkish pounds has been annually redeemed by means of the various sinking funds. Turkey has now been removed from the list of countries in embarrassed financial circumstances, and has entered resolutely the path of economic progress. Railways in Turkey have been increased from 960 in 1889 to 2000 miles in 1893. Sir Edgar Vincent married, in September 1890, Lady Helen Venetia Duncombe, daughter of the 1st Earl of Feversham. Address: Esher Place, Esher, Surrey.

VINCENT, John Heyl, Bishop, was born in Tuscaloosa, Alabama, Feb. 23, 1832. He was brought by his parents to Pennsylvania in his sixth year, and lived for fourteen years on the banks of the Susquehanna, near Lewisburg. He taught school in Chilisquaque township and on the Juniata River for about four years. His education was pursued in Lewisburg and Milton Academies, and in the Newark (N.J.) Wesleyan Institute. He completed his four years' course of theological study in the Newark conference in April 1857. From there he went to Illinois, where he served as pastor at Joliet, Galena, Rockford, Mount Morris, and Chicago. He established the *Sunday-School Quarterly* in 1865 in Chicago, and in 1866 the *Sunday-School Teacher*, containing the first issues of the modern lesson system which has become international. He became Sunday-School Secretary of the Methodist Episcopal Church, which office he filled for twenty years. With Hon. Lewis Miller of Akron, Ohio, he established the Chautauqua Assembly in 1874, and has been Superintendent of Instruction, or Chancellor, up to the present time. He was elected and consecrated (Methodist Episcopal) Bishop in New York in 1888. He is the author of "The Church School and its Officers," "The Sunday-School Normal Guide," "The Modern Sunday School," "A Study in Pedagogy," "The Revival and after the Revival," "Better Not," a series of "Chautauqua Text-Books" in history, "To Old Bethlehem," "The Home Book," "The Church at Home," "Studies in Young Life," "In Search of His Grave, an Easter Study," &c. He visited Europe in 1862-63, 1872, 1878, 1880, 1886-87, 1891, and 1893. He visited Egypt and Palestine in 1863 and 1887. His episcopal residence is Topeka, Kansas; his post-office address for all Chautauqua correspondence, Buffalo, N.Y.

VINE, Sir John Richard Somers, C.M.G., F.S.S., F.R.G.S., eldest son of the late John Vine and Eliza, his wife, daughter of William Somers, was born at Wells, Somerset, on Dec. 10, 1847. He was educated at the Grammar School, Spalding, and subsequently at a private school in Cambridge. He entered the newspaper and printing office of a relative when very young, and has served in every grade of the journalist's profession on country and London newspapers. In October 1870 he joined the editorial staff of Messrs. Waterlow & Sons, and became superintending editor to that company in 1876. He was Private Secretary at the Mansion House to the Lord Mayors of London, 1871-75. During that period he acted as Secretary to, amongst other organisations, the Bengal Famine Relief Fund in 1874, and to the British Fund for the relief of the inundated Departments of the South of France in 1875. He was appointed City and Official Agent to the International Fisheries, Health, and Inventions Exhibitions, 1883-85, and to the Royal Commissioners for the Colonial and Indian Exhibition, 1886, and was knighted in that year "in regard of his many valuable public services in the course of that and preceding years." In the year 1886 he was invited by H.R.H. the Prince of Wales to be the Assistant Organising Secretary to the proposed Imperial Institute as the National Memorial of the Queen's reign, and accepted the post. In December 1888 he was despatched by H.R.H. the President, and the Organising Committee, on a mission to the principal British Colonies, which occupied him nearly two years (1889-90). During this tour, which was of a most comprehensive nature, the interest of India and of the Colonies in the work of the Institute was aroused, and the practical co-operation of those dependencies promised. He organised and placed in working order the Commercial Intelligence Department, and most of the collections of natural products. On the occasion of the State inauguration of the Institute by the Queen on May 10, 1893, he was created a Companion of the Most Distinguished Order of St. Michael and St. George, "in recognition of his services to that Institution." From 1889 to the present time he has acted as Honorary Secretary of the National Leprosy Fund. He is now connected with important Colonial enterprises in Australia and British New Guinea; the latter country he again visited in 1897-98. He is a prominent Freemason, being a Past Grand Deacon of England, and founder and first elected Master of the "Savage Club Lodge." He was for some years Honorary Secretary to the "Savage Club."

He is author of "English Municipal Institutions, their Growth and Development Statistically Illustrated" (first published in 1878); "The English Municipal Code" (first published in 1882); and other statistical works, and sometime editor and compiler of several "Year-Books." To him is also due—as stated in the official preface—"the conception and general outline" of "The Imperial Institute Year-Book" (first published in 1892), and now a recognised and authoritative annual record in respect of the British Empire. He is a Commissioner of Lieutenancy for London, a Knight of St. John of Jerusalem, and a Knight of several foreign Orders (including those of Saxe-Coburg and Gotha, Franz-Joseph of Austria, and Kamemeha of Hawaii). He married Eliza, daughter of the late William Porter, in 1870. Addresses: Devonshire Club; and Members' Mansions, Victoria Street, S.W.

VINES, Professor Sydney Howard, D.Sc., F.R.S., was born in London, Dec. 31, 1849. He was educated privately, and began the study of Medicine at Guy's Hospital in 1869, but soon became attracted by purely scientific subjects. Having gained an Open Scholarship at Christ's College, he went up to Cambridge in October 1872. He graduated B.Sc. at the University of London in 1873, and D.Sc. in 1879. He took his Cambridge degree in 1876, and was shortly afterwards elected Fellow and Lecturer of Christ's College. He was elected to a Readership in Botany in 1884, and took his D.Sc. degree at Cambridge in the same year. In 1888 he was elected to the Sherardian Professorship of Botany at Oxford, and was admitted a Fellow of Magdalen College at the same time. He was elected Fellow of the Linnean Society in 1878, and Fellow of the Royal Society, and an Hon. Member of the Physical Society of Edinburgh in 1885. He has written a book entitled "Lectures on the Physiology of Plants," published by the Cambridge University Press in 1886; and he is an editor and one of the founders of the "Annals of Botany" (published by the Clarendon Press, Oxford). Address: Headington Hill, Oxford.

VIRCHOW, Rudolf, a celebrated German pathologist, anthropologist, and politician, was born at Schivelbein in Pomerania, Oct. 13, 1821, and studied Medicine at Berlin. In 1849 he was appointed Professor of Pathological Anatomy at Würzburg, and soon became one of the foremost exponents of the so-called Würzburg School. In 1856 he returned to Berlin as Professor; here he did excellent work in the newly-founded pathological institute,

which at once became the centre of independent research amongst the younger men of science. He has always taken a great interest in politics, and has contributed important speeches to the parliamentary debates. His attitude has from the first been ultra-liberal. He passes as the originator of the celebrated phrase "Kulturkampf," or the war of the State against a reactionary Church. In 1887 he was deprived of the rectorate of Berlin University, owing to the violence of his political opinions, but was reinstated in 1892. At the Naturalists' Conference at Innsbruck in 1869 he was one of the founders of the German Anthropological Society. In 1873 he became a member of the Academy of Sciences. He has also taken a great interest in the spreading of scientific knowledge amongst the people, and has been since 1866 part editor of a series of popular lectures, to which he has contributed essays on various historical and scientific subjects. His principal works are: "Cellular Pathology," 4th edit., 1871; "Morbid Tumours," 3 vols., 1863-66; "Collection of Treatises on Scientific Medicine," 1856; "Collection of Treatises on Public Medicine and Epidemiology," 2 vols., 1879; "Goethe as a Naturalist," 1861; "Four Lectures on Life and Illness," 1862; "The Education of Women," 1865; "The Function of Science in the New National Life of Germany," 1871; "Free Knowledge in the Modern State," 1877; "The Necropolis of Koban in the Caucasus," 1883; and "Alimentation and Well-being," 1889. His "Archives of Pathological Anatomy and Physiology, and of Clinical Medicine," founded in 1847, has latterly reached the 120th volume. During the last illness of the Emperor Frederick he was constantly in communication with the late Sir Morell Mackenzie. On the occasion of the completion of the fiftieth year of his connection with Berlin University in November 1897 he was the recipient of most flattering proofs of the respect in which he is universally held. In 1898 he came to London and lectured before the Royal Society, his speech upon this occasion being most generously appreciative of the labours of English scientific men.

VOGÜE, Vicomte Eugène Melchior de, was born on Feb. 24, 1848; became Secretary to the Embassy, first at Constantinople, and subsequently at St. Petersburg, where, at the Winter Palace in 1878, he was married to the daughter of General Annenkoff. He retired from the Diplomatic Service in 1881, and has since devoted his time to literature; writing much in the *Revue des Deux Mondes* and the *Journal des Débats*. He has also written

"Syrie, Palestine, Mount Athos," 1876; "Histoires Orientales," 1879; "Le Fils de Pierre le Grand," 1884; "Histoires d'Hiver," 1885; "Le Roman Russe," 1886; "Souvenirs et Visions," 1887; "Remarques sur l'Exposition du Centenaire," 1889. Vicomte Melchior de Vogüé was elected a Member of the Académie Française in November 1888. He was promoted Commander of the Legion of Honour in 1879.

VOULES, Horace St. George, journalist and editor of *Truth*, was born at Windsor on April 23, 1844, and is the son of Charles Stuart Voules, solicitor, Windsor. He was educated at private schools at Brighton and Eastbourne. He began life in 1864 in the printing trade at Cassell, Petter, & Galpin's, and in 1868 originated for them the *Echo*, the earliest halfpenny evening paper. When, in 1875, the paper was sold to the late Albert Grant, he continued as editor and manager of the same till it passed into the hands of its present proprietor, Mr. Passmore Edwards, in 1876. In that year he arranged with Mr. Labouchere to start *Truth*, which was issued in January 1877. He has remained in this post ever since, and has been sole editor for several years. He at one time, during a year or more, assisted in the reconstruction of the *Pall Mall Gazette*, from which Mr. Greenwood had then seceded. Addresses: *Truth* Office, Carteret Street, S.W.; and Uplands, Brighton.

VOYSEY, The Rev. Charles, B.A., was born in London, March 18, 1828, being the youngest son of the late Mr. Annesley Voysey, architect. He was educated partly by private tuition, partly at Stockwell Grammar School, and afterwards at St. Edmund Hall, Oxford, where he took his B.A. degree in 1851. From 1852 to 1859 he held the curacy of Hessle, near Hull, after which he was curate (under the Crown) of Craigton, Jamaica, for fifteen months. In 1861 he was appointed curate of Great Yarmouth, but in the same year was transferred to St. Mark's, Whitechapel. Being ejected from that curacy in consequence of a sermon against endless punishment, he was recommended by the Bishop of London (Dr. Tait) to the curacy of the well-known Victoria Dock parish, under the Rev. H. Boyd, Vicar. After six months' service there he was invited by the patron and Vicar of Healaugh, Yorkshire, to accept the curacy of that parish, and at the expiration of six months the Vicar resigned and presented Mr. Voysey to the benefice (1864). Mr. Voysey began his career as a

religious reformer by the publication of a sermon entitled "Is every Statement in the Bible about Our Heavenly Father strictly true?" This was soon followed, in 1865, by "The Sling and the Stone," which first appeared in monthly parts, and was continued through several years; up to the present time ten volumes have been issued. The opinions expressed were denounced as heretical by the ultra-orthodox parties in the Anglican Church, and eventually in the spring of 1869 legal proceedings were instituted by the Archbishop of York's secretary against Mr. Voysey. The case was heard in the first instance in the Chancery Court, York Minster, Dec. 1, 1869, when judgment was pronounced against Mr. Voysey, and on appeal, confirmed by the Judicial Committee of the Privy Council, which sentenced the appellant to be deprived of his living, and to pay the costs, Feb. 11, 1871. In October of that year Mr. Voysey began holding Theistic services, and preaching in London, first at St. George's Hall, then at Langham Hall, and since April 1885 at the Theistic Church, Swallow Street, Piccadilly. The religious movement with which he is associated was at first called the "Voysey Establishment Fund," but in 1880, at his own request, his supporters and congregation enrolled themselves into the "Theistic Church," which has been properly settled by an elaborate Trust Deed. For the first three years of his preaching in London Mr. Voysey's sermons were published weekly in the *Eastern Post*, and frequently in other papers in England, in America, and in India. Every sermon which he has preached since October 1871 has been printed and circulated in many parts of the world. The issue is 1200 a week, and the total number of sermons, including reprints, is over 1,250,000. The work of the Theistic Church in twenty-six years has cost over £40,000, and a further sum of £2653 has been collected for charities. Mr. Voysey is the author of an original work, entitled "The Mystery of Pain, Death, and Sin"; and he has recently issued what may be regarded as standard works on the religion which he upholds, entitled "Theism, or The Religion of Common Sense" and "Theism as a Science"; also an important polemical book, entitled "The Testimony of the Four Gospels concerning Jesus Christ." By the aid of a munificent gift from a friend Mr. Voysey has been able to present over 14,000 volumes of his writings to Public Free Libraries, Colleges, Schools, &c., besides many thousands of Theistic pamphlets and sermons. Address: Annesley Lodge, Platt's Lane, Hampstead, N.W.

W

WACE, The Rev. Henry, D.D., Rector of St. Michael's, Cornhill, late Principal of King's College, London, was born in London, Dec. 10, 1836, and educated at Marlborough, Rugby, King's College, London, and Brasenose College, Oxford, where he graduated B.A. in 1860, taking a second class both in Classics and Mathematics. He proceeded to D.D. at Oxford in 1883; and in the previous year received the honorary degree of D.D. from the University of Edinburgh. He was ordained in 1861; served as Curate at St. Luke's, Berwick Street, from 1861 to 1863; at St. James's, Piccadilly, from 1863 to 1869; and was Lecturer at Grosvenor Chapel, South Audley Street, from 1870 to 1872. In 1872 he was elected by the Benchers of Lincoln's Inn, Chaplain of that Society; and in 1880 was promoted by them to the office of Preacher of Lincoln's Inn. He preached the Boyle Lectures for 1874 and 1875, on the subject of "Christianity and Morality." In 1879 he preached the Bampton Lectures at Oxford on the "Foundations of Faith." He was Select Preacher at Cambridge in 1878, and at Oxford from 1880 to 1882. In 1875 he was appointed Professor of Ecclesiastical History in King's College, London; and in 1881 he was nominated by the Bishop of London a Prebendary of St. Paul's. He was appointed one of the Archbishop of Canterbury's Chaplains in April 1883; and in November the same year, Principal of King's College, London. In 1884 he was appointed one of the Honorary Chaplains to the Queen, and became Chaplain in Ordinary in 1889. In 1896 he was presented by the Drapers' Company to the Rectory of St. Michael's, Cornhill, and resigned the offices of Principal of King's College and Preacher of Lincoln's Inn. In conjunction with the late Sir William Smith, he is the editor of the "Dictionary of Christian Biography, Literature, Sects, and Doctrines, during the First Eight Centuries," 4 vols., 1877-87; and he is the Editor of "The Speaker's Commentary on the Apocrypha"; and also, in conjunction with the late Dr. Schaff, of a few of the volumes of the "Post-Nicene Library of Translations from the Fathers." He is also the author of Lectures preached in 1881 at St. James's, Piccadilly, on "The Principal Facts in the Life of Our Lord, and the Authority of the Evangelical Narratives"; of a volume of discourses on "Some Central Points of Our Lord's Ministry," 1890; of a series of essays on "The Christian Faith and some recent Agnostic Attacks," 1894; of some

discourses on "The Sacrifice of Christ," 1898; in conjunction with Dr. Buchheim, of an edition of Luther's Primary Works, 1893 and 1897; and "The Sacrifice of Christ," 1898. Address: 22 Gordon Square, W.C.

WADDY, His Honour Judge Samuel Danks, Q.C., is the son of the late Rev. S. D. Waddy, D.D., Wesleyan minister, and was born in 1830. He was educated at Wesley College, Sheffield, took the B.A. degree at the London University in 1851, and was called to the Bar at the Inner Temple in 1858. He sat in the House of Commons as Liberal member for Barnstaple from 1874 to 1879, as one of the members for Sheffield from 1879 to 1880, as a member for Edinburgh from 1882 to 1885, and for the Brigg Division of Lincolnshire from 1886 to 1894. Mr. Waddy was appointed a Q.C. in 1874, and became Recorder of Sheffield in 1894, whilst two years later he was made Judge of the County Court in the same borough. He is married to Emma, daughter of Samuel A. Garbutt, of Hull. Addresses: Claremont, Sheffield; and 12 Eton Avenue, Hampstead, N.W.

WAKEFIELD, Bishop of. See EDEN, THE RIGHT REV. GEORGE RODNEY.

WAKLEY, Thomas Henry, F.R.C.S., joint-editor of the *Lancet*, is the son of the famous founder of that journal, the late Thomas Wakley, Coroner for West Middlesex and M.P. for Finsbury. He was born in London on March 20, 1821, and was educated by a private tutor, at University College Hospital, and in Paris. He was formerly Surgeon and Lecturer on Surgery at the Royal Free Hospital, and is now Consulting Surgeon to the same. From 1848 to 1883 he was in practice as a Consulting Surgeon. He has been the author of many scientific papers in his own journal, and of several articles, including that on "Diseases of the Joints," in Cooper's "Surgical Dictionary," &c. Addresses: 5 Queen's Gate, S.W.; and 1 and 2 Bedford Street, Strand, W.C., &c.

WAKLEY, Thomas, junior, L.R.C.P., was born in London on July 10, 1851, and is the only son of Thomas H. Wakley, F.R.C.S. (*q.v.*). He was educated at the Westminster School, at Trinity College, Cambridge, and at St. Thomas's Hospital. He is joint-editor of the *Lancet* with his father, and is a Fellow of the Medical Society of London, and the Royal Medical Chirurgical Society, and Member of other Medical Societies. Addresses: 5 Queen's Gate, S.W.; and 1 and 2 Bedford Street, Strand, W.C., &c.

pal cities of the Empire, the Prince arrived in London in May 1876. He brought home with him about 500 animals, and these he presented to the Zoological Society's Gardens. In the following July he reviewed 30,000 Volunteers in Hyde Park. His Royal Highness was appointed President of the British Commissioners at the Paris Exhibition of 1878, in which he took a great interest. He attended the Court festivities held in Berlin in March 1883, to celebrate the "Silver Wedding" of the Crown Prince of Germany with the Princess Royal of England. During 1885, in company with the Princess of Wales, he made a tour through Ireland, visiting Dublin, Killarney, and Limerick, and everywhere received a most enthusiastic welcome. The Prince and Princess celebrated their "Silver Wedding" in 1888. Their Royal Highnesses and their two sons visited the Paris Exhibition of 1889, the Prince at that time evincing an active interest in the promotion of the series of Exhibitions which were being held in South Kensington. The establishment of the Imperial Institute was, in a large measure, due to the efforts of the Prince, and in spite of a good deal of opposition and hostile criticism, he succeeded in obtaining a royal warrant for its constitution. In May 1891 His Royal Highness was made a grandfather by the birth of the Duchess of Fife's daughter. He was appointed a Member of the Poor-Law Commission in 1893, and attended its sittings with great assiduity. During the summers of 1893 and 1894 the Prince raced his yacht, the *Britannia*, in most of the chief regattas round the coast, and secured many victories. He was present, in April 1894, at the wedding of Princess Victoria Melita at Coburg; and also, with the Princess of Wales, attended the marriage of the late Czar's daughter at St. Petersburg. In the following July the Prince and Princess were present at the Welsh Eisteddfod, on which occasion the Princess was admitted a Bard. During the autumn, accompanied by the Duke of York, he hastened to join the Russian Imperial family, on the occasion of the decease of the late Czar; and the Prince, by his courteous attention to Russian etiquette and constant attendance at the prolonged funeral ceremonies, gained the affection of the Russians to a marked degree. During 1896 His Royal Highness won most of the principal turf races, securing the Derby at Epsom with his horse "Persimmon," amid a scene of unparalleled enthusiasm. In June of the same year he was installed as Chancellor of the new University of Wales, and in the following month attended the marriage, at Buckingham Palace, of his second daughter, the Princess Maud, to

Prince Charles of Denmark. Diamond Jubilee year, 1897, was marked by the inauguration of the Prince of Wales's Hospital Fund. His Royal Highness appealed to the public for subscriptions to enable him to raise a fund which should be devoted to the permanent endowment of the London hospitals, and also to free them from debt. Before the close of the year, he received nearly a quarter of a million, including some £30,000 which were promised as annual subscriptions. The Prince took a prominent part in the Jubilee celebrations, and on Sunday, June the 20th, attended divine service at St. Paul's Cathedral, at which every Royal personage in London was present. On the following day he was appointed Great Master and Principal Knight Grand Cross of the Bath. In the memorable procession on June 20, the Prince rode on the right of the Queen's carriage. On June 25 the Prince and Princess of Wales, in company with a very distinguished assemblage, were the guests of the Lord Mayor at the Mansion House. The most striking event in connection with the Diamond Jubilee was the Naval Review, at which the Prince represented the Queen. The Fleet was moored in the Solent, in five lines, opposite Portsmouth. It was composed of ships of all classes, in number about 150, and was considered the finest fleet that was ever got together. The Prince of Wales, in the *Victoria and Albert*, accompanied by a great number of distinguished people in other vessels, steamed down the lines and reviewed the fleet, receiving a Royal salute as he passed each warship. He afterwards held a reception on board the Royal yacht, to which all the foreign officers taking part in the review, as well as the English admirals and captains, were invited. Admiral Sir Nowell Salmon, Commander-in-Chief, made the following signal during the reception: "I am commanded by the Prince of Wales, as representing the Queen, to express his entire satisfaction with the magnificent naval display at Spithead, and the perfect manner in which all the arrangements were carried out; at his request I order the mainbrace to be spliced." In July 1898, while on a visit to Baron Ferdinand de Rothschild at Waddesdon Manor, the Prince had the misfortune to slip on the stairs and to fall, fracturing his knee-cap. Sir William MacCormac and other eminent members of the medical profession were called in, and operative interference was decided against. A mode of treatment, enforcing prolonged rest, was adopted; and though many weeks elapsed before His Royal Highness could walk, it is expected that no permanent lameness will obtain as a result of the accident. The

Prince has always taken a great interest in Exhibitions, and was Executive President of the Colonial and Indian Exhibition, opened by the Queen in May 1886. He also originated the Royal College of Music, and is President of St. Bartholomew's Hospital and of the Society of Arts. The Universities of Cambridge and Dublin have conferred upon him the degree of LL.D., and Oxford that of D.C.L. The Prince for several years has been a Bencher of the Middle Temple, and also an Elder Brother of Trinity House. He is President of the Council of the Royal Agricultural Society. In the Royal Navy he holds the rank of honorary Admiral of the Fleet, and Captain of the Royal Naval Reserve.

WALES, Her Royal Highness Alexandra Caroline Marie Charlotte Louise Julie, the Princess of, is the daughter of Christian IX., King of Denmark, and was born at Copenhagen, Dec. 1, 1844, and was married at Windsor on March 10, 1863, to His Royal Highness Albert Edward Prince of Wales, and has had six children: Albert Victor Christian Edward, Duke of Clarence and Avondale, born at Frogmore Lodge, near Windsor, Jan. 8, 1864, died January 1892, within a few weeks after his betrothal to his cousin, Princess May of Teck; George Frederick Ernest Albert, born at Marlborough House, June 3, 1865, married Princess Mary of Teck, July 1893; Louise Victoria Alexandra Dagmar (Duchess of Fife), born at Marlborough House, Feb. 20, 1867, married to the Duke of Fife in July 1889; Victoria Alexander Olga Marie, born at Marlborough House, July 6, 1868; Maud Charlotte Marie Victoria, born at Marlborough House, Nov. 26, 1869, married to Charles, second son of the Crown Prince of Denmark, in July 1896, and Prince Alexander, who died shortly after his birth, April 6, 1871. Her Royal Highness accompanied the Prince of Wales to Russia at the time of the death of Alexander III., and made a prolonged stay with her sister the Czarina, with whom she attended the funeral ceremonies at St. Petersburg. Rumours of the late Queen of Denmark's failing health took her to her native land in the summer of 1898, and, with the Duke of York, she was subsequently present at the funeral ceremonies of a parent to whom she had been tenderly devoted. The Princess is well known for her interest in all kinds of benevolent causes, and as an accomplished musician, holding the degree of Hon. Mus. Doc., as a collector of old lace and rare china, and a devotee of country life at Sandringham, where her dairy is a place of pilgrimage.

WALFORD, Mrs. Lucy Bethia, novelist, was born on April 17, 1845, and is the youngest daughter of the second son of Sir James Colquhoun of Colquhoun and Luss, 10th baronet of the name, and brother of the unfortunate Sir James who was drowned in Loch Lomond, within sight of his own door, some years ago. Her mother was the daughter of E. Fuller-Maitland, Esq., of Stanstead, Essex, and this lady—as is little known—was the writer of the principal portion of those verses, now in every hymn-book, and usually attributed to H. Kirke White—

“ Oft in danger, oft in woe,
Onward, Christians, onward go.”

Of these Kirke White wrote only the first six lines, and the poem was finished by Miss Frances Fuller-Maitland, then only in her sixteenth year. From both parents Mrs. Walford thus inherits literary tastes, as her father's comprehensive sporting work, “The Moor and the Loch,” lately gone into its seventh edition, is considered a classic among lovers of the rod and the gun. It was not until four years after her marriage, in 1869, to Mr. Alfred Saunders Walford, that Mrs. Walford published “Mr. Smith,” her first serious attempt. It was sent anonymously to Mr. John Blackwood, and by him was accepted and published at once. Mr. Blackwood, on the success of “Mr. Smith,” urged Mrs. Walford to write for the “Maga” (*Blackwood's Magazine*), and the result was a series of short tales, beginning with “Nan: a Summer Scene,” which has lately been brought out under this heading in book form. They comprehended “Bee or Beatrix,” “Lady Adelaide,” “Fashion and Fancy,” “Eleanor: a Tale of Non-Performers,” and “Mattie: the History of an Evening,” all which made their first appearance in *Blackwood*. “Pauline,” Mrs. Walford's first *Blackwood* serial novel, ran its course in 1877; “Cousins,” her third novel, was published by the same firm in 1879. “Troublesome Daughters” followed in 1880; “The Baby's Grandmother” was the *Blackwood* serial in 1885; and “A Stiff-Necked Generation” completed its course in the same pages in 1888. Alongside of these, her larger works, Mrs. Walford wrote a series of biographical essays for *Blackwood*, which were afterwards published under the title of “Four Biographies from *Blackwood*”; “Dick Netherby,” a one-volume tale of humble Scottish life, for *Good Words*, in 1881; and “Dinah's Son,” on the same lines, for *Life and Work*, also in 1881; “The History of a Week” formed the Christmas number of the *Graphic* in 1885; and all these have also

been republished in book form. Other novelettes are: "A Mere Child," "The Havoc of a Smile," "A Sage of Sixteen," "A Pinch of Experience," "The One Good Guest," and two collections of short magazine stories. In 1891 Mrs. Walford's novel, "The Mischief of Monica," formed the serial for the year in *Longmans' Magazine*, and was re-published by the same firm, who have brought out several succeeding editions. Messrs. Longman also published in the autumn of 1892 "Twelve English Authoresses," being a collection of biographical essays written for *Far and Near*, an American monthly, and contemporary with this appeared a small volume of "Stories for Grown-up Children," illustrated by T. Pym. This was followed by "A Question of Penmanship," 1893. In 1894 "The Matchmaker" ran as a serial for the year in *Longmans' Magazine*. "Ploughed" appeared in 1894; "A Bubble," and "Frederick," 1895; "Successors to the Title," 1896; "Iva Kildare," 1897; "The Intruders," and "The Archdeacon," 1898. In 1869 Mrs. Walford was married to Mr. Alfred Saunders Walford, of Cranbrooke Hall, Essex, where she resides.

WALKER, Frederick William, High Master of St. Paul's School, only son of Mr. Thomas Walker, of Tullamore, was born in London, July 7, 1830, and educated at Rugby, under Dr. Tait. He was Scholar of Corpus Christi College, Oxford, 1849 (first class in classical, and second class in mathematical moderations, 1852; first class in Classics, and second class in Mathematics, Final Examination, 1853), Boden Sanskrit Scholar, Vinerian Law Scholar, and Tancred Law Scholar, 1854; and Fellow and Tutor of Corpus Christi College. He was called to the Bar, Lincoln's Inn, 1857; and was appointed High Master of Manchester Grammar School, 1859; Public Examiner at Oxford, 1868; High Master of St. Paul's School, London, 1877; Honorary Fellow of Corpus Christi College, Oxford, 1894; and member of the Court of Assistants of the Fishmongers' Company, 1897. Under Mr. Walker's mastership St. Paul's School has been removed from St. Paul's Churchyard to West Kensington. He married, in 1867, Maria, eldest daughter of Richard Johnson, of Manchester. She died in 1869. Address: St. Paul's School, West Kensington, W.

WALKER, John James, M.A., F.R.S., President of the London Mathematical Society from 1880 to 1890, member of the Physical Society, was born, Oct. 2, 1825, at Kennington, Surrey, and is the son of John Walker, B.A., Head-Master of Uni-

versity College, London High, and Plymouth New Grammar schools, by Ann, sister of Ed. Fricker, surgeon, Cheltenham. He was educated at London High and Plymouth New Grammar schools, and Trinity College, Dublin (with which he had an hereditary connection, his great-grandfather, Matthias Walker, Clerk, his grandfather, John Walker, a Fellow, and his father, having been graduates of Dublin University), first class Mathematics and Logic at previous Exam., 1845; Sen. Mod. Mathematics and Physics Degree Exam., 1849; second Bishop Law's Prizeman, 1850; M.A. 1857. From 1853 to 1862 he was private tutor to the present Lord Ardilaun, Captain B. L. Guinness, and Lord Iveagh; from 1865 to 1888, Afternoon Lecturer in Applied Mathematics and Physics, University College School; and from 1868 to 1882 Vice-Principal University Hall, London; from 1871 to 1883 Examiner in Mathematics and Natural Philosophy for Hibbert Trust Scholarships. He was elected F.R.S. in 1883. He is the author of papers and reviews in the *Philosophical Magazine* ("Iris seen in Water," 1853, reprinted in *Annales de Chim. et de Physique*, tome xxxix.), *Cambridge and Dublin*, and *Quarterly Journals of Mathematics*, *Messenger of Mathematics*, *London Mathematical Society Proceedings*, *British Association Reports*, 1859-63; *Proceedings of the Royal Society*, *Philosophical Transactions*, and *Nature*. Since 1888 Mr. Walker has devoted himself entirely to research in Pure and Applied Mathematics. In 1842, when residing in Somersetshire, he was fortunate in discovering, raising, and cleaning a fine specimen of *Ichthyosaurus tenuirostris*, from the lias near Long Sutton, on the property of the then Earl of Burlington, late 7th Duke of Devonshire, a careful drawing of which was accepted by the late Sir R. Owen as an illustration to his British Fossil Reptiles. He married Emma, youngest daughter of the late William Turner, of Newcastle. Address: 12 Denning Road, Hampstead, N.W.

WALKER, The Right Hon. Samuel, is the second son of Captain A. Walker, of Goreport, co. Westmeath, and was born in 1832. He was educated at Portarlington School, and Trinity College, Dublin. He was called to the Irish Bar in 1855, and was appointed a Q.C. in 1872. After serving the office of Solicitor-General of Ireland from 1883 to 1885, he became Attorney-General of Ireland in 1886, and was the Irish Lord Chancellor from 1892 to 1895. In the latter year Mr. Walker was appointed a Lord-Justice of Appeal in Ireland. He sat in the House of Commons from 1884 to 1885 as member for London-

derry, and he is married to Eleanor, daughter of the Rev. A. MacLaughlin. Address: Pembroke House, Lower Mount Street, Dublin.

WALKINGTON, Miss Letitia Alice, M.A., LL.D., was born in Belfast, but has lived nearly all her life in Strandtown, about two and a half miles out of Belfast. Her father, Mr. T. R. Walkington, comes of a family that has been well known for several generations in Antrim and Down. In 1695 Edward Walkington was consecrated Bishop of Down and Connor. Her mother is the daughter of the late Prussian Consul, G. von Heyn. Miss Walkington was educated at home by a governess, Miss Bessel, until sixteen, and then went to a boarding-school, first in England and then in Paris. She did not, however, begin to study seriously until more than a year after she had left school. She matriculated in 1882 in the Royal University of Dublin. After doing so, she studied at the Methodist and Queen's Colleges, Belfast, and with a barrister, Mr. Thos. Harrison, and took her B.A. degree in 1885, and M.A. in 1886, taking the Logic, Metaphysic, and Political Economy Honour Group for both degrees. In 1888 she took the LL.B., and in 1889 the LL.D. degree. Miss Walkington was the first lady who took the last three degrees. Several ladies have since taken the M.A., but only one, Miss F. Gray, has taken the law degrees. Miss Gray, Miss Hamilton, B.A., and Miss Walkington have organised university classes to prepare young ladies for the Intermediate and R.U.I. examinations, hoping thereby to supply a want, as there is nothing of the kind for girls in Belfast, except in close connection with the principal schools. Their success, as far as numbers are concerned, testifies that the want was really experienced. In 1889 Miss Walkington was invited to take part in the Congrès International des Œuvres et Institutions Féminines, in connection with the Paris Exhibition. Of late years Miss Walkington has been engaged in teaching and charitable work, principally work among the blind in connection with the Workshops for the Blind, Royal Avenue. She has invented, with the aid of two friends, a machine for printing Braille, the embossed type for the blind, which will greatly facilitate the production of books for the blind. She has also been much engaged in temperance work in connection with the Irish Women's Temperance Union, and is trying with others to build an Institute in connection for the use of her branch. She frequently speaks at meetings, and helps in other ways. Address: Edenvale, Strandtown, co. Down.

WALKLEY, Arthur Bingham, only son of the late Mr. A. H. Walkley, of Bristol, was born there on Dec. 17, 1855. He was educated at Warminster Grammar School, and, after matriculating at Oxford as Exhibitioner of Balliol College in 1873, was elected Mathematical Scholar of Corpus Christi, graduating in honours in 1877, in which year he was appointed, after an open competitive examination, to a Clerkship in the Department of the Secretary to the Post Office. In 1897 he was Secretary of the British Delegation to the Postal Congress held at Washington, U.S.A. Under the pseudonym of "Spectator" he became dramatic critic of the *Star* on the foundation of that journal, and subsequently of the *Speaker* and *Cosmopolis*, joined the leader-writing staff of the *Daily Chronicle*, and is a regular contributor to the literary columns of other newspapers and reviews. He is the author of a collection of theatrical essays entitled "Playhouse Impressions," 1892. Address: Devonshire Club, St. James's, S.W.

WALLACE, Alfred Russel, D.C.L., LL.D., F.R.S., born at Usk, Monmouthshire, Jan. 8, 1823, of Scottish descent, was educated at the Grammar School, Hertford, and articulated with an elder brother as land surveyor and architect, but gave up that profession in order to travel and study nature. In 1848 he visited the Amazon with Mr. Bates. Returning in 1852, he published his "Travels on the Amazon and Rio Negro," and a small volume on "Palm-Trees of the Amazon and their Uses." In 1854 he visited the Malay Islands, where he remained eight years. He published "The Malay Archipelago," 2 vols., in 1869 (10th edit., in one volume, 1890), and a volume of essays entitled "Contributions to the Theory of Natural Selection" in 1870, as well as a large number of papers in the publications of the Linnean, Zoological, Ethnological, Anthropological, and Entomological Societies. In 1868 he was awarded the Royal Medal of the Royal Society, and in 1870 the Gold Medal of the Société de Géographie de Paris. In 1875 he printed a small volume "On Miracles and Modern Spiritualism." His elaborate work, in two volumes, on "The Geographical Distribution of Animals," was published in 1876, in which year he was President of the Biological Section at the meeting of the British Association at Glasgow. In 1878 he published a volume on "Tropical Nature," containing, besides a description of the equatorial climate and aspects of nature, his views on the colours of natural objects, on sexual selection, the geographical distribution of animals and plants,

and allied topics. In 1880 he published another important work, "Island Life," in which the principles established in the "Geographical Distribution of Animals" are applied to the faunas and floras of the chief islands of the globe, &c. Since then Mr. Wallace has turned his attention to social and political problems, and in 1882 published a volume on "Land Nationalisation, its Necessity and its Aims," in which he gives a sketch of the whole subject of land-tenure; and proposes a practical scheme of occupying ownership under the State in order to remedy the numerous evils of the present system which he has pointed out. To advocate this scheme a Land Nationalisation Society has been formed, of which Mr. Wallace is president. He has also put forth a scheme for the Nationalisation of the Church of England. In 1881 he was awarded a Civil List pension of £200 a year in recognition of the amount and value of his scientific work. The honorary degree of LL.D. was conferred upon him by the University of Dublin in 1882, and that of D.C.L. by the University of Oxford in 1889. The first Darwin Medal of the Royal Society was awarded to him in 1890; he also received the Founder's Gold Medal of the Royal Geographical Society in 1892, and the Gold Medal of the Linnean Society in the same year. In 1889 he published a volume on "Darwinism," perhaps his most important scientific work. It aims at giving a popular, but full and accurate account of the theory of variation and natural selection, as explaining the mode of origin of the existing species of animals and plants, giving much fresh information as to the amount of variation under nature, and as to his reasons for differing on certain points from the teachings of Darwin himself. Mr. Wallace is an opponent of compulsory vaccination, and in 1885 published his "Forty-five Years of Registration Statistics," proving vaccination to be both useless and dangerous. In the latter part of the same year he brought out a small volume entitled "Bad Times: an Essay on the Present Depression of Trade." The last two works are illustrated by means of diagrams and tables. In 1890 Mr. Wallace gave evidence before the Royal Commission on Vaccination; and in 1898 he issued a pamphlet entitled "Vaccination a Delusion, its Penal Enforcement a Crime." This work is founded upon the official evidence published by the Commission, it is illustrated by twelve diagrams, and the author claims to prove that the conclusions of the Royal Commissioners are contradicted by the weight of the best official evidence laid before them. He has also written many pamphlets,

articles, and letters to the daily press on the land and other social questions. New editions of his earlier works have recently appeared; and in 1893 he contributed a volume on "Australia and New Zealand" to the new issue of Stanford's "Compendium of Geography and Travel." His latest work is entitled "The Wonderful Century, its Successes and its Failures," published in June 1898. In it he gives an account of the marvellous material and scientific progress of the century, and also discusses in some detail its various intellectual, social, and moral shortcomings. In 1866 he married Annie, eldest daughter of William Milton, Hurstpierpoint, Sussex. Address: Corfe View, Parkstone, Dorset.

WALLACE, Sir Donald Mackenzie, K.C.I.E., is the son of Robert Wallace, of Boghead, Dumbartonshire, and was born on Nov. 11, 1841. He was educated privately at the Universities of Edinburgh, Berlin, and Heidelberg, and at the École de Droit, Paris. From 1863 to 1884 he was living and travelling in various foreign countries, but mainly in France, Germany, Russia, and Turkey. He acted as Private Secretary to both the Marquis of Dufferin and the Marquis of Lansdowne, whilst Viceroy of India, during the years 1884 to 1889, and he accompanied the Czarewitch as political officer on the occasion of his visit to India and Ceylon in 1890-91. Sir D. Wallace is at the present time director of the Foreign Department of the *Times*; and he is the author of "Russia," 1877, and "Egypt and the Egyptian Question," 1883. He was created a K.C.I.E. in 1887. Addresses: St. Ermin's Mansions, S.W.; and Athenæum.

WALLACE, William, C.M.G., Administrator of the Royal Niger Company's Territories, has been connected with the Company since 1880. He established the important trading stations of Asaba and Assaye. In 1884 when Ogo, the Asaba Chief, massacred some whites here, it was owing to Mr. Wallace's energetic efforts that further calamities were averted. He knows the Niger better than any living man.

WALLER, Lewis, is the eldest son of William James Lewis, C.E., and was born at Bilbao, Spain, in 1860. He was educated at King's College School, London, and in Germany. He made his first appearance on the stage in March 1883, and he has since that time played in the English provinces and at most of the London West End theatres. During the winter of 1895 he undertook the management of the Haymarket Theatre, and he subsequently became co-lessee of the

Shaftesbury Theatre. He has recently been playing in Mr. Tree's company at the Haymarket and Her Majesty's theatres; and amongst the important plays lately produced at those houses, in which he has taken a part, there may be mentioned "Henry IV.," in which he appeared as Hotspur; "The Seats of the Mighty"; "Julius Cæsar," in which he re-created the part of Brutus; and "The Musketeers." Address: 10 Elm Tree Road, N.W.

WALLER, Mrs. Mary Lemon, artist, the wife of Mr. S. E. Waller, the artist, was born at Bideford, in Devonshire, and is the daughter of the Rev. Hugh Fowler, M.A. Her first efforts were with the pen, and writing some quaint little stories she was inspired with the desire to illustrate them. These juvenile efforts were succeeded by attempts with the pencil at portraiture of her family and friends, which appeared to indicate so unusual an ability that she was sent to the School of Art at Gloucester. A careful drawing of the Discobolus secured, in 1871, admission to the Royal Academy Schools. Her introduction to artistic life as an exhibitor also took place in 1871, as in that year she got accepted at the Dudley Gallery a study called "An Unexpected Meeting," a child curiously regarding a snail in a garden walk, but it was not until some years later that Mrs. Waller appeared as an exhibitor at the Royal Academy, with a charming portrait of her little two years' old son. Since then she has been a pretty regular contributor to the parent institution. Her chief works have been a head portrait of Lord Armstrong in the Academy, 1883, and a full-length of his lordship, presented to the town of Newcastle in the same year, a work which was not publicly exhibited. In 1884 she exhibited a portrait of Mildred, daughter of Colonel Tryon, and the following year her "Little Snow-white" greatly added to the artist's reputation. Other works followed: "The Secret of the Sea" and "Rita, Daughter of Wilberforce Bryant, Esq.," 1886; "Dorothy, Daughter of J. G. Leeming, Esq.," 1887; "Lella," 1888, and in the same year "Eve," a child with an apple, exhibited at the Institute, Piccadilly, and reproduced in the Christmas number of the *Illustrated London News*; "Perdita," a portrait, in 1889, and in the Grosvenor Gallery, "Girl Fencing"; whilst in the Academy (1890) she had "Gladys, Daughter of Major Lutley Jordan"; in 1896, "Spring Voices"; and "Vivian, Son of S. George Holland, Esq.," 1898. Other works of hers are "Mrs. Montague," in the Grosvenor Gallery, 1888, and "The Rev. Alfred Gatty, D.D.," Sub-Dean of York, and in the Academy of 1893 a portrait

of the Countess Fitzwilliam. Address: 58 Circus Road, St. John's Wood, N.W.

WALLHOFEN, Madame, née **Pauline Lucca**, a celebrated singer, born of Jewish parents in Vienna, in 1842. When still a child her beautiful voice attracted attention and procured for her a musical training by Uschmann and Lévy. She made her début at Olmütz in 1859; and in 1860 sang at Prague in the opera of the "Huguenots," and in "Norma." Her genius elicited the admiration of the great composer, Meyerbeer, who in 1861 procured for her an engagement in Berlin. In 1863 she appeared at Covent Garden for the first time; and she soon made herself a name in all the European capitals. In Berlin she received the appointment of Court singer; but resigned it in 1872, and went for a two years' tour through the United States. Since her return she has resided chiefly in her native city, Vienna. She married, in 1865, the Baron von Rohden, from whom she was divorced, and married Herr von Wallhofen.

WALLIS, Henry, member of the Royal Society of Painters in Water-Colours, was born in London, Feb. 21, 1830, and studied in the Art School of Gleyre, Paris, and also at Rome and Venice. His first picture (in oil colour) was exhibited at the British Institution, 1851. He exhibited at the Royal Academy, in 1854 and succeeding years, pictures in oil representing incidents in the lives of celebrated personages, subjects from the poets, landscapes, and scenes of Venetian life of the period of the fifteenth century. His most celebrated work was "The Death of Chatterton." He joined the Royal Society of Painters in Water-Colours in 1879, the pictures exhibited at the gallery of the society being mainly scenes from "The Merchant of Venice," and Italian and Oriental subjects. He has published "Notes on Early Persian Vases," 1885-89; "Persian Ceramic Art," vol. i. 1891, vol. ii. 1893; "Pictures from Greek Vases," 1896. He has also contributed papers to artistic and other journals on the history of painting and on ceramic art, also reviews of books on art. He has travelled much, and has been an excavator in Italy, Sicily, and Egypt. Club: Burlington Fine Arts.

WALLON, Henri Alexandre, was born at Valenciennes, Dec. 23, 1812, was member of the Faculty of Letters, Paris, in 1840, and successor to M. Guizot at the Sorbonne in 1850, where he lectured on history and geography. In 1860 he gained the Gobert Prize of the French Academy for his work on Joan of Arc. He was a

Member of the National Assembly in 1849, but resigned in 1850. After the fall of the Empire he was again returned, as a moderate Conservative, by the Department of the Nord, but he joined the Lavergne group on the question of the Constitutional Laws. To his moderation and vigour was due the definite establishment of the Republic—indeed, he is still commonly called Father of the Republic—and accordingly M. Buffet, on forming his administration in March 1875, nominated him Minister of Public Instruction. It was he who proposed the clauses which first gave constitutional shape to the Republic. M. Wallon is a Member of the Institute, and Secrétaire perpétuel de l'Académie des Inscriptions et Belles-Lettres. He was a candidate for the seat in the French Academy that had been vacated by M. Claude Bernard, but M. Renan defeated him by 19 to 15 (June 13, 1878). He was promoted to be a Commander of the Legion of Honour in 1886. M. Wallon is a sound historian. His chief works are "Richard II.," "Histoire de l'Esclavage dans l'Antiquité" (3 vols.); "Jeanne d'Arc"; "St. Louis et son Temps" (2 vols.); "De l'Autorité de l'Evangile" (1 vol.); "Le Tribunal Révolutionnaire de Paris" (6 vols.), 1886; "La Révolution du 31 Mai et le Fédéralisme en 1793" (2 vols.); "Les Représentants du Peuple en Mission et la Justice Révolutionnaire dans les Départements en l'An II." (5 vols.), 1889-90. Paris address: 25 Quai de Conti.

WALPOLE, Sir Horatio George, K.C.B., Assistant Under-Secretary for India, was born in 1843, and is the second son of the Right Hon. Spencer Walpole, Q.C., and Isabella, daughter of the Right Hon. Spencer Perceval. He was educated at Eton, and received his present appointment in 1883. He was created K.C.B. in 1892. Club: Athenæum.

WALPOLE, Sir Spencer, K.C.B., Hon. LL.D. Edin., late Lieut.-Governor of the Isle of Man, eldest son of the Right Hon. S. H. Walpole, and his wife, Isabella, daughter of the Right Hon. Spencer Perceval, was born Feb. 6, 1839, and educated at Eton. He entered the War Office in 1858, and has been Private Secretary to the Right Hon. T. Sotheron Estcourt, and to his father. He was made one of her Majesty's Inspectors of Fisheries in 1867, and was appointed Lieut.-Governor of the Isle of Man in 1882. He held that position till 1893, when he was made Secretary to the Post Office. Sir Spencer Walpole was a member of the Tweedmouth Committee, which inquired into the grievances of the men in the postal service, and he was also a member of Lord Rothschild's Committee

on Old-Age Pensions. He attended, in 1897, the General Postal Congress at Washington as the chief representative of the British Post Office. In January of 1899 he retired from the Secretaryship to the Post Office, having reached the age of sixty, at which he is entitled to claim his pension. He was created a K.C.B. in 1898. He received an honorary LL.D. degree from the University of Edinburgh in 1890. He is the author of the "Life of the Right Hon. Spencer Perceval," 1873; "The Electorate and the Legislature," 1881; "Foreign Relations," 1882; "A History of England from the Conclusion of the Great War in 1815," vols. i. and ii. 1878, vol. iii. 1880, vols. iv. and v. 1886; the "Life of Lord John Russell," 1889; and "The Land of Home Rule," 1893; and he has been a contributor to periodical literature. Sir Spencer Walpole married, in 1867, Marion, the youngest daughter of Sir John Digby Murray, Bart. Addresses: 14 Queen's Gate Place, S.W.; and Athenæum.

WALBROND, The Right Hon. Sir William Hood, Bart., M.P., D.L., J.P., was born on Feb. 26, 1849, and succeeded his father as 2nd Baronet in 1889. He was educated at Eton, and obtained a commission in the Grenadier Guards; he became a captain in 1871, but he retired in the following year. He was elected Conservative member for East Devon in 1880, and again in 1885 was returned in the same interest for the Tiverton Division of the county, a constituency which he has since continued to represent. Sir W. Walbrond was a Junior Lord of the Treasury from 1885 to 1886, and again from 1886 to 1892; he has acted as second Conservative Whip from 1885 to 1886, and from 1886 to 1895, since which date he has been Patronage Secretary to the Treasury, and Senior Conservative Whip. In August 1898 he was, together with his fellow-whips, presented with a handsome testimonial by members of the House of Commons, Mr. Balfour making the presentation. He is Hon. Colonel of the 1st Devon Rifle Volunteers, and he is a D.L. and a J.P. for that county. He was sworn of the Privy Council on Jan. 1, 1899. He was married, in 1871, to Elizabeth, heiress of the late James Pitman, of Dunchidcock House, Devonshire. Addresses: 65 Cadogan Square, S.W.; and Bradfield, Cullumpton, Devon.

WALSH, Right Rev. William, M.A., Hon. D.D., only son of William Walsh, of Chatham, was educated at St. Alban's Hall, Oxford, where he graduated B.A. in 1859, and M.A. in 1862. Ordained in 1860, he was successively curate of Horsell, Surrey, from 1860 to 1863, and

of Upper Chelsea from 1863 to 1865. For the next five years he was Associated Secretary of the Church Missionary Society for Kent, Sussex, and Surrey; and from 1870 to 1873 he was Superintendent of Missionaries and Clerical Secretary of the L.D.H.M. He was perpetual curate of St. Andrew's, Watford, from 1873 to 1878, Chaplain in Rome from 1878 to 1879, and was preferred to the Vicarage of St. Matthew, Newington, Surrey, in 1879. Mr. Walsh was again, in 1886, appointed Superintendent of Missionaries and Clerical Secretary of the L.D.H.M., and he was made a Prebendary of St. Paul's Cathedral in 1889. Two years later he was consecrated Bishop of Mauritius; but in 1897 he returned to England, where he received the appointment of Archdeacon and Canon of Canterbury, and in 1898 he became Suffragan Bishop of Dover. He is the author of "Progress of the Church in London during the last Fifty Years," 1887. Addresses: The Precincts, Canterbury; and Athenæum.

WALSH, The Most Rev. Dr. William J., Roman Catholic Archbishop of Dublin, and Primate of Ireland, was born in Dublin on Jan. 30, 1841, and was educated at St. Laurence O'Toole's Seminary in that city, and afterwards at the Catholic University of Ireland, under the rectorship of Dr. Newman, and at Maynooth. He completed his academic course in 1864, but being too young to be ordained, he passed into the Dunboyne Establishment, where he spent three years in special ecclesiastical studies. During that period he became Assistant-Librarian at Maynooth College, and in 1867 he was appointed Professor of Theology. In 1878 he became Vice-President of the College, and on the death of Dr. Russell, in 1880, Dr. Walsh was unanimously chosen President by the Irish bishops. Acting for the bishops as trustees of the College, he gave evidence before the "Bessborough" Commission of 1869-70, explaining the refusal of the bishops, as tenants of the Duke of Leinster, to sign the "Leinster Lease," a form of agreement under which it was sought to induce tenants to "contract themselves out" of the protection of the Land Act of 1881. By this evidence on the transaction, which had resulted in the eviction of the bishops by the Duke of Leinster, Dr. Walsh exercised no little influence in the framing of the Land Act of 1881. In 1883, through his exertions, a Commission was appointed to inquire into the working of the Queen's Colleges of Ireland. For some time he was a Senator of the Royal University of Ireland, a position which he resigned in protest against the examination arrangements of

that body. He became a Member of the Chapter of Dublin on the accession of Cardinal MacCabe to the archiepiscopal throne. On the death of that prelate in February 1885, Dr. Walsh was elected Vicar Capitular; and in the June of the same year he was appointed to the See of Dublin. Since his appointment as Archbishop he has taken an active interest in the leading questions of the day in Ireland. He has warmly advocated an amicable settlement of the Land Question through the establishment of some system of arbitration for the settlement of disputes between landlords and tenants. He was a witness before the Parnell Special Commission of 1888-89, in connection with which he also had a prominent part in the exposure of the forger, Richard Pigott. He gave important evidence before the Evicted Tenants Commission in 1892, in the course of which he insisted strongly on the injurious bearing of our present monometallic system of currency upon the agricultural interest, especially in Ireland under the land legislation of 1881 and subsequent years. But the principal subject of Dr. Walsh's public action, outside the strictly religious sphere, has been the Irish education question: he has made many suggestions for its settlement, the keynote of his numerous letters and addresses on the subject being a demand for equality between Roman Catholics and Protestants in Ireland in the matter of educational endowments and privileges. He has also taken an active part in the settlement of trade disputes and strikes in Dublin: he opportunely intervened in the great strike on the Great Southern and Western Railway in 1890, and secured its amicable settlement, a public service for which he has received the honorary freedom of the city of Cork. His interest in the cause of temperance is warm and practical; in addition to a widespread temperance organisation in the diocese of Dublin, there has been created under his guidance a similar organisation throughout all the dioceses of his archiepiscopal province. In addition to his appointment as a member of the Senate of the Royal University of Ireland, a position which he resigned in 1884, he has been appointed by successive Governments to various public positions of importance; since 1892 he has been a Commissioner of Intermediate Education in Ireland; since 1893, a Commissioner of Charitable Donations and Bequests; and since 1895, a Commissioner of National Education in Ireland. As a Commissioner of National Education he has laboured strenuously to effect a reform of the existing system of primary education in Ireland by the introduction of various suitable forms of manual training,

and other changes in the direction of practical usefulness to the children attending the National schools. He has also taken a prominent part in the work of a Commission issued by the Lord Lieutenant of Ireland in 1897, for the investigation of this subject of educational reform. Dr. Walsh has contributed many articles to the periodical press, especially to the *Contemporary Review*, the *Dublin Review*, and the *Irish Ecclesiastical Record*. He is also the author of several works on subjects of general public interest in Ireland, as well as on important branches of theological and scriptural science. Of his published works the principal are an ethical treatise in Latin on "Human Acts," a "Harmony of the Gospel Narrative of the Passion," "The Liturgical Music of the Office and Mass of the Dead," a "Grammar of Gregorian Music," a "Plain Exposition of the Land Act of 1881," "Bimetallism and Monometallism," a volume of addresses on various subjects of general interest, "Addresses on the Irish University Question," a "Statement of the Chief Grievances of the Catholics of Ireland in the Matter of Education, Primary, Intermediate, and University," and his most recently published work, "The Irish University Question," 1897. His address is: Archbishop's House, Dublin.

WALSH, The Right Rev. William Pakenham, D.D., Bishop of Ossory, Ferns, and Leighlin, was born at Mote Park, county of Roscommon, Ireland, May 4, 1820, and is the son of Thomas Walsh and Mary Pakenham Walsh. He was educated at Trinity College, Dublin; was Vice-Chancellor's Prizeman; Biblical Greek Prizeman; Divinity Prizeman; Theological Society's Gold Medallist of Dublin University; B.A. 1841; M.A. 1853; B.D. and D.D. stip. con. 1873; ordained Deacon, 1843; Priest 1844; Curate of Ovoca, 1843; of Rathdrum, 1845; Chaplain of Sandford, 1856; Donellan Lecturer, T.C.D., 1861; Canon of Christ Church, Dublin, 1872; Dean of Cashel, 1873; and elected Bishop of Ossory, 1878. The following is a list of his published works; "Donellan Lectures," 1861, T.C.D.; "The Moabite Stone," and "The Forty Days of the Bible," 1874; "The Angel of the Lord," and "Daily Readings for Holy Seasons," 1876; "Ancient Monuments and Holy Writ," 1878; "Heroes of the Mission Field," 1879; "The Decalogue of Charity," 1882; "Echoes of Bible History," 1886; "The Voices of the Psalms," 1891. He married, in 1861, Clara, daughter of Samuel Ridley, Esq., Muswell Hill, London; secondly, in 1879, Annie Frances, daughter of Rev. J. W. Hackett, A.M., Incumbent of St. James's, Bray, co. Dublin. Club: Grosvenor.

WALSHAM, Sir John, Bart., K.C.M.G., D.L., late British Minister at Peking, born at Cheltenham on Oct. 23, 1830, is the eldest son of Sir John James Walsham, the 1st Baronet, whom he succeeded in 1874. He was educated at Trinity College, Cambridge, where he took the degree of M.A., and was for some time employed in the Audit Office, but was appointed to a clerkship in the Foreign Office in 1854. He was made Acting Consul in Mexico in 1859, Secretary of Legation in 1861, and Chargé d'Affaires in 1863. In 1866 he was transferred as Second Secretary to Madrid; was appointed to the Hague in 1870, and promoted to be Secretary of Legation in Peking, October 1873, but did not proceed. From 1875 to 1878 he was Acting Chargé d'Affaires in Madrid, and then went to Berlin as Secretary of Embassy. In 1883 he was transferred to Paris, and acted as Minister Plenipotentiary during the absence of the ambassador. From November 1885 to April 1892 he was Envoy to China, and also to the King of Corea, but in the latter year was transferred to Bucharest. He retired on a pension in 1894. C.M.G., February 1895; K.C.M.G., 1895. He married, in 1867, Florence, only daughter of the Hon. P. Campbell Scarlett, C.B. Address: Knill Court, Kingston, Herefordshire.

WALSHAM, William Johnson, F.R.C.S., received his medical education at St. Bartholomew's Hospital, London, and at the University of Aberdeen, of which he is M.B. and C.M. He was formerly Demonstrator in Orthopædic Surgery at St. Bartholomew's Hospital, and is now Surgeon and Lecturer on Surgery at St. Bartholomew's, Examiner in Surgery at the Royal College of Surgeons, England, Consulting Surgeon at the Metropolitan Hospital, &c., Fellow of the Royal Medico-Chirurgical Society, and Member of the Medical Society, &c. He has published "Surgery: its Theory and Practice" (6th edit.); "Surgical Pathology" (2nd edit.); "Deformities of the Foot," and "Nasal Obstruction." He is editor of Smith's "Operative Surgery" and of the "St. Bartholomew's Hospital Reports," and has contributed to Treves's "Manual of Surgery," Heath's "Dictionary of Surgery," and largely to the *Transactions of the Medical Society*, and the Reports of his own Hospital. Address: 77 Harley Street, W.

WALSINGHAM, Lord, Thomas de Grey, M.A., LL.D., F.R.S., D.L., J.P., was born on July 29, 1843, and succeeded his father as 6th Baron in 1870. He was educated at Eton and Trinity College,

Cambridge. He sat in the House of Commons as Conservative Member for West Norfolk from 1865 to 1870, and he served the office of Lord-in-Waiting from 1874 to 1875. Lord Walsingham has been High Steward of the University of Cambridge since 1891; he is also High Steward of the borough of King's Lynn, and is a Trustee of the British Museum. He was married, in 1877, to Augusta, daughter of Captain W. Locke, and widow of Lord Burghersh. Addresses: Eaton House, Eaton Square, W.; and Merton Hall, Thetford.

WALTER, Arthur Fraser, eldest surviving son of the late John Walter of Bearwood, Berks, and Emily Frances, his wife, was born on Sept. 12, 1846, at Waterloo Lodge, near Wokingham. Educated at Eton, and Christ Church, Oxford, he was called to the Bar at Lincoln's Inn. He is a D.L. and J.P. for Berks, Lieutenant for the City of London, Lieutenant-Colonel Commandant of the 1st Volunteer Battalion of the Royal Berkshire Regiment, and High Steward of Wokingham. He married, in October 1872, Henrietta Maria, eldest daughter of the Rev. T. Anchtel Anson, Rector of Longford, near Derby. Address: Bearwood, Wokingham.

WALTER, Sir Edward, K.C.B., is the son of the late John Walter, M.P., of Bearwood, Berks, and was born on Dec. 9, 1823. He was educated at Eton and Exeter College, Oxford, and he subsequently obtained a commission in the 44th Regiment. Becoming a Captain in 1847, he exchanged into the 8th Hussars in the following year, and retired from the army in 1853. Mr. Walter, as he was at that time, originated the idea of forming a Corps of Commissioners, which was accordingly started in 1859, and has been ever since a marked success. For his services in this connection he received the thanks of the Duke of Cambridge, and he was, in 1884, presented with a testimonial by the officers of the Army and Navy. He was created a K.C.B. in 1887, and he was married, in 1853, to Mary, daughter of J. C. Althorpe, of Dinnington Hall, Yorkshire. Sir Edward Walter still holds the position of Commanding Officer of the Corps of Commissioners. Addresses: Barracks of the Corps, the Strand, W.C.; and Sarisbury Court, Southampton.

WALTERS, The Rev. Frank Bridgman, Principal of King William's College, Isle of Man, Examining Chaplain to the Bishop of Sodor and Man, was born on Nov. 30, 1851, at Buckland Monachorum, N. Devon, and is the son of the Rev. J. T. Walters, Rector of Buckland

Monachorum. He was educated at Up-pingham School, and was Scholar of Queen's College, Cambridge, where he graduated in Mathematical Honours in 1877, being eighth Wrangler bracketed. He was elected Fellow of Queen's College in 1877, ordained Deacon by the Bishop of Ely in 1885, priest in 1886, and was Master at Clifton College 1878 to 1881, and House-Master at Dover College 1881-86. He was appointed to the Principalship of King William's College in 1886. He is joint-author, with Arthur Cockshott, of a "Treatise on Geometrical Conics." He married, in 1878, Frances, youngest daughter of the late Patrick Beales, of Cambridge. Address: King William's College, Isle of Man.

WALTON, John Lawson, Q.C., M.P., is the son of the Rev. John Walton, M.A., formerly Wesleyan missionary in Ceylon, and afterwards President of the Wesleyan Conference for Great Britain and South Africa, and was born in 1852. He was educated at Merchant Taylors' School, and at the London University, where he was First Prizeman in Common Law. He was called to the Bar at the Inner Temple in 1877, and joined the North-Eastern Circuit. He was appointed a Q.C. in 1890, and was elected a Bencher of his Inn in 1897. Mr. Walton unsuccessfully contested Central Leeds in the Liberal interest in 1892, but in the same year he was returned to the House of Commons as Liberal member for South Leeds, a constituency which he has since continued to represent. He is a famous cross-examiner, and in Parliament a rising orator. In February 1898 he made an important speech in the House, in connection with his indictment of the Indian frontier policy of the Government. He was married, in 1882, to Joanna, daughter of the late Robert Hedderwick, founder of the *Glasgow Citizen*. Address: 5 Paper Buildings, Temple, E.C.

WALTON, Joseph, Q.C., was born in 1845, and was called to the Bar at Lincoln's Inn in 1868, becoming a Bencher in 1896. In 1895 he was appointed Recorder of Wigan, and in June 1899 was elected Chairman for the ensuing year of the General Council of the Bar, Mr. C. M. Warmington being appointed Vice-Chairman. He is at present engaged in a long tour through China and Japan. He has published "Practice and Procedure of Court of Common Pleas at Lancaster," a work now in its second edition. Address: 1 Garden Court, Temple, E.C.

WANKLYN, James Alfred, M.R.C.S., London, 1856, chemist, was born

at Ashton-under-Lyne, in the year 1834. He studied chemistry under Bunsen at Heidelberg, and became Demonstrator of Chemistry in the University of Edinburgh in 1859, was Professor of Chemistry at the London Institution from 1863 to 1870, and Lecturer on Chemistry and Physics at St. George's Hospital from 1877 to 1880. He has held office as Public Analyst for the county of Buckingham, and for the boroughs of Buckingham, Peterborough, Shrewsbury, and High Wycombe. In the year 1856, whilst he was assistant to Dr. Frankland, he turned his attention to the organo-metallic bodies, and, treading in the footsteps of that eminent chemist, produced cadmium-ethyl by the well-known method of acting upon iodide of ethyl by the metal. Next year he devised an original and entirely new method of obtaining the organo-metallic bodies, and produced first sodium-ethyl, and continuing the work during the next few years, formed potassium-ethyl, lithium-ethyl, calcium-ethyl, and strontium-ethyl. These substances are the most combustible known to chemists, and possess the unique property of decomposing carbonic acid at ordinary temperatures, and by their action on carbonic acid yield propionic acid, as was shown in 1858 when Professor Wanklyn made propionic acid in that manner, giving the first example of the artificial production of an organic substance directly from carbonic acid. In 1861, in conjunction with the late Lord Playfair, then Dr. Lyon Playfair, he communicated to the Royal Society of Edinburgh a paper "On a Mode of taking the Density of Vapours of Volatile Liquids at Temperatures below the Boiling-Point." Subsequently he pursued, conjointly with Dr. Emil Erlenmeyer, a series of researches which, besides settling the formula of mannite and the relation of the sugar group to the alcoholic series, afforded one of the earliest complete studies of isomerism among the alcohols. In 1867 he prepared propione, by the action of carbonic oxide on sodium-ethyl, and together with the late Mr. E. T. Chapman and Mr. Miles H. Smith invented the well-known ammonia process of water analysis. Some years later, conjointly with Mr. W. J. Cooper, he brought out the moist combustion process. In 1871 he conducted for the Government an investigation into the quality of the milk supplied to the London workhouses. Conjointly with Mr. W. J. Cooper, he made periodical analyses of the London Water Supply, which were regularly published by the late Government's Water Examiner in his official returns. Mr. Wanklyn is author of five text-books for Chemists and Medical Officers of Health, viz. : a "Treatise on Water Analysis," a "Treatise on

Milk Analysis," 1873; a "Treatise on Tea, Coffee, and Cocoa," 1874; "Bread Analysis," 1881; and "Air Analysis," 1890, the two last-named books being the joint production of Mr. W. J. Cooper and himself. He is also the author of "The Gas Engineer's Chemical Manual," 1886. In 1859 he was elected a corresponding member of the Royal Bavarian Academy of Sciences. He was also elected an honorary member of the University of Edinburgh Chemical Society; but he belongs to none of the English scientific societies.

WANTAGE, Lord, Robert James Loyd-Lindsay, Q.C., K.C.B., is the second son of the late Lieut.-General James Lindsay, of Balcarres, Fife, and was born on April 17, 1832. He was educated at Eton, and then entered the army. Obtaining a commission in the Scots Fusilier Guards in 1850, he was engaged throughout the Crimean War, and was decorated with the Victoria Cross as a reward for his bravery at Alma and Inkerman. He became Lieutenant-Colonel of the Scots Guards in 1857, and eventually retired from the army. He served as Equerry to the Prince of Wales in 1859, was Colonel of the Royal Berkshire Volunteers from 1860 to 1895, and Colonel of the Hon. Artillery Company from 1866 to 1881. He sat in the House of Commons as member for Berkshire from 1865 to 1885, and was Financial Secretary to the War Office, in Lord Beaconsfield's Government, from 1877 to 1880; he was raised to the Peerage in 1885, under the title of Baron Wantage. He served as Chairman of the Committee of Inquiry on Recruiting in the Army in 1890, and he was a Member of the Royal Patriotic Fund Commission. Lord Wantage was Chairman of the English Red Cross Society, and in this connection he entered Paris during the siege of October 1870, and was present during the Turco-Servian War of 1876. An extensive landowner in Berkshire and other counties, he conducts himself the farming of a large part of his estates, and in 1894 he gave evidence before the Royal Commission on Agriculture, and also before the Royal Commission on Agricultural Holdings, presided over by Mr. Chamberlain. He is the Lord-Lieutenant of Berkshire, a Brigadier-General of Volunteers, and Extra Equerry to the Prince of Wales. Lord Wantage has published articles in the *Nineteenth Century* and in other periodicals upon Volunteer matters, on the Red Cross Society, and on farming and estate management. Addresses: 2 Carlton Gardens, S.W.; Lockinge House, Wantage, Berks; and the Athenæum.

WARD, Adolphus William, Litt.D., Hon. LL.D., born at Hampstead, Dec. 2, 1837, was educated in Germany (where his father held Consular and diplomatic appointments), and at Bury St. Edmunds Grammar School. In 1854 he entered at Peterhouse, Cambridge, of which College he became a Fellow in 1860, having graduated in the Classical Tripos of the previous year. In 1866 he was appointed Professor of History and English Literature at Owens College, Manchester. He held various Examinerships in the Universities of Cambridge and London, and was in 1879 created an hon. LL.D. of Glasgow, and in 1883 a Litt.D. of Cambridge. He took an active part in the movement for the foundation of the Victoria University, Manchester, 1889; and afterwards successively held, in the new University, the offices of Chairman of the General Board of Studies, and (during three periods) of Vice-Chancellor. In December 1888, he was appointed Principal of Owens College. He resigned the Principalship at the close of 1897. On the occasion of his resignation the freedom of the city of Manchester was conferred upon him. Dr. Ward is the English translator of Curtius's 'History of Greece,' 5 vols., 1868-73; and author of the following works: "A History of English Dramatic Literature to the Death of Queen Anne," 2 vols., 1875; "The House of Austria in the Thirty Years' War," 1869; "Chaucer," 1880; and "Dickens," 1882, in Morley's English Men of Letters series. He edited the Globe edition of "Pope's Poetical Works," 1869; the Clarendon Press edition of Marlowe's "Doctor Faustus" and Greene's "Friar Bacon," 1878 (2nd edit. 1887, 3rd edit. 1892); the Chetham Society's edition of Byron's Poems, 2 vols., 1894-5; "Sir Henry Wotton," a biographical sketch, 1898; and has contributed to the "Dictionary of National Biography," the "Encyclopædia Britannica," the *Quarterly*, *Edinburgh*, and *English Historical Reviews*, *Herbst's Encyclopædia der neueren Geschichte*, the *Saturday Review*, the *Manchester Guardian*, and other journals. He is Litt.D. of the University of Cambridge, Hon. Litt.D. of the Victorian University, and Hon. LL.D. of the University of Glasgow, a Life Governor of the Owens College, Manchester, an Hon. Fellow of Peterhouse, and Hon. Member of the German Shakespeare Society. In 1879 he married Adelaide Laura, daughter of the Rev. J. B. Lancaster, late Rector of Grittleton, Wilts. Addresses: The Hollies, Fallowfield, Manchester; and Athenæum.

WARD, Professor Harry Marshall, D.Sc., F.R.S., F.L.S., F.R.H.S.,

Professor of Botany in the University of Cambridge, is the eldest son of Francis Marshall Ward, Esq., and was born in 1854, and educated at the Owens College, Manchester, and at Christ's College, Cambridge. He commenced his scientific career as a Field Botanist, after the model of the older school of naturalists, his studies being incited by his early life having been spent in the country. About 1870 he came under the influence of Darwin's writings and teachings, and in 1874 he entered more formally on a scientific career by attending Professor Huxley's Biology course at South Kensington. Since that period he has worked especially as a Cryptogamic and Physiological Botanist and Pathologist. In 1875 he entered the Owens College Manchester, and obtained distinctions under Professors Roscoe, Gamgee, and Williamson. In 1876 he gained an entrance Scholarship in Natural Science at Christ's College, Cambridge, and remained a scholar of that College until 1879, when he took his B.A. degree, having obtained first class honours in the Natural Science Tripos for that year. He proceeded to the M.A. degree in 1885, and in 1892 was made Doctor of Science of the University of Cambridge. Meanwhile he had assisted in the teaching of Botany at South Kensington, and at the Owens College, and had delivered a course of lectures on Botany at Newnham College, Cambridge. Besides coming under the influence of the late F. M. Balfour and others at Cambridge, he had also studied in Germany during vacation, and especially in the laboratories of Professor Sachs of Würzburg; he had also published the results of original investigations into the embryology of Angiospermous flowering plants, the researches having been carried out in the laboratory at Würzburg and in the Jodrel laboratory at Kew. Immediately after taking his degree in 1879, Mr. Ward was appointed by the Colonial Government to proceed to Ceylon on a scientific mission, to investigate and report upon the causes of the coffee leaf disease, which was then devastating that island. This investigation occupied two years, and he returned to England in 1882, having meanwhile published several Reports and Memoirs on his discoveries connected with the parasitic fungus which caused that disease, and the measures necessary to combat its ravages, as well as on other botanical subjects. During his travels in the tropics he also made observations and collected material and notes for subsequent publications. Some of the principal were on the structure and morphology of Asterina, and of Meliola, and other tropical fungi, and especially of the curious epiphyte Strigula, an epiphyllous lichen. On his return in

1882 he was elected a Berkeley Fellow of the Owens College, Victoria University, and in 1883 he was appointed Assistant-Lecturer in Botany in that University; in the same year he was also elected to a Fellowship at Christ's College, Cambridge, of which College he is now an Honorary Fellow, and Professorial Fellow of Sidney Sussex College, Cambridge; and in 1885 was appointed Professor of Botany in the then newly-founded Forestry School at Cooper's Hill. His election to the Chair of Botany in Cambridge took place in 1895. Prof. Marshall Ward is a Fellow of the Royal Society, and has served on the Council of that body and of the Linnean Society, and on the Scientific Committee of the Horticultural Society; of both Societies he is also a Fellow. In 1890 he delivered the Croonian Lecture before the Royal Society, and in 1892 served as the delegate of that body at the International Botanical Congress at Genoa. He is an Honorary Fellow of the Manchester Literary and Philosophical Society, of the Botanical Society of Edinburgh, and of the Institute of Brewing. He has lectured for the Royal Institution, the Sunday Lecture Society, and various public institutions. He was for several years Recorder of Section D of the British Association, has served on the Council, and in 1897 was President of Section K at the meeting in Toronto. He has been an Examiner in Botany in the Universities of London and of Edinburgh, has examined in Botany for the Natural Sciences Tripos and other examinations in the Universities of Cambridge and Oxford, and for the Civil Service Commissioners, and the Science and Art Department. He has been Governor of the South-Eastern Agricultural College at Wye, in Kent, since 1893. Prof. Marshall Ward is the author of numerous scientific memoirs read before the Royal Society and the Linnean Society, and published in the *Philosophical Transactions* and the *Proceedings of the Royal Society*, or in the *Transactions* and the *Journal of the Linnean Society*, and in the *Annals of Botany*, the *Quarterly Journal of Microscopical Science*, *Science Progress*, *Nature*, and elsewhere. These memoirs comprise investigations into the embryology, physiology, and pathology of plants, and especially the biology of Fungi, Bacteria, and other Cryptogams, the nature of parasitism, fermentation, and other subjects connected with the diseases of plants. The earlier of these researches were made in the laboratories at Kew and Würzburg, and in those of the late Prof. De Bary at Strasburg, and of the Owens College; later ones have been made in the laboratories at Cooper's Hill and at Cambridge. Of these, the following are the most important: "The Structure and Life-history of Enty-

loma Ranunculi"; "Histology and Physiology of Fruits and Seeds of Rhamnus" (with Mr. Dunlop); "Tubercular Swelling on the Roots of Vicia Faba"; "The Bercles on the Roots of Leguminae and &c."; "A Lily Disease"; and paper "The the Potato Disease and on the R. 1886. Wheat; on "The Ginger-Beer Producing the Organisms composing it"; "Bacteriology of Bacillus Ramosus"; "The Seed of Stereum Hirsutum"; "The Flora of the Thames"; "A Violent helus," &c. His more recent investigations have been concerned particularly with bacteriology of water, and the action of solar and electric light as agents destroying bacteria, the results of which appeared in a series of papers read before the Royal Society during recent years. For his researches into the biology of fungi and bacteria, the Royal Society, 1893 awarded him a Royal medal. In addition to the more special memoirs referred to, he is the author of the following books: "Timber and some of its Diseases" (Nature Series), "The Diseases of Plants" (Romance of Science Series), "The Oak" (Modern Science Series), and the new edition of Laslett's "Timber and Timber Trees." He also translated Sachs' "Lectures on the Physiology of Plants," for the Oxford Clarendon Press, and wrote the article "Schizomycetes" in the "Encyclopædia Britannica," the "Notes on British Trees," in Schlich's "Manual of Forestry," the lecture on "Diseases of Conifers" for the Conifer Congress of the Royal Horticultural Society, and that on "Symbiosis and Symbiotic Fermentations" for the Institute of Brewing in 1892, and has been a frequent contributor to the pages of *Nature*, the *Gardeners' Chronicle*, the *Journal of Botany*, and other periodicals. Prof. Marshall Ward married, in 1883, the daughter of the late Francis Kingdom, Esq., of Exeter. Address: Botanical Laboratory, New Museum, Cambridge.

WARD, Mrs. Herbert D., née Elizabeth Stuart Phelps, American writer, was born at Boston, Massachusetts, Aug. 31, 1844. Most of her life has been devoted to benevolent work, the advancement of women, and to temperance and kindred topics. In 1876 she delivered a course of lectures before the students of Boston University. She began to write for the press at the age of thirteen, her contributions to periodicals during past twenty-five years have been numerous. In addition to these she published: "Ellen's Idol," 1864; "Hill," 1865; "The Tiny Series," 4 v. 1866-69; "The Gypsy Series," 4 v. 1866-69; "Mercy Gliddon's Work," 1

"I Don't Know How," 1867; "The Gates Ajar," 1868; "Men, Women, and Ghosts," 1869; "Hedged In," "The Silent," and "The Trotty Book," 1870; his father's Wedding Tour," and "What to appoint," 1873; "Poetic Studies," poems, 1873; "The Story of Avis," 1877; "My Peter and I," "Old Maid's Paraphrase," and "Sealed Orders," 1879; "A Duet," 1881; "Beyond the Vicious," "Dr. Zay," 1884; "Bur-Professor's Paradise," and "The Madonna," 1886; "The Gates Between," 1887; "A Fisherman," 1887; "A Counter," poem, 1889; "The Struggle in 1879," "mortality," 1889; "A Singular and in 1895; "Chapters from a Life," 1899; "The Story of Jesus Christ," 1897. In 1889 she was married to Herbert D. Mann, and, in conjunction with him, published in 1890, "The Master of the Officials" and "Come Forth." Her father, Austin Phelps, her father, was issued in 1891.

WARD, John Quincy Adams, American sculptor, was born at Urbana, Ohio, June 29, 1830. In 1850 he entered the studio of the late H. K. Brown, an eminent sculptor, where he remained six years. In 1861 he opened a studio in New York, where he modelled his "Indian Hunter," "The Good Samaritan," Commodore M. C. Perry, with reliefs, "The Freedman," and many busts and small works. In 1869 he built a studio in Forty-ninth Street, New York, where he made the "Citizen Soldier," and statues of Shakespeare, Gen. Reynolds, Gen. Washington, Gen. Israel Putnam, an equestrian statue of Gen. Thomas, Gen. Daniel Morgan, and Lafayette. He built a larger studio in 1882, where he has made the colossal statue of Washington for the New York Sub-Treasury building, a colossal statue of President Garfield, with three typical figures on the pedestal; "The Pilgrim"; a statue of Henry Ward Beecher, with accessory statues, a seated statue of Horace Greeley, &c. He visited Europe in 1872, and again in 1887. For three years he was Vice-President, and for one term President, of the National Academy of Design.

WARD, Mary Augusta, or, as the author of "Robert Elsmere" prefers to give her name on the title-page of her books, Mrs. Humphry Ward, is a granddaughter of Dr. Arnold, of Rugby. Matthew Arnold was his eldest son. The law son, another Thomas Arnold, the father of Mrs. Ward, at one time held an educational position in Tasmania. There she married the granddaughter of Governor Wall, and there, at Hobart, several of his children were born, among them (in 1851)

his eldest daughter, Mary Augusta. Mrs. Ward, who at that time devoted much attention to early Spanish literature and history, contributed a large number of articles on Spanish subjects to the "Dictionary of Christian Biography," edited by Dr. William Smith and Dr. Wace. She also, up to 1885, wrote many critical articles for *Macmillan's Magazine*. Her first volume was a child's story—"Milly and Olly," 1881, illustrated by Mrs. Alma Tadema. Her first novel was "Miss Bretherton," 1884, which was favourably received but made no particular noise in the literary world. The story is a mere sketch by the side of the later novel. Mrs. Ward's next volume was the translation (1885), of that very remarkable book, Amiel's "Journal Intime." In February 1888, she published her novel of "Robert Elsmere," which was widely read and much discussed. It passed, in five months, in the three-volume form, through seven editions; and since that time over 80,000 copies of the one-volume edition have been sold in this country, and about half a million in America, the sale in this latter case consisting largely, of course, of pirated editions. It has been translated into German, Dutch, Danish, and Spanish. During 1892 appeared her second long novel, "The History of David Grieve," which was followed in 1894 by "Marcella," by "Sir George Tressady" in 1896, and by "Helbeck of Bannisdale" in 1898. In the spring of 1890 Mrs. Ward took part in founding a settlement for social work amongst the crowded working-classes of South St. Pancras. That was known for some years as University Hall. Gradually, however, the work of the settlement outgrew the limits of the small and dingy hall in Marchmont Street, in which, up till June 1897, the social work was carried on by the Warden and residents from the hall in Gordon Square. An appeal was made for funds with which to build a new settlement, and owing to the munificence of Mr. Passmore Edwards, the fine building in Tavistock Place which bears his name was begun in 1896 and opened informally in October 1897, and formally by Mr. John Morley in February 1898. Combined with the social and educational work of the settlement is an annual lectureship, named after Dr. Jowett, the aim of which is to further an improved historical teaching of the Bible. Mrs. Ward remains the Honorary Secretary of the Settlement. She married, in 1872, Mr. Thomas Humphry Ward, M.A., formerly Fellow and Tutor of Brasenose College, Oxford (see following memoir).

WARD, Thomas Humphry, M.A. is a son of the late Rev. Henry Ward,
4 C

formerly Vicar of St. Barnabas, King Square, E.C., and was born at Hull on Nov. 9, 1845. He was educated at Merchant Taylors' School, and at Brasenose College, Oxford, where he graduated (first class Final Classical School) in Mich. Term, 1868. Before this he had been a candidate for the Civil Service of India, and in 1886 was placed first in the Open Competition. He resigned, however, without proceeding to India, and in February 1869 was elected Fellow of Brasenose, of which College he was Tutor from 1870 to 1880. He then engaged in literary work in London. In 1880-81, with the aid of the principal critical writers of the day, he brought out "The English Poets: Selections with Critical Introductions" (4 vols.); in 1884 he published "Humphry Sandwith, a Memoir"; in 1885 he edited "Men of the Reign"; and in 1887 the 12th edition of "Men of the Time." In 1886, with the help of various writers on Art, he brought out "English Art in the Public Gardens of London," a work illustrated with 120 photogravures; and in 1887 he published "The Reign of Queen Victoria: a Survey of Fifty Years of Progress." In this work he had the assistance of Mr. Matthew Arnold, Professor Huxley, Lord Wolseley, Sir Henry Sumner Maine, and others. It should be added that as an undergraduate he was (with the late Edward Nolan and R. S. Copleston, now Bishop of Colombo) joint author of "The Oxford Spectator." Mr. Humphry Ward is a member of the staff of the *Times*. In 1872 he married the eldest daughter of Mr. Thomas Arnold, Mary Augusta, the authoress of "Robert Elsmere" (*q.v.*). Addresses: 25 Grosvenor Place, S.W.; Stocks, Tring; and Athenæum.

WARDELL, Mrs. E. A. See TERRY, ELLEN.

WARDEN, Florence (Mrs. James), is the daughter of C. W. Price, of the London Stock Exchange, and was born at Hanworth, Middlesex, on May 16, 1857. She was educated at Brighton, and in France, was engaged in teaching from 1875 to 1880, and was on the stage from 1880 to 1885. She then devoted herself to writing, and a large number of popular novels are the result of her work, amongst which there may be mentioned: "At the World's Mercy," "The House on the Marsh," "A Prince of Darkness," "A Witch of the Hills," "St. Cuthbert's Tower," "Ralph Ryder of Brent," "A Woman's Face," "A Spoilt Girl," "A Passage through Bohemia," "A Perfect Fool," "Kitty's Engagement," "A Dog with a Bad Name," "Our Widow," "Pretty Miss Smith," "Forge and Fur-

nace," "A Sensational Case," "The Mystery of Dudley Horne," "The Inn by the Shore"; "A Lady in Black," 1897; "Girls will be Girls," 1897; "Dolly the Romp," 1897. Miss Warden was married in 1887 to Mr. James.

WARDLE, Sir Thomas, Fellow of the Chemical, Geological, and Statistical Societies, and of the Imperial Institute; Member of Council of the Palæontographical Society, Chevalier of the Legion of Honour of France, Officier de l'Académie de France, Membre du Jury de l'Industrie de la Soie aux Expositions Universelles in Paris, 1878 and 1889, was born at Macclesfield in 1831, and is the son of Joshua Wardle, of Cheddleton Heath, Leek. He was educated at Macclesfield Private School and Leek Grammar School, and is in business as a silk-dyer and silk and calico printer. He is a great authority on the history and manufacture of silk, and was honorary superintendent of the Indian Silk-Culture Court in the Indian and Colonial Exhibition of 1886 in London, and Chairman of the Silk Section of the Manchester Royal Jubilee Exhibition, 1887, besides being Chairman of that held in St. James Square in 1890, under the auspices of Lord Egerton of Tatton, and that held at the Duke of Sutherland's in 1894. He has written a large number of monographs, chiefly on the subject of silk. He married Elizabeth Wardle, of Leek. Address: 54 St. Edward Street, Leek, &c.

WARE, The Right Rev. Henry, D.D., Bishop Suffragan of Barrow-in-Furness, was born in London in 1830, and is the youngest son of Martin Ware, Esq., of Russell Square, London, and Tilford House, Farnham, Surrey. He was educated at Trinity College, Cambridge; B.A. (Wrangler and first class in Classics), 1853; D.D. 1889; Fellow of Trinity College, Cambridge, from 1855 to 1863; Vicar of Kirkby Lonsdale from 1862 to 1888; Proctor in Convocation from 1867; Canon of Carlisle from 1879 to 1883, and again in 1888; Bishop Suffragan of Barrow-in-Furness (Diocese of Carlisle), 1889. He married (1) Elizabeth Sarah, daughter of E. G. Hornby; and (2), in 1887, Ellen, daughter of Harvey Goodwin, Bishop of Carlisle. Addresses: The Abbey, Carlisle; and How Foot, Grasmere, R.S.O.

WARINGTON, Robert, F.R.S., F.C.S., F.I.C., &c., eldest son of Robert Warington, F.R.S., was born in London, Aug. 22, 1838, and educated at home. He has pursued chemistry from his boyhood; has held appointments, first as Teacher of Chemistry at the Royal Agricultural College, Cirencester, 1863 to 1867; as an

Analytical and Research Chemist, under Sir J. B. Lawes, F.R.S., 1867 to 1893; and as Professor of Rural Economy in the University of Oxford, 1894 to 1897. He is the author of forty papers describing original investigations in Analytical and Agricultural Chemistry; the most important of these have been on tartaric and citric acid; on the absorptive power of soil; on nitrification; and on the composition of rain, drainage, and well-waters. He is the author of a small manual of Agricultural Chemistry, "The Chemistry of the Farm," which has a large circulation; of a Course of Lectures delivered in America under the Rothamsted Trust; and of a large number of articles in dictionaries and periodicals. In 1884 he married Helen, daughter of G. H. Makins. Address: Harpenden, Herts.

WARNER, Charles Dudley, L.H.D., D.C.L., American writer and journalist, was born at Plainfield, Massachusetts, Sept. 12, 1829. He graduated at Hamilton College in 1851; studied law and was admitted to the Bar in 1856. He practised law until 1860, when he began journalism and became editor of the Hartford (Conn.) *Press*, which in 1867 was absorbed by the *Courant*, of which he has ever since been an owner. He has travelled in Europe and the East and over his own country; and for a few years, in addition to his editorial duties in Hartford, he conducted the "Editor's Drawer," and now writes the "Study," in *Harper's Magazine*. He has contributed to the *Atlantic*, *Century*, *Harper's*, and other leading magazines, and has published: "My Summer in a Garden," 1871; "Saunterings," and "Back-Log Studies," 1872; "Baddeck and that Sort of Thing," 1874; "My Winter on the Nile among the Mummies and Moslems," 1876; "Being a Boy," and "In the Levant," 1877; "In the Wilderness," 1878; "Captain John Smith," and "Washington Irving," 1881; "Roundabout Journey," 1883; "Their Pilgrimage," 1886; "On Horseback," 1888; "South and West and Comments on Canada," and "A Little Journey in the World," 1889; "As We were Saying," 1892; "The Work of Washington Irving," and "As We Go," 1893; "The Golden House," 1894; and "The People for whom Shakespeare Wrote," 1897. He is editor of the "Library of the World's Best Literature," and, in conjunction with S. L. Clemens (Mark Twain), has written "The Gilded Age," 1873. Address: Hartford, Conn.

WARR, Professor George Charles Winter, M.A., was born on May 23, 1845,

at Oakville, Toronto, and is the son of the late Canon Warr, M.A., Vicar of Childwall, Lancs. His maternal grandfather was Henry Denny, of Waterford, Ireland, founder of the firm of H. Denny & Sons. He was educated at the Royal Institution School, Liverpool, and at the University of Cambridge, as a foundation scholar of Christ's, and subsequently of Trinity College. He was first Bell (University) Scholar in 1866, Porson and Members' Prizeman in 1868, third in the first class of the Classical Tripos in 1869. He was elected by competition to a Fellowship at Trinity College, 1870, but refused it on the ground of the religious tests then in force, to which he objected as restricting liberty of conscience, and as debarring Nonconformists from the benefits of the national universities. Mr. Warr otherwise took a prominent part in the Liberal movement which led to the abolition of the tests in 1871. He was Secretary of the Cobden Club from 1871 to 1874, and he has been active in popular educational work. He was on the staff of St. Paul's School from 1870 to 1872, Lecturer at Garrick Chambers from 1872 to 1881, and was elected to the chair of Classical Literature in King's College, London, 1881, having previously been Classical Lecturer in the same college. He is also Professor of Latin at Queen's College, London, and assisted Bishop Barry in founding the Ladies' Department of King's College in 1877. He has advocated the establishment of a Teaching University in London, and in connection therewith, the restoration of Gresham College according to the founder's design, as a department of research and higher (post-graduate) instruction. In 1883 he wrote the "Tale of Troy," a classical masque founded on Homer, which he produced with the co-operation of the late Sir Charles T. Newton, at Cromwell House; this was followed in 1886 by the "Story of Orestes," from *Æschylus*. The *mise-en-scène* was designed by Lord Leighton, P.R.A., Sir E. J. Poynter, R.A., Mr. G. F. Watts, R.A., Mr. Henry Holiday, Mr. George Simonds, and Mr. Walter Crane. The two plays, with introduction and sonnets by the author, and the music (chiefly composed by Sir Walter Parratt), are published in a volume entitled "Echoes of Hellas" (Marcus Ward, 1888), elaborately illustrated by Mr. Crane. Mr. Warr is also the author of a work entitled "The Greek Epic," 1895, and has translated from the German Teuffel-Schwabe's "History of Roman Literature" (Bell, 1890). He has contributed articles to the *Classical Review*, and poems and translations to the *Academy*. He married, in 1885, Constance Emily, daughter of the late Thomas

Keddey Fletcher. Address: King's College, Strand, W.C.

WARRE, The Rev. Edmond, D.D., Head-Master of Eton College, was born in London, on Feb. 12, 1837, and is the second son of the late Henry Warre, of Bindon, Somerset, and Mary Caroline, third daughter of Nicolson Calvert, Hunsdon, Herts. He was educated at Eton, where he obtained the Newcastle Scholarship in 1854, and Balliol College, Oxford, of which he was a Scholar. He obtained a first class in Classical Moderations in 1855, and in the final Classical Schools in 1859. He rowed in the Oxford University eight against Cambridge at Putney in 1857-58, and was President of the O.U.B.C. in 1859. He was elected Fellow of All Souls in the same year, and retained his Fellowship three years. He assisted in raising the University Volunteer Corps, and was Senior Captain of the Battalion, 1859-60. He was also one of the Committee which formed the N.R.A. He commanded the 2nd Bucks Eton Coll. Volunteer Rifle Corps, 1878-84, and is Hon. Colonel of the corps and V.D. In 1860 he went to Eton as Assistant-Master, a post which he held under Drs. Goodford, Balston, and Hornby, until the appointment as Provost of the last-named in 1884. At that date, Mr. Warre was designated by general opinion as the most likely successor to the vacant post, for which his services and his great popularity at Eton seemed specially to qualify him. He was accordingly elected Head-Master by the governing body, and shortly afterwards he took his degree of D.D. at Oxford. He became one of her Majesty's Honorary Chaplains in 1885, and was elected an Honorary Fellow of Balliol College in 1896. He married, in 1861, Florence Dora, second daughter of Lieut.-Col. C. Malet, of Fontmell Parva, Dorsetshire. Addresses: Eton College, Windsor; Baron's Down, Dulverton; and Athenæum.

WARREN, Lieut.-General Sir Charles, K.C.B., G.C.M.G., R.E., F.R.S., late Chief Commissioner of the Metropolitan Police, was born at Bangor, on Feb. 7, 1840, and is the second son of the late Major-General Sir Charles Warren, K.C.B. He was educated at Cheltenham College, Sandhurst, and at Woolwich. He entered the Royal Engineers in 1857, became Captain in 1869, Major and Lieut.-Colonel in 1878, and Colonel in 1882. From 1867 to 1870 he conducted a series of excavations in Palestine, chiefly round the walls of the enclosure of the Temple of Jerusalem; and wrote "Underground Jerusalem," 1876; "The Temple or the Tomb," 1880; and, in conjunction with

Captain Conder, "Jerusalem," 1884. In 1876 he was Special Commissioner to settle the boundary of the Orange Free State; and in the following year to settle the Land Question of West Griqualand. He commanded the Diamond Field Horse during the Galeka war of 1878, and the Field Force in Bechuanaland during the same year. During the Zulu war he organised a Volunteer Force for the assistance of the Transvaal and Natal, he acting in the capacity of Commander-in-Chief and Administrator of Griqualand West. Major Warren returned to England in 1880, and was appointed Instructor of Surveying at Chatham; and in 1882 he went to Egypt, and was engaged in special duty in restoring in the desert the authority of the Khedive, and bringing to justice the murderers of Professor Palmer's party. From 1884 to 1885 Colonel Warren was commander of the Field Force in Bechuanaland; and in 1886 he was commander of the forces at Suakim; and subsequently in the same year Chief Commissioner of the Metropolitan Police, an office which he resigned in 1888. In 1889 he was appointed to command the troops in Straits Settlements with the temporary rank of Major-General. In 1894 he returned to England, and the following year was appointed to command the troops in the Thames District. Sir Charles Warren married, in 1864, Fanny, daughter of Samuel Haydon, Esq., of Guildford. Addresses: 16 Charing Cross, S.W.; and Athenæum.

WARREN, Thomas Herbert, M.A., President of St. Mary Magdalen College, Oxford, since 1885, was born at Cotham, Bristol, Oct. 21, 1853, and is the eldest surviving son of Algernon William Warren, J.P., merchant in that city, and Cecil, daughter of Thomas Thomas of Llangadock, Carmarthenshire. He was educated at Manilla Hall, Clifton, 1863-68, then at Clifton College, 1868-72, and was Scholar of Balliol College, Oxford, 1872-76. He won the Hertford Scholarship in 1873, took a first class in Classical Moderations in 1873, won the Gaisford Prize for Greek Verse in 1875, and was in the first class, Lit. Hum., in 1876. He obtained the Craven Scholarship in 1878, and was Fellow and Tutor of Magdalen College from 1877 to 1885. He became President of Magdalen in 1885. From 1875 to 1876 he was Librarian of the Oxford Union Society; has been a Member of Council of Clifton College since 1882; is a Governor of St. Paul's School and of Lady Margaret Hall, Oxford. He was appointed a Departmental Commissioner for the Treasury to inspect University Colleges in Great Britain in 1896. He has published Plato's "Republic," Bks. i. v., with intro-

duction and notes, Macmillan, 1888 (reprinted, 1892 and 1898); "Education and Equality," an address on secondary education, Stanford, 1895; "By Severn Sea and other Poems," printed at the private press of Rev. H. O. Daniel, of Worcester, Oxford, 1897, and published by John Murray, London, in 1898 (two editions). He has also written introductions to the poems of J. A. Symonds and Robert Bridges for A. H. Miles's "Poets of the Century," and has edited "Selection of Poems of G. J. Romanes, F.R.S.," Longmans, 1896. He was married, on Dec. 16, 1886, to Mary Isabel, youngest daughter of Sir Benjamin Brodie, 2nd Baronet. Address: The Lodgings, Magdalen College, Oxford.

WARRY, George Deedes, Q.C., is the son of George Warry, of Shapwick, Somerset, and was born on June 7, 1831. He was educated at Winchester and Trinity College, Oxford, where he graduated M.A. in 1856. He was called to the Bar at Lincoln's Inn in 1859, and practised on the Western Circuit. He was appointed Recorder of Portsmouth in 1879, and became a Q.C. in 1888. He is the author of a "Treatise on Rating." Mr. Warry was married, in 1860, to Catherine Emily, daughter of the late John Clitsome Warren, of Taunton. Address: 1 Essex Court, Temple, E.C.

WATERHOUSE, Alfred, R.A., LL.D., architect, was born July 19, 1830, at Liverpool, and is the eldest son of Alfred Waterhouse, of Liverpool, and White Knights Park, Reading. He studied architecture in Manchester, under Richard Lane, where he began to practise his profession, after travelling, chiefly in Italy. His first considerable work was the Manchester Assize Courts, the result of a hardly-contested competition. In that city he has also been the architect of the County Jail, the Owens College, the National Provincial Bank of England, the Refuge Assurance Company's Offices, and the Town Hall, the result of another competition. In Liverpool his works comprise the London and North-Western Hotel, the Seaman's Orphanage, the Turner Memorial Home, the Royal Infirmary, and University College; in London, the Natural History Museum, the Prudential Assurance Company's Office in Holborn, the New University Club, the New St. Paul's School, the Central Institution of the City and Guilds of London Institute, the National Liberal Club, the New Weigh-House Chapel, the Surveyors' Institute, University College Hospital. At Bushey the Clergy Orphan School was built by him. Balliol College at Oxford, Caius and Pembroke at Cambridge, have been partly

rebuilt from his designs. At Leeds the Yorkshire College of Science and W. W. Brown & Company's Bank have been erected from his designs. The Hotel Métropole, Brighton, is also an example of his work. Among mansions may be mentioned Heythrop, Oxon., Eaton Hall, Cheshire, Iwerne Minster, Dorset, as his most conspicuous works. Mr. Waterhouse was honoured by receiving a grand prize for architecture at the Paris Exhibition of 1867, and a "Rappel" at that of 1878. He is a Member of the Royal and Imperial Academy of Vienna; an Associate of the Académie Royale des Sciences, des Lettres, et des Beaux-Arts de Belgique; an Associate of the Royal Academy of Arts at Brussels, Antwerp, Milan, and Berlin; also Correspondant d'Académie des Beaux-Arts (Institut de France). He was elected an Associate of the Royal Academy of Arts, England, Jan. 15, 1878, and became a full member on June 4, 1885. He received the Royal Gold Medal of the Royal Institute of British Architects in 1878; and has filled the President's chair of the same body during 1888, 1889, and 1890. He was made LL.D. of Victoria University in 1895. He married Elizabeth, daughter of John Hodgkin, barrister, in 1860. Addresses: 20 New Cavendish Street, W.; Yattendon Court, Berks; and Athenæum.

WATERHOUSE, John William, R.A., was born in Rome in 1849. His first important picture was "Sleep and his brother Death," exhibited at the Royal Academy in 1874. This was followed by "Miranda," 1875; "After the Dance" (hung on the line), 1876, and "The Emperor Honorius," a classical picture, the most important he had as yet painted, which is said to have been suggested by a passage in the "Antonia" of Wilkie Collins. The "Oracle" and the "Lady of Shalott," and "Circe" followed among many other works, and in 1895 Mr. Waterhouse achieved fame with his "St. Cecilia," and with his "Pandora" in 1896. "Hylas and the Nymphs" was exhibited in 1897, and "Flora and the Zephyrs" and "Ariadne" in 1898. In 1899 he exhibited a portrait of Miss Molly Rickman. He was elected an A.R.A. in 1885, and R.A. ten years later. In April 1899 he was elected a member of the Athenæum under Rule 2. Addresses: 6 Primrose Hill Studios, Regent's Park, N.W.; and Athenæum.

WATERLOW, Ernest Albert, A.R.A., is the son of the late A. C. Waterlow, lithographer, and was born in London on May 24, 1850. He was educated at Eltham Collegiate School, at Heidelberg,

and entered the Royal Academy Schools in 1872, obtaining the Turner gold medal in the following year. Mr. Waterlow, who is well known as a landscape painter, was elected a member of the Royal Society of Painters in Water-Colours in 1880; he is now the President of this Society. His most recent Royal Academy pictures have been: "A Sussex Homestead," "Golden Autumn," "Green Pastures," "The Water-mill," 1895; "Clouds o'er the Sea," "In the Mellow Autumn Light," "Where Early Falls the Dew," 1896; "A Tranquil Stream," "Autumn Floods," "Flowery Fields," and "Summer Flowers," 1897; "Summer Afternoon," "The Lonely Church," "A Moorland Road," and "Through the Wood," 1898; "La Côte d'Azur" and "Forest Oaks," 1899. He was elected an Associate of the Royal Academy in 1890. Address: 1 Maresfield Gardens, Fitzjohn's Avenue, N.W.

WATERLOW, Sir Sydney Hedley, Bart., was born Nov. 1, 1822, and is the son of the late James Waterlow, of Huntingdon Lodge, Surrey. He was educated at the Grammar School, Southwark, and at the age of fourteen was apprenticed to the late Mr. Thomas Harrison, Government printer; at eighteen he was placed in charge of the Cabinet Printing Press at the Foreign Office, Downing Street, and at twenty he went abroad, and was engaged in the well-known establishment of Messrs. Galignani. In 1844 he joined his father and brothers in business at London Wall, and for the next twenty years devoted himself to the extensive business of the firm now known as Waterlow & Sons, Ltd. In 1855 he was elected for the Ward of Broad Street in the Common Council, and while a member of the Police Committee devised the scheme of over-house telegraph wires for the use of the police. In 1863 he was elected Alderman for the Ward of Langbourn, and in the same year took an active part in promoting the scheme for Artisans' Dwellings. In 1866-67 he served the office of Sheriff of London and Middlesex, and received the honour of knighthood. In the following year he agreed to contest the county of Dumfries in the Liberal interest, and greatly astonished the Conservative party by being returned at the head of the poll for a county which had been held by them uncontested for eighty years. In 1870 Sir Sydney was appointed on the Royal Commission for inquiry into Friendly and Benefit Building Societies, and took an active part in establishing such societies throughout the kingdom on a satisfactory footing. In 1872 he was elected Lord Mayor of London, and appointed to the

Royal Judicature Commission; in the same year he instituted the now annual Hospital Sunday Fund, of which he is the Vice-President, as well as Chairman of the Distribution Committee, a post involving arduous duties. The Queen, in recognition of his many services to commerce and philanthropy, created him a baronet in 1873. In the following year he was elected treasurer of St. Bartholomew's Hospital, and discharged the duties of his office in a manner that has conferred lasting benefit on the Institution. He resigned in 1892. In 1874, at the general election, he successfully contested Maidstone, but lost his seat in 1880, and was elected for Gravesend, which he continued to represent until the general election of 1885. In 1881-82 he worked on the Committee on Artisans' and Labourers' Dwellings, a subject in which he has always taken a keen interest. After resigning his alderman's gown in 1883, Sir Sydney made a tour round the world. His services to the working-classes of England are well known, and have gained the appreciation which they deserved. Sir Sydney was also treasurer of the City and Guilds of London Institute for the Advancement of Technical Education, and is a member of the Royal Commission for the Exhibition of 1881, Chairman of the General Commissioners of Income Tax in the City of London, Chairman of the Industrial Dwellings Co., which manages six thousand tenements, and Chairman of the Board of Governors of the United Westminster Schools. In 1889 he gave to the London County Council his estate at Highgate, comprising buildings and about 29 acres of land, for the use of the public as a Park for ever; it is now known as Waterlow Park. He married (2), in 1882, Margaret, daughter of William Hamilton, of Napa, California. Addresses: 29 Chesham Place, S.W.; and Trosley Towers, Wrotham, Kent.

WATHERSTON, Edward James, goldsmith, born in 1839, is principally known for his persistent advocacy of the remission of the plate duties, abolished in 1890; and for his unwearied exertions, together with the late Mr. Edmond James Smith, to effect the purchase of the interests of the Metropolitan Water Companies (1878-80). He is a pioneer in the causes of Technical Education, Free Libraries and the opening of the Museums and Art Galleries on Sundays; was lately Captain (F.O.C.) in the Queen's Westminster Rifle Volunteers, was Member of the Society of Arts, 1877; Liveryman of the Goldsmiths' Company, 1864; Secretary of the Economic Section of the Social Science Association, 1877; is a member of

the British Association for the Advancement of Science; and one of the governing body of the Birkbeck Institution. Mr. Watherston is the author of "Taxation of Silver Plate," "Our Railways: should they be Private or National Property?" "Our Railways: Rates and Fares," "Our Iron Highways," "The Progress of British Commerce," "Elementary Education at Home and Abroad," "Technical Education," "The Industrial Employment of Women in France, with England," "The Industrial Employment of Women Abroad and at Home," "French Silk Manufactures, and the Industrial Employment of Women," "Societies of Commercial Geography," "The Essence of Art: is it Genius or Ingenuity?" "Manual or some Form of Technical Instruction, a Necessary Element of a Compulsory System of Education," "Gems and Precious Stones." Mr. Watherston's advocacy of the necessity for Technical Education is founded upon personal investigation; he has visited all the principal capitals and cities of Europe, and made in 1878 an extended tour in the United States and Canada. His only son is a Captain in the Royal Engineers, who has served in Hong-Kong, upon the staff at Chatham, and in Africa. Address: 95 Barkston Gardens, S.W.

WATKIN, Sir Edward William, Bart., D.L., J.P., Knight of the Order of the Redeemer of Greece, and of Leopold of Belgium, is the eldest son of the late Mr. Absalom Watkin, who was born in London, but settled in Manchester in 1800, and carried on business as a merchant in that town, from 1809 till his death in 1861. His son, Mr. Edward William Watkin, was born on Sept. 26, 1819, and was first employed in his father's counting-house (ultimately becoming a partner), until the year 1845, when he was appointed to the secretaryship of the Trent Valley Railway. This led to his joining the London and North-Western Co., and to his various positions, from which he has now retired, as General Manager, and afterwards as a Director and Chairman of the Manchester, Sheffield, and Lincolnshire Railway, and President of the Grand Trunk Railway of Canada; Chairman of the South-Eastern Railway, and Director of the Great Western and Great Eastern Companies. In 1839-40 he became one of the directors of the Manchester Athenæum, and was one of the Secretaries of the committee which was organised to extricate the institution from its pecuniary embarrassments. He suggested and carried out the great literary soirées of that institution, which were held in the Free Trade Hall, and presided over by Mr. Charles Dickens, Mr. B. Disraeli, and Serjeant Talfourd, in

the years 1843, 1844, and 1845 respectively. In 1843 he wrote a pamphlet entitled "A Plea for Public Parks," and became one of the honorary secretaries of the committee which followed, through whose efforts the three existing parks (viz., the "Queen's," "Peel" and "Philip's") were obtained for Manchester and Salford. In 1843 he and a few other members of the Manchester Athenæum started the "Saturday half-holiday" in Manchester, which resulted in the general closing of the warehouses for business at 2 P.M. every Saturday. In 1845, Mr. Watkin was one of the originators of the *Manchester Examiner* newspaper. In 1861 he undertook a private mission to Canada, at the desire of the Duke of Newcastle, then Secretary of State for the Colonies, with the object of bringing the five British Provinces into union, and the establishment of a connection between Canada and the Atlantic by an independent railway system, which he successfully accomplished. Mr. Watkin was first elected to Parliament in 1857, but was afterwards unseated. He was returned to Parliament, unopposed, for Stockport, in 1864, and again returned at the head of the poll in 1865. He was defeated, however, by a narrow majority in 1868, and contested East Cheshire unsuccessfully in 1869. Whilst in Parliament in 1866-67, he obtained, as the Chairman of two Select Committees, important alterations in the laws affecting railways, and especially the change in the law of limited liability, which enabled companies to reduce the capital by mere resolution, and without winding up. In 1868 he received the honour of knighthood. Sir E. Watkin was again returned to Parliament at the general election of February 1874, for the united boroughs of Hythe and Folkestone, and was returned unopposed for the same boroughs, at the general election of 1880. In that year he was created a baronet. He was High Sheriff of Cheshire, 1874. He has done much to improve the harbours of Boulogne and Calais, so as to establish fixed services by large steamers, to increase the comfort of the transit, and to have already reduced the time between London and Paris to seven hours; this movement is progressing. The proposed tunnel under the Channel to connect England and France is an enterprise with which he has been connected in conjunction with the late Michel Chevalier, M. Léon Say, and other eminent French and English public men. Assuming that the experiment would succeed, Mr. Watkin recommended Mr. Gladstone to approach the European and American powers with a view to the complete neutralisation of the work, believing that this would do away with

the military alarms on the question raised of late years. At present the works near Shakespeare's Cliff, Dover, are kept in repair and ventilation, but Government has not yet shown any desire to give the sanction necessary for their completion. It is understood that Sir Edward has investigated the question of connecting the south coast of Scotland and the north coast of Ireland by a submarine tunnel. He has advocated the extension of harbour and other public works as a means of extending employment and augmenting the trading capacity of the country in competition with foreign nations. In 1885, 1886, and 1892, Sir E. Watkin was returned for the Hythe division of Kent, but not in 1895. In 1893 he married Ann, widow of H. Ingram, M.P., founder of the *Illustrated London News*. This lady died at the age of eighty-four in May 1896. Addresses: Rosehill, Northenden, Cheshire; and the Chalet, Beddgelert.

WATKINS, The Venerable Henry William, M.A., D.D. of Oxford, London, and Durham, and Honorary D.D. of Durham, was born on Jan. 19, 1844, and is the fourth son of Welsh parents of good family, and was educated at King's College, London, of which he is a Fellow and a member of Council, and at Balliol College, Oxford, of which he was sometime a Scholar. After a distinguished University career, he graduated at London and Oxford, and was ordained in 1871 to the curacy of Pluckley, Kent, on the nomination of Dr. Plumptre, late Dean of Wells. In 1873 he was presented to the vicarage of Much Wenlock, in Shropshire, and quitted the living two years later to become Censor, Chaplain, and Lecturer on the Greek Testament and on Hebrew at King's College, London. Shortly afterwards he was appointed first professor of Logic and Moral Philosophy in the same College. In 1878 Dr. Watkins was elected to the Wardenship of St. Augustine's College, Canterbury, by the Archbishops of Canterbury and York and the Bishop of London; and while there, he accepted the work of the poor and unendowed parish of St. Gregory the Great. Soon after Dr. Lightfoot was consecrated to the Bishopric of Durham in 1879, Dr. Watkins was appointed one of his examining chaplains; and in 1880 was collated to the Archdeaconry of Northumberland with a Canonry in Durham Cathedral. On the division of the See in 1882, he was transferred to the newly-constituted Archdeaconry of Auckland; and a few months later, on the death of Archdeacon Prest, to that of Durham. On his first arrival in Durham, he accepted a Professorship of Hebrew in the University, and found lei-

sure to devote some of his energies to the restoration of the parish of All Saints at Newcastle-upon-Tyne, where he laboured as Senior Curate at a nominal salary, among one of the most neglected and degraded of populations. During Bishop Lightfoot's illness, the Archdeacon acted as his commissary, and on the election of Bishop Westcott to the See of Durham, he was again appointed Examining Chaplain. Archdeacon Watkins has contributed several papers at Church Congress Meetings at Sheffield, Swansea, Derby, Wolverhampton, and Manchester, on "Science and Religion," on "The Church and Democracy," on "Elasticity of Worship," and other subjects, which have been published separately, and he has also delivered several Charges as Archdeacon of Northumberland and Durham. Besides these, Archdeacon Watkins has contributed to Dr. William Smith's Dictionaries of the Bible and of Christian Biography; and wrote a Commentary on the Gospel according to St. John, for Bishop Ellicott's "New Testament for English Readers." He was appointed Bampton Lecturer at Oxford for the year 1890, and delivered the course on "Modern Criticism Considered in its Relation to the Fourth Gospel." The Archdeacon was married in 1883 to the elder daughter of Sir Henry Thompson, a lady who is well known both as an artist and a philanthropist, and who is the author of "The Public Picture Galleries of Europe," a work which has passed through several editions. Addresses: The Archdeaconry, Durham; and Athenæum.

WATKINSON, The Rev. William L., D.D., LL.D., Wesleyan minister, was born at Hull, August 30, 1838. He entered the ministry 1858, and has travelled in the ministry in Nottingham, Manchester, Bolton, Harrogate, London, and in other towns. He is the author of the Fernley Lecture "On the Influence of Scepticism on Character," delivered in 1887 (now in the 8th edit.); "Mistaken Signs"; "The Beginning of the Christian Life"; "The Programme of the Christian Life"; "Noon-day Addresses," delivered in Manchester and Leeds; and various other works. In 1891 he published "The Transfigured Sackcloth, and other Sermons," and in 1894 began to edit the *Life Indeed* series. He is the editor of the *Wesleyan Methodist Church*, and was President of the Wesleyan Methodist Conference in 1897-98. Address: 29 Exeter Road, Brondesbury, N.W.

WATSON, Alfred Edward Thomas, is the son of Captain B. L. Watson, and was born on March 10, 1849. Beginning

a literary career by writing for various magazines, he joined the staff of the *Standard* in 1872. He wrote frequent articles for the *Saturday Review*, from 1885 to 1894; contributed to *Punch*; and from 1880 to 1895 he edited the *Illustrated Sporting and Dramatic News*, using the pseudonym of "Rapier." He now occupies the position of editor of the *Badminton Library*, and of the *Badminton Magazine*; he is also musical and dramatic critic to the *Standard*. Mr. Watson is the author of "Sketches in the Hunting Field," 1880; "Race Course and Covert Side," 1883; "Types of the Turf," 1885; "Steeplechasing" (*Badminton Library*), 1886; and he has also written chapters in the "Badminton" volumes on Hunting, Riding, and Driving, &c. Address: Palace Gate House, Kensington.

WATSON, The Rev. Henry William, D.Sc., F.R.S., was born in London, February 25, 1827, and is the only surviving son of the late Thomas Watson, Esq., R.N. He was educated at King's College, London, and obtained a Mathematical Scholarship there on its first establishment, and entered Trinity College, Cambridge, in 1846; was elected Scholar thereof in 1848; and took his B.A. degree in 1850; being Second Wrangler and Smith's prizeman. He was elected Fellow of Trinity College, and appointed Assistant-Tutor thereof in 1851; and was appointed Second Master of the City of London School, 1854; Mathematical Lecturer at King's College, London, 1856; Assistant-Master of Harrow School, 1857; and was presented to the Rectory of Berkswell, near Coventry, 1865. He acted as Moderator and Examiner in the Cambridge Mathematical Tripos, 1860 and 1861 respectively, and as Additional Examiner in the year 1877. For many years he has acted as Assistant-Examiner to the Civil Service Commissioners; and has been occasional Examiner for the degree of D.Sc. in the University of London. He is the author of "A Treatise on Geometry," in Longmans' Text-books of Science series, 1871; "A Treatise on the Kinetic Theory of Gases," published by the Clarendon Press, Oxford, 1876; and sundry Mathematical and Physical papers in the *Philosophical Magazine* and the *Quarterly Journal of Mathematics*, and elsewhere. He is joint-author of "Watson and Burbury's Treatise on Generalised Co-ordinates applied to the Kinetics of a Material System"; "Watson and Burbury's Electricity and Magnetism," part 1, Electrostatics, 1885; part 2, Magnetism and Electrodynamics, 1889; Article "Molecule," in the ninth edition of the "Encyclopædia Britannica." He was appointed, in 1879, a representative

governor for the University of Cambridge, of King Edward VI.'s School, Birmingham, and was joint founder of the Birmingham Philosophical Society in 1879, and President of the same, 1880 and 1881. The Rev. H. W. Watson was elected Fellow of the Royal Society in 1881, and Examiner in Mathematics in the University of London in 1893. He is one of the original founders of the Alpine Club. Address: Berkswell Rectory, Coventry.

WATSON, Rev. John ("Ian Mac-laren"), M.A. Edin., D.D. St. Andrews, son of John Watson, collector of Inland Revenue, Edinburgh, was born on Nov. 3, 1850, at Manningtree, Essex, and was educated at Stirling and Perth Grammar Schools, and at Edinburgh University; New College, Edinburgh; and Tübingen. Adopting the ministry as his profession, he was licensed in 1874, and became Assistant at Barclay Free Church, Edinburgh. He was ordained in 1875, and has been minister at Logiealmond, Perthshire; at Free St. Matthew's, Glasgow, 1877-80; at Sefton Park Presbyterian Church, Liverpool, from 1880 until the present time. Under his pen name of "Ian Mac-laren," he has published the following famous studies of Scottish rural life: "Beside the Bonnie Briar Bush," 1894; "The Days of Auld Lang Syne," 1895; "Kate Carnegie and those Ministers," 1896; "A Doctor of the Old School," 1897; "Afterwards, and Other Stories," 1899. As John Watson he has written: "The Upper Room," 1895; "The Mind of the Master," 1896; "The Cure of Souls" (Yale Lectures on Practical Theology), 1896; "The Potter's Wheel," 1897; "Companions of the sorrowful Way," 1898. His works have enjoyed an immense popularity, and have run through many editions. Address: 18 Sefton Drive, Liverpool.

WATSON, John Crittenden, American naval officer, was born in Kentucky, August 24, 1842, and appointed to the Naval Academy in Sept. 1856, graduating there in 1860. From 1862 to 1864 he was aide to Admiral Farragut on the *Hartford*, and took part in the forcing of the Mississippi River and capture of New Orleans in April 1862, and the subsequent operations in that vicinity. In 1864 he was in the battle of Mobile Bay, and was wounded there; from 1865 to 1867 he was attached to the *Colorado*, in the European Squadron, being made Lieut.-Commander in July 1866, and Commander in 1874. He was Lighthouse Inspector from 1880 to 1886, and became Captain in March 1887, and Commodore in November

1897. He was Governor of the Naval Home in Philadelphia in May 1895, remaining there until the outbreak of the war with Spain in 1898. In June of that year he was placed in command of a powerful squadron intended for the coasts of Spain, but the collapse of the war prevented the execution of the plan.

WATSON, Malcolm, journalist, playwright, and dramatic critic, son of a well-known Glasgow physician, was born in that city in 1857. He was educated at the High School there. On leaving school he entered an East Indian house of business, and after spending some years in it, he came to London to continue commercial pursuits. Having accepted an engagement with a Spanish banking company in London, he was eventually despatched to Bilbao, to establish a branch in that town. This accomplished, he determined to relinquish the position, with the view of devoting himself to literature. He returned to London at the beginning of the year 1887, and has contributed various articles to the *St. James's Gazette*, and in the autumn of 1889 was appointed dramatic editor to that paper. He is author of various plays, including "A Pretty Bequest," "In Cupid's Court," "Tally-Ho!" "Wanted—an Heir," "Tuppins & Co.," "Carnival Time," "Killicrumper," "An Odd Pair," "A Big Bandit," and "Melo-drammie," written for the German Reeds. "Held Asunder," his first important piece, in four acts, was produced at the Prince of Wales's Theatre in April 1888. Subsequently, "Christopher's Honeymoon," three-act farce, was played at the Strand in 1889; "Calumny," an adaptation of José Echegaray's "El Grase Galeoto," at the Shaftesbury in 1889; "The Pharisee," in association with Mrs. Lancaster-Wallis, at the Shaftesbury in 1891; "For Love and Liberty," at the Union Square Theatre, New York, in 1891. "Joseph" (1895) was played over a twelvemonth throughout the United States. "The Haven of Content" was played at the Garrick in 1896. He is also author of a number of one-act pieces, and contributor of articles and short stories to various London papers and periodicals. Permanent address: 8 Serjeant's Inn, E.C.

WATSON, Thomas Henry, architect, born Nov. 1, 1839, obtained three silver medals in 1860 at the Royal Academy of Arts, and the Gold Medal in 1861. He was elected an Associate of the Royal Institute of British Architects in 1862; was awarded the Travelling Studentship of the Royal Academy, 1863, and the Soane Medallion of the Royal Institute of British

Architects, 1864. He graduated at the Institute in the Class of Distinction, 1866; was President of the Architectural Association in 1871; was elected District Surveyor of St. George's, Hanover Square, North, in 1875, and Fellow of the Royal Institute of British Architects in 1877. He has carried out numerous works in London and many country houses. Among them may be mentioned North Court and other buildings, Somerhill, Kent, for Sir Julian Goldsmid, Bart.; Rickmansworth Park, the seat of J. W. Birch, Esq.; Newton Park, Somersset, for Earl Temple; Crowe Hall, Bath; Chalfont Park, Bucks, for Captain Penton, M.P.; Rapkins, Sussex, for the late Thomas Woolner, R.A.; and works to the Villa Aurelia, Rome. Address: 9 Nottingham Place, W.

WATSON, William, the poet, was born in Wharfedale, Yorkshire, and as a boy gave promise of literary genius. He suffered, however, for years from neglect of the reading public, until in 1892 his poem on "Wordsworth's Grave" forced the critics to recognise in him something more than a "minor poet." Partly owing to their own classic beauty and absence of affectation, and partly owing to the clever methods of publishing to which their author has recourse, Mr. William Watson's poems are now eagerly bought by bibliophiles and the general public. In 1893 appeared his "Lachrymæ Musarum," a noble tribute to the memory of Lord Tennyson. His other works are: "Epigrams of Life, Art, and Nature"; "The Prince's Quest," 1880; a collection of love lyrics; "The Eloping Angels"; "Excursions in Criticism," reprinted mostly from the *Spectator*, to which he frequently contributes, 1893; and "Odes and other Poems," December 1894; "The Father of the Forest" and Poems, 2nd edit., 1895; "The Year of Shame," with an introduction by the Bishop of Hereford, and "The Purple East: a Series of Sonnets of England's Desertion of Armenia," 1896; and "The Hope of the World," 1897. "The Year of Shame" contains the Byronic or Miltonic denunciation of "Abdul the Damned," which, at the time of its first publication in a milder form in a newspaper, so flattered the doves of criticism. Mr. Watson's "Collected Poems" were published by John Lane in 1898. Mr. Gladstone conferred on Mr. Watson the civil pension of £200, rendered vacant by the death of Lord Tennyson, and this very unexpected act of patronage led many to imagine that Mr. Watson was Poet Laureate designate. This pension has been increased. Mr. Watson spends much of his time in the Lake Country. Address: Devonshire Club.

WATSON, Lord, The Right Hon. William Watson, Lord of Appeal in Ordinary, LL.D., D.L., is the son of the Rev. Thomas Watson, of Covington, Lanarkshire, and was born in 1828. He was educated privately, and at Glasgow and Edinburgh Universities. He was called to the Scottish Bar in 1851, acted as Solicitor-General for Scotland from 1874 to 1876, and was Dean of the Faculty of Advocates from 1875 to 1876. He was Lord Advocate from 1876 to 1880, and in the latter year was appointed a Lord of Appeal in Ordinary, receiving at the same time a life peerage. From 1876 to 1880 he sat in the House of Commons as Conservative Member for Glasgow and Aberdeen Universities. Lord Watson is a Deputy Lieutenant, an LL.D. of Edinburgh and Glasgow, and was married, in 1868, to Margaret, daughter of Dugald John Bannatyne. Addresses: 20 Queen's Gate, S.W.; and Athenæum.

WATTERSON, Hon. Henry, American journalist and statesman, was born in Washington City, Feb. 16, 1840. He was educated by private tutors, and began his career as an editorial writer in the press of the national capital, but his professional work was interrupted by the Civil War, in which he served on the Confederate side. After the war he succeeded George D. Prentice, the founder and editor of the *Louisville Journal*, and, in conjunction with W. N. Haldeman, the founder of the *Louisville Courier*, he consolidated all the newspapers of that city into the *Courier-Journal*, which, under his management, has become a leading American newspaper. He is a recognised authority in the Democratic party, although for many years he had to contend against a majority of his party associates. He successfully opposed the reactionary movement of the Southern extremists against the reconstructory amendments to the Constitution, and of the Western extremists as to the national currency. He was one of the leaders of the Democrats in 1872 who sought to elect Horace Greeley to the Presidency. He was one of the first prominent Democrats to identify himself with Free Trade ideas and to demand of Congress "a tariff for revenue only," and for many years has been regarded as the embodiment of tariff reform in the United States. He has steadily refused office, but in the political crisis of 1876-77 he accepted a seat in Congress, serving with distinction, and declining a re-election. He is a constant public speaker and lecturer, a voluminous contributor on economic subjects to the reviews, and an active and familiar figure in the councils of his party. He delivered the dedicatory oration on the official open-

ing of the Columbian Exposition at Chicago in 1893. He is the author of many tracts and pamphlets, and a volume of sketches, entitled "Oddities of Southern Life and Character," 1892, and a "History of the War with Spain," 1898. He has travelled extensively, and has published a collection of foreign letters.

WATTS, George Frederick, R.A., D.C.L., LL.D., born in London on Feb. 23, 1817, first exhibited at the Academy in 1837. In addition to portraits, he made some historical attempts, such as "Isabella finding Lorenzo dead," from Boccaccio, in 1840, and a scene from "Cymbeline" in 1842. At Westminster Hall, in 1843, his cartoon of "Caractacus led in Triumph through the Streets of Rome," obtained one of the three highest class prizes of £300, and created sanguine hopes for his future career. Having spent upwards of four years in Italy, he again obtained, in 1847, the highest honours at the competition in Westminster Hall. His two colossal oil-pictures, "Echo" and "Alfred inciting the Saxons to prevent the Landing of the Danes," which secured for him one of the three highest class prizes of £500, were, with the pictures of Mr. Pickersgill and Mr. Cross, purchased by the Commissioners. The latter is in one of the committee-rooms of the new Parliament Houses. Mr. Watts exhibited his "Paolo and Francesca" and "Orlando pursuing the Fata Morgana" at the British Institution in 1848, and his full-length portrait of Lady Holland at the Royal Academy in the same year. "Life's Illusions," a picture of the class of "Fata Morgana," exhibited in 1849, was followed in 1850 by "The Good Samaritan," painted in honour of Thomas Wright, of Manchester, and presented by the artist to the Town Hall of Manchester. For the Houses of Parliament Mr. Watts has executed one of the frescoes in the Poets' Hall, "St. George overcomes the Dragon," from Spenser, finished in 1853, and he has painted in fresco the west end of the new hall at Lincoln's Inn. For some time he has exhibited regularly at the Royal Academy and Grosvenor Gallery. His principal productions have been portraits and ideal or mythological subjects, such as the well-known "Love and Death"; "Endymion"; "Orpheus and Eurydice"; "Daphne"; and (1886) "Hope." In 1882 an exhibition of Mr. Watts's works was held at the Grosvenor Gallery, and in February 1897 another exhibition of his works was held at the New Gallery. Reaching the age of eighty in this month, he was presented with a congratulatory address, signed by several hundreds of names, the foremost in the country, and representative of the most divergent interests. The

banquet to Corot in the last year of his life can alone be compared to this presentation. Mr. Watts originally painted for his own house some forty portraits of the most eminent of his contemporaries in public life, literature, and art, and these he has now bequeathed to the nation. He executed the portrait of Lord Tennyson in 1890. Mr. Watts is still at work, either at his easel or at an immense equestrian statue, which he hopes to be the crown of his career. The Watts portraits are now placed in the National Portrait Gallery. They include portraits of Tennyson, Matthew Arnold, and a number of other great Englishmen of modern times, and are unquestionably the prime glory of this section of the national collections. Mr. Watts has also presented to the Tait Gallery a number of his finest allegorical paintings. In 1899 he exhibited at the Royal Academy a portrait of the Rt. Hon. Gerald Balfour, M.P. In 1880 the honorary degree of D.C.L. was conferred upon Mr. Watts by the University of Oxford, and that of LL.D. was offered by the University of Cambridge in 1882, and conferred the following year. In 1885 Mr. Gladstone was empowered to bestow the honour of a baronetcy upon Mr. Watts, which honour was declined by him. He is a member of foreign academies, and has received the Cross of the Légion d'Honneur. In 1886 Mr. Watts married Mary, third daughter of the late Charles Edward Fraser Tytler, Esq., of Aldourie, Inverness-shire. London address: Little Holland House, Melbury Road, Kensington, W.

WATTS-DUNTON, Theodore, poet and critic, was born at St. Ives in 1836, but has spent most of his life in London. He received a somewhat elaborate private education at Cambridge. Originally trained as a naturalist, his father having been an active member of scientific societies, he was afterwards brought up to the law, and passed his legal examination in 1863. He first attracted the attention of the literary public as a writer of sonnets. One of the chief of those who took an interest in his early poetical work was Dante Rossetti, whose intimate friend Mr. Watts became. Under Mr. Rossetti's influence he made a critical study of the Old Masters in Florence, Venice, and Rome. After Rossetti's death he expounded the principles of his art in the *Nineteenth Century* and elsewhere. Mr. Watts-Dunton, then Mr. Watts, became literary and artistic critic to the *Examiner* at a time when that paper was being brilliantly conducted by Prof. Minto, who numbered among his contributors such men as Mr. Swinburne and Mr. W. Bell Scott. When Prof. Minto left the

Examiner Mr. Watts-Dunton retired also, and became one of the chief writers in the *Athenæum*, in the columns of which, as well as in the "Encyclopædia Britannica," 9th edit., he founded a school of poetical criticism which aims at testing literary efforts by the light of first principles only. Mr. Watts-Dunton's articles in the "Encyclopædia" are to be reproduced in volume form under the title "Poetics"; and his "Reminiscences of George Borrow" are shortly to be reprinted from the *Athenæum*. He has been a busy contributor to the *Quarterly Magazine*, the *Nineteenth Century*, and Ward's "English Poets." He is specially noticeable as an expounder of the romantic movement, and in "Aylwin, a Poetic Romance," published in October 1898, after being for twenty years well known to a select circle in MS., he has endeavoured to carry into scenes of contemporary life those principles of purely romantic art which have heretofore been expressed only in pictures of the past. His art as a writer of sonnets is discussed in Rossetti's "Letters to Hall Caine," and in the preface to Mr. W. Sharp's "Sonnets of this Century," as well as in other works on that form of poetry. In 1897 he published "Jubilee Greetings at Spithead to the Men of Greater Britain," and "The Coming of Love." Mr. Watts-Dunton, who recently assumed that name in place of Watts, is an intimate friend of Mr. Swinburne, who for some years has lived in his house at Putney. Address: The Pines, Putney.

WAY, Rev. John Pearce, D.D., born at Bath on October 19, 1850, is the son of the late Rev. John Hyne Way, incumbent of Christ Church, Bath. He was educated at Bath College, from whence he gained a Classical Scholarship at Brasenose College, Oxford. At Oxford he took a first class in Classical Moderations, and a second class in Lit. Hum.; proceeded to B.A. degree in 1874, M.A. 1877, B.D. and D.D. 1896. He went from Oxford to Marlborough, being appointed Assistant-Master by Dr. Farrar (now Dean of Canterbury) in 1875; was made House-Master in 1877; took Holy Orders in 1879. In 1885 he was elected Head-Master of Warwick School, and in 1896 of Rossall. At Oxford he rowed stroke of his College eight for four years in succession, and stroke of the Oxford crew in 1874 and 1875. In the latter year Oxford beat Cambridge for the first time after five successive defeats. He married, in 1890, Gertrude, daughter of Francis Leach, 20 Cleveland Square, W. Address: The Hall, Rossall, Fleetwood.

WAY, The Right Hon. Sir Samuel James, Bart., Q.C., Chief-Justice of South

Australia, Judge of the Vice-Admiralty Court, Chancellor of the University of Adelaide, and in 1890 appointed Lieut.-Governor of S. Australia, is the son of the Rev. James Way, and was born at Portsmouth, April 11, 1836. He was privately educated, and went to South Australia early in 1853. He was called to the South Australian Bar, March 23, 1861; appointed Q.C., Sept. 12, 1871; elected to the House of Assembly, Feb. 10, 1875; appointed Attorney-General, June 3, 1875; appointed Chief-Justice, March 18, 1876; elected Vice-Chancellor of the University of Adelaide, April 28, 1876; and Chancellor, Jan. 26, 1883. The Hon. S. J. Way has administered the Government of South Australia five times—in 1877, 1878, 1879, 1883, 1889; is a Member of the Executive Council; author of the "Report of the Commission on the Destitute Act, 1881," published in Adelaide, 1885 (an elaborate treatise on Poor Relief in South Australia), and other official publications. He was created Honorary LL.D. of Adelaide University, 1892; Honorary D.C.L. Oxon., 1891; and LL.D. Cambridge, 1897. He became the first Representative of the Australian Colonies on the Judicial Committee of the Privy Council in 1897. He was created a Baronet on the occasion of the Birthday, 1899. Addresses: Montefiore, North Adelaide, S. Australia; and Athenæum.

WEBB, Aston, A.R.A., F.R.I.B.A., F.S.A., is the son of the late Edward Webb, engraver and water-colour painter, and was born in London on May 22, 1849. Educated privately, he was articled to Messrs. Banks & Barry, architects, in 1866, and he began to practise on his own account in 1873. He was President of the Architectural Association in 1884, and Vice-President of the Royal Institute of British Architects from 1893 to 1897. He was elected A.R.A. in March 1899. Mr. Webb is responsible for the careful and successful restoration of St. Bartholomew's the Great, Smithfield, and from his designs have been built numerous churches, including the French Protestant Church, Soho. He was appointed architect for the completion of South Kensington Museum, and for the Royal Naval College, Dartmouth. In co-operation with Mr. E. T. Bell he has built the Victoria Courts at Birmingham, the Metropolitan Assurance Society's offices, and is engaged in building the new schools of Christ's Hospital. Address: 19 Queen Anne's Gate, Westminster.

WEBB, Sidney, LL.B., is the son of the late Charles Webb, and was born in London on July 13, 1859. He was educated

at private schools in London, in Switzerland, at the Birkbeck Institute, and the City of London College. After spending three years in an office in the City, he entered the Lower Division of the War Office in 1878, became a Surveyor of Taxes in the following year, and in 1881 gained a place in the Colonial Office (Class I.), by open competition; he resigned, however, in 1891. He then lectured on Political Economy at the City of London College, and the Working-Men's College, and he now is a Lecturer in the same subject at the London School of Economics and Political Science. He was called to the Bar in 1885, has devoted a good deal of time to writing on economical subjects, and still continues to do so. He has a seat on the London County Council as Progressive Member for Deptford. Amongst his many works there may be mentioned: "Socialism in England," 1890; "The Eight Hours' Day," which he published in 1891, conjointly with Mr. Harold Cox; "The London Programme," 1892; "The History of Trade Unionism," 1894, conjointly with his wife; also with her, in 1898, "Industrial Democracy," and "Problems of Modern Industry" (a reprint of essays and studies written during the last ten years); and "Labour in the Longest Reign," 1898. Mr. Webb was married, in 1892, to Beatrice, daughter of the late Richard Potter, who is herself deeply interested in matters relating to Trade Unionism and labour problems, and who wrote the "Co-operative Movement in Great Britain" in 1891, and also contributed to Charles Booth's "Life and Labour of the People." Address: 41 Grosvenor Road, Westminster Embankment.

WEBBER, The Right Rev. William Thomas Thornhill, D.D., Bishop of Brisbane, is the son of the late William Webber, surgeon, of Norwich, by Eliza, daughter of the late Sir Isaac Preston, Bart. He was born in Upper Grosvenor Street, Grosvenor Square, London, Jan. 30, 1837, and educated first at Tonbridge School, and afterwards at Norwich, under the late John Woolley, D.C.L. (who was subsequently head of Sydney University), and at Pembroke College, Oxford. B.A. 1859, M.A. 1862, D.D., *honoris causa*, 1885. He was ordained by the Bishop of London (Dr. Tait), deacon, 1860; and priest, 1861. He was assistant curate at Chiswick from 1860 to 1864, when he was put in charge of the newly-constituted district and parish of St. John the Evangelist, Red Lion Square, Holborn, which he held up to 1885. Here he built the noble church in Red Lion Square, together with clergy-house attached, and schools with accom-

modation for 700 children in three departments. The site, church, clergy-house, schools, &c., cost £49,000. This large sum of money was collected and administered by Mr. Webber, in the course of an exceedingly busy life of public usefulness. He was one of the Governors of Sion College from 1882 to 1885, and represented Finsbury on the London School Board from 1882 to 1885; was Chairman of the Local Managers of the Board Schools from 1877 to 1885, and Guardian of Holborn Union from 1874 to 1883. He was also connected very prominently during these years with the Charity Organisation Society, the Working-Men's Club and Institute Union, the Girls' and the Young Men's Friendly Societies, and many other institutions and societies. On the resignation of Bishop Hale he was appointed to the vacant See of Brisbane, and was consecrated in St. Paul's Cathedral by the Archbishop of Canterbury (Dr. Benson), on St. Barnabas's Day, 1885. When the Bishop took charge of the diocese in 1885 there were but 33 clergy and 39 churches; these, as the result of five years' work, have been increased to 67 clergy and 75 churches. Address: Bishopsbourne, Brisbane.

WEBER, Sir Hermann, Kt., M.D., F.R.C.P., received his medical education at Bonn University, of which he is M.D., and at Guy's Hospital. He is a Fellow of the Royal Med. Chir. Soc., Consulting Physician of the German Hospital, London, and of the Royal National Hospital for Consumption, Ventnor. He received the honour of knighthood at New Year 1899. Together with Mr. Rube, Dr. Hillier, and Dr. Malcolm Morris he was appointed by the Prince of Wales as representative of the National Association for the Prevention of Consumption and Other Forms of Tuberculosis at the Berlin Congress for the Prevention of Tuberculosis, May 24–28, 1899. In conjunction with his son, Dr. Parkes Weber, he has published a work, now in its second edition, on "The Mineral Waters and Health Resorts of Great Britain." He is also author of "Notes on the Climate of the Swiss Alps," 1864; "Klimato - Therapie," in Ziemssen's "Handbook of Gen. Therap.," 1880; the Croonian Lectures for 1885 on "Hygienic and Climatic Treatment of Phthisis"; and of many contributions to Quain's "Dictionary of Medicine," Allbutt's "System," the *Transactions of the Royal Med. Chir. Soc.*, &c. Address: 10 Grosvenor Street, W.

WEBSTER, Hugh Alexander, born April 21, 1849, at Laurencekirk, Kincardineshire, is the second son of the Rev.

David Webster, Congregational minister, and Isabella Mackinnon. Educated for the most part privately by his father, who had spent the early part of his life as a schoolmaster, he afterwards studied at the University of Edinburgh, between 1872 and 1880. After several years devoted to scholastic and literary work, he joined the editorial staff of the "Encyclopædia Britannica" in 1876, and contributed to the successive volumes articles in biography, literature, and, more especially, geography. For some years he took the geographical department more especially in hand, writing such articles as "Europe," "Italy," "Java," "Lapland," "Patagonia," as well as passing the bulk of the geographical work under review. He has contributed also to "Chambers's Encyclopædia," the "Globe Encyclopædia," the "Ordnance Gazetteer of Scotland," as well as for many years to the newspaper press. He was one of the founders of the Scottish (now Royal) Geographical Society in 1884. He was the chief originator and the first honorary editor of the Society's magazine (1885–87), and in reward for his services was elected first honorary Fellow of the Society. He was appointed Librarian of the University of Edinburgh in 1887, and was elected Fellow of the Royal Society of Edinburgh in the same year. Address: Edinburgh University Library.

WEBSTER, Sir Richard Everard, K.B., G.C.M.G., Q.C., M.P., Attorney-General, second son of the late Thomas Webster, Esq., Q.C., and Elizabeth, eldest daughter of Richard Calthrop, Swineshead Abbey, Lincolnshire, was born Dec. 22, 1842. He received his education at King's College and Charterhouse Schools, and at Trinity College, Cambridge, where he gained a Foundation Scholarship, and graduated in both the Mathematical and Classical Tripos. He was called to the Bar at Lincoln's Inn in 1868, and joined the south-eastern (then home) circuit. He was afterwards appointed to the ancient but honorary offices of Tubman and Postman in the Court of Exchequer at Westminster. He was made Queen's Counsel in 1878, and is believed to be the only man who has for many years past received that honour at so early an age. He has been extensively engaged in most of the heavy commercial and railway cases of the day, and, besides having a large general practice, he has appeared in numerous appeal cases in the House of Lords. He is one of the Governors of the Charterhouse. He contested Bewdley at the election of 1880. In June 1885 he was appointed Attorney-General in the first Government of Lord Salisbury, not having up to that date been in Parlia-

ment. He held the same office from 1886 to 1892, and was reappointed in 1895 (July). From July to November 1885 he represented Launceston, and at the general election of 1885 he successfully stood for the Isle of Wight, defeating Mr. Ashley, the former Liberal member, by a majority of 436. In 1886 he was again returned by a majority of 1258, and still represents that constituency, where among his supporters he is extremely popular. When Attorney-General in the late Conservative Government, he appeared in behalf of the *Times* before the Parnell Commission. In 1893 he was one of the British representatives in the Behring Sea Arbitration case. He married, in the year 1872, Louisa Mary, the only daughter of the late William Calthrop, Esq., M.D., of Withern, in the county of Lincoln; she died in the year 1877. Addresses: Horn-ton Lodge, Kensington, W.; 2 Pump Court, Temple, E.C.; Winterford, Cranleigh, Surrey; and Athenæum.

WEDDERBURN, Alexander Dundas Ogilvy, Q.C., was born in 1854, and is the only surviving son of the late James Alexander Wedderburn, of the Madras Civil Service (see Burke's "Baronetage," s. Wedderburn). He was educated at Haileybury College, Herts, and at Balliol College, Oxford, where he graduated in honours in 1877. He was called to the Bar at the Inner Temple in January 1880; appointed a Q.C. in May 1897, and Recorder of Gravesend in November 1897. He married, in 1887, Mathilde, only child of Henry William Segelcke, Esq. Addresses: 47 Cadogan Place, S.W.; Chambers, Farrar's Building, Temple, E.C.

WEDDERBURN, Sir William, Bart., M.P., was born in Edinburgh on March 25, 1838, and succeeded his father as 4th Baronet in 1882. He was educated at Loretto School, and Edinburgh University, and gained the third place in open competition for the Indian Civil Service in 1859. He was in the Bombay Civil Service from 1860 to 1887, became a Judge of the High Court at Bombay, and finally retired, after acting as Chief Secretary to the Government of Bombay. He was President of the Indian National Conference in 1889, was a member of the Royal Commission on Indian Expenditure in 1895, and has acted as Chairman of the Indian Parliamentary Committee. After contesting North Ayrshire unsuccessfully in 1892, he was elected Liberal member for Banffshire in the following year. Sir W. Wedderburn has written numerous papers on Criminal Procedure, Arbitration Courts, Agricultural Banks, Village Communities, and other matters of Indian interest. He

was married, in 1878, to Mary Blanche, daughter of H. W. Hoskyns, of North Perrott Manor, Somerset. Address: 84 Palace Chambers, Westminster.

WEDMORE, Frederick, born at Richmond Hill, Clifton, July 9, 1844, is the eldest son of the late Mr. Thomas Wedmore, of Druid Stoke, Stoke Bishop. He is of an old Quaker family, and was educated at a Quaker private school, and studied afterwards at Lausanne and Paris. Resolved upon the pursuit of journalism and eventually literature, he entered, for a while, a Bristol newspaper office, but in 1868 came to London and wrote occasionally in the *Spectator*. His novels of "A Snapt Gold Ring" and "Two Girls," published in 1871 and 1874, were, at the time, well reviewed, but are understood to be works on which Mr. Wedmore sets small store. He has never been willing to reprint them, and it is no doubt by his volumes of short stories, "Pastorals of France," "Renunciations," "English Episodes," and "Orgeas and Miradou," that Mr. Wedmore takes serious rank as an imaginative writer. But about the time of the appearance of the first of these volumes, "Pastorals of France" (1877), he had become known to the public by his contributions to art-history and criticism; "Studies in English Art" showing his familiarity with the earlier masters of the English School, the "Masters of Genre Painting" (1880), evincing an appreciation of Dutchmen such as Terburg and Metz, and of the elegant and penetrating art of the French Eighteenth Century; while, a little later, "The Four Masters of Etching," and a much-remarked study in the *Nineteenth Century* of the great French etcher, Meryon, proved Mr. Wedmore's knowledge of the principles and history of the art of etching. More recently, his volume called "Fine Prints," in the Collector Series, dealt likewise from the point of view of the connoisseur with mezzotint and line-engraving, and in a manner singularly lively and vivid. Mr. Wedmore occasionally contributes a paper on art or dramatic subjects to the reviews, and the more important art criticisms in the *Standard*, with which journal he has been connected in this matter since 1878, have for years been known to proceed from his pen. He has nevertheless found time to produce an original study on the chief French novelist, Balzac, in the Great Writers Series (1889), to edit the English edition of M. Michel's "Rembrandt" (1893), and to write since that time the later and most characteristic volumes of his imaginative work. It should be added that Mr. Wedmore has not only given readings of his short stories before distinguished audi-

ences in England, but that he has visited America and lectured at Harvard and the Johns Hopkins University in 1885. He is an Honorary Fellow of the Royal Society of Painters, Etchers, and Engravers, and a member of the Committee of the Burlington Fine Arts Club. He is married to the youngest daughter of the late Mr. John Peele Clapham, a Yorkshire magistrate and Treasurer of County Courts of the West Riding, and by her he has one daughter. Club: Burlington Fine Arts.

WEIR, Harrison William, born at Lewes, May 5, 1824, second son of John Weir and Elizabeth Jenner, at an early age showed a great inclination for drawing animals and birds, and the study of natural history. He was, in 1837, articled to Mr. George Baxter to learn designing on wood, colour-painting, and wood-engraving. This proving quite a different kind of work to what it was represented, he used means to have his articles cancelled, but having in vain endeavoured to get released from his engagement, he of necessity served his time; thus seven years of his life, as far as the work of an artist was concerned, were entirely wasted, and therefore he, in his profession, is self-taught. He was elected a member of the new Society of Painters in Water-Colours in February 1849, and some time before exhibited his first picture, the "Dead Shot," at the British Institution. He also exhibited in Suffolk Street and at the Royal Academy, his pictures of animals, birds, domestic poultry, fruit, &c., being much sought after. Among his best are "Startled," "The Forester," "A Servant of all Work," with several of birds singing; "The Christmas Carol"—a robin, published by the *Illustrated London News*. Mr. Weir's first wood drawings appeared in the *Illustrated London News*, also the *Pictorial Times*; he was one of the original staff of the *Field*, and also the *Graphic* and *Black and White*. He has been connected, either by his pencil, pen, or both, with over one hundred and twenty books, his best known being "Routledge's Natural History," "Poultry Book," "Funny Dogs with Funny Tales," "The Adventures of a Bear," also those of "A Dog" and "A Cat." His later works, which are written by himself as well as illustrated, are: "Every Day in the Country," "Animal Stories, Old and New," "Bird Stories, Old and New"; but what he considers his chief book is, "Our Cats, and All About Them," a quite original production, and one that will last as a work of reference, the standard of excellence being given in it, as laid down by Mr. Harrison Weir for judging at shows. He also gives rules for breeding cats; among others the

tortoise-shell Tom, which have proved successful. He has furnished illustrations for the *British Workman*, the *Cottager*, *Band of Hope Review*, the *Children's Friend*, *Chatterbox*, *Little Folks*, *Poultry*, and *Fanciers' Gazette*, and numerous others; he has laboured to improve children's books and books for the poorer classes. He is a Fellow of the Royal Horticultural Society, and has been a Member of the Fruit Committee some years, having himself been awarded silver medals for excellence in fruit growing. He has paid considerable attention to the management and varieties of poultry and pigeons, and has gained several cups and other prizes, besides acting as judge at poultry and pigeon shows for over thirty years. He has also acted as judge of cage-birds at the large shows for the same period. He established the first Cat Show at the Crystal Palace, which he intended should induce the owners of cats, through the medium of winning prizes, to take more interest in the breeding and welfare of their cats. The exhibition has so far attained its objects as to have enhanced the pecuniary value of the cat. One curious fact remains to be told, and that is, although he has planned and carried out such a large amount of work during his career of half a century, he has during nearly the whole time been an invalid, his nervous prostration often lasting many days, and for the last thirty years he has not been a day without pain. At twenty-two years of age he married the eldest daughter of J. F. Herring, the well-known horse painter, and at her decease, Alice, the second daughter of F. J. Upjohn, M.R.C.S., of Rudham. Permanent address: Idlesleigh, Sevenoaks, Kent.

WEKERLE, Dr., former Premier of Hungary, was born in 1849, his father having been steward to Count Lamberg. He was educated for the law, but entered the Ministry of Finances, and was Professor of Financial Science at the University of Buda-Pesth. When M. Tisza (*q.v.*) resigned the Ministry of Finance, Dr. Wekerle was made his successor at his own suggestion in 1887. In 1892 he succeeded Count Szapary as Premier, a very popular event, as he was not of the aristocratic party. He formed a strong ministry, and entered office pledged to the reform of the marriage laws, and in 1894 he carried his Civil Marriage Bill. But owing to the persistent attacks of the Clericals he was compelled to retire in 1895, and was succeeded by Baron Banffy (*q.v.*).

WELBY, George Earle, Minister at Bogota, the only son of Prebendary George E. Welby, Rector of Barrowby,

Lincolnshire, was born in 1851, and entered the Diplomatic Service in 1874. Having been an Attaché at Buenos Ayres, 1875, he was Third Secretary at Vienna, 1877, and promoted to be Second Secretary in 1880. He was at St. Petersburg, 1882; Paris, 1886; and Madrid, 1888. In 1892 he was transferred to Buenos Ayres as Secretary of Legation, to Stockholm in 1894, and to Brussels in 1897. In October 1898 he obtained his present post.

WELBY, Lord, Reginald Earle
Welby, G.C.B., is the son of the late Rev. John Earle Welby, and was born at Hareston, Leicestershire, on Aug. 3, 1832. He was educated at Eton and Trinity College, Cambridge, and entered the Treasury in 1856. He was appointed Assistant-Financial Secretary to the Treasury in 1880, Auditor of the Civil List in 1881, and he performed the duties of Permanent Secretary of the Treasury from 1885 to 1892. He was created a G.C.B. in 1892, and was raised to the peerage in 1894 under the title of Baron Welby. He is a Commissioner of the Patriotic Fund, a Commissioner of the Exhibition of 1851, and Chairman of the Royal Commission on the Military and Civil Expenditure of India. Lord Welby is a Liberal in politics, and is a Progressive Alderman of the London County Council. In February 1899 he was appointed Hon. Secretary to the Cobden Club, and in March was elected Chairman of the London County Council in succession to Mr. MacKinnon Wood. Addresses: 11 Stratton Street, Piccadilly, W.; and the Athenæum.

WELLAND, The Right Rev. Thomas James, D.D., Bishop of Down, Connor, and Dromore, is the son of the late Joseph Welland, architect to the Ecclesiastical Commissioners of Ireland, and was born in Dublin on March 31, 1830. He was educated at Bective House School, Dublin, and at Trinity College, Dublin, where he graduated B.A. (Junior Moderator in Mathematics, and Divinity Testimonium, First Class) in 1854, and M.A. in 1857. Ordained in 1854, he was successively Curate of Carlow from 1854 to 1856, Perpetual Curate of Painstown from 1856 to 1858, and Assistant-Chaplain to the Mariners' Church, Kingstown, from 1858 to 1862. He acted as Clerical Secretary to the Jews' Society in Ireland from 1862 to 1866, and was Assistant-Chaplain of the Molyneux Asylum from 1866 to 1870. In the latter year he became Perpetual Curate of St. Thomas's, Belfast, where he remained until 1892, when he was elected Bishop of Down. Address: Ardullagh, Hollywood, co. Down.

WELLDON, The Right Rev. James Edward Cowell, D.D., Bishop of Calcutta, and late Headmaster of Harrow, son of the late Rev. Edward Ind Welldon, of Tonbridge School, and nephew of Edward Ind Weldon, D.C.L., Headmaster of Tonbridge School, who died at the age of eighty-five on Christmas Day 1896, was born April 25, 1854, educated at Eton, and obtained the Newcastle Scholarship there in 1873. He was Scholar and afterwards Fellow of King's College, Cambridge, Bell Scholar in 1874, Browne's Medallist in 1875 and 1876, Craven Scholar in 1876, Senior Classic and Senior Chancellor's Medallist in 1877. After living some time abroad he was appointed Lecturer, and subsequently Tutor, of King's College, Cambridge. He became Master of Dulwich College in 1883, and Headmaster of Harrow School in 1885. He is Chaplain to the Queen; was Member of the Royal Commission on a Teaching University for London, and has several times been Select Preacher at Oxford and Cambridge, and Speaker at various Church Congresses. In August 1898 he was appointed by the Queen Bishop of Calcutta, and Metropolitan Bishop in India and the island of Ceylon, in succession to Bishop Johnson, who had resigned for reasons of health. He is the second Scholastic Bishop of Calcutta, one of his predecessors having been the well-known and influential Dr. Cotton. He remained at Harrow until Christmas 1898. He is the author of "Translations of Aristotle's Politics," of his "Rhetoric" and "Nicomachean Ethics," "Sermons preached to Harrow Boys," and "The Spiritual Life and other Sermons," "Gerald Eversley's Friendship," 1895, and "The Hope of Immortality." Addresses: Calcutta; and Athenæum.

WELLINGTON, Duke of, Henry Wellesley, D.L., J.P., is the second son of Major-General Lord Charles Wellesley, M.P., and grandson of the 1st Duke of Wellington. He was born at Apsley House on April 5, 1846, and succeeded his uncle as 3rd Duke in 1884. He was educated at Eton, and entered the army, becoming eventually Lieut.-Colonel of the Grenadier Guards; he retired in 1882. He sat in the House of Commons as Conservative member for Andover from 1874 to 1880. He was married in 1882 to Evelyn, daughter of the late Colonel Thomas Peers Williams, M.P., of Temple House, Berkshire. The Duke is a Deputy-Lieutenant, a Justice of the Peace, and Hon. Colonel of the 3rd and 4th Battalions Duke of Wellington's West Riding Yorkshire Regiment. Addresses: Apsley House, Piccadilly, W.; and Strathfieldsaye House, Mortimer, Berkshire.

WELLS, H. G., B.Sc., is the son of Joseph Wells, a professional cricketer, and was born at Bromley, Kent, on Sept. 21, 1866. He was educated at a private school at Bromley, then at Midhurst Grammar School, and afterwards at the Royal College of Science, London. He took the B.Sc. degree at the London University with first class honours in Zoology, and he is also a Fellow of the College of Preceptors. After serving as a draper's apprentice from 1881 to 1883, he was successively a Junior Master in a school, Scholar at the Royal College of Science from 1884 to 1888, and Science Master in a private school from 1888 to 1890. In the latter year he began to coach for London University examinations, and also wrote and lectured on educational methods. After an illness in 1893 he became a journalist, and worked for the *Pall Mall Gazette*; was on the staff of the *Saturday Review* from 1894 to 1896, reviewed for *Nature*, and was dramatic critic of the *Pall Mall Gazette* in 1895. Mr. Wells now devotes his time to novel-writing, and he is the author of the following works: "Select Conversations with an Uncle," 1895; "The Time Machine," 1895; "The Stolen Bacillus," 1895; "The Wonderful Visit," 1895; "The Island of Doctor Moreau," 1896; "The Wheels of Chance," 1896; "The Plattner Story and Others," 1897; "The Invisible Man," 1897; "The War of the Worlds," 1898; "When the Sleeper Wakes," 1899. He has also published a "Text-book of Biology," 2 vols., 1892-93. Address: Heatherlea, Worcester Park, Surrey.

WELLS, Henry Tanworth, R.A., was born in London on Dec. 12, 1828, and is the only son of Henry Tanworth and Charlotte Wells. His first practice in art was as a miniature painter. When only seventeen years of age he exhibited at the Royal Academy a portrait of "Master Arthur Prinsep," a brother of Mr. Valentine Prinsep, R.A. Steadily, if at first slowly, the young artist advanced in this difficult branch of art. From the year in which he first exhibited till 1861 he never ceased to be fully represented as a miniaturist on the walls of the Academy; and in this long series were a portrait of Princess Mary of Cambridge, painted for her Majesty, 1853; a group of the painter himself and his wife in tourist costume, 1860; together with full lengths of the Duchess of Sutherland and Frances, Countess of Waldegrave. In the Academy Exhibition of 1861 he made his first appearance as an oil-painter with a full-length portrait of the volunteer colonel, Lord Ranelagh. A prominent place was awarded in 1865 to his "Preparing a Tableau Vivant"—a portrait group of

three sisters; and he also contributed a landscape, entitled "Outskirt of a Farm-yard at Twilight." In 1866 he painted his large picture of "Volunteers at a Firing Point," and in May that year he was elected A.R.A. Since that time he has been a constant exhibitor of portrait pictures, some of which are large compositions, as "The Rifles Ranges at Wimbledon," 1867; "The Earl and Countess Spencer and their Friends at Wimbledon," 1868; "Letters and News at the Loch Side," 1868; "Lord Chancellor Hatherley, with his Attendants in Procession through the House of Lords," painted on a large scale for the Fishmongers' Company; "Lord Chancellor Selborne," for the Mercers' Company; a large hunt picture, entitled "A November Morning at Bird-sall House, Yorkshire," 1875; "Mr. Robert Jardine, with Greyhounds," 1876; "The Old Stonebreaker" and "The Laurel Walk," 1879. In 1880 he exhibited his large painting of "Victoria Regina," representing the Queen in the early morning of June 20, 1837, receiving news of the death of William IV. and the homage of Archbishop Howley and the Lord Chamberlain. In 1882 was exhibited "Friends at Yewden," a group of Academicians (including the painter himself) and other friends, painted for the collection of Mr. G. C. Schwabe. This was followed by two subjects of labour, "Loading at a Quarry," 1884; and "Quarrymen of Purbeck," 1885. In 1887 appeared his largest canvas, "The Queen and her Judges," representing the ceremonial of the opening of the Royal Courts of Justice. Since that date he has sent a succession of portraits to the Royal Academy Exhibitions, amongst others Mr. Drury Lowe and his brother General Sir Drury Drury-Lowe, Mr. T. Nicholls, Master of Hounds, Mr. Justice Denman, Sir Lowthian Bell, Bart., Sir Michael Hicks-Beach, the Bishop of Ripon, the Earl of Pembroke, (in 1899) Sir Charles Scotter (presentation portrait), and Sir Robert Finlay, Q.C., M.P., Solicitor-General (for the Grillon Club Series), &c. Mr. Wells was elected a Royal Academician in June 1870. He married Joanna Mary Boyce, an accomplished artist, who died in 1861. Addresses: Thorpe Lodge, Campden Hill, W., &c.; and Athenæum.

WELLS, Commander Lionel de Latour, R.N., Captain of the Metropolitan Fire Brigade, was educated at Cheltenham, and entered the navy in July 1871. He was promoted Sub-Lieutenant in 1878, and Lieutenant in 1881, in which rank he joined H.M.S. *Iris* during the Egyptian War, and saw active service while in command of a torpedo boat. He received the Khedive's Bronze Star and

the Egyptian Medal, and in 1892 was promoted to Commander. He was a Member of the Committee of the Royal Naval Exhibition in 1891, and Manager of the naval and torpedo manoeuvres on the lake. While Commander of H.M.S. *Benbow* he jumped overboard with all his clothes on and saved the life of a boy who had fallen into the water. Commander Wells' last service afloat was that of Senior Officer in charge of the Portsmouth flotilla of torpedo-boat destroyers. As a torpedoist he had a very high reputation, and in the naval manoeuvres of 1890 he showed exceptional ability while in command of torpedo-boat No. 87, making a continuous run of 420 miles in supposed hostile waters, during which he examined fifty-three vessels. A part of this cruise took him through a crowded anchorage, and as it was necessary to escape observation he made his voyage during the night without any mishap. In 1896 he was appointed Chief Officer of the London Fire Brigade. Commander Wells is the author of "Jack Afloat" and "Souvenir of the *Victory*." He married, in 1897, Ida Caroline, daughter of the late Joseph Busk of Codicote Lodge, Welwyn, Herts. Address: Metropolitan Fire Brigade, Southwark, S.E.

WEMYSS AND MARCH, Earl of, The Right Hon. Francis Wemyss Charteris, A.D.C. to the Royal Company of Archers, D.L., LL.D. Edin., eldest son of Francis Wemyss Charteris, 8th Earl of Wemyss, and Louisa, daughter of the 2nd Earl Lucan, was born on Aug. 4, 1818, and educated at Eton and Christ Church, Oxford (B.A. 1841). In the same year he was returned to the House of Commons for the Eastern Division of Gloucestershire, which he represented until 1846, when he resigned his seat, having abandoned the support of the protective Corn Laws, and became a convert to the Free Trade measures of Sir R. Peel. In August 1847 he was returned as a Liberal Conservative for Haddingtonshire, which he continued to represent until his succession to the peerage; was a Lord of the Treasury under the Aberdeen Ministry, 1852-55, retiring with the Peelite party in February of that year from the Administration of Lord Palmerston. As Lord Elcho he took a very conspicuous part in the Volunteer movement, and he is an authority on various questions connected with the national defence and armaments. He is Colonel of the London Scottish Volunteers, and, as Chairman of the Council of the National Rifle Association, he frequently presided over the Wimbledon Rifle Meetings. He is an A.D.C., and has been a Deputy-Lieutenant of

Haddingtonshire since 1846. He succeeded to the Earldom of Wemyss on the death of his father, Jan. 1, 1883. His lordship is the author of "Letters on Military Organisation," 1871. He married Anne, daughter of the 1st Earl of Lichfield, in 1843. The Countess died, much regretted, in July 1896. Addresses: 23 St. James's Place, S.W.; Elcho Castle, Perth, &c.

WENDOVER, Viscount. See CARRINGTON, EARL.

WERE, The Right Rev. Edward Ash, D.D., Bishop-Suffragan of Derby, was born at Clifton, Bristol, Nov. 14, 1846, and is the youngest son of Thomas Bonville Were, Esq., and Frances Anne Were, daughter of William Wright, Esq., of Clifton. He was educated at Rugby, under Dr. Temple, from 1860 to 1865; gained the Second Exhibition in 1865; entered at New College, Oxford, in 1865; took First Class in Classical Moderations, 1867; and Second Class in Final School of Lit. Hum., 1869; B.A., 1870; M.A., 1872; Hon. D.D., 1889; was Assistant Master at Winchester College from 1870 to 1880; Vicar of North Bradley, Wilts, from 1880 to 1885; Examining and Private Chaplain to the Bishop of Southwell from 1885 to 1889; Vicar of St. Werburgh's, Derby, 1889; consecrated, in Westminster Abbey, Nov. 1, 1889, Bishop-Suffragan of Derby for the Diocese of Southwell. He is married to Julia, daughter of Thomas Miller, of Barrow. Address: St. Werburgh's Vicarage, Derby.

WEST, The Right Hon. Sir Algernon, K.C.B., third son of Martin West, Esq., and Lady Maria West, was born April 4, 1832, was educated at Eton, and was appointed Private Secretary to Sir Charles Wood and the Duke of Somerset at the Admiralty, and Private Secretary to Sir Charles Wood and the Marquis of Ripon at the India Office. He was also Private Secretary to the Right Hon. W. E. Gladstone when Prime Minister in 1868; was Deputy-Director of Indian Military Funds; appointed Commissioner of Inland Revenue in 1873; served on a Royal Commission on the Legal Departments; was appointed Deputy-Chairman of the Board of Inland Revenue in 1877, and Chairman of the Board in 1881. From this last post he retired in 1892. Sir Algernon West was formerly a Gentleman-Usher of her Majesty's Private Chamber; and is J.P. for Middlesex, Surrey. He married Mary, daughter of Hon. George and Lady Caroline Barrington; and was created a C.B. in 1880, and K.C.B. in 1886, and a Privy Councillor in 1894. He is a Director of

the Union Bank of London, the City and Waterloo Railway, and Northern Assurance since 1898, and an Alderman of the London County Council. Addresses: 120 Mount Street, W.; and Wanborough Manor, Guildford.

WEST, The Hon. Sir Lionel Sackville. See SACKVILLE, BARON.

WESTCOTT, The Right Rev. Brooke Foss, D.D., D.C.L., Bishop of Durham, was born near Birmingham in January 1825, and was educated at Trinity College, Cambridge, of which he was successively Scholar and Fellow, and where he took his B.A. degree in January 1848 as 23rd Wrangler in mathematical honours, and was bracketed first (with Dr. Scott of Westminster) in the first class of the Classical Tripos, and was second Chancellor's Medallist. His university career was more than ordinarily distinguished, as he obtained the Battle University Scholarship in 1846; carried off Sir William Browne's medals for the Greek Ode in 1846, and again in the following year; and obtained the Bachelor's Prize for Latin Essay in 1847, and again in 1849. He obtained the Norrisian Prize in 1850, and was ordained deacon and priest in the following year by the Bishop of Manchester. He was elected Fellow of his College in 1849, and proceeded M.A. in 1851, B.D. in 1865, and D.D. in 1870. Dr. Westcott received from Oxford University the honorary degree of D.C.L. in 1881. He received also the degree of D.D. from Edinburgh University at its Tercentenary Commemoration in 1883, from the University of Durham in 1890, and from the University of Dublin in 1898. He held an Assistant-Mastership in Harrow School from 1852 to 1867 under Dr. Vaughan and Dr. Montagu Butler. In 1868 he was appointed Examining Chaplain to the Bishop of Peterborough, and to a canonry of Peterborough Cathedral in 1869, when he left Harrow. He was elected Regius Professor of Divinity at Cambridge, Nov. 7, 1870, on the retirement of Dr. Jeremie. Dr. Westcott was nominated honorary chaplain to the Queen in 1872, and a chaplain-in-ordinary in 1879. In May 1881 was published, under the title "The New Testament in Greek," the result of the twenty-eight years' joint labours of Drs. Westcott and Hort upon the Greek text; vol. ii., containing the introduction, was published at a later date. On Oct. 21, 1882, he was elected to a Fellowship at King's College, Cambridge. Dr. Westcott resigned his residentiary canonry at Peterborough in May 1883; he was appointed one of the Archbishop of Canterbury's chaplains in the following month, and in

October of the same year he was nominated to the canonry of Westminster, vacated by Canon Barry, then Bishop-Designate of Sydney, Australia. In March 1890 he was nominated to the Bishopric of Durham, in succession to his friend, Bishop Lightfoot, and consecrated to the see on May 1. He was one of the company for the Revision of the Authorised Version of the New Testament. He sat on the late Ecclesiastical Courts Commission, and took a considerable share in the drawing up of the report. He has also taken a great interest in social questions, and has been President of the Christian Social Union from its foundation. Dr. Westcott has published Commentaries upon the Gospel of St. John (reprinted from the "Speaker's Commentary"), upon the Greek Text of the Epistles of St. John, and upon the Epistle to the Hebrews. "The Paragraph Psalter," arranged by him for the use of choirs, was published in 1879. His theological works further include: "An Introduction to the Study of the Gospels," "The History of the Canon of the New Testament," "The Gospel of the Resurrection," "The Bible in the Church," "A History of the English Bible," "The Historic Faith, being Short Lectures on the Apostles' Creed," "The Revelation of the Risen Lord," "The Revelation of the Father," "Christus Consummator," "Social Aspects of Christianity," "The Gospel of Life," "The Incarnation and Common Life," "Christian Aspects of Life," and contributions to Smith's "Dictionary of the Bible" and "Dictionary of Christian Biography." Address: Auckland Castle, Bishop Auckland.

WESTCOTT, Rev. Frederick Brooke, M.A., is the son of the Right Rev. B. F. Westcott, D.D., Bishop of Durham, and was born at Harrow on Dec. 16, 1857, at which time his father was an Assistant-Master at Harrow School. He was educated at Cheltenham College and Trinity College, Cambridge, where he was a Scholar of his College. He was Senior Classic in 1881, obtained the Bell University Scholarship, and was elected Fellow of Trinity College in 1882. He became an Assistant-Master at Rugby in 1884, and he was appointed Headmaster of Sherborne School in 1892. Address: School House, Sherborne, Dorset.

WESTLAKE, Professor John, Q.C., LL.D., was born at Lostwithiel, Cornwall, Feb. 4, 1828, and entered Trinity College, Cambridge, where he graduated B.A. 1850, being sixth Wrangler, and sixth in the first class of the Classical Tripos. He was Fellow of his College from 1851 to 1860, and was called to the Bar at Lincoln's

Inn, 1854; became Q.C. 1874, and a Bencher of Lincoln's Inn; honorary LL.D. Edinburgh, 1877. In 1885 he was elected Liberal M.P. for the Romford division of Essex, but was defeated in 1886 when he stood as a Unionist. Mr. Westlake has published "A Treatise on Private International Law, or the Conflict of Laws," 1858 (2nd edit., entirely re-written, 1880; 3rd edit., 1890); "Chapters on the Principles of International Law," 1894; also many contributions to periodicals and *Transactions*. He was one of the founders and editors of the *Revue de Droit International et de Législation Comparée*, published at Brussels; a member of the Institute of International Law, and its President at the Cambridge meeting, 1895; was Foreign Secretary of the National Association for the Promotion of Social Science, and President of its Jurisprudence Department at the Birmingham meeting, 1884; and has been Professor of International Law in the University of Cambridge, in succession to Sir H. S. Maine, from 1888. Mr. Westlake married, in 1864, Alice, daughter of Thomas Hare, Esq., author of a "Treatise on Representation." Mrs. Westlake was a member of the London School Board from 1876 to 1888, and is Treasurer of the New Hospital for Women. Address: 3 Chelsea Embankment, W.

WESTLAND, Sir James, K.C.S.I., LL.D., is the son of James Westland, banker, and was born at Dundee on Nov. 14, 1842. He was educated at Aberdeen University, and entered the Bengal Civil Service, by open competition, in 1861. After holding various district appointments he entered the financial department in 1870, was Comptroller-General from 1880 to 1885, and was a temporary member of the Council from 1887 to 1888. He retired from the Civil Service in 1889, and was, from 1893 to 1898 financial member of the Council of the Governor-General of India. Sir J. Westland, who was created a K.C.S.I. in 1895, was married to Mildred, daughter of Surgeon-Major C. J. Jackson, in 1874. Address: Calcutta, India.

WESTMINSTER, The Dean of. See BRADLEY, THE VERY REV. G. G.

WESTMINSTER, Duke of, The Most Noble Hugh Lupus Grosvenor, K.G., was born at Eaton in 1825, and succeeded his father as 3rd Marquis of Westminster in 1869. He was educated at Eton and Balliol College, Oxford. He sat in the House of Commons from 1847 to 1868 as member for Chester, and he was created Duke of Westminster in 1874. He was one of the Whig Dukes of Mr.

Gladstone's creation, but at the time of the first introduction of his great leader's Home Rule Bill his convictions drove him into the Unionist camp. His allegiance to his leader was, however, not shaken in other directions, and in Mr. Gladstone's closing years he was his chief supporter in the ex-Premier's crusade against Turkish atrocities in Armenia. He has long been very prominent and active as Chairman of the Armenian Committee, and at Chester, in August 1895, he supported Mr. Gladstone on the platform when the latter delivered his last great speech in the cause of the oppressed Christians in the East. He filled the office of Master of the Horse from 1880 to 1886, was appointed Lord-Lieutenant of Cheshire in 1883, and of the County of London in 1888. The Duke is also High Steward of Westminster, and A.D.C. to the Queen, and honorary Colonel of the 13th Middlesex Rifle Volunteers. His London residence, Grosvenor House, contains a valuable collection of pictures by old masters, and he is well known as an owner and breeder of racehorses. He married (1), in 1852, Constance, daughter of the 2nd Duke of Sutherland (she died in 1880); and (2), in 1882, Catherine Cavendish, daughter of the 2nd Baron Chesham. The Duke's eldest daughter was married in 1894 to Prince Adolphus of Teck. Addresses: Grosvenor House, London; and Eaton Hall, Chester.

WEYLER, Don Valeriano y Nicolan, Spanish general, was born in 1840. He entered the army at an early age, and after greatly distinguishing himself in the San Domingo campaign, he was appointed Captain-General of the Canary Isles in 1879. During the Carlist war of 1874-77 he was uniformly successful. Having served in the Philippines and at Barcelona, he was despatched in 1896 to Cuba to ascertain if stricter methods would succeed where the mildness of Martinez Campos had failed. His rule there was called firm by his friends, and brutal by his enemies, and it was probably the chief indirect cause in the Spanish-American war of 1898. He was recalled to Spain in October 1897, to be succeeded by Marshal Blanco, since when he has lived in retirement, and although he has been credited with the desire to become the military dictator of Spain, up to the present he remains a loyal subject of Alfonso XIII.

WEYMAN, Stanley John, roman-cist, was born at Ludlow, Shropshire, on Aug. 7, 1855. He is the second son of the late Thomas Weyman, solicitor. He was educated at Shrewsbury School and Christ Church, Oxford, and took his B.A. degree in 1877. He read for the Bar after leaving

College, was called at the Inner Temple in January 1881, and joined the Oxford Circuit, on which he practised for eight years. In 1889 appeared his first romance, entitled "The House of the Wolf," which is based on episodes in French history. His health was at that time very poor, and he was obliged to spend some time abroad and relinquish his practice. In 1890 he published "The New Rector," a novel of the school of Anthony Trollope. This was succeeded by "The Story of Francis Chudde." In 1893 he established his reputation as a writer of romance by the publication of his celebrated novel, "A Gentleman of France," since translated into French, German, and Swedish. In 1894 appeared "Under the Red Robe," a story which has been dramatised with success. His latest works are: "The Red Cockade" and "Shrewsbury," a novel of English history, and in 1899 "The Castle Inn." He married Charlotte, daughter of the late Rev. Richard Panting, C.E.I.C.S. Address: Plas Llanrhydd, near Ruthin.

WHARTON, The Right Hon. John Lloyd, M.P., is the son of the late J. T. Wharton, of Dryburn, Durham, and was born in 1837. He was educated at Eton and Trinity College, Cambridge, and was called to the Bar at the Inner Temple in 1862. He represented Durham in the House of Commons from 1871 to 1874, and he has, since 1886, been Conservative member for the Ripon Division of Yorkshire. He received the honorary degree of D.C.L. from the University of Durham in 1887. Mr. Wharton is an Alderman, and Chairman of the Durham County Council, a Director of the North-Eastern Railway, a Deputy-Lieutenant, and Chairman of Quarter-Sessions. He was married, in 1870, to Susan, daughter of the Rev. A. D. Shafto. Addresses: 42 St. James's Place, S.W.; and Dryburn, Durham.

WHARTON, Rear-Admiral Sir William James Lloyd, K.C.B., F.R.S., F.R.A.S., is the second son of the late Robert Wharton, County Court Judge, of York, and was born in London, March 2, 1843. He was educated at the Rev. Philip Nind's, Woodcote, and at the Royal Naval Academy, Gosport. He entered the Navy in 1857, became a Captain in 1880, and commanded surveys, which were carried out between 1872 and 1884, in the Mediterranean, the Red Sea, on the East Coast of Africa, and the Magellan Straits. He retired from active service in 1895, but he still holds the position of Hydrographer of the Navy. Sir W. Wharton, who is of course interested in all matters connected with hydrography and astronomy, is the author of a work on Hydrographical Sur-

veying, and has edited the "Journal of Captain Cook's first Voyage." He was created a K.C.B. in 1897, and was married to Lucy Georgine, daughter of the late E. Holland, of Dumbleton, Gloucestershire, in 1880. Addresses: Florys, Wimbledon Park; and the Athenæum.

WHEATLEY, Henry Benjamin, was born at Chelsea on May 2, 1838, and is the posthumous son of Mr. Benjamin Wheatley, book auctioneer, of 191 Piccadilly, London. He was educated privately, and was clerk to the Royal Society from 1861 to 1879, when he was appointed Assistant-Secretary to the Society of Arts, a position which he still holds. He was also Assistant-Secretary to the Royal Commission appointed for the British Section of the Chicago Exhibition, 1893. He was one of those who, under the lead of Dr. F. J. Furnivall, founded the Early English Text Society in 1864. He acted as Hon. Secretary from the foundation until 1872, and edited some of the publications of the society. He published in 1862 a little book on "Anagrams," &c.; in 1870, "Round about Piccadilly and Pall Mall"; in 1880, "Samuel Pepys and the World he Lived in"; and in 1889, "Remarkable Bindings in the British Museum." In 1884 he edited "Wraxall's Historical and Posthumous Memoirs" (5 vols. 8vo). In 1891 he completed for Mr. John Murray a work in three volumes, 8vo, entitled "London Past and Present," which was based upon Peter Cunningham's "Handbook of London." He wrote as the first publication of the Index Society (1879) a pamphlet under the title of "What is an Index?" He is general editor of the Book-Lovers' Library, for which series he has written "How to Form a Library," 1886; "How to Catalogue a Library," "The Dedication of Books to Patron and Friend," 1887; and "Literary Blunders," 1893. He has read papers before the Philological, New Shakespeare, Folk-Lore, and Bibliographical Societies, and the Society of Arts, which have been printed in their *Transactions*. He was appointed Inspector of the Cambridge University Library by the Library Syndicate in the years 1877, 1878, 1879, and 1882, and reported to the Syndicate on the condition of the library. Mr. Wheatley published in 1894 a new and complete edition of "Pepys's Diary" from the original MS. In 1897 he published "Historical Portraits" in Messrs. Bell's Connoisseur Series, and in 1899, a volume of "Pepysiana," which completes the classic edition of the "Diary." Address: Society of Arts, John Street, Adelphi, W.C.

WHEELER, Joseph, American soldier and statesman, was born at Augusta,

Georgia, Sept. 10, 1836, and graduated at West Point Military Academy in 1859. He was Lieutenant of Cavalry until 1861, when he resigned and entered the Confederate service for the war between the States, where his abilities had ample opportunity, and his rise in rank was rapid. He soon became Colonel of an Infantry Regiment, and then Brigadier-General, Major-General, and Lieut.-General of Cavalry. He commanded the Cavalry Corps of the Western Army in 1862, and was made Senior Cavalry General of the Confederate Armies, May 11, 1864. After the close of the war he became a lawyer and planter in Alabama in 1869, and was elected to Congress, serving in the Lower House of the Forty-seventh, Forty-ninth, Fiftieth, Fifty-first, Fifty-second, Fifty-third, Fifty-fourth, and Fifty-fifth Congresses. On the outbreak of war between Spain and the United States in 1898 he was one of the first to offer his services to the Government, and received an appointment as Major-General of Volunteers. He was second in command of the force sent to invade Cuba, and his energy, bravery, and ability were conspicuous in the operations resulting in the capture of Santiago, July 17, 1898. In August he returned with his troops to the United States to recuperate, after a severe campaign in tropical regions in the sickly season.

WHISTLER, James Abbott McNeill, painter, was born at Lowell, Massachusetts, in 1834, and is the son of an engineer. He studied first at the Military Academy of West Point, and afterwards, in 1857, under Gleyre, the artist, in Paris. There he was a fellow-student with George du Maurier, who has so amusingly caricatured him in "Triby." In 1859 he began to exhibit at the Royal Academy, and in 1863 settled in London. His more important paintings are: "The White Girl," 1862; "The Last of Old Westminster," 1863; "At the Piano," 1867; "Portrait of my Mother" (an arrangement in grey and black, now in the Luxembourg, in Paris) and "Portrait of Thomas Carlyle" (bought by the Glasgow Corporation in 1891), 1872, two of his most famous portraits; "Nocturne in Blue and Silver," 1882; "Arrangement in Black" (Lady Archibald Campbell), and the still better known "Arrangement in Grey and Green" (Miss Alexander), both exhibited in Munich in 1888. Of later portraits, that of Señor Sarasate is the most famous. His fame as an etcher is even higher than his fame as a painter; and he has also issued some wonderful lithographs on the architectural beauties of London, especially the picturesque side of river life. His theories on art are eminently original and individual,

and in consequence have been the subject of much criticism; he has made most interesting experiments in colour, generally succeeding best with the more subdued. In 1878 he sued Mr. Ruskin for disparaging his art in "Fors Clavigera," and at the end of a very lengthy trial he was awarded one farthing damages. He became President of the Royal Society of British Artists, and obtained for it a Royal Charter. In 1888 he married the widow of the late E. W. Goodwin, architect and writer, and a daughter of Mr. J. B. Philip the sculptor. In 1895 he was sued by Sir William Eden for not delivering up a portrait of Lady Eden which had been paid for. He was allowed to keep the portrait, but amerced in damages. Besides being a painter, Mr. Whistler has published one of the most amusing books of modern times, "The Gentle Art of making Enemies," 1890, which is in every way a remarkable human document. He has also written "Ten o'Clock," 1888. In 1898 he was the President of the International Exhibition of Art which was held at Knightsbridge. Paris address: 110 Rue du Bac.

WHITAKER, William, B.A. (London), F.R.S., F.G.S., Assoc. Inst. C.E., was born in London, May 4, 1836, and educated at St. Alban's Grammar School and at University School, London. He was appointed to the Geological Survey, April 1, 1857, and retired from the service in 1896. He has written many Geological survey memoirs, notably "The Geology of the London Basin," 1872; and "The Geology of London, and of Part of the Thames Valley," 2 vols., 1889; also many papers in the *Quarterly Journal of the Geological Society*, in the *Geological Magazine*, and in several other scientific publications, ranging from 1860 to 1898. Mr. Whitaker was Murchiston Medallist of the Geological Society, 1886; and received a medal from the Society of Arts in 1890. He was editor of the *Geological Record* for several years, and is hon. member of the Geologists' Association, of the Geological Societies of Manchester and of Liverpool, and of various other local societies. He has been President of the Norwich Geological Society, of the Hants Field Club, of the Hants Lit. Phil. Soc., of the Geological Section of the British Association, 1895, and of a Section of the Congress of the Sanitary Institute, 1886 and 1897. He was elected President of the Herts Nat. Hist. Soc. in 1897, and of the Geological Society in 1898. Permanent address: 3 Campden Road, Croydon.

WHITE, The Hon. Andrew Dickson, American educator and statesman,

was born at Homer, New York, Nov. 7, 1832. He graduated at Yale in 1853, and then travelled in Europe until 1856, when he returned to the United States and, after studying history for a year at Yale, became, in 1857, Professor of History and English Literature in the University of Michigan. This position he resigned in 1862 on account of ill-health. From 1863 to 1866 he was a member of the State Senate of New York. In 1867 he was chosen the first President of Cornell University (Ithaca, N.Y.), and he remained there until the condition of his health compelled him to retire in 1885. He visited Europe in 1867-68 for the purpose of examining into the organisation of schools of agriculture and technology, and of purchasing books and supplies for Cornell. In 1871 he was appointed one of the U.S. Commission on Santo Domingo, and in the same year was Chairman of the N.Y. State Republican Convention. From 1879 to 1881 he was the American Minister to Germany, and in 1888 was elected a Regent of the Smithsonian Institution in place of the late Asa Gray. He is also a non-resident professor of the Stanford University, in California. In 1892 he became American Minister to Russia, and in 1897 he was again sent to Germany as American Ambassador. President White gave very largely of his own means to Cornell University, and endowed the school of history and political science in that institution with his own valuable library, comprising 30,000 vols. and 10,000 pamphlets. Besides contributions to periodicals he has written "Outlines of a Course of Lectures on History," 1861; "A Word from the North-West," 1863; "Syllabus of Lectures on Modern History," 1876; "The Welfare of Science," 1876; "Paper Money Inflation in France," 1876; "The New Germany," 1882; "On Studies in General History and in the History of Civilisation," 1885; "A History of the Doctrine of Comets," 1886; "European Schools of History and Politics," 1887; and "A History of the Warfare of Science with Theology in Christendom," 1896. When in America his home is at Ithaca, New York.

WHITE, General Sir George Stewart, K.C., G.C.B., G.C.S.I., G.C.I.E., Quartermaster-General of the Forces, is the eldest son and heir of the late J. R. White, Esq., D.L., of Whitehall, Ballymena, county Antrim. He was born July 6, 1835, and entered the army as Ensign of the 27th Foot (Royal Inniskilling Fusiliers). He was promoted Captain in July 1863, and very soon after exchanged into the Gordon Highlanders, of which regiment he is now Colonel. Sir George

White saw considerable war service during the Indian Mutiny. As second in command of the Gordons he served through the Afghan War of 1879-80 with much distinction. At Charasiah he led two companies of his regiment up a steep mountain-side to attack an enemy strongly posted and greatly superior in force. When his men halted exhausted, White, seizing a rifle, rushed forward alone and shot dead the leader of the enemy. He took part in all the actions around Cabul, including the final occupation of that place; he was also present at the assault and capture of Takt-i-shah. He accompanied Lord Roberts in the march to Candahar, where he led the final charge, under a heavy fire, riding straight up to the muzzles of the enemy's guns, one of which he captured himself. He was frequently mentioned in despatches, and received the brevet of Lieut.-Colonel, besides the Victoria Cross and a C.B. He was appointed Military Secretary to the Viceroy of India in June 1880, and the following year succeeded to the command of the Gordon Highlanders. In the Sudan War of 1884-85 he was Assistant Adjutant and Quartermaster-General of the Nile Expedition. He then went to India as a Brigadier-General in the Madras District, and was chosen to command the 2nd Infantry Brigade of the Burmese Expedition of 1885. He also commanded the Upper Burma Field Force after the capture of Mandalay. Sir George White was specially mentioned in despatches, and received the thanks of the Government of India, and was also created a K.C.B. and promoted to Major-General. In 1890 he commanded an expedition into the Zhob Valley. In April 1893 he was chosen to succeed Lord Roberts as Commander-in-Chief in India, which appointment he vacated in 1897 to become Quartermaster-General of the Forces in succession to Sir Evelyn Wood, G.C.B., G.C.S.I., 1898. Address: White Hall, Ballymena, co. Antrim.

WHITE, Horace, American journalist and economic writer, was born at Colebrook, New Hampshire, August 10, 1834, and graduated at Beloit College, Wisconsin, in 1853. After his graduation he engaged in journalism; was for many years connected with the *Chicago Tribune*, and from 1864 to 1874 was its editor, and one of its chief proprietors. Conjointly with E. L. Godkin, he has, since 1883, edited the *New York Evening Post*.

WHITE, Maude Valérie, was born at Dieppe, and is of English parentage. She studied music under Sir George Macfarren at the Royal Academy of Music,

and in 1879 was elected Mendelssohn Scholar for the usual period of two years. Miss Maude Valérie White is famous as a song-writer and composer of songs, and early won popularity with her "Absent, yet Present." Other well-known songs of hers are "The Devout Lover," "Crabbed Age and Youth," and "Montrose's Love Song." She has frequently set Herrick's words to music, and has vocalised a great number of exquisite German poems. Prince Bismarck is reported to have been a devoted admirer of her work.

WHITE, Percy, author and journalist, was born in London in 1852, and is the second son of Dr. Charles White. He was educated privately and abroad, and was for some time Professor of English in a French college, after which he took private pupils, and in 1880 became a journalist. He was for ten years editor of *Public Opinion*, and at one time conducted the *Evening News*. He has written much for the press, and for reviews and magazines; and in 1893 won great success with his brilliant satire "Mr. Bailey-Martin." This novel has been followed by "A King's Diary," 1894; "Corruption," 1895; "Andria," 1896; "A Passionate Pilgrim," 1897. Mr. Percy White's sister is the well-known miniature painter. Address: 21 Holland Street, Kensington, W.

WHITE, William Hale, M.D., F.R.C.P., was born in London on Nov. 7, 1857, and is the eldest son of William Hale White, of Hastings. He received his medical education at Guy's Hospital, where he was at one time Anatomy Demonstrator, and is now Physician and Lecturer on Materia Medica. He is an Examiner in Medicine to the Conjoint Board, and has been Examiner in Medicine to London University, has been Hon. Sec. to the Clinical Society, is Fellow of the Roy. Med. Chir. Soc., and is member of several medical societies. He is author of the standard work, now in its third edition, "Materia Medica, Pharmacy, Pharmacology, and Therapeutics," and of a "Text-book of General Therapeutics," has republished his Croonian Lectures on the temperature of the body, 1897; and has been a frequent contributor to Allbutt's "System," Fowler's "Dictionary of Medicine," the "Guy's Hospital Reports," *Clinical Society's Transactions*, and other journals. He married a daughter of A. D. Fripp, R.W.S. Address: 65 Harley Street, W.

WHITE, Sir William Henry, K.C.B., Sc.D., LL.D., F.R.S., &c., Director of Naval Construction, and Assistant Controller of the Navy, was born at Devonport, Feb. 2, 1845, and educated at the

Royal School of Naval Architecture, South Kensington, when that institution was under the direction of the Lords of the Council, the Admiralty supporting it. He graduated at the head of the list of students in 1867, and received the highest diploma as naval architect (Fellow of the Royal School of Naval Architecture); was at once appointed to the Constructive Department at the Admiralty, where he remained until 1883, rising through the various grades to the rank of Chief Constructor. He was appointed Professor of Naval Architecture at the Royal School in 1870, and held that position there and at the Royal Naval College, concurrently with his Admiralty appointment, until 1881. He resigned his position in the Admiralty in March 1883, receiving a special letter of thanks from the Lords Commissioners for past services. From March 1883 to October 1885 he was engaged in the organisation and direction of the shipbuilding department of the Elswick Works of Sir William Armstrong and Co. During that period he designed and built a number of warships for foreign navies, with speeds exceeding any previously attained. He was invited by the Admiralty, in 1885, to assume the office of Director of Naval Construction, which he now holds, in conjunction with that of Assistant Controller of the Navy. He is the professional chief of the Royal Corps of Naval Constructors. During the period he has occupied this position there has been unprecedented activity in shipbuilding for the Royal Navy. The special programme of construction proposed by Lord Northbrook in 1885 was in its early stages at the date of his appointment, and he had responsible charge of its execution. Sir William White has been responsible for the designs and supervision of the construction of all the ships laid down for the Royal Navy since 1885. These number 216, with an aggregate displacement tonnage of 1,200,000 tons, 2,000,000 horsepower, and over 2000 guns. This great fleet cost nearly seventy millions for hulls, propelling machinery, armour, &c.; and the outlay on their armaments probably brings the grand total up to nearly ninety millions sterling. It includes various special programmes of new construction. That under the Imperial Defence Act of 1888 involved an expenditure of £850,000 on eight vessels built for service in Australasian waters, and maintained by grants made by the Colonies. The Naval Defence Act of 1889 provided for the construction of seventy ships at a cost of £22,500,000. These were practically finished in five years, and represented the greatest feat in new construction accomplished up to that time. Subsequently the "Spencer Pro-

gramme" of 1895, and the "Goschen Programmes," from 1896 to 1899, threw the Naval Defence Act into the shade. The average annual rate of expenditure on new construction has been more than trebled during the period Sir William White has held office, and in the current financial year (1899-1900) is to exceed £8,800,000, whereas, prior to 1887, the yearly average was only about £2,250,000. Amongst the vessels designed by Sir William White are some of the largest, swiftest, and most powerful battleships and cruisers existing in modern war-fleets. His services in connection with the Naval Defence Act were recognised by his appointment as C.B. in 1891. In January 1896 he was created K.C.B. His Majesty the King of Denmark has conferred the distinction of Knight Commander of the Dannebrog on him. The University of Cambridge has given him the honorary degree of Doctor of Science, and the University of Glasgow that of Doctor of Laws. He is also a Fellow of the Royal Societies of London and Edinburgh; President of the Institution of Mechanical Engineers; Vice-President of the Institution of Civil Engineers, the Institution of Naval Architects; Past President of the Institute of Marine Engineers; Member of the Royal Commission for the Paris Exhibition of 1900; Honorary Member of the Institution of Engineers and Shipbuilders in Scotland, the North-East Coast Institution of Engineers and Shipbuilders, the Liverpool Engineering Society, and the Society of Engineers; Member of the Association Technique Maritime of France, the Royal United Service Institution, and the Royal Institution; Fellow of the Royal School of Naval Architecture, and of the Imperial Institute. He is the author of a "Manual of Naval Architecture," which has become a standard work, and has been translated into Russian, German, and Italian, and officially approved as a textbook for the English, German, Italian, and other navies; also of a "Treatise on Ship-building," and of numerous memoirs and papers on the science and practice of ship-building, either published separately, or appearing in the *Proceedings* of the societies of which he is a member. Addresses: The Admiralty, S.W.; 39 Roland Gardens, S.W.; and Athenæum.

WHITEHEAD, Right Rev. Henry, M.A., was educated at Trinity College, Oxford, where he was a Scholar of his College, took a first class in Classical Moderations in 1874, and a first class in the final school of Lit. Hum. in 1877. He graduated B.A. in the same year, and was also elected a Fellow of his College. From 1878 to 1883 he was a Lecturer and

Tutor of Trinity College, and was ordained in 1879. During the years which he spent as an Oxford Don he acted as Preacher at St. Nicholas, Abingdon, and in 1883 he was appointed Principal of the Bishop's College, Calcutta, becoming at the same time a Fellow of the University of Calcutta. He became Examining Chaplain to the Bishop of Calcutta in 1885, and Superior of the Oxford University Mission to Calcutta in 1890. Mr. Whitehead was in February 1899 consecrated Bishop of Madras.

WHITEHEAD, Sir James, Bart., D.L., J.P., F.S.A., F.R.Hist.S., F.S.S., Lord of Wilmington Manor, Kent, is the youngest son of the late Mr. James Whitehead, of Appleby, Westmorland. He was born March 2, 1834, and was educated at the Appleby Grammar School, at that time one of the leading schools of the North. He was engaged for many years as a Bradford merchant in the City of London. In 1879 he was largely instrumental in founding the Rowland Hill Benevolent Fund for Aged and Distressed Post-Office Servants, of which he is a trustee. For many years he has taken an active part in political matters, his views being those of an advanced Liberal; and in 1880, amongst other constituencies, he was unanimously invited to contest the Western Division of Kent. At that time, however, he declined to stand, his health being so precarious as to necessitate a prolonged voyage; and in 1881 he retired from business. In 1882 a requisition signed by nearly all the electors of the Ward of Cheap was presented to him, and he was elected Alderman of that ward without a contest. In 1884-85 he served the office of Sheriff of London and Middlesex, and was decorated by the King of the Belgians with the Knight Officership of the Order of Leopold on his visit to Brussels in connection with the Congo Free State. In the same year the King of Servia invested him with the Knight Commandership of the Order of Takovo, for assistance given to the Servian Minister in this country, and for his warm advocacy of a Balkan Federation. In 1885 he was Master of the Fanmakers' Company. He is one of Her Majesty's Lieutenants for the City of London; a Deputy-Lieutenant for the county of Westmorland; and a Justice of the Peace for Kent, Westmorland, and the County of London. He was for some time Chairman of the Visiting Justices of Holloway Prison, and one of the Visitors of the City of London Asylum at Stone. For many years he was a Governor of Queen Anne's Bounty, of Christ's Hospital, and of St. Bartholomew's, St. Thomas's, and other hospitals. He is a Fellow of the Society of Antiquaries, and of the Royal Historical,

the Royal Statistical, and other learned societies. In 1884 he was induced to become the Liberal candidate for North Westmorland; and after the Redistribution Bill in 1885, and again in 1886, he contested that constituency, on each occasion suffering defeat by a small majority at the hands of the Hon. William Lowther. He is an extensive traveller, having visited most of the countries of Europe, Egypt and the Soudan, the United States, Canada, Australia, New Zealand, and other British colonies and dependencies, and is an ardent educationist, especially in regard to technical, agricultural, and higher commercial education. In September 1888 he was elected Lord Mayor of London. On November 9 he abolished the "circus" element, substituted a "state procession" for a "show," and instead thereof entertained 10,000 poor people. On the same evening his speech in favour of strengthening the navy largely influenced the decisions of the Government in their proposals to that end. On the departure from England of Mr. Phelps, the American Minister, he gave a farewell banquet of great splendour to distinguished representatives of law, science, art, and literature. When the Freedom of the City was conferred upon the Marquis of Dufferin and Ava, and later upon Prince George of Wales, he gave banquets in their honour. He induced the Corporation to entertain the Shah on his visit to England, and was subsequently decorated with the Persian Order of the Lion and the Sun. In connection with the Paris Exhibition he sent over seventy-five representative artisans to examine and report on the various exhibits connected with their respective crafts, for the instruction of their fellow-workmen and the improvement of English trade. He also visited Paris by special invitation, and was entertained by both the President of the Republic and the President of the Municipal Council of Paris. In return he himself gave a grand banquet to the Prime Minister and other distinguished Frenchmen. For his services as President of the British Section of the French Exhibition he was at the end of the year decorated with the Commandership of the Legion of Honour. Arising out of this visit to Paris was the fund which he inaugurated for sending poor persons bitten by rabid animals to the Pasteur Institute, and for acknowledging in a practical form the gratuitous services of M. Pasteur to Englishmen. In recognition of his services to the Royal Agricultural Society, when acting as Chairman of the London Committee, he was presented with the Society's Gold Medal; and for his efforts towards the restoration of orchids

in our homesteads and cottage gardens, and education in fruit-growing, he was presented with the Freedom of the Fruit-ers' Company, and was immediately advanced to the office of Master. The great Fruit Show held in the London Guildhall in the autumn of 1890 was organised by him, and in many other ways he has contributed to the advancement of fruit culture in this country. For the famine in China he raised a larger sum than was ever collected for sufferers in any foreign country, with the exception of the fund organised after the capitulation of Paris; and as a mark of appreciation he received a magnificent Tablet of Honour from the Viceroy of the two Kiang provinces of China. As chairman he established and organised a penny-a-week collection in London factories, shops, workshops, and warehouses in aid of the Hospital Saturday Fund, from which there has been a large increase in the income of the hospitals. To meet the deficiency in the equipment of the Metropolitan Volunteers he raised another fund, by which he was enabled to award to all the Metropolitan regiments sums sufficient to complete their equipment and to pay off all debts which had been incurred by them in the purchase of accoutrements. In July 1889 he established the Mansion House Association on Railway and Canal Traffic, to watch over the interests of agriculture and commerce in the revision of railway rates; and after his election to Parliament he took a prominent part in this and other important commercial matters, and was the acknowledged representative of the traders and agriculturists in the matter of railway rates. When in September 1889 the prolonged Dock Strike had dislocated the trade of London, he formed a small Committee of Mediators which was ultimately enabled to bring the conflict to a close. In addition to these more noticeable features, his mayoralty was distinguished by an extraordinary activity in educational, philanthropic, and other meetings of public utility, by an unusual number of banquets and entertainments, and by an entire abstention from political controversy. At the end of his year he was created a baronet on the recommendation of Lord Salisbury; not, as has often happened, in connection with a royal visit, but "for highly valuable services during an eventful mayoralty." In 1889 he was further decorated by the King of Servia with the Grand Cordon of St. Sava for his efforts in the cause of education. In January 1890 he retired from his candidature in North Westmorland; but in March he was induced to accept a unanimous invitation to stand for Leicester, for which he was returned unopposed at the general

election of 1892, but owing to a serious illness he retired in 1894. In 1890-91 he served the office of High Sheriff of the County of London in succession to Mr. Alfred de Rothschild, and in May of 1891 he organised and carried through a large *Conversazione* and Exhibition in the Guildhall, at which the Prince of Wales was present, in celebration of the Jubilee of Penny Postage and in aid of the Rowland Hill Benevolent Fund. In 1860 he married Mercy M. Hinds, the fourth daughter of the late Mr. Thomas Hinds, of Bank House, St. Neot's, Hunts. Address: Wilmingtton Manor, near Dartford, Kent.

WHITEHOUSE, Frederic Cope, fourth son of the Right Rev. A. J. Whitehouse, D.D. (Oxon.), LL.D. (Cantab.), second Bishop of Illinois; born in New York, Nov. 9, 1842, educated at Columbia College, New York, graduated with highest honours; studied in France, Germany, and Italy; called to the Bar, 1870. He has been known as Cope Whitehouse since 1881, from researches relating chiefly to the credibility of the Greek historians, the scientific knowledge of the ancient world, and the Semitic traditions associated with the name of Joseph. He discovered the Raiyan depression in the Egyptian desert, established its identity with the lost lake Moeris of the Ptolemaic maps, and drew plans for its restoration, claiming it as the missing factor in Egyptian prosperity; and, by putting Goshen to the south of Memphis, explains in a new and material sense the Semitic traditions, Hebrew and Arabic. Numerous papers by him, or relating to his works, have been published (see Catalogue of British Museum), in various European languages, including Greek and in Arabic. He is a member of many learned societies, and was created Commander of the Osmanieh, 1888, for his services to Egyptology and exertions on behalf of the better control of the Nile.

WHITEWALL, The Right Hon. Sir William Vallance, K.C.M.G., D.C.L., Colonial statesman, was born at Buchyst House, Devonshire, April 1, 1828, and was educated at local schools and by private tutors. He went to Newfoundland in 1843, studied law, was called to the Bar in 1852, and created a Q.C. in 1862. He entered the Legislature in 1858, and from 1865 to 1869 he was Speaker of the Assembly. He was elected to the Legislature again in 1873, and from 1873 to 1878 was Solicitor-General. In the latter year he became Premier and Attorney-General, and continued in office till 1885, when he retired for a time. In 1889 he re-entered the Legislature, resuming his place as Premier and Attorney-General, and was returned

to fill the same positions in 1893 and 1895, but failed of re-election in 1897. He was a delegate to the Imperial Government on the French treaty and other public questions in 1879 and 1881, and again on the French treaty fishery questions in 1890 and 1891, when he addressed the House of Lords. He was created a K.C.M.G. in 1880, and received the honorary degree of D.C.L. from King's College, Windsor, N.S., 1890, and from Oxford University in 1897. In the last-named year he also took part in the Queen's Diamond Jubilee, and on that occasion was sworn of the Privy Council.

WHITMORE, Charles Algernon, M.P., is the son of the late C. S. Whitmore, Q.C., Recorder of Gloucester, and was born in 1851. He was educated at Eton and Balliol College, Oxford, where he took a first class in Jurisprudence, and was elected to a Fellowship at All Souls' College in 1874. He was called to the Bar at the Inner Temple in 1876, and began to practise on the Oxford Circuit. He was Assistant Private Secretary to Mr. Matthews whilst Home Secretary, and he was Second Church Estate Commissioner in 1892. Mr. Whitmore has been Conservative member for Chelsea since 1886, and was elected an Alderman of the London County Council in 1895. He is a Justice of the Peace for Gloucestershire. Addresses: 75 Cadogan Place, S.W.; and Manor House, Lower Slaughter, Moreton-in-the-Marsh.

WHITNEY, Mrs. Adeline D. (Train), American writer, was born at Boston, Sept. 15, 1824, and has published "Mother Goose for Grown Folks," 1860 (2nd edit., enlarged, 1882); "Boys at Chequasset," 1862; "Faith Gartney's Girlhood," 1863; "The Gayworthies," 1865; "Leslie Goldthwaite," 1866; "Patience Strong's Outings," 1868; "Hitherto," 1869; "We Girls," 1870; "Real Folks," 1871; "Pansies" (poems), 1872; "Other Girls," 1873; "Sights and Insights," 1876; "Just How: a Key to the Cook-Books," 1878; "Odd or Even?" 1880; "Bonnyborough," 1885; "Holy-Tides" (poems), and "Homespun Yarns" (collected stories), 1886; "Daffodils" (poems), 1887; "Bird-Talk" (poems), 1887; "Ascuney Street," 1890; "A Golden Gossip," 1891; "Friendly Letters to Girl-Friends," 1896; and "The Open Mystery," 1897. She was married to Seth D. Whitney in 1843, and has since resided at Milton, Massachusetts.

WHITNEY, The Hon. William Collins, American statesman, was born at Conway, Massachusetts, July 5, 1841. A.B. (Yale Coll.), 1863. He studied law

at the Harvard Law School, and began its practice in 1865 in New York City, where he still resides. From 1875 to 1882 he was Corporation Counsel of New York, and from 1885 to 1889 was in the Cabinet of President Cleveland as Secretary of the Navy.

WHYMPER, Edward, F.R.S.E., artist, author, and traveller, second son of the well-known engraver and water-colour painter, was born in London, April 27, 1840, and educated at Clarendon House School, and under private tuition. He was trained as a draughtsman on wood, but preferring active to sedentary employment, undertook a series of journeys which eventually changed the course of his life. In 1861 he ascended Mont Pelvoux (then reputed to be the highest mountain in France), and discovered from its summit another mountain 500 feet higher—the Pointe des Écrins—which is the loftiest of the French Alps, and was subsequently ascended by Mr. Whymper in 1864. Between the years 1861–65, in a series of expeditions remarkable for boldness and success, he ascended one peak after another of mountains till then reputed to be inaccessible. These expeditions culminated in the ascent of the Matterhorn (14,780 feet), July 14, 1865, on which occasion his companions, the Rev. Charles Hudson, Mr. Hadow, and Lord Francis Douglas, and one of the guides, lost their lives. In 1867 he travelled in N.W. Greenland with the intention of exploring its fossiliferous deposits, and, if possible, of penetrating into its interior. This journey was characterised by Sir Roderick Murchison as “truly the *ne plus ultra* of British geographical adventure on the part of an individual.” No account of it has been published, although upon it Mr. Whymper obtained cones of magnolia, and the fruits of other trees, which demonstrated the former existence of luxuriant vegetation in these high northern latitudes. This fine collection of fossil plants was described by Professor Heer in the *Transactions of the Royal Society* in 1869; and the first set was secured for the British Museum, South Kensington, where a selection is now exhibited. In 1871 Mr. Whymper published an account of his Alpine journeys under the title “Scrambles amongst the Alps in the Years 1860–69” (London, 1871). In recognition of the value of this work its author received from the King of Italy the decoration of Chevalier of the Order of SS. Maurice and Lazarus. In May 1872 he again left Copenhagen for North Greenland, and spent the season among the mountains, returning on Nov. 9 to Denmark, bringing back from this, his second exploring journey in Greenland, rich collections,

among them fine specimens of fossil wood. In the years 1879–80 Mr. Whymper travelled in the Republic of Ecuador, exploring, ascending, and measuring the Great Andes on and near the Equator. On that journey he made the first ascents of Chimborazo (20,517 feet), Sincholagua, Antisana, Cayambe, and Cotacachi. The results were published in 1891–92 in three volumes, namely: (1) “Travels amongst the Great Andes of the Equator,” containing the narrative of the expedition; (2) “Supplementary Appendix to Travels amongst the Great Andes of the Equator,” containing descriptions of 133 new genera or species discovered on the journey; and (3) “How to Use the Aneroid Barometer,” giving the results of prolonged investigation into the behaviour of this instrument in the field and under the air-pump. On the publication of these works the Patron’s Medal was awarded to Mr. Whymper by the Royal Geographical Society. The botanical collections made on this journey are incorporated in the British Museum, South Kensington, and the antiquities in the British Museum, Bloomsbury. Mr. Whymper is an F.R.S.E.; Corresponding Member of the Société de Géographie de Paris; Hon. Member of the French, Swiss, and Italian Alpine Clubs, and numerous other kindred associations. In 1896 he published “Chamonix and Mont Blanc,” which has already got into its third edition; and in 1897, “The Valley of Zermatt and the Matterhorn.”

WHYTE, Rev. Alexander, D.D., was born at Kirriemuir, Forfarshire, on Jan. 13, 1837, and was educated at Aberdeen University and New College, Edinburgh. After being ordained, he began work as a minister at Free St. John’s, Glasgow, in 1866; but four years later he was transferred to Free St. George’s, Edinburgh, where he is now the senior minister. Dr. Whyte was Moderator of the Assembly of the Free Church of Scotland for 1898–99. He is the author of: “Commentary on the Shorter Catechism,” 1882; “Characters and Characteristics of William Law,” 1893; “Appreciation of Jacob Behmen,” 1895; “Bunyan Characters,” vols. i.–iii.; “Samuel Rutherford and Some of his Correspondents,” 1894; “Lancelot Andrewes and his Private Devotions,” 1895; “Bible Characters,” 1897; “Father John,” and “An Appreciation” of the “Religio Medici,” 1898. He is married to Jane, daughter of the late George Barbour of Bonskeid, Pitlochry, N.B. Address: 7 Charlotte Square, Edinburgh.

WICKHAM, The Very Rev. Edward Charles, D.D., Dean of Lincoln, was born on Dec. 7, 1854, at Brook Green,

Hammersmith, where his father, the Rev. Edward Wickham, formerly Fellow of New College, Oxford, and Chancellor's Prizeman, had a large and well-known school. His mother was the daughter of the Rev. C. White, Rector of Shalden, and nephew of Gilbert White, of Selborne. He was educated at Winchester College, from which he passed in 1852 to New College, Oxford, becoming in due course Scholar and Fellow. He was placed in the first class in the First Public Examination in 1854, and in the second class in the Second Public Examination in 1856, gaining the Chancellor's Prize for Latin verse (1856), and a Latin essay (1857). He became B.A. in 1857, M.A. in 1859. After spending two years as a Tutor at Winchester College, he became Tutor of New College in 1859, and resided there till 1893, when he was elected to the Headmastership of Wellington College in succession to the late Dr. Benson, afterwards Archbishop of Canterbury. This office he held till 1893. He was ordained Deacon in 1857, Priest in 1859. He was Select Preacher to the University of Oxford, 1866, 1867, 1883-85, and 1896-98, and one of H.M. preachers at Whitehall in 1872 and 1873. In 1894 he was nominated to the Deanery of Lincoln. He has published several editions of Horace, the chief one being an edition of his whole poems in two volumes, printed at the Clarendon Press in 1874 and 1891. His other works are a volume of "Wellington College Sermons" (Macmillan, 1887), and "Notes on the Catechism," &c., 1892. He was married, in 1873, to Agnes, eldest daughter of the Right Hon. W. E. Gladstone, M.P. Address: The Deanery, Lincoln.

WILBERFORCE, Canon Albert Basil Orme, famous as an advocate of temperance and latterly as an eloquent preacher, is a son of the late Bishop of Winchester, and was educated at Exeter College, Oxford, where he graduated B.A. in 1865, M.A. in 1867, D.D. in 1894. After taking Orders, he was Curate of Cuddesdon between 1866-67; Chaplain to the Bishop of Oxford, 1866-70; Curate of St. Jude, Southsea, 1861-71; Chaplain to his father at Winchester, 1870-73; and from 1871 to 1894 Rector of St. Mary's, Southampton, a fine church built by him as a memorial to his father in March 1894. He was appointed, in 1894, to a Canonry at Westminster, to which appertains the Incumbency of St. John's, Westminster. He was appointed Chaplain to the Speaker in 1896, and Select Preacher before the University of Oxford in 1897. In 1898 he published "Sermons Preached in Westminster Abbey." Address: 20 Dean's Yard, Westminster Abbey, S.W.

WILBERFORCE, The Right Rev. Ernest Roland, D.D., Bishop of Chichester, is the third surviving son of the late Right Rev. Samuel Wilberforce, successively Bishop of Oxford and of Winchester, by Emily, eldest daughter and heiress of the late Rev. John Sargent of Lavington House, near Petworth, Sussex. His lordship was born at Brighthelm, in the Isle of Wight, Jan. 22, 1840, and educated at Harrow and at Exeter College, Oxford (B.A. 1864, M.A. 1867, D.D. 1882). He was ordained Deacon in 1864 by his father, as Curate of Cuddesdon, Oxfordshire; and was admitted with Priest's orders by him in the following year. In 1866 he was appointed Rector of Middleton Stoney, Oxfordshire; but he resigned the living in 1869, and became Domestic Chaplain to his father. He was appointed by Mr. Gladstone Vicar of Seaforth, near Liverpool, in 1873; and was nominated to a Canonry in Winchester Cathedral, with mission work attached to it, in 1878. He held the post of Sub-Almoner to her Majesty from 1878 till 1882, when he was appointed first Bishop of the newly-created see of Newcastle-on-Tyne. In 1895 he was appointed Bishop of Chichester. His lordship married (1), in 1863, Frances, daughter of Sir Charles Anderson, Bart. (she died 1870), and (2), in 1874, Emily, only daughter of the late Very Rev. George Henry Connor, Dean of Windsor, and has issue, by his second marriage, three sons and three daughters. Address: The Palace, Chichester.

WILDE, Henry, F.R.S., was born at Manchester, Jan. 19, 1833. His tastes led him in early life to engage in electro-mechanical pursuits, and enabled him, in 1858-64, to make some improvements in lightning conductors and electric telegraphs, for which he obtained several patents. In 1864 he made the discovery that quantities of magnetism and electricity, indefinitely small, will induce quantities of these forces indefinitely great. To demonstrate this principle he constructed in 1865 an electro-magnetic induction machine, or "dynamo," as the machine is now known, the electro-magnet of which was excited by an initial amount of magnetism sufficient to sustain a weight of forty pounds only, while the electro-magnet was excited to a degree estimated to sustain a weight of 25 tons. The electric current generated from this machine fused a rod of platinum two feet long and one-fourth of an inch in diameter, and produced from carbon points a powerful electric light for the first time from a dynamo-electric machine. (*Proceedings of the Royal Society*, 1866; *Philosophical Transactions*, 1867.) In 1868 he discovered

the property of the alternating current to control and render synchronous the rotations of the armatures of a number of magneto-electric or "dynamo" machines, by which their united effect can be obtained without the use of mechanical gearing. (*Philosophical Magazine*, 1869.) This property is an essential feature in the great hydro-electric installations at Niagara, Geneva, and other central stations where alternating dynamos are established. Through his various inventions he successfully applied his discoveries to the production and employment of the electric searchlight in the Royal Navy, as a protection against torpedoes and for other purposes; in which branch of the service, after lengthened trials at Spithead in 1874-75, by a joint War Office and Admiralty Committee, it was definitely adopted. His methods of producing, regulating, and projecting electric light have also been utilised in the navigation of the Suez Canal during the night, by which the carrying capacity of the canal has been nearly doubled. He has also largely applied his discoveries and inventions for generating electricity to the electro-deposition and refining of metals from their solutions (1867-80), which have superseded the voltaic battery in the electroplating industries of the world, to the great advantage of the health and comfort of the operatives employed therein. In 1878 he discovered some remarkable multiple relations among the atomic weights of the natural groups of elements. The new atomic relations bear a much closer resemblance to homologous series in organic chemistry than had hitherto been observed; and just as Liebig predicted the existence of the homologous series of amides, and the properties of their compounds ten years before they were actually discovered, so the missing members of homologous series of elements have also been predicted. (*Proceedings and Memoirs of the Manchester Literary and Philosophical Society*, 1878-86.) Mr. Wilde has been engaged in important experimental researches in terrestrial magnetism, and by his invention of the magnetarium has succeeded in reproducing the principal phenomena of the earth's magnetism, and the secular changes of the variation of the mariner's compass for a period of three centuries. (*Proceedings Royal Society*, 1890-94.) He has also made other contributions to theoretical and experimental physics, in the *Philosophical Magazine*, and in the *Proceedings and Memoirs of the Manchester Literary and Philosophical Society*. On the expiration of the several patents for his inventions relating to the generation of electricity he retired from the exercise of his profession of electrical

engineer, which style and title he was the first to adopt. He takes an active interest in the advancement of science and the higher education, and has given substantial aid to institutions for the promotion of these objects. For his discovery of the indefinite increase of the magnetic and electric forces from quantities indefinitely small, the Executive Council of the International Inventions Exhibition, London, 1885, awarded him a medal of honour, although not an exhibitor. He is a Fellow of the Royal Society, Past President of the Manchester Literary and Philosophical Society, and one of the governing body of the Victoria University and the Owens College, Manchester. Address: The Hurst, Alderley Edge, Cheshire.

WILHELMINA, Hélène Pauline Marie, Queen of the Netherlands, the only child of King William III., by Queen Emma, his second wife, sister to the Duchess of Albany, was born at La Haye on Aug. 31, 1880, and succeeded to the throne, on the death of her father, on Nov. 23, 1890, her mother having shortly before, in consequence of the King's illness, been appointed Queen Regent. Accompanied by her mother, she visited this country some years ago, and spent several weeks in London, during which she visited the more important museums and public buildings of the metropolis. In April 1898 the young Queen and her mother, the Queen Regent, visited Paris, where a very favourable opinion was formed of the youthful sovereign. On August 31 of last year she reached her eighteenth birthday, and thus, according to Dutch law, attained her majority. She made her State entry into Amsterdam on September 6, and on the following day she assumed her regal responsibilities in the Nieuwe Kerk, wherein were gathered a brilliant and representative assembly. Queen Wilhelmina possesses simple tastes, is an accomplished linguist, and an experienced horsewoman.

WILKIN, Sir Walter Henry, K.C.M.G., D.L., was born in 1842, and was called to the Bar at the Middle Temple in 1875. He was elected Alderman of the Lime Street Ward, in the City of London, in 1888, served the office of Sheriff in 1892, and was Lord Mayor from 1895 to 1896. He is the head of the firm of David Wilkin and Co., yeast importers, was knighted in 1893, and was created a K.C.M.G. in 1896; he is also a Knight Commander of several foreign orders. In 1896, on the occasion of the Hungarian Millennial Exhibition at Budapest, Sir W. Wilkin warmly interested himself in the matter, and originated a Mansion House committee, which materi-

ally assisted the objects of the undertaking, and to which he gave his strong support. In April 1897 the Emperor of Austria, through the Austro-Hungarian Ambassador, Count Deym, sent his best and sincerest thanks to Sir Walter Wilkin, and expressed his conviction that to him was principally due the numerous attendance of British visitors at Budapest at the time of the exhibition. Address: 43 Gloucester Square, Hyde Park, W.

WILKINS, Mary E., author, was born at Brattleborough, Vermont, and was left an orphan at an early age, but was fortunately not thereby reduced to struggle for existence. At the age of sixteen she won a prize of fifty dollars offered by a Boston paper for a children's story. Her principal tales of New England life are: "Pembroke," "Jane Field," "A New England Nun," "Young Lucretia," "Madelon," "A Humble Romance" (perhaps her best book), "A Faraway Melody," "A Pot of Honey," "Jerome," 1897; and "Silence and other Stories," 1898. She travels much in the States, and enjoys the society of cultured Bostonians. She has been described, by perhaps rather enthusiastic admirers, as "the American Loti," but the comparison is not quite fair to either writer. Address: Randolph, Mass.

WILKINSON, The Right Rev. George Howard, Bishop of St. Andrews, was educated at Oriel College, Oxford (B.A. 1855, M.A. 1859). He was curate of Kensington, 1857-59; perpetual curate of Seaham Harbour, 1859-63; and of Auckland, Durham, 1863-67. In 1867 he was appointed incumbent of St. Peter's, Great Windmill Street, London, and in 1870 he became vicar of St. Peter's, Eaton Square. He was also an Honorary Canon of Truro Cathedral, and Examining Chaplain to the Bishop of that diocese. He was Select Preacher at Oxford, 1879-81. In January 1883 he was appointed to the See of Truro, which had become vacant by the promotion of Dr. Benson to the Archbishopric of Canterbury, and he was consecrated by the new Primate in St. Paul's Cathedral on April 25. On Feb. 9, 1893, he was elected Bishop of St. Andrews, Dunkeld, and Dunblane. He is the author of several works on devotional and other religious subjects, some of which have passed through very numerous editions. He married, in 1857, a daughter of Lieut.-Colonel Benfield des Vœux. This lady died in 1877. Addresses: Grigmoor, Birnam, Perthshire; and Athenæum.

WILKINSON, James John Garth, F.R.G.S., eldest son of James John Wilkin, son, of Durham, born in Acton Street,

Gray's Inn Lane, London, on June 3, 1812, was educated at a private school at Mill Hill, and Totteridge, Herts. He was educated for the profession of medicine, but from the first was "an unwilling medical student." He was the friend of Emerson, whom he profoundly impressed. In "Representative Men" Emerson refers to him thus: "He (Swedenborg) has at last found a pupil in Mr. Wilkinson, in London, a philosophic critic, with a coequal vigour of understanding and imagination comparable only to Lord Bacon's, who has produced his master's buried books to the day, and transferred them, with every advantage, from their forgotten Latin into English, to go round the world in our commercial and conquering tongue. This startling reappearance of Swedenborg, after a hundred years, in his pupil, is not the least remarkable fact in his history." The works referred to are Swedenborg's scientific works, or "Animal Kingdom," which amount to about half his writings. "The admirable preliminary discourses," continues Emerson, "with which Mr. Wilkinson has enriched these volumes, throw all the contemporary philosophy in England into shade, and leave me nothing to say on their proper grounds." He translated Swedenborg's "Animal Kingdom," 1843-44, and has written "Swedenborg: a Biography," 1849; "The Human Body and its Connection with Man," 1851; "The Ministry of Health," about 1856; "Unlicensed Medicine," a pamphlet; "Improvisations from the Spirit," 1857; "On the Cure, Arrest, and Isolation of Small-pox, by a New Method; and on the Local Treatment of Erysipelas, and all Internal Inflammations; with a Postscript on Medical Freedom," 1864; "Our Social Health," 1865; also "Human Science, Good and Evil, and its Works, and Divine Revelation and its Works and Sciences," 1876; "The Greater Origins and Issues of Life and Death," 1885; "Revelation, Mythology, Correspondences," 1887; "Oannes according to Berosus: a Study in the Church of the Ancients," 1888; "The Soul is Form and doth the Body Make: Chapters in Psychology," 1890; "The African," 1891; "Epidemic Man and his Visitations," 1892; "The New Jerusalem and the Old Jerusalem, the Place and Service of the Jewish Church among the Sons of Revelation," "Swedenborg among the Doctors," and "The Combats and Victories of Jesus Christ," 1896; "The Affections of Armed Powers: a Plea for a School of Little Nations," and "The Book of Edda called Völuspá: its Scriptural and Spiritual Correspondence," 1897.

WILKINSON, The Right Rev. Thomas, D.D., Roman Catholic Bishop

of Hexham and Newcastle. He is the son of George Hutton Wilkinson, Esq., Recorder of Newcastle, and its first County Court Judge, who married Miss Elizabeth Jane Pearson, heiress of Harperley Park, a large estate in the county of Durham. He was born at Harperley on April 5, 1825. His early education was in the house of the Rector of Ovingham, on the river Tyne, and at the age of thirteen he went to Harrow. Having finished his studies there he spent four years at the University of Durham. His intention then was to take orders in the Church of England, and he joined a community of young men preparing for orders at the Church of St. Saviour's, in Leeds. After many doubts as to his religious position, unsatisfied by the arguments of Dr. Pusey and others whom he consulted, he, with several of his companions at St. Saviour's, was received into the Roman Catholic Church on Dec. 29, 1846. After a course of theological studies at Oscott he was ordained priest at Ushaw College, near Durham, on Dec. 23, 1848. From that time till 1871 he led an uneventful life of constant toil among a mining population, first at Wolsingham, then at Crook, both places in the immediate neighbourhood of his father's estate. In 1865 he was elected Canon of the Chapter of Hexham. At length, in 1871, owing to the constant labours of his missionary life, his health broke down, and he was compelled to seek absolute rest. In 1887 his health having been partially restored, he was again brought to the front. Dr. Bewick, Bishop of Hexham and Newcastle, had died in 1886, and Provost Consitt, the Vicar-Capitular, was administrator of the diocese during the vacancy in July 1887. In the election of a successor to the latter the unanimous choice of the Chapter fell on Canon Wilkinson, who from that time governed the diocese till the arrival of the new bishop, Dr. O'Callaghan, in March 1888, becoming then Vicar-General and Provost of the Chapter. In consequence of the feeble health of Dr. O'Callaghan, Provost Wilkinson was in May 1888 appointed by the Pope Bishop-Auxiliary with administrative powers, and was consecrated at Ushaw College on July 25. On the resignation of Dr. O'Callaghan he was made Bishop of Hexham and Newcastle, and was enthroned in his Cathedral Church at Newcastle on Feb. 18, 1890. Since 1890 he has been President of St. Cuthbert's College, Ushaw, and this is his permanent address.

WILKS, Sir Samuel, Bart., M.D., LL.D., F.R.S., late President of the Royal College of Physicians, born at Camberwell, June 2, 1824, is the second son of

Joseph Barber Wilks, Treasurer of the East India Company. He was educated at University College, London. He was created M.D. of the London University in 1850, became a Fellow of the Royal College of Physicians in 1856, a Fellow of the Royal Society in 1870, Physician to Guy's Hospital and Lecturer on Medicine, President of the Pathological Society, a Member of the Senate of the University of London and of the General Medical Council, President of the Royal College of Physicians, Physician Extraordinary to the Queen, and Physician to the Duke and Duchess of Connaught. Sir Samuel Wilks is the author of "Lectures on Pathological Anatomy," and "Lectures on Diseases of the Nervous System," and a "Biographical History of Guy's Hospital." He was formerly for many years editor of the "Guy's Hospital Reports." He was member of the Medical Commission on the Contagious Diseases Act, 1868; a member of the Royal Commission on Contagious Diseases Act, 1871; was formerly Examiner in Medicine at the Royal College of Surgeons and at the University of London. Dr. Wilks has contributed papers on Alcoholism and Vivisection to the *Contemporary Review* and the *Nineteenth Century*. He delivered the Harveian Oration at the Royal College of Physicians June 26, 1879. He was created a Baronet in 1897, and in March 1899 was succeeded in the Presidency of the Royal College of Physicians by Dr. William Selby Church. Address: 72 Grosvenor Street, W.

WILLARD, E. S., was born at Brighton in 1853, and from an early age was bent on becoming an actor. His family had a certain old-fashioned horror of the theatre, and it was with much difficulty that the stage-struck boy induced them to let him enter upon a dramatic career. Mr. Willard obtained his first engagement at the Theatre Royal, Weymouth, and served an orthodox seven years' apprenticeship as a "stock" actor, playing every imaginable part from Macbeth to Claude Melnotte. During this period of his life he met Mr. Sothorn at Glasgow, and went on tour with him, playing Captain de Boots in "Dundreary Married and Settled," Sir Edward Trenchard in "Our American Cousin," and Mr. Smith in "David Garrick." On Boxing Day, 1875, he made his first appearance before a London audience, at Covent Garden, as Alfred Highflyer in "A Roland for an Oliver." He was then for some years in the country, played a variety of parts, and fell in with such actors as Charles Mathews, Phelps, Toole, Helen Faucit, and Barry Sullivan. In 1881 he returned to London, and took part

with Miss Helen Barry in a series of matinées at the Imperial Theatre. In the September of that year he was engaged to play Clifford Armitage in "The Lights of London," at the Princess's. This was "the first of the long series of gentlemanly villains that promised to claim Mr. Willard as their perpetual impersonator." He next played Philip Royston in "The Romany Rye," and the Spider in "The Silver King" at the same theatre, Mr. Wilson Barrett taking the title-rôle in the latter play. This latter part made Mr. Willard famous; and he followed it up by such notable impersonations as the wicked lawyer in "Hoodman Blind," the title-rôle in "Jim the Penman," and Geoffrey Delamayn in "Man and Wife." In 1888 Mr. Willard became lessee of the Shaftesbury Theatre, and as an "actor-manager" achieved a popular success in Mr. Henry Arthur Jones's "Middleman," in which play he created the part of Cyrus Blenkarn, the potter. "The Middleman" was succeeded by two other notable plays, "Dick Venables" and "Judah," in both of which Mr. Willard appeared in the title-rôle. On Nov. 10, 1890, Mr. Willard, having taken an engagement under Mr. A. M. Palmer, the New York manager, appeared in "The Middleman" at Palmer's Theatre, N.Y. Between this year and 1894 he made three consecutive tours in the United States, adding Hamlet to his repertory at Boston in October 1893, and bringing out "John Needham's Double," by Joseph Hatton, "Wealth," by Henry Arthur Jones, "A Fool's Paradise," by Sydney Grundy, and "The Professor's Love Story," by J. M. Barrie. In the summer of 1894 he returned to London, and brought out the latter play at the Comedy and then at the Garrick Theatre, where it enjoyed a long run. At the same theatre, in August 1895, he appeared in "Alabama." He pays constant professional visits to the States, and has lately been in Australia for a considerable time.

WILLETT, Alfred, F.R.C.S., received his medical education at St. Bartholomew's Hospital, at which he is now Surgeon and Demonstrator of Practical Surgery and joint Lecturer on Surgery, as well as Warden of the College. He became Fellow of the Royal College of Surgeons, Eng., in 1862, Member of Council in 1887, and was Vice-President in 1897, when he delivered the Bradshaw Lectures on "The Correction of certain Deformities by Operative Measures upon Bones." He is Surgeon to St. Luke's Hospital for Lunatics, and to the Evelina Hospital, Fellow of the Roy. Med. Chir. Soc., &c., and has been Examiner in Surgery at the University of Cambridge and the Royal College of

Physicians. He has contributed papers on cases of malformation to the *Trans. Roy. Med. Chir. Soc.* Address: 36 Wimpole Street, W.

WILLIAM II., Frederick William Victor Albert, King of Prussia and Emperor of Germany, is the grandson of Her Majesty the Queen of England, being the son of the Empress Frederick. He was born in Berlin, Jan. 27, 1859; was educated at Cassel, and passed through the ordinary discipline of that establishment until 1877, when he entered the University of Bonn. He succeeded to the throne on the death of his father, the late Emperor Frederick, June 15, 1888. His Majesty was married in Berlin, Feb. 27, 1881, to Augusta Victoria, Duchess de Sleswig-Holstein-Sonderbourg-Augustenburg, a niece of Prince Christian and has six children. In August 1889, and again in 1890, the Emperor paid a visit to the Queen at Osborne. On his return to Berlin in 1889 he received visits from the King of Sweden, the King of Denmark, the King of Italy, the Emperor of Austria, and the Czar of Russia. Subsequently he visited Athens, to be present at the marriage of his sister, the Princess Sophie, to the Crown Prince of Greece, thence he proceeded to Constantinople on a visit to the Sultan. In 1891 he paid state visits to Heligoland and to Amsterdam, and then crossed to England accompanied by the Empress. In July the Imperial pair were splendidly entertained in London and the country, and the Emperor was presented with the Freedom of the City. In 1892 the Emperor met the late Czar at Kiel, and the interviews were of a cordial character. In July the Emperor visited Norway, and took part in a whaling expedition, and in the autumn he visited Cowes and took part in the yachting competition, at the same time visiting the Queen at Osborne. In October he paid a visit to the Emperor of Austria. In April 1893 he attended the silver wedding of the King and Queen of Italy, and paid a visit to Leo XIII. In the summer he crossed to Cowes and won the Queen's Cup. During 1894 he visited the King of Italy at Venice, and in April paid a friendly visit to the Emperor of Austria. In August 1894 he came to Cowes, but was not, as before, victorious in the race for the Queen's Cup. He afterwards visited Aldershot, and was present at a sham fight. While at Aldershot he called on the Empress of the French. On Oct. 26, 1894, the Emperor accepted the resignation of Count von Caprivi, whom he had himself chosen to succeed Bismarck. The Emperor is, indeed, in no sense dependent on particular ministers. He aims at personal

government in a manner unusual in this age of constitutionalism. Thus he has initiated many laws, notably those for the repression of drunkenness and immorality, brought before the Reichstag in 1892; and in his frequent speeches to the army or to his subjects he has shown himself a conscious imitator and ardent admirer of his warlike and despotic ancestry. In a famous and characteristically Prussian speech, delivered in 1892 at the annual banquet of the Brandenburg Diet, he urged all grumblers against him and his government to shake the dust of the Fatherland off their feet as soon as possible, and at the same time reaffirmed his determination to press forward "on the path Heaven had laid out for him," knowing that "He, our old ally of Rossbach and Dennewitz, will not now leave me in the lurch." On a subsequent occasion he urged the sons of Prussia to "trustfully await the results which I may succeed in achieving in the course of the toilsome years to come." The Emperor, in addition to being a firm governor, is a man of the most varied interests and activities. In 1890 he inaugurated an International Labour Conference. In 1892 he interested himself in Primary Education, and introduced a Primary Education Bill, which he afterwards abandoned in the face of violent popular opposition. In 1893 he let it be plainly understood that he intended the new Army Bill to become law. Army matters naturally interest him more than any others. He has constantly issued orders of the day to the army, or made them speeches tending to keep up an intensely martial spirit among them. A typical rescript (January 1895) bids them crown the standards of certain regiments engaged in the Franco-German war with oak leaves on public occasions. But he is at bottom no hater of France or condemner of things French. At the time of President Carnot's death he showed his sincere sympathy with France by setting free two French officers imprisoned as spies in German fortresses, and he is reported to be a constant reader of French literature. German colonial politics have partially engrossed his attention during recent years. In 1890 he personally took possession of Heligoland, ceded to him by England, and considered it of great strategic importance. He has also concluded commercial treaties with Austria, Switzerland, Italy, and other powers. To the cause of German culture, especially science, he has been a liberal patron, and in recent years has ennobled many prominent scientific men. He is a good violinist, and has composed a song, "Sang an Ägir," which has had an enormous sale. He has even ventured into the domain of theology, and has published a collection of

sermons delivered by him to the men of his yacht, *Hohenzollern*, and in February 1892 he presented a richly-bound copy of the same to the Pope. In January 1895 the Emperor delivered a speech at a parliamentary soirée on the necessity for enlarging the navy, a subject very near his heart. In the following month he read an address to the Military Association of Berlin, referring particularly to the need for co-operation between land and sea forces, and again emphasising the need of an enlarged navy, especially with reference to the equipment of cruisers. The Emperor showed his interest in the agricultural movement by his severe reproof of a deputation of the Agrarian League for their methods of agitation, and by a promise that, if their tactics were changed, he would take a fatherly interest in them. He visited Cowes for the regatta week in August, being attended by a squadron of the German navy. In January 1896, subsequent to the defeat and capture of Dr. Jameson in the lamentable fiasco in the Transvaal, the Emperor caused much ill-feeling in this country by sending a congratulatory and laudatory telegram to President Krüger on the political situation. The relations between England and Germany were, for a time, somewhat strained. In April 1896 the Emperor made state visits to King Humbert at Venice and the Emperor Francis Josef at Vienna, being warmly received on both occasions. A rumour that the Emperor intended to visit Cowes for the regatta caused much angry demonstration in the Berlin journals. Dining at Brandenburg, the Emperor made an important speech, in which, in an unmistakable manner, he showed himself to be a socialist. He asserted that his great object was to continue the work of his grandfather, and bind closer the threads which knit the empire, and declared that he, the Emperor, would clasp hands with any man, be he workman or other, provided he were willing to assist his king in so great a work. In April the Emperor paid a semi-state visit to Vienna, where he was again well received by the Emperor Francis Josef, and the populace. On his return journey he was present at the birthday celebrations of the King of Saxony. The Berlin journals quite gratuitously gave this visit to Vienna a momentous political significance, which subsequent events have shown to be unwarranted. It was stated that as the visit was paid on the eve of the Austrian Emperor's departure for St. Petersburg, clear evidence was furnished of identity of aim between the three powers with regard to the Eastern Question. On August 25 the Emperor unveiled, with great ceremony, a statue of the Emperor William I. at

Magdeburg. He visited Kiel on December 15, 1897, for the purpose of bidding farewell to Prince Henry of Prussia on his departure for China. This event was the occasion of a remarkable speech relative to German commerce and German outposts generally. During September and October 1898 extensive preparations were made for the Emperor's proposed visit to Palestine. The imperial party arrived in Turkey in the early days of October, and were welcomed with great *éclat*, and many brilliant scenes were enacted during the progress of the visit, which had the temporary effect of drawing together the two military despotisms, of which Kaiser and Sultan are the respective heads. The ostensible object of the pilgrimage was to lay the foundation stone of a Lutheran church at Jerusalem, for which purpose the German Gustavus Adolphus Society placed 30,000 marks at the Emperor's disposal. On October 25 the Imperial cortège entered Jerusalem, and spent days visiting the various places of interest about the city. The church was consecrated by the Emperor on the 21st with much solemnity, and the spectacle was said to be one of the most impressive in modern times. The Emperor and party left Damascus on Nov. 5, 1898, and travelling *via* Malta and Crete returned overland to Potsdam. In the summer of 1899 the Emperor emphasised his desire to visit Paris during the French Exhibition of 1900 by visiting a French man-of-war and commenting eulogistically on the French navy.

WILLIAMS, Charles, "the *doyen* of the Press," as he has been called, was born at Coleraine, Ireland, May 4, 1838, of a family originally of Penrhyn and Worcestershire. He was educated at Belfast Academy under Dr. Bryce, and at Greenwich under Dr. Goodwin, and was appointed leader-writer and reviewer on the *Evening Herald* in 1859. He became a special correspondent of the *Standard* in October 1859, and was senior special correspondent of that journal till Jan. 1, 1870, when he accepted the first editorship of the *Evening Standard*, but he resigned in 1872 to resume his old post. He retired from the *Standard* in 1884 in consequence of a change of management. Mr. Williams saw some service while young in Central America, and in 1859-65 was a devoted volunteer, while, as a holiday task, he accompanied the headquarters of the army of the Loire at the beginning of the second phase of the Franco-German War, and was one of the first two correspondents in Strasburg after the fall of that city in 1870, and he witnessed the final fighting in front of Le Mans in January 1871, while on a brief holiday. In 1877 he went

to Armenia as correspondent on the staff of Ghazi Mukhtar Pacha, and published an account of his experience in a work entitled "The Armenian Campaign: a Diary of the Campaign of 1877 in Armenia and Kurdistan" (London, 1878). He served afterwards as a special correspondent at the defence, by Mukhtar Pacha, of the lines of Constantinople, and was with the headquarters of General Skobelev at the moment when the treaty of San Stefano was signed. He subsequently went through the task of recording the phases of the Berlin Congress, and in November 1878 proceeded to Afghanistan, where he visited Candahar, and wrote some "Notes on Frontier Transport in India." He accompanied the Nile Expedition, and attracted some attention by a severe criticism of Sir Charles Wilson for his conduct of the force told off to advance upon Khartoum. He was the only English correspondent with the Bulgarians under Prince Alexander in the 1885 campaign against Serbia. He made the campaign in Thessaly with the Greeks in the spring of 1897, and accompanied General Gatacre up the Nile to join the British Brigade in January 1898, returning thither in the summer of the same year. He is the senior war correspondent of the *Daily Chronicle*, and supplied that paper with vivid accounts of Omdurman, &c., although he has been forced to complain of the revived military censorship of war correspondents' news. Altogether, he has taken part in eight or nine campaigns. Among his works are a short treatise on "England's Defences," "Life of Sir Evelyn Wood," essays on military questions in the *United Service Magazine*, the *Fortnightly Review*, the *National Review*, and some reprints on ecclesiastical questions; besides articles and stories in *Temple Bar*, the *Contemporary Review*, and other periodicals. His latest publication is a book of songs for soldiers, original and selected, issued by Messrs. G. Routledge & Co., Ltd. He was for a time the managing editor of the *Evening News*, and was unanimously elected Chairman of the London District of the Institute of Journalists for the year 1893-94, during which the Conference of that body met in London. He was also unanimously chosen as President of the Press Club, of which he was a founder, in 1896-97. Permanent address: Constitutional Club, Northumberland Avenue.

WILLIAMS, C. Greville, F.R.S., is the son of S. H. Williams, solicitor, and was born at Cheltenham on Sept. 22, 1829. He was educated privately at Prestbury, near Cheltenham, and then became assistant to Dr. Anderson, Professor of Chemistry in the University of Glasgow,

where he for several years aided the professor in his chemical investigations. Subsequently he became an assistant to the late Lord Playfair, who was at that time Professor of Chemistry at Edinburgh. He is at the present time Photometric Supervisor to the Gas Light and Coke Co. Mr. Williams has published numerous papers, which have appeared in the *Transactions of the Royal Societies of London and Edinburgh*, the *Quarterly Journal of the Chemical Society*, the *Philosophical Magazine*, *Comptes Rendus de l'Académie des Sciences*, &c. Amongst his scientific achievements may be mentioned the discovery of lepidine and numerous other alkaloids of cyanine, and the hydrocarbon isoptene. He has of late years interested himself in Egyptology. Address: 36 Kenilworth Avenue, Wimbledon.

WILLIAMS, Dawson, M.D., F.R.C.P., received his medical education at University College Hospital, and graduated M.D. of London with great distinction. He was formerly House Physician and Obstetrical and Ophthalmic Assistant at University College Hospital, Registrar and Pathologist at the Victoria Hospital for Children, and Resident Clinical Assistant at the Brompton Consumption Hospital. He is at present physician to the East London Hospital for Children, as well as Fellow of the Roy. Med. Chir. Soc., and member of other medical societies. He was appointed editor of the *British Medical Journal* in succession to the late Mr. Ernest Hart in 1898, and has published "Medical Diseases of Infancy and Childhood," 1898, an article on "Attenuation of Virus and Protective Vaccination" in Cheyne's "Bacteria in Relation to Disease" (New Sydenham Society), as well as various contributions to the *Transactions of the Pathological and Clinical Societies*. Address: 101 Harley Street, W., &c.

WILLIAMS, Sir Edward Leader, K.E., M.Inst.M.E., and M.Inst.C.E., was born on April 28, 1828. His father, the late E. Leader Williams, was the engineer of the River Severn Navigation, and it was on those works that he began his professional career, which has from the first been mainly devoted to river and canal improvements. He worked under his father from 1844 to 1850, when he was appointed engineer on the Great Northern Railway, at that time being cut through Lincolnshire. He was then employed on the improvement of Shoreham Harbour, and afterwards was for several years attached to the works of the Admiralty Pier at Dover. In 1856 Mr. Leader Williams was appointed Engineer to the River Weaver Trust. Here he completed important and

extensive works, during the latter course of which he was appointed Engineer to the Bridgewater Navigation Company, which had bought the Bridgewater Canals and the Mersey and Irwell Navigation from the Bridgewater Trustees. During his tenancy of this new position Mr. Leader Williams had under consideration the possibility of so improving the Mersey and Irwell Navigation as to open it to large sea-going vessels. On June 27, 1882, a meeting was held at the house of the late Mr. Daniel Adamson, which led to the formation of a Provisional Committee "to consider the question of providing a waterway for large vessels from Manchester to the sea." Mr. Hamilton H. Fulton, C.E., and Mr. Leader Williams were subsequently invited to assist in a preliminary survey of the Irwell and Mersey Navigation, and were then appointed as joint engineers to the projected undertaking. But they differed considerably as to the best course to be pursued; Mr. Fulton advocating a tidal waterway, whilst Mr. Leader Williams suggested a scheme for using the tidal estuary for some distance, and from that point cutting a canal with four sets of locks to raise ships gradually to the level of Manchester (i.e. some sixty feet above the sea). Mr. Williams's scheme at last triumphed, and on Sept. 26, 1882, it was resolved to construct what is now known as the Manchester Ship Canal. For twelve years, till the formal opening of the canal by the Queen in the summer of 1894, Mr. Leader Williams was its chief engineer, and is now the consulting engineer. He had to surmount every variety of obstacle, but the triumphant completion of his vast design marks him out as one of the ablest and most practical men in his profession. He received the honour of knighthood in July 1894. Address: The Oaks, Altrincham, Cheshire.

WILLIAMS, Sir George, was born in 1821, and was educated at Tiverton Grammar School. He is a member of the firm of Hitchcock, Williams, & Co., warehousemen, and he holds the position of President of both the Young Men's Christian Association and of the Band of Hope Union. He received the honour of knighthood in 1894, and was married, in 1853, to Helen, daughter of George Hitchcock. Address: 13 Russell Square, W.C.

WILLIAMS, Sir John, Bart., M.D., F.R.C.P., is the third son of David Williams, of Blaenllynant, Carmarthenshire, and was born on Nov. 6, 1840. He was educated at the Normal College, Swansea, and at University College, London. He took the M.B. degree at the London University in 1866, and the

M.D. in the following year, and was elected a Fellow of the Royal College of Physicians of London in 1879. He is a Fellow of and Emeritus Professor of Midwifery at University College, and is Consulting Obstetric Physician to University College Hospital. Formerly President, and still a Fellow, of the Obstetrical Society, he is also a member of numerous other medical societies, and he is an Examiner in Midwifery at the Conjoint Board in England. Sir John Williams holds the appointments of Physician to H.R.H. Princess Beatrice, and of Physician-Accoucheur to H.R.H. the Duchess of York. He is the author of "Structure of the Mucous Membrane of the Uterus, and its Periodical Changes," and "Cancer of the Uterus"; and has contributed many articles to obstetric journals. He was married, in 1872, to Mary, daughter of Richard Hughes, of Enistawe. Addresses: 63 Brook Street, W.; Plas Llanstephen, Carmarthenshire; and Athenæum.

WILLIAMS, John Carvell, M.P. for the Mansfield Division of Nottinghamshire, of Crouch End, Hornsey, is the eldest son of the late Mr. John Allen Williams, of Putney, by his marriage with Mary, daughter of the late Mr. John Carvell, of Lambeth, and was born in 1821. He was educated at a private school, and afterwards spent some years with a firm of proctors in Doctors Commons, where he acquired considerable knowledge of ecclesiastical matters. It was the opposition of the Nonconformists to the Factories Education Bill of Sir James Graham in 1843, and afterwards to the Minutes of Council on Education, which first brought Mr. Williams into prominence. In 1847, when but twenty-six years of age, he was appointed Secretary to the "British Anti-State Church Association," afterwards designated the "Society for the Liberation of Religion from State Patronage and Control," but popularly known as the "Liberation Society." That office he held for thirty years, and on his resigning in 1877 he was appointed Chairman of the Society's Parliamentary Committee, and Deputy-Chairman of the Executive Committee; and in 1898 he became Acting Chairman. At the general election of 1885 he stood as the Liberal candidate for the newly-created Southern Division of Nottingham, and was returned by a majority of 363. During the short time that Parliament lasted he succeeded in passing the Act for extending the hours within which marriages may be celebrated from twelve (noon) to three o'clock in the afternoon. At the dissolution of 1886 he was defeated by the Conservative candidate whom he had previously opposed;

but shortly after he was invited to become the Liberal candidate for the Mansfield Division of Nottinghamshire, in prospect of the retirement of Mr. Cecil Foljambe. At the election in 1886 he was returned for that constituency by the large majority of 2496. In 1895, when the Liberal party were defeated, his majority was reduced to 1385, though he had but 61 fewer votes. He is an active member of the Committee of the Dissenting Deputies for protecting the civil rights of Dissenters, and the Congregational Union, and other public bodies, and is also President of the Hornsey Liberal Association. Ecclesiastically he is a Congregationalist, and has been deacon of churches at Surbiton and Stroud Green. He is one of the authors of "Disestablishment" in the Imperial Parliament Series (edited by Mr. Sydney Buxton, M.P.); He has also written several pamphlets on the Burials question, and various political tracts, and is a contributor to some of the public journals, besides being one of the editors of the *Liberator*. In 1849 Mr. Carvell Williams married Anne, the third daughter of the late Mr. Richard Goodman, of Hornsey, by which union he has had five sons and daughters, of whom only one survives. Addresses: 2 Serjeant's Inn, Fleet Street, E.C.; Hornsey Rise Gardens, N.

WILLIAMS, Joseph Powell, M.P., J.P., is the son of Mr. Williams, of the Vinegar Brewery, Worcester, and was born in that city on Nov. 18, 1840. He was educated at the Edgbaston Proprietary School, Birmingham. He entered life in the office of Mr. Graham, of Ludgate Hill, Birmingham, and shortly afterwards was sent to America on the business of his firm. On returning to England he settled in London, and accepted an appointment under Sir Rowland Hill, the then Secretary of the Post-Office. Whilst thus employed he had a share in establishing the Post Office Savings Bank scheme, and began also to read for the Bar; his studies in this direction were, however, suspended by his promotion to the Surveyor's Department. In 1873 Mr. Powell Williams returned to Birmingham, and associated himself with the work of the Liberal party. In 1877 he was elected a City Councillor, and soon after he became Chairman of the Finance Committee, which position he held for five years, proving himself of inestimable worth to the City Corporation. He was subsequently elected a City Alderman, and gave great assistance in establishing the Birmingham Fire Brigade upon an adequate and firm basis. Until the political split of 1886 Mr. Williams was Hon. Secretary of

the Birmingham Liberal Association and of the National Liberal Federation; he then became Chairman of the Executive of the National Liberal Union, and Vice-President of the Birmingham Liberal-Unionist Association. He has represented South Birmingham in the House of Commons as a Liberal-Unionist member since 1886, and he has acted as Financial Secretary to the War Office since 1895. He is the author of pamphlets on "County Government," and "The Ballot Act," and of an article in the *Nineteenth Century* on "The Taxation of Ground Rents." He is married to Anne, daughter of the late S. A. Bindley, F.R.C.S. Address: 6 Great George Street, Westminster, S.W.

WILLIAMS, The Right Hon. Sir Roland Bowdler Vaughan, B.A., Lord Justice of the Court of Appeal, is the son of the late Right Hon. Sir Edward Vaughan Williams, formerly one of the Judges of the Court of Common Pleas, and was born in 1838. He was educated at Christ Church, Oxford, of which Foundation he was a student, and where he graduated B.A., and was called to the Bar at Lincoln's Inn in Michaelmas Term, 1864, when he chose the South-Eastern (then the Home) Circuit, also practising as a special pleader, and at the Surrey Sessions. He received the honour of silk in 1889, and became a Judge in succession to Mr. Manisty in 1890. When the Companies Winding-up Court was established in accordance with the Act of 1890 he was appointed to preside over that Court. Here his firmness and precision in cases of great public interest won him so high a reputation that a rumour to the effect that he was to be removed elsewhere called forth violent protests from the press. In October 1897 he was appointed a Lord Justice of the Court of Appeal in the room of Lord Ludlow, resigned. He is the author of a work on the Law of Bankruptcy, and joint editor of "Williams on the Law of Executors." Sir R. Vaughan Williams married, in 1865, Laura Susanna, youngest daughter of the late Mr. Edmund Lomax, of Netley, Surrey. Addresses: 6 Trebovir Road, S.W.; High Ashe's Farm, Abinger, Surrey; and Athenæum.

WILLIAMS, Right Rev. Watkin Herbert, D.D., is the second son of the late Sir Hugh Williams, of Bodelwyddan, Flintshire, his mother having been the only daughter of Sir Watkin Williams-Wynn, Bart., and was born in 1845, and educated at Westminster School and Christ Church, Oxford, where he graduated B.A. in 1870, and M.A. in the following year. Ordained in 1870, he was Curate of Rhos-Llanerchrugog, Denbighshire, for two years, and

in 1872 he became Vicar of Bodelwyddan, Flintshire. He was appointed Chaplain to the Bishop of St. Asaph in 1889, and in the same year also became Archdeacon and Canon of St. Asaph. In 1892 Mr. Williams was offered, and accepted, the Deanery of St. Asaph, whilst only a few months ago he was appointed Bishop of Bangor in succession to Dr. Lloyd, who has been compelled to resign in consequence of illness. He is the author of "The Duties of Churchwardens," 1890; and he was married, in 1879, to Alice, daughter of the late General Monckton. Address: The Palace, Bangor.

WILLIAMSON, Emeritus Professor Alexander William, Ph.D., F.R.S., LL.D. Dublin and Edinburgh, born May 1, 1824, was educated chiefly in his father's house, by masters in London, Paris, and Dijon, and for a very short time at Kensington Grammar School, and at foreign schools. From the age of seventeen he studied in the Universities of Heidelberg and Giessen under Gmelin and Liebig. At Giessen he published his first chemical researches. He afterwards spent three years in Paris studying the higher mathematics. In 1849 he was appointed Professor of Practical Chemistry in University College, London; and in 1855, Professor of Chemistry in the same college, while still retaining the chair of Practical Chemistry. Soon after his first appointment at University College, Professor Williamson published his researches on "Etherification and the Constitution of Salts." The result of these researches had a considerable influence on the theories of chemical action, and they have been since adopted by the chief English and foreign chemists. For these important and successful labours the Royal Medal of the Royal Society was awarded to him in 1862. He has twice been President of the Chemical Society. In 1873 he was elected President of the British Association for the Advancement of Science. The same year he was elected Foreign Secretary of the Royal Society, a Corresponding Member of the French Academy, and a Fellow of the Berlin Chemical Society. In 1874 he was elected Treasurer of the British Association on the retirement of Mr. Spottiswoode. In November 1875 the Royal Academy of Science at Berlin elected him a Corresponding Member of the Section of Physics and Mathematics. He was appointed member of the Senate of the University of London. In April 1876 he was appointed Chief Gas Examiner to the City of London. The University of Dublin conferred on him the honorary degree of LL.D. in 1878, since which date the University of Edinburgh

has conferred on him the degree of LL.D. He is a member of the Royal Society of Edinburgh and of the Royal Irish Academy. Professor Williamson took an active part in promoting the establishment of degrees of science at the University of London; and for some years held, conjointly with the late Professor William Allen Miller, the office of Examiner in Chemistry. He is also a Corresponding Member of the Reale Accademia dei Lincei in Roma, LL.D. of Glasgow, of the Royal Society of Science at Göttingen, and of the Reale Accademia delle Scienze di Torino. Dr. Williamson has lately taken an active part in promoting the formation of a Teaching University in London. In 1887 Professor Williamson resigned his professorship at University College, and was elected Emeritus Professor. In 1889 he resigned his post of Foreign Secretary to the Royal Society. He has written "Chemistry for Students," various papers on "Etherification," "The Development of Difference the Basis of Unity," being the inaugural lecture to the Faculty of Arts at University College on his appointment there in 1849, "On the Atomic Theory," "The Composition of the Gases evolved by the Bath Spring called King's Bath," a paper "On a New Method of Gas Analysis," jointly with W. J. Russell, Ph.D., "On the Unit Volume of Gases," "On the Classification of the Elements in Relation to their Atomicities," "Experimental Science the Basis of General Education," "A Plea for Pure Science," "Address to the British Association," at Bradford, 1873. He married, in 1855, the third daughter of Professor T. Hewitt Key, F.R.S., of University College. Addresses: High Pitfold, Haslemere; and Athenæum.

WILLIAMSON, Benjamin, Sc.D., F.R.S., D.C.L., Senior Fellow, and member of the Governing Body, Trinity College, Dublin, was born in 1827 at Cork; educated at Kilkenny College and Trinity College, Dublin, where he graduated in 1848 as First Senior Moderator in Mathematics and Mathematical Physics. He was elected Fellow of Trinity College in 1852, and appointed a College Tutor in 1858. In 1871 he published "A Treatise on the Differential Calculus," which reached, in 1892, its 8th edition. In 1872 he produced a companion volume on the "Integral Calculus," of which the 7th edition was published in 1896. In 1884, in conjunction with F. A. Tarleton, F.T.C.D., he brought out a "Treatise on Dynamics," of which a 2nd edition appeared in 1889. In 1894 he published an "Introduction to the Theory of Stress and Strain of Elastic Solids." Mr. Williamson was elected a Fellow of the Royal Society

in 1879, and in 1884 was appointed to the Professorship of Natural Philosophy in his University. In 1892 the honorary degree of D.C.L. was conferred on Mr. Williamson by the University of Oxford. Mr. Williamson contributed several articles to the 9th edition of the "Encyclopædia Britannica," of which may be mentioned those on the "Infinitesimal Calculus," "Calculus of Variations," "Variable Complex," and "MacLaurin." He also contributed articles to the *Quarterly Journal of Mathematics*, *Hermathena*, as well as to other scientific journals. He married Agnes, daughter of the Rev. W. Wright, Vicar of Selston, Nottingham. Addresses: Trinity College, Dublin; 1 Dartmouth Road, Dublin.

WILLIAMSON, Mrs. Charles Norris, née Alice Muriel Livingston, was born in 1870 at the Livingston Manor House, Poughkeepsie, New York, U.S.A., and is the daughter of Mark Livingston, of the New York Bar. She went on the stage, and toured through the greater part of the United States in a variety of parts, sometimes with her own company. Later, she came to England as correspondent for four of the leading American newspapers. She contributed largely to serial fiction in England and America, and has published "The Barn Stormers," 1897, a novel based on some of her experiences of the stage; "A Woman in Grey" and "Fortune's Sport," 1898, and "A Newspaper Girl," 1899. Address: Hill Farm, Walton-on-Thames.

WILLIAMSON, Charles Norris, journalist and author, was born at Exeter, Devonshire, in 1857, being the son of the Rev. Stewart Williamson, a Nonconformist minister. He was educated at University College School, London, and passed into University College, where he took up the science course. For three years he devoted himself to the study of engineering, going through a practical training in a Lambeth workshop, and undertaking engineering work in Belgium and France. In 1880 Mr. Williamson abandoned engineering for journalism, and after the usual difficulties and struggles, obtained a post on the editorial staff of the *Examiner*. When the *Examiner* came to an end Mr. Williamson joined the editorial staff of the *Graphic*, on which he remained for several years. Resigning his appointment in 1889, Mr. Williamson formed a company and collected capital to produce a new illustrated paper; and in February 1891 he brought out *Black and White*, remaining managing director and managing editor until July 1893, when he resigned his offices. In 1898-99 he was editor of the

West End Review. On the death of Thomas Carlyle, in 1884, Mr. Williamson wrote, in collaboration, "Memorials of the Life and Letters of Thomas Carlyle" (two volumes); and he has been a constant contributor to the London press. Address: Hill Farm, Walton-on-Thames.

WILLIAMSON, David, fifth son of Mr. David Williamson, J.P., was born at Guildford, Nov. 16, 1868, was educated privately, and subsequently passed through the varied routine of printing, lithography, and binding. He edited "Hazzell's Annual" for two years. After spending a year in rest and travel, he joined the staff of the *Illustrated London News*, especially with a view to assisting Mr. Shorter in the preparation of the *Sketch*. He became assistant editor of the *Illustrated London News* in 1895, but was appointed to the editorship of the *Windsor Magazine* in November of that year. He edited for two years and a half the *Windsor Magazine*, resigning that work in April 1898, when he became editor of the *Temple Magazine*. He has been a constant contributor to newspapers and magazines, and has published: "Handel Festival Points and Portraits," 1891; "The German Reeds and Corney Grain," 1895; "Worcester Festival Notes," 1896; "Victoria, R. & I.," 1897; "William Ewart Gladstone, Statesman and Scholar," 1898; and "Gladstone the Man," 1898. He married, in 1896, Margaret, daughter of Mr. John Allan. Address: 31 Romola Road, Herne Hill, S.E.

WILLIAMSON, F. J., private sculptor to the Queen, was born in 1833, and on his mother's side is related to the great Lord Nelson. For nearly forty years there has scarcely been a period when Mr. Williamson has not been at work for her Majesty. After studying at the School of Design, Somerset House, he worked in the studio of the late Mr. John Bell, and was associated with the late Mr. J. H. Foley, R.A., for twenty years, first as pupil and then as assistant. In 1855 Mr. Williamson was presented to the Queen by Princess Louise, and at her Majesty's command carried out the beautiful memorial at Claremont House to the memory of the late Prince and Princess Charlotte. He has executed busts or statues of nearly every member of the Royal Family, all of which have been repeated for the Queen. The Prince of Wales in unveiling the statue by this artist in the Examination Hall of the Royal Colleges of Physicians and Surgeons, said that "nowhere could a better statue of her Majesty be found." Mr. Williamson has also completed a great quantity of ideal work, some of which has been purchased

by the Queen. He was the sculptor of the fine recumbent figure of Dean Milman in St. Paul's Cathedral, has set up rather more than a dozen public statues, and executed more than 200 busts. The recumbent portrait figures of the Master of the Rolls and Lady Esher, which surmount the family vault in Esher churchyard, was also the work of Mr. Williamson, whose studio, overshadowed by the chestnut trees of Claremont Park, used to be a favourite resort of the late Duke of Albany. He has been an exhibitor at the Royal Academy's exhibitions for more than forty years. Mr. Williamson has a son, a professor of chemistry, and two daughters. Address: Esher, Surrey.

WILLIS, His Honour Judge William, Q.C., B.A., LL.D., is the son of William Willis, a straw-hat manufacturer of Dunstable and Luton, and was born at Dunstable on April 29, 1835. He was educated at the Free Grammar School, Dunstable, at Hockliffe, Bedfordshire, Hatfield, and Huddersfield College. He began life in business at Luton in 1850, and was afterwards engaged in an office in London. In 1857 he matriculated at the London University, graduated B.A. in 1859, and LL.D., with gold medal, in 1865. He had also entered at the Inner Temple in 1858, obtained a studentship given by the Inns of Court in 1860, and was called to the Bar in 1861. Mr. Willis was appointed a Q.C. in 1877, was at one time an Examiner in Common Law at the University of London, and became Judge of the County Courts of Norfolk and Cambridge in 1897. He was returned to the House of Commons as member for Colchester in 1880, but he unsuccessfully contested the Peckham Division of Lambeth in 1885 and 1886. He is the author of "Lectures on the Law of Negotiable Securities," and is married to Mary Elizabeth, daughter of Thomas Moody, of Blackheath. Address: Scarning Grange, East Dereham, Norfolk.

WILLOX, Sir John Archibald, M.P., is the son of John Willox, author and journalist, and was born at Edinburgh in 1842. He was educated at Edinburgh and Liverpool Colleges, and began life in the office of the *Liverpool Courier*, where he was employed successively as reporter, sub-editor, and editor, and of which he is now the principal proprietor. He takes a keen interest in journalism, and has had a good deal to do with the Press Association, the Institute of Journalists, and the Newspaper Society. Being also a tobacco manufacturer in Liverpool and London, under the title of Cope Bros. & Co., he is, of course, largely interested in this

trade. He has represented the Everton Division of Liverpool, in the Conservative interest, since 1892, and he received the honour of knighthood in 1897. He is married to Sara, widow of Thomas Cope, J.P. Address: 9 Abercromby Square, Liverpool.

WILLS, The Hon. Sir Alfred, a Judge of the Queen's Bench Division, was born Dec. 11, 1828, and is the second son of the late William Wills, J.P., of Edgbaston, Birmingham, and Sarah, daughter of Jeremiah Ridout. He was educated at the Proprietary School, Edgbaston, and at University College, London. In 1846 he gained the University of London Exhibition in Mathematics and another in Classics. He became B.A. in 1849, Scholar in Classics in 1849, LL.B. in 1851, Scholar in Law in 1851, Flaherty Scholar in Classics at University College in 1850, and was subsequently made Fellow of the same College. Called to the Bar at the Middle Temple in 1851, he was made a Q.C. in 1872, and appointed Judge in 1884. He was first Recorder of Sheffield, 1881-84, President of the Railway and Canal Commission, 1888-93, and Treasurer of the Middle Temple, 1892-93. He is the author of "Wanderings among the High Alps," "The Eagle's Nest," a translation of Rendu's "Théorie des Glaciers de la Savoie," and is editor of "Wills on Circumstantial Evidence." He married (2) Bertha, daughter of Thomas Lamb Taylor, Stars-ton, Norfolk, in 1861. Addresses: 7 Chelsea Court, Chelsea Embankment, S.W.; and Le Nid d'Aigle, Sixt, Haute-Savoie; and Athenæum.

WILSON, Alexander Johnstone, son of the late George W. Wilson, of Aberdeen, H.M. photographer for Scotland, was born at Forglen, in Banffshire, Oct. 20, 1841. He was educated by Dr. George Ogilvie, late of Watson's College, Edinburgh. He assisted his father for some years and then came to London in 1872. He was junior sub-editor of the *Economist*, 1872-73; assistant city editor of the *Times*, 1874-81; city editor of the *Pall Mall Gazette*, 1881-83; and has been city editor of the *Standard* since 1883. He has been proprietor and editor of the *Investors' Review* and the *Investment Index* since 1892. He has published: "The Resources of Modern Countries," 1878; "Banking Reform," 1879; "Reciprocity, Bimetallism, and Land Tenure Reform," 1880; "The National Budget," in Macmillan's Citizen Series, 1882; and has edited "Supplement to M'Culloch's Dictionary of Commerce," 1882. He has also written numerous essays in the *Spectator*, *Fraser's Magazine*, *Macmillan's Magazine*,

Fortnightly, *Bradstreet's Friend of India*, and other periodicals. In 1882, at the special request of the late Marquis de Riscal, he wrote a small book on the English National Budget which was translated into Spanish. Address: Annandale, Atkins' Road, Clapham Park, S.W.

WILSON, The Rev. Ambrose John, D.D., Headmaster of Lancing College, Sussex, was born on Jan. 13, 1853, at Banbury, and is the second son of Mr. Joseph Wilson, C.E., Principal of the Crystal Palace Engineering School, and Harriet, daughter of the late Ambrose Moore. He was educated at Merchant Taylors' School. In his final school examination in 1871 he came out head of the school in both Classics and Mathematics, and was at the same time elected to a Foundation Scholarship at St. John's College, Oxford, as well as to the School Tercentenary Scholarship. He obtained Second Class Honours in Classical Moderations. In the Final School of Literæ Humaniores he obtained a First Class, being one of the best Firsts of his year, and was almost immediately elected to an open Fellowship at Queen's College, Oxford. He took his B.A. degree in 1876, and was appointed simultaneously Lecturer at Queen's and St. John's Colleges. He was ordained Deacon in December 1876 by Bishop Mackarness. In June 1877 he was appointed Tutor to St. John's College, but having gone during the vacation to gain experience in parish work in Great Yarmouth, he found the strain of continuous work too great, and was obliged to throw up his appointments and seek change and rest in a sea voyage. He proceeded to Cape Colony, where, in March 1878, he was ordained Priest by the Bishop of Cape Town, and took his degree of M.A. Oxford, "in absence." While at the Cape he was Classical Lecturer in the Diocesan College, Rondebosch, and afterwards Headmaster of St. Mark's Grammar School, George, during which time he was appointed Classical Examiner for the M.A. degree in the Cape University. Having returned to England in 1880, he was appointed Headmaster of the Carlisle Grammar School, and during the time he was there the school nearly trebled its numbers. He took his B.D. degree in 1883 and proceeded D.D. in 1884. In 1885 he was appointed to the Headmastership of the Church of England Grammar School, Melbourne. The school greatly increased in numbers, and he raised funds for the erection of a School Chapel, and added to the school buildings; while the school itself gained many high honours in the public examinations in classics, mathematics, science, and modern languages. After a residence in the colony of nine

years he returned to England in 1893, and after taking temporary work at Merchant Taylors' and at Rugby, he was appointed in December 1894 to the Headmastership of Lancing College, Sussex. He married, in 1880, Julia Mary, daughter of Dr. Henry Lawrence, of George, South Africa. Address: Lancing College, Sussex.

WILSON, Rear-Admiral Sir Arthur Knvvet, K.C.B., *U.C.*, was born on March 4, 1842, and entered the navy in 1855. He served as midshipman in H.M.S. *Algiers* in the Black Sea during the Russian war, and was also present at the bombardment of Sebastopol. He received the Crimean and Turkish medals. His next war service was in China, as midshipman of H.M.S. *Calcutta*. There he took part in the capture of the Peiho forts and landed with the naval brigade at the attack on Canton, for which he was awarded the China Medal with two clasps. He was promoted Lieutenant in 1861, Commander in 1873, and Captain in 1880. As Captain of H.M.S. *Hecla* he was present at the bombardment of Alexandria in 1882, and remained in Egyptian waters during the campaign. He received the Egyptian Medal with clasp, and the Order of the Medjidieh, third class. In the Soudan war of 1884 Admiral Wilson served in the Naval Brigade, and was present at the battle of El Teb. During this fight he performed an act of gallantry which Sir Redvers Buller described as one of the most courageous he had ever witnessed. There was a gap in the square, and five or six of the enemy seeing it, rushed forward, attempting to pierce the ranks. There Captain Wilson advanced to meet them alone, and breaking his sword in his effort to cut one of them down, would not retire a step, but held his ground, knocking them down with his fists. Either by a miracle or the surprising nature of his attack he escaped with a few wounds, and the square closing up rescued him. He was mentioned in despatches, and received the *U.C.* and a medal with Suakim and El Teb clasps for these services. He was also presented with a sword by the torpedo officers of H.M.S. *Vernon* "in admiration of his gallantry at the battle of El Teb." He was appointed Aide-de-camp to the Queen in 1892, and was created a C.B. in 1887, in which year also he became Assistant-Director of Torpedoes at the Admiralty; K.C.B., 1897. He was promoted to the rank of Rear-Admiral in 1895, and commanded the torpedo squadron at the naval manœuvres of that year. In the manœuvres of 1896 he was Second-in-Command of the Reserve Fleet, and was appointed a Lord Commissioner of the Admiralty and Controller of the Navy in

August 1897. He is also the inventor of double-barrelled torpedo tubes. Address: 15 Ermin's Mansions, S.W.

WILSON, Sir Charles Rivers, G.C.M.G., C.B., was born in London, Feb. 19, 1831, and educated at Eton and Balliol College, Oxford. He was appointed Clerk in the Treasury in February 1856; was Private Secretary consecutively to Mr. James Wilson and Mr. George Alexander Hamilton, Secretaries of the Treasury; Acting Private Secretary to Mr. Disraeli, when Chancellor of the Exchequer, from August 1867 to February 1868; Private Secretary to Mr. Lowe, Chancellor of the Exchequer, from December 1868 to April 1873; and was appointed Comptroller-General of the National Debt Office in April 1873. Mr. Wilson represented (with the late Professor Graham) her Majesty's Government at the International Coinage Commission in 1867, and acted as Secretary to the Royal Commission appointed to examine the question of an International Coinage in 1868. On the return of Mr. Cave to England from his financial mission to Egypt, Mr. Rivers Wilson, at the request of the Khedive, went to Egypt in March 1876, with the view of his acceptance of a financial post in that country; but after the issue of the decree of May 7, 1876, by which an arbitrary readjustment of the Public Debt of Egypt was proposed, he returned to England, and resumed his post at the National Debt Office. On July 29, 1876, he was appointed one of the British Government Administrators of the Suez Canal Company; on Jan. 22, 1877, he was appointed a Royal Commissioner for the Paris Exhibition of 1878; on March 30, 1878, he was appointed Vice-President, and in the absence of M. de Lesseps, acted as President, of an International Commission of Inquiry, instituted by the Khedive at the instigation of the foreign governments, to examine the resources of Egypt, and propose measures for remedying the financial disorder in that country. The Report of the Commission, Aug. 19, 1878, traced the whole of the mischief to the system of personal administration by the Viceroy, and proposed that his Highness should surrender his estates and those of his family to make good the deficit in the revenue, and pay the large floating debt of the country. The immediate consequence of the presentation of their Report was an acceptance by the Khedive of all its conclusions, and a formal announcement to Mr. Rivers Wilson of the determination of his Highness to abandon his actual system of government for one more in conformity with European experience, and to govern in future by means of a

responsible ministry. The formation of the new cabinet was entrusted to Nubar Pacha, who offered to Mr. Rivers Wilson the post of Finance Minister, while M. de Blignières, a distinguished French official, was appointed Minister of Public Works. With the consent of her Majesty's Government Mr. Rivers Wilson accepted this position (September 1878 until Jan. 1, 1881), when he would have been at liberty to return to his office of Comptroller-General of the National Debt Office. In April 1879, however, the Khedive struck the blow he had long been meditating. He dismissed Mr. Rivers Wilson and M. de Blignières; and soon afterwards Mr. Rivers Wilson was recalled by the English Government, in order to resume his duties at the National Debt Office. He was created a K.C.M.G. in January 1880. On April 5 in that year the new Khedive, Tewfik Pacha, signed a decree appointing Sir Rivers Wilson President of the International Commission of Liquidation. In October 1880 he received the royal license and authority to accept and wear the insignia of the First Class of the Turkish Order of the Medjidieh. In May 1881 Sir Rivers Wilson was appointed a Royal Commissioner for the negotiation of a Treaty of Commerce with France; and in March 1885 he was one of the delegates who assembled in Paris for drawing up an Act relative to the navigation of the Suez Canal. He was also one of the British delegates at the Monetary Conference at Brussels in November and December 1892. He was made a G.C.M.G. on March 15, 1895, and retired from the public service in that year. He subsequently accepted the post of President of the Grand Trunk Railway of Canada, and in 1898 was appointed one of the Royal Commissioners for the Paris Exhibition of 1900. He married (2), in 1895, Violet, sister of the seventh Lord Vaux. Address: 21 Pont Street, S.W.

WILSON, Major-General Sir Charles William, R.E., K.C.B., K.C.M.G., D.C.L. Oxon., LL.D. Edin., M.E. Dublin, F.R.S., F.R.G.S., &c., was born in Liverpool, March 14, 1836, and is the son of the late Edward Wilson, of Hean Castle, Pembrokeshire. He was educated at Cheltenham College, and passed second in the first open competition for admission to the Royal Engineers, and entered the Royal Engineers in 1855. After passing through the usual grades he became Major-General in 1894. Before that date, however, he had gained distinction of a special kind, first as Secretary to the North American Boundary Commission, then for his surveys of Jerusalem and the Sinaitic Desert, then by his

work in connection with the Palestine Exploration Fund, then as Director of the Topographical Department of the War Office, then by his organisation of the Intelligence Department, in which he served as Assistant Adjutant-General, then as Director of the Survey of Ireland, then as British Commissioner on the Servian Boundary Commission, and then as Consul-General appointed in pursuance of the Anglo-Turkish Convention in Asia Minor, a post which he held from 1879 to 1882. He served in the Egyptian Expedition of 1882, for which he obtained a Medal and a Bronze Star; and was afterwards attached to Lord Dufferin's Special Mission in Egypt. When the Soudan Expedition was sent out, Sir Charles Wilson was appointed Chief of the Intelligence Department. He was present at the actions of Abu Klea and Gubat, and when Sir Herbert Stewart received his fatal wound the command of the Desert Column devolved upon Sir Charles Wilson. He led the advance to the Nile, fought the action at Metammeh, and commanded the force in its attempt to reach Khartoum and communicate with General Gordon, the story of which he has told in his book "From Korti to Khartoum." Among his other publications may be mentioned "Picturesque Palestine" (Jerusalem), "Lord Clive" (Men of Action Series), and Murray's "Hand-books" to Constantinople (1892) and to Asia Minor (1895). For his services he was thanked by Government, and in 1885 was made a K.C.B. He was Director-General of the Ordnance Survey of the United Kingdom from 1886 to 1894, and Director-General of Military Education from 1895 to March 1898, when he retired. He married, in 1867, Olivia, daughter of Col. Duffin, of the Bengal Cavalry. Addresses: 9 Warwick Square, S.W.; and Athenæum.

WILSON, David, C.M.G., V.D., Governor of British Honduras, Honorary Colonel of the Trinidad Volunteers, was born in 1838. He is the son of the late Very Rev. Dean Wilson, of Aberdeen. He was a Magistrate in Trinidad from 1870 to 1878; Commissioner of the Northern Province, 1878-1897. He has been the leading spirit of the Trinidad Volunteer force from its inception in 1879 until 1897, when he received his present appointment. Address: Government House, Belize, British Honduras.

WILSON, Frederick William, M.P., son of the late William Wilson of the Manor House, Scarning, Norfolk, by Eliza, daughter of John Turner, of Ellingham, was born at Scarning, 1844, and educated at King Edward the Sixth's School, Wymondham, Norfolk. He entered upon a

journalistic career, and was indentured to the late J. H. Tillett, M.P. for Norwich and editor of the *Norfolk News*. At the age of twenty-one he became editor and proprietor of the *Chester Observer*, and in 1866 took part in defending Chester Castle against the Fenians, thirty years after meeting one of the attacking band, Michael Davitt, as a colleague in the House of Commons. In 1874 he started the *East Anglian Daily Times*, the first daily morning newspaper published in the counties of Suffolk, Essex, and Cambridgeshire. In 1892 he started the *London Morning Leader*, the pioneer of halfpenny morning newspapers in the metropolis. President of the Newspaper Society, 1893; J.P. for Suffolk, 1894; returned to Parliament for Mid Norfolk, 1895, three months after a bye-election, in which he was defeated; a Liberal. Married Elizabeth, daughter of Edward Capps, of Forest Hill, author of "Our National Debt," &c. Addresses: Reform Club, W.C.; The Dale, Scarning, Norfolk; and Highrow, Felixstowe.

WILSON, George Fergusson, F.R.S., F.L.S., F.C.S., descended from old Scotch families, was born at Wandsworth Common, March 25, 1822, and is the sixth son of William Wilson and Margaret Nimmo Dickson, of Kilbucho and Culter, and was educated at private schools at Wandsworth and at Streatham. He has made many useful inventions which have been patented, some of which still hold their own, but the invention for which he is best known is the distillation of glycerine. Before this invention, glycerine, even that sold at very high prices, was so impure as to be for most purposes comparatively useless; by distillation in a current of superheated steam Mr. G. F. Wilson obtained for the first time pure glycerine, now of the greatest value. On Nov. 30, 1854, a short paper by him "On the Value of Steam in the Decomposition of Neutral Fatty Bodies," was read before the Royal Society, and printed in the *Proceedings*; and at the meeting of the British Association in Glasgow in 1855 he read a paper on distilled glycerine, which concluded with a prophecy that "Pure Glycerine will yet take its place among the most valued of modern products; and produced as it will be in great quantities, it will be recognised in the arts as well as in medicine as a new, real blessing to mankind." Mr. G. F. Wilson has long been known in the horticultural world for his orchard house cultivation; and for exhibiting lilies, for which, between 1867 and 1883, he received twenty-five first-class certificates. He filled many posts in the Royal Horticultural Society, and was for a time Treasurer,

member of the Expenses Committee, Chairman of the Fruit and afterwards of the Floral Committee, and member of the Scientific Committee. Mr. G. F. Wilson became a member of the Society of Arts in 1845, and was eight years on the Council; he lectured twice before the Society. He was made a Fellow of the Royal Society in 1855, of the Chemical Society in 1855, of the Linnæan in 1875, and of the Institute of Chemistry at its commencement. He became a member of the Athenæum Club in 1867. In 1897 he was awarded the Victoria Medal of Horticulture. He married, in 1862, Ellen, daughter of R. W. Barchard, East Hill, Wandsworth. Addresses: Heatherbank, Weybridge Heath, &c.; and Athenæum.

WILSON, Miss Hilda, was born in Monmouth in 1860. Her father was a music-master. Possessing considerable talent, Mr. Wilson's services were held in such request as to necessitate his removal to the cathedral city of Gloucester; and the change of residence afforded his young daughter many more educational privileges, as far at least as art was concerned, than her birthplace could by any possibility have furnished. The Choral Society, where, as time advanced, she could take part in rehearsing choruses of the great masters, opened up a way for her first appearance in public, for at one of its concerts Hilda Wilson, a girl of fourteen years of age, first sang before a general audience. She came in 1879 to London to study at the Royal Academy of Music, where she was instructed in the art of singing by Mr. William Shakespeare. A year after she was permitted to enter upon public duties, and consequently was enabled to accept the offer of an engagement as one of the contralto soloists at the Gloucester Festival of 1880. Returning to the Academy, she prosecuted her studies with so much zeal as to win the "Westmoreland Scholarship" two years in succession, besides obtaining the "Parep-Rosa Gold Medal," together with the Silver and Bronze Medals awarded at annual examinations of the institution. Upon leaving in 1882, she was elected an "Associate" of the Academy. In 1883 Miss Wilson again sang as second contralto at the Gloucester Festival, and in the year following served in the same capacity at the Worcester "Music Meeting." In 1887 she was, however, engaged as principal contralto at the Norwich Festival, and in 1888 appeared as leading contralto at the Lincoln, Gloucester, and Leeds Festivals. Since then she has made constant appearances at the principal concerts in London and the provinces.

WILSON, James, American political leader and agriculturist, was born in Ayrshire, Scotland, Aug. 16, 1835. He went to America with his parents in 1852, settling in Connecticut. In 1855 he removed to Iowa, locating in Tama County, where he engaged in farming. He served three terms in the State Legislature, being Speaker of the Lower House on the third occasion. He was elected to Congress in 1872, and served in the Forty-third, Forty-fourth, and Forty-eighth Congresses. From 1870 to 1874 he was a Regent of the State University, and for several years has been Director of the Agricultural Experiment Station, and Professor of Agriculture at the Iowa Agricultural College at Ames. He became Secretary of Agriculture in President McKinley's Cabinet, Mar. 4, 1897.

WILSON, The Ven. James Maurice, was born on Nov. 6, 1836. His father, the Rev. E. Wilson, who was a double first-class at Cambridge in 1825, and a Fellow of St. John's, was for many years Vicar of Nocton, Lincoln, and honorary Canon of Lincoln. Mr. Wilson was educated at King William's College, Isle of Man, and at Sedbergh Grammar School, and went up to St. John's College, Cambridge, in 1855. He was bracketed for the second Bell Scholarship in 1856 with Henry Sidgwick, who was afterwards Senior Classic. He took his degree in 1859 as Senior Wrangler. He was appointed by Dr. Temple to the post of Natural Science Master at Rugby, and in that capacity, and subsequently as Senior Mathematical Master, he worked at Rugby for twenty years. During those years he was an occasional contributor to the Geological and Astronomical Societies' journals, and founded the Temple Observatory at Rugby. His chief astronomical work is one in which he was associated with two other amateurs, the "Handbook of Double Stars." In 1879 he was offered the Headmastership of Clifton College, vacant by the resignation of Dr. Percival. Since that time until 1890, when he retired from that position, he had been more before the world as the Headmaster of a large and very active school, and as a preacher and writer, than as a scientific man. A volume of his school sermons in two series, of which the second appeared in 1891, has been published by Macmillan; also volumes of Essays and Addresses and Contributions to Religious Thought. He is understood to have taken much interest in Bristol, in its religious and philanthropic and educational work. He was Chaplain to the present Archbishop of Canterbury from 1885 to 1890. In 1890 he was presented to the living of Rochdale, in the Diocese of Manchester, and in the same year

became Archdeacon of Manchester and Examining Chaplain to the Bishop of Manchester. He has since published (Kegan Paul) a volume of "Rochdale Sermons," and many separate addresses are published by the S.P.C.K. Address: The Vicarage, Rochdale.

WILSON, William Edward, F.R.S., J.P., is the son of John Wilson, M.A., J.P., of Daramona House, Streete, co. Westmeath, and was born on July 19, 1851. He was educated privately, and he has devoted himself to investigations connected with Astronomy and Physical Science. He built a private observatory at Daramona in 1871, and ten years later he constructed a larger observatory, adding also a physical laboratory and a mechanical workshop. Mr. Wilson has published numerous papers in the *Philosophical Transactions and Proceedings of the Royal Society*, and has also edited the *Monthly Notices of the Royal Astronomical Society*. He served the office of High Sheriff for Westmeath in 1894, and was married to Carolina Ada, daughter of Captain R. C. Granville, in 1886. Addresses: Daramona, Streete, co. Westmeath; and the Athenæum.

WILSON, Hon. William L., LL.D., American statesman, was born in Jefferson Co., Virginia, May 3, 1843, and was educated at Charlestown Academy and at Columbian College, District of Columbia (where he graduated in 1860), and at the University of Virginia. He served in the Confederate Army during the Civil War, and for several years afterwards was Professor in Columbian College. He subsequently resigned, and practised law at Charlestown. In 1882 he became President of the West Virginia University, but relinquished this position upon entering Congress in 1883, where he served until 1895. He was Postmaster-General in President Cleveland's Cabinet from 1895 to 1897, when he was elected President of Washington and Lee University. Mr. Wilson was Chairman of the Committee which framed the Revenue Bill, which became law in August 1894, and the measure hence became known as "The Wilson Tariff." The degree of LL.D. was conferred upon him by Columbian University in 1883, and by Hampden-Sidney College in 1886.

WINCHESTER, Bishop of. See DAVIDSON, THE RIGHT REV. RANDALL THOMAS.

WINDISCHGRÄTZ, Prince Alfred, ex-Premier of Austria, is a descendant of one of the most aristocratic families in

Austria. His father was one of the generals who suppressed the Revolution of 1848, and his uncle married the *dansouse* Marie Taglioni, a niece of the great Taglioni. He was born about 1852, and was educated at the Universities of Bonn and Prague, where he studied for the law instead of entering the army. In 1877 he was made a Doctor of Laws and a member of the Imperial Court of Justice. He has sat in the Austrian Reichsrath since 1876 as a Conservative and Clerical, and is also a member of the Bohemian Diet. When Count Taaffe resigned in November 1893, owing to the defeat of his Electoral Reform Bill, Prince Windischgrätz formed a coalition ministry of Poles, Conservatives, and German Liberals. However, the Conservative element prevailed, and the Prince no longer having the confidence of his Liberal followers in questions of electoral reform, &c., he resigned June 19, 1895, and was succeeded by the provisional government of Count Kilmansegg.

WINDSOR, Lord, The Right Hon. Robert George Windsor Clive, D.L., J.P., is the son of the Hon. Robert Windsor Clive, M.P., was born on Aug. 27, 1857, and succeeded his grandmother, Baroness Windsor, as 14th Baron, in 1869. He was educated at Eton and St. John's College, Cambridge, where he graduated M.A. He was Paymaster-General from 1891 to 1892, acted as Mayor of Cardiff from 1895 to 1896, and has been Lord-Lieutenant of Glamorganshire since 1890. He is Hon. Colonel of the 2nd Glamorgan Volunteer Artillery, of the 2nd Battalion of the Worcestershire Regiment, and of the 3rd Battalion of the Welsh Regiment. Lord Windsor was married in 1883 to Alberta, daughter of the Right Hon. Sir Augustus Berkeley Paget, K.C.B. Addresses: St. Fagan's Castle, Cardiff, &c.

WINGATE, Colonel Sir Francis Reginald, K.C.M.G., C.B., D.S.O., late Director of Military Intelligence in Egypt and Aide-de-Camp to the Queen, was born in June 1861, and is the son of the late Andrew Wingate. He entered the army as a Lieutenant of Royal Artillery in July 1880, and soon after was selected for employment with the Egyptian Army. He took part in the Soudan Campaign of 1884-85, and served in the Nile Expedition, acting as Aide-de-Camp and Military Secretary to the Major-General on the Lines of Communication. He was mentioned in despatches, and obtained the brevet of Major. In April 1886 he was appointed Aide-de-Camp to the General Commanding the Eastern District, but in the following month he returned to Egypt. Major Wingate took

part in the operations on the Soudan Frontier in 1889, including the engagement at Toski, for which he obtained the D.S.O. He was also present at the capture of Tokar in February 1891, after which he received the Medjidieh of the third class. He served with the Dongola Expedition under Sir Herbert Kitchener as Director of Military Intelligence, and was present at the engagement at Firket and the operations at Hafir; he was mentioned in despatches, and obtained the brevet of Lieut.-Colonel and two clasps to his medal. He has also served in a similar capacity in the Omdurman Expedition, and has had control of the press censorship. Colonel Sir Francis Wingate was created K.C.M.G. in 1898, and is in possession of the Order of the Iron Crown of the second class and the Osmanieh of the fourth class, and is qualified to act as interpreter in Turkish. He is the author of "Ten Years in the Mahdi's Camp," and "Mahdism and the Egyptian Soudan." He married, in 1888, Catherine Leslie, daughter of the late Captain J. S. Rundle, R.M. Address: Cairo.

WINGFIELD, Sir Edward, K.C.B., fourth son of John Muxloe Wingfield, of Walcot, near Bath, was born in 1834, and educated at Winchester and New College, Oxford, where he took seconds in Mathematical Mods. and firsts in Classical Mods. and Lit. Hum. He was a Fellow of his College from 1850 to 1872, and became S.C.L., 1853; B.C.L., 1857; M.A., 1859. He was called to the Bar at Lincoln's Inn in 1859. He was appointed Assistant Under-Secretary at the Colonial Office in 1878, and recently succeeded Sir Robert Meade as Permanent Under-Secretary of State in the same Department. He was created a K.C.B. in January 1899.

WINNINGTON-INGRAM, The Right Rev. Arthur Foley, D.D., Bishop of Stepney, Canon of St. Paul's Cathedral, was born in Worcestershire on Jan. 26, 1858, and is the fourth son of the Rev. E. Winnington-Ingram, of Stanford Rectory, Worcestershire, and Louisa, daughter of Bishop Pepys. He was educated at Marlborough College and Keble College, Oxford, where he took a first class in Classical Moderations and a second class in Lit. Hum. He became Curate of St. Mary's, Shrewsbury, in 1884; was Private Chaplain to the Bishop of Lichfield, 1885-89; in 1889 was appointed Head of Oxford House, Bethnal Green, and Chaplain to the Archbishop of York and to the Bishop of St. Albans; in 1895 became Rector of Bethnal Green; in 1896 Rural Dean of Spitalfields; and in 1897, having gained a wide experience of the

East End and its needs, both spiritual and social, was appointed second Bishop of Stepney, and Suffragan to the Bishop of London. In 1891 and 1892 he was Select Preacher at his old University, and in 1893 and 1897 at Cambridge. His works include: "Work in Great Cities," "Old Testament Difficulties," "New Testament Difficulties," "Church Difficulties," "The Men who Crucify Christ," 1896; "Christ and His Friends," 1897, &c. Address: 2 Amen Corner, St. Paul's, E.C.

WINTER, The Hon. Sir James Spearman, K.C.M.G., colonial statesman, was born at Lamaline, Newfoundland, Jan. 1, 1845, and received an academic education at St. Johns. He studied law, and was called to the Bar in 1867, becoming a Q.C. in 1880. He entered the Legislature in 1874, and sat continuously up to 1889, shortly after which he was elevated to the Bench; he filled successively the offices of Speaker of Assembly, Solicitor-General, and Attorney-General, and was for a time leader of the Opposition. He served as a delegate to London on the French Fisheries question in 1890, and was agent for Newfoundland at the Washington Fishery Conference, 1887-88. In November 1896 he voluntarily resigned from the Bench and resumed the practice of the law, and not long afterwards re-entered political life, and was elected leader of the Opposition. In October 1897 he was called to the Premiership after the general elections in that month, and assumed office November 17. In 1898 he was a member of the Anglo-American International Conference at Quebec. He was created a K.C.M.G. for his public services in 1888. Address: St. Johns, Newfoundland.

WINTER, John Strange. See STAN-
NARD, MRS. ARTHUR.

WISLICENUS, Johannes, Foreign F.R.S., German chemist, was born near Querfurt, in Prussian Saxony, June 24, 1835. Having taught chemistry at New York, Zürich, and Würzburg, he became Professor at Leipzig in 1885. His chief work is a handbook on chemistry. Address: The University, Leipzig.

WISSMAN, Major Hermann von, German explorer, was born at Frankfort-on-the-Oder in 1853, and entered the army, becoming lieutenant in 1873. In 1880, at the request of the African Society of Berlin, he undertook his first journey, which lasted two years. His next was to explore the Congo for the Belgian Government. For some years he was Governor of German East Africa.

WITT, John George, Q.C., second son of James M. Witt, Esq., of 40 Eccleston Square, S.W., and of Swaffham Prior, Cambridgeshire, was born at Denny Abbey, in the same county, on Sept. 24, 1836. He went to Eton College in 1848, and was elected King's Scholar in 1849, being placed first in the list of successful candidates. In 1856 he became a Scholar of King's College, Cambridge, having been placed first in the election from Eton. In 1859 he was admitted a Fellow of his College, and in due course became Senior Fellow. In 1860 he was in the first class of the Classical Tripos, and in 1861 he gained the University Hulsean Prize. In 1864 he was called to the Bar, and in 1892 he was appointed one of her Majesty's Council. In 1895 he was made a Bencher of Lincoln's Inn. He has a leading practice at the Bar. He is the author of "The Mutual Influence of the Christian Doctrine and the School of Alexandria" (Macmillan), 1861, and of "Then and Now" (Richard Bentley and Son), 1897, a work on the survival of ancient forms of worship and ancient symbols. He was for many years editor of the *Law Journal Reports*. At Eton he was captain of football, and also played in the cricket match against Winchester, and was captain of the school from September 1855 to March 1856. Addresses: 1 King's Bench Walk, Temple, E.C.; 29 Pembroke Road, Kensington, W.; and Bridge End, Finchampstead, Berks.

WITTE, Sergius de, Russian Minister of Finance, is of German parentage, and started life as a clerk in the goods department of a railway in South Russia. By his own efforts he became Director of the Railway, and having been brought into contact with Vyschnegradski, he was introduced by him to political life, and by his unrivalled power over figures has held his present post for many years.

WODEHOUSE, Edmond Robert, M.P., is the son of the late Sir P. E. Wodehouse, K.C.B., and was born in 1835. He was educated at Eton and Balliol College, Oxford, where he took his B.A. in 1865, and the M.A. in 1868. He was called to the Bar at Lincoln's Inn in 1861, and acted as Private Secretary to Lord Kimberley during his tenure of the Lord-Lieutenancy of Ireland, from 1864 to 1866; of the Privy Seal, from 1868 to 1870; and of the Colonial Secretaryship, from 1870 to 1874. Mr. Wodehouse was elected as Liberal-Unionist Member for Bath in 1895, and he had also represented that constituency from 1880 to 1895. He acted as a Deputy-Chairman of Committees in the House of Commons in 1896. He was married, in 1876, to Adela, daughter of

the Rev. C. W. Bagot. Address: 56 Chester Square, S.W.

WOLF, Rudolf, astronomer, was born at Zürich, Switzerland, on July 17, 1816, and became Professor at the Swiss Polytechnic and Director of the Zürich Observatory. He is widely known for his work upon solar spots. The following are among his principal works: "Neue Untersuchungen ueber die Periode der Sonnenflecken und ihrer Bedeutung," 1852; "Geschichte der Astronomie," 1877; "Geschichte der Vermessungen in der Schweiz," 1879; "Handbuch der Astronomie, ihre Geschichte und Litteratur," 1890; and his *Astronomische Mittheilungen*, 1856-90.

WOLFE-BARRY, Sir John. See BARRY, SIR JOHN WOLFE.

WOLFF, The Right Hon. Sir Henry Drummond, G.C.B., G.C.M.G., is son of that eminent missionary and traveller the late Rev. Dr. Joseph Wolff, Vicar of Isle-Brewers, Somersetshire, by Lady Georgiana Mary Walpole, daughter of Horatio, second Earl of Orford, of the present creation. He was born at Malta, Oct. 12, 1830, and was educated at Rugby, under Dr. Tait, and on the Continent; he entered the Foreign Office in 1846, and was made a permanent clerk in 1849. He was an Attaché at Florence in 1852-53, during part of which time he was acting Chargé d'Affaires. In July 1856 he was attached to the late Earl of Westmorland's special mission to Belgium. In 1858 he was appointed Assistant Private Secretary to the Earl of Malmesbury, and afterwards to Sir Edward Bulwer Lytton, and the following year was promoted to an Assistant-Clerkship in the Foreign Office. In the same year he was appointed a Companion of the Order of St. Michael and St. George, and also Secretary to the Lord High Commissioner of the Ionian Islands. In that and the two following years he sat as a member of several Commissions of inquiry into the civil administration, taxation, and education of the Ionian Islands and their inhabitants, and in 1862 was a Commissioner to represent the interest of those islands at the Great Exhibition of that year. He was nominated a K.C.M.G. in 1862, and retired on a pension in June 1864, on the cessation of the British Protectorate over the Ionian Islands. In 1874 he was elected M.P. for Christ Church in the Conservative interest. He was a member of the Royal Commission on Copyright. In 1878 he was appointed her Majesty's Commissioner in Eastern Roumelia to represent Great Britain in the preparation of an autono-

mous constitution for that province. For this service he was appointed a K.C.B., having previously been in succession C.M.G., K.C.M.G., and G.C.M.G. At the election of 1880 he was elected M.P. for Portsmouth. As such he was one of the active group known as the Fourth Party. In June 1885 he was sworn a Privy Councillor, and in the August following appointed Envoy-Extraordinary and Minister Plenipotentiary to the Sultan of Turkey, on a special mission with particular reference to the affairs of Egypt, and High Commissioner in Egypt on November 2. In 1888 Sir Henry Drummond-Wolff was appointed Minister to Teheran. He accompanied the Shah on his last visit to England, and returned to Teheran in October 1888. In 1889 he was made G.C.B. on account of his services in the opening of the river Karun, and at Constantinople and Teheran. In 1891 he was appointed Envoy-Extraordinary and Minister Plenipotentiary at Bucharest, and in 1892 Ambassador Extraordinary and Plenipotentiary at Madrid. He is J.P. for Hampshire and Middlesex, and a Fellow of the Royal Geographical Society and the Royal Colonial Institute; is the author of a work on "The Residence of the First Napoleon at Elba," of a translation of a work by M. de Lesseps on "The Suez Canal," of the "Letters of Memnon," on the same subject, and of "The Mother Country and the Colonies," and other pamphlets and articles. He married the only daughter of the late Mr. Sholto Douglas. Addresses: British Embassy, Madrid; 28 Cadogan Place, S.W., &c.; and Athenæum.

WOLSELEY, Viscount, Field-Marshal Sir Garnet Joseph, K.P., G.C.B., G.C.M.G., D.C.L., LL.D., Commander-in-Chief of the Army, Colonel Royal Horse Guards, Gold-Stick-in-Waiting, son of Major G. J. Wolseley, of the 25th Regiment of Foot, was born at Golden Bridge House, near Dublin, June 4, 1833, and was educated at a private school and under tutors. He entered the army as Ensign in March 1852; became a Captain in January 1855; Major of the 90th Foot in March 1858; Lieut.-Colonel in the army in April 1859; and Colonel in June 1865. He served with the 80th Foot in the Burmese War of 1852-53, where he was severely wounded, and for which he received a medal. Afterwards he achieved distinction in the Crimea, where he served with the 90th Light Infantry. At the siege of Sebastopol he was severely wounded, after which he received the Legion of Honour, and the fifth class of the Turkish Order of the Medjidieh. He was also at the siege and capture of Lucknow, and the defence of Alumbagh, where he was made brevet

Lieut.-Colonel, and mentioned with commendation in despatches. In 1860 he served on the staff of the Quartermaster-General throughout the Chinese campaign, for which he received a medal and two clasps. He was appointed Deputy-Quartermaster-General in Canada in October 1867, and commanded the expedition to the Red River; was nominated a Knight Commander of the Order of St. Michael and St. George in 1870; and was Assistant Adjutant-General at headquarters in 1871. He was appointed in August 1873 to command the troops on the Gold Coast during the Ashantee War, with the local rank of Major-General. On Sept. 12, 1873, he and his staff embarked at Liverpool for the West Coast of Africa. After defeating the enemy, Sir Garnet Wolseley, on Feb. 5, entered Coomassie, and received the submission of the King. The success of the expedition justified the confidence which had been reposed in the Commander-in-Chief. On his return to England Sir Garnet Wolseley received the thanks of Parliament and a grant of £25,000 for his "courage, energy, and perseverance" in the conduct of the Ashantee War; was created a K.C.B.; and was presented with the freedom of the City of London and a splendid sword of the value of 100 guineas, Oct. 22, 1874. He was appointed to command the Auxiliary Forces in April 1874. At the commencement of the following year he was despatched to Natal to administer the government of that colony and to advise upon several important points connected with the management of native affairs and the best form of defensive organisation. On Oct. 2, 1875, he landed at Portsmouth, accompanied by his staff, on his return from the Cape of Good Hope. He remained in command of the Auxiliary Forces till November 1876, when he was nominated a member of the Council of India. On July 12, 1878, he was appointed the Administrator of the Island of Cyprus, under the style of Her Majesty's High Commissioner and Commander-in-Chief in the same island. In June 1879 he was sent to South Africa, as Governor and High Commissioner of Natal and the Transvaal, to reorganise the affairs of Zululand, and on that occasion conducted the operations against Sikukuni, whose stronghold he destroyed. Returning in May 1880 he was appointed Quartermaster-General at the headquarters of the army, and in April 1882 succeeded Sir Charles Ellice as Adjutant-General of the Army. He was Commander-in-Chief of the Expeditionary Force sent to Egypt in 1882; received the thanks of Parliament; and was gazetted (Nov. 20) Baron Wolseley of Cairo, and of Wolseley, in the county of Stafford. For his services in Egypt, he

received from the Khedive, Tewfik Pacha, the Grand Cordon of the Osmanieh. He was also promoted to the rank of General in 1882. On May 12, 1883, he was appointed to the Hon. Colonelcy of the 23rd Middlesex V.B. (now the 2nd V.B. Royal Fusiliers), in succession to Sir Charles Russell, *Q.C.*, deceased. He was made D.C.L. of Oxford, and LL.D. of Cambridge. In June 1883 the University of Dublin conferred upon him the honorary degree of LL.D. In 1884-85 he was Commander-in-Chief in Egypt, and conducted the operations undertaken for the relief of Khartoum, for which services he received the thanks of both Houses of Parliament, was made K.P., and raised to the dignity of Viscount Wolseley, of Wolseley, in the county of Stafford. He retired in 1890 from being Adjutant-General to the Forces, and was succeeded by Sir Redvers Buller; Lord Wolseley having been appointed Commander of the Forces in Ireland. In 1894 he was appointed a Field-Marshal, and received his baton in the autumn from the Queen at Windsor. Lord Wolseley is the author of "Narrative of the War with China in 1860," to which is added the "Account of a Short Residence with the Tai-Ping Rebels at Nankin, and a Voyage thence to Hankow," 1862; "The Soldier's Pocket Book for Field Service," 1869, 2nd edit., 1871; new edit., 1882; "The System of Field Manœuvres best adapted for enabling our Troops to meet a Continental Army," printed in "Essays written for the Wellington Prize," 1872; "France as a Military Power in 1870 and 1878," in the *Nineteenth Century*, January 1878. In 1894 he published an important biography of the Duke of Marlborough, and in 1895 "The Decline and Fall of Napoleon." In 1895 he succeeded H.R.H. the Duke of Cambridge as Commander-in-Chief, which position he still holds. He was appointed one of the Commissioners of the Patriotic Fund, together with Lord Rothschild, in June 1899. He married, in 1867, Louisa, daughter of A. Erskine. Addresses: 4 Grosvenor Gardens, S.W.; and Athenæum.

WOOD; General Sir Hy. Evelyn, *Q.C.*, G.C.B., G.C.M.G., D.L., is the youngest son of the late Rev. Sir John Page Wood, Bart., of Rivenhall, some time Vicar of Cressing, Essex, and Rector of St. Peter's, Cornhill, by Emma Caroline, youngest daughter of Mr. Sampson, of Croft West, Cornwall, a captain, R.N., and an admiral in the Portuguese service. He was born at Cressing on Feb. 9, 1838, entered the navy in 1852, served with distinction as Aide-de-camp to Captain Sir William Peel, in command of the Naval Brigade in the Crimea (1854-55). At the unsuccessful assault on the Redan (June

18, 1855), while carrying one of the scaling ladders, he was severely wounded; he was mentioned with praise in Lord Raglan's despatches. He obtained the Crimean Medal with two clasps, the fifth class of the Order of the Medjidieh, and a Turkish Medal; and was made a Knight of the Legion of Honour. He next entered the army as Cornet, 13th Light Dragoons; was promoted to the rank of Lieutenant in 1856, Captain in 17th Lancers in 1861, and Major in 1862. In the Indian campaign of 1858 he served as a Brigade-Major, and was present at the actions of Rajghur, Sindwaho, Kharee, and Baroda, for which he gained a medal, and was twice mentioned in despatches. In 1859 and 1860 he commanded the 1st Regiment of Beatson's Irregular Horse, and received the thanks of the Indian Government for his pursuit of the rebels in the Seronge jungle; he also won the Victoria Cross for valour. He raised the 2nd Regiment of Central India Horse. In September 1873, being a Lieut.-Colonel 90th Infantry, he accompanied Major-General Sir Garnet Wolseley to the Ashantee War, and organised a native force, which he commanded, with other troops, in the affairs of Essaman, and on the road from Mansu to the River Prah, following the retreat of the Ashantee army from the coast. Lieut.-Colonel Wood afterwards commanded the right wing of the army in the battles of Amoaful (wounded) and Ordahsu, and the capture of Coomassie. For these services he was several times mentioned in despatches, and was nominated a C.B. (1874), promoted to the brevet rank of Colonel, and received the Medal with Clasp. Having distinguished himself in both the naval and the military services of the country, he joined the Hon. Society of the Middle Temple in April 1870, and was called to the Bar in Easter Term 1874, shortly after his return from the Ashantee War. He served throughout the Zulu War of 1879 in command of No. 4 column. As political agent he raised a contingent of 1000 friendly Zulus, known as "Wood's Irregulars." Two days after the British reverse at Isandula he surprised and defeated a force of several thousands of the enemy, and then maintained an advanced position in the enemy's country, for which he was specially commended by the High Commissioner. He defeated the Zulus in the action of Kambula on March 29, and in April was made Brigadier-General. He led the advance to Ulundi with a flying column, and was present in the engagement there on July 4. On his return to England he was received by the Queen in person, and was created a K.C.B. (September 1879). On Nov. 1, 1879, the Bar of England entertained him at a

banquet in the hall of the Middle Temple; he was given a sword of honour by the county of Essex, and was made J.P. for the county. He served in the Transvaal War of 1880-81, with the local rank of Major-General; was nominated one of her Majesty's Commissioners for settling the Transvaal territory in April 1881; created G.C.M.G.; and was reappointed to command the troops in the Chatham district in 1880. He commanded the 2nd Brigade, 2nd Division, in the expedition to Egypt in 1882, and for his distinguished services received the thanks of Parliament. In December 1882 he was appointed Commander-in-Chief of the Egyptian army, ranking as chief of the Pachas, or Sirdar. He commanded the line of communication in the Nile Expedition, 1884-85; Grand Cordon of the Medjidieh, Khedive's Star, and Medals. He commanded the Eastern district from April 1, 1886, to December 1889, and the Aldershot District from Jan. 1, 1889, till Oct. 8, 1893, was from 1893 till 1897 Quartermaster-General to the Forces, and is now Adjutant-General. He received the Grand Cross of the Bath in 1891. He is J.P. and D.L. for Essex. He is the author of "The Crimea in 1854-94," and "Cavalry at Waterloo," 1896. He married, in 1867, the Hon. Mary Paulina Southwell, who died in 1891. Addresses: 23 Devonshire Place, W.; and War Office.

WOOD, Rev. Joseph, D.D., Head-Master of Harrow, was born in 1843, and is the second son of John Wood, of Manchester. He was educated at Balliol College, Oxford, where he was an Exhibitioner, took a First Class in Classical Moderations in 1863, and a First Class in the Final School of Lit. Hum. in 1865. He was also in the latter year elected a Fereday Fellow of St. John's College (M.A. 1868, B. and D.D. 1879). He was ordained in 1865, became an Assistant Master at Cheltenham College in 1867, and three years later he was appointed Head-Master of Leamington College. He took the degree of D.D. in 1879, and he acted as a Classical Moderator at Oxford from 1876-77. After a period of twenty years' successful work at Leamington, Dr. Wood was, in 1890, appointed Head-Master of Tonbridge School, where he quickly made his influence felt, and where in the course of some six or seven years he raised the numbers from 200 to 450. In November 1898, on the nomination of Dr. Welldon as Bishop of Calcutta, he was selected by the Governors of Harrow School as his successor. Address: Harrow School.

WOOD, Thomas McKinnon, late Chairman of the London County Council, was born in London in 1855, and educated

at Mill Hill School, and at University College, London, of which he is a Life-Governor. He graduated with first class honours at the University of London, and for some time was a regular contributor to the "Encyclopædia Britannica," chiefly on literary and historical subjects. On the death of his father, Mr. Hugh Wood, a London shipowner and export merchant, he succeeded to his business, and he is connected with several commercial undertakings in London and Liverpool. Since 1892 he has chiefly devoted his time to public work, having in that year been elected to the London County Council for Central Hackney, for which constituency he has been twice re-elected. In 1894 he became Chairman of the Local Government and Taxation Committee, and for nearly three years he was Chairman of the Parliamentary Committee of the Council. He was also a member of the first Technical Education Board, which was appointed by the Council in 1873, and of the Special Committee on London Government. In 1875 he contested East Islington unsuccessfully as Liberal Parliamentary candidate. During the last Council he was chosen as the first leader of the Progressive party. In this capacity he published (in February 1898) an article in the *Contemporary Review* explaining the position of the Progressive party, and discussing the alternative policies for the government of London, strongly maintaining the view that the election ought to be fought upon purely municipal issues, and not upon political lines. On March 15, 1898, he was elected as Chairman of the London County Council, having been re-elected on the previous day for Central Hackney by 3162 votes, as compared with 2473 at the election of 1895. In March 1899 he was succeeded in the Chairmanship by Lord Welby. Address: Brookfield House, Kirkfield Lane, Highgate Rise, N.W.

WOOD, Thomas Waterman, American painter, was born in Montpelier, Vermont, in November 1823. Without the stimulant of artistic surroundings, he early developed a love of art, and as soon as his means would permit, studied his profession in the studio of Chester Harding in Boston. After painting portraits in Canada, Washington, and Baltimore, he went to Europe and received great benefit from the earnest study of the great masters. On his return from abroad he painted portraits in Nashville and Louisville, and set up his easel in New York in 1866 as a figure-painter. He first exhibited at the National Academy of Design in 1858, was elected an Associate in 1869, and an Academician in 1871. He was President of the American Water-Colour Society

from 1878 to 1887; Vice-President of the National Academy of Design from 1879 to 1891; and has been President of that Institution since that date. Mr. Wood's reputation rests mainly upon his figure-pictures, but much of his time is occupied in painting portraits.

WOODALL, William, M.P., J.P., was born in 1832, and educated at Liverpool. He is senior partner in the Washington China Works, at Burslem, and is Chairman of the Sneyd Colliery. He was first elected to Parliament as member for Stoke-on-Trent at the general election of 1880, and represented that constituency until the dissolution of 1885, when he was elected for Hanley, being returned unopposed in 1886, and re-elected in 1892, and again in 1895, as a Gladstone Liberal. Mr. Woodall was for twelve years Chairman of the Burslem School Board, and is still Chairman of the Free Library, the School of Art, and the Endowed Schools in that town; was a member of the Royal Commissions on Technical Education, and on the education of the Deaf, Dumb, and Blind. He has been President of the North Staffordshire Mining and Mechanical Engineers, and of the Municipal Corporations Association. In Mr. Gladstone's government of 1886 he was appointed Surveyor-General of Ordnance, and in 1892 became Financial Secretary to the War Office. He is an ardent advocate of Women's Suffrage, and of Disestablishment. Mr. Woodall is also one of the Trustees of the Savage Club, and is an occasional contributor to journalism and the magazines. He is the author of "Paris after Two Sieges." He is a J.P. for Staffordshire and a Chevalier of the Legion of Honour. Addresses: 4 Queen Anne's Mansions, S.W.; and Bleak House, Burslem.

WOODBURN, Sir John, K.C.S.I., member of the Council of the Governor-General of India, was born in 1842, and having been educated at the Universities of Glasgow and Edinburgh, he was appointed to the Bengal Civil Service in 1862. Having held several departmental posts, he was appointed Chief Secretary to the Government of the North-Western Provinces, and in 1891 became a member of the Viceroy's Legislative Council, and two years later became Chief Commissioner of the Central Provinces, attaining his present rank in 1895.

WOODFORD, Charles Morris, was born at Gravesend, Kent, Oct. 30, 1852, and is the son of Henry Pack Woodford, of Gravesend. He was educated at Tonbridge School, 1864-70; was elected a

Fellow of the Royal Geographical Society in 1885; a Fellow of the Royal Geographical Society of Australasia (N.S. Wales Branch) in 1888; Member of the Council in 1889; a Fellow of the Linnean Society of New South Wales in 1889; Corresponding Member of Zoological Society in 1889; and was awarded the Gill Memorial by the Royal Geographical Society in 1890, for "three Expeditions to the Solomon Islands, and the important additions made to our topographical knowledge and natural history of the islands." His works published are: a paper on the "Exploration of the Solomon Islands," read before the Royal Geographical Society, March 26, 1888, published in the *Proceedings* of the Society, June 1888; a paper on "A Third Visit to the Solomon Islands," read before the Royal Geographical Society, April 1890, published in the *Proceedings*, July 1890; "General Remarks on the Zoology of Solomon Islands, and Notes on Brencley's Megapode," published in the *Proceedings of the Zoological Society*, May 1, 1888; and a book entitled "A Naturalist among the Head Hunters," 1890. This most valuable contribution to our knowledge of cannibalism refers chiefly to the natives of the Solomon Islands. In 1897 Mr. Woodford published a Government "Report on the British Solomon Islands in the Western Pacific."

WOODFORD, Stewart Lyndon, American lawyer and diplomat, was born in New York City, Sept. 3, 1835, and was educated at Yale and at Columbia College, where he graduated in 1854, commencing the practice of the law in his native city in 1857. In 1861 he was appointed Assistant U.S. District Attorney for the southern district of New York; but in 1862 he entered the army, where he served until 1865, and became in succession Chief-of-Staff to General Q. A. Gilmore in the department of the South, and Military Commandant of Charleston and Savannah, attaining the brevet rank of Brigadier-General of Volunteers. He was Lieut.-Governor of New York, 1866-68. In 1872 he was elected to Congress, and from 1877 to 1883 he filled the office of U.S. District Attorney for the southern district of New York. In 1897 he was appointed United States Minister to Spain, and remained in that office until he received his passport in April 1898, on the breaking out of war between Spain and the United States.

WOODHEAD, German Sims, M.D., Edin., F.R.C.P. Edin., F.R.C.S., Professor of Pathology, Cambridge, was born at Huddersfield on April 29, 1855, and is the eldest son of Joseph Woodhead, J.P.,

at one time M.P. for the Spen Valley, and editor of the *Huddersfield Examiner*, and of Catherine, eldest daughter of James Booth Woodhead, of the Ridings, Holmfirth. He was educated at Huddersfield College, and at Edinburgh University, where he was Thesis Gold Medallist in 1881, and in London and Vienna (M.D. Edin., 1881; M.B. and C.M., 1878; M., 1880, F.R.C.P. Edin., 1882). In 1878 he was President of the Royal Medical Society of Edinburgh, and is President of the British Medical Temperance Association, Fellow of the Roy. Med. Chir. Soc., and fellow or member of numerous other medical and scientific societies. In 1879 he began to teach Anatomy and then Pathology, and to carry out original investigations on these subjects in the principal medical institutions of Edinburgh, and in 1890 was appointed Director of the Laboratories of the Conjoint Board of the Royal Colleges of Physicians and Surgeons in London. His work on the Embankment has been of the greatest scientific and national usefulness and importance, the laboratories there established in great measure taking the place of that Pasteur Institute for which English medical science still waits. In February 1899 Professor Sims Woodhead was appointed Professor of Pathology at Cambridge University in succession to his former colleague in London, the late Professor Kanthack, and received the thanks and congratulations of the two Colleges with which he had been so long honourably associated. From 1892 to 1895 he was Assistant-Commissioner to the Royal Commission on Tuberculosis. His works on Bacteriology and Pathology are numerous, and include "Practical Pathology" (col. illustrations), 1883, edit. 3, 1892; "Bacteria and their Products," 1891; and, with Arthur W. Hare, "Pathological Mycology: an Inquiry into the Etiology of Infective Diseases," part 1, 1885; besides a report to the Royal Commissioners on Tuberculosis, 1895, and numerous contributions to the scientific journals and to systems of medicine and surgery. Professor Sims Woodhead is editor of the *Journal of Pathology and Bacteriology*. He married, in 1881, a daughter of James Yates, Esq., of Edinburgh. Address: Cambridge.

WOODS, Sir Albert William, K.C.B., K.C.M.G., F.S.A., was born April 16, 1816, and is a son of Sir William Woods, who filled the office of Garter King-of-Arms from 1838 until his death in 1842. He entered the College of Arms as Portcullis Pursuivant in 1838 (and has been, therefore, a member of the Corporation for upwards of sixty years), was promoted to the office of Lancaster Herald in 1841, and became

Registrar of the College in April 1886. He was advanced to the office of Garter Principal King-of-Arms, Oct. 25, 1869, in succession to his father's successor, Sir Charles George Young, and received the honour of knighthood on the 11th of the following month. He was attached to the missions for investing the King of Denmark, the King of the Belgians, and the Emperor of Austria with the Order of the Garter, and, as Garter, was joint plenipotentiary for investing the King of Italy, the King of Spain, and the King of Saxony. Sir A. W. Woods holds the office of Registrar and Secretary to the Order of the Bath, Registrar to the Order of the Star of India, King-of-Arms to that of St. Michael and St. George, and Registrar to that of the Indian Empire. He married, in 1848, Caroline, daughter of Robert Cole, of Rotherfield. Addresses: College of Arms, Queen Victoria Street, E.C.; and 69 St. George's Road, Warwick Square, S.W.

WOODS, Henry, R.A., born April 23, 1847, at Warrington, in Lancashire, is eldest son of the late Mr. William Woods, of that town, was educated at the local grammar school, entered the Warrington School of Art as a pupil at nine years of age, and remained there until he went to London, in the winter of 1864, having obtained a "National Scholarship" in the Art Training Schools at South Kensington. Mr. Woods held that scholarship for three years, working in the Antique and Life Schools, and at the study of stained glass. When he left South Kensington, the latter study was not proceeded with, but he began to illustrate for various periodicals, painting during the greater part of his time. When the *Graphic* started, Mr. Woods was one of the first members of its staff. His first picture exhibited at the Royal Academy was a little landscape at the first exhibition held at Burlington House. Since then he has been a regular exhibitor. His first pictures of any importance were Thames subjects—"Going Home," "Haymakers," &c. In 1876 Mr. Woods first went to Venice, and joined the group of artists who have made modern Venetian subjects so popular; his earliest pictures of everyday Venetian life were: "A Venetian Ferry" (purchased for the Cape Town Gallery), "Street Trading in Venice," "A Gondolier's Courtship," "The Ducal Courtyard," and "Preparing for the Festa." He was elected Associate of the Royal Academy in 1882. Since then Mr. Woods has painted: "Bargaining for an Old Master," "Preparations for First Communion," "Il Mio Traghetto," "Cupid's Spell," "Choosing a Summer-Gown," "The Water-Wheels of Savassa,"

&c. In the Royal Academy, 1890, Mr. Woods exhibited: "On the Riva of the Giudecca," "In the Shade of the Scuola San Rocco," and "La Promessa Sposa," and his subsequent exhibits in the Academy have been chiefly inspired by Venetian themes. Among his latest exhibits at the Royal Academy are: "Waiting for a Ferry, Venice," 1894; "La Friulana," and "Il Campo SS. Giovanni e Paola, Venice" (diploma work), 1895; "A Venetian Christening Party," and "At the Giudecca, Venice," 1896; "A Valais Village," "Leisure Moments," and three landscapes, 1897; and "The Fisherman's Courtship," 1898. Addresses: 2727 San Maurizio, Venice; and Athenæum.

WOODS, Rev. Henry George, D.D., born at Woodend, Northamptonshire, June 16, 1842, is the eldest son of Henry William Woods, of Heene, Sussex. He was educated at Lancing College and C.C.C., Oxford. Scholar of C.C.C., 1861-65; First Class in Lit. Hum., 1865. He was elected Fellow of Trinity College, Oxford, in 1865, and continued in his fellowship to 1879, and from 1883 to 1890. He was Tutor of Trinity, 1866-80; Bursar, 1867-87; Senior Proctor of the University of Oxford in 1877. He was President of Trinity, 1887-97, and is Perpetual Curator of the Ashmolean Museum and University Galleries, Oxford. He published in 1873 an edition of "Herodotus," books i. and ii., with English notes. Address: Plas Meini, Festiniog, North Wales.

WOODS, Margaret Louisa, wife of Rev. H. G. Woods, D.D., authoress, is the second daughter of George Granville Bradley, D.D., Dean of Westminster; was born at Rugby in 1856, and educated at home and at Leamington. She won her reputation with "A Village Tragedy" in 1887, and this was followed by "Lyrics and Ballads," 1889; "Esther Vanhomrigh," 1891; "The Vagabonds," 1894; "Wild Justice," 1896; "Aeromancy," 1896; "Weeping Ferry," 1898. Address: Plas Meini, Festiniog, North Wales.

WOODS, Samuel, M.P., is the son of Thomas Woods, a working collier of St. Helens, Lancashire, and was born in 1846. At seven years of age he began to work in a coal-mine, and as he grew up began to take a lead in organising the miners, so that they might, through combination, be able to defend their own interests, and improve the conditions of their employment. In 1878 he was able to establish the Lancashire Miners' Federation, of which he was elected the first President, and

which position he still holds, and in 1887 he became a Vice-President of the Miners' Federation of Great Britain. From 1884 to 1887 he served on the Local Board of Ashton, and in November 1895 he was elected as a District Councillor for the township where he lives. Mr. Woods was returned to Parliament in 1892 as Liberal and Labour member for the Ince Division of Lancashire, and for three years he sat in the House of Commons, actively advocating the interests of Labour, and consistently supporting the Liberal Government. During this time he helped to ventilate the grievances of the printers employed on Government work, and of the Post-Office employees; he was also appointed a member of the small committee which was sent to inquire into the hours and wages of the men employed at Woolwich Arsenal. It was Mr. Woods again who had charge of the Miners' Eight Hours Bill, which, however, was lost in the Committee stage. In 1894 Mr. Woods was elected Secretary of the Trades Union Congress, a post which he still holds. At the last general election he lost his seat in Lancashire, but, at a bye-election in Feb. 1897, he was returned once more to the House of Commons as Labour and Liberal member for the Walthamstow Division of Essex. He gained a first-class mine manager's certificate, by public examination, in 1886, and he has travelled in America and on the Continent, in connection with the International Miners' Congresses. Mr. Woods is a Baptist and a total abstainer. Addresses: Rose Villa, Brynn, near Wigan, Lancs.; and 19 Buckingham Street, Strand, W.C.

WOODVILLE, Richard Caton, is the son of an artist who was born in America, but who died in London. He was born in London on Jan. 7, 1856, and was educated at Düsseldorf, Germany. He became an artist, and made a special study of battle pictures, exhibiting his first picture at the Royal Academy in 1879, and since then annually. He has painted several large pictures for the Queen, which are now in Windsor Castle, viz.: "The Wedding at Whippingham Church," "Death of General Howard," and "The Guards at Tel-el-Kebir." He was present during the Turkish war of 1878, and in the Egyptian war of 1882, and has received the Commandership of the Order of the Medjidieh, and of Daniello, Montenegro. He has also illustrated numerous stories, appearing in magazines, and has himself written articles on sport and travel. Mr. Woodville was married, in 1883, to Mrs. H. Waddington, née Curtis. Address: 107 Queen's Gate, W.

WOODWARD, Henry, LL.D., F.R.S., F.G.S., F.Z.S., F.R.M.S., Pres. Pal. Soc., Keeper of the Department of Geology, British Museum (Natural History), is the sixth son of the late Samuel Woodward, of Norwich, author of "The Geology of Norfolk," 1833; a "Synoptical Table of British Organic Remains," 1830, &c. His eldest brother, Mr. B. B. Woodward, B.A. Lond., F.S.A., was for some years Librarian to her Majesty at Windsor Castle. His second brother, Dr. S. P. Woodward, F.G.S., for seventeen years in the Department of Geology, British Museum, was a geologist and naturalist of eminence, and author of a "Manual of the Mollusca," 1851-56, which has reached a sale of upwards of 12,000 copies. The subject of the present notice was born at Norwich, Nov. 24, 1832. His father died when he was only five years of age. Henry Woodward was educated at the Norwich Grammar School, and at the Grammar School, Botesdale, Suffolk. Thence, in 1846, he went to reside with his brother, Dr. S. P. Woodward, at that time Professor of Natural History at the Royal Agricultural College, Cirencester, where he entered as an out-door student at the College, and worked diligently for three years. There he imbibed that knowledge of geology and love of natural history which, inherited from his father, needed only opportunity and encouragement to develop. In January 1858 Professor Owen, the Superintendent of the Natural History Departments in the British Museum, wrote offering him a junior assistant's post in the Geological Department, under Mr. G. R. Waterhouse, where his brother, Dr. S. P. Woodward, was already a senior assistant. His ready acceptance of this small post evinced his anxiety to take up geology as a profession, and he entered on his new duties with alacrity. In 1859 he was made a second-class assistant, in 1865 a first-class, and in 1867 he entered the first-class upper section, a proof that his services met with favourable official recognition. In the spring of 1860 he accepted an invitation to join Mr. Robert MacAndrew, F.R.S., on a dredging expedition to the south coast of Spain and the Mediterranean; and at Malaga and Gibraltar he made excellent zoological and geological collections. In 1863 he again joined MacAndrew in a dredging expedition along the north coast of the Spanish peninsula from Bilbao to Coruna. Excursions were also made into the interior to Vittoria, Burgos, &c. In 1864 Mr. Woodward commenced, and still continues, to edit the *Geological Magazine*, a monthly journal of geology, now in its thirty-fifth year. Dr. Woodward's contributions to scientific literature number nearly 300; he has also published a mono-

graph on the "Fossil Merostomata," and one on "Carboniferous Trilobites," in the volumes of the Palæontographical Society; a Catalogue of British Fossil Crustacea, published by the Trustees of the British Museum; articles on "Mollusca" and "Crustacea," in "CasSELL'S Natural History"; and on "Crustacea," in the "Encyclopædia Britannica." In 1873-74 Mr. Woodward was elected President of the Geologists' Association. In February 1893 he assisted in founding the Malacological Society of London, and was its first President, from 1893 to 1895, and now is Vice-President; and was from 1894 to 1896 President of the Geological Society, and since June 1896 President of the Palæontographical Society of London. In 1873 he was elected a Fellow of the Royal Society, and in 1878 the University of St. Andrews conferred upon him the honorary degree of LL.D. On June 23, 1880, on the retirement of Mr. George R. Waterhouse, the Principal Trustees of the British Museum appointed Dr. Henry Woodward Keeper of the Department of Geology, in which he had served as an assistant for twenty-two years, a promotion which was received with satisfaction among scientific men generally. In 1857 Mr. Woodward married Ellen Sophia, only child of Pountain Page, Esq., of Norwich, by whom he has two sons and five daughters. Dr. Woodward's eldest son, H. P. Woodward, J.P., Assoc. Memb. Inst. C.E., F.G.S., is now Honorary Gov. Geologist for Western Australia; and the younger, M. F. Woodward, is Demonstrator in Biology in the Royal College of Science, London. Dr. Woodward's daughters are very successful artists and book-illustrators; and one is a member of the British College of Physical Education. Address: 129 Beaufort Street, Chelsea, S.W.

WOODWARD, Horace Bolingbroke, F.R.S., F.G.S., born at Barnsbury, London, Aug. 20, 1848, is the second son of the late Dr. S. P. Woodward, F.G.S., of the British Museum, and author of a "Manual of the Mollusca." He was educated at private schools, and was appointed an assistant in the Library and Museum of the Geological Society, then at Somerset House, in 1863. He joined the staff of the Geological Survey of Great Britain in 1867 as Assistant Geologist, was promoted to be Geologist in 1875, and District Surveyor in 1896. He is author of "The Geology of England and Wales," 1876 (2nd edit., 1887); also of several memoirs of the Geological Survey, on the "Geology of East Somerset, &c.," "Norwich," "Fakenham," "The Jurassic Rocks of Britain," and "Soils and Sub-soils from a Sanitary Point of

View," 1876-97. He was President of the Norwich Geological Society, 1877-79; of the Norfolk Naturalists' Society, 1892-93; and of the Geologists' Association, 1893-94, was elected a Fellow of the Royal Society in 1896, and was awarded the Murchison Medal by the Council of the Geological Society in 1897. Addresses: Museum, Jermyn Street, S.W.; and 8 Inglewood Road, West Hampstead, N.W.

WOOLLEY, Celia Parker, American writer, was born at Toledo, Ohio, in 1848. When she was quite young her parents removed to Coldwater, Mich., where, excepting a few months spent at the Lake Erie Seminary (Plainesville, Ohio), she was educated, graduating from the Coldwater Seminary in 1866. Her literary career began with occasional contributions to periodicals. For eight years she was the Chicago correspondent of the *Christian Register* (a Boston Unitarian weekly); in 1884 *Lippincott's* published her first short story, and a few others have followed in the same magazine. Her first novel was issued in 1887, and was received with great favour. It was brought out under the title of "Love and Theology," a name changed in later editions to "Rachel Armstrong." She has since published two others, "A Girl Graduate," 1889; and "Roger Hunt," 1892. In 1868 she was married to D. J. H. Woolley, and in 1876 went to Chicago. She is an active member of the Women's Club, of which for two years she was President, and before which she frequently lectures. For a period of nearly three years she was assistant editor of *Unity*, the organ of radical Unitarianism in the West. Mrs. Woolley's mind has always been chiefly engaged in religious and ethical questions, and in September 1893 she accepted a call to the pastorate of the Unitarian Church, Geneva, Illinois, in the duties of which she is now (1894) engaged.

WORCESTER, Bishop of. See PEROWNE, THE RIGHT REV. JOHN JAMES STEWART.

WORDSWORTH, Canon Christopher, was educated at Trinity College, Cambridge, where he was Bell University Scholar in 1867, and Le Bas Prizeman in 1871. In the latter year he took his degree, and was ordained. From 1870 to 1877 he was a Fellow and Tutor of Peterhouse College, Cambridge, and from 1875 to 1877 he also acted as Curate of St. Giles', Cambridge. Appointed to the Rectory of Galston, Rutlandshire, in 1877,

he was preferred, after a period of twelve years, to the Rectory of Tyneham, near Wareham. He was installed a Prebendary of Lincoln Cathedral in 1886, and he is at present Rector of St. Peter's, Marlborough. He is the author of "University Society in the 18th Century," 1874; and "Scholæ Academicæ," or "University Studies in the 18th Century," 1877; and he has assisted in editing "Breviarium ad usum Sarum, A.D. 1531," 3 vols., 1879-86; "Pontificale Ecclesiæ S. Andreae," 1885; "Lincoln Cathedral Statutes," vol. i., 1892; "Coronation of King Charles I., 1626," 1892, &c.

WORDSWORTH, Elizabeth, daughter of Christopher Wordsworth, late Bishop of Lincoln, eldest sister of the present Bishop of Salisbury, and great-niece of the poet, was born at Harrow June 22, 1840, and was educated mainly at home. On the foundation of Lady Margaret Hall at Oxford, in 1879, Miss Wordsworth was appointed its first Principal, a position which she still holds. In 1886, the need being felt of supplying a college for women, where students, unable to bear the expenses of Lady Margaret Hall, might receive equal educational advantages, she founded St. Hugh's Hall, which now contains about twenty-five students within its walls. Miss Wordsworth has written not only poems and tales of considerable merit, and very popular papers for Church gatherings of women and girls, e.g. "Thoughts for the Chimney Corner," but a remarkable short volume on William Wordsworth, and three valuable series of lectures, entitled "Illustrations of the Creed," "The Decalogue," and "The Lord's Prayer," and a Life of Bishop C. Wordsworth. Address: Lady Margaret Hall, Oxford.

WORDSWORTH, The Right Rev. John, D.D., LL.D., Bishop of Salisbury, eldest son of the late Right Rev. Christopher Wordsworth, D.D., Bishop of Lincoln, and nephew of the late Bishop of St. Andrews, and therefore great-nephew of the poet, was born at Harrow, Sept. 21, 1843, and educated at Ipswich, Winchester School, and at New College, Oxford, where he graduated in 1865. In 1866 he became a Master at Wellington College, which brought him into close relation with the late Archbishop Benson, and in 1867 he was elected Fellow, and in 1868 Tutor of Brasenose College, Oxford. He was appointed Prebendary of Lincoln in 1870; Select Preacher at Oxford, 1876; Bampton Lecturer, 1881; Oriel Professor of the Interpretation of Holy Scripture, with

Canonry of Rochester annexed, 1883. On the death of Dr. Moberly in 1885 he was appointed Bishop of Salisbury. The Bishop has interested himself in a variety of subjects of a literary and religious character, of which the following are the principal. His chief publications are noticed under each head. 1. *Latin Classical Literature*—"Lectures Introductory to a History of Latin Literature," 1870; "Fragments and Specimens of Early Latin," 1874. 2. *The Latin New Testament*—He has long been engaged upon a critical edition of St. Jerome's Vulgate for the Oxford Press, and has published the first volume, containing the four gospels, in conjunction with the Rev. H. J. White, now Fellow and Chaplain of Merton College, Oxford. Subsidiary to this are a series of "Old Latin Biblical Texts," Oxford, 1883, &c., and "The Corbey St. James," in the first volume of the "Studia Biblica," Oxford, 1885. 3. *The Education Question*—He published several pamphlets at Oxford on the subject of religious education in the Universities, and has since interested himself largely in the cause of voluntary schools, particularly during a school crisis at Salisbury in 1888-89. His Bill for Freedom of Religious Instruction in Board Schools, passed the House of Lords in 1893. His "Prayers for all in College" reached a second edition in 1890. He founded a useful higher-grade Elementary and Science School at Salisbury, and is Visitor of the New City Grammar School. 4. *The Old Catholic Movement*—He attended his father at the second Old Catholic Congress held at Cologne in 1872, and has since continued a warm friend of the work. He was present at the Congresses of Cologne in 1890, and Lucerne in 1892, and has personally visited the chief centres as well as the leaders of the different Churches in Holland, Germany, Austria, and Switzerland. After the Lambeth Conference of 1888 he was appointed to translate the Encyclical Letter into Greek and Latin, and was asked by the Archbishop of Canterbury to act as Episcopal adviser to Count Compello and the Italian Reformers. In this capacity he has assisted in the revision of the Italian Liturgy (Italian, Bennet Bros., Salisbury; English, Gilbert and Rivington, for Anglo-Continental Society, 1893). 5. *The Colonial Churches*—In 1894-95 he made a journey of nearly six months' duration round the world through Colombo, Adelaide (S. Australia), Melbourne, Tasmania, New Zealand (where he spent two months), Sydney, Fiji, Hawaii, Vancouver, and back by the Canadian Pacific Railway and New York. It was probably in consequence of this that he was elected Chairman of the Committee of the Lambeth Conference of 1897 on

"The Organisation of the Anglican Communion." The Bishop is also an earnest supporter of foreign missions. 6. *The Eastern Churches*—In January and February 1898 the Bishop visited the Patriarch of Alexandria, the Archbishop of Cyprus, the Bishops of the Patriarchate of Antioch at Damascus (during vacancy of the Patriarchal throne), and the Patriarchs of Jerusalem and Constantinople, bearing letters from the Archbishop of Canterbury, and explaining to them the resolutions of the Lambeth Conference of 1898 on the Unity of Christendom. He has also visited the Coptic Patriarch at Cairo and the Armenian Patriarch at Jerusalem. He is Chairman of the "Jerusalem and the East Mission Fund" in England, and was expected to take another journey to Jerusalem in September 1898 in order to consecrate St. George's Collegiate Church at Jerusalem, under commission from the Archbishop of Canterbury. 7. *Liturgical Questions*—The Bishop was one of the five assessors of the Archbishop in the well-known case of *Read v. the Bishop of Lincoln*. His Charge of 1891 on "The Holy Communion" reached a second edition in 1892, and contains in its preface some observations on the judgment in that case. Several of the forms for occasional services put out in the Diocese of Salisbury are worthy of attention, particularly that for "Consecration of Churches," &c., and for "Commemoration of Founders, Benefactors, and Worthies of the Cathedral Church of Salisbury." His article on the "Te Deum," in Julian's "Dictionary of Hymnology," contains a large amount of material. He is likewise President of the "Henry Bradshaw Society," and of the "Mediæval Music Society." 8. *Church History and Doctrine*—His chief work is one on the relation of Christianity to other religions, entitled "The One Religion: or Truth, Holiness, and Peace desired by the Nations, and revealed by Jesus Christ," being the Bampton Lecture for 1881, which reached a second edition in 1887. His articles on "Constantine the Great and his Sons," and the Emperor Julian in Smith and Chetham's "Dictionary of Christian Biography" may also be mentioned. 9. *Sermons*—He published a small volume of "University Sermons on Gospel Subjects" in 1878, and many single sermons, amongst which two may be mentioned, "On Christian Discipline of the Will, with a note on Spiritism," and "I am the Door," at a Theological College festival, both in 1893. Addresses: The Palace, Salisbury; Lollards' Tower, Lambeth, S.E.; and Athenæum.

WORMS, The Right Hon. Baron Henry de. See **PIBBRIGHT, LORD.**

WORSLEY-TAYLOR, Henry Wilson, Q.C., D.L., J.P., is the only son of the late James Worsley, of the Laund, Accrington, Lancashire, and was born on July 25, 1847. He was educated at Harrow and Exeter College, Oxford, where he graduated B.A. in 1870. He was called to the Bar at the Middle Temple in 1871, and practised for a few years on the Northern Circuit and at Preston Sessions. He has since then confined his work entirely to the Parliamentary Bar; became a Q.C. in 1891, and was appointed Recorder of Preston in 1893, resigning in 1898. Acting in accordance with the will of his cousin, Miss Pilling-Taylor, he assumed the name of Taylor in 1881. He married, in 1871, Henrietta Sayer, only daughter of Sir E. W. Watkin, Bart. Address: Palace Chambers, Bridge Street, Westminster.

WORTHINGTON, Arthur Mason, M.A., F.R.S., F.R.A.S., is the son of Robert Worthington, of Crumpsal Hall, Manchester, and was born on June 11, 1852. He was educated at Rugby and Trinity College, Oxford, and afterwards at Berlin, where he worked under Professor Helmholtz. He was appointed Head Master of the Salt Schools, Shipley, Yorkshire, in 1877, became an Assistant Master at Clifton College in 1880, and was selected as Head Master and Professor of Physics in H.M. Dockyard School, Portsmouth, in 1887. In the following year Mr. Worthington was transferred to the Royal Naval Engineering College, Devonport, where he holds the same appointments as at Portsmouth. He has published various papers on physical subjects, and is the author of some elementary text-books, viz.:—"Physical Laboratory Practice"; "Dynamics of Rotation"; "The Splash of a Drop." He was married, in 1877, to Helen, daughter of Thomas Solly, Professor of English Literature in the University of Berlin. Address: Royal Naval Engineering College, Devonport.

WORTHY, Charles, is the eldest son of the late Rev. Charles Worthy, B.A., Queen's College, Oxford, and for many years Vicar of Ashburton with Buckland, who died in 1879, and of Elizabeth, his wife, first cousin of the late Charles Richardson, LL.D., the Lexicographer (see "Men of the Time," sixth edition). He was born at Snayle Tower, Exeter, Dec. 28, 1840; educated at Exeter Grammar School, and subsequently by his father and private tutors. He was appointed to a commission in the 82nd Regiment in 1858, and proceeded to India in the following year. His health failing him Mr. Worthy was invalided from the service in 1864, receiving a gratuity in lieu of pen-

sion, and turned his attention to the History and Antiquities of Devonshire, his native county. Since 1871 he has been a constant contributor of valuable articles on general antiquarian, historical, and genealogical matters, to magazines and newspapers, and has obtained a reputation for his special knowledge of English family history. From 1876 to 1886 he was a Member of the Council of the Devonshire Association, and the author of many papers in its *Transactions*. Prior to 1879 he was for some time Honorary Local Secretary at Ashburton, under the Science and Art Department. He received the thanks of the Lords of the Committee of Council, "for valuable assistance rendered," in 1884. He has also thrice received the thanks of the Chapter of the College of Arms, 1882-89; those of the Trustees of the British Museum in the latter year; and the thanks of the Society of Antiquaries under their great seal, 1873 and 1879. In 1875 he published "Ashburton and its Neighbourhood," "The Antiquities and History of Fourteen Parishes on the Borders of Dartmoor," fcap. 4to; "The Manor of Winkleigh, the Ancient Seat of the Honour of Gloucester," 8vo, 1876; "Local Guide to Ashburton and Dartmoor," 1879; "Mémorial of Walter Stapledon, Bishop of Exeter (1308)"; "Notes on Bideford and the House of Granville," (reprinted from *Transactions of the Devonshire Association*), 1876 and 1884. He was coadjutor to the late Stephen Tucker, Somerset Herald, from 1879-1882. His first volume of "Devonshire Parishes," "The Antiquities, Heraldry, and Family History of Twenty-eight Parishes in the Archdeaconry of Totnes," appeared in 1887. In the following year he published an epitome of English armoury under the title of "Practical Heraldry" (1 vol. cr. 8vo, 1 p. 250); vol. ii. of "Devonshire Parishes" appeared in 1889 (2 vols. rl. 8vo, pp. 766). He also revised the 1887 edition of Murray's "Hand-book for Devonshire," 1877; and printed a small work on "The Life of Lord Iddlesleigh, with a Genealogical History of the Northcote Family," January 1887, a pamphlet, which ran to a second edition within three days. In 1889, he revised portions of White's "Devonshire," for which he had previously written, in 1879, "An Analysis of the Exeter Domesday," and the "History of the Restored Cathedral of Exeter." In 1892, he revised and edited Messrs. A. & C. Black's "Devonshire Guide Book." In 1893, he published the "History of the Suburbs of Exeter," with "A Digression on the Noble Houses of Redvers and of Courtenay, Earls of Devon" (cr. 8vo, pp. 218); and, during the same year, he re-wrote and edited the 12th edition of

Black's "Guide to Kent." His "Folk Tales of the West" appeared periodically during 1894, and these, with his very numerous similar articles, on subjects affecting the general history of England, to which he is still constantly adding, are alone sufficient for several interesting and important volumes in the future. His "Devonshire Wills," a rl. 8vo vol. of 531 pages, appeared in 1896, and includes his "Gentle Houses of the West," which gives, as the outcome of independent research, the origin and history of some of the most ancient and illustrious English families. Permanent address: Heavitree, Exeter.

WRENFORDSLEY, The Hon. Sir Henry Thomas, Knight, was educated in France, and having been called to the English Bar, practised for some years on the old Norfolk Circuit. He contested the city of Peterborough, in the Conservative interest, in 1868; and again in 1874, but without success. In 1876, he was appointed acting Deputy County Court Judge for the Metropolitan districts of Marylebone, Brompton, and Brentford. In 1877, he became Puisne Judge in the Colony of Mauritius; and in June 1878 he left the Bench, and became Procureur-General. Before leaving the Colony, he received a vote of thanks from the Legislative Council in respect of his public services in connection with the passing of the Labour Law, and reforms introduced into the judicial administration of the Colony. In 1880, he was appointed to the Chief Justiceship of Western Australia, and received the Dormant Commission from the Crown to administer, in case of need, the Government of that Colony. He was appointed Delegate to represent the Colony at the Intercolonial Conference held at Sydney in 1881; and subsequently he administered the Government from February to June 1883. During that period, he organised and started the first Expedition to the Kimberley, or northern district, and named the first town "Derby," by permission of the Secretary of State. A further expedition was despatched for the purpose of extending the telegraph system about 900 miles further north. He received the honour of knighthood and several public addresses before leaving the Colony. In 1883, Sir Henry proceeded in H.M.S. *Diamond* to Fiji, as Chief Justice of that Colony, and also held the appointment of Judicial Commissioner for the Western Pacific. In 1884, he left Fiji on leave, in consequence of bad health. Before leaving the Colony, he was entertained by the leading merchants and others at the largest banquet ever given in that part of the Pacific. Subsequently, and by permission of the Secretary of

State for the Colonies, he became acting Puisne Judge in the Colony of Tasmania. In consequence of the action of the Colonial Office in having filled up his appointment in Fiji, Sir Henry was called to the Bar of Victoria and became a Queen's Counsel. In 1888, he was invited by the Government of Victoria to act as a Judge of the Supreme Court in the absence of one of the Judges, for which duty he received the thanks of the Colonial Government. In 1890, he was appointed by the Secretary of State, acting Chief Justice of Western Australia, and he held that appointment at the time when that Colony received a new Act of Constitution, and became for the first time a responsible Government Colony. In 1891, he was appointed Chief Justice of the Leeward Islands. Sir Henry has thus served the Crown as a Judge of the Supreme Court in six of her Majesty's Colonies; viz., Mauritius, Western Australia, Fiji, Tasmania, Victoria, and Leeward Islands, besides having held the appointments of Procureur-General in Mauritius, and Deputy Governor in Western Australia. Address: St. John's, Antigua.

WRIGHT, Charles Romley Alder, D.Sc. Lond., B.Sc. Vict., F.R.S., was born at Southend, Essex, on Sept. 7, 1844, being the son of the late Romley Wright, C.E., and Elizabeth Alder, of Hull. As a boy, Dr. Alder Wright was greatly attracted by chemical and physical science, attaining some degree of proficiency by self-tuition; so that when subsequently he attended classes at Owens College, Manchester, 1861-65, he was enabled to take and maintain throughout his entire curriculum the highest place in the examination lists. He graduated as B.Sc., Lond., in 1865, and as D.Sc., Lond., in 1870. After taking the former degree he became Assistant to Prof. (now Sir Henry) Roscoe, F.R.S., whom he assisted in the prosecution of the earlier portion of his classical researches on Vanadium. During 1866-67, Dr. Alder Wright filled the position of Chemist in the works of the Runcorn Soap and Alkali Co., Weston, Cheshire, and was engaged in technical work of various descriptions. In 1867 he came to London as Assistant, first to the late Dr. A. Bernay, of St. Thomas' Hospital, and subsequently to the late Dr. A. Matthiesen of St. Mary's and St. Bartholomew's Hospitals, with whom several scientific memoirs were published conjointly. During 1869-71, he was engaged in co-operating with Mr. (now Sir) Lowthian Bell, F.R.S., in the prosecution of his elaborate investigations on the Chemistry of Iron Smelting. In 1871 he was appointed Lecturer on Chemistry, Physics and Practical Chemistry in the

medical school of St. Mary's Hospital, London, which appointment he still holds; since which he has been in constant practice as Consulting Technical Chemist, besides devoting much time to original chemical research. In 1881 he was elected a Fellow of the Royal Society, and has held the posts of Examiner in Chemistry to the University of Durham, and to the Royal College of Physicians, and in the subjects of "Iron and Steel" and "Soap Manufacture" to the City and Guilds of London Institute. Since the publication, in 1866, of his first research made in the laboratories of Owens College, Dr. Alder Wright has contributed to the various scientific societies upwards of seventy reports and memoirs on the results of various investigations in pure science, besides numerous minor researches, and many papers on theoretical and technical subjects. These investigations include work done in almost every department of Chemical Science, especially in Inorganic, Analytical, and Organic Chemistry, Chemical Physics, and various branches of Technical and Applied Chemistry. His technical researches include investigations connected with the metallurgy of iron, aluminium, various alloys, the manufacture of alkali and of soap, the preparation of waterproof paper and canvas goods ("Willesden" products), novel insulating materials, and disinfectants. In connection with these subjects, several patents have been taken out for processes, some of which are in successful operation; and various communications have been made to the Royal Institution, the Society of Arts, and the Society of Chemical Industry in the form of a series of lectures and papers. The chief books and monographs, &c., published by Dr. Alder Wright are the following: "Metals and their Chief Industrial Applications" (Lectures delivered at the Royal Institution), 1878; series of articles in "Muspratt's Dictionary" on Coal-Tar Distillation and the products thence derived, Anthracene, Benzene, &c., 1874; Monograph on "Iron and Steel" and other articles, "Ency. Brit.," 1879-81; Cantor Lectures, Society of Arts, on "Manufacture of Toilet Soaps," 1885; "The Threshold of Science," 1892; Monographs on "Soap," "Sulphur," and "Sulphuric Acid," Thorpe's "Dictionary of Applied Chemistry," 1893; "Fixed Oils, Fats, Butters, and Waxes, and the Manufacture therefrom of Candles, Soap, and other Products," 1894. The list of Mr. Wright's contributions to scientific literature between the years 1874 and 1882 takes up seven and a half columns of the Royal Society's "Catalogue of Scientific Papers." Address: Chemical Laboratory, St. Mary's Hospital, Paddington, W.

WRIGHT, Charles Theodore Hagberg, born in Yorkshire, Nov. 17, 1863, is the third son of the Rev. C. H. H. Wright, D.D., and grandson of Nils Wilhelm Alnroth, Governor of the Royal Mint, Stockholm, and Knight of the North Star. He was educated privately in France, Germany, and Russia, and also at the Royal Academical Institution, Belfast, and took the degrees of B.A. (first class) and LL.B. at Trinity College, Dublin. After travelling in the East of Europe for a couple of years he was appointed in 1890 Assistant Librarian in the National Library of Ireland. In 1893 Mr. Wright was elected Secretary and Librarian to the London Library. During Mr. Wright's secretaryship the Library has been rebuilt and entirely reorganised at a cost of about £20,000, five thousand pounds of which were subscribed by the members of the Library, which is now the leading institution of its kind, and indeed without a second in the United Kingdom. Mr. Wright has written articles on Russian subjects, &c., in the *National Review*, *Scottish Review*, &c. Address: Marlborough Mansions, 83 Victoria Street, S.W.

WRIGHT, The Hon. Sir Robert Samuel, M.A., B.C.L., was born in 1839, and is the eldest son of the Rev. Henry Wright, of Litton, Somersetshire. He was educated at Balliol College, Oxford, where he had a distinguished career. He took a first class in Classical Moderations in 1859, and in Literæ Humaniores in 1860. In 1859-62 he gained three University prizes—the Latin Verse prize, the English Essay, and the Arnold Essay; he was elected to a Fellowship at Oriel, of which he is now an honorary Fellow, and he gained the Craven Scholarship in 1861. He was called to the Bar at the Inner Temple in June 1865, and joined the Northern Circuit. He has held the office of common law junior counsel to the Treasury for several years. He succeeded the late Baron Huddleston as one of the Justices of the High Court in December 1890. He married, in 1891, a daughter of the late Rev. R. S. Chermiside. Addresses: 14 St. James's Place, S.W., &c.; and Athenæum.

WURTEMBERG, King of, Charles Paul Henry Frederick William II., was born at Stuttgart on Feb. 25, 1848, and is the son of Prince Frederick. He succeeded to the throne on Oct. 6, 1891. He is colonel of several regiments in Wurtemberg, Russia, and Germany, and Proprietary Colonel of an Austrian Hussar regiment. He married (1), the Princess Marie of Waldeck and Piernont, Feb. 15, 1877, and (2), the Princess Charlotte of

Schaumburg-Lippe, April 8, 1886, who was born Oct. 10, 1864. By his first marriage he had one daughter, the Princess Pauline Olga Helen Emma, born Dec. 19, 1877. His heir, the Duke of Wurtemberg, died in November 1896.

WYLLIE, William Lionel, A.R.A., is the eldest son of the late William Morrison Wyllie, and was born in London in July 1851. He was educated at Heatherley's, and entered the Royal Academy Schools in 1866, gaining the Turner medal three years later. He was elected an Associate of the Royal Academy in 1889, and amongst his pictures, which have been recently exhibited, there may be mentioned: "London's Water Gate," "The Opening of the Tower Bridge" (a notable picture), "The Union Liner SS. *Norman* leaving Southampton," "Bound for the Rio Grande," "A Southerly Gale, Brighton," 1895; "London Bridge," "Rearing the Lion's Whelps," "A Silent Highway," "Crippled, but Unconquered," 1896; "The Winding Medway," "Barry Docks," "The Liner's Escort," 1897; "Commerce and Sea Power," "Union Liner *Briton* off Calshot," "The Harbour Bar," "Entrance to Barry Dock," and "R.M.S. *Valhalla*," 1898; "Peace and Plenty" and "The Battle of the Nile," 1899. Mr. Wyllie spends a good deal of time in yachting, and is the Commodore of the Medway Yacht Club. He was married, in 1879, to Marian Amy, daughter of Captain Carew of the Indian Marine. Address: Hoo Lodge, Hoo Street, Werburgh, near Rochester, Kent.

WYNDHAM, Charles, was born in 1841, and was educated for the medical profession. He went to America in 1862, and made his first appearance as an actor at Washington with John Wilkes Booth (the assassin of President Lincoln), playing Osric to his Hamlet, and subsequently, Glavis to his Claude Melnotte. On the termination of his engagement he returned to the army, in which he had already served as a surgeon, and was concerned in some engagements that took place in the Civil War. He was attached to the 19th Army Corps, having at one time the medical charge of a brigade, and at another charge of a regiment. On returning to England he went to Liverpool, to the Old Amphitheatre, where his success was such that it led to a highly remunerative engagement of several months' duration. In May 1868 he made his first London appearance as Sir Arthur Lascelles in "All that Glitters is not Gold." He returned to America in 1869, and appeared with distinction at Wallack's Theatre as Charles Surface in "The School for

Scandal." Coming home again, he reappeared at the St. James's Theatre in 1872, then under Mr. Stephen Fiske's management, as Rabagas. A provincial tour followed this engagement, and in 1873 he played "the lead" at the Royalty, appearing there notably in the character which he revived in 1886 in "Wild Oats." A version of Mr. Bronson Howard's comedy "Saratoga," called "Brighton," was produced at the Court Theatre in 1874, with Mr. Wyndham in the principal character. In 1875 he went to Berlin and produced a version of "Brighton" in German. From 1876 the Criterion Theatre, under Mr. Wyndham's management, was distinguished by pieces of lively character, until in 1886 he made trial of old comedy. In the year 1887 another visit to Germany was paid, embracing the cities of Berlin, Frankfort, and Liegnitz, during which "David Garrick," in German, under the title of "Auf Ehrenwort," was played, and proved such a success that an invitation from the Emperor of Russia extended the tour to St. Petersburg and Moscow. On the occasion of his performance in the Russian capital, Mr. Wyndham was presented by the Czar with a magnificent sapphire and ruby ring in recognition of the pleasure which his acting had afforded his Majesty. Two years later another tour to America followed, when Boston, New York, Chicago, Cincinnati, Baltimore, Washington, and Philadelphia were visited, the repertoire including such plays as "David Garrick," "The Candidate," "Wild Oats," "Still Waters Run Deep," and an eccentric comedy, written specially for Mr. Wyndham by F. C. Burnand, editor of London *Punch*, and entitled "The Headless Man," when fresh laurels were gathered, resulting in a cordial invitation on the part of the American public to revisit the United States at no very distant date. One of the latter characterisations with which Mr. Wyndham has identified himself is Young Marlow in "She Stoops to Conquer." He has also achieved great success in "Rosemary," where he figures as a man in early middle age in 1837, and as a very old man in 1887. In May 1896 two gala performances were given, in which nearly every English actor and actress of note took part, in order to celebrate the attainment of his twentieth year of management at the Criterion. At the close of the two performances the popular actor, who had appeared as Charles Surface, came forward to thank his enthusiastic audience, and to announce that the proceeds of the two performances, amounting to £2300, would be handed over to the Actors' Benevolent Fund. In July 1899, at a crowded performance, at which the

Prince of Wales and many other distinguished persons were present, Mr. Wyndham bade good-bye in pathetic terms to his old theatre, which, however, he will continue to manage when playing in the new theatre shortly to be built for him. Address: 39 Finchley Road, N.W.

WYNDHAM, George, M.P., is the son of the Hon. Percy Wyndham, and was born in London on Aug. 29, 1863. He was educated at Eton and the Royal Military College, Sandhurst, and from 1883 to 1887 he served in the 1st Battalion of the Coldstream Guards, taking part in the Suakim Campaign of 1885. He acted as Private Secretary to Mr. Balfour when the latter held the offices of Chief Secretary for Ireland, 1887-91, and First Lord of the Treasury, 1891-92. Mr. Wyndham entered Parliament in 1889, when he was returned as Conservative member for Dover, and he has represented that constituency ever since. In October 1898 he was appointed Parliamentary Under-Secretary of State for War. Since 1894 he has been a Captain in the Cheshire Yeomanry, and he is also a Justice of the Peace for Cheshire, and a Director of the L. C. and D. Railway. In 1887 Mr. Wyndham married Sibell Mary, Countess Grosvenor, daughter of the 9th Earl of Scarborough, and widow of Earl Grosvenor, eldest son of the Duke of Westminster. Address: 35 Park Lane, W.

WYNDHAM, Sir G. Hugh, K.C.M.G., C.B., J.P., was born in 1836, and having been educated at Harrow and Oxford, entered the Diplomatic Service in 1857. Having served in several minor appointments, he became Secretary at Madrid in 1878, and at Constantinople in 1881. He was appointed Minister at Belgrade, Rio de Janeiro, and Bucharest in 1888, which post he held until 1897, when he retired from the service, and was succeeded by J. G. Kennedy (*q.v.*). Address: Roegate Lodge, Petersfield.

YARBOROUGH, Earl of, The Right Hon. Charles Alfred Worsley Anderson-Pelham, M.A., J.P., was born in London on June 11, 1859, and succeeded his father as 4th Earl in 1875. He was educated at Eton and Trinity College, Cambridge. Belonging to an old Whig family, he was a member of the Liberal party up to 1886, when he transferred his adherence to the Conservative side. From 1890 to 1892 he was Captain of the Hon. Corps of Gentlemen-at-Arms. He has been Vice-Admiral of the County of

Lincoln since 1883, and is Chairman of the Lindsey Quarter Sessions. He married, in 1886, Marcia, eldest daughter of the 12th Lord Conyers, and, since 1892, Baroness Conyers in her own right. Addresses: 17 Arlington Street, W.; and Brocklesby Park, Lincolnshire.

YATES, Joseph Maghull, was born on June 19, 1844, and is the eldest son of the late Joseph St. John Yates, of Wellbank, Sandbach, Judge of County Courts, and Emily Augusta, daughter of the late David Scott, of Brotherton, co. Kincardine. He was educated at Westminster School and Trinity College, Cambridge, where he graduated in Classical Honours in 1867. Called to the Bar in January 1869, he was made Recorder of Salford in 1889, Queen's Counsel in 1893, and Stipendiary Magistrate of the Manchester Division of Lancashire in 1894. He was a candidate for Parliament in the Conservative interest for North Manchester in 1892, but was unsuccessful. Addresses: Union Club, Manchester; the Glebe House, Darenham, Cheshire.

YEAMES, William Frederick, R.A., was born on Dec. 18, 1835, at Taganrog, on the Sea of Azoff, South Russia, of which port his father, Mr. William Yeames, was her Britannic Majesty's Consul. The family belonged originally to the county of Norfolk. During the years 1842 and 1843 he travelled with his family through Italy. After returning to Russia and spending the winter at Odessa, the family went to Dresden, and there remained till the spring of 1848, when they removed to London. Mr. Yeames received his first instruction in art from Mr. George Scharf, who taught him drawing and anatomy. The young artist also practised drawing from casts in the studio of Mr. J. Sherwood Westmacott. In 1852 Mr. Yeames left England in order to advance his art education in Italy, and studied at Florence, first for two years under the direction of Professor Pollastri, of the Florence Academy, afterwards under Signor Raffaele Buonajuti. Subsequently he spent eighteen months in Rome, and at last, in 1858, he returned to England. In 1859 he exhibited at the Royal Academy a portrait and "The Staunch Friends," a subject-picture of a jester and monkey. In 1861 he was represented there by works entitled "Il Sonetto," with illustrative lines from "Petrarch," and "The Toilet"; in 1862 by "Rescued," a boy saved from drowning; in 1863 by "The Meeting of Sir Thomas More with his Daughter after his Sentence of Death"; in 1864 by "La Reine Malheureuse," Queen Henrietta Maria taking refuge from the fire of the

Parliament ships in Burlington Bay; in 1865 by "Arming the Young Knight"; and in 1866 by "Queen Elizabeth receiving the French Ambassadors after the News of the Massacre of St. Bartholomew." In June 1866 he was elected an Associate of the Royal Academy. Since then he has exhibited "The Dawn of the Reformation," 1867; "The Chimney Corner" and "Lady Jane Grey in the Tower," 1868; "The Fugitive Jacobite" and "Alarming Footsteps," 1869; "Maundy Thursday" and "Love's Young Dream," 1870; "Dr. Harvey and the Children of Charles I.," 1871; "The Old Parishioner," 1872; "The Path of Roses," 1873; "The Appeal to the Podestà," "Flowers for Hall and Bower," and "The Christening," 1874; "Pour les Pauvres" and "The Suitor," 1875; "La Contadinella," "The Last Bit of Scandal," and "Campo dei SS. Apostoli, Venice," 1876; "Waking" and "Amy Robsart," 1877; "When Did You Last See Your Father?" 1878; "La Bigolante: Venetian Water Carrier," his diploma work, deposited on his election as an Academician, 1879; "The Finishing Touch," green-room at private theatricals, 1880; "Here We Go Round the Mulberry Bush" and "Il Dolce far Niente," 1881; "The March Past," "Prince Arthur and Hubert," and "Welcome as Flowers in Spring," 1882; "Tender Thoughts," 1883; and "St. Christopher," 1887. Recently he has painted some portraits. His latest success was "Le Roi s'Amuse" (Henry III. of France and his pet dogs), in the Academy of 1894. He exhibited "Defendant and Counsel," 1895; a portrait of Mrs. Winfield, 1896; "Children of the Chapel" (Chapel Royal, St. James's Palace), 1898; and two portraits, 1899. Mr. Yeames has also exhibited in Paris and other foreign capitals, and has taught in the Royal Academy Schools and examined in the Science and Art Department. Mr. Yeames was elected a Royal Academician June 19, 1878, and is Librarian of the Royal Academy. He married a niece of Sir David Wilkie. Address: 4 Campbell Road, Hanwell, W.

YEATMAN-BIGGS, The Right Rev. Hyshe Wolcott, M.A., D.D., Bishop-Suffragan of Southwark, was born Feb. 2, 1845, at Manston House, Dorsetshire, and is the son of Harry Farr Yeatman, J.P., thus belonging to an old Dorset family. He was educated at Winchester, where he became a Prefect, was captain of the second six at football, and shot in the Wimbledon eleven for two years, and at Emmanuel College, Cambridge, where he was Dixie Scholar, and graduated in 1867. Although originally intended for the diplomatic service, he went in for a course of

reading under Dr. Vaughan at Doncaster and the Temple, and was ordained in 1869. Becoming Curate of St. Edmund's, Salisbury, he also acted as chaplain to Bishop Moberly, his old master, and was Hon. Sec. to the Diocesan Synod. In 1877 he became Vicar of Netherbury, Dorset, and in 1879 was appointed to succeed Bishop Legge as Vicar of St. Bartholomew's, Sydenham, being also elected Proctor for the clergy of the Diocese in Convocation in 1880, Secretary of the Rochester Diocesan Conference, and Examining Chaplain to Bishop Thorold. Dr. Yeatman was consecrated Bishop-Suffragan of Southwark in 1891, and has taken an important part in the attempt to found in St. Saviour's, Southwark, a cathedral centre for church work in South London. He has also founded at Blackheath the college of women workers, better known as "The Grey Ladies," and has given great attention to the question of popular education in the diocese. He assumed the name of Yeatman-Biggs by royal license in August 1897. He married, in 1875, Lady Barbara Legge, daughter of the Earl of Dartmouth. The Bishop is patron, in his private capacity, of three livings, and owns Stock Gaylard, the old family seat in Dorset, as well as Stockton House, Wilts. Addresses: Dartmouth House, Blackheath Hill, S.E.; and Athenæum.

YEATS, W. B., Irish poet, was born on June 13, 1865, at Sandymount, Dublin, and is the son of J. B. Yeats, portrait painter and illustrator. He spent the greatest portion of his childhood at Sligo with his grandparents, but joined his father and mother in London when about nine years old, and then for some years attended the Godolphin School, Hammer-smith, as a day scholar, spending his holidays usually in the west of Ireland. When he was fifteen he removed with his parents to Dublin, and there attended the Erasmus Smith School in Harcourt Street. When about nineteen he began studying art at the Royal Dublin Society, but soon gave up this for literature, contributing articles and poems to the *Dublin University Review* and other Irish periodicals. In 1887 he moved to London, and in 1889 published his first book of verse, "The Wanderings of Oisín" (Kegan Paul, Trench, & Co.), and his first book of prose, "Fairy and Folk Tales" (Walter Scott). The latter is a compilation from the Irish Folk-Lorists, with notes based on Mr. Yeats's own investigations in the west of Ireland. He has since published "Stories from Carleton" (Walter Scott, 1890), a compilation; "Irish Tales" (Putnam's, 1891), a compilation; "John Sherman and Dhoya" (T. Fisher Unwin's Pseudonym Library, 1891),

two stories about the west of Ireland; "The Countess Kathleen and Various Legends and Lyrics" (T. Fisher Unwin, 1892); "The Celtic Twilight" (Lawrence & Bullen, 1893), a volume of essays mainly about Irish fairy lore; "The Poems of William Blake" (Lawrence & Bullen, 1893), a compilation; "The Land of Heart's Desire," a one-act play in verse, acted at the Avenue Theatre, London, for the six weeks beginning March 29, 1894; "A Book of Irish Verses" (Methuen, 1895), an anthology of Irish ballad poetry; "Poems" (T. Fisher Unwin, 1895), a revised edition of all he cares to preserve out of his previous volumes of verse; "The Secret Rose" (Lawrence & Bullen, 1897), a book of fantastic stories, founded for the most part on Irish legends; and, together with Mr. Edwin J. Ellis, "The Works of William Blake" (B. Quaritch, 1893), a book in three volumes, the first of which gives for the first time a complete collection of Blake's writings, and the other two an analysis and exposition of the philosophy of his so-called prophetic works. Mr. Yeats has also been a frequent contributor to the *National Observer* and the *Bookman*, and has published poems in the two books of the "Rhymers' Club." He is a leader in the Irish literary movement, and in May 1898 was fêted in Dublin when his play "The Countess Kathleen" was produced, together with "The Heather Field," &c., in a revival or inauguration of a national Irish drama. He collaborated at the same time in a work by several Irish authors on Irish literary ideals, his essay advocating a return to Irish legend as the true source whence inspiration should in future be drawn. Permanent address: 18 Woburn Buildings, Euston Road, W.C.

YEO, Gerald Francis, M.D., F.R.S., F.R.C.S., second son of Henry Yeo, Esq., J.P., of Howth, was born in Dublin in 1845, educated at Trinity College, Dublin, graduated in the Dublin University as Moderator in Natural Science in 1866, and in 1867 took the M.B. and M.Ch. degrees. In 1866 an essay by him on Renal Disease was awarded the Gold Medal of the Dublin Pathological Society. He then studied for a year in each of the great schools of Paris, Berlin, and Vienna; and on his return to Ireland in 1870 he was appointed Demonstrator of Anatomy in the Medical School of Trinity College. He then took the M.D. and Sanitary degree, and also the qualifications of the College of Physicians and Surgeons in Ireland. He taught Physiology in the Carmichael School of Medicine for two years, and then left Ireland, as in 1875 he was appointed Professor of Physiology in King's College, London. In 1877 he was made Assistant

Surgeon to King's College Hospital, and became a Fellow of the Royal College of Surgeons of England. While in Dublin he published in the local medical journals numerous papers, chiefly of a pathological nature. Since coming to London most of his works have been physiological. But a paper on the application of aseptic methods to cranial operations gave some stimulus to cerebral surgery, and a report on the Pathology of Bovine Pleura-pneumonia, undertaken for the Royal Agricultural Society, may have had some influence in the application of the "stamping out system," by which this disease has been practically exterminated. Some of his researches were communicated to the Royal Society, and have appeared in the *Transactions* and *Proceedings* of that body; but the greater part of his contributions were published in the *Journal of Physiology*. He is the author of a well-known "Manual of Physiology for the Use of Students of Medicine." He has held the post of Examiner in the Universities of Oxford, Cambridge, and London, the Royal College of Surgeons of England, and the Royal Veterinary College. He acted as Honorary Secretary of the Physiological Society from its foundation in 1875 until 1889. It is a strange coincidence that the only two medical men of the same surname in England should both be of King's College, London; but Mr. Gerald Yeo is not in any way related to Dr. Isaac Burney Yeo. In 1890 he resigned his Chair of Physiology, being made Emeritus Professor, and since that time has devoted himself to agricultural and horticultural pursuits. Address: Bowden House, Totnes, South Devon.

YEO, Isaac Burney, M.D., Professor of the Principles and Practice of Medicine at King's College, London, and Physician to King's College Hospital, descended from an ancient Cornish family already settled in Cornwall in the reign of Edward III., was born at Stonehouse, Devonshire, and educated privately, until, in 1858, he became a student in King's College, London, where he rapidly distinguished himself, and obtained three scholarships in succession and other distinctions. At the Doctor of Medicine's examination, in the London University, he obtained the number of marks qualifying for the Gold Medal. In 1866 he was appointed Resident Medical Tutor in King's College; this post he resigned in 1871, and began practice in Mayfair, having about that time been elected one of the physicians to Brompton as well as King's College Hospitals. He was elected Fellow of the Royal College of Physicians (1876), Hon. Fellow and Professor of Clinical Thera-

peutics in King's College, London (1885), and Physician to King's College Hospital. Dr. Yeo has contributed largely to medical literature, and has furnished numerous lectures, commentaries, &c., to the *Lancet*, *British Medical Journal*, &c. Dr. Yeo has devoted himself, with much success, to the examination and development of methods of treating disease, the branch of medical science known as therapeutics. His well-known work on "Climate and Health Resorts" has gone through three editions, and had for its object the investigation of the influence of climate and mineral water and baths in the cure of disease. This work was followed by a treatise on "Food in Health and Disease," since become the accepted authority on subjects connected with diet and regimen in health, as well as diseased states. Dr. Yeo's last contribution to medical literature (1893) is a "Manual of Medical Treatment, or Clinical Therapeutics," a work dealing adequately with the wide subject of the best methods of treating all forms of what are known as Medical Diseases, as distinguished from Surgical Maladies. The article on "Nutrition and Food, including the Treatment of Obesity and Leanness," in Hare's "System of Practical Therapeutics," published in America, is from the pen of Dr. Burney Yeo. In 1882 he published some lectures on Consumption, in which he drew attention, prominently, to the discovery of Professor Koch, and pointed out the probability that this disease is propagated by contagion, a view which is now generally accepted. He is the translator of Oertel's "Respiratory Therapeutics" in Ziemssen's "Handbook of General Therapeutics," and of articles in Ziemssen's "Cyclopædia of Practical Medicine." He has also contributed several articles to the *Fortnightly* and *Contemporary Reviews*, and to the *Nineteenth Century*. Dr. Yeo has been for more than ten years the Medical Adviser in London to the Life Association of Scotland. Address: 44 Hertford Street, Mayfair, W.

YERBURGH, Robert Armstrong, M.P., D.L., J.P., is the son of the Rev. Richard Yerburgh, Vicar of Sleaford, Lincolnshire, and was born on Jan. 17, 1853. He was educated at Rossall, Harrow, and University College, Oxford, and was called to the Bar at the Middle Temple in 1880. He acted as Private Secretary to Mr. Akers-Douglas, when Patronage Secretary, from 1885 to 1886, and was Assistant Private Secretary to Mr. W. H. Smith when First Lord of the Treasury in 1887. He was elected as Conservative member for Chester in 1886, and has represented that constituency ever since; he is also a County Councillor and a Justice of the Peace for Lancashire. Mr.

Yerburgh is President of the Agricultural Bank Association, Hon. Secretary of the Recreation Evening Schools Association, Vice-Chairman of the National Home Reading Union, and a Member of Council of the Statistical Society. He has published articles advocating National Granaries for storage of corn, in order to complete our system of home defence, and has also written pamphlets on agricultural banks. He married, in 1888, the great heiress Elma Amy, daughter of Daniel Thwaites, of Billings Scarr, Blackburn, formerly M.P. Addresses: 25 Kensington Gore, S.W.; and Woodford Park, Blackburn.

YONGE, Charlotte Mary, only daughter of the late W. C. Yonge, Esq., of Otterbourne, Hants, a magistrate for Hampshire, was born in 1823. She is the authoress of many works of fiction, in which the plot is made to enforce, in a plain and sober manner, the doctrines of what is called the High-Church school of opinion. She has always lived at Otterbourne, and had no events to record. Her best known works are: "The Heir of Redclyffe," "Amy Herbert," "Katherine Ashton," "Heartsease," "Dynevor Terrace," "The Daisy Chain," "The Young Stepmother; or, a Chronicle of Mistakes," "Hopes and Fears; or, Scenes from the Life of a Spinster," "The Lances of Lynwood," "The Little Duke," "Clever Women of the Family," "Prince and the Page: a Story of the Last Crusade," and "Dove in the Eagle's Nest." Most of these have gone through several editions, and have been reprinted in a cheap form. It has been stated in the public papers that she gave £2000, the profits of her "Daisy Chain," for the building of a Missionary College at Auckland, New Zealand, and devoted a great portion of the proceeds of "The Heir of Redclyffe" to the fitting out of the missionary schooner *Southern Cross*, for the use of Bishop Selwyn. Miss Yonge has also published "Marie Thérèse de Lamourons," a biography abridged from the French; "The Kings of England," "Landmarks of History; Ancient, Middle Ages, and Modern," forming a compendium of Universal History for young people; "History of Christian Names and their Derivation," 1863; "The Story of English Missionary Workers," in Macmillan's Sunday Library, 1871; "Lady Hester," 1873; "Life of John Coleridge Patteson, Missionary Bishop of the Melanesian Islands," 2 vols., 1873; "Stories of English History, 1874; "Stories of Greek History for the Little Ones," 1876; "Aunt Charlotte's German History for the Little Ones," 1877; "Aunt Charlotte's Roman History for the Little Ones," 1877; "Unknown to

History: a Story of the Captivity of Mary of Scotland," a novel, 2 vols., 1882; "Stray Pearls; Memoirs of Margaret de Ribaultmont, Viscountess of Belaise," 2 vols., 1883; "The Two Sides of the Shield" and "Nuttie's Father," 1885; "The Reputed Changeling," 1890; "Two Penniless Princesses," "That Stick," "Pilgrims of the Ben Becula," "The Long Vacation," "The Release," Ten Tales of 300 pages for the National Society. Address: Elderfield, Otterbourne.

YORK, Archbishop of. See MACLAGAN, MOST REV. W. D.

YORK, H.R.H. George, Duke of, K.G., K.T., K.P., &c., second son of the Prince and Princess of Wales, was born at Marlborough House on June 3, 1865, just seventeen months after his elder brother, the late Duke of Clarence. As boys, the two brothers were inseparable companions, and they entered the navy together as cadets on June 5, 1877. After two years spent in the *Britannia* the Princes joined the *Bacchante*, which was then attached to a cruising squadron under the command of the Earl of Clanwilliam. Her first voyage was made to the Mediterranean, thence to the West Indies and back, the Princes messing in the gun-room like other cadets, but having sleeping quarters under the poop, and not being required to keep the middle watch. The ship anchored at Barbadoes on Christmas Day 1879, and there and elsewhere the Princes were enthusiastically received. At Bermuda they laid the foundation stone of the Sailors' Home; thence the *Bacchante* returned to Cowes. For a short time she was attached to the Channel Fleet, but presently joined Lord Clanwilliam at Vigo. In January 1880 Prince George was promoted Midshipman. The *Bacchante's* next cruise was to Madeira, thence to the Canaries and Monte Video. Crossing the line the Princes, with much good humour, went through the usual ceremony. The next ports of call were the Falklands and Simon's Bay, and afterwards a lengthy stay was made round Australia and the neighbouring islands. Thence the *Bacchante* went to China, and after visiting various places of interest, returned to the Mediterranean via Singapore and Suez. A trip from Jaffa through Palestine completed the voyage, of which an interesting record has been published. Prince George was promoted Sub-Lieutenant in 1884, and joined H.M.S. *Canada* on the North American station, and in October of the following year, after passing his examinations with great credit, he became a Lieutenant. Attached successively to various ships, he was appointed in 1886 to H.M.S. *Dread-*

nought, and afterwards to H.M.S. *Alexandra*, Flagship of the Mediterranean fleet, of which his uncle, the Duke of Edinburgh, was then Commander-in-Chief. In 1889 he was presented with his first command, that of torpedo-boat No. 79, for the period of the naval manœuvres. While in charge of this small craft he was able to afford very efficient help to a vessel in distress. On May 6, 1890, he commissioned the first-class gunboat *Thrush*, and in her he spent a year on the North American station, visiting Canada and Jamaica, where he opened the exhibition, gaining much popularity ashore as well as afloat. Upon his return to England in 1891 Prince George was promoted Commander, and in October of the same year, while staying with his brother in Dublin, contracted a dangerous fever. In August 1892 he commissioned the second-class cruiser *Melampus*, and took part in the naval manœuvres. His latest command afloat was H.M.S. *Crescent*, a very fine vessel, and during the commission in 1898 he visited many seaport towns in England and Ireland. Prince George was created Duke of York, Earl of Inverness, and Baron Killarney in 1892, in which year he became heir to the Throne by the lamented death of his elder brother. He was promoted Captain in the royal navy in January 1893, and the following May his engagement to Princess Victoria Mary (Princess May) of Teck was publicly announced, and the marriage was celebrated on July 6, in the Chapel Royal, St. James's. The ceremony was a very brilliant one, all the members of the Royal family being present, together with the Emperor of Russia, at that time Czarewitch, and the King and Queen of Denmark. A son and heir was born to the Duke and Duchess on June 23, 1894, and was christened after the patron saints of these islands and his grandfather, Edward Albert Christian George Andrew Patrick David. Another son, Prince Albert, was born in December 1895, and a daughter, Princess Victoria, in April 1897. In January 1894 the Duke of York was compelled to decline an invitation to visit Australia which was conveyed to him through the Governor of Victoria, but in November he was present with the Prince of Wales at the funeral of the Czar at St. Petersburg. In July 1895 he presided at the 6th International Geographical Congress, which was held at the Imperial Institute. In August and September 1897 the Duke and Duchess paid a visit to Ireland, and were received with the utmost enthusiasm in all parts of the country. They visited Dublin, where they opened the Textile Exhibition, Killarney, the Shannon District, Kerry, and Ulster. His Royal Highness holds the Grand Cross of the Sultan of Turkey and

the Grand Cross of the Orders of the Black and Red Eagle of Germany. He is also Naval Aide-de-Camp to the Queen, Colonel of the Royal Sussex Hussars Yeomanry Cavalry, and Colonel of the 3rd Middlesex Artillery Volunteers. In 1894 he was elected an Elder Brother and Master of the Corporation of Trinity House, and is annually re-elected. He is also a Bencher of Lincoln's Inn, an LL.D. of Cambridge, a Fellow of the Royal Society, and has been appointed (March 1899) President of the Royal Humane Society in succession to the Duke of Argyll, who for forty years occupied that position.

YORK, H.R.H. Victoria Mary, Duchess of York, is the daughter of H.R.H. Mary Adelaide, Duchess of Teck, cousin of her Majesty the Queen, and was born on May 26, 1867. She was married on July 6, 1893, to H.R.H. the Duke of York, and she has three children, viz., Prince Edward, born June 23, 1894; Prince Albert, born Dec. 14, 1895; and Princess Victoria Alexandra, born April 25, 1897. Her Royal Highness possesses the Royal Order of Victoria and Albert, and the Imperial Order of the Crown of India.

YORKE-DAVIES, Nathaniel Edward, L.R.C.P. Lond. 1871, M.R.C.S. Eng. 1866, L.S.A., 1865, and L.M. Dub. 1865, was born April 26, 1841, at Llanwrst, where his father was Head-master of King Edward the Sixth Grammar School. Prior to entering St. Bartholomew's Hospital he was educated at Cheltenham and other schools. After a brief period of service in the Egyptian navy he applied himself to the special study of dietetics, upon which subject he is now generally recognised as one of the greatest living authorities. There can be no doubt that his careful investigations will greatly tend to promote the increase both of health and longevity. Mr. Yorke-Davies is the author of numerous and valuable works upon the topic to which he has devoted the greater part of his leisure during the past quarter of a century. The most important of these are: "One Thousand Medical Maxims and Surgical Hints," 1885; "Aids to Long Life," 1886; "Foods for the Fat," "Dietetics of Obesity," 1889; "Living to Eat and Eating to Live," 1891; "Health and Condition," 1894; "Homburg and its Waters," 1897; "On the International Consumption of Meat in its Relation to Obesity," *Lancet*; "Thyroid Tabloids in Obesity," *Brit. Med. Journ.*, 1894; "500 Cases of Obesity successfully treated by Scientific Dieting, with Table of Results," *Prov. Med. Journ.* 1893, &c. His work on "Health and Condition" has passed through several editions. Address: 44 Harley Street, W.

YOUNG, Sir Allen, C.B., Arctic navigator, was born in 1830, and formerly commanded a ship in the merchant service, which he entered in 1846, and among the many officers of that service who did good work and gained credit at Balacava during the Russian war, there was no commander whose services were more warmly acknowledged by the late Lord Lyons than were those of Captain Allen Young. Subsequently he volunteered and filled a responsible position on board Lady Franklin's little ship, the *Fox*, in McClintock's memorable voyage (1857-60), when the problem of the fate of Franklin and his companions was solved. As an officer of the Royal Naval Reserve his commission bears date from the first creation of the force. In 1875, principally at his own expense, he made in his yacht, the *Pandora*, a gallant though unsuccessful attempt to accomplish the North-West Passage, and to throw some further light on the proceedings of the lost expedition under Franklin, by a search for their records on King William's Land. Again, in 1876, he refitted the *Pandora* for a second attempt, with the same objects in view; but the Admiralty having been unexpectedly called upon to communicate with the depots of the Government Expedition in Smith's Sound, Captain Young readily responded to an invitation to fulfil that important duty, which he did at no small risk, and in a manner which was deemed thoroughly satisfactory. In recognition of this service the Queen conferred on him the honour of knighthood, March 12, 1877. An account of the "Two Voyages of the *Pandora* in 1875 and 1876" was published in London in 1879. In 1882 he commanded the *Hope*, sent out in search of the *Eira* Arctic ship, which had been lost in Franz Joseph Sound, and rescued the crew of the latter vessel. During the Egyptian war he was present at the operations at Suakim as commissioner afloat to the National Aid Society. Sir Allen Young was created C.B. in 1881, and is Knight Commander of the Imperial Order of Franz Joseph of Austria, Commander of the Order of the Dannebrog, Denmark, and of the Order of the North Star of Sweden, Officer of the Oaken Crown of the Netherlands, and a younger Brother of the Trinity House; besides holding two Arctic medals, the Egyptian War Medal and the Khedive's Star. Address: 18 Grafton Street, W.

YOUNG, Sir Frederick, K.C.M.G., J.P., D.L., D.Sc., was born in Limehouse on June 21, 1817, and is the eldest surviving son of the late Mr. George Frederick Young, who represented the shipping interests in the House of Commons as a member for Tynemouth from 1832 to

1838, and afterwards sat for Scarborough from 1851 to 1852. He had for his grandfather on the paternal side Vice-Admiral William Young, who commanded the line-of-battle ship *Foudroyant*. This gallant admiral was appointed by Lord Keith its naval commander, to superintend the disembarkation of the troops which formed the Egyptian expedition in March 1801, and in his cabin died Sir Ralph Abercrombie, who received his mortal wound at the battle of Alexandria. Sir Frederick's mother was of Kentish origin, being Mary, daughter of Mr. John Abbott, of Canterbury. The first work of public utility which calls for notice in this sketch is one which redounds to the credit of both Sir Frederick and his father. The project of obtaining Victoria Park, and, after rescuing it from the possible spoliation of the speculative builder, throwing it open as a place of popular recreation, originated with Mr. George Frederick Young, who was the author of the scheme. Sir Frederick (then Mr.) Young was asked to act as Honorary Secretary and Treasurer to the Committee then formed to prosecute the scheme. It was not accomplished in a day. Mr. Young, senior, drew up a memorial for presentation to the Queen, and the matter being undertaken with spirit, it roused such interest that the young secretary soon obtained 30,000 signatures from the inhabitants of the Tower Hamlets, and the memorial was presented in due course. The agitation thus begun was kept alive for three or four years, constant communications passing between the promoters, Lord Duncannon, and prominent Government officials, until at last vested interests were satisfied, the delays of red-tape surmounted, and Victoria Park as a magnificent open space for the recreation of overcrowded East Londoners was thrown open to the people. Sir Frederick was also prominently instrumental in securing Epping Forest for the public, and this extensive domain was made for ever secure from the land-grabber by being placed under the guardianship of the Corporation of the City of London. He was actively engaged in the establishment of the People's Palace, and has taken a benevolent interest in the Emigration Question. In 1869 he embodied his views upon that subject in a pamphlet entitled "Transplantation"; and in the following year was elected Chairman of the National Colonial Emigration League. Imperial Federation, of which he was one of the earliest advocates, has likewise largely engaged his attention, and received his energetic support. He was a member of the Executive Committee of the Imperial Federation League, founded under the auspices of the late Right Hon. W. E.

Forster, M.P., in 1884. He is the author of several works relating to the Colonies generally, including, among others, "Reasons for Promoting the Cultivation of New Zealand Flax," "Transplantation: the True System of Emigration," "Long Ago and Now," "New Zealand: Past, Present, and Future," "England and her Colonies at the Paris Exhibition," "On the Political Relations of Mother Countries and Colonies," "An Address on Imperial Federation," and "Emigration to the Colonies," and was editor of an important work entitled "Imperial Federation," published in 1876, and another entitled "A Senate for the Empire," published in 1895. "A Winter Tour in South Africa" was published in 1890. Sir Frederick Young was created K.C.M.G. for his services on behalf of the Colonies. He was for many years Honorary Secretary, and afterwards one of the Vice-Presidents of the Royal Colonial Institute. He is also on the Commission of the Peace for Middlesex, Westminster, the County of London, and the Liberty of the Tower, and a Deputy-Lieutenant of the Tower Hamlets. He married, in 1845, Cecilia, daughter of Mr. Thomas Drane, of Torquay; she died in 1873. Addresses: 5 Queensberry Place, S.W.; and Athenæum.

YOUNG, Sir George, Bart., LL.D., M.A., J.P., Charity Commissioner, was born at Cookham on Sept. 15, 1837, and is the eldest son of the second baronet, whom he succeeded in 1848, and of a daughter of William Mackworth Praed, Serjeant-at-Law. He was educated at Eton and Trinity College, Cambridge, of which he was elected Fellow in 1862. While at the University he gained the Le Bas Prize for an essay on "Greek Literature in England," and was called to the Bar at Lincoln's Inn in 1864. He has served on various Royal Commissions, and was Secretary of the Factory and Workshops Acts Commission in 1875, and of the Irish Land Acts Commission in 1881. He was appointed a Charity Commissioner in 1882, and was President of the Senate of University College, London, from 1881 to 1886. He has been a leader in the movement in favour of a Teaching University for London. He is the author of a Report to Government on Friendly Societies, has published essays, "Political Poems," 1888, and is editor of the poems of Winthrop Mackworth Praed. Addresses: Formosa Place, Cookham; and Athenæum.

YOUNG, Lord, The Right Hon. George Young, Senator of the College of Justice, with the courtesy title of Lord Young, eldest son of the late Alexander Young, Esq., of Rosefield, co. Kirkcud-

bright, born 1819, educated at Dumfries and Edinburgh, was called to the Scotch Bar in 1840; Solicitor-General for Scotland 1862-63, and again 1868-69. He was Lord Advocate 1869-74. Mr. Young was Sheriff of Inverness-shire from 1853 till 1860, and of Berwick and Haddington from 1860 till 1862. In April 1865, on the retirement of Sir W. Dunbar, Bart., he was elected member in the Liberal interest for the Wigtown Burghs, and was again returned in 1865, 1868, and 1874. He was raised to the Bench in 1874. In 1872 he was made a Privy Councillor. In 1846 he married Janet, daughter of G. Graham Bell, Crurie, Dumfriesshire. Addresses: 28 Moray Place, Edinburgh, &c.; and Athenæum.

YOUNG, Sydney, D.Sc., F.R.S., F.O.S., F.I.C., third son of Edward Young, a Liverpool merchant and Justice of the Peace for the county of Lancashire, was born on Dec. 29, 1857, at Farnworth, near Widnes, Lancashire. His early education was conducted at a private school in Southport, and at the Royal Institution, Liverpool. After spending two years in business, Sydney Young entered the Owens College in 1876, and studied there for five years, becoming an Associate of the College in 1880. He matriculated with honours at the London University in 1877, passed the 1st B.Sc. with honours in Physics in 1879, and was awarded the Scholarship in Chemistry at the final B.Sc. examination in 1880. He obtained the degree of Doctor of Science in 1883. During his stay at the Owens College a Chemical Society was founded by the students, and he and Arthur Smithells, now Professor of Chemistry at Leeds, were elected joint Secretaries of the Society. It was at this time that Professor Carnelly made the discovery that ice, when exposed to very low pressures, could not be liquefied even on the application of great heat, and at Sir Henry Roscoe's suggestion Mr. Young showed the experiment to the Society, and at the same time drew attention to the probable explanation of the behaviour of ice under these conditions. Afterwards in Bristol, in conjunction with Professor Ramsay, he obtained an experimental verification of this explanation. After undertaking an investigation on "Alcoholic Fluorides" at the Owens College, Mr. Young spent a year in Professor Fittig's laboratory at the University of Strasburg, and there carried out a research on "Ethyl-valero-lactone" and other compounds. In 1882 Dr. Young was appointed Lecturer and Demonstrator of Chemistry in University College, Bristol, and during the following five years he was engaged in original work, chiefly in

physical chemistry, jointly with Professor Ramsay. On the retirement of Dr. Williamson in 1887 from the Professorship of Chemistry at University College, London, Professor Ramsay was appointed as his successor, and Dr. Young was then elected to the Chair of Chemistry in University College, Bristol, a post which he still retains. Dr. Young was elected a Fellow of the Royal Society in 1893, a Fellow of the London Chemical Society in 1881, a Member of the Berlin Chemical Society in 1882, a Member of the London Physical Society in 1886, and a Fellow of the Institute of Chemistry in 1888. He served on the Council of the Chemical Society from 1894 to 1898, and of the Physical Society from 1894 to 1897. He was President of the Bristol Naturalists' Society from 1894 to 1897, and of the Physical and Chemical Section of the Society from 1893 to 1896. He was External Examiner in Chemistry for the Victoria University from 1893 to 1896. Dr. Young is the author of numerous memoirs in Inorganic, Organic, and Physical Chemistry, which have been published by the Royal Society, the London and Berlin Chemical Societies, the Physical Society, the Society of Chemical Industry, and in the *Philosophical Magazine* and *Nature*. Many of the researches are on the vapour pressures, specific volumes and critical constants of inorganic and organic compounds, and on the generalisations of Van der Waals regarding corresponding temperatures, pressures, and volumes; and he has described new methods and apparatus for determining the specific volumes of liquids and saturated vapours, for fractional distillation, for the preparation of ketones, for showing the volatilisation of ice, &c. He is also the author of "Questions on Physics" (Rivingtons, now Longmans), and of articles on "Distillation," "Sublimation," and "Thermometers," in Thorpe's "Dictionary of Applied Chemistry." Addresses: 10 Windsor Terrace, Clifton, Bristol; and University College, Bristol.

YOUNG, Sir William Mackworth, K.C.S.I., M.A., the third son of Sir George Young, Bart., was born in 1840, and educated at Eton and King's College, Cambridge. He entered the Indian Civil Service in 1862, and was sent to the Punjab as Assistant-Commissioner, 1863. He became Deputy-Commissioner in 1878, and in the same year Superintendent of the State of Kapurthala. Two years later he was Secretary to the Government of the Punjab, and was promoted to be a Commissioner in 1887. In 1893 he was a member of the Viceroy's Legislative Council, and President of the Indian Hemp Drugs Commission in the same year. Having

been Resident of Mysore from 1895 to 1897, he was appointed to his present post of Lieut.-Governor of the Punjab in the latter year, receiving also the rank of K.C.S.I. He married (2), in 1881, Frances, eldest daughter of Sir Robert Egerton, K.C.S.I. Address: Lahore.

YOUNGHUSBAND, Lieut.-General Charles Wright, C.B., F.R.S., is the son of the late Major-General Charles Young-husband, R.A., and was born at Leith Fort, N.B., on June 20, 1821. He was educated at the Royal Military Academy, Woolwich, and entered the Royal Artillery in 1837. He was engaged in working at the Magnetic and Meteorological Observatory of Toronto, Canada, from 1840 to 1846, and during the next seven years he assisted the late Sir Edward Sabine, F.R.S., in arranging the results of observations, taken at various observatories. He served through the Crimean campaign, being present at Inkerman, and gaining the medal, with two clasps. He became Secretary of the Royal Artillery Institution in 1854, and he was occupied, during the years 1857 to 1863, in superintending contracts for swords, bayonets, &c., in Belgium and Germany. General Younghusband was a member of the Ordnance Select Committee from 1863 to 1867, and in the latter year acted as Commissioner in charge of war material at the Paris Exhibition. From 1868 to 1875 he was Superintendent of the Royal Gunpowder and Gun-Cotton Factory at Waltham Abbey, and during the following five years he acted in the same capacity at the Royal Gun Factories, Royal Arsenal, Woolwich, and he finally retired in 1880. He married, in 1846, Mary, daughter of the Hon. Judge Jones, of Toronto (she died in 1889). Addresses: 12 Castle Hill Avenue, Folkestone; and the Athenæum.

YOUNGHUSBAND, Captain Francis Edward, C.I.E., was born in May 1863, and is the second son of Major-General J. W. Younghusband, C.S.I. He joined the 1st Dragoon Guards in 1882, became Captain in 1889, and entered the Indian Staff Corps. He was at one time Assistant to the Political Agent at Gilgit, and is British Agent in Chitral. He is well known for his exploration of the Pamirs in 1893, and has received the Gold Medal of the Royal Geographical Society. In 1891 he was created C.I.E. His two most important works are "Heart of a Continent" and the "Relief of Chitral." The latter work was written in conjunction with Captain G. J. Younghusband in 1895.

YOXALL, James Henry, M.P., M.A. *hon. causd*, Camb., was born, July

15, 1857, at Redditch, Worcestershire, where he attended a public elementary school. In his fourteenth year he left home to become a pupil-teacher, and then an assistant-teacher, in a Sheffield Board School. For two years he was a student of the Westminster Training College. Returning to Sheffield, he was rapidly promoted to a headmastership, and under his charge the Sharrow Lane Board School became well known for the novelty and success of the educational methods he originated there, bringing pictorial art and music to bear on the ordinary subjects of instruction, and attracting visits from educationalists from many parts of the United Kingdom and the Empire. By articles in magazines, and speeches on many platforms, he assisted materially in the downfall of the system known as "Payment by Results" in schools, and much of the reform accomplished since 1890 has been due to his efforts. In 1892 the members of the National Union of Teachers elected him their President, and a few months later appointed him General Secretary of that organisation, which under his care has considerably grown in influence, and has more than doubled in numbers. He was unsuccessful as a parliamentary candidate for Bassetlaw in 1892, but the efforts he then made secured for him an invitation to stand for Nottingham (West), a seat which he won in 1895. In 1894 he was appointed a Royal Commissioner on Secondary Education in England, and has come to be regarded as an authority on all matters pertaining to schools, both in the House of Commons and in the country. In 1899 the degree of M.A. (*honoris causa*) was conferred on him by the University of Cambridge in recognition of his services to the cause of public education. Mr. Yoxall is the author of "Secondary Education," 1896; "The Lonely Pyramid," 1890; "Nut-brown Roger and I," 1891; and editor of "The Children's Dickens," "Stories for the Schoolroom," &c. Addresses: 7 Pagoda Avenue, Richmond, Surrey; and 71 Russell Square, W.C.

ZANARDELLI, Giuseppe, an Italian statesman, was born in 1826, in Brescia. He became a student in the Ghislieri College of Pavia, and took his degree as Doctor of Law in 1848. He enrolled himself in the legion of students which was formed at that time, and took part in the war of independence. Returning to Brescia after August 1848, he there prepared the

rising which took place in March 1849. He escaped, and in consequence of the amnesty granted by the Austrian Government, subsequently returned to Brescia, where, from 1851 to 1859, he lived as a private teacher of jurisprudence. When Lombardy became free in 1859 Zanardelli sat in the Piedmontese Legislature in several Parliaments for Isco. In 1866 he became *commissario regio* of the Province of Belluno, under the Ministry of Ricasoli. In 1869 he sat on the commission of inquiry into the tobacco Regia. At the Lombard bar Zanardelli enjoyed a very high reputation as an advocate. After the Ministerial crisis of 1876 he became Minister of Public Works in the first Depretis Cabinet, which portfolio he resigned in November 1877, in consequence of differences with Depretis, which made it impossible for him to sign, as Minister of Public Works, the Railway Convention arranged by the latter. He was appointed to the Home Office in the Cairoli Ministry in March 1878, and went into opposition on its fall. He was Minister of Justice and Cults under the various Crispi Ministries, and the new Italian Penal Code, which came into force on Jan. 1, 1890, is chiefly due to him. In 1894, on the fall of the Giolitti Ministry, he tried to form a Cabinet, but had to give place to Signor Crispi, whose bitter and factious enemies he then joined. This hostility caused him to be beaten in a provincial election at Brescia, his own home, in May 1895. The general election immediately ensued. After the general election of March 1897 the Marquis di Rudini has mainly relied for support in Parliament on the combined parties of Giolitti and Zanardelli.

ZANGWILL, Israel, was born in London of poor Jewish parents in 1864, but his early childhood was passed mainly in Plymouth and in Bristol, where he attended the Red Cross Street Middle Class School, reaching the highest class but one before his parents returned to London, in his ninth year. The boy was placed in the Jews' Free School, an immense institution in Spitalfields, where in due course he became head boy, thrice carrying off the scholarships and medals founded to commemorate the admission of Jews into Parliament. He remained at the school as a teacher, and after the laborious work of the day studied for a degree at London University, where he graduated B.A. with triple honours before he was twenty-one. He also took the highest possible teachers' certificate. He had scribbled from childhood, and in his sixteenth year a prize serial from his pen ran through a London weekly, but it was not till he had graduated that he was able

to turn seriously to literature. He began a political skit with a friend, which developed into a long fantastic romance called "The Premier and the Painter," which was published in 1888, and has passed through several editions. Before its publication his desire to introduce reforms in the scholastic routine had brought him into conflict with the authorities, and he resigned his position, and, being penniless, was about to canvass for advertisements, when he found a less humble journalistic opening. Two years later he founded *Ariel*, or the *London Puck*, which had a short but merry life of a couple of years, during which Mr. Zangwill also came into notice as a speaker in the debates of the Playgoers' Club. The death of *Ariel*, and the publication, in 1891, of "The Bachelors' Club," which was an instant success on both sides of the Atlantic, enabled Mr. Zangwill to devote himself to literature, and in 1892 he enrolled himself among the serious novelists by his "Children of the Ghetto," a study from the life of a section of humanity hitherto neglected or distorted in fiction, which provoked especial controversy in America, and which has been translated into many languages. In "The Old Maids' Club," 1892, Mr. Zangwill supplied a pendant to "The Bachelors' Club," and the two are now paradoxically united in one volume as "The Celibates' Club." In a couple of novelettes, "The Big Bow Mystery," 1891, and "Merely Mary Ann," 1893, and in a large novel, "The Master," 1895, devoted to problems of art and life, Mr. Zangwill sought more serious inspiration outside the Ghetto, though he has returned to it in his "Dreamers of the Ghetto," 1898, life-stories of the great Jews of the last four centuries, which appeared simultaneously in several forms, English, American, Colonial, and Continental. "Ghetto Tragedies," 1893 (just expanded, by the addition of many new stories, into "They That Walk in Darkness," 1899), and "The King of Schnorrers, Grotesques and Fantasies," 1894, complete the list of his Jewish studies, though he has also written, in essay form, upon "English Judaism" in the *Jewish Quarterly Review*, on "The Position of Judaism" in the *North American Review*, and on "Zionism" in *Lippincott's*. In lighter essay vein he has discoursed on all topics, in "Without Prejudice," 1896, a collection of prose and verse, mainly from the *Poll-Magazine*. The poems contributed to many other periodicals still await collection. Mr. Zangwill has lectured on "The Drama as a Fine Art," "The Ghetto," and "Fiction the Highest Form of Truth," throughout Great Britain, Ireland, Holland, and the United States of America. He

lectured at Jerusalem when travelling through Palestine and Syria in 1897. Mr. Zangwill has written some of his stories in Italy, and has lived frequently in the Latin Quarter of Paris. As a dramatist, owing to his desire for a free hand, he had been represented only by slight one-act pieces, one of which, "Six Persons," had a long run at the Haymarket Theatre. But in the autumn of 1899 a four-act dramatisation from his own pen of his most popular novel, "Children of the Ghetto," was elaborately produced on the New York stage, under the personal supervision of the author. Address: 24 Oxford Road, Kilburn, N.W.

ZANZIBAR, Sultan of. See HAMUD BIN MAHOMED.

ZELLER, Eduard, German theological and philosophical writer, was born at Kleinbottwar in Wurtemberg, Jan. 22, 1814, and studied at Tübingen and Berlin. In 1847 he became Professor of Theology at Berne, in 1849 at Marburg, and in 1862 Professor of Philosophy at Heidelberg, and subsequently in Berlin, where he has since remained. His principal works are: "Platonic Studies," 1839; "The History of Greek Philosophy," 4th edit., 1876; "Critical Study of the History of the Apostles," 1854; "State and Church," 1872; "Strauss, his Life and Writings," 1874; and his chief work, "The History of German Philosophy since Leibnitz," 1873. Several sections of his "History of Greek Philosophy," which is still the standard work on the subject, and widely used in the English Universities, have been translated into English by the late Miss S. F. Alleyne. One of his latest works (1886) is entitled "Friedrich der Grosse als Philosoph."

ZENKER, Wilhelm, Ph.D., was born in Berlin, May 2, 1829, and educated wholly in that city, where also he obtained the degree of Doctor of Philosophy in 1850. He was for many years a teacher of natural science, but has now retired. He has written many memoirs on very various subjects, of which may be quoted, "De natura sexuali generis Cypridis," 1850; "Memoir on the Depression in Northern Africa found by Gerh. Rohlfs," in the *Zeitschrift für Erdkunde*, 1872; "Der Venusdurchgang, 1874," 1874; "Meteorologischer Kalender," 1886; "Die Vertheilung der Wärme auf der Erdoberfläche," 1888.

ZETLAND, Marquis of, the Most Hon. Lawrence Dundas, Bart., was born on Aug. 16, 1844, and is the grandson of the first Earl of Zetland, and

nephew of the second, whom he succeeded in 1873. He was created Marquis in 1892. He has been a lieutenant in the Royal Horse Guards, a captain in the Yorkshire Yeomanry, a Lord-in-Waiting, and Lord-Lieutenant of Ireland in Lord Salisbury's second administration, when he succeeded the Marquis of Londonderry, 1886-92. He is a county Alderman for North Riding, and Hon. Col. in the Royal Artillery Volunteers. He was sworn of the Privy Council in 1889. In 1871 he married Lady Lillian Selina Elizabeth Lumley, daughter of the 9th Earl of Scarborough. Addresses: 19 Arlington Street, S.W.; and Aske, Richmond, Yorks., &c.

ZIMMERMANN, Agnes Marie, was born at Cologne on July 5, 1847. At four years of age she came to England, and after studying under her father and one or two private masters, was entered at nine years of age as a student at the Royal Academy of Music, where Cipriani Potter was her master at the piano, and Dr. Steggall taught her harmony. On Cipriani Potter's retirement in 1860, Herr Ernst Pauer became the young student's piano master, and she then began to study composition under Professor Macfarren. She continued to work hard, and while yet a pupil composed several works, instrumental and vocal, which were performed at the Royal Academy Students' Concerts. In 1860 she obtained the King's Scholarship, and the same honour fell to her in 1862; in the following year she won the Silver Medal, and on Dec. 5 she made what may be fairly termed her first appearance, at a Crystal Palace concert. In 1864 Miss Zimmermann went to Germany, where she played at the Leipzig Gewandhaus Concerts, before the Court of Hanover, and elsewhere. Returning to England, she grew rapidly in public favour. In 1879, 1880, 1881, 1882, and 1886 Miss Zimmermann played at many public concerts in Germany—at Hamburg, Düsseldorf, Brunswick, Berlin, Frankfurt, Leipzig, Halle, &c., as well as privately to the Courts at Dresden, Berlin, Darmstadt, and Brussels. For many seasons she has regularly taken part in the Monday and Saturday Popular Concerts, and has played in most of the provincial cities and at the principal places in Scotland. Miss Zimmermann's own compositions are well known to musicians, and her editions of Beethoven's and Mozart's Sonatas are standard works among students. She has been engaged on an edition of Schumann's works, the first volume of which was published in 1890. Address: 13 Portman Square, W.

ZIMMERN, Helen, was born in the free Hanse town of Hamburg, March 25,

1846, but has lived in England since 1850, and is a naturalised British subject. She is the author of "Stories in Precious Stones," 1873; "Schopenhauer, his Life and Philosophy," 1876; "Gotthold Ephraim Lessing, his Life and his Works," 1878; "Half Hours with Foreign Novelists," 1880; "Tales from the Edda," illustrated by Kate Greenaway, 1882; and a paraphrase of the Persian poet, Firdusi, issued under the title of "The Epic of Kings," and illustrated with etchings by Alma-Tadema, R.A., 1882; "Life of Maria Edgeworth," 1883; "The Hanse Towns," 1889; an edition of the "Comedies of Goldoni," 1892; and a translation of the "Pentamerone," new edition, 1893. She also writes much for periodicals and for English, American, German, and Italian newspapers. Address: 2 Via Leone Decimo, Florence.

ZOLA, Émile, French novelist and patriot, was born in Paris, 10 Rue St. Joseph, April 2, 1840, of a French mother, Emilie Aubert, and an Italian father, an eminent civil engineer, whose work, "Un Traité de Nivellement," gained him the membership of the Academy of Padua. François Zola is best known by the "Canal Zola" at Aix; he was born in 1796 at Venice, and died at Marseille in 1847, leaving his family very badly off. His more famous son, Émile, passed his boyhood at Aix, where he studied at the local college, and came to Paris in February 1858. He obtained a scholarship at the Lycée St. Louis, where he was a pupil of Levasseur, who predicted the success of the future novelist on reading an essay of his on "Milton dictating to his Daughter." All the same he failed to pass his *baccalauréat*, being rejected in literature in the *vivâ voce*. In 1860 he left the Lycée, and after working at the docks for two months, he preferred starvation and threw up his post. Towards the end of 1861 he obtained an introduction to Messrs. Hachette, the well-known publishers, and started in their office, first as a shopman at £4 a month, and afterwards as a clerk, when they saw his worth. He employed his leisure in writing short tales, which were afterwards published under the title of "Contes à Ninon" (Oct. 24, 1864). During the next year he wrote tales for the *Petit Journal* and *La Vie Parisienne*; and a collection of articles for the *Salut Public* of Lyon, which were afterwards published under the title of "Mes Haines." This same year (1865) saw the publication of "La Confession de Claude," and on Jan. 31, 1866, he resigned his position at Hachette's, convinced that he could earn his living by his pen. Villemessant employed him to write reviews for the *Événement*, and afterwards a set of articles

on the "Salon," which created such a stir that they had to be cut short. Nowadays they read very tamely. In the same paper appeared as a serial "Le Vœu d'une Morte," and in a provincial paper, "Les Mystères de Marseille." Neither of these achieved any great success. During 1866 and 1867 he wrote "Thérèse Raquin," which first appeared in Arsène Houssaye's paper *L'Artiste*, which had already published a wonderful study of Zola's on Manet. "Thérèse Raquin," the first title of which was "Une Histoire d'Amour," brought its author £24, and a violent series of letters in the *Figaro* and elsewhere. In 1868 he wrote "Madeleine Férat," a novel founded on a play which he had written in the previous year, but which he failed to get accepted. However, its serial career was cut short in the *Événement* to soothe the puritanism of its readers, and when published in volume form it attracted no notice. He formed with Flaubert, Daudet, and the Goncourts an informal "Naturalist School" in the last days of the Empire. To this period we must assign the first idea of the second greatest series of French novels of the nineteenth century, second only to Balzac's "Comédie Humaine." Up to now Zola had achieved no great success, in spite of his six published volumes. Then came to him the idea of bringing the scientific laws of heredity within the scope of romance, and he drew up, after eight months' hard work in libraries, museums, and the streets, the now famous genealogical tree of the family of the Rougons (to be found in "Une Page d'Amour" and in "Docteur Pascal"). In 1869 he went to his publisher, Lacroix, and offered to write twelve volumes of a series to be styled "Les Rougon-Macquart," and the contract was signed in May of that year. He applied his theory to the *document humain*, and in doing so he had to master the technical details of most professions, trades, and occupations. In June 1870 the *Siècle* began the publication of the first of the series, "La Fortune des Rougon"; but the war soon interrupted its course, and it appeared in volume form in 1871. In his preface he explains his object to be to show how a family can produce ten or twenty individuals appearing at a first glance totally different, but when analysed closely connected with each other. In 1872 the second volume appeared, "La Curée," which had been stopped in its serial publication. The third volume of the series was "Le Ventre de Paris," a description of the Paris markets, and from this time the firm of Charpentier became the author's publishers. Then came "La Conquête de Plassans," "La Faute de L'Abbé Mouret," an attack on celibacy and a vivid study of provincial life; and "Son

Excellence Eugène Rougon." It cannot but be confessed that up to this point the success of the series had not been so great as the author and publisher had expected; but all this changes with the publication of "L'Assommoir." On its serial appearance in *Le Bien Public* it was, as usual, stopped by the outcries made as to its immorality and its anti-puritan bent; but an advanced journal, *La République des Lettres*, conducted by M. Catulle Mendès (*q.v.*), offered to continue the publication; and the discussion thenceforth raged more furiously. The author himself made a very powerful defence of his book, as being a work with a highly moral aim. It was dramatised by MM. Busnach and Gastineau, and the play was known in England as "Drink," in which Mr. Charles Warner made a great reputation. The next volume of the series was "Une Page d'Amour," and this was followed by "Nana," a work which made even a greater sensation than "L'Assommoir." It was published serially by the *Voltaire*, and its first edition ran into fifty-five thousand, a number up till then without precedent in French publishing. After this each successive volume of the Rougon-Macquart had its success assured beforehand, and their author was recognised even by his most violent opponents as one of the forces to be reckoned with in contemporary literature. The titles of the other volumes were: "Pot-Bouille" (1882); "La Joie de Vivre"; "Au Bonheur des Dames" (the sequel to "Pot-Bouille"); "Germinal," a study of French miners; "L'Œuvre," dealing with art and literature; "La Terre," an appallingly repulsive, and at times extremely humorous, study of the land-hunger of the French peasant, a book which, while grossly misrepresenting the better kind of French peasants, was the cause of five of M. Zola's disciples dissociating themselves from their leader's work. Of these MM. J. H. Rosny and Paul Margueritte have since achieved fame on different lines. Then came "Le Rêve," a book on romantic lines, which proves conclusively that M. Zola is not a master of sentimental romance, inasmuch as he lacks the poet's instinct. Report had it that this was an attempt of his to soothe the offended susceptibilities of the French Academy, and gain him admission thereto. "La Bête Humaine," dealing with railways, and "L'Argent," a study of the Bourse, followed; and then "La Débâcle," a vivid picture of the break-up of the Second Empire under the heavy hammer of the Teutons; and lastly, "Le Docteur Pascal," which completes the twenty volumes of this great series, and sums up the theories which he had enunciated in it. No man

could be more justly proud of the efforts of his own brain, and his publishers gave him a déjeuner at which all literary Paris was present. On July 14, 1888, he was appointed a Knight of the Legion of Honour, and five years afterwards an Officer. From 1891 till 1894 he was President of the Société des Gens de Lettres. During the years that the Rougon-Macquart series was appearing M. Zola also wrote many critical articles, which were afterwards published as "Le Roman Expérimental," "Les Romanciers Naturalistes," and "Documents Littéraires." We must not forget to mention here that most powerful short story "L'Attaque du Moulin," published in a book entitled "Les Soirées de Médan," 1880, a volume named after his home near Paris, in which also appeared Guy de Maupassant's "Boule de Suif." It is a pathetic incident of the Franco-Prussian War, and has been made the subject of a well-known opera. A new set of critical articles appeared in the *Figaro* during 1880-81, which have been published as "Une Campagne." In 1893 M. Zola visited London on the invitation of the Institute of Journalists, whom he addressed on the subject of "Anonymity in Journalism." The next year he commenced a series of three novels, which he called "Les Trois Villes"—*Lourdes*, *Rome*, and *Paris*. The first was a lurid picture of French pilgrimages to the southern shrine; the next, a book upon the Eternal City; and the last, a mass of documents which do not give a very clear idea of *La Ville Lumière*. In these three works he intended to represent the progress of an honest priest, the Abbé Pierre Froment, towards freethought, after discovering that the salvation of society is not to be effected by Catholic faith. It must not be forgotten that although a just appreciation of Zola is a commonplace of literary criticism in these days, very few years have passed since his translators and their publishers were treated as common criminals. In 1897 he achieved the unusual distinction of having a whole book written on his brain. This was a study by Dr. Edouard Toulouse, of the Paris Faculty of Medicine, entitled "Enquête Médico-Psychologique sur les Rapports de la Supériorité intellectuelle avec la Névropathie," which is an inquiry similar to that pursued in Mr. J. F. Nesbit's well-known work on the "Insanity of Genius." In this work we find every possible particular of the novelist's physical and mental life from the cradle to the date of publication. We learn that, as in early years he endured extreme privation, he was correspondingly thin. With increased prosperity came increased avoirdupois, until in 1887 he decided to diet himself. Dr. Toulouse

ascribes M. Zola's best work to the period when he was still a fat man; that is, anterior to "La Terre." He now diets himself rigorously: at nine, on rising, he partakes of a crust of dry bread, drinking nothing with it; he lunches lightly at one, again taking nothing to drink; immediately after this meal he goes out of doors, so as to avoid falling asleep; at five he has tea, and he dines, lightly and without drinking, at half-past seven. At ten he drinks two cups of tea. He has given up smoking, and he refrains entirely from wine except for an occasional glass after bicycling. The year 1898 was a momentous one in the novelist's life. Captain Alfred Dreyfus, condemned in 1894, had been languishing for three years off the fever-stricken coast of Cayenne; during those three years his devoted family and friends had been struggling to obtain a revision of his so-called trial. They could gain no hearing, but Zola, once convinced of the injustice that had been done, and supremely careless of all personal consequences, compelled France and the entire world to listen to his case. His letter *j'accuse* was published in M. Clémenceau's journal *L'Aurore* on January 13, 1898. It had been preceded by two letters, "Lettre à la Jeunesse" and "Lettre à la France." The sensation created was enormous, and he was immediately prosecuted for having said that the judges who tried Esterhazy had acquitted him by order. The trial took place in Paris from 7th to the 23rd of February, and was the one subject of interest at the time. People waited for hours for a chance of a peep into the court, and the courageous author had to be protected by the police from the attacks of a brutal mob. The evidence was strongly in favour of M. Zola's contentions, namely, that Dreyfus had been condemned illegally, that the facts against him had been without significance, and that the *bordereau* was written not by Dreyfus, but by Esterhazy. But General de Boisdeffre, the chief of the General Staff, came forward and threatened the jury with the resignation of the whole staff if Zola were acquitted, and in the end he was condemned to the maximum penalty, in spite of the heroic efforts of his counsel, M. Labori (*q.v.*). He appealed against this decision, and the trial was quashed on an informality; again the military authorities decided to prosecute him, and he was again condemned, this time by default, at Versailles. Whereupon he left the country and came to England, where he lived in retirement in a village near Birmingham until the Court of Cassation gave its judgment on the whole question of revision. In consequence of his condemnation the Chancellor of the

Legion of Honour erased his name from the roll, and François de Pressensé (*q.v.*) and others voluntarily gave up the order as well. His technical offence was defamation of a tribunal, *i.e.* saying Esterhazy had been acquitted by order; but his real offence was making himself the mouth-piece of the intelligent and thoughtful portion of the French public. He has dared to stand up for truth and liberty at a moment when many saw the peril of such conduct, but no other was ready to brave the extremity of personal danger in order to aid in averting it. Posterity will look beyond the studied intemperance of his language and will see in him a man who refused to sit still while a great wrong

was being perpetrated, and calmly challenged the combined forces of army, Jesuits, and rabble. In May 1899 his new novel, "*Fécondité*," began to appear as a *feuilleton* in the *Aurore*. It is a picture of the life led by the working classes, and the hero is Mathien Froment, a designer in a factory, and the son of the unfrocked priest, Pierre Froment, who was the protagonist of the trilogy of "*Les Trois Villes*." The best biography in English is by Robert H. Sherard (London, 1893), and countless pamphlets and books have been written for but chiefly against him during the last thirty years in France. His Paris address is 21 Rue de Bruxelles.

APPENDIX

ABDUL AZIZ, Sultan of Morocco, was born in 1880, and at the age of fourteen, in 1894, was unexpectedly raised to the throne in succession to his father, Muley Hassan, whose death from dysentery occurred very suddenly on June 7, 1894. The young Sultan, whose succession was in accordance with his father's wishes, was proclaimed at Fez on June 12. For a time his position was threatened by Muley Mohammed, the eldest son of the late Sultan, but the rebel was seized and imprisoned on the 19th. On the 25th he married the daughter of Muley Ershid, his father's uncle. Subsequently he dismissed the Grand Vizier and the Grand Chamberlain, and replaced them by friends. The two ex-ministers were then arrested on a charge of plotting to murder the Sultan. The energetic boy despot entered Fez amid popular rejoicing in July, and firmly established himself on the throne by the arrest of Muley Omar, his uncle (July 23). The Sultan, usually termed "Emperor" by Europeans, is at the head of religion as well as of the State. He is absolute ruler over his people, but many outlying tribes practically do not acknowledge his authority. In his intercourse with foreigners, especially with our own ministers, Sir Ernest Satow and Sir Arthur Nicolson, he has been in the main most cordial. In 1895 he officially recognised a British Vice-Consul at Fez.

ABEL, Carl, Dr. Ph., M.S.G.L., Professor under the Prussian Government Department of Public Instruction, the son of a Berlin banker, was born at Berlin, Nov. 25, 1837; studied Philology, National Psychology, and History at the Universities of Berlin, Munich, and Tübingen; travelled and stayed for the purposes of linguistic research in England, France, Switzerland, Italy, Russia, and America. He has devoted himself chiefly to the comparative study of significations and the more exact branches of national psychology dependent upon the appreciation of meanings; showed linguistic concepts to be distinctly national, and their comparison the truest means of gauging the intellect and feelings of a race; examined the historical stages of significative development by an inquiry into sundry linguistic concepts of the English, French, German, Latin, Russian, Polish, Egyptian, and

Hebrew idioms; analysed the prehistoric origin of meanings through a combination of Indo-Germanic and Egyptian etymology; disclosed in the course of these labours an identity of roots, stems, and primary phonetic and conceptional laws in the two families of speech; proved these common primary laws, while they did not interfere with the separate laws of later times, to reveal a much more ancient and more perspicuous period of etymology, which unfolds the prehistoric growth and history of reason; demonstrated the primitive variability of sound and sense, the inversion of both and the multiplicity of etymological connections and transitions resulting therefrom; extended his investigations to Semitic affinities; sifted, on the basis of facts established, the origin of language, the growth of signification, and the theory of synonyms. Professor Carl Abel has acted as Ilchester Lecturer on Comparative Slavonic and Latin Lexicography at Oxford University; lectured on various etymological and semasiological topics at the Royal Asiatic Society, the Royal Literary Society, the Berlin Philological, Philosophical, and Anthropological Society; taught, as Ordinary Dozent, Philosophical and Comparative Linguistics as well as English, French, German, and Latin Synonymy in the Berlin Humboldt Academy of Science; was linguistic assistant to the German Foreign Office and the Berlin Law Courts; served as Berlin Correspondent to the *Times* and *Standard*; was a contributor to various English and German philological and general periodicals. Professor Carl Abel reads all European and several Oriental languages. The following is a list of his principal writings: "Linguistic Essays," London, 1880 (history and theory of signification, synonymy, countersense, origin of language, Latin order of words); "Sprachwissenschaftliche Abhandlungen," Leipzig, 1885 (an amplified German edition of the foregoing); "Slavic and Latin," Ilchester Lectures on Comparative Lexicography delivered at the University of Oxford, London, 1881; "Gross- und Klein-Russisch. Aus Ilchester Vorlesungen übersetzt von R. Dieltz," Leipzig, 1882 (German translation of the foregoing); "Koptische Untersuchungen," Berlin, 1878, two volumes (grammatical and semasiological); "Einleitung in ein

ägyptisch - indoeuropäisch - semitisches Wurzelwörterbuch," Leipzig, 1886 (Egyptian, phonetic and conceptual change, with specimen of application to the two other families of speech); "Wechselbeziehungen der ägyptischen, indoeuropäischen und semitischen Etymologie," Thiel 1, Leipzig, 1889 (Comparative Egyptian and Indo-European analysis of the root "ker," crooked, with generic conclusions); "Ägyptisch - Indoeuropäische Sprachverwandtschaft," Leipzig, 1890 (concise summary of the foregoing, with amplified general conclusions); "Ägyptisch und Indogermanisch Vorlesung vor den Sprachwissenschaftlichen Sectionen des Frankfurter Freien Deutschen Hochstifts," Zweite Auflage, Frankfurt, 1890 (introductory and defensive); "Zur Geschichte der Hieroglyphenschrift. Nach dem Holländischen des Dr. W. Pleyte," Leipzig, 1890; "L'Affinité étymologique des langues égyptiennes et indo-européennes, Mémoire destiné au Congrès International des Orientalistes," Lisbonne, 1892; "Letters on International Relations contributed to the *Times*," London, 1871, two volumes; and "Russland und die Lage," Leipzig, 1888 (linguistic and national psychology applied to history).

ALI PACHA, a Turkish diplomatist, commenced his political career by being one of the referendaries of the Imperial Divan. In 1858, when Fuad Pacha went to Paris as Plenipotentiary representing the Porte at the Conference which had assembled to draw up the conventions respecting the United Principalities, he attached Ali Bey to his mission, and the latter rendered himself conspicuous by his general intelligence and aptitude for diplomacy. In 1861 he was appointed First Secretary of the Ottoman Embassy in Paris, and when, in 1862, he went on leave of absence to Constantinople, the Government entrusted him with the delicate mission of Commissioner to Servia after the bombardment of Belgrade. Owing to his address and tact he succeeded in settling nearly all the difficulties. Whilst performing these functions he was, in 1865, placed in charge of the political direction of the province of Bosnia. In 1868 he was appointed Member of the Council of State, and afterwards undertook several other missions. In 1869 he was nominated to the post of Under-Secretary of State at the Ministry of Public Works. He remained in that office until 1870, when he was made Governor of Erzeroum, and afterwards of Trebizond, on which occasion he was raised to the dignity of Pacha. In 1872 he became Prefect of Constantinople, where he introduced several reforms, and

in September 1873 he was sent as ambassador from the Ottoman Porte to the French Republic. He was recalled in January 1876, and appointed Governor-General of the Herzegovina. A few days before his deposition by the Softas (May 30, 1876) the late Sultan Abdul-Aziz appointed Ali Pacha Governor-General of Scutari, in Northern Albania.

ARDITI, Luigi, a musical composer, born July 22, 1822, at Crescentino, Piedmont, was educated as a violinist at the Conservatoire at Milan. After filling the post of musical conductor in various places in Italy and America, where he remained ten years, he came to London in 1857, and was appointed musical director at Her Majesty's Theatre. Since that time he has conducted Italian opera and other music at various great theatres and concert-rooms up to the present day. Whilst in Constantinople he received from the Sultan the Order of the Medjidieh in acknowledgment of his talent as a composer. In addition to numerous songs composed by Signor Arditì may be mentioned the opera "*La Spia*," written in New York in 1856; "*Il Bacio*," written in London; and various pieces for the violin. Address: 10 Hyde Park Mansions, W.

B

BAKER, Sir Benjamin, K.C.M.G. (1890), LL.D. (Edin.), F.R.S., engineer, is the son of Benjamin Baker, of co. Carlow, and was born in 1840. He is famous as one of the designers of the Forth Bridge, the most important structure of its kind in the world. On Feb. 20, 1890, the official tests of the bridge were completed. These lasted three days, and proved the structure to be the strongest and stiffest railway bridge in the world, and capable of accommodating the heaviest traffic. On March 4, 1890, the bridge was formally opened by the Prince of Wales, accompanied by the Duke of Edinburgh and Prince George of Wales. At a banquet held after the ceremony the Prince announced baronetries for Mr. Thompson and Sir John Fowler, both deceased, and knighthoods for Mr. Arrol (now Sir William, M.P.), contractor for the Forth Bridge and for the new Tay Bridge, and for the subject of our memoir. Sir Benjamin Baker has been President (1895-96) and is a Member of the Council of the Institute of Civil Engineers, and has written on long-span bridges. It will be borne in mind that the main feature, apart from its great height, of the Forth Bridge is its immense spans—extraordinary in a rigid

structure—which are each a third of a mile in length. In 1894 Sir Benjamin Baker represented England on the question of the storage of the waters of the Nile. *He was elected F.R.S. in June 1890, and served on its Council in 1892-93. Addresses: 2 Queen Square Place, Queen Anne's Mansions, Westminster, S.W.; and Athenæum.

BISMARCK-SCHÖNHAUSEN, Count Herbert von, son of Prince Bismarck, was born at Berlin, Dec. 28, 1849. He has served the German Empire in various diplomatic capacities, and was Embassy Secretary in London, and Minister at the Hague. He has sat in the Reichstag as one of the members for Schleswig-Holstein, and in 1886 was Secretary of State and Assessor to the Chancellor. On his father's retirement he was provisionally charged with the direction of foreign affairs, but preferred to follow the Prince into private life. In January 1889 the Emperor conferred on him the Order of the Red Eagle, First Class. He holds the rank of Lieutenant-Colonel in the German army. In the summer of 1899 it was rumoured that the Emperor intended shortly preferring him to high office. In June 1892 he married, in Vienna, the Countess Hoyos, daughter of Count George Hoyos, director and controller of the extensive Whitehead torpedo works at Fiume.

BLAKE, The Hon. Edward, Q.C., LL.D., P.C. (Canada), M.P., late Canadian statesman, was born at Adelaide, Ontario, Oct. 13, 1833, and became M.A. of Toronto University, 1858. He began the practice of law in 1859, and in 1864 became a Queen's Counsel. In 1867 he was elected to the Ontario Legislature and also to the Dominion Parliament, and in 1871-72 was Premier of Ontario. This position he retained for only one session, being obliged to resign it on account of the passage of the dual representation Act. He became a member, in 1873, of the Canadian Cabinet under the Mackenzie administration, serving for various periods as Minister of Justice and as President of the Council. The Chancellorship of Ontario and the Chief Justiceship of the Supreme Court of the Dominion were offered to him, but he declined both. In 1878 he, with many other members of his party, was defeated for re-election, but he re-entered the Parliament in the following year, and was from that time until 1887 generally recognised as the leader of the Liberal party. He was chosen Chancellor of the University of Toronto in 1876, and has held the office ever since. The honour of knighthood was declined by him in 1877. In 1877 he resigned the position of leader of

the Liberal party, but retained his seat in the Dominion Parliament until 1891, when he retired from Canadian political life. He entered the British House of Commons in 1892 as member for South Longford, Ireland, having contested that constituency at the request of the leaders of the Irish Nationalist party. He was re-elected in 1895, and has taken an active part in advancing the cause of Home Rule for Ireland. He is a member of the Nationalist Parliamentary Committee. In 1889 the degree of LL.D. was conferred upon him by the University of Toronto. He married a daughter of the Bishop of Huron.

BRETT, John, A.R.A., sea-scapist, was born in 1830, and at an early age came under the influence of Mr. Ruskin and the Pre-Raphaelites. A picture painted under this influence was the "Stone-breaker," 1858, followed in 1859 by the "Val d'Aosta." From 1870 onwards, however, he became enamoured of sea-subjects, and he has now for many years painted scenes, chiefly on the Southern and Cornish coasts, in a spirited manner not in the least suggestive of his early *penchant*. His principal works at the Royal Academy's Exhibitions have been: "Spires and Steeples of the Channel Islands," 1875; "Sir Thomas's Tower," 1876; "Mount's Bay," 1877; "Cornish Lions," 1878; "Carnarvon: Stronghold of the Season and Camp of the Kittywake," 1879; "Britannia's Realm," 1880 (a picture bought by the Royal Academy); "Golden Prospects: St. Catherine's Well," 1881; "The Grey of the Morning," 1882; "These Yellow Sands," 1883; "M'Leod's Maidens, Skye," 1884; "The Norman Archipelago," 1885; "Kyle-Akin," 1887; "The Earth's Shadow on the Sky," 1888; "The Outlook from My Native Cliffs," "The Isles of the Sirens," "The Sear, the Yellow Leaf," "Probably some Rain," 1895; "A Friend in Need," "North Devon Cliffs," "From the Balcony of Cliff Cottage, Lee," and "Loch Braccadaile, Skye," 1896; "Castel Moel, Isle of Skye," "The South Stack Lighthouse: the Wind Athwart the Tide," "Distant Capri," and "Whiteshell Point, Caswell Bay (limestone)," 1897; "Among the Rocks at Trevone (quartz veins in the slate)," "Trevose Head, Cornwall," "Trevone Bay: north-westerly showers," and "Where you had better not come ashore: North Cornwall," 1898; "Kylestrome, Sutherland," "Summer on the Cliffs," "The Island off Padstow," and "Étretat (west)," 1899. Address: Daisyfield, Putney, S.W.

BROGLIE, Charles Jacques Victor Albert, Duc de, eldest son of the eminent French statesman Achille Charles Léonce Victor, Duc de Broglie (who died

in Jan. 25, 1870), was born in Paris, June 13, 1821. He was educated in the University of Paris, where, at an early age, he gained a high reputation as a publicist, and became one of the editors of the *Correspondant*, in which journal he defended Roman Catholic interests and the doctrines of moderate constitutional liberalism. He was elected a member of the French Academy in 1862. He was Secretary of the French embassies in Madrid and Rome prior to the revolution of 1848; he then retired from public life, in consequence of his political opinions, until February 1871, when he was elected Deputy for the department of the Eure, and nominated by M. Thiers's Government French Ambassador in London. On his retirement from the Ambassadorship he, as the acknowledged leader of the Conservative party in the National Assembly, moved the order of the day which led to the resignation of M. Thiers and the acceptance by Marshal MacMahon of the Presidency of the Republic, April 24, 1873. The Duc de Broglie then became Minister of Foreign Affairs and President of the Council, and for more than a year he directed the policy of the new Government; but having undertaken the project of a new Constitution, including the establishment of a Grand Council or Second Chamber, which was to be invested with the power of dissolving the Assembly, he was defeated on a question of procedure, and resigned with his Ministry, May 16, 1874. At the elections of Jan. 30, 1876, M. de Broglie was elected a Senator by the department of the Eure; his term of office expired in 1885, when he was not re-elected. On May 17, 1877, he succeeded M. Jules Simon as President of the Council of Ministers, Keeper of the Seals and Minister of Justice, which posts he resigned in December of the same year, after the elections had given a large majority to the Republican party. As a writer, the Duc de Broglie is well known by a translation of Leibnitz's "Religious System," 1846; his "Études Morales et Littéraires," 1853; "L'Église et l'Empire Romain au Quatrième Siècle," 6 vols., 1856, a work which passed through five editions; "Une Réforme administrative en Algérie," 1860; "Questions de Religion et d'Histoire," 1860; "La Souveraineté Pontificale et la Liberté," 1861; "La Liberté Divine et la Liberté Humaine," 1865; "Le Secret du Roi: Correspondance Secrète de Louis XV. avec ses Agents Diplomatiques," 2 vols., 1878; "Frédéric II. et Marie Thérèse," 1882; "Frédéric II. et Louis XV., d'après des documents nouveaux," 1885; "Marie Thérèse Impératrice," 2 vols., 1887; "Mémoires de Talleyrand" (vols. I-iv., 1891); and "La Société

de l'Abbaye de Saint-Germain des Prés au XVIII. Siècle" (2 vols., 1891). He married, in 1845, Pauline-Éléonore de Galard-de-Brassac de Béarn, who died in 1860. His eldest son, Prince Louis Alphonse Victor, born in Rome in 1846, is a member of the Chamber of Deputies. Paris address: 10 Rue de Solférino.

BURGHCLERE, Lord, The Right Hon. Herbert Coulston Gardner, M.A., D.L., was born on June 9, 1846, and was educated at Harrow and Trinity College, Cambridge. He was Liberal Member of Parliament for North Essex (Saffron Walden Division) from 1885 to 1895, and from August 1892 to July 1895, was President of the Board of Agriculture, which had been established in 1889, with an official salary of £2000 per annum. He is Deputy-Lieutenant for Middlesex, and was raised to the Peerage as 1st Baron Burghclere in 1895. He married the eldest daughter of the 4th Earl of Carnarvon. Addresses: 48 Charles Street, W.; Debdon Hall, Saffron Walden, &c.

BURMESTER, Willy, violinist, was born in Hamburg on March 16, 1869. His family were musical, and he early developed a musical talent. His father, who played in a theatre orchestra, began to give him lessons when he was four years old, and he was soon playing pieces by De Beriot and Rode. At the age of ten he played in public Mendelssohn's Violin Concerto. Hearing him play Spohr's Dramatic Concerto, Herr Joachim accepted him as a pupil, and trained him until he was sixteen. On leaving the Berlin Hochschule he toured through Russia, Portugal, and other countries, and was afterwards invited to Hamburg by the late Dr. Hans von Bülow to play sonatas at his concerts. The young violinist now retired to Helsingfors, where he held a small appointment, and for three years studied his instrument assiduously, practising on an average from eight to ten hours a day. He became a consummate master of technique, and on his return to Berlin so impressed his audiences with his finished brilliancy that he was surnamed Paganini Redivivus. He first appeared in London in March 1895, having been induced to cross the Channel by Mr. Henschel, since which year he has been a frequent performer here.

C

COTTON, Henry John Stedman, C.S.I., Chief Commissioner of Assam, was born on Sept. 13, 1845, and is the second

son of J. J. Cotton, of the Madras Civil Service. He was educated at Magdalen College School, Brighton College, and King's College, London, and went out to Bengal in the Indian Civil Service in 1867. He has been successively Under-Secretary to the Government of Bengal, 1873-74; Registrar of High Court, 1874-75; Junior Secretary to Government, 1875-77; Magistrate and Collector, and afterwards Commissioner, of Chittagong, 1878-84, besides holding important posts under Government in Calcutta. He was Chief Secretary to Government from 1891 to 1896, in which latter year he was appointed Acting Home Secretary to the Government of India. He succeeded to his present post in 1896. He was created C.S.I. in 1892. He has written works on India. Address: Shil-long, Assam.

COTTON, Sir William James Richmond, City Chamberlain, was born in 1822. He is a member of the firm of Culverwell, Brooks & Co., of St. Mary Axe, and during the Lancashire and Cheshire famine was the first to institute a system of relief. He was elected Alderman of Lime Street Ward without first having served in the Common Council, was Sheriff of London and Middlesex in 1868, and Lord Mayor in 1875. He signalled his mayoralty by giving a magnificent banquet on the return of the Prince of Wales from India. A window was placed by him in the Guildhall, the subject of which was the reception of the Prince and Princess, and the passing of the loving cup. Another window, previously placed by him in the Guildhall, represented the growth of the cotton-plant; it has now been appropriately removed to Kew Gardens. Sir Richmond was the first Conservative member to be returned for the City after it had been for more than a century a stronghold of Liberalism. He held his seat from 1874 to 1885, and from 1873 to 1880 was an extremely active member of the London School Board. He is a member of several City Companies, has been Master of the Turners' Company, and a Commissioner of Inland Revenue. In 1892 he was appointed City Chamberlain, and received the honour of knighthood. He has published "Imagination and other Poems," and a Jubilee Ode. He married Caroline R. Pottinger in 1848. Address: 9 Bramham Gardens, S.W.

CROSTHWAITE, The Right Rev. Robert Jarratt, D.D., Bishop of Beverley, Suffragan to the Archbishop of York, was born at Wellington, Somerset, on Oct. 13, 1837, and is the third son of Canon Benjamin Crosthwaite. He was educated at Leeds

Grammar School and at Trinity College, Cambridge, where he was 8th Wrangler in 1860. He held a Trinity College Fellowship from 1862 to 1867, was ordained Priest in 1863, and was Curate of North Cave, Yorkshire, from 1862 to 1866, in which latter year he was appointed Private Secretary and Domestic Chaplain to Archbishop Thomson. From 1869 to 1873 he was Vicar of Waghon, from 1873 to 1883 Vicar of Brayton, and in 1884 was appointed Archdeacon and Prebendary of York. In 1885 he became Rector of Bolton Percy, and in 1889 was appointed Suffragan to the Archbishop of York. He has written a work on the authenticity of the Gospels. He married (2), in 1887, a daughter of the Rev. W. M. Crosthwaite. Address: Bolton Percy Rectory, Yorkshire.

D

DARBY, Very Rev. John Lionel, D.D. Dublin, Dean of Chester, was born in Ireland on Nov. 20, 1831, and is the youngest son of the late Rev. C. Darby. He was educated at St. Columba's College, and at Trinity College, Dublin, was ordained Priest in 1857, and was successively Assistant-Curate of Winwick, Lancashire, and of Mells, Somerset. From 1859 to 1868 he was Incumbent of Newburgh, Lancashire; from 1871 to 1875 Diocesan Inspector for the Diocese of Chester; and for twenty years (1875-95) Archbishop's Inspector of Training Colleges. He was Rector of St. Bridget's, Chester, 1875-86, and Archdeacon of Chester from 1877 to his appointment as Dean in 1886. He is an Irish landowner, and is married to a daughter of Canon and Lady Ellinor Hopwood. Address: Deanery, Chester.

DARTREY, Earl of, Vesey Dawson, K.P., was born on April 22, 1842, and succeeded his father, the 1st Earl, in 1897. He was formerly Lieut.-Colonel in the Coldstream Guards, was High Sheriff of Monaghan in 1878, and as Lord Cremorne represented Monaghan in the Liberal interest in the House of Commons from 1865 to 1868. In 1882 he married Julia Georgiana Sarah, daughter of Sir George Wombwell, 4th Baronet. Address: Dartrey, co. Monaghan, &c.

DAVIES, Ben, singer, was born in 1858 in the Swansea Valley. During three years he studied singing at the Royal Academy of Music so successfully as to win the bronze, silver, and gold medals. He joined the Carl Rosa Opera Company as leading tenor in 1882, and in 1887 made

his name in "Dorothy" and other musical pieces. In 1891, at the short-lived Royal English Opera, he created the part of Ivanhoe in the opera of that name, has sung Faust in Italian at the Opera, and was offered an engagement at La Scala, Milan. He has latterly devoted himself solely to concerts, where his perfect voice and style have won him many laurels. He has toured with great success in Germany and the United States, and in 1894 made his first appearance at the Handel Festival. Address: 6 Cork Street, W.

DAVIES, Sir Robert Henry, K.C.S.I., C.I.E., was born in 1824, and is the son of the late Sir David Davies, M.D. He was educated at the Charterhouse and at Haileybury College. He was Lieutenant-Governor of the Punjab from 1871 to 1877, and a member of the Council of India from 1885 to 1895. He was created K.C.S.I. in 1874, and C.I.E. in 1877. He is a widower, and has been twice married. Addresses: 38 Wilton Place, S.W.; and Athenæum, &c.

DILLMANN, Christian Friedrich August, Ph.D., D.D., was born April 25, 1823, at Illingen, in the district of Maulbronn, in Würtemberg, and was educated in the Gymnasium at Stuttgart, and the Lower Evangelical Theological Seminary at Schöndal. From 1840 to 1844 he studied philosophy, Oriental philology, and theology, in the University and in the Higher Theological Seminary at Tübingen. In the autumn of 1844 he passed the first theological official examination, and then devoted another year to the study of the Oriental languages. In 1845 he became a parish vicar in Terschheim, in the district of Vaihingen, in Würtemberg. From 1846 to 1848 he made a scientific tour, visiting the libraries in Paris, in London, and at Oxford, where he received from the authorities of the libraries the proposal that he should draw up catalogues of their Æthiopic MSS. In April 1848, having returned to Würtemberg, he became Rector in the Theological Seminary at Tübingen, and as such discharged at the same time the professorate of Old Testament Exegesis in the University for the four years during which, through the departure of Ewald, the office was vacant. In 1852 he became Privat Dozent in the Theological Faculty of the University of Tübingen, and in 1853 was nominated by the king a Professor Extraordinary in the same Faculty. After filling various posts at Kiel and Giessen he became Professor in Ordinary of Old Testament Exegesis in the Theological Faculty of the Metropolitan University

of Berlin, which office he still holds. In May 1846 he graduated as M.A. and Ph.D. in the University of Tübingen. In October 1862 Professor Dillmann received the honorary degree of D.D. from the University of Leipsic. The learned Professor has written or edited: "Catalogus Codicum MSS. Orientalium qui in Museo Britannico asservantur. Pars III. Codices Æthiopicos continens," 1847; "Catalogus Codicum MSS. Bibliothecæ Bodleianæ Oxoniensis, Pars VII. Codices Æthiopici," 1848; "The Book of Enoch translated and explained," 1853; "The Book of the Jubilees, or the little Genesis, translated from the Æthiopic and elucidated by Observations," and "The Christian Adam-book of the Orient translated from the Æthiopic," both in Ewald's *Jahrbuch der biblischen Wissenschaft*. Dr. Dillmann has also undertaken to edit the Old Testament in Æthiopic. Of this splendid work several portions have already been issued. In 1859 Professor Dillmann edited the Book of Jubilees in Æthiopic. Already in 1857 this indefatigable Orientalist had published his "Grammar of the Æthiopic Language"; and in 1865 followed his great work, the "Lexicon Linguae Æthiopicae cum Indice Latino" (Leipsic), in large quarto size with 1522 columns of letterpress. In 1866 came his "Chrestomathia Æthiopica edita et glossario explanata," and in 1869 his commentary on the Book of Job, or "Job Newly Explained," for the third edition of the "Brief Exegetical Handbook." In 1877 appeared his edition of the "Ascensio Isaiaë," Latin and Æthiopic text. He is a corresponding member of the Royal Society of Sciences in Göttingen, and a Chevalier of the first class of the Order of Merit of Philip the Magnanimous of Hesse.

DOMVILLE, Vice-Admiral Sir Compton Edward, K.C.B., second son of the late Henry B. Domville, Esq., was born in Worcestershire in October 1842. He was educated at the Royal Academy, Gosport, and entered the Royal Navy in April 1856. As a Sub-Lieutenant he obtained three first-class certificates, and was specially promoted. After some service in the Royal Yacht he obtained the command of H.M.S. *Algerine* on the China station, and for his skill and gallantry in services against pirates he was promoted Commander in 1868. He served on the West Coast of Africa as Captain of H.M.S. *Dido* during the Boer War, and in 1882 became Acting Commodore at Jamaica. In 1886 he was appointed Captain of the *Excellent* Gunners School, and soon after Naval A.D.C. to the Queen. He became Vice-President of the Ordnance Committee in 1890, and Director of Naval Ordnance and Torpedoes in the

following year, when he also attained flag rank. He hoisted his flag as a Rear-Admiral in the Mediterranean Fleet in March 1894, and in 1897 was promoted Vice-Admiral and Superintendent of Naval Reserves. This appointment carries with it the command of one of the fleets in the Naval Manœuvres. Admiral Domville is married to Isabella, a daughter of Captain Edmund Peel. Address: 3 Collingham Road, S.W.

E

EAST, Alfred, A.R.A., R.I., was born at Kettering on Dec. 15, 1849, and was educated there and at the Government School of Art, Glasgow, and the night-class conducted by Mr. Greenlees. His parents had not intended him for the career of an artist, although he had drawn surprisingly well from his earliest years, and it was only the chance of residence in Glasgow, where he made the acquaintance of artists, which decided the direction his education should take. After leaving Glasgow he studied at the École des Beaux-Arts under Tony Fleury and Bougereau. His first Royal Academy picture, "Dewy Morn," was painted at Barbizon, of which school of idealising landscapists Mr. East is a firm adherent. He next painted in Glasgow, and came under the influence of the young Glasgow colourists, but, although himself a brilliant master of tone, he cannot be described as of any school. Removing to London, he found materialistic landscape the order of the day, but he gradually made his mark, and is now one of the leading landscape painters of England. Soon after his return home he exhibited his studies at the Fine Art Society at Bond Street. A long sojourn in Japan further influenced his colour and method. He has exhibited at the Royal Academy for many years. His recent pictures are: "Autumn Haze" and "Midland Meadows," 1895; "A Pastoral" and "The Valley of the Chess," 1896; "The Sleepy River Somme" and "The Silence of Morning," 1897; "An Evening Song" and "Opulent Autumn," 1898; and "The Monks' Pool, Beardsall Priory," "A Combe in the Cotswolds," "The Shepherd's Walk, Windermere," and "The Miller's Daughter," 1899. He is a Member of the Royal Institute of Water-Colourists and of the Council of the Royal Society of Painter-Etchers, and became A.R.A. in 1899. He is also a member of the Organising Council of the Japan Society, is a Gold Medallist of Paris and Munich, and "Hors Concours" at the Salon. Address: 2 Spencer Street, Victoria Street, S.W.

ELLIS, Major-General Sir Arthur Edward Augustus, K.C.V.O., C.S.I., Sergeant-at-Arms in the House of Lords, was born at Gibraltar Dec. 13, 1837, and is the second son of Colonel the Hon. Augustus F. Ellis. He was educated at the Royal Military College, Sandhurst, and joined the 33rd Regiment in 1854, serving in the Crimea, and being present at the siege of Sebastopol, and at Kertch. He was A.D.C. and Military Secretary to Lord Elphinstone, Governor of Bombay from 1858 to 1862, when he exchanged as Captain to the Grenadier Guards. In 1867 he was appointed Equerry to H.R.H. the Prince of Wales, and was well known in that capacity until he resigned (November 1898), and was appointed Extra Equerry, January 1899. In November 1898 he was appointed Sergeant-at-Arms in Ordinary to her Majesty the Queen in the House of Lords. He is Secretary to H.M. Commissioners for the Exhibition of 1851. He retired from the army in 1893, and was created C.S.I. in 1876, and K.C.V.O. in 1897. In 1864 he married a daughter of Lord Taunton. Address: 29 Portland Place, W.

ERSKINE, Admiral Sir James Elphinstone, K.C.B., second son of the late James Erskine, Esq., of Cardross, was born Dec. 2, 1838. He entered the Royal Navy in 1854, and was promoted Lieutenant in June 1859, Commander in August 1862, and Captain in November 1868. In May 1880 he was appointed Private Secretary to Lord Northbrook, First Lord of the Admiralty. He was Commodore on the Australian station from June 1881 to 1884, and on November 6 of the latter year hoisted the British flag at Port Moresby and proclaimed the British protectorate over the South Coast of New Guinea and the adjacent islands. Admiral Erskine was an Aide-de-Camp to the Queen for several years, and was promoted Rear-Admiral in January 1886. From February to August of the same year he sat at the Admiralty Board as a Lord Commissioner. He was senior officer on the coast of Ireland from December 1888 to December 1891, and was one of the umpires of the Naval Manœuvres of 1894. He hoisted his flag as Commander-in-Chief on the North America and West Indian Station in March 1894, and was promoted K.C.B. in June 1897, and in the following August was promoted full Admiral. In 1898 he was appointed a Commissioner to inquire into matters relating to certain French treaty rights in Newfoundland. Sir James is a J.P. for Peebles, and is married to Margaret, the eldest daughter of the Rev. John Constable, of Marston Biggott. Address: Venlaw, Peebles.

G

GARRETT, Edmund William, Metropolitan Police Magistrate, was educated at Shrewsbury School and St. John's College, Cambridge, where he took honours in the Law Tripos in 1873. Called to the Bar at the Inner Temple two years later, he has for a long period been in practice on the Midland Circuit, where more recently he has acted as prosecuting counsel in Mint cases and for the Treasury. He has been Revising Barrister for the Nuneaton, Rugby, and Stratford divisions of Warwickshire, was elected a member of the first Middlesex County Council, became a County Alderman in 1895, and was elected a member of the first General Council of the Bar, on which he has acted up to the present. On the recommendation of the Home Secretary he was appointed a Metropolitan Police Magistrate in the place of Sir James Vaughan retired, July 1899, Mr. de Rutzen succeeding Sir James at Bow Street Police Court. He is author of a work on the "Law of Nuisance." Address: Ardeevin, Epsom.

H

HAFFKINE, Waldemar Mordecai Wolff, C.I.E., son of the late Aaron Haffkine and Rosalie, daughter of David Landsberg, of Odessa, was born in Odessa on March 15, 1860, and is a Jew by birth and religion. He was educated in the Classical College of Berdiansk, on the Sea of Azoff, and in the University of Odessa, where he took his degree in Science in 1884, and has published, up to 1888, the following: "Recherches biologiques sur l'*Astasia ocellata*, n.s.," in the *Annales des Sciences Naturelles*, Paris, 1885; "Recherches biologiques sur l'*Euglena viridis*, Ehr.," *ibid.* 1886; "On the Nutrition of *Euglenae* and *Astasiae*," in the *Memoirs of the Society of Naturalists of Nova-Rossia*, Odessa, 1886 (in Russian); "On the Laws of Heredity in Application to Monocellular Organisms," *ibid.* 1887, and *Archives de Zoologie expérimentale et générale*, Paris, 1888; and a translation from the German into Russian of Klaus's text-book, "Zoologie," by Haffkine and Schulgin, Odessa, 1888. In the latter year M. Haffkine was appointed Assistant to Professor Moritz Schiff in the chair of Physiology in the University of Geneva, and in 1889 went to Paris, where he published, in the *Annales de l'Institut Pasteur*, 1890, articles "Sur les maladies infectieuses chez les Paramécies" and

"Sur l'adaptation au milieu chez les infusoires et les bactéries"; in the *Comptes-rendus de la Société de Biologie*, 1892, "Sur le choléra asiatique chez le coquille," "Sur le choléra asiatique chez le lapin et le pigeon," and "Inoculation des vaccins anti-cholériques à l'homme." In December of the same year he delivered a lecture "On the Anti-Cholera Inoculation" at the Conjoint Laboratories of the College of Physicians and Surgeons in London (*British Medical Journal* and *Lancet*, 1893), and contributed a paper on the same subject to the *Fortnightly Review*, 1893. In February 1893, upon the suggestion of the Marquis of Dufferin, then British Ambassador in Paris, he went to India to introduce in the cholera-stricken districts his system of anti-cholera inoculation, and published there, "A Lecture on Vaccination against Asiatic Cholera," *Indian Medical Gazette*, April 1893; "The Technique of Haffkine's Anti-Cholera Inoculation," by Haffkine, Hankin, and Owen, Lahore, 1894, and *Indian Medical Gazette*, June 1894; "Anti-Cholera Inoculation in India," by W. M. Haffkine, and "Contribution to the Etiology of Cholera," by Haffkine and Simpson, in the *Transactions of the First Indian Medical Congress*, Calcutta, 1895, and *Indian Medical Gazette*, January, February, and March 1895; and "The Anti-Cholera Inoculation: Report to the Government of India," by W. M. Haffkine, Calcutta, 1895, and *Indian Medical Gazette*, October 1895. The investigations carried out by the Calcutta Municipal Laboratory showed that the inoculation reduced the mortality from cholera more than twenty-two times. Returned to London at the end of 1895, M. Haffkine delivered, in the Conjoint Laboratories on the Victoria Embankment, a lecture "On Vaccination against Cholera," *British Medical Journal*, 1896, and induced the Netley Pathological Laboratory to undertake inoculation with the typhoid vaccine upon the lines of the anti-cholera inoculation; he also obtained from Sir William Mackinnon, then Director-General Army Medical Department, his consent for Professor Wright, of Netley, to begin the inoculation, first on probationers of the Netley School and on officers leaving for India, and then, with the approval of the military authorities, upon the relief drafts starting for tropical countries. These inoculations were begun in 1897, and are now largely applied. He returned to India and resumed his cholera studies in the beginning of 1896. In October of that year, on the outbreak of plague in Bombay, he was deputed by the Indian Government to undertake an inquiry into the bacteriology of the disease. In January next he made known a method of

prophylactic inoculation against plague, which has since then been applied to hundreds of thousands of individuals of all castes and nationalities in India. The reduction in plague mortality effected by these inoculations is estimated to average over eighty per cent., approaching often ninety. He published during that period: "The Plague Prophylactic," *Indian Medical Gazette and British Medical Journal*, 1897; "Joint Report on the Epidemic of Plague in Lower Damaon," by Haffkine and Lyons, Bombay, 1897, and *Indian Medical Gazette*, 1897; "The Protective Inoculation against Plague," Poona, 1898; "Experiment on the Effect of Protective Inoculation in the Epidemic of Plague in Undhera, taluka Baroda," Bombay, 1898; "The Protective Inoculation against Plague in the Khoja Community of Bombay during the Epidemic of 1897-98," Bombay, 1898; and communicated a summary of the results to the Edinburgh Meeting of the British Medical Association of 1898, published in the *British Medical Journal* under the title of "The Testing of Haffkine's Prophylactic in the Plague-Stricken Communities in India," by Haffkine and Bannerman. The Government Plague Research Laboratory, founded and organised by M. Haffkine, manufactures the prophylactic at present at the rate of some ten thousand doses a day, and has supplied, in addition to Indian demands, those also from the Transvaal, Cape Colony, Mauritius, Natal, Zanzibar, the Gold Coast, Cyprus, Ceylon, Hong-Kong, and Russian Central Asia. In April 1899 he returned to England on leave, and delivered at the Royal Society a discourse "On Preventive Inoculation," published in the *Lancet* and *British Medical Journal* of June and July 1899, which will appear also in the *Proceedings* of the Society. This address, the *Lancet* says, "places preventive inoculation on a higher plane than it has hitherto occupied." What Jenner was to smallpox and Pasteur to anthrax, that M. Haffkine has been to plague and cholera. In addition to the publications above mentioned, Haffkine contributed to the *Journal* of the Norwegian Ministry of Public Instruction, in Christiania, in 1889, a paper under the title "Les nouvelles Écoles techniques en Russie"; to the *Journal of Popular Education*, in Odessa, 1889, a series of articles "On the Primary Schools in Scandinavia" (in Russian), and translated from Norwegian, together with B. Tourczaninoff, Schuebeler's "Horticulture," published in St. Petersburg in 1890 (in Russian). M. Haffkine was elected Member of the Society of Naturalists of Nova-Russia, Odessa, in 1885; Member of the Société de Zoologie de France, Paris, in 1890; and Hon. Member of the Calcutta

Microscopic Society in 1894. In 1897, on the occasion of her Majesty's Jubilee, he received the order of C.I.E., but his exhaustive and magnificent labours have, we understand, been almost honorary.

HARTLEY, Sir Charles Augustus, K.C.M.G., F.R.S.E., was born at Heworth, co. Durham, in 1825, being the son of W. A. Hartley, Esq., iron merchant, of Darlington, by Lillas, daughter of A. Tod, Esq., J.P., of Borrowstounness, N.B. In 1845, after a practical course of instruction in mining and railway engineering at Bishop Auckland and Leeds, he was appointed one of Messrs. Stevenson, Brassey & Mackenzie's district engineers on the Scottish Central Railway, and held that post till 1848, when he was nominated Resident Engineer at Sutton Harbour, Plymouth, under Mr. J. Locke, M.P. In June 1855, on the completion of the Sutton Harbour works, he accepted a commission as Captain in the Turkish Contingent Engineers, and served at Kertch with that force until the end of the Crimean War, for which he received the Turkish war medal. In December 1856 he was elected Engineer-in-Chief to the European Commission of the Danube, on the recommendation of Major (now Lieut.-General Sir John) Stokes, K.C.B., and General Sir John Burgoyne, Bart. In March 1861 he inspected the early works of the Suez Canal, and reported favourably on that scheme to the English Government. In September 1862 he received the honour of knighthood. In 1867 he was awarded the Emperor of Russia's "Grand Competition Prize" of 8000 silver roubles, for which there were twenty competitors, for his plans for enlarging the harbour of Odessa. In 1872, when the depth at Sulina had been increased, by natural scour only, to 20½ feet, and many important river improvements had been effected, he ceased to reside at Sulina, and became Consulting Engineer to the Danube Commission, a post which he still retains. During his residence abroad he was also employed by the Austrian Government to report on various schemes for improving the port of Trieste; by the Turkish Government, to report on dock accommodation at Constantinople; by the Russian Government, to survey and report on the mouths of the Don; by the British Government, to report on an international question of engineering connected with the Scheldt; by the Indian Government, to report on the Hooghly; by the Khedive, to report on the "barrage" across the Nile; and by the Roumanian Government, to prepare surveys and drawings for a harbour on the coast of Bessarabia. In January 1874 he was the first engineer to recommend the improvement

of the South Pass and Mouth of the Mississippi in preference to either of the other mouths. In August 1875 he visited the South Pass as a member of Mr. J. B. Ead's Advisory Board, and remained in constant communication with that distinguished engineer till the summer of 1879, when Mr. Ead's well-planned operations to deepen the South Pass and Mouth, by means of parallel jetties, as at Sulina, were crowned with complete success. In 1875-77 he acted as Consulting Engineer to the Cattewater Commissioners for the Cattewater Breakwater at Plymouth. In May 1879 he was appointed a member of the Panama Congress, but abstained from voting in favour of M. de Lesseps' Panama-Colon project, as he considered that the engineering data collected up to that time were insufficient to determine satisfactorily the best route for a ship canal across the isthmus. In 1881 he prepared detailed surveys, plans, and estimates for the enlargement of the harbour of Kustendjic, in Roumania, and in 1889 for the construction of a commercial harbour at Bourgas, in Bulgaria. In 1884 he was created a Knight Commander of SS. Michael and George. In 1884-85, on the recommendation of H.M. Government, he acted as one of the English members of the International Technical Commission appointed by the Suez Canal Company to report on the best means of improving the Suez Canal. He is the author of papers on the "Delta of the Danube," on "Public Works in the United States and Canada," and on "Inland Navigations in Europe." He has been decorated with the Orders of the Medjidieh and the Star of Roumania, and has received the Stephenson prize, the Telford medal, the Watt medal, the Telford premium, and the Manby premium from the Institution of C.E. Address: 26 Pall Mall, S.W.

HENRICI, Olaus, F.M.E., Ph.D., LL.D., F.R.S., was born March 9, 1840, at Meldorf, in Holstein, and received his early education in the gymnasium of his native town. In 1856 he left Meldorf in order to study for some years in the workshops of a mechanical engineer. In 1859 he proceeded to the Polytechnic School in Karlsruhe, where he remained until 1862, when he entered the University of Heidelberg. Here, in 1863, he graduated with special honours as Ph.D. Dr. Henrici next proceeded to Berlin in order there to prosecute his mathematical studies. In 1865 he became Tutor in the University of Kiel, but left soon afterwards for London. In 1869 Dr. Henrici was appointed Professor of Pure Mathematics in University College, London; and, in 1884, Professor of Mechanics and Mathematics

in the Central Institution of the City Guilds of the London Institute; he holds the latter post at the present time. In 1868 he was elected a Member and in 1883 President of the London Mathematical Society. He is the author of the following papers: "Bemerkung zu 'Hesse' Zerlegung der Bedingung für die Gleichheit der Hauptaxen eines auf einer Oberfläche zweiter Ordnung liegenden Kegelschnittes" (in *Crelle's Journal*, vol. lxiv., 1864); "Transformation von Differentialausdrücken erster Ordnung zweiten Grades mit Hilfe der verallgemeinerten elliptischen Co-ordinaten" (*Crelle's Journal*, vol. lxx., 1865); "On Certain Formulæ concerning the Theory of Discriminants; with Applications to Discriminants of 'Discr., and to the Theory of Polar Curves" (in the *Proceedings of the London Mathematical Society*, vol. ii., read in November 1868); and "On Series of Curves, especially on the Singularities of their Envelopes: with Applications to Polar Curves," also in the *Proceedings of the London Mathematical Society*, vol. ii. Address: 34 Clarendon Road, Notting Hill, W.

HERBERT, Hon. Auberon Edward William Molyneux, D.C.L., is the son of the 3rd Earl of Carnarvon, and was born in 1838. He was educated at Eton and at St. John's College, Oxford, which he left to enter the army without taking his degree. He was sent with his regiment, the 7th Dragoons, to India, from which he retired, returning to graduate, and taking the degree of B.C.L. in 1862 (D.C.L., 1867). He was Fellow of St. John's from 1866 to 1869. He was with the Danes during the Danish-German War, and visited America during the war between North and South. Here he spent a short time in the lines before Richmond, being very hospitably received. Subsequently, in 1870, he was returned to Parliament as member for Nottingham, and in that year followed the German army into France, sleeping on the battlefield of Sedan the day of the battle. Travelling straight to Paris, he was a witness of the Revolution, and at the fall of the city returned thither to take provisions to a friend. At the fall of the Commune he again visited the French capital in order to look after the same friend. During his time in Parliament (1870-1874) Mr. Auberon Herbert became interested in Mr. Herbert Spencer's teachings, and decided to leave Parliamentary life in order to escape party ties. Since that time he has been engaged in preaching what he calls "Voluntaryism," which means the limitation of State power to the defence of person and property against force and fraud, and the conversion of compulsory taxation into voluntary

taxation in a State resting on a voluntary, not compulsory, basis. He constantly advocates his views in his paper, *The Free Life*, and is an occasional correspondent to the *Times*. He has published many pamphlets in support of Voluntaryism, and has written a volume of poems. He married Lady Florence, daughter of the 6th Earl Cowper. She died in 1886. Address: The Old House, Ringwood, Hants.

HILL, Frank Harrison, born at Boston, in Lincolnshire, Feb. 6, 1830, was educated at Manchester New College, graduated B.A. in the London University in 1851, and was afterwards called to the Bar by the Society of Lincoln's Inn. In 1860 he acted as one of the secretaries of the Trades Union Committee of the Social Science Association, to the printed volumes of whose reports he furnished, among other contributions, a paper on "Trade Combinations in Sheffield." In the same year he went to Ireland as editor of the *Northern Whig*. This post he held until the beginning of the year 1866, when he became one of the assistant-editors and political writers of the *Daily News*, of which journal he was, from 1870 to 1886, editor-in-chief. He is the author of "Political Portraits," 1873, consisting of sketches of living English statesmen, which appeared originally in the *Daily News*, a "Life of Canning" in the *English Worthies Series*; a series of papers in the *Fortnightly Review*, entitled "The Political Adventures of Lord Beaconsfield," since collected and published as a volume in the United States; and an essay on Ireland, published in the volume of "Questions for a Reformed Parliament," 1867. Mr. Hill is the author also of a great number of articles on literary and political subjects in the *Nineteenth Century*, the *Contemporary*, *Universal*, *Fortnightly*, *National*, and *Saturday Reviews*, the *World*, and other periodicals. Address: 3 Morpeth Terrace, Victoria Street, S.W.

HOHENLOHE-SCHILLINGSFURST, Clodwig Carl Victor, Prince of, born at Rothenburg, March 31, 1819, is the second son of Francis Joseph, Prince of Hohenlohe-Schillingsfurst (of the line of Waldenburg). On the death of his father in 1841, Clodwig had just begun his judicial and historical studies in the University of Göttingen. A year later, after having passed his examination with distinction, he took a subordinate position in the public service as Auscultator in the Office of Justice at Ehrenbreitstein. He next became Referendary of the Government at Potsdam. While working thus diligently at his post in Prussia, the Landgrave of Hessen-Rheinfels-Rothenburg died, and the princely family of Hohenlohe suc-

ceeded to a rich inheritance, including the lordships of Ratibor and Corvey. The event, however, did not alter Clodwig's position. His elder brother took the domains of Ratibor and Corvey, to which the King of Prussia, William IV., added the title of Duke. In 1845, on the death of his brother, Philip Ernest, Clodwig succeeded, with the consent of his elder brother, to the old family seat of Schillingsfurst, and forsaking the Prussian service, took up his permanent residence in Bavaria. Thus at twenty-seven years of age he became a hereditary member of the Bavarian Parliament. The ministry, meanwhile, in Frankfort sent him as Ambassador to Athens, Florence, and Rome. In 1849 he returned to Frankfort. Having married the Princess of Sayn-Wittgenstein, by whom he has a numerous family, he retired for some ten years into private life, paying frequent visits to England, France, and Italy. In 1860 the prince again entered upon parliamentary life, and favoured throughout an alliance with Prussia. Towards the end of 1866 the youthful king requested Hohenlohe to prepare and lay before him a programme of the principles which were to serve eventually as a ministerial policy. Prince Hohenlohe fulfilled his commission to the satisfaction of the king, and on Jan. 1, 1867, succeeded Pfordten as Bavarian Minister. The whole of Germany at last adopted the Hohenlohe programme. In 1868 and 1869 Prince Hohenlohe was elected Vice-President of the Customs Parliament of the German Federation. In his capacity as Foreign Minister of Bavaria he issued his famous circular of April 9, 1869, directing the attention of the European cabinets to the serious consequences likely to arise from the decrees of the Œcumenical Council of the Vatican. Hoping to get the Pope to withdraw his political opposition, and viewing mere religious innovations with extreme indifference, the Prussian Government slighted the warnings of the Bavarian minister, and refused to take action against the contemplated decrees. In consequence of this desertion by the principal exponent of the Unity party, Prince Hohenlohe could not hold out against the attacks of the combined Particularists, Catholics, and Austriacanti in the Bavarian Parliament, and had to resign, March 7, 1870. He then resumed his seat in the Munich House of Peers; and in a few months, on France threatening war, made himself conspicuous by insisting upon the participation of Bavaria in the great national feud. Upon the successful termination of the war in 1871 he was elected member of the first German Parliament, and in recognition of his patriotism immediately became Vice-

President thereof. In May 1874, after the deplorable exit of Count Harry Arnim, Prince Hohenlohe was chosen German Ambassador in Paris. He was one of the German Plenipotentiaries at the Congress of Berlin in 1878. In August of that year he was re-elected to the Reichstag on the second ballot, at Forchheim, Kulmbach, Bavaria, polling 9800 votes, while his Catholic competitor had 8600. After the death of Marshal Manteuffel, Prince Hohenlohe was appointed Governor of Alsace-Lorraine, a position which he held till October 1894. During his administration he enforced the strictest passport regulations at the French frontier, until in September 1891 the emperor issued a rescript rendering it somewhat less difficult for Frenchmen to visit Alsace-Lorraine. In October 1894 he was appointed Chancellor of the German Empire and Prussian Prime Minister in succession to Count von Caprivi and Count von Eulenbergh.

HOHENZOLLERN, Hereditary Prince of, H.R.H. Leopold-Etienne-Charles-Antoine-Gustave-Edouard-Thassilo, Prince of Hohenzollern, Burgrave of Nuremberg, Count of Sigmaringen and Veringen, Count of Berg and Seigneur of Haigerloch, &c., is the eldest son of the late Prince Charles Antoine of Hohenzollern-Sigmaringen, and was born Sept. 22, 1835, and studied in the Universities of Bonn and Berlin. His Royal Highness succeeded his father on June 2, 1885; is a hereditary member of the Chamber of Seigneurs of Prussia; General of Prussian infantry in the suite of the first regiment of Foot Guards; chief of the "Prince Charles Antoine de Hohenzollern" regiment of Fusiliers; and Chevalier of the Order of the Black Eagle, &c., and is well known in connection with his candidature for the throne of Spain, which ultimately gave rise to the Franco-German war. On Sept. 12, 1861, the Prince married, at Lisbon, the Princess Antonia of Portugal, Duchesse de Saxe, born Feb. 17, 1845, by whom he has three sons, of whom the second, Prince Ferdinand, is heir to the Roumanian throne, and husband of Princess Mary of Edinburgh.

HOLMES, Emra, F.R.Hist.S., F.R.S. Ant. Ireland, C.W.R., is a member of the Civil Service, and an enthusiastic Freemason. He was born in 1839, and is the son of Marcus Holmes, a well-known Bristol artist, a descendant of Admiral Sir Robert Holmes, Governor of the Isle of Wight temp. Charles II. His mother, Elizabeth Emra, daughter of the Rev. John Emra, a native of St. Kitts (the family being, it is supposed, of Spanish

descent), and Elizabeth Bastone Blake, was the authoress of "Scenes in our Parish," and other works. Emra Holmes was educated at Christ's Hospital, and at the Grammar School, Shepton Mallett, Somerset. He left the Bluecoat School in 1854, and three years later was nominated to a clerkship in H.M. Customs, Liverpool. He became Collector of Customs subsequently at Woodbridge, Fowey, Barnstaple, Kirkcaldy, Guernsey, Newry, Limerick, Newhaven, Aberdeen, and Harwich. He has published several works, "Amabel Vaughan," "The Lady Muriel," "The Worshipful Master," "Random Notes on Freemasonry," "Notes on the United Orders of the Temple and Hospital," and lately two novels, "At the Oakenholt," and "Valerian Varo." His notes on the Templars published in the *Freemason*, and running for about nine months in the columns of that journal, brought down upon him the censures of the Protestant organ of the Knights of St. John of Jerusalem. The notes, however, were translated into French, and published in the pages of *La Verité*, and were quoted extensively in some of the American journals. His special Masonic story, "The Worshipful Master," was published in the *Masonic Monthly* (London), and subsequently in the *Freemason*, Sydney, N.S.W., New Zealand, Victoria, the *Canadian Craftsman*, the *Keystone*, Philadelphia, the *Masonic Herald*, Calcutta, and other journals nearer home. He has been a constant contributor to the *Chicago Voice of Masonry*, and his poems have appeared in the *Toronto Mail*, *Ottawa Daily Citizen*, *Port Hope Times*, and about a hundred journals all over the world. Emra Holmes writes in favour of Imperial Federation and the Unity of Christendom. Address: Holland House, Dovercourt, Essex.

JOINVILLE, Prince de, François-Ferdinand-Philippe-Louis-Marie-d'Orleans, son of the late Louis Philippe, king of the French, was born at Neuilly, Aug. 14, 1818. Soon after his father's accession to the throne in 1830 he began his naval studies, was sent to sea at the age of thirteen, received, like his brothers, the Dukes of Orleans, Nemours, and Aumale, a liberal education in the public colleges of France, and passed a brilliant examination at Brest. From that time he devoted himself entirely to his profession, and became a great favourite with the French navy. The ordinary hard work of the service was not sufficient to satisfy his ardent desire to distinguish himself.

Being with the Mediterranean squadron in 1837, he disembarked and rode up to Constantine, in the hope of taking part in the storming of that stronghold, but arrived just too late. Not long afterwards he received the command of the corvette *Créole*, and joining the fleet of Admiral Baudin, was entrusted with the difficult mission of obtaining reparation from the Mexican Government. The *Créole* took a prominent part in the bombardment of St. Juan d'Ulloa, and at Vera Cruz the Prince, at the head of the storming party, was the first to enter the gates, under a heavy fire, and was only saved from certain death by the devotion of one of his officers. In 1841 he was selected by the king to command *La Belle Poule* frigate, charged with the service of conveying to France the body of the Emperor Napoleon, and he married, at Rio Janeiro, May 1, 1843, Donna Francisca de Braganza, sister of Don Pedro II., Emperor of Brazil. Becoming Rear-Admiral, he took part in the sittings of the Admiralty; and the French navy is deeply indebted to him for the manner in which he helped to solve the great question of the adaptation of steam to vessels of war in 1845. When war broke out between France and Morocco he commanded a squadron, with which he bombarded Tangiers and took Mogador. After this decisive expedition he was raised to the rank of Vice-Admiral. Being almost always on active service, the Prince de Joinville was in Algiers with his brother the Duc d'Aumale when the Revolution of February 1848 overthrew the constitutional monarchy. Resolving to share the misfortune of their family, the two brothers sought refuge in England, and joined King Louis Philippe at Claremont. The Prince distinguished himself by actively aiding in the rescue of many of the passengers and crew of the ship *Ocean Monarch*, when burning off Ormes Head, Aug. 24, 1848. Driven suddenly from a brilliant position into the narrow limits of private life, he accepted his new situation with simplicity and dignity, and remaining at heart a French sailor, endeavoured to render himself useful to the navy of his country by his pen, if not by his sword. He had already in 1844 begun publishing in the *Revue des Deux Mondes* his studies on the French navy. One of his articles, published in 1865, was a comparative review of the fleets of the United States and of France, and excited much attention at the time. Happening to be in the United States about a twelvemonth after the breaking out of the Civil War, he accompanied his nephews, the Comte de Paris and the Duc de Chartres, to the camp of General McClellan, with whose staff he witnessed the principal actions of

the Virginian campaign of 1862, and gave an account of the events in a well-written and impartial article published in the *Revue des Deux Mondes* in 1863. After the downfall of the Napoleonic dynasty he went back to France with the other Orleanist princes, the Law of Exile having been abrogated. He and the Duc d'Aumale took their seats in the National Assembly towards the close of 1871, after their election had been declared valid. In 1873 he assisted at the downfall of M. Thiers, but did not vote the constitution, and in 1876 begged the electors of the Haute-Marne not to re-elect him. He retired into private life, but remained on the books of the navy till the members of former reigning houses in France were expelled from all public employments in 1886. His eldest son, the Duc de Penthièvre, at that time a naval lieutenant, suffered at the same time. The Prince de Joinville has written on naval topics, and has published a work on England and self-government. His seat is the Château d'Arc-en-Barrois, France.

JOPLING, Louise (Mrs. Rowe), was born on Nov. 16, 1843, and is the fifth child of T. S. Goode. She studied painting for eighteen months in Paris in the studio of the late Mr. Charles Chaplain, and has been the first to bring the Paris *atelier* system to England. Her painting class is very large, and she instructs it personally, working rapidly from the model in the presence of her pupils, who thus may be said to study their art as do Parisian art students. She has exhibited constantly at the Academy and Grosvenor, and in the new and old Paris Salons. During recent years she has been represented at the Royal Academy's exhibitions by her portrait of Mr. Alfred Lys Baldry, 1895; by "Blue and White" and portraits, 1896; by portrait of Viscountess Maitland, 1897; and by "The Spirit of the Woods" and "At the Gaiety," 1898. She is married to Mr. Rowe, a lawyer, but Jopling is the name of a previous husband. Address: 3 Pembroke Road, Kensington, &c.

KELLY-KENNY, Major-General Thomas, C.B., was born in February 1840. He entered the Army in 1858 as Ensign of the 2nd Foot, the Royal West Surrey Regiment. He was promoted Captain in July 1866, Major in September 1877, and Lieut.-Colonel in July 1881. He has served as an A.D.C. to the Commander-in-Chief at the Cape, and also as Deputy Assistant-Quartermaster-General in Bom-

bay. He has seen active service both in China and Abyssinia. In 1887 he was appointed Assistant-Adjutant-General in Scotland, and has held the same appointment at Headquarters and at Aldershot, where he was also Major-General on the staff. General Kelly-Kenny has passed the Staff College, and in July 1897 was appointed Inspector-General of Auxiliary Forces and Recruiting at Headquarters.

KUHNE, Willy K., F.R.S., LL.D. Camb., Professor of Physiology at the University of Heidelberg, was born at Hamburg on March 28, 1837. He pursued his studies at Göttingen, Jena, Berlin, Paris, and Vienna, under such masters as Virchow, Claude Bernard, and Du Bois-Reymond, and in 1856 obtained his Doctorate of Philosophy. In 1862 he became Dr. Med. Hon., and in 1861 was appointed chemical assistant in the Pathological Institute at Berlin. In 1868 he became Professor of Physiology at Amsterdam, and in 1871 Professor of Physiology at Heidelberg, and Director of the Physiological Institute there. His directorship has been a long and illustrious one, his labours and discoveries at the Institute having long since placed him in the front rank of European physiologists. He was elected a foreign member of the Royal Society in 1892, and in August 1898, on the occasion of the meeting of the Zoological Congress at Cambridge, was one of the distinguished foreign recipients of the hon. LL.D. degree. He has contributed many weighty papers to the learned journals, such as Müller's and Virchow's Archives, on nerves, &c., and has published "Myologische Untersuchungen," 1860; "Ueber die peripherischen Endorgane der motorischen Nerven," 1862; "Untersuchungen über das Protoplasma und die Contractilität," 1864; and "Lehrbuch der physiologischen Chemie," 1866-68. Address: Heidelberg.

LEGROS, Alphonse, painter and etcher, was born at Dijon on May 8, 1837, of poor parents, who put him apprentice to a house-painter. He subsequently studied art under Cambon in Paris, entered the École des Beaux-Arts, and first made his mark by pictures exhibited at the Salon between 1859 and 1863. Coming to London in the last-named year he was cordially received by Rossetti, G. F. Watts, and their circle, and in 1876 was appointed Slade Professor of Fine Arts in University College, London. He taught there for seventeen years, painting from the model

in the presence of his pupils. His subjects are the country scenes and peasants of France, painted with an austerity and simplicity which have rendered him an artist for artists, rather than for the public. Among his principal pictures may be mentioned: "Portrait of his father" (Salon, 1857); "The Angelus," 1859; "Ex Voto," 1861; "Mass for the Dead," 1863; "Stoning of St. Stephen," exhibited at the Royal Academy in 1866, and at the Salon in 1867, where it was awarded the gold medal; "Amende Honorable," which gained a medal at the Salon; "Pilgrimage," "Jacob's Dream," "Dead Christ," &c. "Amende Honorable" is in the Luxembourg, and many of his other pictures are in museums and public galleries in France and England. "Women at Prayer," for instance, is in the Tate Gallery. He is one of those who have revived the art of etching, of which he is a master. He is a naturalised Englishman, and married a daughter of Samuel Hodgson, of Kendal, in 1864. Address: 57 Brook Green, W.

M

MONCREIFF, Lord, Henry James Moncreiff, is the eldest son of Lord Moncreiff of Tullibole (1st Baron), and was born in Edinburgh on April 24, 1840. He was educated at the Edinburgh Academy, and subsequently at Harrow and Trinity College, Cambridge, where, in 1861, he graduated B.A., LL.B. (1st class Law honours). He was called to the Scottish Bar in 1863; held the office of Advocate-Depute 1865-66, and again 1868-1874 and 1880-81. In 1881 he was appointed Sheriff of the counties of Renfrew and Bute, which office he held till November 1888, when he was appointed a Senator of the College of Justice (a Lord of Session). He is a Liberal Unionist in politics. He is the author of a work on "Revision in Criminal Cases," 1877. He married first, on April 3, 1866, Susan Wilhelmine, third daughter of Sir William H. Dick Cunyng-hame, Bart., of Prestonfield (she died in 1869); and secondly, on March 26, 1873, Millicent Julia, daughter of Colonel F. D. Fryer, of Moulton Paddocks, Newmarket. She died in 1881. Addresses: 15 Great Stuart Street, Edinburgh; and Athenæum.

N

NAQUET, Joseph Alfred, M.D., was born at Carpentras (Vaucluse), on Oct. 6, 1834, and educated first at Carpentras,

then at Montpellier, and finally in Paris, where he took the degree of M.D. in 1859. He then went into the chemical laboratory of the School of Medicine in Paris under M. Wurtz, and wrote many papers on pure chemistry. In 1863 he became Professor of Physics at Palermo, and while there wrote his work "Principes de Chimie fondée sur les Théories modernes," which has passed through five editions in France, and been translated into English, German, and Polish. In 1867 M. Naquet entered political life, a charge against him of conspiracy against the Empire having resulted in fifteen months' imprisonment and a subsequent flight into Spain, from which he returned in 1869; and having taken a prominent part in the events of Sept. 4, 1870, he was subsequently, at Tours, nominated by Gambetta as Secretary to the Defence Committee. He was, in 1879, elected deputy for Vaucluse, and at first supported Gambetta, but eventually broke with him. He then threw all his strength into the effort for legalising divorce, in which he succeeded in 1886. As he was a strong revisionist, and thought that that end might be attained through the success of General Boulanger, he became one of his warmest supporters; that movement having failed, he now remains a member of the isolated Boulangist group, who are still in opposition to Government. He is author of some political and scientific works. His book on "Le Divorce," 1877, and a translation of Brodie's "Calculus of Chemical Operations," may be cited.

NETHERSOLE, Olga, actress, was born in London on Jan. 18, 1870, and is the youngest daughter of the late Henry Nethersole. She was educated privately, and at the age of sixteen, having from her earliest years determined on a dramatic career, was presented with an opportunity of going on the stage, but did not actually appear for another two years, when she played in public for the first time. The play was Mr. Hamilton's "Harvest," which was being presented at the Brighton Theatre. She made her London debut at the Adelphi in "The Union Jack," and met with great success. Afterwards she appeared in the title-rôle of "The Dean's Daughter," brought out by Mr. Rutland Barrington at the St. James's, and then as the intriguing woman in "The Silver Falls." As the stage wicked woman she was even then thought to have found her own especial province. Mr. Hare invited her to the newly-built Garrick Theatre, where she made her mark in "The Profligate" as the betrayed Janet Preece. For some time after the run of this play she

understudied Mrs. Bernard Beere, and at last finding that her talents were not given proper scope in England, determined by the advice of friends to visit Australia. She played in Mr. Haddon Chambers's "Idler" in the New Garrick Theatre, Sydney, six weeks before the play was given in London. After a triumphant ten months' tour in Australia she returned home, and was re-engaged by Mr. John Hare, appearing as Beatrice Selwyn in "The Fool's Paradise," and at the Criterion in "Agatha," where she made a lasting impression. In 1893, when the Bancrofts returned to the stage, she won her grand success in the revival of "Diplomacy," where she took the part of the Countess Zica, formerly played with great art by Lady Bancroft, and by Miss Nethersole spiritedly elaborated. In 1894 Miss Nethersole became lessee and manager of the Court Theatre, and in the autumn of 1898, as manager of Her Majesty's, she produced and took the title-rôle in Messrs. Parker and Carson's "Termagant." She has four times starred in the States at the head of her own company. Address: 5 Norfolk Street, Park Lane, W.

PARRATT, Sir Walter, Mus. Doc., was born on Feb. 10, 1841, at Huddersfield, and is the son of Thomas Parratt of that town. He was educated at home and at the Collegiate School, Huddersfield. After holding various church organistships, he was appointed to Magdalen College, Oxford, where he made his mark as a musician and teacher, and continued rising in public favour until appointed organist to St. George's Chapel Royal, Windsor. As Court Organist he has conducted the music at most of the Royal funerals at the Castle. He is Private Organist to the Queen, Master of the Queen's Music, and has presided at the concerts given at the Albert Institute by the Windsor and Eton Madrigal and Orchestral Societies. He is also Past Grand Organist of the Freemasons, Professor at the Royal College of Music, and Examiner in Music at Oxford, Cambridge, and London Universities. He wrote much of the music for the "Tale of Troy" in 1883 (see WARR), and has written on this subject in Grove's "Dictionary," &c. Addresses: The Cloisters, Windsor; and Athenaeum.

PARSONS, Colonel Sir Charles Sim Bremridge, K.C.M.G., R.A., was born May 9, 1855. He was educated at Rugby School and the Royal Military Academy.

He obtained his first commission in the Royal Artillery in August 1874, and was promoted Captain and Brevet-Major in October 1883, and Lieut.-Colonel in November 1896. He served in the Gaika War of 1878 and also in the Zulu War, and was present at the actions of Isandhlwana and Ulundi; mentioned in despatches. In the Transvaal War of 1880-81 he was present at the actions at Laing's Nek and Ingogo. In the latter engagement he was severely wounded and had his horse shot under him, and for his gallantry while serving in the Royal Horse Artillery he was mentioned in Army Orders and in despatches. In the Egyptian Expedition of 1882 he was present at Kassassin and Tel-el-Kebir and the forced march into Cairo. He was awarded the Medjidieh of the fifth class and the Osmanieh of the fourth class and the brevet of Major for his services. In the Dongola Expedition of 1896 he commanded the Egyptian Artillery at the action of Hafir, and in December of the same year was appointed Governor of the Red Sea Littoral. In December 1897 he was entrusted with the mission to take over the fortress of Kassala from the Italian Government. He was also in command of the Egyptian forces at the capture and defence of Gedaref in September 1898. Sir Charles Parsons, who is a Pasha in the Turkish Army, was created K.O.M.G. in August 1899, and at the same time was promoted substantive Colonel and Chief Staff Officer at Woolwich. Address: Woolwich.

PEMBERTON, Max, novelist, was born in Birmingham, June 19, 1863. He is the son of Thomas Joshua Pemberton of Abbotsford, Abbey Road, London, and his mother was a Miss Fisher of Woodfields Manor, Shropshire. He was educated at Merchant Taylors' School, London, and Caius College, Cambridge, where he graduated in Law, 1884 (M.A.). He began to write for *Vanity Fair*, 1885; and was a casual contributor to the *St. James's Gazette*, the *Standard*, and the magazines generally from 1885 to 1890, when he joined the staff of the *Illustrated London News*. He was first editor of the boys' paper *Chums*, 1892-94, when he resigned the position. He edited Cassell's Pocket Library of Fiction, 1893; became editor of *Cassell's Magazine*, 1897, and has reviewed largely for the *Daily Chronicle*, the *Bookman*, and other papers from 1890 to 1897. His first novel, "The Diary of a Scoundrel," appeared in 1891. Other works are: "The Iron Pirate," 1893; "The Sea Wolves," 1894; "The Impregnable City," "The Little Huguenot," 1895; "Cloustine of the Hills," 1896; "A Puritan's Wife," 1897; "Kronstadt," 1898; "The Garden of

Swords," 1899, which is a story of the Franco-Prussian War of 1870. His drama "Kronstadt," written in collaboration with Mr. Addison Bright, by arrangement with Mr. Charles Frohmann, is to be produced in the winter of 1899-1900. Mr. Max Pemberton has written three plays previously, "The Dancing Master," "A House of Nightingales," and (libretto) "The Brazilliamo." Addresses: 1 Aberdare Gardens, West Hampstead, N.W.; and the Gore, Monkton, Thanet.

PHILLPOTTS, Eden, novelist, born at Mount Aboo, in India, Nov. 4, 1862, is the eldest son of the late Captain Henry Phillpotts, who was a nephew of Henry Phillpotts, Bishop of Exeter. During youth he lived in Devonshire, and was educated at Mannamoad School, Plymouth. All his boyhood's leisure that could be spared from cricket and football he spent in the country, and on Dartmoor among the farm people, or at the stream side fly-fishing. When seventeen years old he came to London and procured a clerkship in the Sun Fire Insurance Office from 1879 to 1889. During that period he first studied for the stage, but abandoned the hope of success in that direction, finding himself possessed of no histrionic ability whatever. He then accepted offers of journalism in his leisure, and became a dramatic critic, and, after eight to ten years' work with the pen when office hours were over, found himself strong enough to stand alone. He has travelled for various editors to the West Indies, Syria, Egypt, the Canary Islands, &c., but his serious work, apart from many less important books, is represented by his West Country novels. Of these the best known are: "Down Dartmoor Way," "Folly and Fresh Air," "Some Everyday Folks," "Lying Prophets," and "Children of the Mist." In August 1899 he published a volume of stories of Devon school-boy recollections, "The Human Boy." In 1893 he married Emily Topham, youngest daughter of the late Robert Topham, Esq., of Ellesmere, Shropshire. Address: Cosdonne, Torquay.

PYNE, Sir Thomas Salter, C.S.I., was born in 1860, and is the son of John Pyne. He was educated privately, and served an engineer's apprenticeship from 1875 to 1878, when he became manager of some engineering works, and afterwards went to India in the employ of a firm of merchants. From 1885 he has been chief engineer to the Government of Afghanistan, and Superintendent of the Cabul military factories, and has introduced many Western industries into that country, including manufactories of arms and

ammunition, a mint, distilleries, &c. He was the Ameer's Ambassador to the Viceroy of India in March 1893, on which occasion he brought friendly replies to the Government's communications. The negotiations having been satisfactorily terminated, he was created C.S.I. He was knighted on the recommendation of the Secretary of State for India for his labours in the interest of Great Britain at a critical and trying period in the history of Anglo-Afghan relations. The Ameer has delighted to honour him, and has bestowed upon him a decoration, but Sir Salter Pyne, in 1899, left his service, temporarily at least, and returned to England for a time. He describes the Ameer as being in failing health, and speaks of his probable successor, Haidullah Khan, as a man of great energy. Address: St. George's Club.

Q

QUILTER, Harry, M.A., artist, author, &c., was born at Lower Norwood on Jan. 24, 1851, and is the youngest son of William Quilter, of Quilter, Ball & Co. He was educated privately and at Trinity College, Cambridge, and University College, London, and studied art at the Slade School and Van Hove's studio at Bruges. He has been a great traveller since early life, having visited most parts of the world, and been many times to study Italian art on the spot. From the year 1876 onwards his contributions on art, literature, the drama, &c., to leading journals have been innumerable. He has contributed to all the great reviews and magazines, and has been on the staff of the *Times* and *Spectator*. His notable editorship of the *Universal Review* in 1888-89-90 will be remembered. He gave up regular journalism in 1890, and exhibited his collected works in oil and water-colour at the Dudley Gallery in 1894. For two years after that date he was chiefly engaged in educational work, and in 1896 began a series of pictures. He has lectured in London and other chief towns, and has published his lectures in the *Spectator*. His best-known works are a "Life of Giotto," "Sententie Artis," "Art and Life," which appeared as essays in his review; "The Art of Europe," "Decorative Art," &c. He has also edited "Is Marriage a Failure?" Addresses: 21 Bryanston Square, W.; and Bryanston Manor, Mitcham.

R

REID, Sir Hugh Gilzean, Hon. LL.D. (Aberd.), J.P., D.L., Fellow of the

Institute of Journalists, was born in Aberdeenshire on Aug. 11, 1838, and educated at various schools, afterwards attending classes at Aberdeen and Edinburgh Universities. Intended originally for the ministry, he became a journalist at the age of eighteen, and was editor of papers at Peterhead and in Edinburgh. He has been among the founders or early promoters of newspapers in Aberdeenshire, Lancashire, Yorkshire, in which county the *North-Eastern Daily Gazette* is closely connected with his name, the Midlands, and London, where the *Echo* was first founded by him. The Institute of Journalists owes its origin to him. Established on March 9, 1889, by conversion of the National Association of Journalists, founded by provincial pressmen in 1884, it was incorporated by Royal Charter in March 1890. The objects of the Institute were embodied in thirteen clauses, which provide, among other things, for the holding of examinations in order to test the knowledge and ability of candidates for the journalistic calling. For this laudable and important attempt to raise journalism to the dignity of one of the learned professions the subject of our memoir was knighted by the Queen in 1893. He presided over the first annual conference of the Incorporated Institute at Birmingham in 1890, on which occasion he was presented by Sir Algernon Borthwick, his successor-elect in the Presidency, with his portrait in oils on behalf of the members of the Institute and in recognition of his great services in the cause of journalism during the last three years. In 1894 Sir Hugh Gilzean Reid was instrumental in promoting the International Press Congress. He has represented Aston Manor in the House of Commons, being first Liberal member for that constituency, was President of the Newspaper Society in 1898-99, and has been a pioneer in the movement for providing the working men of Edinburgh with model dwellings. His long residence in Belgium at one time rendered him familiar with the Congo Free State scheme, which he did much to promote and popularise. In 1897 he was created Officer of the Order of Leopold, and in May 1899 Knight Commander of the Order of the Crown, "as a recognition of voluntary and valuable help to the civilising agencies" in the Congo Free State. He has published, among other works, "Lowland Legends," "Social and Religious Life in Scotland," "Housing the People," "Talks with Men of Mark," &c. Lady Gilzean Reid, who died in 1895, was an authoress, and ardent worker in the cause of her sex. Address: Dollis Hill, N.W., &c.

T

TALBOT, Major-General the Hon. Reginald Arthur James, C.B., third son of the 17th Earl of Shrewsbury, was born in July 1841. He entered the army as a Cornet of the 1st Life Guards in May 1859, and was promoted Captain in May 1867, Major in July 1880, and attained the command of his regiment as Lieut.-Colonel in July 1882. For several years he was M.P. for Stafford. In 1879 he went to South

Africa on special service, and took part in the Zulu War. He was appointed A.D.C. to the Queen in May 1889, and shortly afterwards went to Paris as Military Attaché, and held that office until July 1895. In May of the following year he was promoted Major-General in charge of the Cavalry Brigade at Aldershot. In January 1899 he was appointed to succeed Sir Francis Grenfell, G.C.B., in the command of the Army of Occupation in Egypt. General Talbot married, in 1877, Margaret, second daughter of the Right Hon. James Stuart-Wortley. Home address : 58 Grosvenor Street, W.

Scholars, Philologists, Orientalists,

&c.:—Abel, C.; Anderson, W.; Aufrecht, Prof. T.; Beljame, A.; Birdwood, Sir G. C. M.; Boissier, Prof. M. L. G.; Bradley, Prof. A. C.; Bradley, Henry; Breal, M. J. A.; Breul, K. H.; Buchheim, Prof. C. A.; Cowell, Prof. E. B.; Cust, R. N.; Davids, Prof. T. W. Rhys; Dillman, C. F. A.; Driver, Prof. Rev. S. R.; Earle, Prof. Rev. J.; Eisenlour, Prof. A.; Furnivall, F. J.; Ginsburg, C. D.; Gollancz, J.; Grenfell, B. P.; Hales, Prof. J. W.; Jebb, Prof. R. C.; Heath, H. F.; Ker, W. P.; Krehl, L.; Leat, W.; Leathes, Prof. Rev. S.; Loewe, Rev. Dr. L.; Mahaffy, Prof. Rev. J. P.; Margoliouth, Prof. Dr. S.; Maspero, G.; Max-Müller, Rt. Hon. Prof. F.; Mayor, Rev. J. E. B.; Mommsen, Prof. T.; Moss, Rev. H. W.; Murray, Prof. G. G. A., and J. A. H.; Oppert, J.; Paris, G.; Rhys, J.; Rippmann, W.; Salmoné, Prof. A.; Sandys, J. E.; Sayce, Rev. A. H.; Skeat, Prof. Rev. W. W.; Spiers, Prof. V. J. T.; Stokes, W.; Swanwick, A.; Taylor, Rev. J.; Thomson, Sir E. Maunde; Warr, Prof. G. C. W.; Whitehouse, F. C.

SCIENCE.

Anthropologists, Ethnologists, &c.:

Bertillon, A.; Galton, F.; Gomme, L.; Haliburton, R. C.; Lang, A.; Leland, C. G.; Lombroso, Prof. C.; Pitt-Rivers, Lieut.-Gen. A. H. Lane-Fox; Tylor, Prof. E. B.

Astronomers, &c.:

Abney, Capt W. de W.; Amvers, A.; Ball, Sir R. S.; Christie, W. H. M.; Chree, C.; Common, A. A.; Copeland, R.; Darwin, Prof. G. H.; Denning, W. F.; Downing, A. M. W.; Dreyer, J. L. E.; Ellery, R. L. J.; Faye, Prof. H. A. E.; Flammarion, C.; Foerster, Prof. Dr. W.; Gill, D.; Glaisher, J.; Grubb, Sir Howard; Huggins, Sir W.; Janssen, P. J. C.; Langley, S. P.; Loewy, M.; Lynn, W. T.; Mel-

drum, C.; Newcomb, S.; Noble, Capt. W.; Palisa, J.; Pickering, Prof. E. O.; Plummer, W. E.; Ragona, Prof. D.; Roberts, J.; Rosse, Earl of; Russell, H. C.; Schiaparelli, G. V.; Smyth, C. P.; Iacchini, P.; Tennant, Lieut.-Gen. J. F.; Terby, F. J. C.; Wilson, Ven. J. M. and W. E.; Wolf, R.

Biologists, Physiologists, &c.:

Bateson, W.; Dallinger, Rev. W. H.; Foster, M.; Gamgee, A.; Gotch, F.; Haffkine, W. M. W.; Halliburton, W. D.; Horsley, V. A. H.; Hudson, C. T.; Klein, E. E.; Koch, Prof. Dr. R.; Kölliker, R. A. von; Kowalewsky, A.; Kuehne, Willy; Langley, J. N.; Lea, A. S.; Lister, Lord; M'Kendrick, Prof. J. G.; Miall, L. C.; Roux, P. P. E.; Sanderson, Prof. Sir J. S. Burdon; Schäfer, Prof. E. A.; Sherrington, Prof. C. S.; Woodhead, Prof. G. S.

Botanists, &c.:

Baker, J. G.; Balfour, Prof. I. B.; Bottomley, W. B.; Bower, F. O.; Candolle, A. C. P. de; Carruthers, W.; Clarke, C. B.; Cooke, M. C.; Darwin, F.; Goodale, G. L.; Green, Prof. J. R.; Hemsley, W. B.; Hooker, Sir J. D.; King, Sir G.; M'Lachlan, R.; Masters, M. T.; Murray, G. R. M.; Sachs, Dr. J. von; Scott, D. H.; Strasburger, E.; Thiselton-Dyer, Sir W. T.; Trail, J. W. H.; Vines, Prof. S. H.; Ward, Prof. Marshall.

Chemists, &c.:

Abel, Sir F. A.; Amagat, E. H.; Armstrong, Henry E.; Attfield, Prof. J.; Baeyer, A. von; Bell, J.; Berthelot, P. E. M.; Brown, A. Crum; Brown, H. T.; Buchanan, J. Y.; Bunsen, Prof. R. W. E.; Chandler, C. F.; Church, A. H.; Collie, J. Norman; Crookes, Prof. Sir W.; Debus, H.; Divers, E.; Dunstan, W. R.; Dupré, A.; Frankland, Sir E.; Gilchrist, P. C.; Gladstone, Prof. J. H.; Groves, C. E.; Heycock, C. T.; Jaap, F. R.; Kipping, Prof. F. S.; Liveing, G. D.; Liversidge, Prof. A.; Meldola, Prof. R.; Mendeléeff, D. J.; Mills, Prof. E. J.; Mond, L.; Muir, M. M. P.; Odling, Prof. W.; Pedler, A.; Perkin, W. H., and W. H., jun.; Pickering, P. S. U.; Purdie, T.; Ramsay, Prof. W.; Reynolds, Prof. J. E.; Roscoe, Prof. Sir H. E.; Schunck, H. E.; Simpson, M.; Snelus, G. J.; Sprengel, H. J. P.; Thomson, Prof. J. M.; Thorpe, Prof. T. E.; Titchborne, Prof. C. R.; Tilden, Prof. W. A.; Veley, V. H.; Vernon-Harcourt, A. G.; Wanklyn, J. A.; Warrington, R.; Williams, C. Greville; Williamson, Em. Prof. A. W.; Wilson, G. F.; Wislicenus, J.; Wright, C. R. A.; Young, S.

Geologists, &c.:

Bonney, Prof. Rev. T. G.; Dawkins, Prof. W. B. (Palæonto-

logy); Dawson, G. M.; Dawson, Sir J. W.; Dewar, Prof. J.; Dixon, Prof. H. B.; Fletcher, L.; Gaudry, J. A.; Geikie, Sir A.; Geikie, Prof. J.; Hicks, H.; Hudleston, W. H.; Hughes, Prof. T. M'K.; Hull, Prof. E.; Jones, T. Rupert; Judd, Prof. J. W.; Le Conte, J.; Lewis, Prof. W. J.; Medlicott, H. B.; Miers, H. A.; Milne, J.; Powell, Major J. W.; Rudler, F. W.; Sollas, Prof. W. J.; Spencer J. W.; Story-Maskeleyne, M. H. N.; Suess, E.; Whitaker, W.; Woodward, H. B.

Mathematicians, Physicists, &c.:

Adams, Prof. W. G.; Allmann, Prof. W. G. J.; Basset, A. B.; Bertrand, J. L. F.; Besant, W. H.; Bidwell, S.; Bottomley, J. T.; Boys, C. V.; Bryan, G. H.; Bunsen, Prof. R. W. E.; Burbury, S. H.; Callendar, Prof. H. L.; Clifton, Prof. R. B.; Cornu, M. A.; Cotterill, J. H.; Cremona, Prof. L.; Crofton, Morgan W.; Darwin, Prof. G. H.; Elliott, E. B.; Esson, W.; Everett, J. D.; Ewing, Prof. J. A.; Fitzgerald, G. F.; Forsyth, A. R.; Foster, Prof. G. C.; Glaisher, J. W. L.; Glazebrook, R. T.; Gray, A.; Harley, Rev. R.; Henrici, O.; Hermite, Prof. C.; Hicks, W. M.; Hill, M. J. M.; Huggins, Sir W.; Hudson, Prof. W. H. H.; Jervis-Smith, Rev. F. J.; Joly, J.; Kelvin, Lord; Kempe, A. B.; Kohlrausch, F.; Lamb, H.; Larmor, J.; Lippmann, G.; Lodge, Prof. O. J.; Macmahon, Major P. A.; Mascart, E. E. N.; Mathews, G. B.; Mittag-Leffler, M. G.; Pearson, Prof. K.; Perry, Prof. J.; Poincaré, J. H.; Quincke, Prof. G.; Rayleigh, Lord; Reinold, A. W.; Roberts, S.; Röntgen, C. W.; Routh, E. J.; Rücker, Prof. A. W.; Salmon, Rev. G.; Schuster, Prof. A.; Scott, R. H.; Shaw, W. N.; Smith, C.; Stokes, Sir G. G.; Stoney, G. J.; Tait, Prof. P. G.; Taylor, Rev. C.; Thompson, Prof. S. P.; Thomson, Prof. J. J.; Tomlinson, H.; Walker, J. J.; Watson, Rev. H. W.; Williamson, Benjamin; Worthington, A. M.

Meteorologists:—Abbe, C.; Buchan, A.; Clayden, A. W.; Eliot, J.; Ellis, W.; Lancaster, A. B. M.; Symons, G. J.

Miscellaneous:—Bertillon, J.; Charnock, R. S.; Conroy, Sir J.; Evans, Sir J.; Fonvielle, W. de; Frankland, Prof. P. F.; Goodwin-Austen, Lieut.-Col. H. H.; Haliburton, R. C.; Hector, Sir J.; Hennessey, Prof. H.; Lockyer, Sir J. Norman; Ommanney, Adm. Sir E.; Sorby, H. C.; Stirling, E. C.; Strachey, Lieut.-Gen. Sir R.; Tristram, Rev. H. B.; Virchow R.; Wharton, Rear-Adm. Sir W. J. L.; Zenker, W.

Zoologists, Comparative Anatomists,

&c.:—Anderson, J.; Beddard, F. E. Bell, Jeffrey; Beneden, Prof. P. J. van Bickmore, A. B.; Blanford, W. T. Boulenger, G. A.; Brady, Prof. G. S. Buckton, G. B.; Buller, Sir W. L. Ewart, J. C.; Gadow, H. F.; Gegenbaur, C.; Giard, Prof. A.; Günther, A. C. L. G.; Haeckel, E.; Harting, J. E.; Herdman, W. A.; Hickson, S. J.; Kennedy, Capt. A. W. M. C.; Lankester, Prof. E. R.; Lowe, E. J.; Lydekker, R. Macalister, A.; M'Intosh, Prof. W. C. Metschnikoff, E.; Mivart, Prof. St. G. Murray, Sir J.; Newton, Prof. A.; Norman, Canon A. M.; Ormerod, E. A. Pettigrew, Prof. J. B.; Poulton, E. B. Schlater, P. L.; Sedgwick, A.; Seeley, Prof. H. G.; Sharpe, R. B.; Stebbing, Rev. T. R. R.; Stewart, Prof. C.; Tegetmeier, W. B.; Tones, C. S.; Traill, J. W. H.; Traquair, R. H.; Trevor-Battye, A. B. R.; Trimen, R.; Turner, Prof. Sir W.; Wallace, A. R.; Woodford, C. M.

Soldiers, Sailors, &c.:

Adye, Gen. Sir J. M.; Alger, R. A.; Alison, Gen. Sir A.; Anderson, Gen. W. W.; Arabi, A.; Ardagh, Maj.-Gen. Sir J. C.; Baird, Lieut.-Col. A. W.; Baldissera, Gen.; Baratieri, Gen.; Barker, Lieut.-Gen. G. D.; Bedford, Vice-Adm. Sir F.; Bedford, Sir F. G. D.; Beresford, Rear-Adm. Lord Chas.; Beresford, Lord W. L. de la P.; Bernard, A. L. C. G.; Biddulph, Gen. Sir M. A. S.; Biddulph, Gen. Sir R.; Billot, J. F.; Blair, Lieut.-Gen. J.; Blood, Brigadier-Gen. Sir B.; Blumenthal, Field-Marshal L., Count von; Brialmont, Gen. A. H.; Brackenbury, Lieut.-Gen. Sir H.; Browne, Gen. Sir S. J.; Buckle, Vice-Adm. C. E.; Buller, Adm. Sir A.; Buller, Lieut.-Gen. Sir Redvers H.; Butler, Major-Gen. Sir W. F.; Carrington, Major-Gen. Sir F.; Chamberlain, Gen. Sir N. B.; Chelmsford, Lord; Clanwilliam, Earl of; Clarke, Lieut.-Gen. Sir A.; Clarke, Col. Sir G. S.; Cluseret, G. P.; Colomb, Sir J. C. R.; Colomb, Vice-Adm. P. H.; Colville, Maj.-Gen. Sir H. E.; Commerell, Adm. of the Fleet Sir J. E.; Connaught, Duke of; Cotton, Gen. Sir A. T.; Culme-Seymour, Adm. Sir M.; Davis, Gen. Sir J.; Dewey, George; Dickson, Gen. Sir C.; Dodds, A. A.; Domville, Vice-Adm. Sir C. E.; Dragoumirow, Gen.; Draper, W. F.; Duchesne, J. C. R. A.; Erskine, Adm. Sir J. E.; Evans, R. D.; Fairfax, Adm. Sir H.; Falmouth, Viscount; Fisher, Vice-Adm. Sir J. A.; FitzGeorge, Col. A. C. F.; Fitzwygram, Gen. Sir F. W. J.; Forestier-Walker, Lieut.-Gen. Sir F. W. E.; Foster, J. W.; Fremantle, Gen. A. J. L.; Fremantle, Adm. the Hon. Sir E. R.; Froude, R. E.; Gallifet, Marquis de;

Gatacre, Maj.-Gen. Sir W. F.; Gipps, Gen. Sir R. R.; Gomez, M.; Gorgei, Gen. A.; Gough, Gen. Sir C. J. S.; Gough, Gen. Sir H. H.; Gourand, Capt.; Gourko, Count; Graham, Sir G.; Grant, F. D.; Grant, Lieut.-Gen. Sir R.; Greely, Brigadier-Gen. A. W.; Grenfell, Lieut.-Gen. Sir F. W.; Grenfell, Lieut.-Col. H. R.; Grove, Maj.-Gen. Sir C.; Haines, Field-Marshal Sir F. P.; Harris, Rear-Adm. Sir R. H.; Harrison, Gen. Sir R.; Hawell, J. A.; Hay, Rt. Hon. Sir J. C. D.; Heneage, Adm. Sir A. C. F.; Hobson, R. P.; Hopkins, Adm. Sir J. O.; Hornby, Adm. of the Fleet; Hoskins, Adm. Sir A. H.; Hotham, Adm. Sir C. F.; Howard, Gen. O. O.; Hunter, Maj.-Gen., Sir A.; Hunt-Grubbe, Adm. Sir W. P.; Ignatieff, N. P.; Ito, Adm.; Joinville, Prince de; Joubert, Gen. P. J.; Kelly, Col. J. G.; Kelly-Kenny, Maj.-Gen. T.; Kemball, Gen. Sir A. B.; Keppel, Adm. the Hon. Sir H.; Keratry, Comte de; Kitchener, Lord; Kouroupatkin; Lee, F.; Lingen, Lord; Lockhart, Gen. Sir W. S. A.; Longstreet, Gen. J.; Low, Lieut.-Gen. Sir R. C.; Lowe, Lieut.-Gen. Sir D. C. Drury; Luck, Maj.-Gen. Sir G.; Lugard, Col. F.; Lumsden, Gen. Sir P. S.; Lyons, Sir A. McL.; McCalmont, Maj.-Gen. H.; McClintock, Adm. Sir F. L.; Macdonald, Col. H. A.; Mahan, Capt. A. T.; Maitland, Maj.-Gen. Sir J. M. H.; Markham, Lieut.-Gen. Sir E.; Melville, G. W.; Merritt, W.; Methuen, Lord; Miles, Maj.-Gen. N. A.; Moukhtar-Pacha; Newdigate-Newdegate, Lieut.-Gen. Sir E.; Noble, Capt. Sir A.; Noel, Rear-Adm.; Norman, Gen. Sir H. W.; Ommanney, Adm. Sir E.; Paget, Rt. Hon. Lord C. E.; Palmer, Maj.-Gen. Sir A. P.; Parsons, Colonel Sir Charles Sim Bremridge; Philip, J. W.; Picquart, Col. G.; Porter, Gen. H.; Prendergast, Gen. Sir H. N. D.; Proctor, R.; Rawson, Vice-Adm. Sir H. H.; Richards, Adm. Sir F. W.; Roberts, Field-Marshal Lord; Rundle, Maj.-Gen. H. M. L.; Russell, Gen. Sir B. C.; Salmon, Adm. Sir N.; Sampson, W. T.; Saussier, F. G.; Saxe-Weimar, H.H. Prince of; Schleswig-

Holstein, H.S.H. Prince Christian Victor of; Schley, Rear-Adm. W. S.; Schofield, Gen. J. McCa.; Scott, Maj.-Gen. Sir F. C.; Seymour, Vice-Adm. Sir E. H.; Shafter, W. R.; Simmons, Field-Marshal Sir J. L.; Stephenson, Vice-Adm. Sir H. F.; Stewart, Field-Marshal Sir D. M.; Stokes, Lieut.-Gen. Sir J.; Talbot, Major the Hon. M. G. T.; Talbot, Maj.-Gen. the Hon. R. A. J.; Teck, H.S.H. Prince Adolphus of, H.S.H. Prince Alex. of, Capt. H.S.H. Prince F. of; Thibaudin, J.; Tredegar, Lord; Türr, Gen. S.; Tuson, Gen. Sir H. B.; Waldersee, Gen. Count von; Watson, J. C.; Weyler, Don V. y N.; Wharton, Rear-Adm. Sir W. J. L.; Wheeler, J.; White, Gen. Sir G. S.; Wilson, Rear-Adm. A. K. and Sir C. W.; Wingate, Col. Sir F. R.; Wolseley, Viscount; Wood, Gen. Sir H. E.; Younghusband, Lieut.-Gen. C. W.

Travellers, Explorers, Geographers,

&c.:—Andrée, S. A.; Bonvalot, P. G.; Broome, Lady; Conway, Sir W. Martin; Cosson, C. A. de; Coxwell, H. T.; Crichton-Browne, Capt. H. W. A. F.; Davidson, Prof. G.; De Windt, Harry; Du Chaillu, P. B.; Fitzgerald, E. A.; Gordon-Cumming, Miss C. F.; Harmsworth, A. C. W.; Hedin, S. A.; Jackson, F. G.; Kennan, G.; Kingsley, M. H.; Kropotkin, Prince P.; Landor, A. H. S.; Lansdell, Rev. H.; Lindsay, D.; Longstaff, L. W.; Lowell, P.; McLintock, Admiral Sir F. L.; Marchand, Major T.; Markham, Sir C. R.; Meyer, H.; Nansen, F.; Nares, Vice-Admiral Sir G. S.; Nordenskiöld, Baron; Norman, H.; Ohrwalder, Father; Orleans, Prince H. of; Peary, Lieut. R. E.; Pinto, A. A. da R. Serpa; Ravenstein, E. G.; Réclus, J. E.; Sella, V.; Sladen, D.; Slatin Pasha, Sir R. C.; Smith, B. L.; Stanley, H. M.; Sverdrup, O.; Thompson, J.; Thuillier, Gen. Sir H. E. L.; Trevor-Battye, A. B. R.; Tristram, Rev. H. B.; Vambery, Prof. A.; Webster, H. A.; Whympers, E.; Wissman, Maj. H. von; Woodford, C. M.; Young, Sir A.; Younghusband, Capt. F. E.

NECROLOGY

The following are the dates of publication of the various editions of this book :—

1st edition 1852	6th edition 1865	11th edition 1884
2nd " 1853	7th " 1868	12th " 1887
3rd " 1856	8th " 1872	13th " 1891
4th " 1857	9th " 1875	14th " 1895
5th " 1862	10th " 1879	15th " 1899

The 1st edition contained only 300 biographies ; the present contains upwards of 3400.

The Necrology, numbering about 3300 entries, begins with those whose names appeared in the 5th edition ; and that quoted in the following list is the last in which the biography of the person referred to was published.

Name.	Date of Birth.	Date of Death.	Edition.
A'ALI PASHA	1815	Sept. 6, 1871	7
Aarifi Pasha	1830	Dec. 6, 1895	14
Abbot, Gorham Dummer	Sept. 3, 1807	Aug. 3, 1874	9
Abbott, Jacob	Nov. 14, 1803	Oct. 31, 1879	10
Abbott, John Stephens Cabot	Sept. 18, 1805	June 17, 1877	9
Abd El-Kader 1883	10
Abdul-Aziz Khan, Sultan of Turkey	Feb. 9, 1830	June 3, 1876	9
A'Beckett, Sir W.	June 27, 1869	7
Abercorn, Duke of	Jan. 21, 1811	Oct. 31, 1885	11
Aberdare, Rt. Hon. Lord	April 16, 1815	Feb. 25, 1895	14
About, Edmund	Feb. 14, 1828	Jan. 16, 1885	11
Abyssinia, Theodore, King of	April 13, 1868	7
Acland, Rt. Hon. Sir Thomas Dyke, Bart., D.C.L.	May 25, 1829	May 29, 1898	14
Adams, Charles Francis	Aug. 18, 1807	Nov. 21, 1886	12
Adams, Sir Francis	July 20, 1889	12
Adams, Jno. Couch, M.A., F.R.S.	June 5, 1819	Jan. 21, 1892	13
Adams, John Quincey	Sept. 22, 1833	Aug. 14, 1894	13
Adams, W. Davenport	Dec. 30, 1891	13
Adams, Wm., D.D.	Jan. 25, 1807	Aug. 30, 1880	10
Adams, Wm. Bridges	July 23, 1872	8
Adams, W. H.	Aug. 28, 1865	6
Adler, G. J.	Aug. 24, 1868	7
Adler, the Rev. Nathan Marcus	Jan. 21, 1890	12
Agassiz, Louis J. R.	May 28, 1807	Dec. 14, 1873	8
Aimard, Gustave	Sept. 13, 1818	April 30, 1883	10
Ainmüller, Maximilian E.	Dec. 9, 1877	7
Ainsworth, William Francis, F.S.A., F.R.G.S.	Nov. 27, 1896	14
Ainsworth, William Harrison	Feb. 4, 1805	Jan. 3, 1882	10
Aird, Tho.	Aug. 28, 1802	April 25, 1876	9
Airey, Lord	April, 1803	Sept. 14, 1881	10
Airy, Sir Geo., K.C.B., F.R.S.	Nov. 27, 1801	Jan. 1, 1892	13
Aitchison, Brig.-Surgeon James E. T., M.D., LL.D.	Oct. 30, 1898	14
Aitken, Sir W. (M.D.)	June 25, 1892	13
Akerman, J. Yonge	June 12, 1806	Nov. 18, 1873	8
Albany, Leopold, Duke of	April 7, 1853	Mar. 28, 1884	11
Albert, Prince	Aug. 26, 1819	Dec. 14, 1861	5
Alcester, Lord, P.C., G.C.B.	April 12, 1821	April, 1895	14
Alcock, Sir Rutherford, F.R.C.S., K.C.B., D.C.L.	Nov. 2, 1897	14

Name.	Date of Birth.		Date of Death.		Edition.
Alcott, Amos Bronson	Nov. 29,	1799	Mar. 4,	1888	12
Alcott, Louisa May	Nov. 29,	1832	Mar. 5,	1888	12
Alcott, W. A., M.D.	1798	...	1859	8
Alderson, Sir James, M.D.	Sept. 13,	1882	10
Alexander of Battenberg, Prince	1857	Nov. 17,	1893	13
Alexander, Lieut.-Gen. Sir J. E.	1803	April 2,	1885	12
Alexander II., Emp. of Russia	April 17,	1818	Mar. 13,	1881	10
Alford, Rt. Rev. Charles, D.D.	1816	June 13,	1898	14
Alexander III., Emp. of Russia	Mar. 10,	1845	Nov. 1,	1894	13
Alexander, Lieut.-Gen. Sir J. E.	1803	April 2,	1885	12
Alexander, Stephen	Sept. 1,	1806	June 25,	1883	11
Alexander, Rev. William L.	Aug. 24,	1808	Dec. 20,	1884	11
Alfonso, King of Spain	Nov. 28,	1857	Nov. 25,	1885	11
Alford, Rev. Hy., Dean of Canterbury	Oct. 7,	1810	Jan. 12,	1871	7
Alice, Princess	April 25,	1843	Dec. 14,	1878	9
Alison, Sir Archibald	Dec. 29,	1792	May 23,	1867	7
Allen, Wm., D.D.	Jan. 2,	1784	July 16,	1868	7
Alleyne, Maj.-Gen. Sir James, K.C.B.	May 13,	1842	April 23,	1899	15
Allibone, Samuel Austin	April 17,	1816	Sept. 2,	1889	12
Allingham, William	Mar. 19,	1824	Nov. 18,	1889	12
Allman, Professor George James, M.D., F.R.S.	1812	Nov. 24,	1898	15
Allon, Rev. Henry, D.D.	Oct. 13,	1818	April 16,	1892	13
Almquist, K. J. L.	1793	Oct. 26,	1866	7
Amadeus, Prince, Duke of Aosta	May 30,	1845	Jan. 18,	1890	12
Amari, Michele	July 7,	1806	July,	1889	12
Amherst, Francis Kerrill, D.D.	1819	Aug. 21,	1883	11
Ampère, J. J. A.	Aug. 12,	1800	Mar. 27,	1864	5
Amphlett, Sir Richard Paul	1809	Dec. 7,	1883	11
Amphill, Lord (Ambassador)	Feb. 20,	1829	Aug. 25,	1884	11
Anderdon, Rev. W. H.	Dec. 26,	1816	July 28,	1890	12
Andersen, Hans Christian	April 2,	1805	Aug. 4,	1875	9
Anderson, Arthur	1792	Feb. 28,	1868	7
Anderson, Sir Henry Lacon	1817	April,	1879	10
Anderson, Rev. J. S. M.	1798	Sept. 27,	1869	7
Anderson, Rob., Brigadier-Gen.	1806	Oct. 26,	1871	7
Anderson, Wm., LL.D.	1799	Sept. 15,	1872	8
Anderson, Sir William, K.C.B., F.R.S., D.C.L.	Jan. 5,	1835	Dec. 11,	1898	15
Andrassy, (Count) Julius	Mar. 8,	1823	Feb. 18,	1890	12
Andrew, John Albion	May 31,	1818	Oct. 30,	1867	7
Annenkow, General	1838	Jan. 22,	1899	15
